

## **Job Description: Full Stack NodeJS Developer**

DHS Group is seeking an experienced full stack developer to build new, modern health and wellness applications. This is an exciting, ground-floor opportunity that will help shape our next generation of products and technology and support our existing solutions in a fast-paced environment.

### **Ideal Candidates**

- 5+ years of solid development experience and a strong desire to solve complex business processes with elegant solutions
- Extensive knowledge in architecting and creating Node based SaaS applications (plus for experience in employee health and wellness)
- Thorough technical knowledge of software development methodologies, design and implementation
- Self-starter with excellent analytical skills, good knowledge of project life cycles and comfortable working in a fast-paced agile development environment

### **Requirements and Skills**

- 3+ years of professional software experience in Full-Stack Node.js development on the Linux platform
- 2+ years of professional software development experience in React or other JS frameworks and related front-end technologies
- Experience building scalable RESTful APIs / microservices
- 2+ years of professional experience working with SQL on the MySQL, Oracle or other SQL database platform
- Experience with git, Jenkins, and other ci/cd tools
- Exceptional problem-solving and communication skills
- Experience with Python, Java, C/C++ (preferred)
- RabbitMQ or other messaging systems (preferred)

### **Education and Experience**

- Bachelor's degree or equivalent in a technology related field
- 5+ years of experience in software development, engineering, testing, or a related field
- Excellent written, oral, and interpersonal communication skills
- Comfortable working and communicating with client representatives in a fast-paced, iterative environment

### **Compensation**

Commensurate with experience. This position is a salaried, full time (40 hours per week) position, and is eligible for our company benefits package.

### **Next Steps**

To apply, email your resume, cover letter, and salary requirements to [jobs@dhsgroup.com](mailto:jobs@dhsgroup.com) with the subject line NodeJS Developer. All candidates must be authorized to work in the United States for any employer.

### **Location**

This position will be either in the Houston office (2425 Fountain View #310, Houston, Texas, 77057) or remote.

### **Company Description**

DHS Group works with companies and health plans to improve population health outcomes and healthcare cost savings through an advanced data warehouse, an advanced analytics platform, population health science and member engagement tools called HealthSpective.

No phone calls or recruiters.
