Welcome to the first edition of our Renuue Newsletter!

We hope you will find it informative and a great way
to find out about our specials and events.

Plastic Surgery and Insurance

Did You Know? Plastic surgery is frequently covered by insurance. Procedures often covered include breast reduction, abdominoplasty, upper eyelid surgery/brow lift, varicose vein surgery, skin cancer surgery, hand surgery, breast reconstruction and scar revision from previous surgery or trauma.

Criteria for Coverage: The condition being corrected by the procedure must meet the insurance company's criteria for medical necessity. For example, large breasts commonly cause shoulder grooves from bra straps and neck/back pain. Droopy eyelids can impair vision. If you are interested in learning whether your insurance will cover a procedure, call to speak with our dedicated precertification specialist.

Join Us for Our 1st Ever *Ladies Nite!*

Jan. 9th at our St. Simons Office

Win door prizes and take advantage of specials on Botox and fillers,
ZO skin care products and CoolSculpting packages!

Bring your friends & join us on Jan. 9, 5:30 - 7pm at our St. Simons
office.

See You There!

Ranked "Best Allover
Fat Fighter"

New Beauty Magazine ranked CoolSculpting
"Best Allover Fat Fighter" for the 4th year in a row.

What is CoolSculpting?

CoolSculpting is the only FDA-approved, non-invasive fat-reduction technology that targets and freezes fat cells to eliminate 20-25% of fat in the treated area without surgery or downtime. Most patients resume their normal activities, including going to the gym, immediately after treatment.

[How does CoolSculpting work?](#)

CoolSculpting uses cryolipolysis, a unique cooling technology invented by Harvard scientists and doctors to target and freeze fat cells, breaking down fat cells without harming other surrounding tissues. The broken down fat cells are then eliminated through the body's normal metabolic processes. Since the number of fat cells in our bodies typically becomes fixed in our teenage years, these eliminated fat cells will not be replaced.

The results speak for themselves:
