Industrial Performance Engineer

Type:

Full-time

Experience:

Associate

Functions:

Maintenance, Manufacturing, Quality Assurance, Supply Chain

Job Description

POSITION SUMMARY

The Industrial Performance Engineer carries out industrial engineering assignments of a broad nature while exercising considerable judgment and originality. Working under minimum supervision performs independent evaluation, selection and application of standard industrial engineering techniques, procedures, and criteria using discernment and ingenuity in making minor adaptations and modifications. This position reports to the General Manager.

PRIMARY RESPONSIBILITIES:

1. Perform and summarize time studies and work sampling studies. Use other accepted forms of work measurement, as necessary to establish and/or maintain standards. Establish manning requirements for direct and indirect jobs. Prepare engineering economic analysis of proposals.
2. Assist with the preparation and implementation of quarterly labor/capacity reports and ensure proper application of 'Managing Manufacturing Performance'. Compile and analyze standard data for direct and indirect labor.
3. Investigate, identify, and eliminate efficiency losses, unplanned

downtime events, and unfavorable/favorable material variances. Act as technical support and challenger for defining and implementing sustainable change.

4. Perform methods improvements and innovations by actively identifying performance gaps through benchmarking.

5. Define initiatives in projects and reports that reduce labor, food, and packaging costs. Provide visibility of KPI improvements through statistical and applied mathematical analysis.

6. Initiate proposals and provide alternatives to increase productivity while ensuring continuous sustained improvement and first time quality. Track, trend, and validate KPI results in reports for daily, weekly, and monthly operational reviews.

7. Perform other duties and projects as requested.

Skills

B.S. degree in industrial engineering.

0-2 to years experience.

Skills:

The individual must be self-motivated, assertive and have the ability to lead across many functions.

Must possess strong communication, leadership and planning skills.

Strong Microsoft Excel and Access skills.

TPM, Continuous Improvement, six sigma desired.
