

## S3.Google Translator for Firefox

**S3.Google Translator** adds the power of automatic translations to your browser!

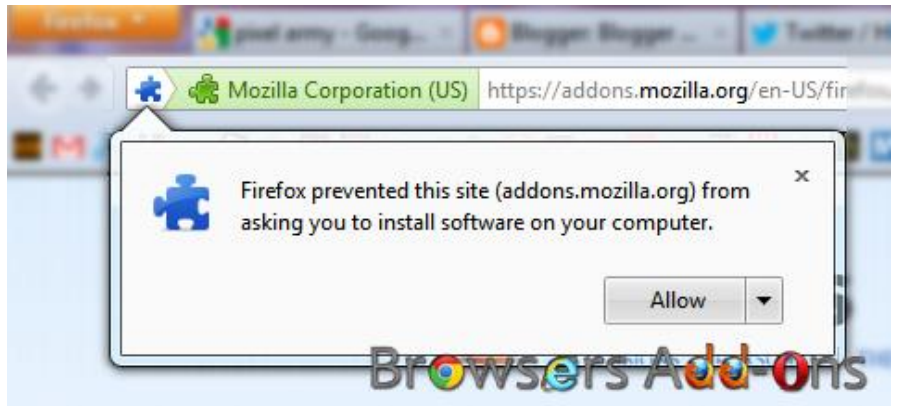

It supports translation of selected text, entered phrase or whole webpage between any of 50+ languages. It can auto-detect foreign language and translate to a desired language.

### HOW TO: Installing S3.Google Translator on Mozilla Firefox:

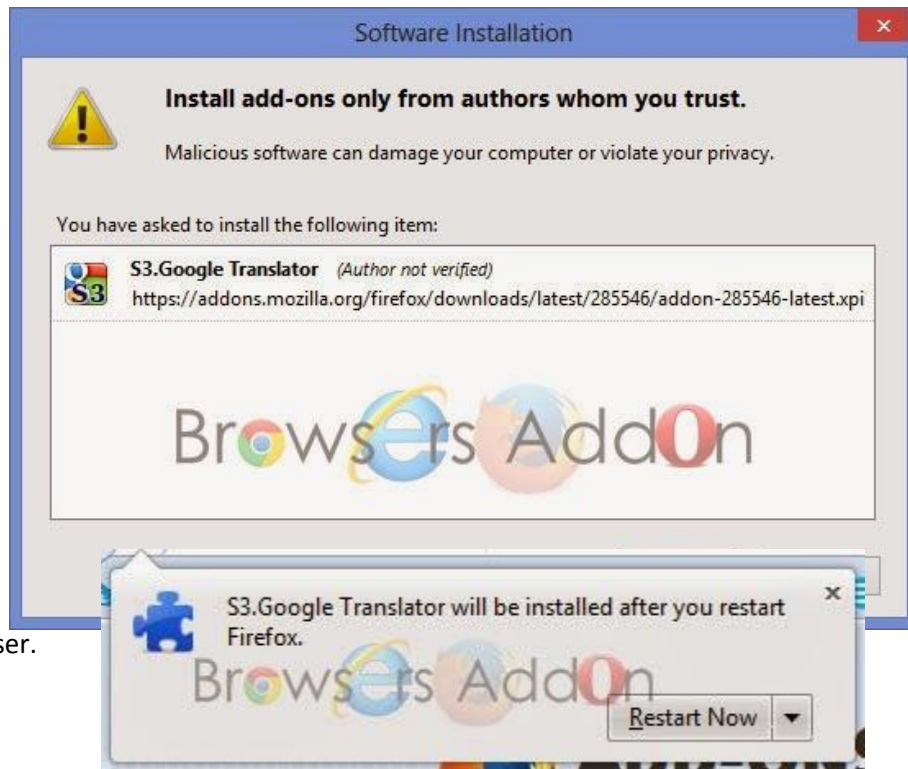

1. Go to [S3.Google Translator](#) Mozilla add-on page, or simply click on the above [download](#) link and click on "Add to Firefox".

2. If Mozilla Firefox asks user permission for installation of add-on. Click "Allow" to continue installation, leave it to abort.

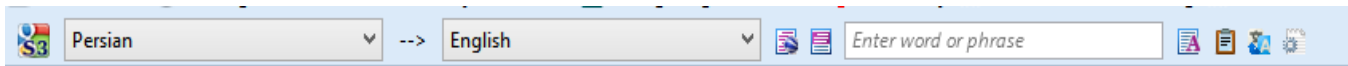

3. S3.Google Translator installation box pops-up. Click "Install Now" to continue installing add-on, "Cancel" to abort installation.

4. On successful installation, S3.Google Translator asks user permission to restart the browser. Restart the browser to activate the add-on.

## HOW TO: Using S3.Google Translator on Mozilla Firefox:

1. On successful installation, you will notice S3.Google Translator toolbar.

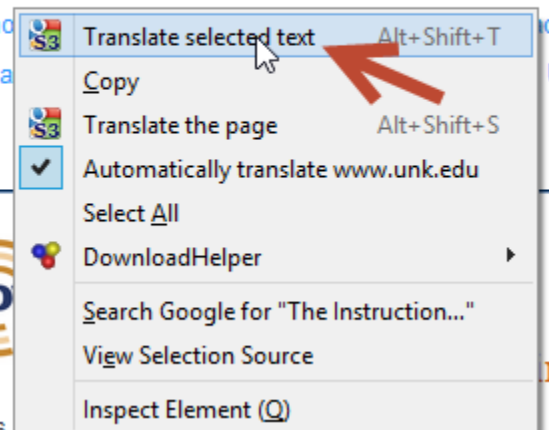

2. To translate certain text, select the desired words or sentence and click on "Translate selected text".
