**DCRD-Program Associate (SLAC)**

Mathematica Policy Research

**About this Job**

Mathematica Policy Research, a nationally recognized, nonpartisan firm, conducts social policy research on health care, disability, education, welfare, nutrition, and other topics of social policy interest. Our clients include federal, state, and local government agencies, as well as commercial organizations and private foundations. We are an employee-owned company and our mission -- to improve public well-being by bringing the highest standards of quality, objectivity, and excellence to bear on information collection and analysis for our partners and our clients-- forms the core of our value proposition and drives our business model.

Mathematica offers competitive salaries commensurate with qualifications, a stimulating team-oriented work environment, a comprehensive benefits package that includes 3+ weeks of paid time off, on-site fitness centers, and the advantages of employee ownership.

We are seeking Program Associates to provide analysis and operational support to our research projects. Project topics cover many stages of the policy cycle (e.g. problem identification, policy implementation, and policy evaluation). Examples of previous and ongoing work include the following: evaluations of large behavioral health programs, implementation of pilot programs to improve work outcomes for people with disabilities, research on different models of primary care, and development of clinical measures designed to improve services and outcomes across the health care system.

On projects like these and others, program associates work closely with project teams to understand and meet client needs by delivering high-quality products that are delivered on time and within budget. Program associates are trained to serve as project managers and in other project operation roles, such as designing and monitoring workflows, managing internal and external stakeholders, and identifying and implementing process efficiencies.

Because Mathematica’s work is project-based and always changing, no single description is adequate to the highly varied and complex nature of being a program associate. This is an entry-level position on a career track. As program associates develop in their careers, they are expected to develop expertise that will enable them to serve as leaders on their specific projects as well as across the company.

**This is not a research, programming, or systems engineering position.**

Various federal agencies with whom we contract require that staff successfully undergo a background investigation or security clearance as a condition of working on the project. If you are assigned to such a project, you will be required to obtain the requisite security clearance.

Mathematica is An Equal Opportunity/ Affirmative Action Employer. We In keeping with our commitment, we strongly encourage women, minorities, veterans, and people with disabilities to apply.

**How to Apply:**

2. Select the “Current Openings” link from the left navigation menu, then follow the directions to search available positions by position title, location(s), and/or functional area(s). Next select “Search”.
3. When a position of interest is selected, click “Apply Now” and begin creating your application.

- A resume will be a required document that must be attached to complete the online application process.

- Many of our positions require additional supporting documents (e.g. transcripts, writing samples, references, or letters of recommendation). Please review the posting carefully to determine what supporting documents are required for the position to which you would like to apply.

- There is a maximum file size of 2000 KB for any file uploaded to Mathematica’s online application system.

- Transcripts can be unofficial.

4. You can review the status of your application by logging into the system with the unique user name and password created during the application process.

GENERAL QUESTIONS:

Send inquiries about working at Mathematica, employment, positions, and the online application system to HumanResources@mathematica-mpr.com.

About Mathematica Policy Research

Mathematica Policy Research, a nonpartisan research firm, provides a full range of research and data collection services, including program evaluation and policy research, survey design and data collection, research assessment and interpretation, and program performance/data management, to improve public well-being.
