

# International LAW

*Seventh Edition*

MALCOLM N. SHAW

CAMBRIDGE

# International Law

This new edition of International Law confirms the text's status as the definitive book on the subject. Combining his expertise as both academic and practitioner, Malcolm Shaw's survey of the subject motivates and challenges both student and professional. By offering an unbeatable combination of clarity of expression and academic rigour, he ensures both understanding and critical analysis in an engaging and authoritative style. The text has been updated throughout, to reflect recent case law and treaty developments. It retains the detailed references which encourage and assist further reading and study.

PROFESSOR MALCOLM N. SHAW, QC, is a practising barrister at Essex Court Chambers and Senior Fellow at the Lauterpacht Centre for International Law at the University of Cambridge. One of the world's leading international lawyers, he is an Associé of the Institut de Droit International, Trustee of the British Institute of International and Comparative Law and a founding member of Curatorium, Xiamen Academy of International Law, China. He has been awarded the decoration of 'Officier de l'Ordre de la Valeur' by the Republic of Cameroon.

*Preface*

*Table of cases*

*Table of treaties and selected other international instruments*

*List of abbreviations*

## 1 The nature and development of international law

Law and politics in the world community

The role of force

The international system

The function of politics

Historical development

Early origins

The Middle Ages and the Renaissance

The founders of modern international law

Positivism and naturalism

The nineteenth century

The twentieth century

Communist approaches to international law

The 'Third World'

Suggestions for further reading

## 2 International law today

The expanding legal scope of international concern

Modern theories and interpretations

Positive Law and Natural Law

New approaches

The fragmentation of international law?

Conclusion

Suggestions for further reading

## 3 Sources

Custom

Introduction

The material fact

What is state practice?

Opinio juris

Protest, acquiescence and change in customary law

Regional and local custom

Treaties

General principles of law

- Equity and international law
- Judicial decisions
- Writers
- Other possible sources of international law
  - The International Law Commission
  - Other bodies
  - Unilateral acts
- Hierarchy of sources and *jus cogens*
- Suggestions for further reading
- 4 International law and municipal law
  - The theories
  - The role of municipal rules in international law
  - International law before municipal courts
    - The United Kingdom
      - Customary international law
      - Treaties
    - The United States
    - Other countries
      - (i) Other common law and related legal systems
      - (ii) Civil law systems
      - (iii) Conclusion
  - Justiciability, act of state and related doctrines
  - Executive Certificates
  - Suggestions for further reading
- 5 The subjects of international law
  - Legal personality – introduction
  - States
    - Creation of statehood
    - Self-determination and the criteria of statehood
    - Recognition
    - Extinction of statehood
    - The fundamental rights of states
      - Independence
      - Equality
      - Peaceful co-existence
    - Protectorates and protected states
    - Federal states
  - Sui generis territorial entities
    - Mandated and trust territories
    - Germany 1945
    - Condominium

International administration of territories

Taiwan

The 'Turkish Republic of Northern Cyprus' (TRNC)

The Saharan Arab Democratic Republic

Kosovo

Palestine

Various secessionist claimants

Associations of states

Conclusions

Special cases

The Sovereign Order of Malta

The Holy See and the Vatican City

Insurgents and belligerents

National liberation movements (NLMs)

International public companies

Transnational corporations

The right of all peoples to self-determination

The establishment of the legal right

The definition of self-determination

Individuals

International organisations

The acquisition, nature and consequences of legal personality – some conclusions

Suggestions for further reading

6 The international protection of human rights

The nature of human rights

Ideological approaches to human rights in international law

The development of international human rights law

Some basic principles

Domestic jurisdiction

The rule as to the exhaustion of domestic remedies

Priorities of rights

Customary international law and human rights

Evolving principles

The United Nations system – general

The protection of the collective rights of groups and individuals

Prohibition of genocide

Prohibition of discrimination

The principle of self-determination as a human right

The protection of minorities

Other suggested collective rights

The United Nations system – implementation

Political bodies – general

The Commission on Human Rights (1946–2006)

The Human Rights Council

Expert bodies established by UN organs

The Sub-Commission on the Promotion and Protection of Human Rights

The International Covenant on Economic, Social and Cultural Rights

Expert bodies established under particular treaties

The Committee on the Elimination of Racial Discrimination

The Human Rights Committee

The Committee on the Elimination of Discrimination Against Women

The Committee Against Torture

The Committee on the Rights of the Child

The Committee on the Protection of Migrant Workers

The Committee on the Rights of Persons with Disabilities

The Committee on Enforced Disappearances

Conclusions

The specialised agencies

The International Labour Organization

The United Nations Educational, Scientific and Cultural Organization

Suggestions for further reading

## 7 The regional protection of human rights

Europe

The Council of Europe

The European Convention on Human Rights

The convention system

The European Social Charter

The European Convention for the Prevention of Torture and Inhuman and Degrading Treatment or Punishment

The Council of Europe Framework Convention for the Protection of National Minorities

The European Union

The OSCE (Organization for Security and Co-operation in Europe)

The CIS Convention on Human Rights and Fundamental Freedoms

The Human Rights Chamber of Bosnia and Herzegovina

The Inter-American Convention on Human Rights

The Banjul Charter on Human and Peoples' Rights

The Arab Charter on Human Rights

Suggestions for further reading

## 8 Individual criminal responsibility in international law

### International criminal courts and tribunals

The International Criminal Tribunal for the Former Yugoslavia (ICTY)

The International Criminal Tribunal for Rwanda (ICTR)

The International Residual Mechanism for Criminal Tribunals

The International Criminal Court (ICC)

Hybrid courts and other internationalised domestic courts and tribunals

The Special Court for Sierra Leone

Extraordinary Chambers in the Courts of Cambodia

Kosovo Regulation 64 panels

East Timor Special Panels for Serious Crimes

The Bosnia War Crimes Chamber

The Special Tribunal for Lebanon

The Iraqi High Tribunal

The Serbian War Crimes Chamber

### International crimes

Genocide

War crimes

Crimes against humanity

Aggression

Conclusion – fair trial provisions

Suggestions for further reading

## 9 Recognition

Recognition of states

Recognition of governments

*De facto* and *de jure* recognition

Premature recognition

Implied recognition

Conditional recognition

Collective recognition

Withdrawal of recognition

Non-recognition

The legal effects of recognition

Internationally

Internally

The UK

The USA

Suggestions for further reading

## 10 Territory

The concept of territory in international law

Territorial sovereignty

New states and title to territory

The acquisition of additional territory

Boundary treaties and boundary awards

Accretion

Cession

Conquest and the use of force

The exercise of effective control

Intertemporal law

Critical date

Sovereign activities (*effectivités*)

The role of subsequent conduct: recognition, acquiescence and estoppel

Conclusions

Territorial integrity, self-determination and sundry claims

The doctrine of *uti possidetis*

*Beyond uti possidetis*

International boundary rivers

'The common heritage of mankind'

The polar regions

Leases and servitudes

The law of outer space

The definition and delimitation of outer space

The regime of outer space

Telecommunications

Suggestions for further reading

## 11 The law of the sea

The territorial sea

Internal waters

Baselines

Bays

Islands

Archipelagic states

The width of the territorial sea

The juridical nature of the territorial sea

The right of innocent passage

Jurisdiction over foreign ships

International straits

The contiguous zone

The exclusive economic zone

The continental shelf

Definition

The rights and duties of the coastal state

Maritime delimitation

Conclusion

Landlocked states

The high seas

Jurisdiction on the high seas

Exceptions to the exclusivity of flag-state jurisdiction

Right of visit

Piracy

The slave trade

Unauthorised broadcasting

Hot pursuit

Collisions

Treaty rights and agreements

Pollution

Straddling stocks

The international seabed

Introduction

The 1982 Law of the Sea Convention (Part XI)

The Reciprocating States Regime

The 1994 Agreement on Implementation of the Seabed Provisions of  
the Convention on the Law of the Sea

The International Seabed Authority

Settlement of disputes

The International Tribunal for the Law of the Sea

Suggestions for further reading

## 12 Jurisdiction

The principle of domestic jurisdiction

Legislative, executive and judicial jurisdiction

Civil jurisdiction

Criminal jurisdiction

The territorial principle

The nationality principle

The passive personality principle

The protective principle

The universality principle

War crimes, crimes against peace and crimes against humanity

- Treaties providing for jurisdiction
- Illegal apprehension of suspects and the exercise of jurisdiction
- The US Alien Tort Statute

- Extradition

- Extraterritorial jurisdiction

- Suggestions for further reading

### 13 Immunities from jurisdiction

- Sovereign immunity

- The absolute immunity approach

- The restrictive approach

- Sovereign and non-sovereign acts

- State immunity and violations of human rights

- Commercial acts

- Contracts of employment

- Other non-immunity areas

- The personality issue – instrumentalities and parts of the state

- The personality issue – immunity for senior government figures

- Waiver of immunity

- Pre-judgment attachment

- Immunity from execution

- The burden and standard of proof

- Diplomatic law

- The Vienna Convention on Diplomatic Relations, 1961

- The inviolability of the premises of the mission

- The diplomatic bag

- Diplomatic immunities – property

- Diplomatic immunities – personal

- Waiver of immunity

- Consular privileges and immunities: the Vienna Convention on Consular Relations, 1963

- The Convention on Special Missions, 1969

- The Vienna Convention on the Representation of States in their Relations with International Organisations of a Universal Character, 1975

- The immunities of international organisations

- Suggestions for further reading

### 14 State responsibility

- The nature of state responsibility

- The question of fault

- Attribution

- Ultra vires acts

- State control and responsibility
- Mob violence, insurrections and civil wars
- Circumstances precluding wrongfulness
- Invocation of state responsibility
- The consequences of internationally wrongful acts
  - Cessation
  - Reparation
  - Serious breaches of peremptory norms (jus cogens)*
  - Diplomatic protection and nationality of claims
  - The exhaustion of local remedies
- The treatment of aliens
  - The relevant standard of treatment
- The protection of foreign property and investments
  - The property question
  - The nature of expropriation
  - Public purposes
  - Compensation
  - Bilateral investment treaties
  - Lump-sum agreements
  - Non-discrimination
  - The Multilateral Investment Guarantee Agency
- Suggestions for further reading
- 15 International environmental law
  - State responsibility and the environment
    - The basic duty of states
    - The appropriate standard
    - Damage caused
    - Liability for damage caused by private persons
    - Prevention of transboundary harm from hazardous activities
    - The problems of the state responsibility approach
  - International co-operation
  - Atmospheric pollution
  - Ozone depletion and climate change
  - Outer space
  - International watercourses
  - Ultra-hazardous activities
    - Nuclear activities
  - The provision of information
  - The provision of assistance
  - Nuclear safety

- Civil liability
  - Hazardous wastes
- Marine pollution
  - Pollution from ships
- Suggestions for further reading
- 16 The law of treaties
  - The making of treaties
    - Formalities
    - Consent
      - Consent by signature
      - Consent by exchange of instruments
      - Consent by ratification
      - Consent by accession
  - Reservations to treaties
  - Entry into force of treaties
  - The application of treaties
    - Third states
  - The amendment and modification of treaties
  - Treaty interpretation
  - Invalidity, termination and suspension of the operation of treaties
    - General provisions
    - Invalidity of treaties
      - Municipal law
      - Error
      - Fraud and corruption
      - Coercion
    - Jus cogens
      - Consequences of invalidity
  - The termination of treaties
    - Termination by treaty provision or consent
    - Material breach
    - Supervening impossibility of performance
    - Fundamental change of circumstances
  - Dispute settlement
  - Treaties between states and international organisations
  - Suggestions for further reading
- 17 State succession
  - Continuity and succession
  - Succession to treaties
    - Categories of treaties: territorial, political and other treaties
    - Succession to treaties generally

- Absorption and merger
- Cession of territory from one state to another
- Separation from an existing state to form a new state or states
- ‘Newly independent states’
- Dissolution of states
- International human rights treaties
- Succession with respect to matters other than treaties
- Membership of international organisations
- Succession to assets and debts
  - State property
  - State archives
  - Public debt
  - Private rights
  - State succession and nationality
  - State succession and responsibility
- Hong Kong
- Suggestions for further reading
- 18 The settlement of disputes by peaceful means
  - Diplomatic methods of dispute settlement
    - Negotiation
    - Good offices and mediation
    - Inquiry
    - Conciliation
  - International institutions and dispute settlement
    - Regional organisations
      - The African Union (Organization of African Unity)
      - The Organization of American States
      - The Arab League
      - Europe
    - International organisations and facilities of limited competence
  - Binding methods of dispute settlement
    - Arbitration
  - Suggestions for further reading
- 19 The International Court of Justice
  - The organisation of the Court
  - The jurisdiction of the Court
    - General
      - The nature of a legal dispute
      - Contentious jurisdiction
      - Article 36(1)

- Article 36(2)
- Sources of law, propriety and legal interest
- Evidence
- Provisional measures
- Counter-claims
- Third-party intervention
- Remedies
- Enforcement
- Application for interpretation of a judgment
- Application for revision of a judgment
- Examination of a situation after the judgment
- The advisory jurisdiction of the Court

The role of the Court

Proliferation of courts and tribunals

Suggestions for further reading

## 20 International law and the use of force by states

Law and force from the 'just war' to the United Nations

The UN Charter

'Force'

Categories of force

Retorsion

Reprisals

The right of self-defence

The protection of nationals abroad

Conclusions

Collective self-defence

Intervention

Civil wars

Aid to the authorities of a state

Aid to rebels

The situation in the Democratic Republic of the Congo

Humanitarian intervention

Terrorism and international law

Suggestions for further reading

## 21 International humanitarian law

Development

The scope of protection under international humanitarian law

The wounded and sick

Prisoners of war

Protection of civilians and occupation

The conduct of hostilities

Armed conflicts: international and internal

Non-international armed conflict

Enforcement of humanitarian law

Conclusion

Suggestions for further reading

## 22 The United Nations

The UN system

The Security Council

The General Assembly

Other principal organs

The peaceful settlement of disputes

The League of Nations

The United Nations system

The Security Council

The General Assembly

The Secretary-General

Peacekeeping and observer missions

Conclusion

The collective security system

The Security Council

Determination of the situation

Chapter VII measures

Targeted sanctions and human rights

Implied authorisation

Responsibility to protect and humanitarian intervention by the UN

The use of force in non-enforcement situations

The range of UN actions from humanitarian assistance to enforcement – conclusions

The Security Council, international law and the International Court of Justice

The role of the General Assembly

The UN and regional arrangements and agencies

Suggestions for further reading

## 23 International institutions

Introduction

Some legal aspects of international organisations

Personality

The constituent instruments

The powers of international institutions

The applicable law

The responsibility of international institutions  
Liability of member states  
The accountability of international institutions  
Privileges and immunities  
Dissolution  
Succession  
Suggestions for further reading

*Index*

# Preface

---

The chapters in this book have been re-examined, updated and, where necessary, rewritten in order to try and cope with the ever-increasing profusion of new materials on international law.

I would especially like to thank Sinead Moloney of Cambridge University Press for her encouragement, assistance and above all patience over the years. She has since moved on to pastures new and I am grateful to Helen Francis and Marta Walkowiak for taking up the project and to Caroline Mowatt and Emily Trebilcock for their production work. Particular gratitude is owed to Andrew Sanger for his meticulous research assistance. I am also grateful to Laurence Marsh for his careful copy-editing and to Michael Heary for so carefully preparing the index and tables respectively. A debt remains to Sir Elihu Lauterpacht QC for his encouragement in the early development of this work. I also remain grateful to my many colleagues from many countries for their advice and encouragement, while reassuring them that all responsibility for the end product rests squarely with me.

As ever, the real and deepest thanks are due to my wife Judith and my children, Talia, Ilan and Daniella and now my grandchildren, Mika and Eden. They have borne the brunt of my travails over the years and endured the inevitable pressures and have done so in a caring and loving manner. Their support remains the indispensable foundation of this work.

Malcolm N. Shaw QC

# 1 The nature and development of international law

---

In the long march of mankind from the cave to the computer a central role has always been played by the idea of law – the idea that order is necessary and chaos inimical to a just and stable existence. Every society, whether it be large or small, powerful or weak, has created for itself a framework of principles within which to develop. What can be done, what cannot be done, permissible acts, forbidden acts, have all been spelt out within the consciousness of that community. Progress, with its inexplicable leaps and bounds, has always been based upon the group as men and women combine to pursue commonly accepted goals, whether these be hunting animals, growing food or simply making money.

Law is that element which binds the members of the community together in their adherence to recognised values and standards. It is both permissive in allowing individuals to establish their own legal relations with rights and duties, as in the creation of contracts, and coercive, as it punishes those who infringe its regulations. Law consists of a series of rules regulating behaviour, and reflecting, to some extent, the ideas and preoccupations of the society within which it functions.

And so it is with what is termed international law, with the important difference that the principal subjects of international law are nation-states, not individual citizens. There are many contrasts between the law within a country (municipal law) and the law that operates outside and between states, international organisations and, in certain cases, individuals.

International law itself is divided into conflict of laws (or private international law as it is sometimes called) and public international law (usually just termed international law).<sup>1</sup> The former deals with those cases, *within* particular legal systems, in which foreign elements obtrude, raising questions as to the application of foreign law or the role of foreign courts.<sup>2</sup> For example, if two Englishmen make a contract in France to sell goods situated in Paris, an English court would apply French law as regards the validity of that contract. By contrast, public international law is not simply an adjunct of a legal order, but a separate system altogether,<sup>3</sup> and it is this field that will be considered in this book.

Public international law covers relations between states in all their myriad forms, from war to satellites, and regulates the operations of the many international institutions. It may be universal or general, in which case the stipulated rules bind all the states (or practically all depending upon the nature of the rule), or regional, whereby a group of states linked geographically or ideologically may recognise special rules applying only to them, for example, the practice of diplomatic asylum that has developed to its greatest extent in Latin America.<sup>4</sup> The rules of international

law must be distinguished from what is called international comity, or practices such as saluting the flags of foreign warships at sea, which are implemented solely through courtesy and are not regarded as legally binding.<sup>5</sup> Similarly, the mistake of confusing international law with international morality must be avoided. While they may meet at certain points, the former discipline is a legal one both as regards its content and its form, while the concept of international morality is a branch of ethics. This does not mean, however, that international law can be divorced from its values.

In this chapter and the next, the characteristics of the international legal system and the historical and theoretical background necessary to a proper appreciation of the part to be played by the law in international law will be examined.

## **Law and politics in the world community**

It is the legal quality of international law that is the first question to be posed. Each side to an international dispute will doubtless claim legal justification for its actions and within the international system there is no independent institution able to determine the issue and give a final decision.

Virtually everybody who starts reading about international law does so having learned or absorbed something about the principal characteristics of ordinary or domestic law. Such identifying marks would include the existence of a recognised body to legislate or create laws, a hierarchy of courts with compulsory jurisdiction to settle disputes over such laws and an accepted system of enforcing those laws. Without a legislature, judiciary and executive, it would seem that one cannot talk about a legal order.<sup>6</sup> And international law does not fit this model. International law has no legislature. The General Assembly of the United Nations comprising delegates from all the member states exists, but its resolutions are not legally binding save for certain of the organs of the United Nations for certain purposes.<sup>7</sup> There is no system of courts. The International Court of Justice does exist at The Hague but it can only decide cases when both sides agree<sup>8</sup> and it cannot ensure that its decisions are complied with. Above all there is no executive or governing entity. The Security Council of the United Nations, which was intended to have such a role in a sense, has at times been effectively constrained by the veto power of the five permanent members (USA; USSR, now the Russian Federation; China; France; and the United Kingdom).<sup>9</sup> Thus, if there is no identifiable institution either to establish rules, or to clarify them or see that those who break them are punished, how can what is called international law be law?

It will, of course, be realised that the basis for this line of argument is the

comparison of domestic law with international law, and the assumption of an analogy between the national system and the international order. And this is at the heart of all discussions about the nature of international law.

At the turn of the nineteenth century, the English philosopher John Austin elaborated a theory of law based upon the notion of a sovereign issuing a command backed by a sanction or punishment. Since international law did not fit within that definition it was relegated to the category of 'positive morality'.<sup>10</sup> This concept has been criticised for oversimplifying and even confusing the true nature of law within a society and for over emphasising the role of the sanction within the system by linking it to every rule.<sup>11</sup> This is not the place for a comprehensive summary of Austin's theory but the idea of coercion as an integral part of any legal order is a vital one that needs looking at in the context of international law.

## **The role of force**

There is no unified system of sanctions<sup>12</sup> in international law in the sense that there is in municipal law, but there are circumstances in which the use of force is regarded as justified and legal. Within the United Nations system, sanctions may be imposed by the Security Council upon the determination of a threat to the peace, breach of the peace or act of aggression.<sup>13</sup> Such sanctions may be economic, for example those proclaimed in 1966 against Rhodesia,<sup>14</sup> or military as in the Korean war in 1950,<sup>15</sup> or indeed both, as in 1990 against Iraq.<sup>16</sup>

Coercive action within the framework of the UN is rare because it requires co-ordination amongst the five permanent members of the Security Council and this obviously needs an issue not regarded by any of the great powers as a threat to their vital interests.

Korea was an exception and joint action could only be undertaken because of the fortuitous absence of the USSR from the Council as a protest at the seating of the Nationalist Chinese representatives.<sup>17</sup>

Apart from such institutional sanctions, one may note the bundle of rights to take violent action known as self-help.<sup>18</sup> This procedure to resort to force to defend certain rights is characteristic of primitive systems of law with blood-feuds, but in the domestic legal order such procedures and methods are now within the exclusive control of the established authority. States may use force in self-defence, if the object of aggression, and may take action in response to the illegal acts of other states. In such cases the states themselves decide whether to take action and, if so, the extent of their measures, and there is no supreme body to rule on their legality or otherwise, in the absence of an examination by the International Court of Justice,

acceptable to both parties, although international law does lay down relevant rules.<sup>19</sup>

Accordingly those writers who put the element of force to the forefront of their theories face many difficulties in describing the nature, or rather the legal nature of international law, with its lack of a coherent, recognised and comprehensive framework of sanctions. To see the sanctions of international law in the states' rights of self-defence and reprisals<sup>20</sup> is to misunderstand the role of sanctions within a system because they are at the disposal of the states, not the system itself. Neither must it be forgotten that the current trend in international law is to restrict the use of force as far as possible, thus leading to the absurd result that the more force is controlled in international society, the less legal international law becomes.

Since one cannot discover the nature of international law by reference to a definition of law predicated upon sanctions, the character of the international legal order has to be examined in order to seek to discover whether in fact states feel obliged to obey the rules of international law and, if so, why. If, indeed, the answer to the first question is negative, that states do not feel the necessity to act in accordance with such rules, then there does not exist any system of international law worthy of the name.

## **The international system<sup>21</sup>**

The key to the search lies within the unique attributes of the international system in the sense of the network of relationships existing primarily, if not exclusively, between states recognising certain common principles and ways of doing things.<sup>22</sup> While the legal structure within all but the most primitive societies is hierarchical and authority is vertical, the international system is horizontal, consisting of over 190 independent states, all equal in legal theory (in that they all possess the characteristics of sovereignty) and recognising no one in authority over them. The law is above individuals in domestic systems, but international law only exists as between the states. Individuals only have the choice as to whether to obey the law or not. They do not create the law. That is done by specific institutions. In international law, on the other hand, it is the states themselves that create the law and obey or disobey it.<sup>23</sup> This, of course, has profound repercussions as regards the sources of law as well as the means for enforcing accepted legal rules.

International law, as will be shown in succeeding chapters, is primarily formulated by international agreements, which create rules binding upon the signatories, and customary rules, which are basically state practices recognised by the community at large as laying down patterns of conduct that have to be complied with.

However, it may be argued that since states themselves sign treaties and engage in action that they may or may not regard as legally obligatory, international law would appear to consist of a series of rules from which states may pick and choose. Contrary to popular belief, states do observe international law, and violations are comparatively rare. However, such violations (like armed attacks and racial oppression) are well publicised and strike at the heart of the system, the creation and preservation of international peace and justice. But just as incidents of murder, robbery and rape do occur within national legal orders without destroying the system as such, so analogously assaults upon international legal rules point up the weaknesses of the system without denigrating their validity or their necessity. Thus, despite the occasional gross violation, the vast majority of the provisions of international law are followed.<sup>24</sup>

In the daily routine of international life, large numbers of agreements and customs are complied with. However, the need is felt in the hectic interplay of world affairs for some kind of regulatory framework or rules network within which the game can be played, and international law fulfils that requirement. States feel this necessity because it imports an element of stability and predictability into the situation.

Where countries are involved in a disagreement or a dispute, it is handy to have recourse to the rules of international law even if there are conflicting interpretations since at least there is a common frame of reference and one state will be aware of how the other state will develop its argument. They will both be talking a common language and this factor of communication is vital since misunderstandings occur so easily and often with tragic consequences. Where the antagonists dispute the understanding of a particular rule and adopt opposing stands as regards its implementation, they are at least on the same wavelength and communicate by means of the same phrases. That is something. It is not everything, for it is a mistake as well as inaccurate to claim for international law more than it can possibly deliver. It can constitute a mutually understandable vocabulary book and suggest possible solutions which follow from a study of its principles. What it cannot do is solve every problem no matter how dangerous or complex merely by being there. International law has not yet been developed, if it ever will, to that particular stage and one should not exaggerate its capabilities while pointing to its positive features.

But what is to stop a state from simply ignoring international law when proceeding upon its chosen policy? Can a legal rule against aggression, for example, of itself prevail over political temptations? There is no international police force to prevent such an action, but there are a series of other considerations closely bound up with the character of international law which might well cause a potential aggressor to forbear.

There is the element of reciprocity at work and a powerful weapon it can be. States quite often do not pursue one particular course of action which might bring them short-term gains, because it could disrupt the mesh of reciprocal tolerance which could very well bring long-term disadvantages. For example, states everywhere protect the immunity of foreign diplomats for not to do so would place their own officials abroad at risk.<sup>25</sup> This constitutes an inducement to states to act reasonably and moderate demands in the expectation that this will similarly encourage other states to act reasonably and so avoid confrontations. Because the rules can ultimately be changed by states altering their patterns of behaviour and causing one custom to supersede another, or by mutual agreement, a certain definite reference to political life is retained. But the point must be made that a state, after weighing up all possible alternatives, might very well feel that the only method to protect its vital interests would involve a violation of international law and that responsibility would just have to be taken. Where survival is involved international law may take second place.

Another significant factor is the advantages, or 'rewards', that may occur in certain situations from an observance of international law. It may encourage friendly or neutral states to side with one country involved in a conflict rather than its opponent, and even take a more active role than might otherwise have been the case. In many ways, it is an appeal to public opinion for support and all states employ this tactic.

In many ways, it reflects the esteem in which law is held. The Soviet Union made considerable use of legal arguments in its effort to establish its non-liability to contribute towards the peacekeeping operations of the United Nations,<sup>26</sup> and the Americans too, justified their activities with regard to Cuba<sup>27</sup> and Vietnam<sup>28</sup> by reference to international law. In some cases it may work and bring considerable support in its wake, in many cases it will not, but in any event the very fact that all states do it is a constructive sign.

A further element worth mentioning in this context is the constant formulation of international business in characteristically legal terms. Points of view and disputes, in particular, are framed legally with references to precedent, international agreements and even the opinions of juristic authors. Claims are pursued with regard to the rules of international law and not in terms of, for example, morality or ethics.<sup>29</sup> This has brought into being a class of officials throughout governmental departments, in addition to those working in international institutions, versed in international law and carrying on the everyday functions of government in a law-oriented way. Many writers have, in fact, emphasised the role of officials in the actual functioning of law and the influence they have upon the legal process.<sup>30</sup>

Having come to the conclusion that states do observe international law and will usually only violate it on an issue regarded as vital to their interests, the question arises as to the basis of this sense of obligation.<sup>31</sup> The nineteenth century, with its business-oriented philosophy, stressed the importance of the contract, as the legal basis of an agreement freely entered into by both (or all) sides, and this influenced the theory of consent in international law.<sup>32</sup> States were independent, and free agents, and accordingly they could only be bound with their own consent. There was no authority in existence able theoretically or practically to impose rules upon the various nation-states. This approach found its extreme expression in the theory of auto-limitation, or self-limitation, which declared that states could only be obliged to comply with international legal rules if they had first agreed to be so obliged.<sup>33</sup>

Nevertheless, this theory is most unsatisfactory as an account of why international law is regarded as binding or even as an explanation of the international legal system.<sup>34</sup> To give one example, there are about 100 states that have come into existence since the end of the Second World War and by no stretch of the imagination can it be said that such states have consented to all the rules of international law formed prior to their establishment. It could be argued that by 'accepting independence', states consent to all existing rules, but to take this view relegates consent to the role of a mere fiction.<sup>35</sup>

This theory also fails as an adequate explanation of the international legal system, because it does not take into account the tremendous growth in international institutions and the network of rules and regulations that have emerged from them within the last generation.

To accept consent as the basis for obligation in international law<sup>36</sup> begs the question as to what happens when consent is withdrawn. The state's reversal of its agreement to a rule does not render that rule optional or remove from it its aura of legality. It merely places that state in breach of its obligations under international law if that state proceeds to act upon its decision. Indeed, the principle that agreements are binding (*pacta sunt servanda*) upon which all treaty law must be based cannot itself be based upon consent.<sup>37</sup>

One current approach to this problem is to refer to the doctrine of consensus.<sup>38</sup> This reflects the influence of the majority in creating new norms of international law and the acceptance by other states of such new rules. It attempts to put into focus the change of emphasis that is beginning to take place from exclusive concentration upon the nation-state to a consideration of the developing forms of international co-operation where such concepts as consent and sanction are inadequate to explain what is happening.

Of course, one cannot ignore the role of consent in international law. To recognise its limitations is not to neglect its significance. Much of international law is constituted by states expressly agreeing to specific normative standards, most obviously by entering into treaties. This cannot be minimised. Nevertheless, it is preferable to consider consent as important not only with regard to specific rules specifically accepted (which is not the sum total of international law, of course) but in the light of the approach of states generally to the totality of rules, understandings, patterns of behaviour and structures underpinning and constituting the international system.<sup>39</sup> In a broad sense, states accept or consent to the general system of international law, for in reality without that no such system could possibly operate. It is this approach which may be characterised as consensus or the essential framework within which the demand for individual state consent is transmuted into community acceptance.

It is important to note that while states from time to time object to particular rules of international law and seek to change them, no state has sought to maintain that it is free to object to the system as a whole. Each individual state, of course, has the right to seek to influence by word or deed the development of specific rules of international law, but the creation of new customary rules is not dependent upon the express consent of each particular state.

## **The function of politics**

It is clear that there can never be a complete separation between law and policy. No matter what theory of law or political philosophy is professed, the inextricable bonds linking law and politics must be recognised.

Within developed societies a distinction is made between the formulation of policy and the method of its enforcement. In the United Kingdom, Parliament legislates while the courts adjudicate and a similar division is maintained in the United States between the Congress and the courts system. The purpose of such divisions, of course, is to prevent a concentration of too much power within one branch of government. Nevertheless, it is the political branch which makes laws and in the first place creates the legal system. Even within the hierarchy of courts, the judges have leeway in interpreting the law and in the last resort make decisions from amongst a number of alternatives.<sup>40</sup> This position, however, should not be exaggerated because a number of factors operate to conceal and lessen the impact of politics upon the legal process. Foremost amongst these is the psychological element of tradition and the development of the so-called 'law-habit'.<sup>41</sup> A particular legal atmosphere has been created, which is buttressed by the political system and recognises the independent existence of law institutions and methods of operation

characterised as ‘just’ or ‘legal’. In most countries overt interference with the juridical process would be regarded as an attack upon basic principles and hotly contested. The use of legal language and accepted procedures together with the pride of the legal profession reinforce the system and emphasise the degree of distance maintained between the legislative–executive organs and the judicial structure.<sup>42</sup>

However, when one looks at the international legal scene the situation changes. The arbiters of the world order are, in the last resort, the states and they both make the rules (ignoring for the moment the secondary, if growing, field of international organisations) and interpret and enforce them.

While it is possible to discern an ‘international legal habit’ amongst governmental and international officials, the machinery necessary to enshrine this does not exist.

Politics is much closer to the heart of the system than is perceived within national legal orders, and power much more in evidence.<sup>43</sup> The interplay of law and politics in world affairs is much more complex and difficult to unravel, and signals a return to the earlier discussion as to why states comply with international rules. Power politics stresses competition, conflict and supremacy and adopts as its core the struggle for survival and influence.<sup>44</sup> International law aims for harmony and the regulation of disputes. It attempts to create a framework, no matter how rudimentary, which can act as a kind of shock-absorber clarifying and moderating claims and endeavouring to balance interests. In addition, it sets out a series of principles declaring how states should behave. Just as any domestic community must have a background of ideas and hopes to aim at, even if few can be or are ever attained, so the international community, too, must bear in mind its ultimate values.

However, these ultimate values are in a formal sense kept at arm’s length from the legal process. As the International Court noted in the *South-West Africa* case,<sup>45</sup> ‘It is a court of law, and can take account of moral principles only in so far as these are given a sufficient expression in legal form. Law exists, it is said, to serve a social need; but precisely for that reason it can do so only through and within the limits of its own discipline. Otherwise, it is not a legal service that would be rendered.’<sup>46</sup>

International law cannot be a source of instant solutions to problems of conflict and confrontation because of its own inherent weaknesses in structure and content. To fail to recognise this encourages a utopian approach which, when faced with reality, will fail.<sup>47</sup> On the other hand, the cynical attitude with its obsession with brute power is equally inaccurate, if more depressing.

It is the medium road, recognising the strength and weakness of international law and pointing out what it can achieve and what it cannot, which offers the best hope. Man seeks order, welfare and justice not only within the state in which he lives, but

also within the international system in which he lives.

## Historical development<sup>48</sup>

The foundations of international law (or the law of nations) as it is understood today lie firmly in the development of Western culture and political organisation.

The growth of European notions of sovereignty and the independent nation-state required an acceptable method whereby inter-state relations could be conducted in accordance with commonly accepted standards of behaviour, and international law filled the gap. But although the law of nations took root and flowered with the sophistication of Renaissance Europe, the seeds of this particular hybrid plant are of far older lineage. They reach far back into history.

## Early origins

While the modern international system can be traced back some 400 years, certain of the basic concepts of international law can be discerned in political relationships thousands of years ago.<sup>49</sup> Around 2100 BC, for instance, a solemn treaty was signed between the rulers of Lagash and Umma, the city-states situated in the area known to historians as Mesopotamia. It was inscribed on a stone block and concerned the establishment of a defined boundary to be respected by both sides under pain of alienating a number of Sumerian gods.<sup>50</sup> The next major instance known of an important, binding, international treaty is that concluded over 1,000 years later between Rameses II of Egypt and the king of the Hittites for the establishment of eternal peace and brotherhood.<sup>51</sup> Other points covered in that agreement signed, it would seem, at Kadesh, north of Damascus, included respect for each other's territorial integrity, the termination of a state of aggression and the setting up of a form of defensive alliance.

Since that date many agreements between the rival Middle Eastern powers were concluded, usually aimed at embodying in a ritual form a state of subservience between the parties or attempting to create a political alliance to contain the influence of an over-powerful empire.<sup>52</sup>

The role of ancient Israel must also be noted. A universal ethical stance coupled with rules relating to warfare were handed down to other peoples and religions and the demand for justice and a fair system of law founded upon strict morality permeated the thought and conduct of subsequent generations.<sup>53</sup> For example, the Prophet Isaiah declared that sworn agreements, even where made with the enemy, must be performed.<sup>54</sup> Peace and social justice were the keys to man's existence, not

power.

After much neglect, there is now more consideration of the cultures and standards that evolved, before the birth of Christ, in the Far East, in the Indian<sup>55</sup> and Chinese<sup>56</sup> civilisations. Many of the Hindu rules displayed a growing sense of morality and generosity and the Chinese Empire devoted much thought to harmonious relations between its constituent parts. Regulations controlling violence and the behaviour of varying factions with regard to innocent civilians were introduced and ethical values instilled in the education of the ruling classes. In times of Chinese dominance, a regional tributary-states system operated which fragmented somewhat in times of weakness, but this remained culturally alive for many centuries.

However, the predominant approach of ancient civilisations was geographically and culturally restricted. There was no conception of an international community of states co-existing within a defined framework. The scope for any 'international law' of states was extremely limited and all that one can point to is the existence of certain ideals, such as the sanctity of treaties, which have continued to this day as important elements in society. But the notion of a universal community with its ideal of world order was not in evidence.

The era of classical Greece, from about the sixth century BC and onwards for a couple of hundred years, has, one must note, been of overwhelming significance for European thought. Its critical and rational turn of mind, its constant questioning and analysis of man and nature and its love of argument and debate were spread throughout Europe and the Mediterranean world by the Roman Empire which adopted Hellenic culture wholesale, and penetrated Western consciousness with the Renaissance. However, Greek awareness was limited to their own competitive city-states and colonies. Those of different origin were barbarians not deemed worthy of association.

The value of Greece in a study of international law lies partly in the philosophical, scientific and political analyses bequeathed to mankind and partly in the fascinating state of inter-relationship built up within the Hellenistic world.<sup>57</sup> Numerous treaties linked the city-states together in a network of commercial and political associations. Rights were often granted to the citizens of the states in each other's territories and rules regarding the sanctity and protection of diplomatic envoys developed. Certain practices were essential before the declaration of war, and the horrors of war were somewhat ameliorated by the exercise, for example, of religious customs regarding sanctuaries. But no overall moral approach similar to those emerging from Jewish and Hindu thought, particularly, evolved. No sense of a world community can be traced to Greek ideology in spite of the growth of Greek colonies throughout the Mediterranean area. This was left to the able administrators of the Roman Empire.<sup>58</sup>

The Romans had a profound respect for organisation and the law.<sup>59</sup> The law knitted together their empire and constituted a vital source of reference for every inhabitant of the far-flung domain. The early Roman law (the *jus civile*) applied only to Roman citizens. It was formalistic and hard and reflected the status of a small, unsophisticated society rooted in the soil.

It was totally unable to provide a relevant background for an expanding, developing nation. This need was served by the creation and progressive augmentation of the *jus gentium*. This provided simplified rules to govern the relations between foreigners, and between foreigners and citizens. The instrument through which this particular system evolved was the official known as the Praetor Peregrinus, whose function it was to oversee all legal relationships, including bureaucratic and commercial matters, within the empire.

The progressive rules of the *jus gentium* gradually overrode the narrow *jus civile* until the latter system ceased to exist. Thus, the *jus gentium* became the common law of the Roman Empire and was deemed to be of universal application.

It is this all-embracing factor which so strongly distinguishes the Roman from the Greek experience, although, of course, there was no question of the acceptance of other nations on a basis of equality and the *jus gentium* remained a 'national law' for the Roman Empire.

One of the most influential of Greek concepts taken up by the Romans was the idea of Natural Law.<sup>60</sup> This was formulated by the Stoic philosophers of the third century BC and their theory was that it constituted a body of rules of universal relevance. Such rules were rational and logical, and because the ideas and precepts of the 'law of nature' were rooted in human intelligence, it followed that such rules could not be restricted to any nation or any group but were of worldwide relevance. This element of universality is basic to modern doctrines of international law and the Stoic elevation of human powers of logical deduction to the supreme pinnacle of 'discovering' the law foreshadows the rational philosophies of the West. In addition to being a fundamental concept in legal theory, Natural Law is vital to an understanding of international law, as well as being an indispensable precursor to contemporary concern with human rights.

Certain Roman philosophers incorporated those Greek ideas of Natural Law into their own legal theories, often as a kind of ultimate justification of the *jus gentium*, which was deemed to enshrine rational principles common to all civilised nations.

However, the law of nature was held to have an existence over and above that of the *jus gentium*. This led to much confusion over the exact relationship between the two ideas and different Roman lawyers came to different conclusions as to their

identity and characteristics. The important factors though that need to be noted are the theories of the universality of law and the rational origins of legal rules that were founded, theoretically at least, not on superior force but on superior reason.

The classical rules of Roman law were collated in the *Corpus Juris Civilis*, a compilation of legal material by a series of Byzantine philosophers completed in AD 529.<sup>61</sup> Such a collection was to be invaluable when the darkness of the early Middle Ages, following the Roman collapse, began gradually to evaporate. For here was a body of developed laws ready made and awaiting transference to an awakening Europe.

At this stage reference must be made to the growth of Islam.<sup>62</sup> Its approach to international relations and law was predicated upon a state of hostility towards the non-Moslem world and the concept of unity, Dar al-Islam, as between Moslem countries. Generally speaking, humane rules of warfare were developed and the 'peoples of the book' (Jews and Christians) were treated better than non-believers, although in an inferior position to Moslems. Once the period of conquest was over and power was consolidated, norms governing conduct with non-Moslem states began to develop. The law dealing with diplomats was founded upon notions of hospitality and safety (*aman*), while rules governing international agreements grew out of the concept of respecting promises made.<sup>63</sup>

## **The Middle Ages and the Renaissance**

The Middle Ages were characterised by the authority of the organised Church and the comprehensive structure of power that it commanded.<sup>64</sup> All Europe was of one religion, and the ecclesiastical law applied to all, notwithstanding tribal or regional affiliations. For much of the period, there were struggles between the religious authorities and the rulers of the Holy Roman Empire.

