

## Luminol Sources and Resources

For the "Cool blue light experiment kit" here is a nice website describing a science fair experiment with information about how luminol works. If you would like to buy the kit, there are a lot of online science supply sources that sell the individual kit and a few that sell the multiple use kit. I would recommend Educational Innovations based on price and previous experience. If you are feeling adventurous, you can buy the luminol separately from Ward's Natural Science.

Explaining luminol -
