

Mathematics, Grade 8  
Unit VI: Lesson 1

Table: **Integer Multiplication Table**

People sometimes use a multiplication table to help them find the products of basic facts in multiplication. These tables are often found in math textbooks, school folders or notebooks. Find a multiplication table or make one and study the pattern.

Using graph paper, design and construct an integer multiplication table, capable of multiplying positive with positive, negative with negative and positive with negative integers.

Present your table to the class and demonstrate how to use it.