These conflicts were eventually resolved in favour of the Papacy, but the victory over secularism proved of relatively short duration. Religion and a common legacy derived from the Roman Empire were strongly unifying influences, while political and regional rivalries were not. But before a recognised system of international law could be created, social changes were essential.

Of particular importance during this era were the authority of the Holy Roman Empire and the supranational character of canon law.<sup>65</sup> Nevertheless, commercial and maritime law developed apace. English law established the *Law Merchant*, a code of rules covering foreign traders, and this was declared to be of universal application.<sup>66</sup>

Throughout Europe, mercantile courts were set up to settle disputes between

tradesmen at the various fairs, and while it is not possible to state that a Continental *Law Merchant* came into being, a network of common regulations and practices weaved its way across the commercial fabric of Europe and constituted an embryonic international trade law.<sup>67</sup>

Similarly, maritime customs began to be accepted throughout the Continent. Founded upon the Rhodian Sea Law, a Byzantine work, many of whose rules were enshrined in the Rolls of Oleron in the twelfth century, and other maritime textbooks, a series of commonly applied customs relating to the sea permeated the naval powers of the Atlantic and Mediterranean coasts.<sup>68</sup>

Such commercial and maritime codes, while at this stage merely expressions of national legal systems, were amongst the forerunners of international law because they were created and nurtured against a backcloth of cross-national contacts and reflected the need for rules that would cover international situations.

Such rules, growing out of the early Middle Ages, constituted the seeds of international law, but before they could flourish, European thought had first to be developed by that intellectual explosion known as the Renaissance.

This complex of ideas changed the face of European society and ushered in the modern era of scientific, humanistic and individualistic thought.<sup>69</sup>

The collapse of the Byzantine Empire centred on Constantinople before the Turkish armies in 1453 drove many Greek scholars to seek sanctuary in Italy and enliven Western Europe's cultural life. The introduction of printing during the fifteenth century provided the means to disseminate knowledge, and the undermining of feudalism in the wake of economic growth and the rise of the merchant classes provided the background to the new inquiring attitudes taking shape.

Europe's developing self-confidence manifested itself in a sustained drive overseas for wealth and luxury items. By the end of the fifteenth century, the Arabs had been ousted from the Iberian peninsula and the Americas reached.

The rise of the nation-states of England, France and Spain in particular characterised the process of the creation of territorially consolidated independent units, in theory and doctrine, as well as in fact. This led to a higher degree of interaction between sovereign entities and thus the need to regulate such activities in a generally acceptable fashion. The pursuit of political power and supremacy became overt and recognised, as Machiavelli's *The Prince* (1513) demonstrated.

The city-states of Italy struggled for supremacy and the Papacy too became a secular power. From these hectic struggles emerged many of the staples of modern international life: diplomacy, statesmanship, the theory of the balance of power and

the idea of a community of states.<sup>70</sup>

Notions such as these are immediately appreciable and one can identify with the various manoeuvres for political supremacy. Alliances, betrayals, manipulations of state institutions and the drive for power are not unknown to us. We recognise the roots of our society.

It was the evolution of the concept of an international community of separate, sovereign, if competing, states, that marks the beginning of what is understood by international law. The Renaissance bequeathed the prerequisites of independent, critical thought and a humanistic, secular approach to life as well as the political framework for the future. But it is the latter factor which is vital to the subsequent growth of international law. The Reformation and the European religious wars that followed emphasised this, as did the growing power of the nations. In many ways these wars marked the decline of a continental system founded on religion and the birth of a continental system founded on the supremacy of the state.

Throughout these countries the necessity was felt for a new conception of human as well as state relationships. This search was precipitated, as has been intimated, by the decline of the Church and the rise of what might be termed 'free-thinking'. The theory of international law was naturally deeply involved in this reappraisal of political life and it was tremendously influenced by the rediscovery of Greco-Roman ideas. The Renaissance stimulated a rebirth of Hellenic studies and ideas of Natural Law, in particular, became popular.

Thus, a distinct value-system to underpin international relations was brought into being and the law of nations was heralded as part of the universal law of nature.

With the rise of the modern state and the emancipation of international relations, the doctrine of sovereignty emerged. This concept, first analysed systematically in 1576 in the *Six Livres de la République* by Jean Bodin, was intended to deal with the structure of authority within the modern state. Bodin, who based his study upon his perception of the politics of Europe rather than on a theoretical discussion of absolute principles, emphasised the necessity for a sovereign power within the state that would make the laws. While such a sovereign could not be bound by the laws he himself instituted, he was subject to the laws of God and of nature.<sup>71</sup>

The idea of the sovereign as supreme legislator was in the course of time transmuted into the principle which gave the state supreme power vis-à-vis other states. The state was regarded as being above the law. Such notions as these formed the intellectual basis of the line of thought known as positivism which will be discussed later.<sup>72</sup>

The early theorists of international law were deeply involved with the ideas of

Natural Law and used them as the basis of their philosophies. Included within that complex of Natural Law principles from which they constructed their theories was the significant merging of Christian and Natural Law ideas that occurred in the philosophy of St Thomas Aquinas.<sup>73</sup> He maintained that Natural Law formed part of the law of God, and was the participation by rational creatures in the Eternal Law. It complemented that part of the Eternal Law which had been divinely revealed. Reason, declared Aquinas, was the essence of man and thus must be involved in the ordering of life according to the divine will. Natural Law was the fount of moral behaviour as well as of social and political institutions, and it led to a theory of conditional acceptance of authority with unjust laws being unacceptable. Aquinas' views of the late thirteenth century can be regarded as basic to an understanding of present Catholic attitudes, but should not be confused with the later interpretation of Natural Law which stressed the concepts of natural rights.

It is with such an intellectual background that Renaissance scholars approached the question of the basis and justification of a system of international law. Maine, a British historical lawyer, wrote that the birth of modern international law was the grandest function of the law of nature and while that is arguable, the point must be taken.<sup>74</sup> International law began to emerge as a separate topic to be studied within itself, although derived from the principles of Natural Law.

## **The founders of modern international law**

The essence of the new approach to international law can be traced back to the Spanish philosophers of that country's Golden Age.<sup>75</sup> The leading figure of this school was Francisco Vitoria, Professor of Theology at the University of Salamanca (1480–1546). His lectures were preserved by his students and published posthumously. He demonstrated a remarkably progressive attitude for his time towards the Spanish conquest of the South American Indians and, contrary to the views prevalent until then, maintained that the Indian peoples should be regarded as nations with their own legitimate interests. War against them could only be justified on the grounds of a just cause. International law was founded on the universal law of nature and this meant that non-Europeans must be included within its ambit. However, Vitoria by no means advocated the recognition of the Indian nations as equal to the Christian states of Europe. For him, opposing the work of the missionaries in the territories was a just reason for war, and he adopted a rather extensive view as to the rights of the Spaniards in South America. Vitoria was no liberal and indeed acted on behalf of the Spanish Inquisition, but his lectures did mark a step forward in the right direction.<sup>76</sup>

Suárez (1548–1617) was a Jesuit and Professor of Theology who was deeply immersed in medieval culture. He noted that the obligatory character of

international law was based upon Natural Law, while its substance derived from the Natural Law rule of carrying out agreements entered into.<sup>77</sup>

From a totally different background but equally, if not more, influential was Alberico Gentili (1552–1608). He was born in Northern Italy and fled to England to avoid persecution, having converted to Protestantism. In 1598 his *De Jure Belli* was published.<sup>78</sup> It is a comprehensive discussion of the law of war and contains a valuable section on the law of treaties. Gentili, who became a professor at Oxford, has been called the originator of the secular school of thought in international law and he minimised the hitherto significant theological theses.

It is, however, Hugo Grotius, a Dutch scholar, who towers over this period and has been celebrated, if a little exaggeratedly, as the father of international law. He was born in 1583 and was the supreme Renaissance man. A scholar of tremendous learning, he mastered history, theology, mathematics and the law.<sup>79</sup> His primary work was the *De Jure Belli ac Pacis*, written during 1623 and 1624. It is an extensive work and includes rather more devotion to the exposition of private law notions than would seem appropriate today. He refers both to Vitoria and Gentili, the latter being of special influence with regard to many matters, particularly organisation of material.

Grotius finally excised theology from international law and emphasised the irrelevance in such a study of any conception of a divine law. He remarked that the law of nature would be valid even if there were no God: a statement which, although suitably clothed in religious protestation, was extremely daring. The law of nature now reverted to being founded exclusively on reason. Justice was part of man's social make-up and thus not only useful but essential. Grotius conceived of a comprehensive system of international law and his work rapidly became a university textbook. However, in many spheres he followed well-trodden paths. He retained the theological distinction between a just and an unjust war, a notion that was soon to disappear from treatises on international law, but which in some way underpins modern approaches to aggression, self-defence and liberation.

One of his most enduring opinions consists in his proclamation of the freedom of the seas. The Dutch scholar opposed the 'closed seas' concept of the Portuguese that was later elucidated by the English writer John Selden<sup>80</sup> and emphasised instead the principle that the nations could not appropriate to themselves the high seas. They belonged to all. It must, of course, be mentioned, parenthetically, that this theory happened to accord rather nicely with prevailing Dutch ideas as to free trade and the needs of an expanding commercial empire.

However, this merely points up what must not be disregarded, namely that concepts of law as of politics and other disciplines are firmly rooted in the world of

reality, and reflect contemporary preoccupations. No theory develops in a vacuum, but is conceived and brought to fruition in a definite cultural and social environment. To ignore this is to distort the theory itself.

## **Positivism and naturalism**

Following Grotius, but by no means divorced from the thought of previous scholars, a split can be detected and two different schools identified. On the one hand there was the 'naturalist' school, exemplified by Samuel Pufendorf (1632–94),<sup>81</sup> who attempted to identify international law completely with the law of nature; and on the other hand there were the exponents of 'positivism', who distinguished between international law and Natural Law and emphasised practical problems and current state practices. Pufendorf regarded Natural Law as a moralistic system, and misunderstood the direction of modern international law by denying the validity of the rules about custom. He also refused to acknowledge treaties as in any way relevant to a discussion of the basis of international law. Other 'naturalists' echoed those sentiments in minimising or ignoring the actual practices of states in favour of a theoretical construction of absolute values that seemed slowly to drift away from the complexities of political reality.

One of the principal initiators of the positivist school was Richard Zouche (1590–1660), who lived at the same time as Pufendorf, but in England.<sup>82</sup> While completely dismissing Natural Law, he paid scant regard to the traditional doctrines. His concern was with specific situations and his book contains many examples from the recent past. He elevated the law of peace above a systematic consideration of the law of war and eschewed theoretical expositions.

In similar style Bynkershoek (1673–1743) stressed the importance of modern practice and virtually ignored Natural Law. He made great contributions to the developing theories of the rights and duties of neutrals in war, and after careful studies of the relevant facts decided in favour of the freedom of the seas.<sup>83</sup>

The positivist approach, like much of modern thought, was derived from the empirical method adopted by the Renaissance. It was concerned not with an edifice of theory structured upon deductions from absolute principles, but rather with viewing events as they occurred and discussing actual problems that had arisen. Empiricism as formulated by Locke and Hume<sup>84</sup> denied the existence of innate principles and postulated that ideas were derived from experience. The scientific method of experiment and verification of hypotheses emphasised this approach.

From this philosophical attitude, it was a short step to reinterpreting international law not in terms of concepts derived from reason but rather in terms of what actually happened between the competing states. What states actually do was the key, not

what states ought to do given basic rules of the law of nature. Agreements and customs recognised by the states were the essence of the law of nations.

Positivism developed as the modern nation-state system emerged, after the Peace of Westphalia in 1648, from the religious wars.<sup>85</sup> It coincided, too, with theories of sovereignty such as those propounded by Bodin and Hobbes,<sup>86</sup> which underlined the supreme power of the sovereign and led to notions of the sovereignty of states.

Elements of both positivism and naturalism appear in the works of Vattel (1714–67), a Swiss lawyer. His *Droit des Gens* was based on Natural Law principles yet was practically oriented. He introduced the doctrine of the equality of states into international law, declaring that a small republic was no less a sovereign than the most powerful kingdom, just as a dwarf was as much a man as a giant. By distinguishing between laws of conscience and laws of action and stating that only the latter were of practical concern, he minimised the importance of Natural Law.<sup>87</sup>

Ironically, at the same time that positivist thought appeared to demolish the philosophical basis of the law of nature and relegate that theory to history, it re-emerged in a modern guise replete with significance for the future. Natural Law gave way to the concept of natural rights.<sup>88</sup>

It was an individualistic assertion of political supremacy. The idea of the social contract, that an agreement between individuals pre-dated and justified civil society, emphasised the central role of the individual, and whether such a theory was interpreted pessimistically to demand an absolute sovereign as Hobbes declared, or optimistically to mean a conditional acceptance of authority as Locke maintained, it could not fail to be a revolutionary doctrine. The rights of man constitute the heart of the American<sup>89</sup> and French Revolutions and the essence of modern democratic society.

Yet, on the other hand, the doctrine of Natural Law has been employed to preserve the absoluteness of sovereignty and the sanctity of private possessions. The theory has a reactionary aspect because it could be argued that what was, ought to be, since it evolved from the social contract or was divinely ordained, depending upon how secular one construed the law of nature to be.

## **The nineteenth century**

The eighteenth century was a ferment of intellectual ideas and rationalist philosophies that contributed to the evolution of the doctrine of international law. The nineteenth century by contrast was a practical, expansionist and positivist era. The Congress of Vienna, which marked the conclusion of the Napoleonic wars, enshrined the new international order which was to be based upon the European

balance of power. International law became Eurocentric, the preserve of the civilised, Christian states, into which overseas and foreign nations could enter only with the consent of and on the conditions laid down by the Western powers. Paradoxically, whilst international law became geographically internationalised through the expansion of the European empires, it became less universalist in conception and more, theoretically as well as practically, a reflection of European values.<sup>90</sup> This theme, the relationship between universalism and particularism, appears time and again in international law. This century also saw the coming to independence of Latin America and the forging of a distinctive approach to certain elements of international law by the states of that region, especially with regard to, for example, diplomatic asylum and the treatment of foreign enterprises and nationals.<sup>91</sup>

There are many other features that mark the nineteenth century. Democracy and nationalism, both spurred on by the wars of the French revolution and empire, spread throughout the Continent and changed the essence of international relations.<sup>92</sup> No longer the exclusive concern of aristocratic élites, foreign policy characterised both the positive and the negative faces of nationalism. Self-determination emerged to threaten the multinational empires of Central and Eastern Europe, while nationalism reached its peak in the unifications of Germany and Italy and began to exhibit features such as expansionism and doctrines of racial superiority. Democracy brought to the individual political influence and a say in government. It also brought home the realities of responsibility, for wars became the concern of all. Conscription was introduced throughout the Continent and large national armies replaced the small professional forces.<sup>93</sup> The Industrial Revolution mechanised Europe, created the economic dichotomy of capital and labour and propelled Western influence throughout the world. All these factors created an enormous increase in the number and variety of both public and private international institutions, and international law grew rapidly to accommodate them.<sup>94</sup> The development of trade and communications necessitated greater international co-operation as a matter of practical need. In 1815, the Final Act of the Congress of Vienna established the principle of freedom of navigation with regard to international waterways and set up a Central Commission of the Rhine to regulate its use. In 1856 a commission for the Danube was created and a number of other European rivers also became the subject of international agreements and arrangements. In 1865 the International Telegraphic Union was established and in 1874 the Universal Postal Union.<sup>95</sup>

European conferences proliferated and contributed greatly to the development of rules governing the waging of war. The International Committee of the Red Cross, founded in 1863, helped promote the series of Geneva Conventions beginning in 1864 dealing with the 'humanisation' of conflict, and the Hague Conferences of

1899 and 1907 established the Permanent Court of Arbitration and dealt with the treatment of prisoners and the control of warfare.<sup>96</sup> Numerous other conferences, conventions and congresses emphasised the expansion of the rules of international law and the close network of international relations. In addition, the academic study of international law within higher education developed with the appointment of professors of the subject and the appearance of specialist textbooks emphasising the practice of states.

Positivist theories dominate this century. The proliferation of the powers of states and the increasing sophistication of municipal legislation gave force to the idea that laws were basically commands issuing from a sovereign person or body. Any question of ethics or morality was irrelevant to a discussion of the validity of man-made laws. The approach was transferred onto the international scene and immediately came face to face with the reality of a lack of supreme authority.

Since law was ultimately dependent upon the will of the sovereign in national systems, it seemed to follow that international law depended upon the will of the sovereign states.

This implied a confusion of the supreme legislator within a state with the state itself and thus positivism had to accept the metaphysical identity of the state. The state had a life and will of its own and so was able to dominate international law. This stress on the abstract nature of the state did not appear in all positivist theories and was a late development<sup>97</sup>

It was the German thinker Hegel who first analysed and proposed the doctrine of the will of the state. The individual was subordinate to the state, because the latter enshrined the 'wills' of all citizens and had evolved into a higher will, and on the external scene the state was sovereign and supreme.<sup>98</sup> Such philosophies led to disturbing results in the twentieth century and provoked a re-awakening of the law of nature, dormant throughout the nineteenth century.

The growth of international agreements, customs and regulations induced positivist theorists to tackle this problem of international law and the state; and as a result two schools of thought emerged.

The monists claimed that there was one fundamental principle which underlay both national and international law. This was variously posited as 'right' or social solidarity or the rule that agreements must be carried out (*pacta sunt servanda*). The dualists, more numerous and in a more truly positivist frame of mind, emphasised the element of consent.

For Triepel, another German theorist, international law and domestic (or municipal) law existed on separate planes, the former governing international

relations, the latter relations between individuals and between the individual and the state. International law was based upon agreements between states (and such agreements included, according to Triepel, both treaties and customs) and because it was dictated by the 'common will' of the states it could not be unilaterally altered.<sup>99</sup>

This led to a paradox. Could this common will bind individual states and, if so, why? It would appear to lead to the conclusion that the will of the sovereign state could give birth to a rule over which it had no control. The state will was not, therefore, supreme but inferior to a collection of states' wills. Triepel did not discuss these points, but left them open as depending upon legal matters. Thus did positivist theories weaken their own positivist outlook by regarding the essence of law as beyond juridical description. The nineteenth century also saw the publication of numerous works on international law, which emphasised state practice and the importance of the behaviour of countries to the development of rules of international law.<sup>100</sup>

## The twentieth century

The First World War marked the close of a dynamic and optimistic century. European empires ruled the world and European ideologies reigned supreme, but the 1914–18 Great War undermined the foundations of European civilisation. Self-confidence faded, if slowly, the edifice weakened and the universally accepted assumptions of progress were increasingly doubted. Self-questioning was the order of the day and law as well as art reflected this.

The most important legacy of the 1919 Peace Treaty from the point of view of international relations was the creation of the League of Nations.<sup>101</sup> The old anarchic system had failed and it was felt that new institutions to preserve and secure peace were necessary. The League consisted of an Assembly and an executive Council, but was crippled from the start by the absence of the United States and the Soviet Union for most of its life and remained a basically European organisation.

While it did have certain minor successes with regard to the maintenance of international order, it failed when confronted with determined aggressors. Japan invaded China in 1931 and two years later withdrew from the League. Italy attacked Ethiopia, and Germany embarked unhindered upon a series of internal and external aggressions. The Soviet Union, in a final gesture, was expelled from the organisation in 1939 following its invasion of Finland.

Nevertheless much useful groundwork was achieved by the League in its short existence and this helped to consolidate the United Nations later on.<sup>102</sup>

The Permanent Court of International Justice was set up in 1921 at The Hague and

was succeeded in 1946 by the International Court of Justice.<sup>103</sup> The International Labour Organization was established soon after the end of the First World War and still exists today, and many other international institutions were inaugurated or increased their work during this period.

Other ideas of international law that first appeared between the wars included the system of mandates, by which colonies of the defeated powers were administered by the Allies for the benefit of their inhabitants rather than being annexed outright, and the attempt was made to provide a form of minority protection guaranteed by the League. This latter creation was not a great success but it paved the way for later concern to secure human rights.<sup>104</sup>

After the trauma of the Second World War the League was succeeded in 1946 by the United Nations Organisation, which tried to remedy many of the defects of its predecessor. It established its site at New York, reflecting the realities of the shift of power away from Europe, and determined to become a truly universal institution. The advent of decolonisation fulfilled this expectation and the General Assembly of the United Nations currently has 193 member states.<sup>105</sup>

Many of the trends which first came to prominence in the nineteenth century have continued to this day. The vast increase in the number of international agreements and customs, the strengthening of the system of arbitration and the development of international organisations have established the essence of international law as it exists today.

## **Communist approaches to international law**

Classic Marxist theory described law and politics as the means whereby the ruling classes maintained their domination of society. The essence of economic life was the ownership of the means of production, and all power flowed from this control. Capital and labour were the opposing theses and their mutual antagonism would eventually lead to a revolution out of which a new, non-exploitive form of society would emerge.<sup>106</sup> National states were dominated by the capitalist class and would have to disappear in the re-organising process. Indeed, the theory was that law and the state would wither away once a new basis for society had been established<sup>107</sup> and, because classical international law was founded upon the state, it followed that it too would go.

However, the reality of power and the existence of the USSR surrounded by capitalist nations led to a modification in this approach. The international system of states could not be changed overnight into a socialist order, so a period of transition was inevitable. Nevertheless basic changes were seen as having been wrought.

Professor Tunkin, for example, emphasised that the Russian October revolution produced a new series of international legal ideas. These, it is noted, can be divided into three basic, interconnected groups: (a) principles of socialist internationalism in relations between socialist states, (b) principles of equality and self-determination of nations and peoples, primarily aimed against colonialism, and (c) principles of peaceful coexistence aimed at relations between states with different social systems.<sup>108</sup>

We shall briefly look at these concepts in this section, but first a historical overview is necessary.

During the immediate post-revolution period, it was postulated that a transitional phase had commenced. During this time, international law as a method of exploitation would be criticised by the socialist state, but it would still be recognised as a valid system. The two Soviet theorists Korovin and Pashukanis were the dominant influences in this phase. The transitional period demanded compromises in that, until the universal victory of the revolution, some forms of economic and technical co-operation would be required since they were fundamental for the existence of the international social order.<sup>109</sup> Pashukanis expressed the view that international law was an interclass law within which two antagonistic class systems would seek accommodation until the victory of the socialist system. Socialism and the Soviet Union could still use the legal institutions developed by and reflective of the capitalist system<sup>110</sup> However, with the rise of Stalinism and the ‘socialism in one country’ call, the position hardened. Pashukanis altered his line and recanted. International law was not a form of temporary compromise between capitalist states and the USSR but rather a means of conducting the class war. The Soviet Union was bound only by those rules of international law which accorded with its purposes.<sup>111</sup>

The new approach in the late 1930s was reflected politically in Russia’s successful attempt to join the League of Nations and its policy of wooing the Western powers, and legally by the ideas of Vyshinsky. He adopted a more legalistic view of international law and emphasised the Soviet acceptance of such principles as national self-determination, state sovereignty and the equality of states, but not others. The role of international law did not constitute a single international legal system binding all states. The Soviet Union would act in pursuance of Leninist–Stalinist foreign policy ideals and would not be bound by the rules to which it had not given express consent.<sup>112</sup>

The years that followed the Second World War saw a tightening up of Soviet doctrine as the Cold War gathered pace, but with the death of Stalin and the succession of Khrushchev a thaw set in. In theoretical terms the law of the transitional stage was replaced by the international law of peaceful co-existence.

War was no longer regarded as inevitable between capitalist and socialist countries and a period of mutual tolerance and co-operation was inaugurated.<sup>113</sup>

Tunkin recognised that there was a single system of international law of universal scope rather than different branches covering socialist and capitalist countries, and that international law was founded upon agreements between states which are binding upon them. He defined contemporary general international law as:

the aggregate of norms which are created by agreement between states of different social systems, reflect the concordant wills of states and have a generally democratic character, regulate relations between them in the process of struggle and co-operation in the direction of ensuring peace and peaceful co-existence and freedom and independence of peoples, and are secured when necessary by coercion effectuated by states individually or collectively.<sup>114</sup>

It is interesting to note the basic elements here, such as the stress on state sovereignty, the recognition of different social systems and the aim of peaceful co-existence. The role of sanctions in law is emphasised and reflects much of the positivist influence upon Soviet thought. Such preoccupations were also reflected in the definition of international law contained in the leading Soviet textbook by Professor Kozhevnikov and others where it was stated that:

international law can be defined as the aggregate of rules governing relations between states in the process of their conflict and co-operation, designed to safeguard their peaceful co-existence, expressing the will of the ruling classes of these states and defended in case of need by coercion applied by states individually or collectively.<sup>115</sup>

Originally, treaties alone were regarded as proper sources of international law but custom became accepted as a kind of tacit or implied agreement with great stress laid upon *opinio juris* or the legally binding element of custom. While state practice need not be general to create a custom, its recognition as a legal form must be.<sup>116</sup>

Peaceful co-existence itself rested upon certain basic concepts, for example non-intervention in the internal affairs of other states and the sovereignty of states. Any idea of a world authority was condemned as a violation of the latter principle. The doctrine of peaceful co-existence was also held to include such ideas as good neighbourliness, international cooperation and the observance in good faith of international obligations.

The concept was regarded as based on specific trends of laws of societal development and as a specific form of class struggle between socialism and

capitalism, one in which armed conflict is precluded.<sup>117</sup> It was an attempt, in essence, to reiterate the basic concepts of international law in a way that was taken to reflect an ideological trend. But it must be emphasised that the principles themselves have long been accepted by the international community.

While Tunkin at first attacked the development of regional systems of international law, he later came round to accepting a socialist law which reflected the special relationship between communist countries. The Soviet interventions in eastern Europe, particularly in Czechoslovakia in 1968, played a large part in augmenting such views.<sup>118</sup> In the Soviet view relations between socialist (communist) states represented a new, higher type of international relations and a socialist international law. Common socio-economic factors and a political community created an objective basis for lasting friendly relations whereas, by contrast, international capitalism involved the exploitation of the weak by the strong. The principles of socialist or proletarian internationalism constituted a unified system of international legal principles between countries of the socialist bloc arising by way of custom and treaty. Although the basic principles of respect for state sovereignty, non-interference in internal affairs and equality of states and peoples existed in general international law, the same principles in socialist international law were made more positive by the lack of economic rivalry and exploitation and by increased co-operation. Accordingly, these principles incorporated not only material obligations not to violate each other's rights, but also the duty to assist each other in enjoying and defending such rights against capitalist threats.<sup>119</sup>

The Soviet emphasis on territorial integrity and sovereignty, while designed in practice to protect the socialist states in a predominantly capitalist environment, proved of great attraction to the developing nations of the Third World, anxious too to establish their own national identities and counteract Western financial and cultural influences.

With the decline of the Cold War and the onset of *perestroika* (re-structuring) in the Soviet Union, a process of re-evaluation in the field of international legal theory took place.<sup>120</sup> The concept of peaceful coexistence was modified and the notion of class warfare eliminated from the Soviet political lexicon. Global interdependence and the necessity for international co-operation were emphasised, as it was accepted that the tension between capitalism and socialism no longer constituted the major conflict in the contemporary world and that beneath the former dogmas lay many common interests.<sup>121</sup> The essence of new Soviet thinking was stated to lie in the priority of universal human values and the resolution of global problems, which is directly linked to the growing importance of international law in the world community. It was also pointed out that international law had to be universal and not

artificially divided into capitalist, socialist and Third World ‘international law’ systems.<sup>122</sup>

Soviet writers and political leaders accepted that activities such as the interventions in Czechoslovakia in 1968 and Afghanistan in 1979 were contrary to international law, while the attempt to create a state based on the rule of law was seen as requiring the strengthening of the international legal system and the rule of law in international relations. In particular, a renewed emphasis upon the role of the United Nations became evident in Soviet policy.<sup>123</sup>

The dissolution of the Soviet Union in 1991 marked the end of the Cold War and the re-emergence of a system of international relations based upon multiple sources of power untrammelled by ideological determinacy. From that point,<sup>124</sup> Russia as the continuation of the former Soviet Union (albeit in different political and territorial terms) entered into the Western political system and defined its actions in terms of its own national interests free from principled hostility. The return to statehood of the Baltic states and the independence of the other former republics of the Soviet Union, coupled with the collapse of Yugoslavia, has constituted a political upheaval of major significance. The Cold War had imposed a dualistic superstructure upon international relations that had had implications for virtually all serious international political disputes and had fettered the operations of the United Nations in particular. Although the Soviet regime had been changing its approach quite significantly, the formal demise both of the communist system and of the state itself altered the nature of the international system and this has inevitably had consequences for international law.<sup>125</sup> The ending of inexorable superpower confrontation has led to an increase in instability in Europe and emphasised paradoxically both the revitalisation and the limitations of the United Nations.

While relatively little has previously been known of Chinese attitudes, a few points can be made. Western concepts are regarded primarily as aimed at preserving the dominance of the bourgeois class on the international scene. Soviet views were partially accepted but since the late 1950s and the growing estrangement between the two major communist powers, the Chinese concluded that the Russians were interested chiefly in maintaining the status quo and Soviet–American superpower supremacy. The Soviet concept of peaceful co-existence as the mainstay of contemporary international law was treated with particular suspicion and disdain.<sup>126</sup>

The Chinese conception of law was, for historical and cultural reasons, very different from that developed in the West. ‘Law’ never attained the important place in Chinese society that it did in European civilisation.<sup>127</sup> A sophisticated bureaucracy laboured to attain harmony and equilibrium, and a system of legal rights to protect the individual in the Western sense did not really develop. It was

believed that society would be best served by example and established morality, rather than by rules and sanctions. This Confucian philosophy was, however, swept aside after the successful communist revolution, to be replaced by strict Marxism–Leninism, with its emphasis on class warfare.<sup>128</sup>

The Chinese seem to have recognised several systems of international law, for example, Western, socialist and revisionist (Soviet Union), and to have implied that only with the ultimate spread of socialism would a universal system be possible.<sup>129</sup> International agreements are regarded as the primary source of international law and China has entered into many treaties and conventions and carried them out as well as other nations.<sup>130</sup> One exception, of course, is China’s disavowal of the so-called ‘unequal treaties’ whereby Chinese territory was annexed by other powers, in particular the Tsarist Empire, in the nineteenth century.<sup>131</sup>

On the whole, international law has been treated as part of international politics and subject to considerations of power and expediency, as well as ideology. Where international rules conform with Chinese policies and interests, then they will be observed. Where they do not, they will be ignored.

However, now that the isolationist phase of its history is over, relations with other nations established and its entry into the United Nations secured, China has adopted a more active role in international relations, an approach more in keeping with its rapidly growing economic power. China has now become fully engaged in world politics and this has led to a legalisation of its view of international law, as indeed occurred with the Soviet Union.

## **The ‘Third World’**

In the evolution of international affairs since the Second World War one of the most decisive events has been the disintegration of the colonial empires and the birth of scores of new states in what was for a time termed the Third World. This thrust onto the scene states which carry with them a legacy of bitterness over their past status as well as a host of problems relating to their social, economic and political development.<sup>132</sup> In such circumstances it was only natural that the structure and doctrines of international law would come under attack. The nineteenth century development of the law of nations founded upon Eurocentrism and imbued with the values of Christian, urbanised and expanding Europe<sup>133</sup> did not, understandably enough, reflect the needs and interests of the newly independent states of the mid- and late twentieth century. It was felt that such rules had encouraged and then reflected their subjugation, and that changes were required.<sup>134</sup>

It is basically those ideas of international law that came to fruition in the

nineteenth century that have been so clearly rejected, that is, those principles that enshrined the power and domination of the West.<sup>135</sup> The underlying concepts of international law have not been discarded. On the contrary. The new nations have eagerly embraced the ideas of the sovereignty and equality of states and the principles of non-aggression and non-intervention, in their search for security within the bounds of a commonly accepted legal framework.

While this new internationalisation of international law that has occurred in the last fifty years has destroyed its European-based homogeneity, it has emphasised its universalist scope.<sup>136</sup> The composition of, for example, both the International Court of Justice and the Security Council of the United Nations mirrors such developments. Article 9 of the Statute of the International Court of Justice points out that the main forms of civilisation and the principal legal systems of the world must be represented within the Court, and there is an arrangement that of the ten non-permanent seats in the Security Council five should go to Afro-Asian states and two to Latin American states (the others going to Europe and other states). The composition of the International Law Commission has also recently been increased and structured upon geographic lines.<sup>137</sup>

The influence of the new states has been felt most of all within the General Assembly, where they constitute a majority of the 193 member states.<sup>138</sup> The content and scope of the various resolutions and declarations emanating from the Assembly are proof of their impact and contain a record of their fears, hopes and concerns.

The Declaration on the Granting of Independence to Colonial Countries and Peoples of 1960, for example, enshrined the right of colonies to obtain their sovereignty with the least possible delay and called for the recognition of the principle of self-determination. This principle, which is discussed elsewhere in this book,<sup>139</sup> is regarded by most authorities as a settled rule of international law although with undetermined borders. Nevertheless, it symbolises the rise of the post-colonial states and the effect they are having upon the development of international law.

Their concern for the recognition of the sovereignty of states is complemented by their support of the United Nations and its Charter and supplemented by their desire for 'economic self-determination' or the right of permanent sovereignty over natural resources.<sup>140</sup> This expansion of international law into the field of economics was a major development of the twentieth century and is evidenced in myriad ways, for example, by the creation of the General Agreement on Tariffs and Trade, the United Nations Conference on Trade and Development, and the establishment of the International Monetary Fund and World Bank.

The interests of the new states of the Third World are often in conflict with those of the industrialised nations, witness disputes over nationalisations. But it has to be emphasised that, contrary to many fears expressed in the early years of the decolonisation saga, international law has not been discarded nor altered beyond recognition. Its framework has been retained as the new states, too, wish to obtain the benefits of rules such as those governing diplomatic relations and the controlled use of force, while campaigning against rules which run counter to their perceived interests.

While the new countries share a common history of foreign dominance and underdevelopment, compounded by an awakening of national identity, it has to be recognised that they are not a homogenous group. Widely differing cultural, social and economic attitudes and stages of development characterise them, and the rubric of the 'Third World' masks diverse political affiliations. On many issues the interests of the new states conflict with each other and this is reflected in the different positions adopted. The states possessing oil and other valuable natural resources are separated from those with few or none and the states bordering on oceans are to be distinguished from landlocked states. The list of diversity is endless and variety governs the make-up of the southern hemisphere to a far greater degree than in the north.

It is possible that in legal terms tangible differences in approach may emerge in the future as the passions of decolonisation die down and the Western supremacy over international law is further eroded. This trend will also permit a greater understanding of, and greater recourse to, historical traditions and conceptions that pre-date colonisation and an increasing awareness of their validity for the future development of international law.<sup>141</sup>

In the medium term, however, it has to be recognised that with the end of the Cold War and the rapid development of Soviet (then Russian)–American co-operation, the axis of dispute is turning from East–West to North–South. This is beginning to manifest itself in a variety of issues ranging from economic law to the law of the sea and human rights, while the impact of modern technology has hardly yet been appreciated.<sup>142</sup> Together with such factors, the development of globalisation has put additional stress upon the traditional tension between universalism and particularism.<sup>143</sup> Globalisation in the sense of interdependence of a high order of individuals, groups and corporations, both public and private, across national boundaries, might be seen as the universalisation of Western civilisation and thus the triumph of one special particularism. On the other hand, particularism (in the guise of cultural relativism) has sometimes been used as a justification for human rights abuses free from international supervision or criticism.

## 2 International law today

---

### The expanding legal scope of international concern

International law since the middle of the last century has been developing in many directions, as the complexities of life in the modern era have multiplied. For, as already emphasised, law reflects the conditions and cultural traditions of the society within which it operates. The community evolves a certain specific set of values – social, economic and political – and this stamps its mark on the legal framework which orders life in that environment. Similarly, international law is a product of its environment. It has developed in accordance with the prevailing notions of international relations and to survive it must be in harmony with the realities of the age.

Nevertheless, there is a continuing tension between those rules already established and the constantly evolving forces that seek changes within the system. One of the major problems of international law is to determine when and how to incorporate new standards of behaviour and new realities of life into the already existing framework, so that, on the one hand, the law remains relevant and, on the other, the system itself is not too vigorously disrupted.

Changes that occur within the international community can be momentous and reverberate throughout the system. For example, the advent of nuclear arms created a status quo in Europe and a balance of terror throughout the world. It currently constitutes a factor of unease as certain states seek to acquire nuclear technology. Another example is the technological capacity to mine the oceans and the consequent questions as to the nature and beneficiaries of exploitation.<sup>1</sup> The rise of international terrorism has posited new challenges to the system as states and international organisations struggle to deal with this phenomenon while retaining respect for the sovereignty of states and for human rights.<sup>2</sup> There are several instances of how modern developments demand a constant reappraisal of the structure of international law and its rules.

The scope of international law today is immense. From the regulation of space expeditions to the question of the division of the ocean floor, and from the protection of human rights to the management of the international financial system, its involvement has spread out from the primary concern with the preservation of peace, to embrace all the interests of contemporary international life.

But the *raison d'être* of international law and the determining factor in its composition remains the needs and characteristics of the international political system. Where more than one entity exists within a system, there has to be some

conception as to how to deal with other such entities, whether it be on the basis of co-existence or hostility. International law as it has developed since the seventeenth century has adopted the same approach and has in general (though with notable exceptions) eschewed the idea of permanent hostility and enmity. Because the state, while internally supreme, wishes to maintain its sovereignty externally and needs to cultivate other states in an increasingly interdependent world, it must acknowledge the rights of others. This acceptance of rights possessed by all states, something unavoidable in a world where none can stand alone, leads inevitably to a system to regulate and define such rights and, of course, obligations.

And so one arrives at some form of international legal order, no matter how unsophisticated and how occasionally positively disorderly.<sup>3</sup> The current system developed in the context of European civilisation as it progressed, but this has changed. The rise of the United States and the Soviet Union mirrored the decline of Europe, while the process of decolonisation also had a considerable impact. More recently, the collapse of the Soviet Empire and the Soviet Union, the rise of India and China as major powers and the phenomenon of globalisation are also impacting deeply upon the system. Faced with radical changes in the structure of power, international law needs to come to terms with new ideas and challenges.

The Eurocentric character of international law has been gravely weakened in the last sixty years or so and the opinions, hopes and needs of other cultures and civilisations are now playing an increasing role in the evolution of world juridical thought.<sup>4</sup>

International law reflects first and foremost the basic state-oriented character of world politics and this essentially because the state became over time the primary repository of the organised hopes of peoples, whether for protection or for more expansive aims. Units of formal independence benefiting from equal sovereignty in law and equal possession of the basic attributes of statehood<sup>5</sup> have succeeded in creating a system enshrining such values. Examples that could be noted here include non-intervention in internal affairs, territorial integrity, non-use of force and equality of voting in the United Nations General Assembly. However, in addition to this, many factors cut across state borders and create a tension in world politics, such as inadequate economic relationships, international concern for human rights and the rise in new technological forces.<sup>6</sup> State policies and balances of power, both international and regional, are a necessary framework within which international law operates, as indeed are domestic political conditions and tensions. Law mirrors the concern of forces within states and between states.

It is also important to realise that states need law in order to seek and attain certain goals, whether these be economic well-being, survival and security or

ideological advancement. The system therefore has to be certain enough for such goals to be ascertainable, and flexible enough to permit change when this becomes necessary due to the confluence of forces demanding it.<sup>7</sup>

International law, however, has not just expanded horizontally to embrace the new states which have been established since the end of the Second World War; it has extended itself to include individuals, groups and international organisations, both private and public, within its scope. It has also moved into new fields covering such issues as international trade, problems of environmental protection, human rights and outer space exploration.

The growth of positivism in the nineteenth century had the effect of focusing the concerns of international law upon sovereign states. They alone were the 'subjects' of international law and were to be contrasted with the status of non-independent states and individuals as 'objects' of international law. They alone created the law and restrictions upon their independence could not be presumed.<sup>8</sup> But the gradual sophistication of positivist doctrine, combined with the advent of new approaches to the whole system of international relations, has broken down this exclusive emphasis and extended the roles played by non-state entities, such as individuals, multinational firms and international institutions.<sup>9</sup> It was, of course, long recognised that individuals were entitled to the benefits of international law, but it is only recently that they have been able to act directly rather than rely upon their national states.

