	Paper Title:	Spirituality an Approach to Transform Self	
	<p>Abstract: It is recognized that over the millennium, human civilization has progressed successfully. This progression of civilization is described in terms of pre-industrial agricultural society to post-industrial information and knowledge society. The advent of the industrial revolution has brought material abundance, and a mechanical society emerged, but man became a machine and has regressed like never before. The key question is how to prevent this fall of man, and thereby restore his harmonic nature. This question can only be addressed by spiritual way of life through techniques like ethical conduct, peaceful talk, functioning through heart and altruism as an essential way of life for self management and transformation as an end result. This paper attempts to explain certain spiritual processes and techniques for self transformation from an ordinary self to a transformed individual who can function in today's world as a corporate yogi if practiced well.</p>		4-8
