# 6.3 Areas of Circles

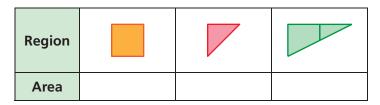

# **Essential Question** How can you find the area of a circle?

1

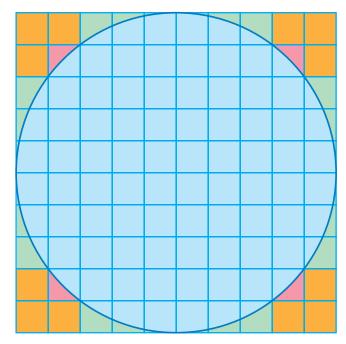

### **ACTIVITY:** Estimating the Area of a Circle

Work with a partner. Each square in the grid is 1 unit by 1 unit.

- **a.** Find the area of the large 10-by-10 square.
- **b.** Copy and complete the table.

**c.** Use your results to approximate the area of the circle. Explain your reasoning.

d. Fill in the blanks. Explain your reasoning.

Area of large square =  $\bullet$  5<sup>2</sup>

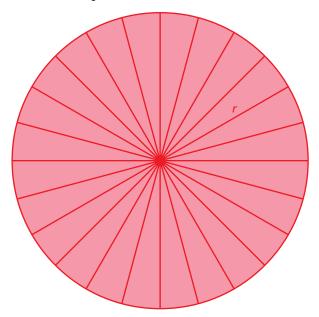

Area of circle =  $\bullet$  5<sup>2</sup>

e. What can you conclude?

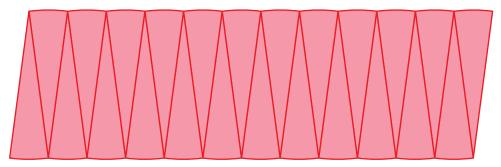

### 2 ACTIVITY: Approximating the Area of a Circle

#### Work with a partner.

- **a.** Draw a circle. Label the radius as *r*.
- **b.** Divide the circle into 24 equal sections.

**c.** Cut the sections apart. Then arrange them to approximate a parallelogram.

- **d.** What is the approximate height and base of the parallelogram?
- **e.** Find the area of the parallelogram. What can you conclude?

# What Is Your Answer?

- 3. IN YOUR OWN WORDS How can you find the area of a circle?
- **4.** Write a formula for the area of a circle with radius *r*. Find an object that is circular. Use your formula to find the area.

Practice

Use what you learned about areas of circles to complete Exercises 3–5 on page 258.

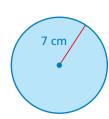

#### **Area of a Circle**

**Words** The area A of a circle is the product of  $\pi$  and the square of the radius.

Numbers  $A = \pi r^2$ 

### **EXAMPLE**

### 1 Finding Areas of Circles

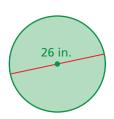

a. Find the area of the circle. Use  $\frac{22}{7}$  for  $\pi$ .

**Estimate** 
$$3 \times (7)^2 \approx 3 \times 50 = 150$$

$$A = \pi r^2$$
 Write formula for area.  
 $\approx \frac{22}{7} \cdot (7)^2$  Substitute  $\frac{22}{7}$  for  $\pi$  and 7 for  $r$ .  
 $= \frac{22}{7} \cdot 49^7$  Evaluate  $(7)^2$ . Divide out the common factor.  
 $= 154$  Multiply.

The area is about 154 square centimeters.

Reasonable? 
$$154 \approx 150$$

b. Find the area of the circle. Use 3.14 for  $\pi$ .

The radius is  $26 \div 2 = 13$  inches.

**Estimate** 
$$3 \times (13)^2 \approx 3 \times 170 = 510$$

$$A = \pi r^2$$
 Write formula for area.  
 $\approx 3.14 \cdot (13)^2$  Substitute 3.14 for  $\pi$  and 13 for  $r$ .  
 $= 3.14 \cdot 169$  Evaluate  $(13)^2$ .  
 $= 530.66$  Multiply.

The area is about 530.66 square inches.

Reasonable?  $530.66 \approx 510$ 

### On Your Own

- 1. Find the area of a circle with a radius of 6 feet. Use 3.14 for  $\pi$ .
- 2. Find the area of a circle with a diameter of 28 meters. Use  $\frac{22}{7}$  for  $\pi$ .