The Nuremberg and Tokyo Tribunals set up by the victorious Allies after the close of the Second World War were a vital part of this process. Many of those accused were found guilty of crimes against humanity and against peace and were punished accordingly. It was a recognition of individual responsibility under international law without the usual interposition of the state and has been reinforced with the establishment of the Yugoslav and Rwanda War Crimes Tribunals in the mid-1990s and the International Criminal Court in 1998.<sup>10</sup> Similarly the 1948 Genocide Convention provided for the punishment of offenders after conviction by national courts or by an international criminal tribunal.<sup>11</sup> The developing concern with human rights is another aspect of this move towards increasing the role of the individual in international law. The Universal Declaration of Human Rights adopted by the United Nations in 1948 lists a series of political and social rights, although it is only a guideline and not legally binding as such. The European Convention for the Protection of Human Rights and Fundamental Freedoms signed in 1950 and the International Covenants on Human Rights of 1966 are of a different nature and binding upon the signatories. In an effort to function satisfactorily various bodies of a supervisory and implementational nature were established. Within the European Union, individuals and corporations have certain rights of direct appeal to the

European Court of Justice against decisions of the various Union institutions. In addition, individuals may appear before certain international tribunals. Nevertheless, the whole subject has been highly controversial, with some writers (for example Soviet theorists prior to perestroika) denying that individuals may have rights as distinct from duties under international law, but it is indicative of the trend away from the exclusivity of the state.<sup>12</sup>

Together with the evolution of individual human rights, the rise of international organisations marks perhaps the key distinguishing feature of modern international law. In fact, international law cannot in the contemporary era be understood without reference to the growth in number and influence of such intergovernmental institutions, and of these the most important by far is the United Nations.<sup>13</sup> The UN comprises the vast majority of states (there are currently 192 member states) and that alone constitutes a political factor of high importance in the process of diplomatic relations and negotiations and indeed facilitates international co-operation and norm creation. Further, of course, the existence of the Security Council as an executive organ with powers to adopt resolutions in certain circumstances that are binding upon all member states is unique in the history of international relations.

International organisations have now been accepted as possessing rights and duties of their own and a distinctive legal personality. The International Court of Justice in 1949 delivered an Advisory Opinion<sup>14</sup> in which it stated that the United Nations was a subject of international law and could enforce its rights by bringing international claims, in this case against Israel following the assassination of Count Bernadotte, a United Nations official. Such a ruling can be applied to embrace other international institutions, like the International Labour Organization and the Food and Agriculture Organization, which each have a judicial character of their own. Thus, while states remain the primary subjects of international law, they are now joined by other non-state entities, whose importance is likely to grow even further in the future.

The growth of regional organisations should also be noted at this stage. Many of these were created for reasons of military security, for example NATO and the opposing Warsaw Pact organisations, others as an expression of regional and cultural identity such as the Organization of African Unity (now the African Union) and the Organization of American States. In a class of its own is the European Union which has gone far down the road of economic co-ordination and standardisation and has a range of common institutions serviced by a growing bureaucracy stationed primarily at Brussels.

Such regional organisations have added to the developing sophistication of international law by the insertion of ‘regional–international law sub-systems’ within

the universal framework and the consequent evolution of rules that bind only member states.<sup>15</sup>

The range of topics covered by international law has expanded hand in hand with the upsurge in difficulties faced and the proliferation in the number of participants within the system. It is no longer exclusively concerned with issues relating to the territory or jurisdiction of states narrowly understood, but is beginning to take into account the specialised problems of contemporary society. Many of these have already been referred to, such as the vital field of human rights, the growth of an international economic law covering financial and development matters, concern with environmental despoliation, the space exploration effort and the exploitation of the resources of the oceans and deep seabed. One can mention also provisions relating to the bureaucracy of international institutions (international administrative law), international labour standards, health regulations and communications controls. Many of these trends may be seen as falling within, or rather reflecting, the phenomenon of globalisation, a term which encompasses the inexorable movement to greater interdependence founded upon economic, communications and cultural bases and operating quite independently of national regulation.<sup>16</sup> This in turn stimulates disputes of an almost ideological nature concerning, for example, the relationship between free trade and environmental protection.<sup>17</sup> To this may be added the pressures of democracy and human rights, both operating to some extent as countervailing influences to the classical emphasis upon the territorial sovereignty and jurisdiction of states.

## **Modern theories and interpretations**

At this point some modern theories as to the nature and role of international law will be briefly noted.

## **Positive Law and Natural Law**

Throughout the history of thought there has been a complex relationship between idealism and realism, between the way things ought to be and the way things are, and the debate as to whether legal philosophy should incorporate ethical standards or confine itself to an analysis of the law as it stands is a vital one that continues today.<sup>18</sup>

The positivist school, which developed so rapidly in the pragmatic, optimistic world of the nineteenth century, declared that law as it exists should be analysed empirically, shorn of all ethical elements. Moral aspirations were all well and good but had no part in legal science. Man-made law must be examined as such and the

metaphysical speculations of Natural Law rejected because what counted were the practical realities, not general principles which were imprecise and vague, not to say ambiguous.<sup>19</sup>

This kind of approach to law in society reached its climax with Kelsen's 'Pure Theory of Law'. Kelsen defined law solely in terms of itself and eschewed any element of justice, which was rather to be considered within the discipline of political science. Politics, sociology and history were all excised from the pure theory which sought to construct a logical unified structure based on a formal appraisal.<sup>20</sup>

Law was to be regarded as a normative science, that is, consisting of rules which lay down patterns of behaviour. Such rules, or norms, depend for their legal validity on a prior norm and this process continues until one reaches what is termed the basic norm of the whole system. This basic norm is the foundation of the *legal* edifice, because rules which can be related back to it therefore become legal rules. To give a simple example, a court order empowering an official to enforce a fine is valid if the court had that power which depends upon an Act of Parliament establishing the court. A rule becomes a legal rule if it is in accordance with a previous (and higher) legal rule and so on. Layer builds upon layer and the foundation of it all is the basic norm.<sup>21</sup>

The weakness of Kelsen's 'pure' system lies primarily in the concept of the basic norm for it relies for its existence upon non-legal issues. In fact, it is a political concept, and in the United Kingdom it would probably be the principle of the supremacy of Parliament.<sup>22</sup>

This logical, structured system of validity founded upon an extra-legal concept encounters difficulties when related to international law. For Kelsen international law is a primitive legal order because of its lack of strong legislative, judicial and enforcement organs and its consequent resemblance to a pre-state society. It is accordingly characterised by the use of self-help.<sup>23</sup> The principles of international law are valid if they can be traced back to the basic norm of the system, which is hierarchical in the same sense as a national legal system. For Kelsen, the basic norm is the rule that identifies custom as the source of law, or stipulates that 'the states ought to behave as they customarily behaved'.<sup>24</sup> One of the prime rules of this category is *pacta sunt servanda* declaring that agreements must be carried out in good faith and upon that rule is founded the second stage within the international legal order. This second stage consists of the network of norms created by international treaties and conventions and leads on to the third stage which includes those rules established by organs which have been set up by international treaties, for instance, decisions of the International Court of Justice.<sup>25</sup>

The problem with Kelsen's formulation of the basic norm of international law is that it appears to be tautological: it merely repeats that states which obey rules ought to obey those rules.<sup>26</sup> It seems to leave no room for the progressive development of international law by new practices accepted as law for that involves states behaving differently from the way they have been behaving. Above all, it fails to answer the question as to why custom is binding.

Nevertheless, it is a model of great logical consistency which helps explain, particularly with regard to national legal systems, the proliferation of rules and the importance of validity which gives as it were a mystical seal of approval to the whole structured process. It helps illustrate how rule leads to rule as stage succeeds stage in a progression of norms forming a legal order.

Another important element in Kelsen's interpretation of law is his extreme 'monist' stance. International law and municipal law are not two separate systems but one interlocking structure and the former is supreme. Municipal law finds its ultimate justification in the rules of international law by a process of delegation within one universal normative system.<sup>27</sup>

Kelsen's pure theory seemed to mark the end of that particular road, and positivism was analysed in more sociological terms by Hart in his book *The Concept of Law* in 1961.

Hart comprehends law as a system of rules, based upon the interaction of primary and secondary rules. The former, basically, specify standards of behaviour while the latter provide the means for identifying and developing them and thus specify the constitutional procedures for change. Primitive societies would possess only the primary rules and so would be characterised by uncertainty, inefficiency and stagnation, but with increasing sophistication the secondary rules would develop and identify authority and enable the rules to be adapted to changing circumstances in a regular and accepted manner.<sup>28</sup>

The international legal order is a prime example of a simple form of social structure which consists only of the primary rules, because of its lack of a centralised legislature, network of recognised courts with compulsory jurisdiction and organised means of enforcement. Accordingly, it has no need of, or rather has not yet evolved, a basic norm or in Hart's terminology a rule of recognition, by reference to which the validity of all the rules may be tested. Following this train of thought, Hart concludes that the rules of international law do not as yet constitute a 'system' but are merely a 'set of rules'. Of course, future developments may see one particular principle, such as *pacta sunt servanda*, elevated to the state of a validating norm but in the present situation this has not yet occurred.<sup>29</sup>

This approach can be criticised for its over-concentration upon rules to the exclusion of other important elements in a legal system such as principles and policies,<sup>30</sup> and more especially as regards international law, for failing to recognise the sophistication or vitality of the system. In particular, the distinction between a system and a set of rules in the context of international law is a complex issue and one which is difficult to delineate.

The strength of the positivist movement waned in the last century as the old certainties disintegrated and social unrest grew. Law, as always, began to reflect the dominant pressures of the age, and new theories as to the role of law in society developed. Writers started examining the effects of sociological phenomena upon the legal order and the nature of the legal process itself, with analyses of judicial behaviour and the means whereby rules were applied in actual practice. This was typified by Roscoe Pound's view of the law as a form of social engineering, balancing the various interests within the society in the most efficacious way.<sup>31</sup> Law was regarded as a method of social control and conceptual approaches were rejected in favour of functional analyses. What actually happened within the legal system, what claims were being brought and how they were satisfied: these were the watchwords of the sociological school.<sup>32</sup>

It was in one sense a move away from the ivory tower and into the courtroom. Empirical investigations proliferated, particularly in the United States, and the sciences of psychology and anthropology as well as sociology became allied to jurisprudence. Such concern with the wider social context led to the theories of Realism, which treated law as an institution functioning within a particular community with a series of jobs to do. A study of legal norms within a closed logical system in the Kelsenite vein was regarded as unable to reveal very much of the actual operation of law in society. For this an understanding of the behaviour of courts and the various legal officials was required. Historical and ethical factors were relegated to a minor role within the realist–sociological tradition, with its concentration upon field studies and 'technical' dissections. Legal rules were no longer to be accepted as the heart of the legal system.<sup>33</sup>

Before one looks at contemporary developments of this approach and how they have affected interpretations of international law, the revival of Natural Law has first to be considered.

In the search for meaning in life and an ethical basis to law, Natural Law has adopted a variety of different approaches. One of them has been a refurbishment of the principles enumerated by Aquinas and adopted by the Catholic Church, emphasising the dignity of man and the supremacy of reason together with an affirmation of the immorality (though not necessarily the invalidity) of law contrary

to right reason and the eternal law of God.<sup>34</sup> A more formalistic and logic-oriented trend has been exemplified by writers such as Stammler, who tried to erect a logical structure of law with an inbuilt concept of ‘Natural Law with a changing content’. This involved contrasting the *concept* of law, which was intended to be an abstract, formal definition universally applicable, with the *idea* of law, which embodies the purposes and direction of the system. This latter precept varied, of necessity, in different social and cultural contexts.<sup>35</sup>

As distinct from this formal idealist school, there has arisen a sociologically inspired approach to the theme of Natural Law represented by Gény and Duguit. This particular trend rejected the emphasis upon form, and concentrated instead upon the definition of Natural Law in terms of universal factors, physical, psychological, social and historical, which dominate the framework of society within which the law operated.<sup>36</sup>

The discussion of Natural Law increased and gained in importance following the Nazi experience. It stimulated a German philosopher, Radbruch, to formulate a theory whereby unjust laws had to be opposed by virtue of a higher, Natural Law.<sup>37</sup>

As far as international law is concerned, the revival of Natural Law came at a time of increasing concern with international justice and the formation of international institutions. Many of the ideas and principles of international law today are rooted in the notion of Natural Law and the relevance of ethical standards to the legal order, such as the principles of non-aggression and human rights.<sup>38</sup>

## **New approaches<sup>39</sup>**

Traditionally, international law has been understood in a historical manner and studied chronologically. This approach was especially marked in the nineteenth century as international relations multiplied and international conferences and agreements came with increasing profusion. Between the world wars, the opening of government archives released a wealth of material and further stimulated a study of diplomatic history, while the creation of such international institutions as the League of Nations and the Permanent Court of International Justice encouraged an appreciation of institutional processes.

However, after the Second World War a growing trend appeared intent upon the analysis of power politics and the comprehension of international relations in terms of the capacity to influence and dominate. The approach was a little more sophisticated than might appear at first glance, for it involved a consideration of social and economic as well as political data that had a bearing upon a state’s ability to withstand as well as direct pressures.<sup>40</sup> Nevertheless, it was a pessimistic

interpretation because of its centring upon power and its uses as the motive force of inter-state activity.

The next 'wave of advance', as it has been called, witnessed the successes of the behaviouralist movement. This particular train of thought introduced elements of psychology, anthropology and sociology into the study of international relations and paralleled similar developments within the realist school. It reflected the altering emphasis from analyses in terms of idealistic or cynical ('realistic') conceptions of the world political order, to a mechanistic discussion of the system as it operates today, by means of field studies and other tools of the social sciences. Indeed, it is more a method of approach to law and society than a theory in the traditional sense.<sup>41</sup>

One can trace the roots of this school of thought to the changing conceptions of the role of government in society. The nineteenth-century ethic of individualism and the restriction of state intervention to the very minimum has changed radically. The emphasis is now more upon the responsibility of the government towards its citizens, and the phenomenal growth in welfare legislation illustrates this. Rules and regulations controlling wide fields of human activity, something that would have been unheard of in the mid-nineteenth century, have proliferated throughout the nations of the developed world and theory has had to try and keep up with such re-orientations.

Since the law now plays a much deeper role in society with the increase in governmental intervention, impetus has been given to legal theories that reflect this growing involvement. Law, particularly in the United States, is seen as a tool to effect changes in society and realist doctrine underlines this. It emphasises that it is community values and policy decisions that determine the nature of the law and accordingly the role of the judge is that much more important. He is no longer an interpreter of a body of formal legal rules, but should be seen more as an active element in making decisions of public policy.

This means that to understand the operation of law, one has to consider the character of the particular society, its needs and values. Law thus becomes a dynamic process and has to be studied in the context of society and not merely as a collection of legal rules capable of being comprehended on their own. The social sciences have led the way in this reinterpretation of society and their influence has been very marked on the behavioural method of looking at the law, not only in terms of general outlook but also in providing the necessary tools to dissect society and discover the way it operates and the direction in which it is heading. The interdisciplinary nature of the studies in question was emphasised, utilising all the social sciences, including politics, economics and philosophy.<sup>42</sup> In particular the use of the scientific method, such as obtaining data and quantitative analysis, has been

very much in evidence.

Behaviouralism has divided the field of international relations into basically two studies, the first being a consideration of foreign policy techniques and the reasons whereby one particular course of action is preferred to another, and the second constituting the international systems analysis approach.<sup>43</sup> This emphasises the interaction of the various players on the international stage and the effects of such mutual pressures upon both the system and the participants. More than that, it examines the various international orders that have existed throughout history in an attempt to show how the dynamics of each particular system have created their own rules and how they can be used as an explanation of both political activity and the nature of international law. In other words, the nature of the international system can be examined by the use of particular variables in order to explain and to predict the role of international law.

For example, the period between 1848 and 1914 can be treated as the era of the 'balance of power' system. This system depended upon a number of factors, such as a minimum number of participants (accepted as five), who would engage in a series of temporary alliances in an attempt to bolster the weak and restrict the strong, for example the coalitions Britain entered into to overawe France. It was basic to this system that no nation wished totally to destroy any other state, but merely to humble and weaken, and this contributed to the stability of the order.<sup>44</sup>

This system nurtured its own concepts of international law, especially that of sovereignty which was basic to the idea of free-floating alliances and the ability of states to leave the side of the strong to strengthen the weak. The balance of power collapsed with the First World War and, after a period of confusion, a discernible, loose 'bipolar' system emerged in the years following the Second World War.

This was predicated upon the polarisation of capitalism and communism and the consequent rigid alliances that were created. It included the existence of a Third World of basically non-aligned states, the objects of rivalry and of competition while not in themselves powerful enough to upset the bipolar system. This kind of order facilitated 'frontier' conflicts where the two powers collided, such as in Korea, Berlin and Vietnam, as well as modified the nature of sovereignty within the two alliances thus allowing such organisations as NATO and the European Community (subsequently European Union) on the one hand, and the Warsaw Pact and COMECON on the other, to develop. The other side of this coin has been the freedom felt by the superpowers to control wavering states within their respective spheres of influence, for example, the Soviet actions in Poland, Hungary and Czechoslovakia and those of the USA, particularly within Latin America.<sup>45</sup>

Behaviouralism has been enriched by the use of such techniques as game theory.<sup>46</sup>

This is a mathematical method of studying decision-making in conflict situations where the parties react rationally in the struggle for benefits. It can be contrasted with the fight situation, where the essence is the actual defeat of the opponent (for example, the Israel–Arab conflict), and with the debate situation, which is an effort to convince the participants of the rightness of one's cause. Other factors which are taken into account include communications, integration, environment and capabilities. Thus the range and complexity of this approach far exceeds that of prior theories.

All this highlights the switch in emphasis that has taken place in the consideration of law in the world community. The traditional view was generally that international law constituted a series of rules restricting the actions of independent states and forming exceptions to state sovereignty. The new theories tend to look at the situation differently, more from the perspective of the international order expanding its horizons than the nation-state agreeing to accept certain defined limitations upon its behaviour.

The rise of quantitative research has facilitated the collation and ordering of vast quantities of data. It is primarily a methodological approach utilising political, economic and social data and statistics, and converting facts and information into a form suitable for scientific investigation. Such methods with their behavioural and quantitative aspects are beginning to impinge upon the field of international law. They enable a greater depth of knowledge and comprehension to be achieved and a wider appreciation of all the various processes at work.<sup>47</sup>

The behavioural approach to international relations has been translated into international law theory by a number of writers, in particular Professor McDougal, with some important modifications. This 'policy-orientated' movement regards law as a comprehensive process of decision-making rather than as a defined set of rules and obligations. It is an active all-embracing approach, seeing international law as a dynamic system operating within a particular type of world order.<sup>48</sup> It therefore minimises the role played by rules, for such a traditional conception of international law 'quite obviously offers but the faintest glimpse of the structures, procedures and types of decision that take place in the contemporary world community'.<sup>49</sup> It has been emphasised that the law is a constantly evolving process of decision-making and the way that it evolves will depend on the knowledge and insight of the decision-maker.<sup>50</sup> In other words, it is the social process of constant human interaction that is seen as critical and in this process, claims are continually being made in an attempt to maximise values at the disposal of the participants. Eight value-institution categories have been developed to analyse this process: power, wealth, enlightenment, skill, well-being, affection, respect and rectitude. This list may be further developed. It is not exhaustive. Law is to be regarded as a product of such

social processes.<sup>51</sup> International law is the whole process of authoritative decision-making involving crucially the concepts of authority and control. The former is defined in terms of the structure of expectation concerning the identity and competence of the decision-maker, whilst the latter refers to the actual effectiveness of a decision, whether or not authorised.<sup>52</sup>

McDougal's work and that of his followers emphasises the long list of values, interests and considerations that have to be taken into account within the international system by the persons actually faced with making the decisions. This stress upon the so-called 'authoritative decision-maker', whether he or she be in the United States Department of State, in the British Foreign Office or 'anyone whose choice about an event can have some international significance'<sup>53</sup> as the person who in effect has to choose between different options respecting international legal principles, emphasises the practical world of power and authority.

Such a decision-maker is subject to a whole series of pressures and influences, such as the values of the community in which that person operates, and the interests of the particular nation-state served. He or she will also have to consider the basic values of the world order, for instance human dignity. This approach involves a complex dissection of a wide-ranging series of factors and firmly fixes international law within the ambit of the social sciences, both with respect to the procedures adopted and the tools of analysis. International law is seen in the following terms, as

a comprehensive process of authoritative decision in which rules are continuously made and remade; that the function of the rules of international law is to communicate the perspectives (demands, identifications and expectations) of the peoples of the world about this comprehensive process of decision; and that the national application of these rules in particular instances requires their interpretation, like that of any other communication, in terms of who is using them, with respect to whom, for what purposes (major and minor), and in what context.<sup>54</sup>

Legal rules articulate and seek to achieve certain goals and this value factor must not be ignored. The values emphasised by this school are basically those of human dignity, familiar from the concepts of Western democratic society.<sup>55</sup> Indeed, Reisman has emphasised the Natural Law origins of this approach as well as the need to clarify a jurisprudence for those persons whose activities have led to innovations in such fields of international law as human rights and the protection of the environment.<sup>56</sup>

The policy-oriented movement has been greatly criticised by traditional international lawyers for unduly minimising the legal content of the subject and for

ignoring the fact that nations generally accept international law as it is and obey its dictates.<sup>57</sup> States rarely indulge in a vast behavioural analysis, studiously considering every relevant element in a particular case and having regard to fundamental objectives like human dignity and welfare. Indeed, so to do may weaken international law, it has been argued.<sup>58</sup> In addition, the insertion of such value-concepts as 'human dignity' raises difficulties of subjectivity that ill fit within a supposedly objective analytical structure. Koskenniemi, for example, has drawn attention to the predilection of the policy-oriented approach to support the dominant power.<sup>59</sup>

Other writers, such as Professor Falk, accept the basic comprehensive approach of the McDougal school, but point to its inconsistencies and overfulsome cataloguing of innumerable interests. They tend to adopt a global outlook based upon a deep concern for human welfare and morality, but with an emphasis upon the importance of legal rules and structure.<sup>60</sup>

Professor Franck, however, has sought to refocus the essential question of the existence and operation of the system of international law in terms of inquiring into why states obey international law despite the undeveloped condition of the international legal system's structures, processes and enforcement mechanisms.<sup>61</sup> The answer is seen to lie in the concept of legitimacy. States will obey the rules because they see such rules and their institutional framework as possessing a high degree of legitimacy. Legitimacy itself is defined as 'a property of a rule or rule-making institution which itself exerts a pull towards compliance on those addressed normatively because those addressed believe that the rule or institution has come into being and operates in accordance with generally accepted principles of right process'.<sup>62</sup> Legitimacy may be empirically demonstrated but compliance may be measured not only by observing states acting in accordance with the principle in question, but also by observing the degree to which a violator actually exhibits deference to that principle even while violating it.

Legitimacy will depend upon four specific properties, it is suggested: determinacy (or readily ascertainable normative content or 'transparency'); symbolic validation (or authority approval); coherence (or consistency or general application) and adherence (or falling within an organised hierarchy of rules). In other words, it is proposed that there exist objectively verifiable criteria which help us to ascertain why international rules are obeyed and thus why the system works. This approach is supplemented by the view that legitimacy and justice as morality are two aspects of the concept of fairness, which is seen by Franck as the most important question for international law.<sup>63</sup> Franck, however, has also drawn attention to the 'emerging right to individuality'<sup>64</sup> within the context of a 'global identity crisis'<sup>65</sup> in which the

growth of supranational institutions and the collapse of a range of states combine to undermine traditional certainties of world order. He notes that persons are increasingly likely to identify themselves as autonomous individuals and that this is both reflected and manifested in the rise and expansion of international human rights law and in the construction of multi-layered and freely selected affinities.<sup>66</sup> While such personal rights are increasingly protected in both national and international law, the question as to the appropriate balancing of individual, group and state rights is posed in more urgent form.

However, legitimacy may also be understood in a broader way in referring to the relationship with the international political system as a whole and as forming the link between power and the legal system. It imbues the normative order with authority and acceptability, although not as such legality. Legitimacy links law and politics in its widest sense and will depend upon the context out of which it emerges. One writer has concluded that legitimacy 'is a matter of history and thus is subject to change as new events emerge from the future and new understandings reinterpret the past'.<sup>67</sup> Legitimacy is important in that it constitutes a standard for the testing in the wider political environment of the relevance and acceptability of legal norms and practices. A rule seen as legitimate will benefit from a double dose of approval. A rule, institution or practice seen as illegal and illegitimate will be doubly disapproved of. A rule, or entity, which is legal but not legitimate will, it is suggested, not be able to sustain its position over the long term. A practice seen as illegal but legitimate is likely to form the nucleus of a new rule.

The recurring themes of the relationship between sovereign states and international society and the search for a convincing explanation for the binding quality of international law in a state-dominated world appear also in very recent approaches to international law theory which fall within the general critical legal studies framework.<sup>68</sup> Such approaches have drawn attention to the many inconsistencies and incoherences that persist within the international legal system. The search for an all-embracing general theory of international law has been abandoned in mainstream thought as being founded upon unverifiable propositions, whether religiously or sociologically based, and attention has switched to the analysis of particular areas of international law and in particular procedures for the settlement of disputes. The critical legal studies movement notes that the traditional approach to international law has in essence involved the transposition of 'liberal' principles of domestic systems onto the international scene, but that this has led to further problems.<sup>69</sup> Specifically, liberalism tries constantly to balance individual freedom and social order and, it is argued, inevitably ends up siding with either one or other of those propositions.<sup>70</sup> Additionally, there are only two possibilities with regard to justice itself, it is either simply subjective or it is imposed. In either case,

liberalism is compromised as a system.

The critical legal studies approach (sometimes termed the 'New Approaches to International Law' or NAIL) notes the close relationship that exists between law and society, but emphasises that conceptual analysis is also crucial since such concepts are not in themselves independent entities but reflect particular power relationships. The point is made that the nexus between state power and international legal concepts needs to be taken into consideration as well as the way in which such concepts in themselves reflect political factors. As Koskenniemi writes, 'a post-realist theory...aims to answer questions regarding the relationship of law and society and the legitimacy of constraint in a world of sovereigns as aspects of one single problem: the problem of power in concepts'.<sup>71</sup> The problem posed by the growth in the world community and the need to consider the range of different cultures and traditions within that community leads, it is suggested, to the decline of universality as such and the need to focus upon the specific contexts of particular problems.

In a more recent work, Koskenniemi has drawn attention not only to the continuing tension between the universalist and particularist impulses in international law,<sup>72</sup> but also to the related distinction between formalism and dynamism, or the contrast between rule-oriented and policy-oriented approaches. It is his view in essence that the latter approach might too easily be utilised to support a dominant political position.<sup>73</sup> It is the typical lawyer's answer in any event to declare that all depends upon the particular circumstances of the case and this approach is generalised in order to deal with the question of which of several relevant international rules is to predominate. It is in fact a way of noting that superior operating principles are difficult to find or justify and thus concluding that the search for universal concepts or principles is of little value. In effect, it is proposed that no coherent international system as such actually exists and that one should rather concentrate upon ad hoc legal concepts as reflecting power considerations and within the confines of the specific contexts in which the particular questions or issues have arisen. Like the policy-oriented approach, the critical legal studies view is to accept that international law is more than a set of rules, but it then proceeds to emphasise the indeterminacy as such of law rather than seeing law as a collection of competing norms between which choices must be made.<sup>74</sup> One particular area of study in recent years has been that concerned with the position of women within international law, both in terms of the structure of the system and the, for example, relative absence of females from the institutions and processes of international law and in terms of substantive law, which has until recently paid little attention to the needs and concerns of women.<sup>75</sup>

## The fragmentation of international law?<sup>76</sup>

The tremendous expansion of both the rules and the institutions of international law, with the rise of more and more specialist areas, such as trade law, environmental law and human rights law, has led to arguments that international law as a holistic system is in the process of fragmentation. This has led to the fear that the centre will not be able to hold and that international law might dissolve into a series of discrete localised or limited systems with little or no interrelationship. In many ways it is the explosion of what is termed globalisation, with the consequential spread of practices and mechanisms across the world,<sup>77</sup> that has precipitated this problem of fragmentation, being defined in one view as the ‘emergence of specialised and relatively autonomous spheres of social action and structure’.<sup>78</sup> This has led to a debate as to the relationship between self-contained regimes in international law and the system as a whole,<sup>79</sup> with the fear being expressed that the rise of specialised rules and mechanisms that have no clear authority relationship might lead to conflicts between local systems and, at the least, inconsistency in the interpretation and development of international law.<sup>80</sup> While to some extent the former is a real danger,<sup>81</sup> there is still a powerful centralising dynamic in international law and indeed a strong presumption against normative conflict:<sup>82</sup> for example, the principle that special law (*lex specialis*) derogates from general law (*lex generalis*), so that the more detailed and specific rule will have priority.<sup>83</sup> It is also true that international law, as a decentralised system, has long had to face the problem of relating together a variety of rules derived from general treaties, specific treaties and customary law, while it is indeed the case that even with the increase in specialist areas of international law, there is an increasing tendency to relate hitherto discrete spheres.<sup>84</sup> Further, while decisions of international courts and tribunals may not always be compatible, there is a hierarchy of authority with the International Court of Justice at the summit.<sup>85</sup> The International Law Commission’s Report on Fragmentation reached two principal conclusions, first that ‘the emergence of special treaty-regimes (which should not be called “self-contained”) has not seriously undermined legal security, predictability or the equality of legal subjects’ and second that ‘increasing attention will have to be given to the collision of norms and regimes and the rules, methods and techniques for dealing with such collisions’.<sup>86</sup>

## Conclusion

The range of theories and approaches to international law and not least the emphasis upon the close relationship between international law and international relations<sup>87</sup> testifies both to the importance of the subject and the inherent difficulties it faces.<sup>88</sup>

International law is clearly much more than a simple set of rules. It is a culture in the broadest sense in that it constitutes a method of communicating claims, counter-claims, expectations and anticipations as well as providing a framework for assessing and prioritising such demands.

International law functions in a particular, concrete world system, involving a range of actors from states to international organisations, companies and individuals, and as such needs to be responsive to the needs and aspirations of such participants. The international system is composed increasingly of co-operative and competing elements participating in cross-boundary activities, but the essential normative and structural nature of international law remains. Law is not the only way in which issues transcending borders are negotiated and settled or indeed fought over. It is one of a number of methods for dealing with an existing complex and shifting system, but it is a way of some prestige and influence for it is of its very nature in the form of mutually accepted obligations.<sup>89</sup> Law and politics cannot be divorced. They are not identical, but they do interact on several levels. They are engaged in a crucial symbiotic relationship. It does neither discipline a service to minimise the significance of the other.

<sup>84</sup> See e.g. with regard to human rights law and humanitarian law (or the laws of war), A. E. Cassimatis, 'International Humanitarian Law, International Human Rights Law, and Fragmentation of International Law', 56 *ICLQ*, 2007, p. 623. See further below, chapter 21, p. 857.

85 See further below, chapter 19, p. 808.

86 At pp. 248–9.

87 See e.g. A.-M. Slaughter, A. S. Tulumello and S. Wood, ‘*International Law and International Relations Theory: A New Generation of Interdisciplinary Scholarship*’, 92 AJIL, 1998, p. 367, and Slaughter, *A New World Order*. See also Bobbitt, *Shield*, who posits the dying of the nation-state and its replacement by the market-state, with consequential changes with regard to both international law and its institutions, e.g. pp. 353 ff. and 667 ff.

88 Note relatively recent arguments based on a revived power realism approach, particularly made in the US, that international law is simply a part of a complex of factors which are relevant, and implicitly subservient, to diplomacy and the pursuit of national interests: see e.g. J. L. Goldsmith and E. A. Posner, *The Limits of International Law*, Oxford, 2005, and M. J. Glennon, *Limits of Law, Prerogatives of Power: Interventionism after Kosovo*, New York, 2001, but cf. Franck, *Power of Legitimacy*; A. Van Aaken, ‘*To Do Away with International Law? Some Limits to the “Limits of International Law”*’, 17 EJIL, 2006, p. 289, and G. Simpson, *Great Powers and Outlaw States: Unequal Sovereigns in the International Legal Order*, Cambridge, 2004.

89 Higgins has noted that ‘international law has to be identified by reference to what the actors (most often states), often without benefit of pronouncement by the International Court of Justice, believe normative in their relations with each other’, *Problems and Process*, p. 18.

### 3 Sources

---

Ascertainment of the law on any given point in domestic legal orders is not usually too difficult a process.<sup>1</sup> In the English legal system, for example, one looks to see whether the matter is covered by an Act of Parliament and, if it is, the law reports are consulted as to how it has been interpreted by the courts. If the particular point is not specifically referred to in a statute, court cases will be examined to elicit the required information. In other words, there is a definite method of discovering what the law is. In addition to verifying the contents of the rules, this method also demonstrates how the law is created, namely, by parliamentary legislation or judicial case-law. This gives a degree of certainty to the legal process because one is able to tell when a proposition has become law and the necessary mechanism to resolve any disputes about the law is evident. It reflects the hierarchical character of a national legal order with its gradations of authority imparting to the law a large measure of stability and predictability.

The contrast is very striking when one considers the situation in international law. The lack of a legislature, executive and structure of courts within international law has been noted and the effects of this will become clearer as one proceeds. There is no single body able to create laws internationally binding upon everyone, nor a proper system of courts with comprehensive and compulsory jurisdiction to interpret and extend the law. One is therefore faced with the problem of discovering where the law is to be found and how one can tell whether a particular proposition amounts to a legal rule. This perplexity is reinforced because of the anarchic nature of world affairs and the clash of competing sovereignties. Nevertheless, international law does exist and is ascertainable. There are 'sources' available from which the rules may be extracted and analysed.

By 'sources' one means those provisions operating within the legal system on a technical level, and such ultimate sources as reason or morality are excluded, as are more functional sources such as libraries and journals. What is intended is a survey of the process whereby rules of international law emerge.<sup>2</sup>

Article 38(1) of the Statute of the International Court of Justice is widely recognised as the most authoritative and complete statement as to the sources of international law.<sup>3</sup> It provides that:

the Court, whose function is to decide in accordance with international law such disputes as are submitted to it, shall apply: (a) international conventions, whether general or particular, establishing rules expressly recognised by the contesting states; (b) international custom, as evidence of a general practice

accepted as law; (c) the general principles of law recognised by civilised nations; (d) subject to the provisions of Article 59, judicial decisions and the teachings of the most highly qualified publicists of the various nations, as subsidiary means for the determination of rules of law.

Although this formulation is technically limited to the sources of international law which the International Court must apply, in fact since the function of the Court is to decide disputes submitted to it ‘in accordance with international law’ and since all member states of the United Nations are *ipso facto* parties to the Statute by virtue of article 93 of the United Nations Charter (states that are non-members of the UN can specifically become parties to the Statute of the Court: Switzerland was the most obvious example of this until it joined the UN in 2002), there is no serious contention that the provision expresses the universal perception as to the enumeration of sources of international law.

Some writers have sought to categorise the distinctions in this provision, so that international conventions, custom and the general principles of law are described as the three exclusive law-creating processes while judicial decisions and academic writings are regarded as law-determining agencies, dealing with the verification of alleged rules.<sup>4</sup> But in reality it is not always possible to make hard and fast divisions. The different functions overlap to a great extent so that in many cases treaties (or conventions) merely reiterate accepted rules of customary law, and judgments of the International Court of Justice may actually create law in the same way that municipal judges formulate new law in the process of interpreting existing law.<sup>5</sup>

A distinction has sometimes been made between formal and material sources.<sup>6</sup> The former, it is claimed, confer upon the rules an obligatory character, while the latter comprise the actual content of the rules. Thus the formal sources appear to embody the constitutional mechanism for identifying law while the material sources incorporate the essence or subject-matter of the regulations. This division has been criticised particularly in view of the peculiar constitutional set-up of international law, and it tends to distract attention from some of the more important problems by its attempt to establish a clear separation of substantive and procedural elements, something difficult to maintain in international law.

## Custom<sup>7</sup>

## Introduction

In any primitive society certain rules of behaviour emerge and prescribe what is permitted and what is not. Such rules develop almost subconsciously within the group and are maintained by the members of the group by social pressures and with the aid of various other more tangible implements. They are not, at least in the early stages, written down or codified, and survive ultimately because of what can be called an aura of historical legitimacy.<sup>8</sup> As the community develops it will modernise its code of behaviour by the creation of legal machinery, such as courts and legislature. Custom, for this is how the original process can be described, remains and may also continue to evolve.<sup>9</sup> It is regarded as an authentic expression of the needs and values of the community at any given time.

Custom within contemporary legal systems, particularly in the developed world, is relatively cumbersome and unimportant and often of only nostalgic value.<sup>10</sup> In international law on the other hand it is a dynamic source of law in the light of the nature of the international system and its lack of centralised government organs.

The existence of customary rules can be deduced from the practice and behaviour of states and this is where the problems begin. How can one tell when a particular line of action adopted by a state reflects a legal rule or is merely prompted by, for example, courtesy? Indeed, how can one discover what precisely a state is doing or why, since there is no living 'state' but rather thousands of officials in scores of departments exercising governmental functions? Other issues concern the speed of creation of new rules and the effect of protests.

There are disagreements as to the value of a customary system in international law. Some writers deny that custom can be significant today as a source of law, noting that it is too clumsy and slow-moving to accommodate the evolution of international law any more,<sup>11</sup> while others declare that it is a dynamic process of law creation and more important than treaties since it is of universal application.<sup>12</sup> Another view recognises that custom is of value since it is activated by spontaneous behaviour and thus mirrors the contemporary concerns of society. However, since international law now has to contend with a massive increase in the pace and variety of state activities as well as having to come to terms with many different cultural and political traditions, the role of custom is perceived to be much diminished.<sup>13</sup>

There are elements of truth in each of these approaches. Amidst a wide variety of conflicting behaviour, it is not easy to isolate the emergence of a new rule of customary law and there are immense problems involved in collating all the necessary information. It is not always the best instrument available for the regulation of complex issues that arise in world affairs, but in particular situations it may meet the contingencies of modern life. As will be seen, it is possible to point to something called 'instant' customary law in certain circumstances that can prescribe

valid rules without having to undergo a long period of gestation, and custom can and often does dovetail neatly within the complicated mechanisms now operating for the identification and progressive development of the principles of international law.

More than that, custom does mirror the characteristics of the decentralised international system. It is democratic in that all states may share in the formulation of new rules, though the precept that some are more equal than others in this process is not without its grain of truth. If the international community is unhappy with a particular law it can be changed relatively quickly without the necessity of convening and successfully completing a world conference. It reflects the consensus approach to decision-making with the ability of the majority to create new law binding upon all, while the very participation of states encourages their compliance with customary rules. Its imprecision means flexibility as well as ambiguity. Indeed, the creation of the concept of the exclusive economic zone in the law of the sea may be cited as an example of this process. This is discussed further in chapter 11. The essence of custom according to article 38 is that it should constitute 'evidence of a general practice accepted as law'. Thus, it is possible to detect two basic elements in the make-up of a custom. These are the material facts, that is, the actual behaviour of states, and the psychological or subjective belief that such behaviour is 'law'. As the International Court noted in the *Libya/Malta* case, the substance of customary law must be 'looked for primarily in the actual practice and *opinio juris* of states'.<sup>14</sup>

It is understandable why the first requirement is mentioned, since customary law is founded upon the performance of state activities and the convergence of practices, in other words, what states actually do. It is the psychological factor (*opinio juris*) that needs some explanation. If one left the definition of custom as state practice then one would be faced with the problem of how to separate international law from principles of morality or social usage. This is because states do not restrict their behaviour to what is legally required. They may pursue a line of conduct purely through a feeling of goodwill and in the hope of reciprocal benefits. States do not have to allow tourists in or launch satellites. There is no law imposing upon them the strict duty to distribute economic aid to developing nations. The bare fact that such things are done does not mean that they have to be done.

The issue therefore is how to distinguish behaviour undertaken because of a law from behaviour undertaken because of a whole series of other reasons ranging from goodwill to pique, and from ideological support to political bribery. And if customary law is restricted to the overt acts of states, one cannot solve this problem.

Accordingly, the second element in the definition of custom has been elaborated. This is the psychological factor, the belief by a state that behaved in a certain way that it was under a legal obligation to act that way. It is known in legal terminology as *opinio juris sive necessitatis* and was first formulated by the French writer

François Gény as an attempt to differentiate legal custom from mere social usage.<sup>15</sup>

However, the relative importance of the two factors, the overt action and the subjective conviction, is disputed by various writers.<sup>16</sup> Positivists, with their emphasis upon state sovereignty, stress the paramount importance of the psychological element. States are only bound by what they have consented to, so therefore the material element is minimised to the greater value of *opinio juris*. If states believe that a course of action is legal and perform it, even if only once, then it is to be inferred that they have tacitly consented to the rule involved. Following on from this line of analysis, various positivist thinkers have tended to minimise many of the requirements of the overt manifestation, for example, with regard to repetition and duration.<sup>17</sup> Other writers have taken precisely the opposite line and maintain that *opinio juris* is impossible to prove and therefore of no tremendous consequence. Kelsen, for one, has written that it is the courts that have the discretion to decide whether any set of usages is such as to create a custom and that the subjective perception of the particular state or states is not called upon to give the final verdict as to its legality or not.<sup>18</sup>

## The material fact

The actual practice engaged in by states constitutes the initial factor to be brought into account. There are a number of points to be considered concerning the nature of a particular practice by states, including its duration, consistency, repetition and generality. As far as the duration is concerned, most countries specify a recognised time-scale for the acceptance of a practice as a customary rule within their municipal systems. This can vary from ‘time immemorial’ in the English common law dating back to 1189, to figures from thirty or forty years on the Continent.

