

Intellisuite Managed IT Services

A Comprehensive IT Solution for your Business

IntelliSuite IT Solutions is an established information technology company specializing in the design, installation, and support of network infrastructure since 1998. We use technology to solve business challenges in order to improve efficiencies and increase profitability for our clients.

IntelliSuite has been our Managed IT Service provider ever since our network crashed, and they are a very responsive, knowledgeable and competent IT Partner. I would recommend them to anyone.

What are the benefits of Managed IT Services from IntelliSuite?

Our IT Engineering Team at Your Service 24/7/365

When you call the IntelliSuite Support Center, you will be greeted by a live person—not a machine. Our Help Desk is staffed by Level II and Level III Engineers, qualified to handle both complex and varied IT issues. This US based staff is courteous, knowledgeable, and at your service around the clock. They will listen, answer your questions, and address your issue using a variety of IT tools, including remotely accessing your PC or network.

We Keep Your Network Up and Running

Keep your computers running by any and all means – that is our mission. By monitoring your network around the clock we can see problems or potential threats before they happen. Our IT Professionals constantly look for hardware failures, corrupted files, viruses, spyware, and many other potential problems. IntelliSuite's proven processes and experienced team will ensure that your network stays up and running.

Security Threat Prevention

At IntelliSuite, security is our top priority. We employ the industry's best practices and standards to make sure your network stays secure; and, that any unauthorized entry into your network is blocked. We stay ahead of the industry on Enterprise security solutions, and are constantly upgrading our Security Solutions to stay ahead of emerging threats.

Managed Data Backup & Recovery

IntelliSuite will schedule and monitor your onsite data backup, and assure speedy recovery in the event of a problem. We monitor and test your backups to ensure your data is safe, retrievable, and that you have multiple time-sensitive restore points. Our onsite and offsite backup service is both comprehensive and flexible to your network's needs; and it can be replicated to the cloud.

Custom Cloud Computing & Mobility Solutions

Today's business environment demands the freedom for professionals to gain network access however, whenever, and wherever they choose. IntelliSuite engineers have the experience and expertise to reimagine your workplace, and design custom solutions to create a work environment that is mobile, secure, and efficient. IntelliSuite delivers cloud, mobility, and virtualization solutions for your business.
