

Mickleover Primary School
Calculation Policy
MULTIPLICATION

	<i>Learning Objectives</i>	<i>Success criteria</i>	<i>Method</i>
EYFS	Solve problems involving doubling.	Using concrete apparatus, children will be able to find a given number by placing objects in groups where each group is identical in number.	<ul style="list-style-type: none">In practical activities and through discussion they will begin to use the vocabulary involved in multiplication - groups, lots, double.Through practical activities solve problems including doubling. <p>'You have 3 lollies and your friend gives you 3 more. How many do you have altogether?'</p>  <p>They will record pictorially then numerically</p> <p>$3+3=6$ lollies Double 3 is 6</p>

Year 1

	<i>Learning Objectives</i>	<i>Success Criteria</i>	<i>Method</i>
	<ul style="list-style-type: none">• Solve one-step problems involving multiplication by calculating the answer using concrete objects, pictorial representations	<p>Children will be able to count in 2's, 5's and 10's.</p> <p>Understands that doubling is adding the same number again.</p>	<p>Can put objects and pictures into groups and can count repeated groups of the same size.</p>   

	<i>Learning Objectives</i>	<i>Success Criteria</i>	<i>Method</i>
Year 2	<ul style="list-style-type: none"> Recall & use multiplication facts for 2, 5 & 10 tables, including recognising odd and even numbers Calculate mathematical statements for multiplication within the multiplication tables; write them using multiplication & equals (=) signs. Show that multiplication of two numbers can be done in any order (commutative) Solve problems involving multiplication, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts. 	<p>Count forward and backward in 2s, 5s and 10s.</p> <p>Know multiplication facts for the 2, 5 and 10 times table up to x12.</p> <p>Understand multiplications as 'lots' of the same thing.</p> <p>Understand multiplication as repeated addition.</p> <p>Make connections between the 10 times table and place value.</p> <p>Recognise and use arrays to represent multiplication.</p> <p>Understand that multiplication is commutative e.g. $4 \times 3 = 3 \times 4$</p>	<p>1) Using a 100 square to discuss patterns when counting.</p>  <p>2) Solve multiplication through repeated addition.</p>  <p>$5 + 5 + 5 = 3 \times 5 = 3 \text{ groups of } 5 = 15$</p> <p>And on a bead bar $5 \times 3 = 5 + 5 + 5$</p> <p>$5 \times 3 = 5 + 5 + 5$</p> <p>3) Use arrays to represent a multiplication calculation.</p>  <p>$3 \times 5 = 15$</p> <p>$3 \times 2 = 6$</p> <p>$5 \times 3 = 15$</p> <p>$2 \times 3 = 6$</p>

Year 3

	<i>Learning Objectives</i>	<i>Success Criteria</i>	<i>Method</i>														
	<p>Recall & use \times and \div facts for the 3, 4 and 8 tables.</p> <ul style="list-style-type: none"> • Write and calculate statements for \times and \div using tables they know, including for $TU \times U$ using mental and progressing to formal written methods. • Solve problems, including missing number problems, involving multiplication and division, including integer scaling problems and correspondence problems in which n objects are connected to m objects. 	<p>Count forward and backward in multiples of 3 4 and 8</p> <p>Understand that multiples of 4 can be derived from doubling multiples of 2</p> <p>Understand that multiples of 8 can be derived from doubling multiples of 4</p> <p>Understand that division is the inverse of multiplication. e.g. $4 \times 3 = 12$, $3 \times 4 = 12$, $12 \div 3 = 4$, $12 \div 4 = 3$.</p>	<p>Extend the use of arrays, rods and counters to solve two-digit multiplied by one-digit (introduction of grid method).</p> <p>$13 \times 4 = (10 \times 4) + (3 \times 4)$</p>  <p>In books:</p> <table border="1" data-bbox="1262 816 1793 927"> <tr> <td>x</td> <td>1</td> <td>0</td> <td>3</td> <td></td> <td></td> <td></td> </tr> <tr> <td>4</td> <td>4</td> <td>0</td> <td>1</td> <td>2</td> <td>=</td> <td>5 2</td> </tr> </table> <p>$13 \times 4 = (10 \times 4) + (3 \times 4)$ $40 + 12 = 52$</p>	x	1	0	3				4	4	0	1	2	=	5 2
x	1	0	3														
4	4	0	1	2	=	5 2											