In international law there is no rigid time element and it will depend upon the circumstances of the case and the nature of the usage in question. In certain fields, such as air and space law, the rules have developed quickly; in others, the process is much slower. Duration is thus not the most important of the components of state practice.<sup>19</sup> The essence of custom is to be sought elsewhere.

The basic rule as regards continuity and repetition was laid down in the *Asylum* case decided by the International Court of Justice (ICJ) in 1950.<sup>20</sup> The Court declared that a customary rule must be ‘in accordance with a constant and uniform usage practised by the States in question’.<sup>21</sup>

The case concerned Haya de la Torre, a Peruvian, who was sought by his government after an unsuccessful revolt. He was granted asylum by Colombia in its embassy in Lima, but Peru refused to issue a safe conduct to permit Torre to leave

the country. Colombia brought the matter before the International Court of Justice and requested a decision recognising that it (Colombia) was competent to define Torre's offence, as to whether it was criminal as Peru maintained, or political, in which case asylum and a safe conduct could be allowed.

The Court, in characterising the nature of a customary rule, held that it had to constitute the expression of a right appertaining to one state (Colombia) and a duty incumbent upon another (Peru). However, the Court felt that in the *Asylum* litigation, state practices had been so uncertain and contradictory as not to amount to a 'constant and uniform usage' regarding the unilateral qualification of the offence in question.<sup>22</sup> The issue involved here dealt with a regional custom pertaining only to Latin America and it may be argued that the same approach need not necessarily be followed where a general custom is alleged and that in the latter instance a lower standard of proof would be upheld.<sup>23</sup>

The ICJ emphasised its view that some degree of uniformity amongst state practices was essential before a custom could come into existence in the *Anglo-Norwegian Fisheries* case.<sup>24</sup> The United Kingdom, in its arguments against the Norwegian method of measuring the breadth of the territorial sea, referred to an alleged rule of custom whereby a straight line may be drawn across bays of less than ten miles from one projection to the other, which could then be regarded as the baseline for the measurement of the territorial sea. The Court dismissed this by pointing out that the actual practice of states did not justify the creation of any such custom. In other words, there had been insufficient uniformity of behaviour.

In the *North Sea Continental Shelf* cases,<sup>25</sup> which involved a dispute between Germany on the one hand and Holland and Denmark on the other over the delimitation of the continental shelf, the ICJ remarked that state practice, 'including that of states whose interests are specially affected', had to be 'both extensive and virtually uniform in the sense of the provision invoked'. This was held to be indispensable to the formation of a new rule of customary international law.<sup>26</sup> However, the Court emphasised in the *Nicaragua v. United States* case<sup>27</sup> that it was not necessary that the practice in question had to be 'in absolutely rigorous conformity' with the purported customary rule. The Court continued:

In order to deduce the existence of customary rules, the Court deems it sufficient that the conduct of states should, in general, be consistent with such rules, and that instances of state conduct inconsistent with a given rule should generally have been treated as breaches of that rule, not as indications of the recognition of a new rule.<sup>28</sup>

The threshold that needs to be attained before a legally binding custom can be created will depend both upon the nature of the alleged rule and the opposition it arouses. This partly relates to the problem of ambiguity where it is not possible to point to the alleged custom with any degree of clarity, as in the *Asylum* case where a variety of conflicting and contradictory evidence had been brought forward.

On the other hand, an unsubstantiated claim by a state cannot be accepted because it would amount to unilateral law-making and compromise a reasonably impartial system of international law. If a proposition meets with a great deal of opposition then it would be an undesirable fiction to ignore this and talk of an established rule. Another relevant factor is the strength of the prior rule which is purportedly overthrown.<sup>29</sup> For example, the customary law relating to a state's sovereignty over its airspace developed very quickly in the years immediately before and during the First World War. Similarly, the principle of non-sovereignty over the space route followed by artificial satellites came into being soon after the launching of the first sputniks. Bin Cheng has argued that in such circumstances repetition is not at all necessary provided the *opinio juris* could be clearly established. Thus, 'instant' customary law is possible.<sup>30</sup>

This contention that single acts may create custom has been criticised, particularly in view of the difficulties of proving customary rules any other way but through a series of usages.<sup>31</sup> Nevertheless, the conclusion must be that it is the international context which plays the vital part in the creation of custom. In a society constantly faced with new situations because of the dynamics of progress, there is a clear need for a reasonably speedy method of responding to such changes by a system of prompt rule-formation. In new areas of law, customs can be quickly established by state practices by virtue of the newness of the situations involved, the lack of contrary rules to be surmounted and the overwhelming necessity to preserve a sense of regulation in international relations.

One particular analogy that has been used to illustrate the general nature of customary law was considered by de Visscher. He likened the growth of custom to the gradual formation of a road across vacant land. After an initial uncertainty as to direction, the majority of users begin to follow the same line which becomes a single path. Not long elapses before that path is transformed into a road accepted as the only regular way, even though it is not possible to state at which precise moment this latter change occurs. And so it is with the formation of a custom. De Visscher develops this idea by reflecting that just as some make heavier footprints than others due to their greater weight, the more influential states of the world mark the way with more vigour and tend to become the guarantors and defenders of the way forward.<sup>32</sup>

The reasons why a particular state acts in a certain way are varied but are closely allied to how it perceives its interests. This in turn depends upon the power and role of the state and its international standing. Accordingly, custom should to some extent mirror the perceptions of the majority of states, since it is based upon usages which are practised by nations as they express their power and their hopes and fears. But it is inescapable that some states are more influential and powerful than others and that their activities should be regarded as of greater significance. This is reflected in international law so that custom may be created by a few states, provided those states are intimately connected with the issue at hand, whether because of their wealth and power or because of their special relationship with the subject-matter of the practice, as for example maritime nations and sea law. Law cannot be divorced from politics or power and this is one instance of that proposition.<sup>33</sup>

The influence of the United Kingdom, for example, on the development of the law of the sea and prize law in the nineteenth century when it was at the height of its power, was predominant. A number of propositions later accepted as part of international customary law appeared this way. Among many instances of this, one can point to navigation procedures. Similarly, the impact of the Soviet Union (now Russia) and the United States on space law has been paramount.<sup>34</sup>

One can conclude by stating that for a custom to be accepted and recognised it must have the concurrence of the major powers in that particular field. A regulation regarding the breadth of the territorial sea is unlikely to be treated as law if the great maritime nations do not agree to or acquiesce in it, no matter how many landlocked states demand it. Other countries may propose ideas and institute pressure, but without the concurrence of those most interested, it cannot amount to a rule of customary law. This follows from the nature of the international system where all may participate but the views of those with greater power carry greater weight.

Accordingly, the duration and generality of a practice may take second place to the relative importance of the states precipitating the formation of a new customary rule in any given field. Universality is not required, but some correlation with power is. Some degree of continuity must be maintained but this again depends upon the context of operation and the nature of the usage.

Those elements reflect the external manifestations of a practice and establish that it is in existence and exhibited as such. That does not mean that it is law and this factor will be considered in the next subsection. But it does mean that all states who take the trouble can discover its existence. This factor of conspicuousness emphasises both the importance of the context within which the usage operates and the more significant elements of the overt act which affirms the existence of a

custom.

The question is raised at this stage of how significant a failure to act is. Just how important is it when a state, or more particularly a major state, does not participate in a practice? Can it be construed as acquiescence in the performance of the usage? Or, on the other hand, does it denote indifference implying the inability of the practice to become a custom until a decision one way or the other has been made? Failures to act are in themselves just as much evidence of a state's attitudes as are actions. They similarly reflect the way in which a nation approaches its environment. Britain consistently fails to attack France, while Chad consistently fails to send a man to the moon. But does this mean that Britain recognises a rule not to attack its neighbour and that Chad accepts a custom not to launch rockets to the moon? Of course, the answer is in the first instance yes, and in the second example no. Thus, a failure to act can arise from either a legal obligation not to act, or an incapacity or unwillingness in the particular circumstances to act. Indeed, it has been maintained that the continued habit of not taking actions in certain situations may lead to the formation of a legal rule.<sup>35</sup>

The danger of saying that a failure to act over a long period creates a negative custom, that is a rule actually not to do it, can be shown by remarking on the absurdity of the proposition that a continual failure to act until the late 1950s is evidence of a legal rule not to send artificial satellites or rockets into space. On the other hand, where a particular rule of behaviour is established it can be argued that abstention from protest by states may amount to agreement with that rule.

In the particular circumstances of the *Lotus* case<sup>36</sup> the Permanent Court of International Justice, the predecessor of the International Court of Justice, laid down a high standard by declaring that abstention could only give rise to the recognition of a custom if it was based on a conscious duty to abstain. In other words, states had actually to be aware that they were not acting a particular way because they were under a definite obligation not to act that way. The decision has been criticised and would appear to cover categories of non-acts based on legal obligations, but not to refer to instances where, by simply not acting as against a particular rule in existence, states are tacitly accepting the legality and relevance of that rule.

It should be mentioned, however, that acquiescence must be based upon full knowledge of the rule invoked. Where a failure to take a course of action is in some way connected or influenced or accompanied by a lack of knowledge of all the relevant circumstances, then it cannot be interpreted as acquiescence.

## **What is state practice?**

Some of the ingredients of state activities have been surveyed and attempts made to

place them in some kind of relevant context. But what is state practice? Does it cover every kind of behaviour initiated by the state, or is it limited to actual, positive actions? To put it more simply, does it include such things as speeches, informal documents and governmental statements or is it restricted to what states actually do?

It is how states behave in practice that forms the basis of customary law, but evidence of what a state does can be obtained from numerous sources. Obvious examples include administrative acts, legislation, decisions of courts and activities on the international stage, for example treaty-making.<sup>37</sup> A state is not a living entity, but consists of governmental departments and thousands of officials, and state activity is spread throughout a whole range of national organs. There are the state's legal officers, legislative institutions, courts, diplomatic agents and political leaders. Each of these engages in activity which relates to the international field and therefore one has to examine all such material sources and more in order to discover evidence of what states do.<sup>38</sup>

The obvious way to find out how countries are behaving is to read the newspapers, consult historical records, listen to what governmental authorities are saying and peruse the many official publications. There are also memoirs of various past leaders, official manuals on legal questions, diplomatic interchanges and the opinions of national legal advisors. All these methods are valuable in seeking to determine actual state practice.

In addition, one may note resolutions in the General Assembly, comments made by governments on drafts produced by the International Law Commission, decisions of the international judicial institutions, decisions of national courts, treaties and the general practice of international organisations.<sup>39</sup>

International organisations in fact may be instrumental in the creation of customary law. For example, the Advisory Opinion of the International Court of Justice declaring that the United Nations possessed international personality was partly based on the actual behaviour of the UN.<sup>40</sup> The International Law Commission has pointed out that 'records of the cumulative practice of international organisations may be regarded as evidence of customary international law with reference to states' relations to the organisations'.<sup>41</sup> The International Court has also noted that evidence of the existence of rules and principles may be found in resolutions adopted by the General Assembly and the Security Council of the United Nations.<sup>42</sup>

States' municipal laws may in certain circumstances form the basis of customary rules. In the *Scotia* case decided by the US Supreme Court in 1871,<sup>43</sup> a British ship had sunk an American vessel on the high seas. The Court held that British navigational procedures established by an Act of Parliament formed the basis of the

relevant international custom since other states had legislated in virtually identical terms. Accordingly, the American vessel, in not displaying the correct lights, was at fault. The view has also been expressed that mere claims as distinct from actual physical acts cannot constitute state practice. This is based on the precept that ‘until it [a state] takes enforcement action, the claim has little value as a prediction of what the state will actually do’.<sup>44</sup> But as has been demonstrated this is decidedly a minority view.<sup>45</sup> Claims and conventions of states in various contexts have been adduced as evidence of state practice and it is logical that this should be so,<sup>46</sup> though the weight to be attached to such claims, may, of course, vary according to the circumstances. This approach is clearly the correct one since the process of claims and counter-claims is one recognised method by which states communicate to each other their perceptions of the status of international rules and norms. In this sense they operate in the same way as physical acts. Whether *in abstracto* or with regard to a particular situation, they constitute the raw material out of which may be fashioned rules of international law.<sup>47</sup> It is suggested that the formulation that ‘state practice covers any act or statements by a state from which views about customary law may be inferred’,<sup>48</sup> is substantially correct. However, it should be noted that not all elements of practice are equal in their weight and the value to be given to state conduct will depend upon its nature and provenance.

## ***Opinio juris***<sup>49</sup>

Once one has established the existence of a specified usage, it becomes necessary to consider how the state views its own behaviour. Is it to be regarded as a moral or political or legal act or statement? The *opinio juris*, or belief that a state activity is legally obligatory, is the factor which turns the usage into a custom and renders it part of the rules of international law. To put it slightly differently, states will behave a certain way because they are convinced it is binding upon them to do so.

The Permanent Court of International Justice expressed this point of view when it dealt with the *Lotus* case.<sup>50</sup> The issue at hand concerned a collision on the high seas (where international law applies) between the *Lotus*, a French ship, and the *Boz-Kourt*, a Turkish ship. Several people aboard the latter ship were drowned and Turkey alleged negligence by the French officer of the watch. When the *Lotus* reached Istanbul, the French officer was arrested on a charge of manslaughter and the case turned on whether Turkey had jurisdiction to try him. Among the various arguments adduced, the French maintained that there existed a rule of customary law to the effect that the flag state of the accused (France) had exclusive jurisdiction in such cases and that accordingly the national state of the victim (Turkey) was barred from trying him. To justify this, France referred to the absence of previous criminal prosecutions by such states in similar situations and from this deduced tacit consent

in the practice which therefore became a legal custom.

The Court rejected this and declared that even if such a practice of abstention from instituting criminal proceedings could be proved in fact, it would not amount to a custom. It held that 'only if such abstention were based on their [the states] being conscious of a duty to abstain would it be possible to speak of an international custom'.<sup>51</sup> Thus the essential ingredient of obligation was lacking and the practice remained a practice, nothing more.

A similar approach occurred in the *North Sea Continental Shelf* cases.<sup>52</sup> In the general process of delimiting the continental shelf of the North Sea in pursuance of oil and gas exploration, lines were drawn dividing the whole area into national spheres. However, West Germany could not agree with either Holland or Denmark over the respective boundary lines and the matter came before the International Court of Justice.

Article 6 of the Geneva Convention on the Continental Shelf of 1958 provided that where agreement could not be reached, and unless special circumstances justified a different approach, the boundary line was to be determined in accordance with the principle of equidistance from the nearest points of the baselines from which the breadth of the territorial sea of each state is measured. This would mean a series of lines drawn at the point where Germany met Holland on the one side and Denmark on the other and projected outwards into the North Sea. However, because Germany's coastline is concave, such equidistant lines would converge and enclose a relatively small triangle of the North Sea. The Federal Republic had signed but not ratified the 1958 Geneva Convention and was therefore not bound by its terms. The question thus was whether a case could be made out that the 'equidistance-special circumstances principle' had been absorbed into customary law and was accordingly binding upon Germany.

The Court concluded in the negative and held that the provision in the Geneva Convention did not reflect an already existing custom. It was emphasised that when the International Law Commission had considered this point in the draft treaty which formed the basis of discussion at Geneva, the principle of equidistance had been proposed with considerable hesitation, somewhat on an experimental basis and not at all as an emerging rule of customary international law.<sup>53</sup> The issue then turned on whether practice subsequent to the Convention had created a customary rule. The Court answered in the negative and declared that although time was not of itself a decisive factor (only three years had elapsed before the proceedings were brought):

an indispensable requirement would be that within the period in question, short though it might be, state practice, including that of states whose interests are specially affected, should have been both extensive and virtually uniform in the

sense of the provision invoked, and should moreover have occurred in such a way as to show a general recognition that a rule of law or legal obligation is involved.<sup>54</sup>

This approach was maintained by the Court in the *Nicaragua* case<sup>55</sup> and express reference was made to the *North Sea Continental Shelf* cases. The Court noted that:

for a new customary rule to be formed, not only must the acts concerned ‘amount to a settled practice’, but they must be accompanied by the *opinio juris sive necessitatis*. Either the States taking such action or other States in a position to react to it, must have behaved so that their conduct is ‘evidence of a belief that this practice is rendered obligatory by the existence of a rule of law requiring it. The need for such a belief, i.e. the existence of a subjective element, is implicit in the very notion of the *opinio juris sive necessitatis*.’<sup>56</sup>

This was reaffirmed by the Court in *Germany v. Italy (Greece Intervening)*, where it was further noted that:

*Opinio juris* in this context is reflected in particular in the assertion by States claiming immunity that international law accords them a right to such immunity from the jurisdiction of other States; in the acknowledgment, by States granting immunity, that international law imposes upon them an obligation to do so; and, conversely, in the assertion by States in other cases of a right to exercise jurisdiction over foreign States. While it may be true that States sometimes decide to accord an immunity more extensive than that required by international law, for present purposes, the point is that the grant of immunity in such a case is not accompanied by the requisite *opinio juris* and therefore sheds no light upon the issue currently under consideration by the Court.<sup>57</sup>

It is thus clear that the Court has adopted and maintained a high threshold with regard to the overt proving of the subjective constituent of customary law formation. Confluence of practice in itself is not enough. This was reflected in the *Diallo* case, where the International Court held that the fact that various international agreements have established special legal regimes for investment protection or that such provisions are commonly included in contracts between states and foreign investors ‘was insufficient to show that there has been a change in the customary rules of diplomatic protection: it could equally show the contrary’.<sup>58</sup>

The great problem connected with the *opinio juris* is that if it calls for behaviour

in accordance with law, how can new customary rules be created since that obviously requires action different from or contrary to what until then is regarded as law? If a country claims a three-mile territorial sea in the belief that this is legal, how can the rule be changed in customary law to allow claims of, for example, twelve miles, since that cannot also be in accordance with prevailing law?<sup>59</sup> Obviously if one takes a restricted view of the psychological aspects, then logically the law will become stultified and this demonstrably has not happened.

Thus, one has to treat the matter in terms of a process whereby states behave in a certain way in the belief that such behaviour is law or is becoming law. It will then depend upon how other states react as to whether this process of legislation is accepted or rejected. It follows that rigid definitions as to legality have to be modified to see whether the legitimating stamp of state activity can be provided or not. If a state proclaims a twelve-mile limit to its territorial sea in the belief that although the three-mile limit has been accepted law, the circumstances are so altering that a twelve-mile limit might now be treated as becoming law, it is vindicated if other states follow suit and a new rule of customary law is established. If other states reject the proposition, then the projected rule withers away and the original rule stands, reinforced by state practice and common acceptance. As the Court itself noted in the *Nicaragua* case,<sup>60</sup> '[r]eliance by a State on a novel right or an unprecedented exception to the principle might, if shared in principle by other States, tend towards a modification of customary international law'. The difficulty in this kind of approach is that it is sometimes hard to pinpoint exactly when one rule supersedes another, but that is a complication inherent in the nature of custom. Change is rarely smooth but rather spasmodic.

This means taking a more flexible view of the *opinio juris* and tying it more firmly with the overt manifestations of a custom into the context of national and international behaviour. This should be done to accommodate the idea of an action which, while contrary to law, contains the germ of a new law and relates to the difficulty of actually proving that a state, in behaving a certain way, does so in the belief that it is in accordance with the law. An extreme expression of this approach is to infer or deduce the *opinio juris* from the material acts. Judge Tanaka, in his Dissenting Opinion in the *North Sea Continental Shelf* cases, remarked that there was:

no other way than to ascertain the existence of *opinio juris* from the fact of the external existence of a certain custom and its necessity felt in the international community, rather than to seek evidence as to the subjective motives for each example of State practice.<sup>61</sup>

However, states must be made aware that when one state takes a course of action, it does so because it regards it as within the confines of international law, and not as, for example, purely a political or moral gesture. There has to be an aspect of legality about the behaviour and the acting state will have to confirm that this is so, so that the international community can easily distinguish legal from non-legal practices. This is essential to the development and presentation of a legal framework amongst the states.<sup>62</sup>

Faced with the difficulty in practice of proving the existence of the *opinio juris*, increasing reference has been made to conduct within international organisations. This is so particularly with regard to the United Nations. The International Court of Justice has in a number of cases utilised General Assembly resolutions as confirming the existence of the *opinio juris*, focusing on the content of the resolution or resolutions in question and the conditions of their adoption.<sup>63</sup> The key, however, is the attitude taken by the states concerned, whether as parties to a particular treaty or as participants in the adoption of a UN resolution.<sup>64</sup> The Court has also referred to major codification conventions for the same purpose,<sup>65</sup> and to the work of the International Law Commission.<sup>66</sup>

## **Protest, acquiescence and change in customary law<sup>67</sup>**

Customary law is thus established by virtue of a pattern of claim, absence of protest by states particularly interested in the matter at hand and acquiescence by other states.<sup>68</sup> Together with related notions such as recognition, admissions and estoppel, such conduct or abstinence from conduct forms part of a complex framework within which legal principles are created and deemed applicable to states.<sup>69</sup>

The Chamber of the International Court in the *Gulf of Maine* case defined acquiescence as ‘equivalent to tacit recognition manifested by unilateral conduct which the other party may interpret as consent’ and as founded upon the principles of good faith and equity.<sup>70</sup> Generally, where states are seen to acquiesce<sup>71</sup> in the behaviour of other states without protesting against them, the assumption must be that such behaviour is accepted as legitimate.<sup>72</sup>

Some writers have maintained that acquiescence can amount to consent to a customary rule and that the absence of protest implies agreement. In other words where a state or states take action which they declare to be legal, the silence of other states can be used as an expression of *opinio juris* or concurrence in the new legal rule. This means that actual protests are called for to break the legitimising process.<sup>73</sup>

In the *Lotus* case, the Court held that ‘only if such abstention were based on their

[the states] being conscious of having a duty to abstain would it be possible to speak of an international custom'.<sup>74</sup> Thus, one cannot infer a rule prohibiting certain action merely because states do not indulge in that activity. But the question of not reacting when a state behaves a certain way is a slightly different one. It would seem that where a new rule is created in new fields of international law, for example space law, acquiescence by other states is to be regarded as reinforcing the rule whether it stems from actual agreement or lack of interest depending always upon the particular circumstances of the case. Acquiescence in a new rule which deviates from an established custom is more problematic.

The decision in the *Anglo-Norwegian Fisheries* case<sup>75</sup> may appear to suggest that where a state acts contrary to an established customary rule and other states acquiesce in this, then that state is to be treated as not bound by the original rule. The Court noted that 'in any event the...rule would appear to be inapplicable as against Norway inasmuch as she had always opposed any attempt to apply it to the Norwegian coast'.<sup>76</sup> In other words, a state opposing the existence of a custom from its inception would not be bound by it. This is known as the persistent objector rule. However, the problem of one or more states seeking to dissent from recognised customs by adverse behaviour coupled with the acquiescence or non-reaction of other states remains unsettled.

States fail to protest for very many reasons. A state might not wish to give offence gratuitously or it might wish to reinforce political ties or other diplomatic and political considerations may be relevant. It could be that to protest over every single act with which a state does not agree would be an excessive requirement. It is, therefore, unrealistic to expect every state to react to every single act of every other state. If one accepted that a failure to protest validated a derogation from an established custom in every case then scores of special relationships would emerge between different states depending upon acquiescence and protest. In many cases a protest might be purely formal or part of diplomatic manoeuvring designed to exert pressure in a totally different field and thus not intended to alter legal relationships.

Where a new rule which contradicts a prior rule is maintained by a large number of states, the protests of a few states would not overrule it, and the abstention from reaction by other countries would merely reinforce it. Constant protest on the part of a particular state when reinforced by the acquiescence of other states might create a recognised exception to the rule, but it will depend to a great extent on the facts of the situation and the views of the international community. Behaviour contrary to a custom contains within itself the seeds of a new rule and if it is endorsed by other nations, the previous law will disappear and be replaced, or alternatively there could be a period of time during which the two customs co-exist until one of them is generally accepted,<sup>77</sup> as was the position for many years with regard to the limits of

the territorial sea.<sup>78</sup> It follows from the above, therefore, that customary rules are binding upon all states except for such states as have dissented from the start of that custom.<sup>79</sup> This raises the question of new states and custom, for the logic of the traditional approach would be for such states to be bound by all existing customs as at the date of independence. The opposite view, based upon the consent theory of law, would permit such states to choose which customs to adhere to at that stage, irrespective of the attitude of other states.<sup>80</sup> However, since such an approach could prove highly disruptive, the proviso is often made that by entering into relations without reservation with other states, new states signify their acceptance of the totality of international law.<sup>81</sup>

## **Regional and local custom<sup>82</sup>**

It is possible for rules to develop which will bind only a set group of states, such as those in Latin America,<sup>83</sup> or indeed just two states.<sup>84</sup> Such an approach may be seen as part of the need for ‘respect for regional legal traditions’.<sup>85</sup>

In the *Asylum* case,<sup>86</sup> the International Court of Justice discussed the Colombian claim of a regional or local custom peculiar to the Latin American states, which would validate its position over the granting of asylum. The Court declared that the ‘party which relies on a custom of this kind must prove that this custom is established in such a manner that it has become binding on the other party’.<sup>87</sup> It found that such a custom could not be proved because of uncertain and contradictory evidence.

In such cases, the standard of proof required, especially as regards the obligation accepted by the party against whom the local custom is maintained, is higher than in cases where an ordinary or general custom is alleged.

In the *Right of Passage over Indian Territory* case,<sup>88</sup> Portugal claimed that there existed a right of passage over Indian territory as between the Portuguese enclaves, and this was upheld by the International Court of Justice over India’s objections that no local custom could be established between only two states. The Court declared that it was satisfied that there had in the past existed a constant and uniform practice allowing free passage and that the ‘practice was accepted as law by the parties and has given rise to a right and a correlative obligation’.<sup>89</sup> More generally, the Court stated that ‘Where therefore the Court finds a practice clearly established between two States which was accepted by the Parties as governing the relations between them, the Court must attribute decisive effect to that practice for the purpose of determining their specific rights and obligations. Such a particular practice must prevail over any general rules.’<sup>90</sup>

Such local customs therefore depend upon a particular activity by one state being accepted by the other state (or states) as an expression of a legal obligation or right. While in the case of a general customary rule the process of consensus is at work so that a majority or a substantial minority of interested states can be sufficient to create a new custom, a local custom needs the positive acceptance of both (or all) parties to the rule.<sup>91</sup> This is because local customs are an exception to the general nature of customary law, which involves a fairly flexible approach to law-making by all states, and instead constitutes a reminder of the former theory of consent whereby states are bound only by what they assent to. Exceptions may prove the rule, but they need greater proof than the rule to establish themselves.

## Treaties<sup>92</sup>

In contrast with the process of creating law through custom, treaties (or international conventions) are a more modern and more deliberate method.<sup>93</sup> Article 38 refers to 'international conventions, whether general or particular, establishing rules expressly recognised by the contracting states'. Treaties will be considered in more detail in chapter 16 but in this survey of the sources of international law reference must be made to the role of international conventions.

Treaties are known by a variety of differing names, ranging from Conventions, International Agreements, Pacts, General Acts, Charters, through to Statutes, Declarations and Covenants.<sup>94</sup> All these terms refer to a similar transaction, the creation of written agreements whereby the states participating bind themselves legally to act in a particular way or to set up particular relations between themselves. A series of conditions and arrangements are laid out which the parties oblige themselves to carry out.<sup>95</sup>

The obligatory nature of treaties is founded upon the customary international law principle that agreements are binding (*pacta sunt servanda*). Treaties may be divided into 'law-making' treaties, which are intended to have universal or general relevance, and 'treaty-contracts', which apply only as between two or a small number of states. Such a distinction is intended to reflect the general or local applicability of a particular treaty and the range of obligations imposed. It cannot be regarded as hard and fast and there are many grey areas of overlap and uncertainty.<sup>96</sup>

Treaties are express agreements and are a form of substitute legislation undertaken by states. They bear a close resemblance to contracts in a superficial sense in that the parties create binding obligations for themselves, but they have a nature of their own which reflects the character of the international system. The number of treaties entered into has expanded over the last century, witness the

growing number of volumes of the United Nations Treaty Series or the United Kingdom Treaty Series. They fulfil a vital role in international relations.

As governmental controls increase and the technological and communications revolutions affect international life, the number of issues which require some form of inter-state regulation multiplies.

For many writers, treaties constitute the most important sources of international law as they require the express consent of the contracting parties. Treaties are thus seen as superior to custom, which is regarded in any event as a form of tacit agreement.<sup>97</sup> As examples of important treaties one may mention the Charter of the United Nations, the Geneva Conventions on the treatment of prisoners and the protection of civilians and the Vienna Convention on Diplomatic Relations. All kinds of agreements exist, ranging from the regulation of outer space exploration to the control of drugs and the creation of international financial and development institutions. It would be impossible to telephone abroad or post a letter overseas or take an aeroplane to other countries without the various international agreements that have laid down the necessary, recognised conditions of operation.

It follows from the essence of an international treaty that, like a contract, it sets down a series of propositions which are then regarded as binding upon the parties. How then is it possible to treat conventions as sources of international law, over and above the obligations imposed upon the contracting parties? It is in this context that one can understand the term 'law-making treaties'. They are intended to have an effect *generally*, not restrictively, and they are to be contrasted with those treaties which merely regulate limited issues between a few states. Law-making treaties are those agreements whereby states elaborate their perception of international law upon any given topic or establish new rules which are to guide them for the future in their international conduct. Such law-making treaties, of necessity, require the participation of a large number of states to emphasise this effect, and may produce rules that will bind all.<sup>98</sup> They constitute normative treaties, agreements that prescribe rules of conduct to be followed. Examples of such treaties may include the Antarctic Treaty and the Genocide Convention. There are also many agreements which declare the existing law or codify existing customary rules, such as the Vienna Convention on Diplomatic Relations of 1961.

Parties that do not sign and ratify the particular treaty in question are not bound by its terms. This is a general rule and was illustrated in the *North Sea Continental Shelf* cases<sup>99</sup> where West Germany had not ratified the relevant Convention and was therefore under no obligation to heed its terms. However, where treaties reflect customary law then non-parties are bound, not because it is a treaty provision but because it reaffirms a rule or rules of customary international law. Similarly, non-parties may come to accept that provisions in a particular treaty can generate

customary law, depending always upon the nature of the agreement, the number of participants and other relevant factors.

The possibility that a provision in a treaty may constitute the basis of a rule which, when coupled with the *opinio juris*, can lead to the creation of a binding custom governing all states, not just those party to the original treaty, was considered by the International Court of Justice in the *North Sea Continental Shelf* cases<sup>100</sup> and regarded as one of the recognised methods of formulating new rules of customary international law. The Court, however, declared that the particular provision had to be ‘of a fundamentally norm-creating character’,<sup>101</sup> that is, capable of forming the basis of a general rule of law. What exactly this amounts to will probably vary according to the time and place, but it does confirm that treaty provisions may lead to custom providing other states, parties and non-parties to the treaty fulfil the necessary conditions of compatible behaviour and *opinio juris*. It has been argued that this possibility may be extended so that generalisable treaty provisions may of themselves, without the requirement to demonstrate the *opinio juris* and with little passage of time, generate *ipso facto* customary rules.<sup>102</sup> This, while recognising the importance of treaties, particularly in the human rights field, containing potential norm-creating provisions, is clearly going too far. The danger would be of a small number of states legislating for all, unless dissenting states actually entered into contrary treaties.<sup>103</sup> This would constitute too radical a departure for the current process of law-formation within the international community.

It is now established that even where a treaty rule comes into being covering the same ground as a customary rule, the latter will not be simply absorbed within the former but will maintain its separate existence. The Court in the *Nicaragua* case<sup>104</sup> did not accept the argument of the US that the norms of customary international law concerned with self-defence had been ‘subsumed’ and ‘supervened’ by article 51 of the United Nations Charter. It was emphasised that ‘even if a treaty norm and a customary norm relevant to the present dispute were to have exactly the same content, this would not be a reason for the Court to hold that the incorporation of the customary norm into treaty law must deprive the customary norm of its applicability as distinct from the treaty norm’.<sup>105</sup> The Court concluded that ‘it will therefore be clear that customary international law continues to exist and to apply separately from international treaty law, even where the two categories of law have an identical content’.<sup>106</sup> The effect of this in the instant case was that the Court was able to examine the rule as established under customary law, whereas due to an American reservation, it was unable to analyse the treaty-based obligation.

Of course, two rules with the same content may be subject to different principles with regard to their interpretation and application; thus the approach of the Court as

well as being theoretically correct is of practical value also. In many cases, such dual source of existence of a rule may well suggest that the two versions are not in fact identical, as in the case of self-defence under customary law and article 51 of the Charter, but it will always depend upon the particular circumstances.<sup>107</sup>

Certain treaties attempt to establish a 'regime' which will, of necessity, also extend to non-parties.<sup>108</sup> The United Nations Charter, for example, in its creation of a definitive framework for the preservation of international peace and security, declares in article 2(6) that 'the organisation shall ensure that states which are not members of the United Nations act in accordance with these Principles [listed in article 2] so far as may be necessary for the maintenance of international peace and security'. One can also point to the 1947 General Agreement on Tariffs and Trade (GATT) which set up a common code of conduct in international trade and has had an important effect on non-party states as well, being now transmuted into the World Trade Organization.

On the same theme, treaties may be constitutive in that they create international institutions and act as constitutions for them, outlining their proposed powers and duties.

'Treaty-contracts' on the other hand are not law-making instruments in themselves since they are between only small numbers of states and on a limited topic, but may provide evidence of customary rules. For example, a series of bilateral treaties containing a similar rule may be evidence of the existence of that rule in customary law, although this proposition needs to be approached with some caution in view of the fact that bilateral treaties by their very nature often reflect discrete circumstances.<sup>109</sup>

## **General principles of law<sup>110</sup>**

In any system of law, a situation may very well arise where the court in considering a case before it realises that there is no law covering exactly that point, neither parliamentary statute nor judicial precedent. In such instances the judge will proceed to deduce a rule that will be relevant, by analogy from already existing rules or directly from the general principles that guide the legal system, whether they be referred to as emanating from justice, equity or considerations of public policy. Such a situation is perhaps even more likely to arise in international law because of the relative underdevelopment of the system in relation to the needs with which it is faced.

There are fewer decided cases in international law than in a municipal system and no method of legislating to provide rules to govern new situations.<sup>111</sup> It is for such a

reason that the provision of ‘the general principles of law recognised by civilised nations’<sup>112</sup> was inserted into article 38 as a source of law, to close the gap that might be uncovered in international law and solve this problem which is known legally as *non liquet*.<sup>113</sup> The question of gaps in the system is an important one. It is important to appreciate that while there may not always be an immediate and obvious rule applicable to every international situation, ‘every international situation is capable of being determined *as a matter of law*’.<sup>114</sup>

There are various opinions as to what the general principles of law concept is intended to refer. Some writers regard it as an affirmation of Natural Law concepts, which are deemed to underlie the system of international law and constitute the method for testing the validity of the positive (i.e. man-made) rules.<sup>115</sup> Other writers, particularly positivists, treat it as a sub-heading under treaty and customary law and incapable of adding anything new to international law unless it reflects the consent of states. Soviet writers like Tunkin subscribed to this approach and regarded the ‘general principles of law’ as reiterating the fundamental precepts of international law, for example, the law of peaceful co-existence, which have already been set out in treaty and custom law.<sup>116</sup>

Between these two approaches, most writers are prepared to accept that the general principles do constitute a separate source of law but of fairly limited scope, and this is reflected in the decisions of the Permanent Court of International Justice and the International Court of Justice. It is not clear, however, in all cases, whether what is involved is a general principle of law appearing in municipal systems or a general principle of international law or indeed, as it has been expressed, such principles of municipal law as are applicable to the relations between states.<sup>117</sup>

While the reservoir from which one can draw contains the legal operations of 190 or so states, it does not follow that judges have to be experts in every legal system. There are certain common themes that run through the many different orders. Anglo-American common law has influenced a number of states throughout the world, as have the French and Germanic systems. There are many common elements in the law in Latin America, and most Afro-Asian states have borrowed heavily from the European experience in their efforts to modernise the structure administering the state and westernise economic and other enterprises.<sup>118</sup>

Reference will now be made to some of the leading cases in this field to illustrate how this problem has been addressed.

In the *Chorzów Factory* case in 1928,<sup>119</sup> which followed the seizure of a nitrate factory in Upper Silesia by Poland, the Permanent Court of International Justice declared that ‘it is a general conception of law that every violation of an engagement involves an obligation to make reparation’. The Court also regarded it as:

a principle of international law that the reparation of a wrong may consist in an indemnity corresponding to the damage which the nationals of the injured state have suffered as a result of the act which is contrary to international law.

The most fertile fields, however, for the implementation of municipal law analogies have been those of procedure, evidence and the machinery of the judicial process. In the *German Settlers in Poland* case,<sup>120</sup> the Court, approaching the matter from the negative point of view,<sup>121</sup> declared that ‘private rights acquired under existing law do not cease on a change of sovereignty...It can hardly be maintained that, although the law survived, private rights acquired under it perished. Such a contention is based on no principle and would be contrary to an almost universal opinion and practice.’<sup>122</sup> The International Court of Justice in the *Corfu Channel* case,<sup>123</sup> when referring to circumstantial evidence, pointed out that ‘this indirect evidence is admitted in all systems of law and its use is recognised by international decisions’. International judicial reference has also been made to the concept of *res judicata*, that is that the decision in the circumstances is final, binding and without appeal.<sup>124</sup>

In the *Administrative Tribunal* case,<sup>125</sup> the Court dealt with the problem of the dismissal of members of the United Nations Secretariat staff and whether the General Assembly had the right to refuse to give effect to awards to them made by the relevant Tribunal. In giving its negative reply, the Court emphasised that:

according to a well-established and generally recognised principle of law, a judgment rendered by such a judicial body is *res judicata* and has binding force between the parties to the dispute.<sup>126</sup>

The question of *res judicata* was discussed in some detail in the *Genocide Convention (Bosnia and Herzegovina v. Serbia and Montenegro)* case,<sup>127</sup> where the issue focused on the meaning of the 1996 decision of the Court rejecting preliminary objections to jurisdiction.<sup>128</sup> The Court emphasised that the principle ‘signifies that the decisions of the Court are not only binding on the parties, but are final, in the sense that they cannot be reopened by the parties as regards the issues that have been determined, save by procedures, of an exceptional nature, specially laid down for that purpose. That principle signifies that the decisions of the Court are not only binding on the parties, but are final, in the sense that they cannot be reopened by the parties as regards the issues that have been determined, save by procedures, of an exceptional nature, specially laid down for that purpose.’<sup>129</sup> The Court noted that two purposes, one general and one specific, underpinned the principle of *res judicata*, internationally as well as nationally. The first referred to the stability of legal relations that requires that litigation come to an end. The second was that it is

in the interest of each party that an issue which has already been adjudicated in favour of that party not be argued again. It was emphasised that depriving a litigant of the benefit of a judgment it had already obtained must in general be seen as a breach of the principles governing the legal settlement of disputes. The Court noted that the principle applied equally to preliminary objections judgments and merits judgments and that since jurisdiction had been established by virtue of the 1996 judgment, it was not open to a party to assert in current proceedings that, at the date the earlier judgment was given, the Court had no power to give it, because one of the parties could now be seen to have been unable to come before it. This would be to call in question the force as *res judicata* of the operative clause of the judgment.<sup>130</sup>

Further, the Court in the preliminary objections phase of the *Right of Passage* case<sup>131</sup> stated that:

it is a rule of law generally accepted, as well as one acted upon in the past by the Court, that, once the Court has been validly seized of a dispute, unilateral action by the respondent state in terminating its Declaration [i.e. accepting the jurisdiction of the Court], in whole or in part, cannot divest the Court of jurisdiction.

The Court has also considered the principle of estoppel which provides that a party that has acquiesced in a particular situation cannot then proceed to challenge it. In the *Temple* case<sup>132</sup> the International Court of Justice applied the doctrine, but in the *Serbian Loans* case<sup>133</sup> in 1929, in which French bondholders were demanding payment in gold francs as against paper money upon a series of Serbian loans, the Court declared the principle inapplicable.

