Submit your manuscript to *Nuclear Receptor Signaling*

Nuclear Receptor Signaling (NRS) is a peer-reviewed, open access journal publishing primary research articles, reviews, methods and dataset reports in all mechanistic, functional and pathological aspects of nuclear receptor and coregulator signaling.

Why Publish Open Access in *NRS*?

- *NRS* is indexed in EBSCO, MEDLINE/PubMed (NLM), ProQuest, and PubMed Central (PMC)
- *NRS* has full text articles and a list of previously published articles on PubMed and PubMed Central
- *NRS* is a unique, pan-disciplinary home for innovative and insightful research
- *NRS* submissions represent the broad range of disciplines, including cell biology, biochemistry, physiology, chemistry, pharmacology and informatics, as well as clinical and translational studies
