

Science Fair Assignment #1

Student Name: _____
Period _____

Science Fair Project Idea Assignment
Mr. Riker, 7th grade Science 2
John I. Smith K-8 Center, Middle Learning Center, room 148

This assignment is due on or before Friday, September 7, 2012. It is worth 2 grades.

Directions: The student must find three science fair project ideas that he/she would like to do for their science fair project. From these ideas, the teacher will determine which one of three ideas the student will complete. Please note that once the teacher has selected a project from the three choices, it is that project that must be completed. The project may not be changed. Fill out the bottom section of the paper completely.

Science Fair Project Assignment Requirements:

1. Every assignment (except for this one) must be typed with a complete school heading.
Student Name
Mr. Riker, Period:
Date:
2. Two (2) copies of each assignment must be turned in on each due date.
3. Assignments must be submitted to the teacher on the due date. All science fair project assignments will be graded as regular science class assignments. Therefore no late work will be permitted.
4. All work done on all phases of the science fair project must be carefully recorded in the students, science journal, and be properly labeled in the running table of contents.
5. The metric system is the required unit of measurement required on all assignments. The following website contains a table of metric units.
<http://www.france-property-and-information.com/table-of-metric-and-imperial-units.htm>
6. The student and student's family will be responsible for purchasing all materials related to and needed for the project, and for bringing those supplies when asked to do so or required by the teacher.