As the International Court noted in the *ELSI* case,<sup>134</sup> there were limitations upon the process of inferring an estoppel in all circumstances, since ‘although it cannot be excluded that an estoppel could in certain circumstances arise from a silence when something ought to have been said, there are obvious difficulties in constructing an estoppel from a mere failure to mention a matter at a particular point in somewhat desultory diplomatic exchanges’.<sup>135</sup> The meaning of estoppel was confirmed in *Cameroon v. Nigeria*,<sup>136</sup> where the Court emphasised that ‘An estoppel would only arise if by its acts or declarations Cameroon had consistently made it fully clear that it had agreed to settle the boundary dispute submitted to the Court by bilateral avenues alone. It would further be necessary that, by relying on such an attitude, Nigeria had changed position to its own detriment or had suffered some prejudice.’

Another example of a general principle was provided by the Arbitration Tribunal in the *AMCO v. Republic of Indonesia* case,<sup>137</sup> where it was stated that ‘the full

compensation of prejudice, by awarding to the injured party the *damnum emergens* and *lucrum cessans* is a principle common to the main systems of municipal law, and therefore, a general principle of law which may be considered as a source of international law'. Another principle would be that of respect for acquired rights.<sup>138</sup> One crucial general principle of international law is that of *pacta sunt servanda*, or the idea that international agreements are binding. The law of treaties rests inexorably upon this principle since the whole concept of binding international agreements can only rest upon the presupposition that such instruments are commonly accepted as possessing that quality.<sup>139</sup>

Perhaps the most important general principle, underpinning many international legal rules, is that of good faith.<sup>140</sup> This principle is enshrined in the United Nations Charter, which provides in article 2(2) that 'all Members, in order to ensure to all of them the rights and benefits resulting from membership, shall fulfil in good faith the obligations assumed by them in accordance with the present Charter', and the elaboration of this provision in the Declaration on Principles of International Law Concerning Friendly Relations and Co-operation among States adopted by the General Assembly in resolution 2625 (XXV), 1970, referred to the obligations upon states to fulfil in good faith their obligations resulting from international law generally, including treaties. It therefore constitutes an indispensable part of the rules of international law generally.<sup>141</sup>

The International Court declared in the *Nuclear Tests* cases<sup>142</sup> that:

One of the basic principles governing the creation and performance of legal obligations, whatever their source, is the principle of good faith. Trust and confidence are inherent in international co-operation, in particular in an age when this co-operation in many fields is becoming increasingly essential. Just as the very rule of *pacta sunt servanda* in the law of treaties is based on good faith, so also is the binding character of an international obligation assumed by unilateral obligation.

Nevertheless, the Court has made the point that good faith as a concept is 'not in itself a source of obligation where none would otherwise exist'.<sup>143</sup> The principle of good faith, therefore, is a background principle informing and shaping the observance of existing rules of international law and in addition constraining the manner in which those rules may legitimately be exercised.<sup>144</sup> As the International Court has noted, the principle of good faith relates 'only to the fulfilment of existing obligations'.<sup>145</sup> A further principle to be noted is that of *ex injuria jus non oritur*, which posits that facts flowing from wrongful conduct cannot determine the law.<sup>146</sup>

Thus it follows that it is the Court which has the discretion as to which principles of law to apply in the circumstances of the particular case under consideration, and it will do this upon the basis of the inability of customary and treaty law to provide the required solution. In this context, one must consider the *Barcelona Traction* case<sup>147</sup> between Belgium and Spain. The International Court of Justice relied heavily upon the municipal law concept of the limited liability company and emphasised that if the Court were to decide the case in disregard of the relevant institutions of municipal law it would, without justification, invite serious legal difficulties. It would lose touch with reality, for there are no corresponding institutions of international law to which the Court could resort.<sup>148</sup>

However, international law did not refer to the municipal law of a particular state, but rather to the rules generally accepted by municipal legal systems which, in this case, recognise the idea of the limited company.<sup>149</sup>

## Equity and international law<sup>150</sup>

Apart from the recourse to the procedures and institutions of municipal legal systems to reinforce international law, it is also possible to see in a number of cases references to equity<sup>151</sup> as a set of principles constituting the values of the system. The most famous decision on these lines was that of Judge Hudson in the *Diversion of Water from the Meuse* case<sup>152</sup> in 1937 regarding a dispute between Holland and Belgium. Hudson pointed out that what are regarded as principles of equity have long been treated as part of international law and applied by the courts. ‘Under article 38 of the Statute’, he declared, ‘if not independently of that article, the Court has some freedom to consider principles of equity as part of the international law which it must apply.’ However, one must be very cautious in interpreting this, although on the broadest level it is possible to see equity (on an analogy with domestic law) as constituting a creative charge in legal development, producing the dynamic changes in the system rendered inflexible by the strict application of rules.<sup>153</sup>

The concept of equity<sup>154</sup> has been referred to in several cases. In the *Rann of Kutch Arbitration* between India and Pakistan in 1968<sup>155</sup> the Tribunal agreed that equity formed part of international law and that accordingly the parties could rely on such principles in the presentation of their cases.<sup>156</sup> The International Court of Justice in the *North Sea Continental Shelf* cases directed a final delimitation between the parties – West Germany, Holland and Denmark – ‘in accordance with equitable principles’<sup>157</sup> and discussed the relevance to equity in its consideration of the *Barcelona Traction* case.<sup>158</sup> Judge Tanaka, however, has argued for a wider

interpretation in his Dissenting Opinion in the Second Phase of the *South-West Africa* cases<sup>159</sup> and has treated the broad concept as a source of human rights ideas.<sup>160</sup>

However, what is really in question here is the use of equitable principles in the context of a rule requiring such an approach. The relevant courts are not applying principles of abstract justice to the cases,<sup>161</sup> but rather deriving equitable principles and solutions from the applicable law.<sup>162</sup> The Court declared in the *Libya/Malta* case<sup>163</sup> that ‘the justice of which equity is an emanation, is not an abstract justice but justice according to the rule of law; which is to say that its application should display consistency and a degree of predictability; even though it also looks beyond it to principles of more general application’.

Equity has been used by the courts as a way of mitigating certain inequities, not as a method of refashioning nature to the detriment of legal rules.<sup>164</sup> Its existence, therefore, as a separate and distinct source of law is at best highly controversial. As the International Court noted in the *Tunisia/Libya Continental Shelf* case,<sup>165</sup>

it is bound to apply equitable principles as part of international law, and to balance up the various considerations which it regards as relevant in order to produce an equitable result. While it is clear that no rigid rules exist as to the exact weight to be attached to each element in the case, this is very far from being an exercise of discretion or conciliation; nor is it an operation of distributive justice.<sup>166</sup>

The use of equitable principles, however, has been particularly marked in the 1982 Law of the Sea Convention. Article 59, for example, provides that conflicts between coastal and other states regarding the exclusive economic zone are to be resolved ‘on the basis of equity’, while by article 74 delimitation of the zone between states with opposite or adjacent coasts is to be effected by agreement on the basis of international law in order to achieve an equitable solution. A similar provision applies by article 83 to the delimitation of the continental shelf.<sup>167</sup> These provisions possess flexibility, which is important, but are also somewhat uncertain. Precisely how any particular dispute may be resolved, and the way in which that is likely to happen and the principles to be used are far from clear and an element of unpredictability may have been introduced.<sup>168</sup> The Convention on the Law of the Non-Navigational Uses of International Watercourses, 1997,<sup>169</sup> also lays great emphasis upon the concept of equity. Article 5, for example, provides that watercourse states shall utilise an international watercourse in an equitable and reasonable manner both in their own territories and in participating generally in the use, development and protection of such a watercourse.

Equity may also be used in certain situations in the delimitation of non-maritime boundaries. Where there is no evidence as to where a boundary line lies, an international tribunal may resort to equity. In the case of *Burkina Faso/Republic of Mali*,<sup>170</sup> for example, the Court noted with regard to the pool of Soum, that ‘it must recognise that Soum is a frontier pool; and that in the absence of any precise indication in the texts of the position of the frontier line, the line should divide the pool of Soum in an equitable manner’. This would be done by dividing the pool equally. Although equity did not always mean equality, where there are no special circumstances the latter is generally the best expression of the former.<sup>171</sup> The Court also emphasised that ‘to resort to the concept of equity in order to modify an established frontier would be quite unjustified’.<sup>172</sup>

Although generalised principles or concepts that may be termed community value-judgements inform and pervade the political and therefore the legal orders in the broadest sense, they do not themselves constitute as such binding legal norms. This can only happen if they have been accepted as legal norms by the international community through the mechanisms and techniques of international law creation. Nevertheless, ‘elementary principles of humanity’ may lie at the base of such norms and help justify their existence in the broadest sense, and may indeed perform a valuable role in endowing such norms with an additional force within the system. The International Court has, for example, emphasised in the *Legality of the Threat or Use of Nuclear Weapons* Advisory Opinion<sup>173</sup> that at the heart of the rules and principles concerning international humanitarian law lies the ‘overriding consideration of humanity’.

## **Judicial decisions**<sup>174</sup>

Although these are, in the words of article 38, to be utilised as a subsidiary means for the determination of rules of law rather than as an actual source of law, judicial decisions can be of immense importance. While by virtue of article 59 of the Statute of the International Court of Justice the decisions of the Court have no binding force except as between the parties and in respect of the case under consideration, the Court has striven to follow its previous judgments and insert a measure of certainty within the process: so that while the doctrine of precedent as it is known in the common law, whereby the rulings of certain courts must be followed by other courts, does not exist in international law, one still finds that states in disputes and textbook writers quote judgments of the Permanent Court and the International Court of Justice as authoritative decisions.

The International Court of Justice itself will closely examine its previous

decisions and will carefully distinguish those cases which it feels should not be applied to the problem being studied.<sup>175</sup> But just as English judges, for example, create law in the process of interpreting it, so the judges of the International Court of Justice sometimes do a little more than merely ‘determine’ it. One of the most outstanding instances of this occurred in the *Anglo-Norwegian Fisheries* case,<sup>176</sup> with its statement of the criteria for the recognition of baselines from which to measure the territorial sea, which was later enshrined in the 1958 Geneva Convention on the Territorial Sea and Contiguous Zone.

Other examples include the *Reparation* case,<sup>177</sup> which recognised the legal personality of international institutions in certain cases, the *Genocide* case,<sup>178</sup> which dealt with reservations to treaties, the *Nottebohm* case,<sup>179</sup> which considered the role and characteristics of nationality and the range of cases concerning maritime delimitation.<sup>180</sup>

Of course, it does not follow that a decision of the Court will be invariably accepted in later discussions and formulations of the law. One example of this is part of the decision in the *Lotus* case,<sup>181</sup> which was criticised and later abandoned in the Geneva Conventions on the Law of the Sea. But this is comparatively unusual and the practice of the Court is to examine its own relevant case-law with considerable attention and to depart from it rarely.<sup>182</sup> At the very least, it will constitute the starting point of analysis, so that, for example, the Court noted in the *Cameroon v. Nigeria* case that ‘the real question is whether, in this case, there is cause not to follow the reasoning and conclusion of earlier cases’.<sup>183</sup>

In addition to the Permanent Court and the International Court of Justice, the phrase ‘judicial decisions’ also encompasses international arbitral awards and the rulings of national courts. There have been many international arbitral tribunals, such as the Permanent Court of Arbitration created by the Hague Conferences of 1899 and 1907 and the various mixed-claims tribunals, including the Iran–US Claims Tribunal, and, although they differ from the international courts in some ways, many of their decisions have been extremely significant in the development of international law. This can be seen in the existence and number of the Reports of International Arbitral Awards published since 1948 by the United Nations.

One leading example is the *Alabama Claims* arbitration,<sup>184</sup> which marked the opening of a new era in the peaceful settlement of international disputes, in which increasing use was made of judicial and arbitration methods in resolving conflicts. This case involved a vessel built on Merseyside to the specifications of the Confederate States, which succeeded in capturing some seventy Federal ships during the American Civil War. The United States sought compensation after the war for the depredations of the *Alabama* and other ships and this was accepted by the

Tribunal. Britain had infringed the rules of neutrality and was accordingly obliged to pay damages to the United States. Another illustration of the impact of arbitral awards is the *Island of Palmas* case<sup>185</sup> which has proved of immense significance to the subject of territorial sovereignty and will be discussed in chapter 10. In addition, the growing significance of the case-law of the International Criminal Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda needs to be noted.<sup>186</sup> As a consequence, it is not rare for international courts of one type or another to cite each other's decisions, sometimes as support<sup>187</sup> and sometimes to disagree.<sup>188</sup>

As has already been seen, the decisions of municipal courts<sup>189</sup> may provide evidence of the existence of a customary rule. They may also constitute evidence of the actual practice of states which, while not a description of the law as it has been held to apply, nevertheless affords examples of how states actually behave, in other words the essence of the material act which is so necessary in establishing a rule of customary law.<sup>190</sup> British and American writers, in particular, tend to refer fairly extensively to decisions of national courts.

One may, finally, also point to decisions by the highest courts of federal states, like Switzerland and the United States, in their resolution of conflicts between the component units of such countries, as relevant to the development of international law rules in such fields as boundary disputes. A boundary disagreement between two US states which is settled by the Supreme Court is in many ways analogous to the International Court of Justice considering a frontier dispute between two independent states, and as such provides valuable material for international law.<sup>191</sup>

## Writers<sup>192</sup>

Article 38 includes as a subsidiary means for the determination of rules of law, 'the teachings of the most highly qualified publicists of the various nations'.

Historically, of course, the influence of academic writers on the development of international law has been marked. In the heyday of Natural Law it was analyses and juristic opinions that were crucial, while the role of state practice and court decisions was of less value. Writers such as Gentili, Grotius, Pufendorf, Bynkershoek and Vattel were the supreme authorities of the sixteenth to eighteenth centuries and determined the scope, form and content of international law.<sup>193</sup>

With the rise of positivism and the consequent emphasis upon state sovereignty, treaties and custom assumed the dominant position in the exposition of the rules of the international system, and the importance of legalistic writings began to decline. Thus, one finds that textbooks are used as a method of discovering what the law is

on any particular point rather than as the fount or source of actual rules. There are still some writers who have had a formative impact upon the evolution of particular laws, for example Gidel on the law of the sea,<sup>194</sup> and others whose general works on international law tend to be referred to virtually as classics, for example Oppenheim and Rousseau, but the general influence of textbook writers has somewhat declined.

Nevertheless, books are important as a way of arranging and putting into focus the structure and form of international law and of elucidating the nature, history and practice of the rules of law. Academic writings also have a useful role to play in stimulating thought about the values and aims of international law as well as pointing out the defects that exist within the system, and making suggestions as to the future.

Because of the lack of supreme authorities and institutions in the international legal order, the responsibility is all the greater upon the publicists of the various nations to inject an element of coherence and order into the subject as well as to question the direction and purposes of the rules.

States in their presentation of claims, national law officials in their opinions to their governments, the various international judicial and arbitral bodies in considering their decisions, and the judges of municipal courts when the need arises, all consult and quote the writings of the leading juristic authorities.

Of course, the claim can be made, and often is, that textbook writers merely reflect and reinforce national prejudices,<sup>195</sup> but it is an allegation which has been exaggerated. It should not lead us to dismiss the value of writers, but rather to assess correctly the writer within his particular environment.

## **Other possible sources of international law**

In the discussion of the various sources of law prescribed by the Statute of the International Court of Justice, it might have been noted that there is a distinction between, on the one hand, actual sources of rules, that is those devices capable of instituting new rules such as law-making treaties, customary law and many decisions of the International Court of Justice since they cannot be confined to the category of merely determining or elucidating the law, and on the other hand those practices and devices which afford evidence of the existence of rules, such as juristic writings, many treaty-contracts and some judicial decisions both at the international and municipal level. In fact, each source is capable, to some extent, of both developing new law and identifying existing law. This results partly from the disorganised state of international law and partly from the terms of article 38 itself.

A similar confusion between law-making, law-determining and law-evidencing

can be discerned in the discussion of the various other methods of developing law that have emerged since the conclusion of the Second World War. Foremost among the issues that have arisen and one that reflects the growth in the importance of the Third World states and the gradual de-Europeanisation of the world order is the question of the standing of the resolutions and declarations of the General Assembly of the United Nations.<sup>196</sup>

Unlike the UN Security Council, which has the competence to adopt resolutions under articles 24 and 25 of the UN Charter binding on all member states of the organisation,<sup>197</sup> resolutions of the Assembly are generally not legally binding and are merely recommendatory, putting forward opinions on various issues with varying degrees of majority support.<sup>198</sup> This is the classic position and reflects the intention that the Assembly was to be basically a parliamentary advisory body with the binding decisions being taken by the Security Council.

Nowadays, the situation is somewhat more complex. The Assembly has produced a great number of highly important resolutions and declarations and it was inevitable that these should have some impact upon the direction adopted by modern international law. The way states vote in the General Assembly and the explanations given upon such occasions constitute evidence of state practice and state understanding as to the law. Where a particular country has consistently voted in favour of, for example, the abolition of apartheid, it could not afterwards deny the existence of a usage condemning racial discrimination and it may even be that that usage is for that state converted into a binding custom.

The Court in the *Nicaragua* case tentatively expressed the view that the *opinio juris* requirement could be derived from the circumstances surrounding the adoption and application of a General Assembly resolution. It noted that the relevant

*opinio juris* may, though with all due caution, be deduced from, *inter alia*, the attitude of the Parties [i.e. the US and Nicaragua] and the attitude of States towards certain General Assembly resolutions, and particularly resolution 2625 (XXV) entitled 'Declaration on Principles of International Law concerning Friendly Relations and Co-operation among States in accordance with the Charter of the United Nations'.<sup>199</sup>

The effect of consent to resolutions such as this one 'may be understood as acceptance of the validity of the rule or set of rules declared by the resolution by themselves'.<sup>200</sup> This comment, however, may well have referred solely to the situation where the resolution in question defines or elucidates an existing treaty (i.e. Charter) commitment.

Where the vast majority of states consistently vote for resolutions and declarations on a topic, that amounts to a state practice and a binding rule may very well emerge provided that the requisite *opinio juris* can be proved. For example, the 1960 Declaration on the Granting of Independence to Colonial Countries and Peoples, which was adopted with no opposition and only nine abstentions and followed a series of resolutions in general and specific terms attacking colonialism and calling for the self-determination of the remaining colonies, has, it would seem, marked the transmutation of the concept of self-determination from a political and moral principle to a legal right and consequent obligation, particularly taken in conjunction with the 1970 Declaration on Principles of International Law.<sup>201</sup>

Declarations such as that on the Legal Principles Governing Activities of States in the Exploration and Use of Outer Space (1963) can also be regarded as examples of state practices which are leading to, or have led to, a binding rule of customary law. As well as constituting state practice, it may be possible to use such resolutions as evidence of the existence of or evolution towards an *opinio juris* without which a custom cannot arise. Apart from that, resolutions can be understood as authoritative interpretations by the Assembly of the various principles of the United Nations Charter depending on the circumstances.<sup>202</sup>

Accordingly, such resolutions are able to speed up the process of the legalisation of a state practice and thus enable a speedier adaptation of customary law to the conditions of modern life. The presence of representatives of virtually all of the states of the world in the General Assembly enormously enhances the value of that organ in general political terms and in terms of the generation of state practice that may or may not lead to binding custom. As the International Court noted, for example, in the *Nicaragua* case,<sup>203</sup> ‘the wording of certain General Assembly declarations adopted by states demonstrates their recognition of the principle of the prohibition of force as definitely a matter of customary international law’. The Court put the issue the following way in the *Legality of the Threat or Use of Nuclear Weapons* Advisory Opinion:<sup>204</sup>

The Court notes that General Assembly resolutions, even if they are not binding, may sometimes have normative value. They can, in certain circumstances, provide evidence important for establishing the existence of a rule or the emergence of an *opinio juris*. To establish whether this is true of a General Assembly resolution, it is necessary to look at its content and the conditions of its adoption; it is also necessary to see whether an *opinio juris* exists as to its normative character. Or a series of resolutions may show the gradual evolution of the *opinio juris* required for the establishment of a new rule.

The Court in this case examined a series of General Assembly resolutions concerning the legality of nuclear weapons and noted that several of them had been adopted with substantial numbers of negative votes and abstentions. It was also pointed out that the focus of such resolutions had not always been constant. The Court therefore concluded that these resolutions fell short of establishing the existence of an *opinio juris* on the illegality of nuclear weapons.<sup>205</sup>

Nevertheless, one must be alive to the dangers in ascribing legal value to everything that emanates from the Assembly. Resolutions are often the results of political compromises and arrangements and, comprehended in that sense, never intended to constitute binding norms. Great care must be taken in moving from a plethora of practice to the identification of legal norms.

As far as the practice of other international organisations is concerned,<sup>206</sup> the same approach, but necessarily tempered with a little more caution, may be adopted. Resolutions may evidence an existing custom or constitute usage that may lead to the creation of a custom and the *opinio juris* requirement may similarly emerge from the surrounding circumstances, although care must be exercised here.<sup>207</sup>

It is sometimes argued more generally that particular non-binding instruments or documents or non-binding provisions in treaties form a special category that may be termed 'soft law'. This terminology is meant to indicate that the instrument or provision in question is not of itself 'law', but its importance within the general framework of international legal development is such that particular attention requires to be paid to it.<sup>208</sup> 'Soft law' is not law. That needs to be emphasised, but a document, for example, does not need to constitute a binding treaty before it can exercise an influence in international politics. The Helsinki Final Act of 1975 is a prime example of this. This was not a binding agreement, but its influence in Central and Eastern Europe in emphasising the role and importance of international human rights proved incalculable.<sup>209</sup> Certain areas of international law have generated more 'soft law', in the sense of the production of important but non-binding instruments, than others. Here one may cite particularly international economic law<sup>210</sup> and international environmental law.<sup>211</sup> The use of such documents, whether termed, for example, recommendations, guidelines, codes of practice or standards, is significant in signalling the evolution and establishment of guidelines, which may ultimately be converted into legally binding rules. This may be accomplished either by formalisation into a binding treaty or by acceptance as a customary rule, provided that the necessary conditions have been fulfilled. The propositions of 'soft law' are important and influential, but do not in themselves constitute legal norms. In many cases, it may be advantageous for states to reach agreements with each other or through international organisations which are not intended to be binding and thus

subject to formal legal implementation, but which reflect a political intention to act in a certain way. Such agreements may be more flexible, easier to conclude and easier to adhere to for domestic reasons.

A study by the US State Department concerning non-binding international agreements between states<sup>212</sup> noted that

it has long been recognised in international practice that governments may agree on joint statements of policy or intention that do not establish legal obligations. In recent decades, this has become a common means of announcing the results of diplomatic exchanges, stating common positions on policy issues, recording their intended course of action on matters of mutual concern, or making political commitments to one another. These documents are sometimes referred to as non-binding agreements, gentlemen's agreements, joint statements or declarations.

What is determinative as to status in such situations is not the title given to the document in question, but the intention of the parties as inferred from all the relevant circumstances as to whether they intended to create binding legal relationships between themselves on the matter in question.

## **The International Law Commission**

The International Law Commission was established by the General Assembly in 1947 with the declared object of promoting the progressive development of international law and its codification.<sup>213</sup> It consists of thirty-four members from Africa, Asia, America and Europe, who remain in office for five years each and who are appointed from lists submitted by national governments. The Commission is aided in its deliberations by consultations with various outside bodies including the Asian–African Legal Consultative Committee, the European Commission on Legal Cooperation and the Inter-American Council of Jurists.<sup>214</sup>

Many of the most important international conventions have grown out of the Commission's work. Having decided upon a topic, the International Law Commission will prepare a draft. This is submitted to the various states for their comments and is usually followed by an international conference convened by the United Nations. Eventually a treaty will emerge. This procedure was followed in such international conventions as those on the Law of the Sea in 1958, Diplomatic Relations in 1961, Consular Relations in 1963, Special Missions in 1969 and the Law of Treaties in 1969. Of course, this smooth operation does not invariably occur – witness the many conferences at Caracas in 1974, and Geneva and New York from

1975 to 1982, necessary to produce a new Convention on the Law of the Sea.

Apart from preparing such drafts, the International Law Commission also issues reports and studies, and has formulated such documents as the Draft Declaration on Rights and Duties of States of 1949 and the Principles of International Law recognised in the Charter of the Nuremberg Tribunal and in the Judgment of the Tribunal of 1950. The Commission produced a set of draft articles on the problems of jurisdictional immunities in 1991, a draft statute for an international criminal court in 1994 and a set of draft articles on state responsibility in 2001. The drafts of the ILC are often referred to in the judgments of the International Court of Justice. Indeed, in his speech to the UN General Assembly in 1997, President Schwebel noted in referring to the decision in the *Gabčíkovo–Nagymaros Project* case<sup>215</sup> that the judgment:

is notable, moreover, because of the breadth and depth of the importance given in it to the work product of the International Law Commission. The Court's Judgment not only draws on treaties concluded pursuant to the Commission's proceedings: those on the law of treaties, of State succession in respect of treaties, and the law of international watercourses. It gives great weight to some of the Commission's *Draft Articles on State Responsibility*, as did both Hungary and Slovakia. This is not wholly exceptional; it rather illustrates the fact that just as the judgments and opinions of the Court have influenced the work of the International Law Commission, so the work of the Commission may influence that of the Court.<sup>216</sup>

Thus, one can see that the International Law Commission is involved in at least two of the major sources of law. Its drafts may form the bases of international treaties which bind those states which have signed and ratified them and which may continue to form part of general international law, and its work is part of the whole range of state practice which can lead to new rules of customary law. Its drafts, indeed, may constitute evidence of custom, contribute to the corpus of usages which may create new law and evidence the *opinio juris*.<sup>217</sup> In addition, it is not to be overlooked that the International Law Commission is a body composed of eminently qualified publicists, including many governmental legal advisers, whose reports and studies may be used as a method of determining what the law actually is, in much the same way as books.

## Other bodies

Although the International Law Commission is by far the most important of the organs for the study and development of the law, there do exist certain other bodies

which are involved in the same mission. The United Nations Commission on International Trade Law (UNCITRAL) and the United Nations Conference on Trade and Development (UNCTAD), for example, are actively increasing the range of international law in the fields of economic, financial and development activities, while temporary organs such as the Committee on the Principles of International Law have been engaged in producing various declarations and statements. Nor can one overlook the tremendous work of the many specialised agencies like the International Labour Organization and the United Nations Educational, Scientific and Cultural Organization (UNESCO), which are constantly developing international law in their respective spheres.

There are also some independent bodies which are actively involved in the field. The International Law Association and the Institut de Droit International are the best known of such organisations which study and stimulate the law of the world community, while the various Harvard Research drafts produced before the Second World War are still of value today.

## **Unilateral acts**

In certain situations, the unilateral acts of states, including statements made by relevant state officials, may give rise to international legal obligations.<sup>218</sup> Such acts might include recognition and protests, which are intended to have legal consequences. Unilateral acts, while not sources of international law as understood in article 38(1) of the Statute of the ICJ, may constitute sources of obligation.<sup>219</sup> For this to happen, the intention to be bound of the state making the declaration in question is crucial, as will be the element of publicity or notoriety.<sup>220</sup> Such intention may be ascertained by way of interpretation of the act, and the principle of good faith plays a crucial role. The International Court has stressed that where states make statements by which their freedom of action is limited, a restrictive interpretation is required.<sup>221</sup> Recognition will be important here in so far as third states are concerned, in order for such an act or statement to be opposable to them. Beyond this, such unilateral statements may be used as evidence of a particular view taken by the state in question.<sup>222</sup>

## **Hierarchy of sources and *jus cogens***<sup>223</sup>

The question of the hierarchy of sources is more complex than appears at first sight. Although there does exist a presumption against normative conflict,<sup>224</sup> international law is not as clear as domestic law in listing the order of constitutional authority<sup>225</sup> and the situation is complicated by the proliferation of international courts and

tribunals existing in a non-hierarchical fashion,<sup>226</sup> as well as the significant expansion of international law, both substantively and procedurally. Judicial decisions and writings clearly have a subordinate function within the hierarchy in view of their description as subsidiary means of law determination in article 38(1) of the statute of the ICJ, while the role of general principles of law as a way of complementing custom and treaty law places that category fairly firmly in third place.<sup>227</sup> The question of priority as between custom and treaty law is more complex.<sup>228</sup> As a general rule, that which is later in time will have priority (*lex posterior derogate priori*). Treaties are usually formulated to replace or codify existing custom,<sup>229</sup> while treaties in turn may themselves fall out of use and be replaced by new customary rules. However, where the same rule appears in both a treaty and a custom, there is no presumption that the latter is subsumed by the former. The two may co-exist.<sup>230</sup> There is in addition a principle to the effect that a special rule prevails over a general rule (*lex specialis derogat legi generali*), so that, for example, treaty rules between states as *lex specialis* would have priority as against general rules of treaty or customary law between the same states,<sup>231</sup> although not if the general rule in question was one of *jus cogens*.<sup>232</sup>

The position is complicated by the existence of norms or obligations deemed to be of a different or higher status than others, whether derived from custom or treaty. These may be obligations *erga omnes* or rules of *jus cogens* (peremptory norms).<sup>233</sup> While there may be significant overlap between these two in terms of the content of rules to which they relate, there is a difference in nature. The former concept concerns the scope of application of the relevant rule, that is the extent to which states as a generality may be subject to the rule in question and may be seen as having a legal interest in the matter.<sup>234</sup> It has, therefore, primarily a procedural focus. Rules of *jus cogens*, on the other hand, are substantive rules recognised to be of a higher status as such. The International Court stated in the *Barcelona Traction* case<sup>235</sup> that there existed an essential distinction between the obligations of a state towards the international community as a whole and those arising vis-à-vis another state in the field of diplomatic protection. By their very nature the former concerned all states and ‘all states can be held to have a legal interest in their protection; they are obligations *erga omnes*’. Examples of such obligations included the outlawing of aggression and of genocide and the protection from slavery and racial discrimination.<sup>236</sup> To this one may add the prohibition of torture.<sup>237</sup> Further, the International Court in the *East Timor* case stressed that the right of peoples to self-determination ‘has an *erga omnes* character’,<sup>238</sup> while reiterating in the *Genocide Convention (Bosnia v. Serbia)* case that ‘the rights and obligations enshrined in the Convention are rights and obligations *erga omnes*’.<sup>239</sup>

This easing of the traditional rules concerning *locus standi* in certain

circumstances with regard to the pursuing of a legal remedy against the alleged offender state may be linked to the separate question of superior principles in international law. Article 53 of the Vienna Convention on the Law of Treaties, 1969, provides that a treaty will be void 'if, at the time of its conclusion, it conflicts with a peremptory norm of general international law'. Further, by article 64, if a new peremptory norm of general international law emerges, any existing treaty which is in conflict with that norm becomes void and terminates. This rule (*jus cogens*) will also apply in the context of customary rules so that no derogation would be permitted to such norms by way of local or special custom.

Such a peremptory norm is defined by the Convention as one 'accepted and recognised by the international community of states as a whole as a norm from which no derogation is permitted and which can be modified only by a subsequent norm of general international law having the same character'.<sup>240</sup> The concept of *jus cogens* is based upon an acceptance of fundamental and superior values within the system and in some respects is akin to the notion of public order or public policy in domestic legal orders.<sup>241</sup> It also reflects the influence of Natural Law thinking. Rules of *jus cogens* are not new rules of international law as such. It is a question rather of a particular and superior quality that is recognised as adhering in existing rules of international law. Various examples of rules of *jus cogens* have been provided, particularly during the discussions on the topic in the International Law Commission, such as an unlawful use of force, genocide, slave trading and piracy.<sup>242</sup> The International Court has stated that in its opinion the prohibition of torture had become a peremptory norm.<sup>243</sup> However, no clear agreement has been manifested regarding other areas,<sup>244</sup> and even the examples given are by no means uncontroverted. Nevertheless, the rise of individual responsibility directly for international crimes marks a further step in the development of *jus cogens* rules. Of particular importance, however, is the identification of the mechanism by which rules of *jus cogens* may be created, since once created no derogation is permitted.

A two-stage approach is here involved in the light of article 53: first, the establishment of the proposition as a rule of general international law and, secondly, the acceptance of that rule as a peremptory norm by the international law community of states as a whole. It will be seen therefore that a stringent process is involved, and rightly so, for the establishment of a higher level of binding rules has serious implications for the international law community. The situation to be avoided is that of foisting peremptory norms upon a political or ideological minority, for that in the long run would devalue the concept. The appropriate test would thus require universal acceptance of the proposition as a legal rule by states and recognition of it as a rule of *jus cogens* by an overwhelming majority of states, crossing ideological and political divides.<sup>245</sup> It is also clear that only rules based on

custom or treaties may form the foundation of *jus cogens* norms. This is particularly so in view of the hostile attitude of many states to general principles as an independent source of international law and the universality requirement of *jus cogens* formation. As article 53 of the Vienna Convention notes, a treaty that is contrary to an existing rule of *jus cogens* is void *ab initio*,<sup>246</sup> whereas by virtue of article 64 an existing treaty that conflicts with an emergent rule of *jus cogens* terminates from the date of the emergence of the rule. It is not void *ab initio*, nor by article 71 is any right, obligation or legal situation created by the treaty prior to its termination affected, provided that its maintenance is not in itself contrary to the new peremptory norm. Article 41(2) of the ILC's Articles on State Responsibility, 2001, provides that no state shall recognise as lawful a 'serious breach' of a peremptory norm.<sup>247</sup> Reservations that offended a rule of *jus cogens* may well be unlawful,<sup>248</sup> while it has been suggested that state conduct violating a rule of *jus cogens* may not attract a claim of state immunity.<sup>249</sup> The relationship between the rules of *jus cogens* and article 103 of the United Nations Charter, which states that obligations under the Charter have precedence as against obligations under other international agreements, was discussed by Judge Lauterpacht in his Separate Opinion in the *Bosnia* case.<sup>250</sup> He noted in particular that 'the relief which article 103 of the Charter may give the Security Council in case of conflict between one of its decisions and an operative treaty obligation cannot – as a matter of simple hierarchy of norms – extend to a conflict between a Security Council resolution and *jus cogens*'.

It is also to be emphasised that the establishment of a rule of *jus cogens* does not as such grant jurisdiction to the International Court (or any other court, of course). The status of a rule, whether or not a rule *erga omnes*, is a separate question from that of consent to the exercise of jurisdiction.<sup>251</sup>

- <sup>35</sup> See e.g. Tunkin, *Theory of International Law*, pp. 116–17. But cf. D'Amato, *Concept of Custom*, pp. 61–3 and 88–9.

<sup>36</sup> PCIJ, Series A, No. 10, 1927, p. 18; 4 AD, p. 153.

<sup>37</sup> See e.g. Pellet, 'Article 38', p. 815, and *Congo v. Belgium*, ICJ Reports, 2002, pp. 3, 23–4; 128 ILR, pp. 60, 78–80. Note that in *Germany v Italy*, ICJ Reports, 2012, pp. 99, 123, in the context of jurisdictional immunities, the court declared that, 'state practice of particular significance is to be found in the judgments of national courts faced with the question whether a foreign state is immune, the legislation of those states which have enacted statutes dealing with immunity, the claims to immunity advanced by states before foreign courts and the statements made by states'.

<sup>38</sup> See e.g. *Yearbook of the ILC*, 1950, vol. II, pp. 368–72, and the *Interhandel* case, ICJ Reports, 1959, p. 27. Note also Brierly's comment that not all contentions put forward on behalf of a state represent that state's settled or impartial opinion, *The Law of Nations*, 6th edn, Oxford, 1963, p. 60. See also Akehurst, 'Custom as a Source', p. 2.

<sup>39</sup> The United States has produced an extensive series of publications covering its practice in international law. See the Digests of International Law produced by Wharton (1887), Moore (1906) and Whiteman (1963–70). From 1973 to 1980 an annual *Digest of US Practice in International Law* has been produced, while three composite volumes covering the years 1981–8 have appeared. The series resumed with effect from the year 2000. See also H. A. Smith, *Great Britain and the Law of Nations*, London, 2 vols., 1932–5; A. D. McNair, *International Law Opinions*, Cambridge, 3 vols., 1956; C. Parry, *British Digest of International Law*, London, 1965, and E. Lauterpacht, *British Practice in International Law*, London, 1963–7. Several yearbooks now produce sections devoted to national practice, e.g. *British Yearbook of International Law* and *Annuaire Français de Droit International*

<sup>40</sup> The *Reparation* case, ICJ Reports, 1949, p. 174; 16 AD, p. 318. See also the *Reservations to the Genocide Convention* case, ICJ Reports, 1951, pp. 15, 25; 18 ILR, p. 364.

<sup>41</sup> *Yearbook of the ILC*, 1950, vol. II, pp. 368–72. See also Akehurst, 'Custom as a Source', p. 12.

<sup>42</sup> See the Court's advisory opinion in the *Construction of a Wall* case, ICJ Reports, 2004, pp. 136, 171; 129 ILR, pp. 37, 89–90.

<sup>43</sup> 14 Wallace 170 (1871). See also the *Nottebohm* case, ICJ Reports, 1955, pp. 4, 22; 22 ILR, p. 349, and the *Paquete Habana* case, 175 US 677 (1900).

<sup>44</sup> D'Amato, *Concept of Custom*, pp. 88 and 50–1. See also Judge Read (dissenting), the *Anglo-Norwegian Fisheries* case, ICJ Reports, 1951, pp. 116, 191; 18 ILR, pp. 86, 132.

<sup>45</sup> Akehurst, 'Custom as a Source', pp. 2–3. See also Thirlway, *International Customary Law*, p. 58.

<sup>46</sup> E.g. the *Asylum* case, ICJ Reports, 1950, pp. 266, 277; 17 ILR, p. 280; the *Rights of US Nationals in Morocco* case, ICJ Reports, 1952, pp. 176, 200, 209; 19 ILR, p. 255, and the *North Sea Continental Shelf* cases, ICJ Reports, 1969, pp. 3, 32–3, 47 and 53; 41 ILR, p. 29. See also the *Fisheries Jurisdiction* cases, ICJ Reports, 1974, pp. 3, 47, 56–8, 81–8, 119–20, 135 and 161; 55 ILR, p. 238.

<sup>47</sup> But see Thirlway, *International Customary Law*, pp. 58–9.

<sup>48</sup> Akehurst, 'Custom as a Source', p. 10. This would also include omissions and silence by states: *ibid.*

<sup>49</sup> *Ibid.*, pp. 31–42, and D'Amato, *Concept of Custom*, pp. 66–72. See also Pellet, 'Article 38', p. 818; Mendelson, 'Formation', p. 245; Bos, *Methodology*, pp. 236 ff.; P. Haggemacher, 'Des Deux Éléments du Droit Coutumier dans la Pratique de la Cour Internationale', 91 *Revue Générale de Droit International Public*, 1985, p. 5; O. Elias, 'The Nature of the Subjective Element in Customary International Law', 44 *ICLQ*, 1995, p. 501; I. M. Lobo de Souza, 'The Role of State Consent in the Customary Process', 44 *ICLQ*, 1995, p. 521, and B. Cheng, 'Opinio Juris: A Key Concept in International Law that is Much Misunderstood' in *International Law in the Post-Cold War World* (eds. S. Yee and W. Tieya), London, 2001, p. 56.

<sup>50</sup> PCIJ, Series A, No. 10, 1927, p. 18; 4 AD, p. 153.

<sup>51</sup> PCIJ, Series A, No. 10, 1927, p. 28; 4 AD, p. 159.

<sup>52</sup> ICJ Reports, 1969, p. 3; 41 ILR, p. 29.

<sup>53</sup> ICJ Reports, 1969, pp. 32–41.

<sup>54</sup> *Ibid.*, p. 43. See also e.g. the *Asylum* case, ICJ Reports, 1950, pp. 266, 277; 17 ILR, p. 280, and the *Right of Passage* case, ICJ Reports, 1960, pp. 6, 42–3; 31 ILR, pp. 23, 55.

<sup>55</sup> ICJ Reports, 1986, p. 14; 76 ILR, p. 349.

<sup>56</sup> ICJ Reports, 1986, pp. 108–9; 76 ILR, pp. 442–3, citing ICJ Reports, 1969, p. 44; 41 ILR, p. 73.

<sup>57</sup> ICJ Reports, 2012, para. 55.

<sup>58</sup> *Guinea v. Democratic Republic of the Congo (Preliminary Objections)*, ICJ Reports, 2007, pp. 582, 615.

<sup>59</sup> See Akehurst, ‘Custom as a Source’, pp. 32–4 for attempts made to deny or minimise the need for *opinio juris*.

<sup>60</sup> ICJ Reports, 1986, pp. 14, 109; 76 ILR, pp. 349, 443.

<sup>61</sup> ICJ Reports, 1969, pp. 3, 176; 41 ILR, pp. 29, 171. Lauterpacht wrote that one should regard all uniform conduct of governments as evidencing the *opinio juris*, except where the conduct in question was not accompanied by such intention: *The Development of International Law*, p. 580; but cf. Cheng, ‘Custom: The Future’, p. 36, and Cheng, ‘United Nations Resolutions’, pp. 530–2.