Year 4

<i>Learning Objectives</i>	<i>Success criteria</i>	<i>Method</i>																																																																																				
<ul style="list-style-type: none"> Recall multiplication and division facts up to 12×12. Use place value, known and derived facts to multiply and divide mentally, including: multiplying by 0 and 1; dividing by 1; multiplying together three numbers. Recognise and use factor pairs and commutativity in mental calculations. Multiply two-digit and three-digit numbers by a one-digit number using formal written layout. Solve problems involving multiplying and adding, including using the distributive law to multiply two digit numbers by one digit, integer scaling problems and harder correspondence problems such as n objects are connected to m objects. 	<p>Understand place value in three-digit numbers.</p> <p>Understand how the 2, 4 and 8 times tables and the 3 and 6 times tables are connected through doubling.</p> <p>Understand how to multiply larger numbers by using related facts, e.g. $400 \times 3 = 1200$ by using $4 \times 3 = 12$</p> <p>Understand effect of multiplying by 10 and 100 (shifting digits to the left).</p> <p>Understand how the inverse can be used to check answers.</p>	<p>Multiply HTU \times U or HT \times U using grid method and vertical method alongside.</p> <p>I.e 13×4</p> <div style="display: flex; justify-content: space-around; align-items: flex-start;"> <table border="1" style="border-collapse: collapse; text-align: center;"> <tr><td>x</td><td>1</td><td>0</td><td>3</td><td></td><td></td></tr> <tr><td>4</td><td>4</td><td>0</td><td>1</td><td>2</td><td>= 5 2</td></tr> </table> <div style="text-align: right;"> $\begin{array}{r} 13 \\ \times 4 \\ \hline 12 \\ 40 \\ \hline 52 \end{array}$ <p style="margin-left: 20px;">4×3 4×10</p> </div> </div> <div style="display: flex; justify-content: space-around;"> <table border="1" style="border-collapse: collapse; text-align: center;"> <tr><td>2</td><td>2</td><td>8</td><td>x</td><td>8</td><td></td><td></td><td></td></tr> <tr><td></td><td></td><td></td><td>x</td><td>2</td><td>0</td><td>0</td><td></td></tr> <tr><td></td><td></td><td></td><td>8</td><td>1</td><td>6</td><td>0</td><td>0</td></tr> <tr><td></td><td></td><td></td><td></td><td>1</td><td>6</td><td>0</td><td>0</td></tr> <tr><td></td><td></td><td></td><td></td><td>6</td><td>4</td><td></td><td></td></tr> <tr><td></td><td></td><td></td><td></td><td>1</td><td>8</td><td>2</td><td>4</td></tr> </table> <table border="1" style="border-collapse: collapse; text-align: center;"> <tr><td>2</td><td>2</td><td>8</td><td></td></tr> <tr><td></td><td></td><td></td><td>x 8</td></tr> <tr><td></td><td></td><td></td><td>6 4</td></tr> <tr><td></td><td></td><td></td><td>1 6 0</td></tr> <tr><td></td><td></td><td></td><td>1 6 0 0</td></tr> <tr><td></td><td></td><td></td><td>1 8 2 4</td></tr> </table> </div> <p>Leading to in Y5</p> <p>HTU \times U carrying above to avoid confusion with carrying below</p> $\begin{array}{r} 1^2 1^2 3 \\ \times 6 \\ \hline 1338 \end{array}$	x	1	0	3			4	4	0	1	2	= 5 2	2	2	8	x	8							x	2	0	0					8	1	6	0	0					1	6	0	0					6	4							1	8	2	4	2	2	8					x 8				6 4				1 6 0				1 6 0 0				1 8 2 4

	<i>Learning Objectives</i>	<i>Success Criteria</i>	<i>Method</i>
YEAR 5	<ul style="list-style-type: none"> multiply and divide numbers mentally drawing upon known facts <p>Multiply and divide whole numbers and those involving decimals by 10, 100 & 1000.</p> <ul style="list-style-type: none"> Recognise and use square numbers & cube numbers and notation for squared ², cubed ³ 	<p>Children will be able to multiply numbers mentally by drawing on known facts</p> <p>Children will be able to multiply whole numbers and decimals by 10, 100, 1000</p> <p>Children will understand the terms squared and cubed as repeated multiplication.</p>	<p><i>Ie. Calculate</i></p> <p>66 x5 by multiplying by 10 and halving 66 x 20 by doubling and multiplying by 10 66 x 15 by multiplying by 10 then adding half of this to the answer</p> <p>285 x 4 by doubling and doubling 25 x 9 by multiplying by 10 then subtracting 25 25 x 11 by multiplying by 10 and adding 25</p> <p>Children will be taught that when x by 10, 100, 1000 the number moves one place to the left NEVER adding a zero, or two zeros etc.</p> <p>3² is equivalent to 3 x 3 3³ is equivalent to 3 x 3 x3</p>

	<i>Learning objective</i>	<i>Success Criteria</i>	<i>Method</i>
YEAR 5	<ul style="list-style-type: none"> • Solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes • Solve problems involving + - x ÷ and a combination of these, including understanding meaning of = sign • Solve problems involving x and ÷ including scaling by simple fractions & problems involving simple rates. • Multiply proper fractions & mixed numbers by whole numbers, 	<p>Children will be able to identify the correct operation to use when solving problems Including money, measures, scaling and simple rates</p> <p>Children will be able to multiply fractions by whole numbers</p>	<p>3/5 x5 using visual images and objects. Ie 5 lots of 1/5 1/5 1/5= 15/5= 3</p>

