

Roman Numeral	I	V	X	L	C	D	M
Value	1	5	10	50	100	500	1000

Rules:

- Repeat a numeral **up to 3 times** to add its value (e.g. XXX = 10 + 10 + 10 = 30) (only for I, X, C, M)
- If a numeral appears **after** a numeral of greater value then add (e.g. XI = 10 + 1 = 11)
- If a numeral appears **before** a numeral of greater value then subtract (e.g. IX = 1 before 10 or 10 - 1 = 9)
(this subtraction rule only works in certain cases:
 - I can be placed before V or X
 - X can be placed before L or C
 - C can be placed before D or M)

Write the value of the following Roman numerals:

1 LII =

2 DLV =

3 DCCX =

4 CXIV =

5 DXCI =

6 CXCIV =

7 CMX =

8 CMLX =

9 CCCXX =

10 MMXVI =

11 MCMLXXV =

12 MCMXCV =

Write the following numbers in Roman numerals:

13 216 =

14 623 =

15 219 =

16 451 =

17 515 =

18 909 =

19 784 =

20 299 =

21 395 =

22 2006 =

23 2017 =

24 1966 =

Write the value of the following Roman numerals:

1 LII =

2 DLV =

3 DCCX =

4 CXIV =

5 DXCI =

6 CXCIV =

7 CMX =

8 CMLX =

9 CCCXX =

10 MMXVI =

11 MCMLXXXV =

12 MCMXCV =

Write the following numbers in Roman numerals:

13 216 =

14 623 =

15 219 =

16 451 =

17 515 =

18 909 =

19 784 =

20 299 =

21 395 =

22 2006 =

23 2017 =

24 1966 =

Which number(s) **less than 1000** contains the most numerals when written in Roman numerals?

e.g 43 = XLIII has 5 numerals (X, L, I, I, I)

Read the number in Roman numerals and throw your pickaxe at the correct number. Choose to read Roman numerals to 12, 50, 100, 1000, or read years written in Roman numerals. Also available as an iPad or Android app.

See how quickly you can match the Roman numerals with the numbers. Lots of choice of level.

Shoot the mines with the same value as the Roman numeral.
Lots of choice of level.

Shoot the spaceship with the same value as the Roman numeral. Lots of choice of level. Also available as an iPad or Android app

lots more games to teach reading Roman Numerals

sheet 2 - 888 (DCCCLXXXVIII - 12 characters)