<sup>62</sup> Note D’Amato’s view that to become a custom, a practice has to be preceded or accompanied by the ‘articulation’ of a rule, which will put states on notice than an action etc. will have legal implications: *Concept of Custom*, p. 75. Cf. Akehurst, ‘Custom as a Source’, pp. 35–6, who also puts forward his view that ‘the practice of states needs to be accompanied by *statements* that something is already law before it can become law’: such statements need not be beliefs as to the truths of the given

situation, *ibid.*, p. 37. Akehurst also draws a distinction between permissive rules, which do not require express statements as to *opinio juris*, and duty-imposing rules, which do: *ibid.*, pp. 37–8.

<sup>63</sup> See e.g. the *Legality of the Threat or Use of Nuclear Weapons* case, ICJ Reports, 1996, pp. 226, 254–5; 110 ILR, p. 163. See also the *Western Sahara* case, ICJ Reports, 1975, pp. 31–3; the *East Timor* case, ICJ Reports, 1995, pp. 90, 102; 105 ILR, p. 226; the *Nicaragua* case, ICJ Reports, 1986, pp. 14, 100, 101 and 106; 76 ILR, p. 349; and the *Construction of a Wall* case, ICJ Reports, 2004, pp. 136, 171–2; 129 ILR, pp. 37, 89–90.

<sup>64</sup> See the *Nicaragua* case, ICJ Reports, 1986, pp. 14, 99–100.

<sup>65</sup> See e.g. the *North Sea Continental Shelf* cases, ICJ Reports, 1969, pp. 3, 28–32 with regard to the 1958 Continental Shelf Convention and e.g. among many cases, *Cameroon v. Nigeria*, ICJ Reports, 2002, pp. 303, 429–30 with regard to the Vienna Convention on the Law of Treaties, 1969.

<sup>66</sup> See e.g. the *Gabčíkovo–Nagymaros* case, ICJ Reports, 1997, pp. 7, 38–42 and 46; 116 ILR, pp. 1, 47–51 and 55.

<sup>67</sup> See H. Lauterpacht, ‘Sovereignty over Submarine Areas’, 27 BYIL, 1950, p. 376; I. MacGibbon, ‘Some Observations on the Part of Protest in International Law’, 29 BYIL, 1953, p. 293, and MacGibbon, ‘Customary International Law and Acquiescence’, 33 BYIL, 1957, p. 115; Wolfke, *Custom*, pp. 157–65, and I. Sinclair, ‘Estoppel and Acquiescence’ in *Fifty Years of the International Court of Justice* (eds. A. V. Lowe and M. Fitzmaurice), Cambridge, 1996, p. 104. See also more generally N. Antunes, *Estoppel, Acquiescence and Recognition in Territorial and Boundary Dispute Settlement*, Durham, 2000.

<sup>68</sup> See, for a good example, the decision of the International Court in the *El Salvador/Honduras* case, ICJ Reports, 1992, pp. 351, 601; 97 ILR, pp. 266, 517, with regard to the joint sovereignty over the historic waters of the Gulf of Fonseca beyond the territorial sea of the three coastal states.

<sup>69</sup> See e.g. Sinclair, ‘Estoppel and Acquiescence’, p. 104 and below, chapter 10, p. 372.

<sup>70</sup> ICJ Reports, 1984, pp. 246, 305; 71 ILR, p. 74.

<sup>71</sup> Note that the Court has stated that ‘the idea of acquiescence...presupposes freedom of will’, *Burkina Faso/Mali*, ICJ Reports, 1986, pp. 554, 597; 80 ILR, p. 459.

<sup>72</sup> See e.g. *Grand-Duchy of Luxembourg v. Cie. Luxembourgeoise de Télédiffusion*, 91 ILR, pp. 281, 286.

<sup>73</sup> See e.g. MacGibbon, ‘Customary International Law’, p. 131, and H. S. McDougal *et al.*, *Studies in World Public Order*, New Haven, 1960, pp. 763–72.

<sup>74</sup> PCIJ, Series A, No. 10, 1927, p. 28; 4 ILR, p. 159.

<sup>75</sup> ICJ Reports, 1951, p. 116; 18 ILR, p. 86.

<sup>76</sup> ICJ Reports, 1951, p. 131; 18 ILR, p. 93. See also the *North Sea Continental Shelf* cases, ICJ Reports, 1969, pp. 3, 26–7; 41 ILR, pp. 29, 55–6, and the *Asylum* case, ICJ Reports, 1950, pp. 266, 277–8; 17 ILR, pp. 280, 285. See also P. Dumberry, ‘Incoherent and Ineffective: The Concept of the Persistent Objector Revisited’, 55 ICLQ, 2010, p. 779 and C. Quince, *The Persistent Objector and Customary International Law*, Colorado, 2010.

<sup>77</sup> See also protests generally: Akehurst, ‘Custom as a Source’, pp. 38–42.

<sup>78</sup> See below, chapter 11.

<sup>79</sup> See e.g. the *North Sea Continental Shelf* cases, ICJ Reports, 1969, pp. 3, 38, 130; 41 ILR, pp. 29, 67, 137, and *The Third US Restatement of Foreign Relations Law*, St Paul, 1987, vol. I, pp. 25–6. See also T. Stein, ‘The Approach of the Different Drummer: The Principle of the Persistent Objector in International Law’, 26 *Harvard International Law Journal*, 1985, p. 457, and J. Charney, ‘The Persistent Objector Rule and the Development of Customary International Law’, 56 *BYIL*, 1985, p. 1.

<sup>80</sup> See e.g. Tunkin, *Theory of International Law*, p. 129.

<sup>81</sup> *Ibid.*

<sup>82</sup> See Akehurst, 'Custom as a Source', pp. 29–31; Thirlway, 'Supplement', p. 105; Pellet, 'Article 38', p. 829; D'Amato, *Concept of Custom*, chapter 8; G. Cohen-Jonathan, 'La Coutume Locale', AFDI, 1961, p. 133, and Wolfke, *Custom*, pp. 88–90. Local custom is sometimes referred to as regional or special custom.

<sup>83</sup> See e.g. H. Gros Espiel, 'La Doctrine du Droit International en Amérique Latine avant la Première Conférence Panaméricaine', 3 *Journal of the History of International Law*, 2001, p. 1.

<sup>84</sup> Note the claim by Honduras in the *El Salvador/Honduras* case, ICJ Reports, 1992, pp. 351, 597; 97 ILR, pp. 266, 513 that a 'trilateral local custom of the nature of a convention' could establish a condominium arrangement.

<sup>85</sup> See the *Eritrea/Yemen (Maritime Delimitation)* case, 119 ILR, pp. 417, 448.

<sup>86</sup> ICJ Reports, 1950, p. 266; 17 ILR, p. 280.

<sup>87</sup> ICJ Reports, 1950, p. 276; 17 ILR, p. 284.

<sup>88</sup> ICJ Reports, 1960, p. 6; 31 ILR, p. 23.

<sup>89</sup> ICJ Reports, 1960, p. 40; 31 ILR, p. 53. See Wolfke, *Custom*, p. 90.

<sup>90</sup> ICJ Reports, 1960, p. 44.

<sup>91</sup> See Cohen-Jonathan, 'La Coutume Locale'.

<sup>92</sup> See generally A. D. McNair, *The Law of Treaties*, Oxford, 1961; Pellet, 'Article 38', p. 798, and A. Aust, *Modern Treaty Law and Practice*, 2nd edn, Cambridge, 2007. See further below, chapter 16.

<sup>93</sup> *Oppenheim's International Law* emphasises that 'not only is custom the original source of international law, but treaties are a source the validity and modalities of which themselves derive from custom', p. 31.

<sup>94</sup> See e.g. UKMIL, 70 BYIL, 1999, p. 404.

<sup>95</sup> See the Vienna Convention on the Law of Treaties, 1969. Article 2(1)a defines a treaty for the purposes of the Convention as 'an international agreement concluded between states in written form and governed by international law, whether embodied in a single instrument or in two or more related instruments and whatever its particular designation'. See further below, p. 84 with regard to non-binding international agreements.

<sup>96</sup> See Virally, 'Sources', p. 126; Sørensen, *Les Sources*, pp. 58 ff., and Tunkin, *Theory of International Law*, pp. 93–5.

<sup>97</sup> Tunkin, *Theory of International Law*, pp. 91–113. See also R. Müllerson, 'Sources of International Law: New Tendencies in Soviet Thinking', 83 AJIL, 1989, pp. 494, 501–9, and Danilenko, 'Theory', p. 9.

<sup>98</sup> But this may depend upon the attitude of other states. This does not constitute a form of international legislation: see e.g. *Oppenheim's International Law*, p. 32; the *Reparation* case, ICJ Reports, 1949, p. 185; 16 AD, p. 318, and the *Namibia* case, ICJ Reports, 1971, p. 56; 49 ILR, p. 2. See also R. Baxter, 'Treaties and Custom', 129 HR, 1970, p. 27. See also O. Schachter, 'Entangled Treaty and Custom', in *International Law at a Time of Perplexity* (ed. Y. Dinstein), Dordrecht, 1989, p. 717, and Y. Dinstein, 'The Interaction Between Customary International Law and Treaties', 322 HR, 2006, p. 247.

<sup>99</sup> ICJ Reports, 1969, pp. 3, 25; 41 ILR, pp. 29, 54.

<sup>100</sup> ICJ Reports, 1969, pp. 3, 41–2; 41 ILR, p. 71. The Court stressed that this method of creating new customs was not to be lightly regarded as having been attained, *ibid.*

<sup>101</sup> But see the minority opinions, ICJ Reports, 1969, pp. 56, 156–8, 163, 169, 172–

80, 197–200, 221–32 and 241–7; 41 ILR, p. 85. See also the *Gulf of Maine* case, ICJ Reports, 1984, pp. 246, 295; 71 ILR, pp. 74, 122, and the *Libya/Malta Continental Shelf* case, ICJ Reports, 1985, pp. 13, 29–34; 81 ILR, pp. 239, 261–6.

<sup>102</sup> See D’Amato, *Concept of Custom*, p. 104, and D’Amato, ‘The Concept of Human Rights in International Law’, 82 *Columbia Law Review*, 1982, pp. 1110, 1129–47. See also Akehurst, ‘Custom as a Source’, pp. 42–52.

<sup>103</sup> D’Amato, ‘Concept of Human Rights’, p. 1146.

<sup>104</sup> ICJ Reports, 1986, p. 14; 76 ILR, p. 349.

<sup>105</sup> ICJ Reports, 1986, pp. 94–5; 76 ILR, pp. 428–9. See also W. Czaplinski, ‘Sources of International Law in the *Nicaragua* Case’, 38 ICLQ, 1989, p. 151.

<sup>106</sup> ICJ Reports, 1986, p. 96; 76 ILR, p. 430.

<sup>107</sup> See further below, chapter 20, p. 820.

<sup>108</sup> See further below, chapter 16, p. 674.

<sup>109</sup> See further below, p. 498, with regard to extradition treaties and below, p. 608, with regard to bilateral investment treaties.

<sup>110</sup> See e.g. B. Cheng, *General Principles of Law as Applied by International Courts and Tribunals*, London, 1953; A. D. McNair, ‘The General Principles of Law Recognised by Civilised Nations’, 33 BYIL, 1957, p. 1; H. Lauterpacht, *Private Law Sources and Analogies of International Law*, London, 1927; G. Herczegh, *General Principles of Law and the International Legal Order*, Budapest, 1969; O. Schachter, *International Law in Theory and Practice*, Dordrecht, 1991, pp. 50–5; O. Corten, *L’Utilisation du ‘Raisonnable’ par le Juge International*, Brussels, 1997; B. Vitanyi, ‘Les Positions Doctrinales Concernant le Sens de la Notion de “Principes Généraux de Droit Reconnus par les Nations Civilisées”’, 86 *Revue Générale de Droit International Public*, 1982, p. 48; H. Waldock, ‘General Course on Public International Law’, 106 HR, 1962, p. 54; Pellet, ‘Article 38’, p. 832; Thirlway,

‘Supplement’, p. 108; M. Sørensen, ‘Principes de Droit International’, 101 HR, 1960, p. 16, and V. Degan, ‘General Principles of Law’, 3 Finnish YIL, 1992, p. 1. See also G. Gaja, ‘General Principles of Law’, *Max Planck Encyclopaedia of Public International Law*.

**111** Note that the International Court has regarded the terms ‘principles’ and ‘rules’ as essentially the same within international law: the *Gulf of Maine* case, ICJ Reports, 1984, pp. 246, 288–90. Introducing the adjective ‘general’, however, shifts the meaning to a broader concept.

**112** The additional clause relating to recognition by ‘civilised nations’ is regarded today as redundant: see e.g. Pellet, ‘Article 38’, p. 836.

**113** See e.g. J. Stone, *Of Law and Nations*, London, 1974, chapter 3; H. Lauterpacht, ‘Some Observations on the Prohibition of *Non Liqueur* and the Completeness of the Legal Order’, *Symbolae Verzijl*, 1958, p. 196; Pellet, ‘Article 38’, p. 734 and 763; H. <sup>149</sup> See also the *Abyei Award* of 22 July 2009, Permanent Court of Arbitration, at paras. 401 ff, and 416 ff, discussing the general principle of review of judicial decisions. Note also the general principle that the compatibility of an act with international law can be determined only by reference to the law in force at the time when the act occurred (the principle of (intertemporal law)), see *Germany v. Italy (Greece Intervening)*, ICJ Reports, 2012, pp. 99, 124. See also article 13 of the International Law Commission Articles on Responsibility of States for Internationally Wrongful Acts and J. Crawford, *State Responsibility*, Cambridge, 2013, pp. 241 ff.

<sup>150</sup> See M. Akehurst, 'Equity and General Principles of Law', 25 ICLQ, 1976, p. 801; B. Cheng, 'Justice and Equity in International Law', 8 *Current Legal Problems*, 1955, p. 185; V. Degan, *L'Équité et le Droit International*, Paris, 1970; C. de Visscher, *De l'Équité dans le Règlement Arbitral ou Judiciaire des Litiges de Droit International Public*, Paris, 1972; E. Lauterpacht, 'Equity, Evasion, Equivocation and Evolution in International Law', *Proceedings of the American Branch of the ILA*, 1977–8, p. 33, and E. Lauterpacht, *Aspects of the Administration of International Justice*, Cambridge, 1991, pp. 117–52; R. Y. Jennings, 'Equity and Equitable Principles', *Annuaire Suisse de Droit International*, 1986, p. 38; *Oppenheim's International Law*, p. 43; R. Higgins, *Problems and Process*, Oxford, 1994, chapter 13; M. Miyoshi, *Considerations of Equity in the Settlement of Territorial and Boundary Disputes*, The Hague, 1993; S. Rosenne, 'Equitable Principles and the Compulsory Jurisdiction of International Tribunals', *Festschrift für Rudolf Bindschedler*, Berne, 1980, p. 410, and Rosenne, 'The Position of the International Court of Justice on the Foundations of the Principle of Equity in International Law' in *Forty Years International Court of Justice: Jurisdiction, Equality and Equity* (eds. A. Bloed and P. Van Dijk), Dordrecht, 1988, p. 108; Pirotte, 'La Notion d'Équité dans la Jurisprudence Récente de la CIJ', 77 *Revue Générale de Droit International Public*, 1973, p. 131; Chattopadhyay, 'Equity in International Law: Its Growth and Development', 5 *Georgia Journal of International and Comparative Law*, 1975, p.

381; R. Lapidoth, 'Equity in International Law', 22 *Israel Law Review*, 1987, p. 161; Schachter, *International Law*, p. 49; A. V. Lowe, 'The Role of Equity in International Law', 12 *Australian YIL*, 1992, p. 54; P. Weil, 'L'Équité dans la Jurisprudence de la Cour International de Justice' in Lowe and Fitzmaurice, *Fifty Years of the International Court of Justice*, p. 121; Pellet, 'Article 38', p. 796; Thirlway, 'Law and Procedure of the ICJ (Part One)', p. 49, and Thirlway, 'Supplement', p. 26. Note especially Judge Weeramantry's study of equity in the *Jan Mayen (Denmark v. Norway)* case, ICJ Reports, 1993, pp. 38, 211; 99 ILR, pp. 395, 579. See also F. Francioni, 'Equity', *Max Planck Encyclopaedia of Public International Law*.

<sup>151</sup> Equity generally may be understood in the contexts of adapting law to particular areas or choosing between several different interpretations of the law (equity *infra legem*), filling gaps in the law (equity *praetor legem*) and as a reason for not applying unjust laws (equity *contra legem*): see Akehurst, 'Equity', and Judge Weeramantry, the *Jan Mayen* case, ICJ Reports, 1993, pp. 38, 226–34; 99 ILR, pp. 395, 594–602. See also below, chapter 17, for the extensive use of equity in the context of state succession.

<sup>152</sup> PCIJ, Series A/B, No. 70, pp. 73, 77; 8 AD, pp. 444, 450.

<sup>153</sup> See e.g. Judge Weeramantry, the *Jan Mayen (Denmark v. Norway)* case, ICJ Reports, 1993, pp. 38, 217; 99 ILR, pp. 395, 585. Cf. Judge Schwebel's Separate Opinion, ICJ Reports, 1993, p. 118; 99 ILR, p. 486.

<sup>154</sup> Note that the International Court in the *Tunisia/Libya Continental Shelf* case, ICJ Reports, 1982, pp. 18, 60; 67 ILR, pp. 4, 53, declared that 'equity as a legal concept is a direct emanation of the idea of justice'. However, see G. Abi-Saab's reference to the International Court's 'flight into equity' in 'The ICJ as a World Court' in Lowe and Fitzmaurice, *Fifty Years of the International Court of Justice*, pp. 3, 11.

<sup>155</sup> 50 ILR, p. 2.

<sup>156</sup> *Ibid.*, p. 18. In deciding the course of the boundary in two deep inlets, the Tribunal had recourse to the concept of equity: *ibid.*, p. 520.

<sup>157</sup> ICJ Reports, 1969, pp. 3, 53; 41 ILR, pp. 29, 83. Equity was used in the case in order to exclude the use of the equidistance method in the particular circumstances: *ibid.*, pp. 48–50; 41 ILR, pp. 78–80.

<sup>158</sup> ICJ Reports, 1970, p. 3; 46 ILR, p. 178. See also the *Burkina Faso v. Mali* case, ICJ Reports, 1986, pp. 554, 631–3; 80 ILR, pp. 459, 532–5.

<sup>159</sup> ICJ Reports, 1966, pp. 6, 294–9; 37 ILR, pp. 243, 455–9. See also the *Corfu Channel* case, ICJ Reports, 1949, pp. 4, 22; 16 AD, p. 155.

<sup>160</sup> See also *AMCO v. Republic of Indonesia* 89 ILR, pp. 366, 522–3.

<sup>161</sup> The International Court of Justice may under article 38(2) of its Statute decide a case *ex aequo et bono* if the parties agree, but it has never done so: see e.g. Pellet, ‘Article 38’, p. 793.

<sup>162</sup> See the *North Sea Continental Shelf* cases, ICJ Reports, 1969, pp. 3, 47; 41 ILR, pp. 29, 76, and the *Fisheries Jurisdiction* cases, ICJ Reports, 1974, pp. 3, 33; 55 ILR, pp. 238, 268. The Court reaffirmed in the *Libya/Malta* case, ICJ Reports, 1985, pp. 13, 40; 81 ILR, pp. 238, 272, ‘the principle that there can be no question of distributive justice’.

<sup>163</sup> ICJ Reports, 1985, pp. 13, 39; 81 ILR, pp. 238, 271.

<sup>164</sup> See the *North Sea Continental Shelf* cases, ICJ Reports, 1969, pp. 3, 49–50; 41 ILR, pp. 29, 78–80, and the *Anglo-French Continental Shelf* case, Cmnd 7438, 1978, pp. 116–17; 54 ILR, pp. 6, 123–4. See also the *Tunisia/Libya Continental Shelf* case, ICJ Reports, 1982, pp. 18, 60; 67 ILR, pp. 4, 53, and the *Gulf of Maine* case, ICJ Reports, 1984, pp. 246, 313–14 and 325–30; 71 ILR, pp. 74, 140–1 and 152–7.

<sup>165</sup> ICJ Reports, 1982, pp. 18, 60; 67 ILR, pp. 4, 53.

<sup>166</sup> See generally R. Y. Jennings, ‘The Principles Governing Marine Boundaries’ in *Festschrift für Karl Doehring*, Berlin, 1989, p. 408, and M. Bedjaoui, ‘L’“enigme” des “principes équitables” dans le Droit des Delimitations Maritimes’, *Revista*

*Español de Derecho Internacional*, 1990, p. 376.

<sup>167</sup> See also article 140 providing for the equitable sharing of financial and other benefits derived from activities in the deep sea-bed area.

<sup>168</sup> However, see *Cameroon v. Nigeria*, ICJ Reports, 2002, pp. 303, 443, where the Court declared that its jurisprudence showed that in maritime delimitation disputes, ‘equity is not a method of delimitation, but solely an aim that should be borne in mind in effecting the delimitation’. See further below, chapter 11.

<sup>169</sup> Based on the Draft Articles of the International Law Commission: see the Report of the International Law Commission on the Work of its Forty-Sixth Session, A/49/10, 1994, pp. 197, 218 ff.

<sup>170</sup> ICJ Reports, 1986, pp. 554, 633; 80 ILR, pp. 459, 535.

<sup>171</sup> *Ibid.*

<sup>172</sup> *Ibid.* See also the *El Salvador/Honduras* case, ICJ Reports, 1992, pp. 351, 514–15, and the *Brcko* case, 36 ILM, 1997, pp. 396, 427 ff. However, note that in the latter case, the Arbitral Tribunal was expressly authorised to apply ‘relevant legal and equitable principles’: see article V of Annex 2 of the Dayton Accords, 1995, *ibid.*, p. 400. See also J. M. Sorel, ‘L’Arbitrage sur la Zona de Brcko Tragi-comédie en Trois Actes et un Épilogue à Suivre’, AFDI, 1997, p. 253.

## 4 International law and municipal law

---

The role of the state in the modern world is a complex one. According to legal theory, each state is sovereign and equal.<sup>1</sup> In reality, with the phenomenal growth in communications and consciousness, and with the constant reminder of global rivalries, not even the most powerful of states can be entirely sovereign. Interdependence and the close-knit character of contemporary international commercial and political society ensures that virtually any action of a state could well have profound repercussions upon the system as a whole and the decisions under consideration by other states. This has led to an increasing interpenetration of international law and domestic law across a number of fields, such as human rights, environmental and international investment law, where at the least the same topic is subject to regulation at both the domestic and the international level (and indeed the regional level in the case of the European Union). With the rise and extension of international law, questions begin to arise paralleling the role played by the state within the international system and concerned with the relationship between the internal legal order of a particular country and the rules and principles governing the international community as a whole. Municipal law governs the domestic aspects of government and deals with issues between individuals, and between individuals and the administrative apparatus, while international law focuses primarily upon the relations between states. That is now, however, an overly simplistic assertion. There are many instances where problems can emerge and lead to difficulties between the two systems. In a case before a municipal court a rule of international law may be brought forward as a defence to a charge, as for example in *R v. Jones*, where the defence of seeking to prevent a greater crime (essentially of international law) was claimed with regard to the alleged offence of criminal damage (in English law),<sup>2</sup> or where a vessel is being prosecuted for being in what, in domestic law, is regarded as territorial waters but in international law would be treated as part of the high seas. Further, there are cases where the same situation comes before both national and international courts, which may refer to each other's decisions in a complex process of interaction. For example, the failure of the US to allow imprisoned foreign nationals access to consular assistance in violation of the Vienna Convention on Consular Relations, 1963 was the subject of case-law before the International Court of Justice,<sup>3</sup> the Inter-American Court of Human Rights<sup>4</sup> and US courts,<sup>5</sup> while there is a growing tendency for domestic courts to be used to address violations of international law.<sup>6</sup>

### The theories<sup>7</sup>

Positivism stresses the overwhelming importance of the state and tends to regard international law as founded upon the consent of states. It is actual practice, illustrated by custom and by treaty, that formulates the role of international law, and not formalistic structures, theoretical deductions or moral stipulations. Accordingly, when positivists such as Triepel<sup>8</sup> and Strupp<sup>9</sup> consider the relationship of international law to municipal law, they do so upon the basis of the supremacy of the state, and the existence of wide differences between the two functioning orders. This theory, known as dualism, stresses that the rules of the systems of international law and municipal law exist separately and cannot purport to have an effect on, or overrule, the other.

This is because of the fundamentally different nature of inter-state and intra-state relations and the different legal structure employed on the one hand by the state and on the other hand as between states. Where municipal legislation permits the exercise of international law rules, this is on sufferance as it were and is an example of the supreme authority of the state within its own domestic jurisdiction, rather than of any influence maintained by international law within the internal sphere.<sup>10</sup>

Those writers who disagree with this theory and who adopt the *monist* approach tend to fall into two distinct categories: those who, like Lauterpacht, uphold a strong ethical position with a deep concern for human rights, and others, like Kelsen, who maintain a monist position on formalistic logical grounds. The monists are united in accepting a unitary view of law as a whole and are opposed to the strict division posited by the positivists.

The 'naturalist' strand represented in England by Lauterpacht's works sees the primary function of all law as concerned with the well-being of individuals, and advocates the supremacy of international law as the best method available of attaining this. It is an approach characterised by deep suspicion of an international system based upon the sovereignty and absolute independence of states, and illuminated by faith in the capacity of the rules of international law to imbue the international order with a sense of moral purpose and justice founded upon respect for human rights and the welfare of individuals.<sup>11</sup>

The method by which Kelsen elucidates his theory of monism is markedly different and utilises the philosophy of Kant as its basis. Law is regarded as constituting an order which lays down patterns of behaviour that ought to be followed, coupled with provision for sanctions which are employed once an illegal act or course of conduct has occurred or been embarked upon. Since the same definition appertains within both the internal sphere and the international sphere, a logical unity is forged, and because states owe their legal relationship to one another to the rules of international law, such as the one positing equality, since states

cannot be equal before the law without a rule to that effect, it follows that international law is superior to or more basic than municipal law.<sup>12</sup>

Reference has already been made to Kelsen's hierarchical system whereby the legality of a particular rule is affirmed once it conforms to an anterior rule. This process of referring back to previous or higher rules ends with the so-called basic norm of the legal order. However, this basic norm is basic only in a relative sense, since the legal character of states, such as their jurisdiction, sovereignty and equality, is fixed by international law. Thus, Kelsen emphasises the unity of the entire legal order upon the basis of the predominance of international law by declaring that it is the basic norm of the international legal order which is the ultimate reason of validity of the national legal orders too.<sup>13</sup>

A third approach, being somewhat a modification of the dualist position and formulated by Fitzmaurice and Rousseau amongst others, attempts to establish a recognised theoretical framework tied to reality. This approach begins by denying that any common field of operation exists as between international law and municipal law by which one system is superior or inferior to the other. Each order is supreme in its own sphere, much as French law and English law are in France and England. And just as one cannot talk in terms of the supremacy of French law over English law, but only of two distinct legal systems each operating within its own field, so it is possible to treat international law and municipal law in the same way. They are both the legal element contained within the domestic and international systems respectively, and they exist within different juridical orders.

What may, and often does, happen is what is termed a conflict of obligations, that is the state within its own domestic sphere does not act in accordance with its obligations as laid down by international law. In such a case, the domestic position is unaffected (and is not overruled by the contrary rule of international law) but rather the state as it operates internationally has broken a rule of international law and the remedy will lie in the international field, whether by means of diplomatic protest or judicial action.

This method of solving the problem does not delve deeply into theoretical considerations, but aims at being practical and in accord with the majority of state practice and international judicial decisions.<sup>14</sup> In fact, the increasing scope of international law has prompted most states to accept something of an intermediate position, where the rules of international law are seen as part of a distinct system, but capable of being applied internally depending on circumstance, while domestic courts are increasingly being obliged to interpret rules of international law.<sup>15</sup>

## The role of municipal rules in international law<sup>16</sup>

The general rule with regard to the position of municipal law within the international sphere is that a state which has broken a stipulation of international law cannot justify itself by referring to its domestic legal situation. It is no defence to a breach of an international obligation to argue that the state acted in such a manner because it was following the dictates of its own municipal laws. The reasons for this inability to put forward internal rules as an excuse to evade international responsibility are obvious. Any other situation would permit international law to be evaded by the simple method of domestic legislation.

Accordingly, state practice and decided cases have established this provision and thereby prevented countries involved in international litigation from pleading municipal law as a method of circumventing international law. Article 3 of the International Law Commission's Articles on State Responsibility declares that: 'The characterization of an act of a state as internationally wrongful is governed by international law. Such characterization is not affected by the characterization of the same act as lawful by internal law.'<sup>17</sup> Article 27 of the Vienna Convention on the Law of Treaties, 1969 lays down that in so far as treaties are concerned, a party may not invoke the provisions of its internal law as justification for its failure to carry out an international agreement, while article 46(1) provides that a state may not invoke the fact that its consent to be bound by a treaty has been expressed in violation of a provision of its internal law regarding competence to conclude treaties as invalidating its consent.<sup>18</sup> This is so unless the violation of its internal law in question was 'manifest and concerned a rule of fundamental importance'. Article 46(2) states that such a violation is manifest where it would be objectively evident to any state conducting itself in the matter in accordance with normal practice and in good faith. The International Court considered this provision in *Cameroon v. Nigeria* in the context of Nigeria's argument that the Maroua Declaration of 1975 signed by the two heads of state was not valid as it had not been ratified.<sup>19</sup> It was noted that article 7(2) of the Vienna Convention provided that heads of state belonged to the group of persons who in virtue of their functions and without having to produce full powers are considered as representing their state. The Court also took the view that 'there is no general legal obligation for States to keep themselves informed of legislative and constitutional developments in other States which are or may become important for the international relations of these States'.<sup>20</sup>

Such provisions are reflected in the case-law. In the *Alabama Claims* arbitration of 1872, the United States objected strenuously when Britain allowed a Confederate ship to sail from Liverpool to prey upon American shipping. It was held that the absence of British legislation necessary to prevent the construction or departure of

the vessel could not be brought forward as a defence, and Britain was accordingly liable to pay damages for the depredations caused by the warship in question.<sup>21</sup> In the *Polish Nationals in Danzig* case, the Court declared that ‘a State cannot adduce as against another State its own constitution with a view to evading obligations incumbent upon it under international law or treaties in force’.<sup>22</sup>

The International Court, in the *Applicability of the Obligation to Arbitrate* case,<sup>23</sup> has underlined ‘the fundamental principle of international law that international law prevails over domestic law’, while Judge Shahabuddeen emphasised in the *Lockerbie* case<sup>24</sup> that inability under domestic law to act was no defence to non-compliance with an international obligation. This was reinforced in the *LaGrand* case,<sup>25</sup> where the Court noted that the effect of the US procedural default rule,<sup>26</sup> which was to prevent counsel for the LaGrand brothers from raising the violation by the US of its obligations under the Vienna Convention on Consular Relations, 1963 before the US federal courts system, had no impact upon the responsibility of the US for the breach of the convention.<sup>27</sup> The Court underlined this approach in the *Avena* case,<sup>28</sup> noting that ‘The rights guaranteed under the Vienna Convention are treaty rights which the United States has undertaken to comply with in relation to the individual concerned, irrespective of the due process rights under the United States constitutional law.’ The Court took a step further in that case, which also concerned the failure to allow foreign prisoners access to the consular officials of their state in breach of the Vienna Convention on Consular Relations, declaring that ‘the remedy to make good these violations should consist in an obligation on the United States to permit review and reconsideration of these nationals’ cases by the United States courts...with a view to ascertaining whether in each case the violation of Article 36 committed by the competent authorities caused actual prejudice to the defendant in the process of administration of criminal justice’.<sup>29</sup> By way of contrast, the International Court pointed out in the *Elettronica Sicula SpA (ELSI)* case<sup>30</sup> that the fact that an act of a public authority may have been unlawful in municipal law did not necessarily mean that the act in question was unlawful in international law.

However, such expressions of the supremacy of international law over municipal law in international tribunals do not mean that the provisions of domestic legislation are either irrelevant or unnecessary.<sup>31</sup> On the contrary, the role of internal legal rules is vital to the workings of the international legal machine. One of the ways that it is possible to understand and discover a state’s legal position on a variety of topics important to international law is by examining municipal laws.<sup>32</sup> A country will express its opinion on such vital international matters as the extent of its territorial sea, or the jurisdiction it claims or the conditions for the acquisition of nationality through the medium of its domestic law-making. Thus, it is quite often that in the course of deciding a case before it, an international court will feel the necessity to

make a study of relevant pieces of municipal legislation. Indeed, there have been instances, such as the *Serbian Loans* case of 1929,<sup>33</sup> when the crucial issues turned upon the interpretation of internal law, and the rules of international law in a strict sense were not at issue. Further, a court may turn to municipal law concepts where this is necessary in the circumstances.<sup>34</sup> However, it is clear that caution is necessary where an international court or tribunal is considering concepts of national law in the absence of an express or implied requirement so to do and no automatic transposition should occur.<sup>35</sup>

In addition to the role of municipal law in revealing the legal position of the state on topics of international importance, the rules of municipal law constitute facts in proceedings before international courts and tribunals, but may also be utilised as evidence of compliance or non-compliance with international obligations and part of any relevant applicable law.<sup>36</sup> In the *Certain German Interests in Polish Upper Silesia* case, the Permanent Court of International Justice declared that:

From the standpoint of International Law and of the Court, which is its organ, municipal laws are merely facts which express the will and constitute the activities of States, in the same manner as do legal decisions or administrative measures. The Court is certainly not called upon to interpret the Polish law as such; but there is nothing to prevent the Court's giving judgment on the question whether or not, in applying that law, Poland is acting in conformity with its obligations towards Germany under the Geneva Convention.<sup>37</sup>

Nevertheless, and despite the many functions that municipal law rules perform within the sphere of international law, the point must be emphasised that the presence or absence of a particular provision within the internal legal structure of a state, including its constitution if there is one, cannot be applied to evade an international obligation. Any other solution would render the operations of international law rather precarious. On the other hand, international law cannot render invalid as such any rule of municipal law<sup>38</sup> and will rarely interpret a national law in a manner contrary to the domestic authorities.<sup>39</sup>

## **International law before municipal courts<sup>40</sup>**

The problem of the role of international law within the municipal law system is, however, rather more complicated than the position discussed above, and there have been a number of different approaches to it. States are, of course, under a general obligation to act in conformity with the rules of international law and will bear responsibility for breaches of it, whether committed by the legislative, executive or

judicial organs and irrespective of domestic law.<sup>41</sup> Further, international treaties may impose requirements of domestic legislation upon states parties,<sup>42</sup> while binding Security Council resolutions may similarly require that states take particular action within their jurisdictions.<sup>43</sup> There is indeed a clear trend towards the increasing penetration of international legal rules within domestic systems coupled with the exercise of an ever-wider jurisdiction with regard to matters having an international dimension by domestic courts. This has led to a blurring of the distinction between the two previously maintained autonomous zones of international and domestic law, a re-evaluation of the role of international legal rules and a greater preparedness by domestic tribunals to analyse the actions of their governments in the light of international law.<sup>44</sup> Further, domestic courts may often have to determine the meaning of an international rule that is relevant for a case before them<sup>45</sup> or to seek to resolve conflicts between international rules, such as that between state immunity and the prohibition of torture<sup>46</sup> and that between treaty rules of human rights and binding Security Council resolutions.<sup>47</sup> As between the two systems, there will be no *res judicata* (or binding or conclusive effect) at the international level with regard to a national decision in the absence of a specific direction to this effect in the particular case,<sup>48</sup> while practice is variable with regard to international decisions in the municipal system. Often, domestic courts will ascribe persuasive influence to such decisions and may grant *res judicata* effect to international and domestic arbitral awards.<sup>49</sup>

In this section, the approach adopted by municipal courts will be noted. We shall look first at the attitudes adopted by the British courts, and then proceed to note the views taken by the United States and other countries.<sup>50</sup>

## The United Kingdom<sup>51</sup>

It is part of the public policy of the UK that the courts should in principle give effect to clearly established rules of international law.<sup>52</sup> Various theories have been put forward to explain the applicability of international law rules within the jurisdiction. One expression of the positivist–dualist position has been the doctrine of *transformation*. This is based upon the perception of two quite distinct systems of law, operating separately, and maintains that before any rule or principle of international law can have any effect within the domestic jurisdiction, it must be expressly and specifically ‘transformed’ into municipal law by the use of the appropriate constitutional machinery, such as an Act of Parliament. This doctrine grew from the procedure whereby international agreements are rendered operative in municipal law by the device of ratification by the sovereign and the idea has developed from this that any rule of international law must be transformed, or

specifically adopted, to be valid within the internal legal order.

Another approach, known as the doctrine of *incorporation*, holds that international law is part of the municipal law automatically without the necessity for the interposition of a constitutional ratification procedure. The best-known exponent of this theory is the eighteenth-century lawyer Blackstone, who declared in his Commentaries that:

the law of nations, wherever any question arises which is properly the object of its jurisdiction, is here adopted in its full extent by the common law, and it is held to be a part of the law of the land.<sup>53</sup>

This doctrine refers to customary international law and different rules apply to treaties. However, the previously accepted dichotomy between the reception of custom and treaty is now maintained absolutely would distort the many developments currently taking place. As will be seen, English courts have had to deal with the effect of legal decisions emanating from the EU and its Court of Justice and the European Court of Human Rights,<sup>54</sup> as well as the other consequences resulting from membership of the EU and of the Council of Europe; have been concerned with the interpretation of an increasing number of rules of international law incorporated into English law through the ratification of international treaties (particularly the significant number dealing with terrorist issues) and subsequent domestic legislation that they have required;<sup>55</sup> have sought to tackle conflicts of international legal rules and have dealt with the changing configuration of the doctrine of non-justiciability of issues raising questions as to the executive's conduct of foreign policy. They have also had to concern themselves with the validity of foreign laws deemed to conflict with international law and the acceptability of evidence obtained abroad in circumstances that may have violated international law.<sup>56</sup> English courts take judicial notice of international law,<sup>57</sup> so that formal proof of a proposition does not need to be demonstrated (unlike propositions of foreign law which need to be proved as fact by evidence) and this itself has been a key factor in determining the relationship between international law and domestic law. Judges are deemed to know international law. In practice this means that judges and lawyers trained in domestic law have had to grapple with the different sources of international law and the difficulties of this task have percolated through the relationship.

## ***Customary international law***

It is in this sphere that the doctrine of incorporation has become the main British approach. It is an old-established theory dating back to the eighteenth century, owing

its prominence at that stage to the considerable discussion then taking place as to the precise extent of diplomatic immunity. A few of the more important cases will be briefly surveyed. In *Buvot v. Barbuit*,<sup>58</sup> Lord Talbot declared unambiguously that 'the law of nations in its full extent was part of the law of England', so that a Prussian commercial agent could not be rendered liable for failing to perform a decree. This was followed twenty-seven years later by *Triquet v. Bath*,<sup>59</sup> where Lord Mansfield, discussing the issue as to whether a domestic servant of the Bavarian Minister to Britain could claim diplomatic immunity, upheld the earlier case and specifically referred to Talbot's statement.

This acceptance of customary international law rules as part and parcel of the common law of England, so vigorously stated in a series of eighteenth-century cases, was subject to the priority granted to Acts of Parliament and tempered by the principle of *stare decisis* or precedent, maintained by the British courts and ensuring that the judgments of the higher courts are binding upon the lower courts of the hierarchical system. Accordingly, a rule of international law would not be implemented if it ran counter to a statute or decision by a higher court.<sup>60</sup> It is also important to note that during this period the rules of customary international law were relatively few in number so that few conflicts between the systems were to be envisaged.

In the nineteenth century, a series of cases occurred which led many writers to dispute the validity of the hitherto accepted incorporation doctrine and replace it with the theory of transformation, according to which the rules of customary international law only form part of English law if they have been specifically adopted, either by legislation or case-law. The turning point in this saga is marked by the case of *R v. Keyn*<sup>61</sup> which concerned a German ship, the *Franconia*, which collided with and sank a British vessel in the English Channel within three miles of the English coast. The German captain was indicted for manslaughter following the death of a passenger from the British ship, and the question that came before the Court for Crown Cases Reserved was whether an English court did indeed have jurisdiction to try the offence in such circumstances.

The Court came to the conclusion that no British legislation existed which provided for jurisdiction over the three-mile territorial sea around the coasts. It was true that such a rule might be said to exist in international law, but it was one thing to say that the state had the right to legislate over a part of what had previously been the high seas, and quite another to conclude that the state's laws operate at once there, independently of any legislation. One thing did not follow from another, and it was imperative to keep distinct on the one hand the power of Parliament to make laws, and on the other the authority of the courts, without appropriate legislation, to apply the criminal law where it could not have been applied before. The question, as

Lord Cockburn emphasised, was whether, acting judicially, the Court could treat the power of Parliament to legislate as making up for the absence of actual legislation. The answer came in the negative and the German captain was released.

