DEPARTMENT OF THE INTERIOR,

BUREAU OF EDUCATION.

Washington, D. C., November 20, 1926.

Six: With the increasing interest in education in recent years, there has been a corresponding growth in the number of associations and foundations engaged in various ways in the promotion of education. So rapid has been this growth that it has become difficult to keep in touch with the activities of these organizations. With this multiplication of independent organizations, a need is felt in many quarters for some action calculated to bring about a coordination of effort and eliminate to a certain degree much of the duplication resulting from rapid growth. In response to an urgent demand for information concerning such organizations, it was thought advisable to collect into one volume certain facts concerning each—their purposes, publications, conditions of membership, etc. I therefore requested the library division of the bureau to prepare a handbook embodying such information. The accompanying manuscript contains the material which we have been able to bring together on the subject. I recommend that it be published as a bulletin of the Bureau of Education.

Respectfully submitted.

JNO. J. TIGERT, Commissioner.

The SECRETARY OF THE INTERIOR.

ш

A HANDBOOK OF EDUCATION AL ASSOCIATIONS AND FOUNDATIONS IN THE UNITED STATES

INTRODUCTION

In the preparation of this handbook an effort has been made to include primarily educational associations, national in scope. In addition to these, it was thought desirable to include also some important sectional associations, the general State teachers associations, and a few international organizations having offices in the United States.

The information contained herein was obtained through a questionnaire sent to all organizations known to this office which could properly be classed in any of the groups mentioned. Doubtless some associations have been omitted which rightfully belong in this list. If so, the Bureau of Education will be pleased to have such cases brought to its attention.

The organizations listed are arranged in alphabetical order under their official titles, but the numerous cross references should make it possible to find readily any association, even though one is not familiar with the exact name of the organization.