	<i>Learning Objective</i>	<i>Success Criteria</i>	<i>Method</i>
Year 6	<ul style="list-style-type: none"> • . Multiply One-digit numbers with up to two decimal places by whole numbers (U.th hth x U) • Solve problems using multiplication, including decimals and measures, • Multiply simple pairs of proper fractions, writing the answer in its simplest form [for example $1/4 \times 1/2 = 1/8$] 	<p>Children will be able to multiply U.th hth x U</p> <p>Children will be able to use multiplication to solve scale factor problems and multi step problems</p> <p>Children will be able to multiply simple fractions</p>	<p>Building on written methods in y5 children will become confident in using the formal written method for multiplication</p> <p>http://tube.geogebra.org/student/m27374 Using visual representations show that $2/5 \times 2/3$</p> <hr/> 

Using Arrays to Show Multiplication Concepts: Overview

An arrangement of objects, pictures, or numbers in columns and rows is called an **array**. Arrays are useful representations of multiplication concepts.

Look at this example

When equal groups are arranged in equal rows, an array is formed

This array has 4 rows and 3 columns.
It can be described as a 4 by 3 array.

This array has 5 rows and 4 columns.
It is a 5 by 4 array

$$\begin{array}{c} 2 \\ \uparrow \\ \text{rows} \end{array} \times \begin{array}{c} 5 \\ \uparrow \\ \text{objects in} \\ \text{each row} \end{array} = \begin{array}{c} 10 \\ \uparrow \\ \text{total number} \\ \text{of objects} \end{array}$$

$$\begin{array}{c} 2 \\ \uparrow \\ \text{rows} \end{array} \times \begin{array}{c} 5 \\ \uparrow \\ \text{objects in} \\ \text{each row} \end{array} = \begin{array}{c} 10 \\ \uparrow \\ \text{total number} \\ \text{of objects} \end{array}$$

$$\begin{array}{c} \text{factor} \\ \downarrow \\ 6 \\ \uparrow \\ \text{rows} \end{array} \times \begin{array}{c} \text{factor} \\ \downarrow \\ 3 \\ \uparrow \\ \text{objects in} \\ \text{each row} \end{array} = \begin{array}{c} \text{product} \\ \downarrow \\ 18 \\ \uparrow \\ \text{total number} \\ \text{of objects} \end{array}$$

$$\begin{array}{c} \text{factor} \\ \downarrow \\ 3 \\ \uparrow \\ \text{rows} \end{array} \times \begin{array}{c} \text{factor} \\ \downarrow \\ 6 \\ \uparrow \\ \text{objects in} \\ \text{each row} \end{array} = \begin{array}{c} \text{product} \\ \downarrow \\ 18 \\ \uparrow \\ \text{total number} \\ \text{of objects} \end{array}$$

When you show students the connection between equal groups and arrays, students can easily understand how to use arrays to multiply. They will use arrays again later to divide. Look at the multiplication sentence that describes the array above. The numbers in multiplication sentences have special names. The numbers that are multiplied are called factors. The answer is called the product. Now look at what happens to the factors and product in the multiplication sentence when the array is turned on its side. The order of the factors changed, but the product stayed the same. When the order of the factors in any multiplication sentence changes, the product does not change. This is called the Commutative Property of Multiplication. Students should be familiar with the Commutative

Models and images for understanding multiplication and division

$2 + 2 + 2 + 2 + 2 = 10$
 $2 \times 5 = 10$
 2 multiplied by 5
 5 pairs
 5 hops of 2

$5 + 5 + 5 + 5 + 5 + 5 = 30$
 $5 \times 6 = 30$
 5 multiplied by 6
 6 groups of 5
 6 hops of 5

$10p + 10p + 10p + 10p + 10p = 50p$
 $10p \times 5 = 50p$
 5 hops of 10

$4 \times 2 = 8$

$2 \times 4 = 8$

$2 \times 4 = 8$

$4 \times 2 = 8$

$5 \times 2 = 10$

$2 \times 5 = 10$

$2 \times 5 = 10$

$5 \times 2 = 10$

half of 8 is 4
 $8 \div 2 = 4$

double 4 is 8
 $4 \times 2 = 8$

I'm 3 times
 as tall as you.
 I'm 3 metres tall.

I'm only
 1 metre tall.

$4 \times 3 = 12$

How many 3s
 in 15?

$15 \div 3 = 5$

5 hops in 15. How big is each hop?

$15 \div 5 = 3$

15 shared between 5

Three times as many

Twice as many

$12 \times 2 = 24$