This case was seen by some as marking a change to a transformation approach,<sup>62</sup> but the judgment was in many respects ambiguous, dealing primarily with the existence or not of any right of jurisdiction over the territorial sea.<sup>63</sup> In many respects the differences between the incorporation and transformation theories have revolved in practice more around evidential questions than any comprehensive theoretical revolution. In any event, any doubts as to the outcome of any further *Franconia* situations were put to rest by the Territorial Waters Jurisdiction Act 1878, which expressed British jurisdiction rights in similar circumstances.

The opinions put forward in the *West Rand Gold Mining Co.* case<sup>64</sup> showed a further blurring of the distinction between the incorporation and transformation theories. Lord Alverstone declared that whatever had received the common consent of civilised nations must also have received the assent of Great Britain and as such would be applied by the municipal tribunals. However, he went on to modify the impact of this by noting that any proposed rule of international law would have to be proved by satisfactory evidence to have been 'recognised and acted upon by our own country' or else be of such a nature that it could hardly be supposed any civilised state would repudiate it. Lord Mansfield's view in *Triquet's* case could not be so interpreted as to include within the common law rules of international law which appear in the opinions of textbook writers and as to which there is no evidence that Britain ever assented.<sup>65</sup> This emphasis on assent, it must be noted, bears a close resemblance to the views put forward by the Court in *R v. Keyn* as to the necessity for conclusive evidence regarding the existence and scope of any particular rule of customary law. Indeed, the problem is often one of the uncertainty of existence and scope of customary law.

Not long after the *West Rand* case, another important dispute came before the courts. In *Mortensen v. Peters*,<sup>66</sup> a Danish captain was convicted by a Scottish court for contravening a fishing by-law regarding the Moray Firth. His ship had been operating within the Moray Firth and was within the area covered by the relevant by-law, but it was beyond the three-mile limit recognised by international law. The issue came to the Scottish Court of Justiciary, where Lord Dunedin, in discussing the captain's appeal, concentrated upon the correct construction to be made of the relevant legislation. He noted that an Act of Parliament duly passed and assented to was supreme and the Court had no option but to give effect to its provisions. In other words, statutes had predominance over customary law, and a British court would have to heed the terms of an Act of Parliament even if it involved the breach of a rule of international law. This is so even though there is a presumption in British law

that the legislation is to be so construed as to avoid a conflict with international law. Where such a conflict does occur, the statute has priority and the state itself will have to deal with the problem of the breach of a customary rule.<sup>67</sup>

This modified incorporation doctrine was clearly defined by Lord Atkin in *Chung Chi Cheung v. R.*<sup>68</sup> He noted that:

international law has no validity except in so far as its principles are accepted and adopted by our own domestic law...The courts acknowledge the existence of a body of rules which nations accept among themselves. On any judicial issue they seek to ascertain what the relevant rule is, and having found it they will treat it as incorporated into the domestic law, so far as it is not inconsistent with rules enacted by statutes or finally declared by their tribunals.

It goes without saying, of course, that any alleged rule of customary law must be proved to be a valid rule of international law, and not merely an unsupported proposition.

In ascertaining the existence and nature of any particular rule, the courts may have recourse to a wider range of authoritative material than would normally be the case, such as 'international treaties and conventions, authoritative textbooks, practice and judicial decisions' of the courts of other countries.<sup>69</sup>

The case of *Trendtex Trading Corporation v. Central Bank of Nigeria* raised anew many of these issues. The case concerned a claim for sovereign or state immunity by the Central Bank of Nigeria.<sup>70</sup> In *Trendtex* all three judges of the Court of Appeal accepted the incorporation doctrine as the correct one. Lord Denning, reversing his opinion in an earlier case,<sup>71</sup> stressed that otherwise the courts could not recognise changes in the norms of international law.<sup>72</sup> Stephenson LJ emphasised in an important statement that:

it is the nature of international law and the specific problems of ascertaining it which create the difficulty in the way of adopting or incorporating or recognising as already incorporated a new rule of international law.<sup>73</sup>

The issue of *stare decisis*, or precedent, and customary international law was also discussed in this case. It had previously been accepted that the doctrine of *stare decisis* would apply in cases involving customary international law principles as in all other cases before the courts, irrespective of any changes in the meantime in such law.<sup>74</sup> This approach was reaffirmed in *Thai-Europe Tapioca Service Ltd v. Government of Pakistan*.<sup>75</sup> However, in *Trendtex*, Lord Denning and Shaw LJ

emphasised that international law did not know a rule of *stare decisis*.<sup>76</sup> Where international law had changed, the court could implement that change ‘without waiting for the House of Lords to do it’.<sup>77</sup> The true principle, noted Shaw LJ, was that ‘the English courts must at any given time discover what the prevailing international rule is and apply that rule’.<sup>78</sup> This marked a significant approach and one that in the future may have some interesting consequences, for example, in the human rights field.

The dominant incorporationist approach was clearly reaffirmed by the Court of Appeal in *Maclaine Watson v. Department of Trade and Industry*.<sup>79</sup> This case concerned the consequences of the demise of the International Tin Council and the attempts *inter alia* to render states that were members of the ITC liable for the debts incurred by that unfortunate organisation. Nourse LJ emphasised that the *Trendtex* case had resolved the rivalry between the incorporation and transformation doctrines in favour of the former.<sup>80</sup> One of the major points at issue in the *Tin Council* litigation was whether a rule existed in international law stipulating that the states members of an international organisation with separate personality could be rendered liable for the latter’s debts.

If such a rule did exist, the question would then arise as to how that would be accepted or manifested in the context of municipal law. This, of course, would depend upon the precise content of such a claimed international rule and, as Kerr LJ noted, no such rule did exist in international law permitting action against member states ‘in any national court’.<sup>81</sup> It was also not possible for an English court to remedy the gap in international law by itself creating such a rule.<sup>82</sup> Nourse LJ, however, took a different position on this point, stating that ‘where it is necessary for an English court to decide such a question [i.e. an uncertain question of international law], and whatever the doubts and difficulties, it can and must do so’.<sup>83</sup> This, with respect, is not and cannot be the case, not least because it strikes at the heart of the community-based system of international law creation.

Lord Oliver in the House of Lords judgment<sup>84</sup> clearly and correctly emphasised that

It is certainly not for a domestic tribunal in effect to legislate a rule into existence for the purposes of domestic law and on the basis of material that is wholly indeterminate.<sup>85</sup>

Such approaches find support in the *Pinochet* decisions. Lord Lloyd, for example, in *Ex Parte Pinochet (No. 1)* referred to the ‘well-established principles of customary international law, which principles form part of the common law of England’,<sup>86</sup>

while Lord Slynn took the view that the doctrine of precedent did not apply to the incorporation of rules of customary international law.<sup>87</sup> Lord Millett in *Ex Parte Pinochet (No. 3)* stressed that ‘Customary international law is part of the common law.’<sup>88</sup> In *Lord Advocate’s Reference No. 1 of 2000*, the High Court of Justiciary stated that ‘A rule of customary international law is a rule of Scots law’,<sup>89</sup> and the point was emphasised by the Arbitration Tribunal in *Sandline v. Papua New Guinea* that ‘it is part of the public policy of England that its courts should give effect to clearly established rules of international law’.<sup>90</sup>

The doctrine that customary international law formed part of the law of England was discussed by the House of Lords in *R v. Jones*,<sup>91</sup> where the issue focused upon whether the customary international law rule prohibiting aggression had automatically entered into English criminal law. Lord Bingham, while noting that the general principle was not at issue between the parties, commented that he ‘would for my part hesitate, at any rate without much fuller argument, to accept this proposition in quite the unqualified terms in which it has often been stated’. Preference was expressed for the view maintained by Brierly that international law was not a part, but was rather one of the sources, of English law.<sup>92</sup>

More specifically, the House of Lords unanimously accepted that the incorporation doctrine did not apply to the customary international law offence of aggression. While it was accepted that a crime recognised in customary international law ‘may’ be assimilated into domestic criminal law without statutory provision, this was not automatic.<sup>93</sup> The English courts no longer had the power to create new criminal offences, which could only now be done by statute, and in practice when domestic effect was sought for customary international crimes this was achieved through legislation.<sup>94</sup> Further, a charge of aggression would involve a determination not only of the guilt of the accused, but also of the state itself and possibly of other states, should the state go to war with allies and this raised constitutional issues as to non-justiciability.<sup>95</sup>

Accordingly, a degree of caution may therefore now be necessary with regard to the traditionally and baldly expressed proposition that customary international law is part of English law.<sup>96</sup> This will be subject not only, as in the past, to the rule that common law (including where incorporating an international customary rule) gives way to statute, but also to considerations of a constitutional nature. Courts will be obliged to determine whether a particular provision indeed constitutes a rule of custom and, additionally, whether there are any constitutional bars to incorporation and indeed whether the custom in question is capable of being applied within the domestic legal system. This is since most of the rules of customary international law actually relate to matters of concern between two or more states and by definition a

domestic court is unable to determine the rights and duties of a third state, partly because the domestic court would be unable in such circumstances to enforce its decision against or within the third state and partly because the international rule will often itself provide for implementation and sanctions within the international system upon a state to state or multilateral basis.<sup>97</sup> Other relevant factors may well include whether the custom is inconsistent with an earlier rule of common law<sup>98</sup> or with public policy.<sup>99</sup>

## **Treaties**<sup>100</sup>

As far as treaties are concerned, different rules apply as to their application within the domestic jurisdiction for very good historical and political reasons. While customary law develops through the evolution of state practice, international conventions are in the form of contracts binding upon the signatories. For a custom to emerge it is usual, though not always necessary, for several states to act in a certain manner believing it to be in conformity with the law. Therefore, in normal circumstances the influence of one particular state is not usually decisive. In the case of treaties, the states involved may create new law that would be binding upon them irrespective of previous practice or contemporary practice. In other words, the influence of the executive is generally of greater impact where treaty law is concerned than is the case with customary law and this is particularly so where, as in the UK, ratification of treaties is an executive act.

It follows from this that were treaties to be rendered applicable directly within the state without any intermediate stage after signature and ratification and before domestic operation, the executive would be able to legislate without the legislature. Because of this, any incorporation theory approach to treaty law has been rejected. Indeed, as far as this topic is concerned, it seems to turn more upon the particular relationship between the executive and legislative branches of government than upon any preconceived notions of international law.

One of the principal cases in English law illustrating this situation is the case of the *Parlement Belge*.<sup>101</sup> It involved a collision between this ship and a British tug, and the claim for damages brought by the latter vessel before the Probate, Divorce and Admiralty division of the High Court. The *Parlement Belge* belonged to the King of the Belgians and was used as a cargo boat. During the case, the Attorney General intervened to state that the Court had no jurisdiction over the vessel as it was the property of the Belgian monarch, and that further, by a political agreement of 1876 between Britain and Belgium, the same immunity from foreign legal process as applied to warships should apply also to this packet boat. In discussing the case, the Court concluded that only public ships of war were entitled to such immunity

and that such immunity could not be extended to other categories by a treaty without parliamentary consent. Indeed, it was stated that this would be ‘a use of the treaty-making prerogative of the Crown...without precedent, and in principle contrary to the law of the constitution’.<sup>102</sup>

It is the Crown which in the UK possesses the constitutional authority to enter into treaties and this prerogative power cannot be impugned by the courts.<sup>103</sup> However, this power may be affected by legislation. Section 6 of the European Parliamentary Elections Act 1978 provided, for example, that no treaty providing for any increase in the powers of the European Parliament would be ratified by the UK without being first approved by Parliament.<sup>104</sup> Thus it is that treaties cannot operate of themselves within the state, but require the passing of an enabling statute. The Crown in the UK retains the right to sign and ratify international agreements, but is unable to legislate directly. Before a treaty can become part of English law, an Act of Parliament is essential. This fundamental proposition was clearly spelt out by Lord Oliver in the House of Lords decision in *MacLaine Watson v. Department of Trade and Industry*.<sup>105</sup> He noted that:

as a matter of the constitutional law of the United Kingdom, the royal prerogative, whilst it embraces the making of treaties, does not extend to altering the law or conferring rights on individuals or depriving individuals of rights which they enjoy in domestic law without the intervention of Parliament. Treaties, as it is sometimes expressed, are not self-executing. Quite simply, a treaty is not part of English law unless and until it has been incorporated into the law by legislation.<sup>106</sup>

It therefore followed that as far as individuals were concerned such treaties were *res inter alia acta* from which they could not derive rights and by which they could not be deprived of rights or subjected to obligations.<sup>107</sup> Lord Templeman emphasised that ‘Except to the extent that a treaty becomes incorporated into the laws of the United Kingdom by statute, the courts of the United Kingdom have no power to enforce treaty rights and obligations at the behest of a sovereign government or at the behest of a private individual.’<sup>108</sup> This was reaffirmed by Lord Bingham in *A (FC) and Others (FC) v. Secretary of State for the Home Department*, noting that ‘a treaty, even if ratified by the United Kingdom, has no binding force in the domestic law of this country unless it is given effect by statute or expresses principles of customary international law’.<sup>109</sup> The interpretation of treaties not incorporated by statute into municipal law, and the decision as to whether they have been complied with, are matters exclusively for the Crown as ‘the court must speak with the same voice as the Executive’.<sup>110</sup> An exception is where reference to a treaty is needed in

order to explain the relevant factual background,<sup>111</sup> for example where the terms of a treaty are incorporated into a contract.<sup>112</sup> Where the legislation in question refers expressly to a relevant but unincorporated treaty, it is permissible to utilise the latter in order to constrain any discretion provided for in the former.<sup>113</sup> Further, it has been argued that ratification of an international treaty (where no incorporation has taken place) may give rise to legitimate expectations that the executive, in the absence of statutory or executive indications to the contrary, will act in conformity with the treaty.<sup>114</sup>

However, treaties relating to the conduct of war, cession of territory and the imposition of charges on the public purse<sup>115</sup> do not need an intervening act of legislation before they can be made binding upon the citizens of the country.<sup>116</sup> A similar situation exists also with regard to relatively unimportant administrative agreements which do not require ratification, providing of course they do not purport to alter municipal law. In certain cases, Parliament will give its approval generically in advance for the conclusion of treaties in certain fields within specified limits, subject to the terms negotiated for particular treaties being promulgated by statutory instrument (secondary legislation).<sup>117</sup> Such exceptions occur because it is felt that, having in mind the historical compromises upon which the British constitutional structure is founded, no significant legislative powers are being lost by Parliament. In all other cases where the rights and duties of British subjects are affected, an Act of Parliament is necessary to render the provisions of the particular treaty operative within Britain. In conclusion, it may be stated that parliamentary legislation will be required where a treaty for its application in the UK requires a modification of, or addition to, existing common law or statute, affects private rights, creates financial obligations for the UK, provides for an increase in the powers of the European Parliament, involves the cession of British territory or increases the powers of the Crown.<sup>118</sup>

There is no rule specifying the precise legislative method of incorporation of a treaty<sup>119</sup> and a variety of means are available in practice.<sup>120</sup> For example, a treaty may be incorporated into domestic law by being given the force of law in a statute with or without being scheduled to the relevant act; by being referred to in a statute otherwise than in an incorporating statute; by tangential reference in a statute;<sup>121</sup> and by statutory referral to definitions contained in a treaty.<sup>122</sup>

It had been the practice in the UK to lay before both Houses of Parliament all treaties which the UK has either signed or to which it intends to accede.<sup>123</sup> The text of any agreement requiring ratification, acceptance, approval or accession had to be laid before Parliament at least twenty-one sitting days before any of these actions is taken. This was termed the 'Ponsonby Rule'.<sup>124</sup> All treaties signed after 1 January

1997 and laid before Parliament under this rule are accompanied by an Explanatory Memorandum.<sup>125</sup> The matter is now regulated by Part 2 of the Constitutional Reform and Governance Act 2010. This provides that a treaty may only be ratified if a period of 21 days has elapsed from the placing of the treaty before Parliament by the relevant Minister calling for ratification and the House of Commons has not otherwise resolved.<sup>126</sup>

There is in English law a presumption that legislation is to be so construed as to avoid a conflict with international law.<sup>127</sup> This operates particularly where the Act of Parliament which is intended to bring the treaty into effect is itself ambiguous. Accordingly, where the provisions of a statute implementing a treaty are capable of more than one meaning, and one interpretation is compatible with the terms of the treaty while others are not, it is the former approach that will be adopted. For, as Lord Diplock pointed out: 'Parliament does not intend to act in breach of international law, including therein specific treaty obligations.'<sup>128</sup> It is also to be noted that the words of a statute may require consideration of international law by the relevant domestic authorities.<sup>129</sup>

Although there is a presumption that English law accords with international obligations,<sup>130</sup> where the words of a statute are unambiguous the courts have no choice but to apply them irrespective of any conflict with international agreements.<sup>131</sup> Of course, any breach of an international obligation will import the responsibility of the UK at the international level irrespective of domestic considerations.<sup>132</sup> Attempts have been made in the past to consider treaties in the context of domestic legislation not directly enacting them, or as indications of public policy, particularly with regard to human rights treaties,<sup>133</sup> and it seems that account may be taken of them in seeking to interpret ambiguous provisions.<sup>134</sup> However, ministers are under no obligation to do this in reaching decisions.<sup>135</sup>

One particular issue has arisen in the case of the implementation of international obligations and that relates to United Nations sanctions. In the UK, such sanctions are enforced as a consequence of the United Nations Act 1946 which enables the Crown to adopt Orders in Council so that effect can be given to sanctions.<sup>136</sup> Such secondary legislation tends to be detailed and thus the possibility of differential interpretations arises. It is to be noted that the relevance and application of rules of the European Union may also be in issue.<sup>137</sup> Further, one may note the obligation contained in article 29 of the Statute of the International Criminal Tribunal for the Former Yugoslavia, adopted by binding UN Security Council resolution 827 (1993), for all states to co-operate with the Tribunal and in particular to 'comply without undue delay with any request for assistance or an order issued by a Trial Chamber', including the arrest and detention of persons and their surrender or transfer to the

Tribunal. This was implemented by secondary legislation adopted under the United Nations Act 1946.<sup>138</sup>

In the interpretation of international treaties incorporated by statute, the English courts have adopted a broader approach than is customary in statutory interpretation, utilising the international rules of treaty interpretation as reflected in the Vienna Convention on the Law of Treaties 1969 rather than the stricter rules of statutory construction.<sup>139</sup> In particular, recourse to the relevant *travaux préparatoires* may be possible.<sup>140</sup> In *Sidhu v. British Airways*, Lord Hope, adopting the broad approach signalled in *Fothergill v. Monarch Airlines*, stated that it was ‘well-established that a purposive approach should be taken to the interpretation of international conventions which have the force of law in this country’.<sup>141</sup> The *Fothergill* formulation has been reiterated in subsequent caselaw, relying upon articles 31 and 32 of the Vienna Convention.<sup>142</sup> The relevant principles have been summarised as follows: one first looks for a clear meaning of the words used in the relevant article of the convention, bearing in mind that consideration of the purpose of an enactment is part of the process of interpretation. A strictly literal approach to interpretation is not appropriate in construing legislation which gives effect to or incorporates an international treaty. If the provisions of a particular article are ambiguous, it may be possible to resolve that ambiguity by giving a purposive construction to the convention looking at it as a whole by reference to its language as set out in the relevant United Kingdom legislative instrument. Secondly, an international convention should be interpreted ‘unconstrained by technical rules of English law, or by English legal precedent, but on broad principles of general acceptance’ as noted in *Fothergill*. Thirdly, as noted in article 31(1) of the Vienna Convention ‘a treaty should be interpreted in good faith and in accordance with the ordinary meaning to be given to the terms of the treaty in their context and in the light of its object and purpose’. Fourthly, if the above approach leaves the meaning of the relevant provision unclear or ambiguous or leads to a result which is manifestly absurd or unreasonable recourse may be had to ‘supplementary means of interpretation’ including *travaux préparatoires* as per article 32 of the Convention. Fifthly, subsequent commentaries on a convention or treaty have persuasive value only, depending on the cogency of their reasoning. Similarly, decisions of foreign courts on the interpretation of a convention or treaty text depend for their authority on the reputation and status of the court in question. Sixthly, aids to the interpretation of a treaty such as *travaux préparatoires*, international case-law and the writings of jurists are not a substitute for study of the terms of the convention.<sup>143</sup>

In a rather special position is the Human Rights Act 1998, which incorporated the European Convention on Human Rights. Section 3(1) provides that, ‘So far as it is possible to do so, primary and subordinate legislation must be read and given effect

in a way which is compatible with Convention rights', although this does not affect the validity, continuing operation or enforcement of any incompatible primary legislation.<sup>144</sup> The obligation imposed by s. 3 arises crucially in relation to both previous and subsequent enactments.<sup>145</sup> Where legislation cannot be rendered compatible with Convention rights, then a declaration of incompatibility can be made under s. 4 and Parliament may then modify the offending provisions under s. 10.

The courts have also adopted a broader, purposive approach to interpretation of domestic legislation in order to ensure its compatibility with the Convention.<sup>146</sup> In the process of interpreting domestic legislation so as to render it compatible if possible with the Convention rights, the courts 'must take into account'<sup>147</sup> any relevant jurisprudence from the European Court of Human Rights, although this is not a provision imposing an obligation to follow such case-law.<sup>148</sup> Reference should also be made to the growing importance of entry into the European Communities in this context. The case-law of the Communities demonstrates that fundamental rights are an integral part of the general principles of law, the observance of which the European Court of Justice seeks to ensure. The system provides that Community law prevails over national law and that the decisions of the European Court are to be applied by the domestic courts of the member states. The potential for change through this route is, therefore, significant.<sup>149</sup> Further, in interpreting domestic legislation made pursuant to the European Communities Act 1972 where the former appears to conflict with the Treaty of Rome (establishing the European Community), the House of Lords has held that a purposive approach should be adopted.<sup>150</sup>

## The United States<sup>151</sup>

As far as the American position on the relationship between municipal law and customary international law is concerned, it appears to be very similar to British practice, apart from the need to take the Constitution into account. The US Supreme Court in *Boos v. Barry* emphasised that, 'As a general proposition, it is of course correct that the United States has a vital national interest in complying with international law.' However, the rules of international law were subject to the Constitution.<sup>152</sup>

An early acceptance of the incorporation doctrine was later modified as in the UK. It was stated in the *Paquete Habana* case<sup>153</sup> that

international law is part of our law and must be ascertained and administered by the courts of justice of appropriate jurisdiction as often as questions of right depending upon it are duly presented for their determination.<sup>154</sup>

Similarly, the early pure incorporation cases gave way to a more cautious approach.<sup>155</sup>

The current accepted position is that customary international law in the US is federal law and that its determination by the federal courts is binding on the state courts,<sup>156</sup> although this masks some controversy as to the impact upon such incorporation upon democratic governance.<sup>157</sup> The similarity of approach with the UK is not surprising in view of common historical and cultural traditions, and parallel restraints upon the theories are visible. US courts are bound by the doctrine of precedent and the necessity to proceed according to previously decided cases, and they too must apply statute as against any rules of customary international law that do not accord with it.<sup>158</sup> The Court of Appeals reaffirmed this position in the *Committee of United States Citizens Living in Nicaragua v. Reagan* case,<sup>159</sup> where it was noted that ‘no enactment of Congress can be challenged on the ground that it violates customary international law’.<sup>160</sup>

It has been noted that the political and judicial organs of the United States have the power to ignore international law, where this occurs pursuant to a statute or ‘controlling executive act’. This has occasioned much controversy,<sup>161</sup> as has the general relationship between custom and inconsistent pre-existing statutes.<sup>162</sup> However, it is now accepted that statutes supersede earlier treaties or customary rules of international law.<sup>163</sup> It has also been held that it would run counter to the Constitution for a court to decide that a decision of the International Court of Justice overrules a binding decision of the US Supreme Court and thus affords a judicial remedy to an individual for a violation of the Constitution.<sup>164</sup> However, the question of the impact of a ruling of the International Court upon US courts has been discussed in the light of decisions of the former<sup>165</sup> as to the violation of the Vienna Convention on Consular Relations, 1963 by the failure to permit access to consular officials by imprisoned foreigners.<sup>166</sup>

There does exist, as in English law, a presumption that legislation does not run counter to international law and, as it was stated by the Court in *Schroeder v. Bissell*,<sup>167</sup>

unless it unmistakably appears that a congressional act was intended to be in disregard of a principle of international comity, the presumption is that it was intended to be in conformity with it.<sup>168</sup>

The relationship between US law and customary law has been the subject of re-examination in the context of certain human rights situations. In *Filartiga v. Pena-*

*Irala*,<sup>169</sup> the US Court of Appeals for the Second Circuit dealt with an action brought by Paraguayans against a Paraguayan for the torture and death of the son of the plaintiff. The claim was based on the Alien Tort Statute of 1789<sup>170</sup> which provides that '[t]he district courts shall have original jurisdiction of any civil action by an alien for a tort only, committed in violation of the law of nations'. The Court of Appeals held that torture constituted a violation of international customary law and was thus actionable. The Court accordingly held against the defendant despite the fact that both parties were alien and all the operative acts occurred in Paraguay. The Court also noted that in ascertaining the content of international law, the contemporary rules and principles of international law were to be interpreted and not those as of the date of the prescribing statute.<sup>171</sup> Other cases came before the courts in which the incorporation of international customary law provisions concerning human rights issues was argued with mixed success.<sup>172</sup> An attempt to obtain a judgment in the US against the Republic of Argentina for torturing its own citizens, however, ultimately foundered upon the doctrine of sovereign immunity,<sup>173</sup> while it has been held that acts of 'international terrorism' are not actionable under the Alien Tort Statute.<sup>174</sup> In *Kadić v. Karadžić*,<sup>175</sup> the US Court of Appeals for the Second Circuit held that claims based on official torture and summary executions did not exhaust the list of actions that may be covered by the Alien Tort Statute and that allegations of genocide, war crimes and other violations of international humanitarian law would also be covered.<sup>176</sup> However, in *Sosa v. Alvarez-Machain*,<sup>177</sup> the Supreme Court held that the Alien Tort Statute was a jurisdictional statute creating no new causes of action and enacted on the understanding that the common law would provide a cause of action for the modest number of international law violations thought to carry personal liability at the time, being offences against ambassadors, violation of safe conducts, and piracy. The federal courts, it was declared, should not recognise claims under federal common law for violations of any international law norm with less 'definite content and acceptance among civilized nations' than these particular offences deemed to exist at the date of the adoption of the act.<sup>178</sup> Accordingly, both 'a specificity comparable to the features of the 18th-century paradigms' and a foundation resting upon 'a norm of international character accepted by the civilized world' were required in order to form the basis of a claim under the statute.<sup>179</sup>

The ambit of the Alien Tort Statute was further limited by the Supreme Court in *Kiobel v Royal Dutch Corporation*, where the court in examining whether and under what circumstances the courts may recognise a cause of action under the Act for violations of the law of nations occurring within the territory of a sovereign other than the United States, held that the presumption against extraterritoriality applied to claims under the Act, and that nothing in the statute rebutted that presumption.<sup>180</sup>

The relative convergence of practice between Britain and the United States with respect to the assimilation of customary law is not reflected as regards the treatment of international treaties.<sup>181</sup> In the United Kingdom, it is the executive branch which negotiates, signs and ratifies international agreements, with the proviso that parliamentary action is required prior to the provisions of the agreement being accepted as part of English law. In the United States, on the other hand, Article VI Section 2 of the Constitution provides that:

all Treaties made or which shall be made with the authority of the United States, shall be the supreme law of the land and the Judges in every state shall be bound thereby, anything in the Constitution or Laws of any state to the contrary notwithstanding.<sup>182</sup>

There is also a difference in the method of approval of treaties, for Article II of the Constitution notes that while the President has the power to make international agreements, he may only ratify them if at least two-thirds of the Senate approve.

There is an exception and this is the institution of the executive agreements. These are usually made by the President on his own authority, but still constitute valid treaties within the framework of international law. As distinct from ordinary treaties, the creation of executive agreements is not expressly covered by the Constitution, but rather implied from its terms and subsequent practice, and they have been extensively used. The Supreme Court, in cases following the 1933 Litvinov Agreement, which established US recognition of the Soviet government and provided for the assignment to the US of particular debts owing to the USSR, emphasised that such executive agreements possessed the same status and dignity as treaties made by the President with the advice and consent of the Senate under Article II of the Constitution.<sup>183</sup>

American doctrines as to the understanding of treaty law are founded upon the distinction between 'self-executing' and 'non-self-executing' treaties.<sup>184</sup> The former are able to operate automatically within the domestic sphere, without the need for any municipal legislation, while the latter require enabling acts before they can function inside the country and bind the American courts. Self-executing treaties apply directly within the United States as part of the supreme law of the land, whereas those conventions deemed not self-executing are obliged to undergo a legislative transformation and, until they do so, they cannot be regarded as legally enforceable against American citizens or institutions.<sup>185</sup>

But how does one know when an international agreement falls into one category or the other? This matter has absorbed the courts of the United States for many

years, and the distinction appeared until recently to have been made upon the basis of a variety of factors including political content. In other words, where a treaty involves political questions of definition or exposition, then the issue should be left to the legislative organs of the nation, rather than automatic operation.<sup>186</sup> Examples of this would include the acquisition or loss of territory and financial arrangements. The Supreme Court in *Edye v. Robertson*<sup>187</sup> declared that treaties which

contain provisions which are capable of enforcement as between private parties in the courts of the country...[are] in the same category as other laws of Congress.

This would seem to mean that an international convention would become a law of the land, where its terms determine the rights and duties of private citizens, and contrasts with the position where a political issue is involved and the treaty is thereby treated as non-self-executing.

Of course such generalisations as these are bound to lead to considerable ambiguity and doubt in the case of very many treaties; and the whole matter was examined again in 1952 before the Supreme Court of California in *Sei Fujii v. California*.<sup>188</sup> The plaintiff was a Japanese citizen who had purchased some land in 1948 in California. By legislation enacted in that state, aliens had no right to acquire land. To prevent the property from going to the state, the plaintiff argued that, amongst other things, such legislation was not consistent with the Charter of the United Nations, an international treaty which called for the promotion of human rights without racial distinction.

The issue raised was whether the UN Charter was a self-executing treaty and, by virtue of such, part of the law of the land, which would supersede inconsistent local statutes. The Court declared that, in making a decision as to whether a treaty was self-executing or not, it would have to consult the treaty itself to try to deduce the intentions of the signatories and examine all relevant circumstances. Following *Edye's* case it would have to see whether the provisions of the treaty laid down rules that were to be enforceable of themselves in the municipal courts.

The Court concluded after a comprehensive survey that the relevant provisions of the UN Charter were not intended to be self-executing. They laid down various principles and objectives of the United Nations Organisation, but 'do not purport to impose legal obligations on the individual member nations or to create rights in private persons'. The Court held that it was obvious that further legislative action by the signatories would be called for to turn the principles of the UN into domestic laws binding upon the individual citizens of states.<sup>189</sup> Accordingly, they could not be regarded as part of the law of the land and could not operate to deflect the

Californian legislation in question. The case was decided in favour of the plaintiff, but on other grounds altogether.<sup>190</sup>

However, in *Medellin v. Texas*, the US Supreme Court focused heavily upon a textual analysis of the relevant treaty (the UN Charter) rather than upon a wider range of factors and concluded that the Charter (and the Statute of the International Court of Justice and the Optional Protocol to the Vienna Convention on Consular Relations) were not self-executing and in the absence of incorporation into US law, the international instruments in question would not be given judicial effect.<sup>191</sup> Accordingly, the argument made in *Sei Fujii* was developed and explicitly accepted.

As is the case with the UK system, it is possible for the US legislature to take action which not only takes no account of international law rules but may be positively contrary to them, and in such an instance the legislation would be supreme within the American jurisdiction.

In *Diggs v. Schultz*,<sup>192</sup> for example, the Court had to consider the effect of the Byrd Amendment which legalised the importation into the USA of strategic materials, such as chrome from Rhodesia, a course of action which was expressly forbidden by a United Nations Security Council resolution which in the circumstances was binding. The Court noted that the Byrd Amendment was 'in blatant disregard of our treaty undertakings' but concluded that: 'under our constitutional scheme, Congress can denounce treaties if it sees fit to do so, and there is nothing the other branches of government can do about it.' Although in municipal terms the Amendment was unchallengeable, the United States was, of course, internationally liable for the breach of an international legal rule.<sup>193</sup>

However, there is a presumption that Congress will not legislate contrary to the international obligations of the state<sup>194</sup> and a principle of interpretation that where an act and a treaty deal with the same subject, the courts will seek to construe them so as to give effect to both of them without acting contrary to the wording of either. Where the two are inconsistent, the general rule has been posited that the later in time will prevail, provided the treaty is self-executing.<sup>195</sup>

The question of a possible conflict between treaty obligations and domestic legislation was raised in *United States v. Palestine Liberation Organisation*.<sup>196</sup> The Anti-Terrorism Act of the previous year<sup>197</sup> provided for the closure of all PLO offices in the United States and this was construed by the Attorney-General to include the PLO mission to the United Nations, an action which would have breached the obligations of the US under the United Nations Headquarters Agreement. However, the District Court found that it could not be established that the legislation clearly and unequivocally intended that an obligation arising out of the Headquarters Agreement, a valid treaty, was to be violated.<sup>198</sup>

The issue of the relationship between international treaties and municipal law came before the US Supreme Court in *Breard v. Greene*.<sup>199</sup> The Court noted that ‘respectful consideration’ should be given to the interpretation of an international treaty by a relevant international court;<sup>200</sup> however, ‘it has been recognised in international law that absent a clear and express statement to the contrary, the procedural rules of the forum State govern the implementation of the treaty in that State’.<sup>201</sup> Accordingly, the effect of resort to a domestic procedural rule might result in preventing the provision of an international treaty from being applied in any given case. The Supreme Court also affirmed that international treaties under the Constitution were recognised as the ‘supreme law of the land’, but so were the provisions of the Constitution. An Act of Congress was ‘on full parity’ with a treaty, so that a later statute would render an earlier treaty null to the extent of any conflict.<sup>202</sup>

## Other countries

### ***(i) Other common law and related legal systems***

In other countries where the English common law was adopted, such as the majority of Commonwealth states and, for example, Israel,<sup>203</sup> it is possible to say that in general the same principles apply. Customary law is regarded on the whole as part of the law of the land.<sup>204</sup> Municipal laws are presumed not to be inconsistent with rules of international law, but in cases of conflict the former have precedence.

The Canadian Supreme Court in the *Reference Re Secession of Quebec* judgment<sup>205</sup> noted that it had been necessary for the Court in a number of cases to look to international law to determine the rights or obligations of some actor within the Canadian legal system.<sup>206</sup> As far as treaties are concerned, Lord Atkin expressed the general position in *Attorney-General for Canada v. Attorney-General for Ontario*,<sup>207</sup> in a case dealing with the respective legislative competences of the Dominion Parliament and the provincial legislatures. He noted that within the then British Empire it was well enshrined that the making of a treaty was an executive act, while the performance of its obligations, if they involved alteration of the existing domestic law, required legislative action. ‘The question’, remarked Lord Atkin,

is not how is the obligation formed, that is the function of the executive, but how is the obligation to be performed, and that depends upon the authority of the competent legislature or legislatures.<sup>208</sup>

The doctrine that customary international law forms part of the domestic law of Canada has been reaffirmed in a number of cases.<sup>209</sup> This has also been accepted in New Zealand<sup>210</sup> and in Australia.<sup>211</sup> In *Horgan v. An Taoiseach*, it was affirmed that ‘established principles of customary international law may be incorporated into Irish domestic law *providing* that they are not contrary to the provisions of the Constitution, statute law or common law’.<sup>212</sup> The relationship between treaties and domestic law was examined by the High Court of Australia in *Minister of State for Immigration and Ethnic Affairs v. Teoh*.<sup>213</sup> The Court upheld the traditional doctrine to the effect that the provisions of an international treaty to which Australia is a party do not form part of Australian law, and do not give rise to rights, unless those provisions have been validly incorporated into municipal law by statute.<sup>214</sup> It was noted that this was because of the constitutional separation of functions whereby the executive made and ratified treaties, while the legislature made and altered laws.<sup>215</sup> The majority of the Court, however, went on to hold that the fact that a treaty had not been incorporated did not mean that its ratification by the executive held no significance for Australian law. Where a statute or subordinate legislation was ambiguous, the courts should favour that construction which accorded with Australia’s obligations under the particular treaty,<sup>216</sup> while a statute generally had to be interpreted as far as its language permitted so that it was in conformity and not in conflict with the established rules of international law.<sup>217</sup> Indeed, the Court felt that a narrow conception of ambiguity in this context should be rejected.<sup>218</sup> Referring to *Ex Parte Brind*,<sup>219</sup> the Court stated that this principle was no more than a canon of construction and did not import the terms of the treaty into municipal law.<sup>220</sup> Moving beyond this approach which is generally consistent with common law doctrines, the majority of the Court took the view that ratification of a convention itself would constitute an adequate foundation for a legitimate expectation (unless there were statutory or executive indications to the contrary) that administrative decision-makers would act in conformity with the unincorporated but ratified convention.<sup>221</sup> This particular proposition is controversial in legal doctrine, but is an interesting example of the fact that internal decision-makers may not always be expected to be immune from the influence of obligations undertaken by the state.<sup>222</sup>

There are further signs of an increasingly flexible approach. For example, in *Hosking & Hosking v. Runtig and Pacific Magazines NZ Ltd*,<sup>223</sup> the New Zealand Court of Appeal referred to the ‘increasing recognition of the need to develop the common law consistently with international treaties to which New Zealand is a party. That is an international trend. The historical approach to the State’s international obligations as having no part in the domestic law unless incorporated by statute is now recognised as too rigid.’ Further, the Canadian Supreme Court, in noting that genocide was a crime in both customary international law and treaty law,

declared that international law was therefore called upon to play a crucial role as an aid in interpreting domestic law, particularly as regards the elements of the crime of incitement to genocide, and emphasised the importance of interpreting domestic law in a manner that accorded with the principles of customary international law and with Canada's treaty obligations.<sup>224</sup> This, however, would go further than most common law states would accept.

Although the basic approach adopted by the majority of common law states is clear, complications have arisen where the country in question has a written constitution, whether or not specific reference is made therein to the treatment of international agreements. The use of international law in interpreting the Constitution has occasioned much debate in Australia.<sup>225</sup> In *Ahmed Ali Al-Kateb v. Godwin*, for example, two judges of the High Court of Australia came to radically different conclusions. One judge regarded the view that the Constitution should be read consistently with the rules of international law as 'heretical',<sup>226</sup> while another declared that 'opinions that seek to cut off contemporary Australian law (including constitutional law) from the persuasive force of international law are doomed to fail'.<sup>227</sup> This debate reflects differing approaches to constitutional interpretation.<sup>228</sup>

The Indian Constitution refers only in the vaguest of terms to the provisions of international law,<sup>229</sup> whereas by contrast the Irish Constitution clearly states that the country will not be bound by any treaty involving a charge upon public funds unless the terms of the agreement have been approved by the Dáil.<sup>230</sup> Under article 169(3) of the Cyprus Constitution, treaties concluded in accordance with that provision have as from publication in the Official Gazette of the Republic 'superior force to any municipal law on condition that such treaties, conventions and agreements are applied by the other party thereto'.<sup>231</sup> In such cases where there is a written constitution, serious questions of constitutional law may be involved, and one would have to consider the situation as it arises and within its own political context.<sup>232</sup> But in general common law states tend to adopt the British approach.

