The Healthcare Survival Guide web site is giving away, yes giving away for free, the ebook that you can download for absolutely no charge. This offer is for a limited period of time so if you want this ebook you might want to download it ASAP. The guide is full of healthcare tips.

It is a part of the Health Advocacy that has helped so many to do self care with professional information made available at no cost. The ER rooms in Denver are totally swamped and there is an especial influx of folks who can't get a private doctor due to Medicaid being their only form of insurance. This book will be a blessing to all Denverites but especially those who need health advice quickly and for no cost.

As your Life Coach, I looked into this right away. Checking the site one last time, just now, (11:30 AM Mountain time), I was able to get the book easily and quickly once again. Therefore, this offer is currently timely.

You may also buy the hard copy at Amazon for \$6.95 or order it right on the book's website.

It is easy to read and has many, largely unknown, self care tips.

This might just save you some trips to the doctor's office.

More and more good people are donating their services and knowledge in these times. So many of the unemployed are doing without the basics that they don't know how they can cut back on anything else. If you have any service to offer in this manner please contact me so that I can publicize it for you. MapleLeafA@Alumni.Purdue.edu

So here is a book that is very interesting and extremely knowledgeable. Check it out before the download offer expires.

If you want the hard copy, you can also pick it up today at Borders Bookstores. Let us remember this great offer when these people publish again in more prosperous times. Hat's off to them.
