17. Rowlands, Nicholas, Jamali, and Huntington, "What Do Faculty and Students Really Think About E-Books?" 492.
18. When possible, responses under "Other (please specify)" were tallied under the other options. For example, two respondents each named iBooks and iTunes, which we coded as commercial Web sites. Four responses could not be recoded and were left as "Other:" (1) scanned books [2 responses], (2) Calibre software [1 response]; (3) iPhone [1 response]; and (4) borrowed from family member [1 response].
19. Percentages for questions 12 and 13 reflect the proportion of the total number of responses to this question, not the proportion of respondents, because respondents could check more than one answer.