## **EXAMPLE** 2 Standardized Test Practice

**B** the diameter of the tire

(**D**) the area of the tire

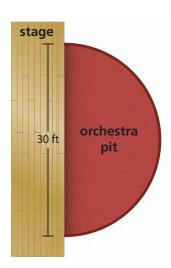

• The correct answer is **©**.

**3.** You want to find the height of one of the tires. Which measurement would best describe the height?

## **EXAMPLE** 3 Finding the Area of a Semicircle

#### Find the area of the semicircular orchestra pit.

The area of the orchestra pit is one-half the area of a circle with a diameter of 30 feet.

The radius of the circle is  $30 \div 2 = 15$  feet.

$$\frac{A}{2} = \frac{\pi r^2}{2}$$

Divide the area by 2.

$$\approx \frac{3.14 \cdot (15)^2}{2}$$

Substitute 3.14 for  $\pi$  and 15 for r.

$$=\frac{3.14 \cdot 225}{2}$$

Evaluate (15)<sup>2</sup>.

$$= 353.25$$

Simplify.

The area of the orchestra pit is about 353.25 square feet.

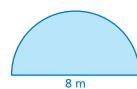

### On Your Own

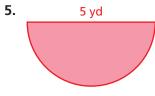

4.

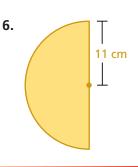

Find the area of the semicircle.

Now You're Ready

Exercises 13–15

## Vocabulary and Concept Check

- **1. VOCABULARY** Explain how to find the area of a circle given its diameter.
- **2. DIFFERENT WORDS, SAME QUESTION** Which is different? Find "both" answers.

What is the area of a circle with a diameter of 1 m?

What is the area of a circle with a radius of 100 cm?

What is the area of a circle with a diameter of 100 cm?

What is the area of a circle with a radius of 500 mm?

# Practice and Problem Solving

9 mm

Find the area of the circle. Use 3.14 or  $\frac{22}{7}$  for  $\pi$ .

3.

5.

6.

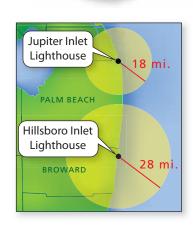

7.

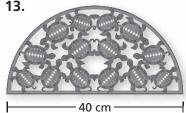

- **9.** Find the area of a circle with a diameter of 56 millimeters.
- **10.** Find the area of a circle with a radius of 5 feet.
- **11. PIZZA** The diameter of a pizza is 16 inches. What is the area?
- **12. LIGHTHOUSE** The Hillsboro Inlet Lighthouse in Broward County lights up how much more area than the Jupiter Inlet Lighthouse in Palm Beach County?

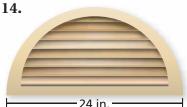

258

Find the area of the semicircle.

**3** 13.

- **16. REASONING** Consider five circles with radii of 1, 2, 4, 8, and 16 inches.
  - **a.** Copy and complete the table. Write your answer in terms of  $\pi$ .
  - **b.** Compare the areas and circumferences. What happens to the circumference of a circle when you double the radius? What happens to the area?
  - **c.** What happens when you triple the radius?

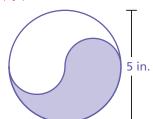

Radius	Circumference	Area
1	$2\pi$ in.	$\pi$ sq. in.
2		
4		
8		
16		

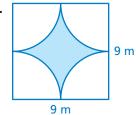

- 17. DOG A dog is leashed to the corner of a house. How much running area does the dog have? Explain how you found your answer.
- **18. CRITICAL THINKING** Is the area of a semicircle with a diameter of x greater than, less than, or equal to the area of a circle with a diameter of  $\frac{1}{2}x$ ? Explain.

Find the area of the shaded region. Explain how you found your answer.

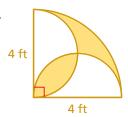

19.

20.

21.

## Fair Game Review What you learned in previous grades & lessons

Evaluate the expression.

**22.** 
$$\frac{1}{2}(7)(4) + 6(5)$$

**23.** 
$$\frac{1}{2} \cdot 8^2 + 3(7)$$

**24.** 
$$12(6) + 3.14 \cdot 2^2$$

**25. MULTIPLE CHOICE** What is the product of  $8\frac{1}{3}$  and  $3\frac{2}{5}$ ?

**(A)** 
$$2\frac{23}{51}$$

**B** 
$$4\frac{1}{5}$$

**B** 
$$4\frac{1}{5}$$
 **C**  $24\frac{2}{15}$ 

**D** 
$$28\frac{1}{3}$$
