

Omniapps is the fully customizable (multi) touch application suite. It consists a big collection of professional applications that offers you a unique way to present your products or services. Show your (product) photos, videos, brochures and even websites within a multi-touch environment or put your products in the spotlight through one of the games.

For the latest applications please check [www.omnitapps.com](http://www.omnitapps.com)

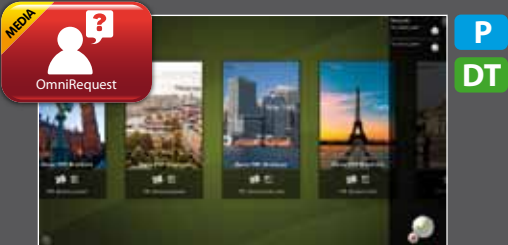

**OmniMediaWall**  
Present websites, YouTube videos, PDF files, images and videos within a multi-touch environment.

**OmniSlider**  
Slide through the pictures with gestures like slide and rotate.

**OmniMarker**  
Add touchable markers with specific content to your images. Markers can contain multiple PDF, Video and imagefiles.

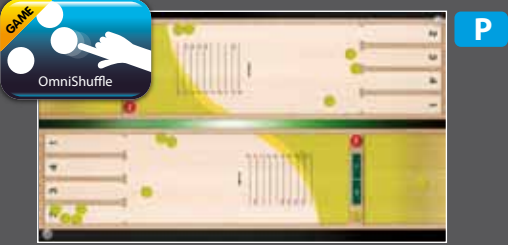

**OmniRequest**  
The multi-touch brochure selector. Let the user select the needed information, choose how they want the brochures (USB, send afterwards, e-mail, print locally) and collect data.

**OmniPuzzle**  
Entertain your visitors with your "own" created puzzle and collect name and address information.

**OmniQuiz**  
Create your own multi-touch quiz and let your visitors play the game. Collect valuable information.

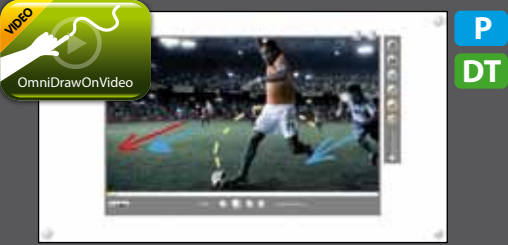

**OmniShuffle**  
Challenge your visitors with this interactive shuffle game which can be fully customized by yourself.

**OmniMatch**  
A competitive (multi) player game (1, 2, 4 persons) which can be filled with your own pictures. Match the correct images to the right category.

**OmniVideoJukebox**  
Present your videos in a user friendly interface and allow users to choose easily which video they want to start.

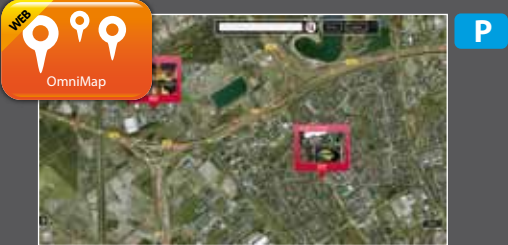

**OmniDrawOnVideo**  
The multi-touch video presentation tool. Highlight interesting points on the videos and save!

**OmniTickertape / Menu**  
The tickertape shows your RSS feed or own text. The Menu can be fully customized. Select the apps you want to show.

**OmniWelcome**  
Welcome your visitors with their company logo and visitor names. After touching the screen the main menu is shown.

**OmniMap**  
OmniMap allows you to place markers on a Google Map and link your own information to the markers. This information can be PDF, Videos, etc. They can be saved, printed or e-mailed.

**OmniWebViewer**  
Show multiple websites simultaneously. On screen keyboards. Unique in the market.

**OmniTouchBrowser**  
Browse the internet. Onscreen keyboard.

**Test (Free app!)**  
With this (on-line) application you can visualize your touch information on your touchscreen. Go to [www.multitouch-touchscreens.com](http://www.multitouch-touchscreens.com) to get this free application!

**OmniTimeLine**  
Present your media through a timeline menu. Let your visitors swipe through a menu with your own topics. Show your milestones, dates, products, etc. in a timeline.
