6. AVAILABILITY OF INSTRUCTIONAL RESOURCES AND INFORMATION TECHNOLOGY

UCit, the University of Cincinnati's Office of Information Technologies, provides several technology resources dedicated to supporting student learning. These services include:

18 computer labs and computer classrooms. Located all around campus, UCit's computer labs and computer classrooms provide general-purpose software applications and Internet access to all students. The newest of these is UCit@Langsam, a 100-seat computer lab that is open 24x7 and includes group study rooms with Smart Boards and a quiet study area for laptop use.

Over 100 electronic classrooms. These classrooms are equipped with a variety of multimedia technologies, including a smart control system, 1-3 projectors, computer with DVD, document camera, laptop connectivity, and sound reinforcement (wireless microphones, where necessary). Rooms can be equipped for podcasting, rich media capture, and video conferencing on demand. VCR playback, personal response systems, and annotative technology (e.g., Smart Board) are available in some locations.

UCFileSpace. This service provides each student with 1 GB of online storage, available from anywhere on or off campus. Additional features include personal, group, and course-based hosting of web sites, blogs, wikis, and streaming media. Command line access to a Unix shell is also available.

Blackboard. The Blackboard Learning Management System provides online access to course information, including syllabi, lecture notes, and other materials posted by the instructor.

ResNet. The ResNet program, a joint project between the Division of Housing and UCit, brings wired and wireless network connections to university housing, providing high-speed data connectivity to students living in the residence buildings and off campus.

Campus wireless. University of Cincinnati has implemented an enterprise-class wireless network consisting of nearly 700 access points with over 5,000 registered wireless users. The wireless network is compliant with 802.11b and 802.11g standards, delivering speeds up to 54 Mbps (megabits per second). As this network grows, it will provide more coverage on-campus as well as the campus edge included with the implementation of the Uptown wireless mesh network.

Remote access.

- For students without broadband access from home, UCRA is a dial-up access modem pool that provides the UC community with home access from the local Cincinnati calling area to the UC Network (UCNet) and the Internet using a computer and a standard telephone line. The UCRA service is available, free of charge, to all registered UC students. 92 modem lines are dedicated to student use.

- The VPN (Virtual Private Network) service provides secure connections to campus resources that are not available to the general public, including departmental file servers and other network resources.

University Libraries provide several technology resources dedicated to supporting student learning. These services include:

- **24/7 access** to an ever-expanding number of e-resources including 86,594 full-text online journals, more than 400,000 e-books and 700+ online electronic databases and indexes, electronic theses and dissertations, and the Digital Resource Commons (OhioLINK)

- **UCit@Langsam** – a 24/7 computer and quiet study space that features 100 computers, wireless access, and four group study rooms with SMARTBoards
- **E-Reserves** delivered via Blackboard
- **Student Technology Resources Center (STRC) and Multimedia Equipment** – offer instructional technology resources and assistance for students to complete course assignments that require the use of media, specialized software, and instructional equipment; and, equipment available for checkout by UC students, and faculty (laptops, projectors, digital cameras and camcorders)
- **6 Info Commons** – bring together one-stop service points to provide students with high-end computers, information resources, and reference assistance
- Over **400 public computers and wireless access** across 11 library locations – connect users to e-resources, the Library Catalog, Web site, the Internet, and other software and programs
- **Disability Services** – access to technology and library services for disabled users
- **Chat with a Librarian** online reference assistance
- **Online library tutorials**
- **Library instruction** on the use of technology and online library resources

The Office of Housing and Food Services provides several technology resources dedicated to supporting student learning. These services include a dedicated (wired) network connection for each student in each bedroom within the residence – total of 4500 connections (this includes the affiliated housing properties). Approximately 98% of our residential students bring a computer. In the lobby of each residence hall UC provides a wired kiosk, available to all residents of the building. In addition, wireless network connections are available in all dining centers on campus as well as most retail food locations. For specific information about monitoring I would refer you to speak with Mark Faulkner in UCIT. In the area of “other technology resources” we make available televisions in community space of each hall. Students are able to connect DVD players or VCRs to these TV’s for personal/educational use.

Funding for Instructional Resources and Information Technology includes the *Information Technology and Instructional Equipment* (ITIE) fee. The ITIE fee is used to fund improved access to information technology and support other types of instructional equipment. This fee and total actual revenue from this fee is shown in the table below.

FY 2007:	Fee(per term): \$105	Total Revenue: \$7,015,521
FY 2008:	Fee(per term): \$105	Total Revenue: \$7,261,850

Note: Law students pay \$158 per semester and College of Medicine students are not charged the ITIE fee.

Usage of all of these services is monitored using methods that are appropriate for the particular service, including login records, network utilization, course enrollment, library gate counts, computer login counts, library web site usage statistics, circulation counts, group study room usage counts, database usage statistics, and various other metrics.