## **(ii) Civil law systems**

The practice of those states which possess the civil law system, based originally on Roman law, manifests certain differences.<sup>233</sup> The Basic Law of the Federal Republic of Germany,<sup>234</sup> for example, specifically states in article 25 that 'the general rules of public international law are an integral part of federal law. They shall take precedence over the laws and shall directly create rights and duties for the inhabitants of the federal territory.'<sup>235</sup> This provision, which not only treats international law as part of municipal law but regards it as superior to municipal legislation, has been the subject of a great deal of controversy as writers and lawyers

have tried to establish whether international legal rules would invalidate any inconsistent municipal legislation and, indeed, whether international rules could override the constitution. Similarly, the phrase ‘general rules of public international law’ has led to problems over interpretation as it may refer to all aspects of international law, including customary and treaty rules, or merely general principles common to all, or perhaps only certain nations.<sup>236</sup> German courts will seek to interpret domestic law consistently with international law.<sup>237</sup>

As far as treaties are concerned, the German federal courts will regard these as superior to domestic legislation, though they will not be allowed to operate so as to affect the constitution. Article 59 of the Basic Law declares that treaties which regulate the political relations of the federation or relate to matters of federal legislation shall require the consent or participation, in the form of a federal law, of the bodies competent in any specific case for such federal legislation. Thereafter such treaties will be treated as incorporated into German law, but with the status (no higher) of a federal law. Such laws may indeed be challenged before the German courts by means of a constitutional complaint if the treaty in question contains provisions directly encroaching upon the legal sphere of the individual.<sup>238</sup>

Article 91(1) of the Netherlands Constitution 1983 requires the prior approval of Parliament before treaties, or their denunciation, become binding, while article 91(3) provides that any provisions of a treaty that conflict with the Constitution or which lead to conflicts with it may be approved by the Chambers of the Parliament, provided that at least two-thirds of the votes cast are in favour. Article 93 states that provisions of treaties and of decisions by international organisations which may be binding by virtue of their contents are to become binding after they have been published, while article 94 provides that statutory regulations in force within the kingdom shall not be applicable if such application is in conflict with provisions of treaties that are binding on all persons or with resolutions by international institutions.<sup>239</sup> Customary international law is not referred to in the Constitution. It is deemed to apply internally, although it seems that statute will prevail in cases of conflict.<sup>240</sup> It is for the courts to establish whether the provisions of a treaty or decision by an international organisation are binding on all persons within the meaning of articles 93 and 94 of the Constitution.<sup>241</sup>

In a provision contained in other constitutions, article 10 of the Italian Constitution of 1947 stipulates that the Italian legal order ‘shall conform with the generally recognised rules of international law’. This is interpreted to indicate that international customary law will override inconsistent ordinary national legislation.<sup>242</sup> Article 8(1) of the Portuguese Constitution provides that the rules and principles of general or customary international law are an integral part of Portuguese law,<sup>243</sup> while under article 87 of Poland’s Constitution of 1997, a ratified

international treaty, equal to a statute, is one of the sources of law.<sup>244</sup> The Supreme Court of Belgium has taken the view that directly effective treaty provisions have superiority over the Constitution,<sup>245</sup> as well as over a conflicting legislative act.<sup>246</sup>

The French Constitution of 1958 declares that treaties duly ratified and published shall operate as laws within the domestic system.<sup>247</sup> However, the Constitution provides that, although in principle it is the President of the Republic who negotiates and ratifies ordinary treaties under Article 52. However with regard to important treaties such as peace treaties, commercial treaties which entail some form of financial outlay, treaties relating to international organisations, treaties modifying legislation, treaties involving the cession, exchange or acquiring of territory and treaties affecting personal status, ratification must take place by Act of Parliament, thus effectively approximating this to the common law dualist approach (Article 53). Once the relevant legislation has been passed, the agreement is promulgated and becomes binding upon the courts. Article 55 of the Constitution provides that duly ratified or approved treaties or agreements shall upon publication override domestic laws, subject only to the application of the treaty or agreement by the other party or parties to the treaty.<sup>248</sup> It is also now accepted that the French courts may declare a statute inapplicable for conflicting with an earlier treaty.<sup>249</sup> However, the Cour de Cassation has held that the supremacy of international agreements in the domestic order does not extend to constitutional provisions.<sup>250</sup>

In 1993, South Africa adopted a new (interim) constitution.<sup>251</sup> Whereas the previous constitutions of 1910, 1961 and 1983 had been silent on the question of international law, the 1993 Constitution contained several relevant provisions. Section 231(4) states that 'the rules of customary international law binding on the Republic, shall, unless inconsistent with this Constitution or an Act of Parliament, form part of the law of the Republic'. This formulation confirms essentially the common law position and would also suggest that the principle of *stare decisis* is not applicable to customary international law. As far as treaties are concerned, the previous position whereby an Act of Parliament was required in order to incorporate an international agreement has been modified. While the negotiation and signature of treaties is a function of the President (section 82(1)i), ratification is now a function of the Parliament (section 231(2)).<sup>252</sup> Section 231(3) provides that 'such international agreement shall be binding on the Republic and shall form part of the law of the Republic, provided Parliament expressly so provides and such agreement is not inconsistent with this constitution'. Thus South Africa has moved from the British system to a position akin to the civil law tradition. It should also be noted that this interim constitution expressly provides that the National Defence Force shall 'not breach international customary law binding on the Republic relating to aggression', while in armed conflict, it would 'comply with its obligations under

international customary law and treaties binding on the Republic' (section 227(2)).<sup>253</sup>

These provisions were considered and refined by the Constitutional Assembly, which on 8 May 1996 adopted a new constitution.<sup>254</sup> Section 231(1) of this constitution provides that the negotiating and signing of all international agreements is the responsibility of the national executive, while such an agreement would only bind the Republic after approval by resolution in both the National Assembly and the National Council of Provinces.<sup>255</sup> Any international agreement becomes domestic law when enacted into law by national legislation, although a self-executing provision of an agreement that has been approved by Parliament is law in the Republic unless it is inconsistent with the Constitution or an Act of Parliament.<sup>256</sup> Section 232 provides that customary international law is law in the Republic unless it is inconsistent with the Constitution or an Act of Parliament, while section 233 stipulates that when interpreting any legislation, every court must prefer any reasonable interpretation of the legislation which is consistent with international law over any alternative interpretation that is inconsistent with international law. It is also to be particularly noted that section 200(2) of the Constitution states that the primary object of the defence force is to defend and protect the Republic, its territorial integrity and its people, 'in accordance with the Constitution and the principles of international law regulating the use of force'.<sup>257</sup>

The Russian Federation adopted a new constitution in 1993.<sup>258</sup> Under article 86, the President negotiates and signs treaties and signs the ratification documents, while under article 106 the Federal Council (the upper chamber of the federal parliament) must consider those federal laws adopted by the State Duma (the lower chamber) that concern the ratification and denunciation of international agreements. The Constitutional Court may review the constitutionality of treaties not yet in force (article 125(2)) and treaties that conflict with the Constitution are not to be given effect (article 125(6)). Article 15(4) of the new constitution provides that 'the generally recognised principles and norms of international law and the international treaties of the Russian Federation shall constitute part of its legal system. If an international treaty of the Russian Federation establishes other rules than those stipulated by the law, the rules of the international treaty shall apply.' Thus both treaty law and customary law<sup>259</sup> are incorporated into Russian law, while treaty rules have a higher status than domestic laws.<sup>260</sup> The Constitutional Court takes the view that customary international law and international treaties ratified by Russia are norms incorporated into Russian law.<sup>261</sup>

Under article 73(3) of the Japanese Constitution of 1946,<sup>262</sup> the Cabinet has authority to conclude treaties with the prior or subsequent approval of the Diet,

although executive agreements may be entered into without such approval, usually by simple exchange of notes. Promulgation of a treaty takes place by publication in the Official Gazette under the name of the Emperor once the Diet has approved and the Cabinet ratified the agreement (article 7). Article 98(2) provides that 'treaties concluded by Japan and established laws of nations shall be faithfully observed' and this provision is taken as incorporating international law, both relevant treaty and customary law, into Japan's legal system.<sup>263</sup> Japan has also experienced some difficulty<sup>264</sup> in the context of the relative definition of self-governing and non-self-governing treaties.<sup>265</sup>

### ***(iii) Conclusion***

This survey of the attitudes adopted by various countries of the common law and civil law traditions leads to a few concluding remarks. The first of these is that a strict adherence to either the monist or the dualist position will not suffice. Most countries accept the operation of customary rules within their own jurisdictions, providing there is no conflict with existing laws, and some will allow international law to prevail over municipal provisions. One can regard this as a significant element in extending the principles and protection of international law, whether or not it is held that the particular provision permitting this, whether by constitutional enactment or by case-law, illustrates the superiority of municipal law in so acting.

The situation as regards treaties is much more complex, as different attitudes are maintained by different states. In some countries, certain treaties will operate internally by themselves (self-executing) while others must undergo a process of domestic legalisation. There are countries where legislation is needed for virtually all international agreements: for example, Belgium.<sup>266</sup> It is by no means settled as a general principle whether treaties prevail over domestic rules. Some countries allow treaties to supersede all municipal laws, whether made earlier or later than the agreement. Others, such as Norway, adopt the opposite stance. Where there are written constitutions, an additional complicating factor is introduced and some reasonably stable hierarchy incorporating ordinary laws, constitutional provisions and international law has to be maintained. This is particularly so where a federal system is in operation. It will be up to the individual country to adopt its own list of preferences.<sup>267</sup>

Of course, such diverse attitudes can lead to confusion, but in the light of the present state of international law, it is inevitable that its enforcement and sphere of activity will become entangled with the ideas and practices of municipal law. Indeed, it is precisely because of the inadequate enforcement facilities that lie at the disposal of international law that one must consider the relationship with municipal

law as of more than marginal importance. This is because the extent to which domestic courts apply the rules of international law may well determine the effectiveness of international legislation and judicial decision-making.

However, to declare that international legal rules therefore prevail over all relevant domestic legislation at all times is incorrect in the vast majority of cases and would be to overlook the real in the face of the ideal. States jealously guard their prerogatives, and few are more meaningful than the ability to legislate free from outside control; and, of course, there are democratic implications. The consequent supremacy of municipal legal systems over international law in the domestic sphere is not exclusive, but it does exist as an undeniable general principle.

It is pertinent to refer here briefly to the impact of the European Union.<sup>268</sup> The European Court of Justice has held that Community law has supremacy over ordinary national law,<sup>269</sup> and indeed over domestic constitutional law.<sup>270</sup> In addition to the treaties creating the EC,<sup>271</sup> there is a great deal of secondary legislation issuing forth from its institutions, which can apply to the member states. This takes the form of regulations, decisions or directives. Of these, the first two are directly applicable and enforceable within each of the countries concerned without the need for enabling legislation. While it is true that the legislation for this type of activity has been passed – for example section 2(1) of the European Communities Act 1972<sup>272</sup> in the UK, which permits in advance this form of indirect law-making, and is thus assimilated into municipal law – the fact remains that the member states have accepted an extraterritorial source of law, binding in certain circumstances upon them. The effect is thus that directly effective Community law has precedence over inconsistent UK legislation. This was confirmed by the House of Lords in *Factortame Ltd v. Secretary of State for Transport*.<sup>273</sup> It was further noted that one of the consequences of UK entry into the European Communities and the European Communities Act 1972 was that an interim injunction could be granted, the effect of which would be to suspend the operation of a statute on the grounds that the legislation in question allegedly infringed Community law. This is one illustration of the major effect which joining the Community has had in terms of the English legal system and previously accepted legal principles. The mistake, however, should not be made of generalising from this specific relationship to the sphere of international law as a whole.

## **Justiciability, act of state and related doctrines**

An issue is justiciable basically if it can be tried according to law.<sup>274</sup> It would, therefore, follow that matters that fall within the competence of the executive branch of government are not justiciable before the courts. Accordingly, the test as to

whether a matter is or is not justiciable involves an illumination of that grey area where the spheres of executive and judiciary merge and overlap. Recent years have seen a reduction in the sphere of exclusive competence of the executive free from judicial oversight and a number of important cases have sought to redraw the boundary. Justiciability as a concept includes the doctrine of act of state, which generally concerns the activities of the executive in relations with other states,<sup>275</sup> but in the context of international law and municipal courts it refers particularly to the doctrine that no state can exercise jurisdiction over another state.<sup>276</sup> As such it is based upon the principles of the sovereignty and equality of states.<sup>277</sup> Non-justiciability acts as an evidential bar, since an issue cannot be raised or proved, in contrast to sovereign immunity, which provides that the courts cannot exercise the jurisdiction that exists with regard to the matter in question due to the status of the entity or individual concerned, although it is open to the state concerned to waive its immunity and thus remove the jurisdictional bar.<sup>278</sup> Non-justiciability will usually concern a clear inter-state relationship or situation which is impleaded in a seemingly private action, while immunity issues will invariably arise out of a state-private party relationship not usually relating to inter-state activities as such.<sup>279</sup>

The concept of non-justiciability rests upon a number of pillars, ranging from prerogative of the executive in the areas of foreign policy and national defence,<sup>280</sup> where it is essentially a rule of law principle in a democratic system of government delineating the separation of powers,<sup>281</sup> to respect for the sovereignty and independence of foreign states.<sup>282</sup> Accordingly, both domestic and foreign executive acts are covered. With regard to the former,<sup>283</sup> the courts will refuse, or at the least be extremely reluctant, to adjudicate upon an exercise of sovereign power, such as making war and peace, making international treaties or ceding territory.<sup>284</sup> This would include the definition of territories within the UK<sup>285</sup> as well as the conduct of foreign affairs.<sup>286</sup> Lord Hoffmann held in *R v. Jones* that ‘the making of war and peace and the disposition of the armed forces has always been regarded as a discretionary power of the Crown into the exercise of which the courts will not enquire’.<sup>287</sup> As far as the latter instance is concerned, Lord Wilberforce declared in *Buttes Gas and Oil Co. v. Hammer (No. 3)*:<sup>288</sup>

there exists in English law a general principle that the courts will not adjudicate upon the transactions of foreign sovereign states...it seems desirable to consider this principle...not as a variety of ‘act of state’ but one for judicial restraint or abstention.<sup>289</sup>

Such a principle was not one of discretion, but inherent in the nature of the judicial process. Although that case concerned litigation in the areas of libel and conspiracy,

the House of Lords felt that a determination of the issue would have involved the court in reviewing the transactions of four sovereign states and having to find that part of those transactions was contrary to international law. Quite apart from the possibility of embarrassment to the foreign relations of the executive,<sup>290</sup> there were no judicial or manageable standards by which to judge such issues.<sup>291</sup> It has been held, for example, that judicial review would not be appropriate in a matter which would have serious international repercussions and which was more properly the sphere of diplomacy.<sup>292</sup> It has also been held that the courts could not adjudicate upon the claimed international law fishing rights of Mauritius within the waters of the British Indian Ocean Territory in the absence of that state as a party to the case.<sup>293</sup> Although the Court of Appeal has noted that the keeping and disposal of foreign bank notes for commercial purposes in the UK could not be treated as sovereign acts so as to bring the activity within the protection of the *Buttes* non-justiciability doctrine, the acts in question had to be of a sovereign rather than of a commercial nature and performed within the territory of a foreign state.<sup>294</sup> Legislation can, of course, impinge upon the question as to whether an issue is or is not justiciable,<sup>295</sup> while the State Immunity Act 1978 removed sovereign immunity for commercial transactions.<sup>296</sup> One of the questions that the Court of Appeal addressed in *Maclaine Watson v. International Tin Council*<sup>297</sup> was whether in such circumstances the doctrine of non-justiciability survived. It was emphasised that the two concepts of immunity and non-justiciability had to be kept separate and concern was expressed that the *Buttes* non-justiciability principle could be used to prevent proceedings being brought against states in commercial matters, contrary to the Act.<sup>298</sup>

The issue of justiciability was discussed in *Maclaine Watson v. Department of Trade and Industry* both by the Court of Appeal<sup>299</sup> and by the House of Lords<sup>300</sup> in the context of the creation of the collapsed International Tin Council by a group of states by a treaty which was unincorporated into English law. Kerr LJ emphasised that the doctrine in this context rested upon the principles that unincorporated treaties do not form part of the law of England and that such international agreements were not contracts which the courts could enforce.<sup>301</sup> However, this did not prevent reference to an unincorporated treaty where it was necessary or convenient, for example in order to assess the legal nature of the International Tin Council.<sup>302</sup> Lord Oliver in the House of Lords decision reaffirmed the essence of the doctrine of non-justiciability. He noted that it was

axiomatic that municipal courts have not and cannot have the competence to adjudicate upon or to enforce the rights arising out of transactions entered into by independent sovereign states between themselves on the plane of

international law.<sup>303</sup>

However, this did not mean that the court must never look at or construe a treaty. A treaty could be examined as a part of the factual background against which a particular issue has arisen.<sup>304</sup> It was pointed out that the creation of the Council by a group of states was a sovereign act and that the adjudication of the rights and obligations between the member states of the Council and the Council itself could only be undertaken on the international plane.<sup>305</sup> In other words, the situation appeared to involve not only the *Buttes* form of act of state non-justiciability, but also non-justiciability on the basis of an unincorporated treaty.<sup>306</sup>

Hoffmann LJ in *Littrell v. USA (No. 2)*<sup>307</sup> pointed out in the context of a status of forces agreement (providing for the placement of NATO troops in the UK) that the courts could look at such agreement to ensure that the foreign troops were here by invitation since the conclusion of a treaty was as much a fact as any other,<sup>308</sup> but this could not be taken to mean that the courts would actually enforce the terms of an unincorporated treaty. Additionally, it would not be open to the courts to determine whether a foreign sovereign state had broken a treaty.<sup>309</sup> The basic position is that: 'Ordinarily speaking, English courts will not rule upon the true meaning and effect of international instruments which apply only at the level of international law.'<sup>310</sup> Further, the English courts are likely to decline to seek to determine an issue where this could be 'damaging to the public interest in the field of international relations, national security or defence'.<sup>311</sup> Lord Bingham noted in *R v. Jones* that the courts would be 'very slow to adjudicate upon rights arising out of transactions entered into between sovereign states on the plane of international law'.<sup>312</sup> However, the rule is not absolute.<sup>313</sup> The courts are willing to look at the terms of an unincorporated treaty in specific situations: first, as noted above, in order to ascertain certain facts such as the existence and terms of, and the parties to, a treaty or where the treaty in question is incorporated into a contract or referred to in domestic legislation and is necessary to a particular decision, and secondly, where the national courts have to adjudicate upon the interpretation of a particular international treaty in order to determine private rights and obligations under domestic law.<sup>314</sup> The latter proposition would operate, for example, with regard to extradition and asylum cases where a view has to be taken with regard to the Geneva Convention Relating to the Status of Refugees, 1951 as a result of domestic legislation, the Asylum and Immigration Act 1996.<sup>315</sup> In *Republic of Ecuador v. Occidental Exploration and Production Co.*, the Court of Appeal, while affirming this principle, emphasised that context was always important, so that a treaty intended by its signatories to give rise to rights in favour of private investors capable of enforcement under the treaty in consensual arbitration against one or other of its

signatory states in domestic proceedings would fall within this exception and thus be justiciable.<sup>316</sup> The exception to non-justiciability laid down in the *CND* and *Occidental* cases was reaffirmed in *In the Matter of AY Bank Ltd*,<sup>317</sup> where it was held that the right to prove in the liquidation of a joint venture bank in the UK (involving the National Bank of Yugoslavia), upon the dissolution of the Federal Republic of Yugoslavia and its National Bank and consequential apportionment among the successor states, arose in domestic law, so that the existence of the Agreement on Succession Issues, signed by the successor states formally apportioning the assets and debts of the Former Yugoslavia, did not render the question non-justiciable. Further, a treaty may be rendered justiciable where a government or public official expressly states that he or she has taken such treaty into consideration in reaching a decision or justifies the decision in relation to the terms of the treaty.<sup>318</sup>

The principle of non-justiciability, which includes but goes beyond the concept of act of state,<sup>319</sup> must exist in an international system founded upon sovereign and formally equal states.<sup>320</sup> Having said that, there is no doubt that the extent of the doctrine is open to question. While the courts would regard a question concerning the constitutionality of a foreign government as non-justiciable<sup>321</sup> and would not as a general rule inquire into the validity of acts done in a sovereign capacity, such as the constitutionality of foreign laws,<sup>322</sup> the latter proposition may be subject to limitation.<sup>323</sup> The House of Lords addressed the question in *Kuwait Airways Corporation v. Iraqi Airways Company*.<sup>324</sup> Lord Nicholls noted that in appropriate circumstances it was legitimate for an English court to have regard to the content of international law in deciding whether to recognise a foreign law and it did not flow inevitably from the non-justiciability principle that the judiciary must ignore a breach of international law committed by one state against another 'where the breach is plain and, indeed, acknowledged'.<sup>325</sup> In such cases, the difficulty discussed by Lord Wilberforce in *Buttes Gas and Oil* concerning the lack of judicial or manageable standards by which to deal with a sovereignty dispute between two foreign states did not apply.<sup>326</sup> The acceptability of a provision of foreign law had to be judged by contemporary standards and the courts had to give effect to clearly established rules of international law.<sup>327</sup> Where foreign legislation was adopted consequential upon a fundamental breach of international law (such as the Iraqi invasion of Kuwait in 1990 and seizure of its assets), enforcement or recognition of such law by the courts would be 'manifestly contrary to the public policy of English law'. Further, it was emphasised that international law recognised that a national court may decline to give effect to legislative and other acts of foreign states which are in violation of international law.<sup>328</sup> Lord Steyn noted that the extension of the public policy exception to recognition of foreign laws from human rights violations

to 'flagrant breaches of international law' was correct. Reference was made to the UN Charter, binding Security Council resolutions and international opinion in general.<sup>329</sup> Lord Hope emphasised that 'very narrow limits must be placed on any exception to the act of state rule', but there was no need for restraint on grounds of public policy 'where it is plain beyond dispute that a clearly established norm of international law has been violated'.<sup>330</sup> He concluded that 'a legislative act by a foreign state which is in flagrant breach of clearly established rules of international law ought not to be recognised by the courts of this country as forming part of the *lex situs* of that state'.<sup>331</sup>

The courts may also not feel constrained in expressing their views as to foreign sovereign activities where a breach of international law, particularly human rights, is involved<sup>332</sup> and may not feel constrained from investigating, in a dispute involving private rights, the legal validity of an act done by a citizen purporting to act on behalf of the sovereign or sovereign state.<sup>333</sup> It is clear that the courts will regard as non-justiciable policy decisions by the government concerning relationships with friendly foreign states, on the basis that foreign policy is pre-eminently an area for the government and not the courts.<sup>334</sup> In particular, a number of cases have laid down the proposition that decisions taken by the executive in its dealings with foreign states regarding the protection of British citizens abroad are nonjusticiable.<sup>335</sup>

This approach, however, is subject to some qualification.<sup>336</sup> This concerns in particular the evolving law of judicial review<sup>337</sup> both with regard to its scope concerning the executive and in terms of 'legitimate expectation',<sup>338</sup> or a reasonable expectation that a regular practice will continue. Where diplomatic protection of a national abroad is concerned, the Court of Appeal has noted that 'The Secretary of State must be free to give full weight to foreign policy considerations, which are not justiciable. However, this does not mean the whole process is immune from judicial scrutiny. The citizen's legitimate expectation is that his request will be "considered", and that in that consideration all relevant factors will be thrown into the balance.'<sup>339</sup> Taylor LJ referred, for example, in *ex parte Everett* to the 'normal expectation of every citizen' that, if he were subjected abroad to a violation of a fundamental right, the British government would not simply wash their hands of the matter and abandon him to his fate.<sup>340</sup> The Court in *Abbasi* concluded that judicial review would lie where the Foreign and Commonwealth Office, contrary to its stated policy, refused even to consider whether to make diplomatic representations on behalf of a subject whose fundamental rights were being violated. However, beyond this, no general proposition could be stated, being dependent upon the precise circumstances. In particular, there was no enforceable duty to protect the citizen, only a discretion.<sup>341</sup> In *Al-Rawi v. Secretary of State for Foreign and Commonwealth*

*Affairs*, the Court of Appeal denied that any such legitimate expectation as to the exercise of discretion would extend to the position of non-nationals.<sup>342</sup>

The approach in *Abbasi* was approved in *Kaunda v. The President of the Republic of South Africa* by the Constitutional Court of South Africa, which noted that ‘A decision as to whether, and if so, what protection should be given, is an aspect of foreign policy which is essentially the function of the executive.’<sup>343</sup> This did not mean that the South African courts had no jurisdiction to deal with issues concerned with diplomatic protection. Since the exercise of all public power was subject to constitutional control, this would also apply to an allegation that the government has failed to respond appropriately to a request for diplomatic protection. If, for instance, the decision were to be irrational or made in bad faith, the court could intervene to require the government to deal with the matter properly.<sup>344</sup>

Australian courts also have emphasised the importance of separation of powers and the need for courts to exercise considerable caution with regard to foreign policy, expressly citing the *Buttes* case.<sup>345</sup> The question of justiciability was one for the federal judicial branch.<sup>346</sup> It has been noted, for example, that any question of a dispute as to the assessment made by the executive and legislative branches of government of the ‘terrorist threat’ to the safety of the public would not be justiciable, but that this situation would change upon the adoption of relevant legislation.<sup>347</sup> In *Habib v. Australia*,<sup>348</sup> the full court of the Federal Court of Australia decided that the doctrine of non-justiciability or act of state did not prevent consideration of a case concerning an Australian citizen, alleging torture in Pakistan, Egypt and Guantanamo Bay by state officials of the respective states in view of the serious nature of the alleged human rights abuses.

The US courts have similarly recognised the existence of areas of non-justiciability for sensitive political reasons. This is usually referred to as the political question doctrine and operates to prevent the courts from considering issues of political delicacy in the field of foreign affairs.<sup>349</sup> In the *Greenham Women against Cruise Missiles v. Reagan case*,<sup>350</sup> for example, the Court held that a suit to prevent the US deployment of cruise missiles at an air force base in the UK constituted a non-justiciable political question, not appropriate for judicial resolution.<sup>351</sup> Similarly, issues relating to rights of succession to the assets of a foreign state were non-justiciable.<sup>352</sup> Much will depend upon the particular circumstances of the case. In *Linder v. Portocarrero*,<sup>353</sup> for instance, concerning the murder of a US citizen working for the Nicaraguan government by rebel forces (the Contras), the US Court of Appeals for the Eleventh Circuit held that the political question doctrine was not implicated since the complaint neither challenged the legitimacy of US policy on Nicaragua nor sought to require the Court to decide who

was right and who was wrong in the civil war in that country. The complaint was rather narrowly focused on the lawfulness of the conduct of the defendants in a single incident. In *Koochi v. United States*,<sup>354</sup> the US Court of Appeals for the Ninth Circuit held that the courts were not precluded from reviewing military decisions, whether taken during war or peacetime, which caused injury to US or enemy civilians. The Court in *Baker v. Carr*,<sup>355</sup> the leading case on the political question doctrine, while noting that not every case touching foreign relations was non-justiciable, provided a list of six factors that might render a case non-justiciable.<sup>356</sup> The Court of Appeals underlined in *Kadić v. Karadžić*<sup>357</sup> that ‘judges should not reflexively invoke these doctrines [political question and act of state doctrines] to avoid difficult and somewhat sensitive decisions in the context of human rights’. The fact that judicially discoverable and manageable standards exist would indicate that the issues involved were indeed justiciable.<sup>358</sup> In *Corrie v. Caterpillar*, the US Court of Appeals for the Ninth Circuit reaffirmed that the political question doctrine was a jurisdictional issue and that the *Baker v. Carr* factors precluded justiciability, noting in particular that the provision of military assistance by the US to foreign states constituted such a political question.<sup>359</sup>

Also relevant in the context of non-justiciability is the doctrine of act of state. The *Third US Restatement of Foreign Relations Law*<sup>360</sup> provides that ‘in the absence of a treaty or other unambiguous agreements regarding controlling legal principles, courts in the United States will generally refrain from examining the validity of a taking by a foreign state of property within its own territory, or from sitting in judgment on other acts of a governmental character done by a foreign state within its own territory and applicable there’.<sup>361</sup> In *Banco Nacional de Cuba v. Sabbatino*,<sup>362</sup> the US Supreme Court held that the act of state concept was not a rule of public international law, but related instead to internal constitutional balances.<sup>363</sup> It was a rule of judicial self-restraint. The Court declared that the judicial branch would not examine the validity of a taking of property within its own territory by a foreign sovereign government,<sup>364</sup> irrespective of the legality in international law of that action.<sup>365</sup> This basic approach was supported in a subsequent case,<sup>366</sup> whereas in *Alfred Dunhill of London Inc. v. Republic of Cuba*<sup>367</sup> the Supreme Court employed sovereign immunity concepts as the reason for not recognising the repudiation of the commercial obligations of a state instrumentality as an act of state. However, it now appears that there is an exception to the strict act of state doctrine where a relevant treaty provision between the parties specifies the standard of compensation to be payable and thus provides ‘controlling legal principles’.<sup>368</sup>

In an important case in 1990, the Supreme Court examined anew the extent of the act of state doctrine. *Kirkpatrick v. Environmental Tectonics*<sup>369</sup> concerned a claim

brought by an unsuccessful bidder on a Nigerian government contract in circumstances where the successful rival had bribed Nigerian officials. The Court unanimously held that the act of state doctrine did not apply since the validity of a foreign sovereign act was not at issue. The Court also made the point that act of state issues only arose when a court ‘*must decide* – that is, when the outcome of the case turns upon – the effect of official action by a foreign sovereign’.<sup>370</sup> While the doctrine clearly meant that a US court had to accept that the acts of foreign sovereigns taken within their jurisdictions were to be deemed valid, this did not extend to cases and controversies that might embarrass foreign governments in situations falling outside this. Act of state was not to be extended.<sup>371</sup>

## EXECUTIVE CERTIFICATES

There is an established practice adopted by the British courts of applying to the executive branch of government for the conclusive ascertainment of certain facts. Examples include the status of a foreign state or government, questions as to whether a state of war is in operation as regards a particular country or as between two foreign states, and whether or not a particular person is entitled to diplomatic status. This means that in such matters of state the courts will consult the government and regard the executive certificate (or Foreign Office certificate as it is sometimes called), which is issued following the request, as conclusive, irrespective of any relevant rules of international law.<sup>372</sup> This was firmly acknowledged in *Duff Development Co. Ltd v. Kelantan*,<sup>373</sup> which concerned the status of the state of Kelantan in the Malay Peninsula and whether it was able to claim immunity in the English courts. The government declared that it was regarded as an independent state and the House of Lords noted that ‘where such a statement is forthcoming, no other evidence is admissible or needed’, and that:

it was not the business of the Court to inquire whether the Colonial Office rightly concluded that the Sultan [of Kelantan] was entitled to be recognised as a sovereign by international law.<sup>374</sup>

This basic position was reaffirmed in *R v. Secretary of State for Foreign and Commonwealth Affairs, ex parte Trawnik*,<sup>375</sup> in which it was held that certificates under section 40(3) of the Crown Proceedings Act 1947 and section 21 of the State Immunity Act 1978 were reviewable in the courts only if they constituted a nullity in that they were not genuine certificates or if, on their face, they had been issued outside the scope of the relevant statutory power. The contents of such certificates were conclusive of the matters contained therein and, in so far as they related to

recognition of foreign states, were matters within the realm of the royal prerogative and not subject to judicial review. In *R v. Mohammed Gul*,<sup>376</sup> a Foreign Office certificate was provided declaring that the conflicts in Iraq post-28 June 2004 and Afghanistan post-December 2001 constituted non-international armed conflicts. The appellant accepted this as highly persuasive but maintained that the decision had to be one for a jury. The point was not taken further and the court took the 'provisional view that the Certificate was conclusive' but that the way in which the case had developed did not require any further inquiry.

Problems have arisen in the context of the decision of the UK announced in 1980 not to accord recognition to governments, but rather to treat the question of an unconstitutional change of regimes as one relating to diplomatic relations.<sup>377</sup> In *Republic of Somalia v. Woodhouse Drake and Carey (Suisse) SA*,<sup>378</sup> the court was faced with a confused situation concerning whether the interim government of Somalia was actually in effective control and the extent to which other factions controlled different areas of the country. The court noted that in reaching its decision as to whether the interim government was or was not the valid successor to the former legitimate government in the light of the degree of actual control exercised over the country, letters from the Foreign and Commonwealth Office became part of the evidence in the case. In so far as the three letters concerned statements as to what was happening in the country, 'such letters may not be the best evidence', but in so far as they dealt with the question as to whether and to what extent the UK government had dealings with the foreign government, such letters 'will almost certainly be the best and only conclusive evidence of that fact'.<sup>379</sup>

The United States State Department similarly offers 'suggestions' on such matters, although they tend to be more extensive than their British counterparts, and include comments upon the issues and occasionally the views of the executive.<sup>380</sup>

Warbrick, ‘Treaties’, 49 ICLQ, 2000, p. 944.

**101** (1879) 4 PD 129.

**102** *Ibid.*, p. 154.

**103** See e.g. *Council of Civil Service Unions v. Minister for the Civil Service* [1985] AC 374, 418. See also *Rustomjee v. R* (1876) 2 QBD 69 and *Lonrho Exports v. ECGD* [1996] 4 All ER 673; 108 ILR, pp. 596, 611.

**104** See *R v. Secretary of State for Foreign and Commonwealth Affairs, ex parte Rees-Mogg* [1994] 2 WLR 115.

**105** [1989] 3 All ER 523, 531; 81 ILR, pp. 671, 684. See also *Lonrho Exports v. ECGD* [1996] 4 All ER 673, 687; 108 ILR, pp. 596, 611.

**106** [1989] 3 All ER 523, 544–5; 81 ILR, p. 701. See also *Littrell v. USA (No. 2)* [1995] 1 WLR 82 and *Thomas v Baptiste* [2000] 2 AC 1 (PC) at 23 and 31–3. But see R. Y. Jennings, ‘An International Lawyer Takes Stock’, 39 ICLQ, 1990, pp. 513, 523–6.

**107** [1989] 3 All ER 523, 544–5; 81 ILR, p. 701. See further as to the non-justiciability of unincorporated treaties, below, p. 132.

**108** [1989] 3 All ER 523, 526; 81 ILR, p. 676. See also *Ex Parte Brind* [1991] 1 AC 696, 747–8; 85 ILR, p. 29, and *R v. Lyons* [2002] UKHL 44; 131 ILR, p. 538.

**109** [2005] UKHL 71, para. 27. Lord Bingham in *R v. Asfaw* [2008] UKHL 31, para. 29 stated that, ‘While, therefore, one would expect any government intending to legislate inconsistently with an obligation binding on the UK to make its intention very clear, there can on well known authority be no ground in domestic law for failing to give effect to an enactment in terms unambiguously inconsistent with such an obligation.’

**110** *Lonrho Exports v. ECGD* [1996] 4 All ER 673, 688; 108 ILR, pp. 596, 613. See also *The Arantzazu Mendi* [1939] AC 256, 264 (per Lord Atkin); *GUR Corporation v. Trust Bank of Africa Ltd* [1986] 3 All ER 449, 454, 459 and 466–7; 75 ILR, p. 675,

and *Sierra Leone Telecommunications v. Barclays Bank* [1998] 2 All ER 821, 828; 114 ILR, p. 466. See in addition *R v. Lyons* [2003] 1 AC 976, 995 (Lord Hoffmann).

<sup>111</sup> Lord Oliver in *Maclaine Watson v. Department of Trade and Industry* emphasised that the conclusion of an international treaty is a question of fact, thus a treaty may be referred to as part of the factual background against which a particular issue arises, [1989] 3 All ER 523, 545; 81 ILR, pp. 671, 702. See further below, pp. 132 ff.

<sup>112</sup> *Lonrho Exports v. ECGD* [1996] 4 All ER 673, 688; 108 ILR, pp. 596, 613.

<sup>113</sup> See e.g. *R v. Secretary of State, On the Application of the Channel Tunnel Group* 119 ILR, pp. 398, 407–8.

<sup>114</sup> See Lord Woolf MR in *Ex Parte Ahmed and Patel* [1998] INLR 570, 584, relying upon the approach of the High Court of Australia in *Minister of Immigration v. Teoh*, as to which see below, p. 121. Hobhouse LJ in *Ex Parte Ahmed and Patel* noted that where the Secretary of State had adopted a specific policy, it was not possible to derive a legitimate expectation from the treaty going beyond the scope of the policy: at 592. Note, as to the special position of human rights treaties as against other multilateral treaties, e.g. *Matthew v. Trinidad and Tobago State* [2004] UKPC 33; 134 ILR, p. 687.

<sup>115</sup> See the evidence presented by the Foreign and Commonwealth Office to the Royal Commission on the Reform of the House of Lords, UKMIL, 70 BYIL, 1999, p. 405.

<sup>116</sup> See e.g. S. de Smith and R. Brazier, *Constitutional and Administrative Law*, 6th edn, London, 1989, pp. 140–2, and W. Wade and O. H. Phillips, *Constitutional and Administrative Law*, 9th edn, London, 1977, pp. 303–6. See also *Attorney-General for Canada v. Attorney-General for Ontario* [1937] AC 326, 347; 8 AD, p. 41; *Walker v. Baird* [1892] AC 491; *Republic of Italy v. Hambro's Bank* [1950] 1 All ER 430; *Cheney v. Conn* [1968] 1 WLR 242; 41 ILR, p. 421; *Porter v. Freudenberg* [1915] 1 KB 857, 874–80, and McNair, *Law of Treaties*, pp. 89–91.

<sup>117</sup> See the evidence presented by the Foreign and Commonwealth Office to the Royal Commission on the Reform of the House of Lords, UKMIL, 70 BYIL, 1999, p.

405, citing the examples of extradition and double-taxation treaties.

**118** Sinclair and Dickson, 'National Treaty Law', p. 230.

**119** See *Regina (European Roma Rights Centre) v. Immigration Officer at Prague Airport and Another* [2004] UKHL 55, para. 42; 131 ILR, p. 683 (per Lord Steyn).

**120** See e.g. Fatima, *Using International Law*, pp. 57 ff.

**121** For example, section 2 of the Asylum and Immigration Appeals Act 1993 provides that nothing in the immigration rules within the Immigration Act 1971 shall lay down any practice contrary to the Refugee Convention.

**122** See e.g. the International Criminal Court Act 2001.

**123** It is also the practice to put before Parliament Orders in Council made under the United Nations Act 1946 in order, for example, to implement United Nations sanctions internally: see s. 1(4) of the Act and H. Fox and C. Wickremasinghe, 'UK Implementation of UN Economic Sanctions', 42 ICLQ, 1993, pp. 945, 959. See also *R v. HM Treasury and the Bank of England, ex parte Centro-Com*, Times Law Reports, 7 October 1993.

**124** See 171 HC Deb., col. 2001, 1 April 1924.

**125** UKMIL, 70 BYIL, 1999, p. 406. See now section 24 of the Constitutional Reform and Governance Act 2010.

**126** Section 20. This section does not apply to a treaty if a Minister is of the opinion that, exceptionally, the treaty should be ratified without the requirements of that section having been met, unless either House of Parliament has resolved that there be no ratification. There also certain kinds of treaties which are not covered by these provisions, see section 23 (treaties providing for increase in European Parliament's powers are not to be ratified unless approved by Act of Parliament: section 12 European Parliamentary Elections Act 2002; treaties amending founding treaties of the European Union not to be ratified without Parliamentary approval: section 5

European Union (Amendment) Act 2008; treaties in relation to which an Order in Council may be made under section 158 of the Inheritance Tax Act 1984 (double taxation conventions) or section 2 of the Taxation (International and Other Provisions) Act 2010 (double taxation arrangements) or section 173 of the Finance Act 2006 (international tax enforcement arrangements; treaties concluded (under authority given by the government of the United Kingdom) by the government of a British overseas territory, of any of the Channel Islands or of the Isle of Man).

<sup>127</sup> See e.g. *Garland v. British Rail Engineering Ltd* [1983] 2 AC 751; 93 ILR, p. 622, and *Ex Parte Brind* [1991] 1 AC 696, 748; 85 ILR, p. 29, where this presumption is referred to as ‘a mere canon of construction which involves no importation of international law into the domestic field’. See also *Maxwell on the Interpretation of Statutes*, 12th edn, London, 1969, p. 183; *A (FC) and Others (FC) v. Secretary of State for the Home Department* [2005] UKHL 71, para. 27, and *Al-Skeini v. Secretary of State for Defence* [2007] UKHL 26, para. 45; 133 ILR, pp. 715–16 (per Lord Rodger).

<sup>128</sup> *Salomon v. Commissioners of Customs and Excise* [1967] 2 QB 116, 143; *Post Office v. Estuary Radio Ltd* [1968] 2 QB 740 and *Brown v. Whimster* [1976] QB 297. See also *National Smokeless Fuels Ltd v. IRC*, *The Times*, 23 April 1986, p. 36; Lord Oliver in *Maclaine Watson v. Department of Trade and Industry* [1989] 3 All ER 523, 545; 81 ILR, pp. 671, 702 and *R (Adams) v. Secretary of State for Justice* [2011] UKSC 18, para. 14 (Lord Phillips).

<sup>129</sup> Section 1(4) of the Diplomatic and Consular Premises Act 1987 permits the Secretary of State to change the status of diplomatic and consular premises by giving or withdrawing consent or withdrawing acceptance to such status only ‘if he is satisfied that to do so is permissible under international law’.

<sup>130</sup> *Assange v. The Swedish Prosecution Authority* [2012] UKSC 22, para. 10 (Lord Phillips).

<sup>131</sup> *Ellerman Lines v. Murray* [1931] AC 126; 5 AD, p. 342 and *IRC v. Collco Dealings Ltd* [1962] AC 1; 33 ILR, p. 1. See Sinclair, ‘Principles of Treaty Interpretation’, and C. Schreuer, ‘The Interpretation of Treaties by Domestic Courts’, 45 BYIL, 1971, p. 255. See also F. A. Mann, *Foreign Affairs in English Courts*, Oxford, 1986, pp. 97–114; R. Gardiner, ‘Treaty Interpretation in the English Courts since *Fothergill v. Monarch Airlines* (1980)’, 44 ICLQ, 1995, p. 620, and

Fatima, *Using International Law*, pp. 65 ff. The UK Supreme Court emphasised in *HM Treasury v. Ahmed* [2010] UKSC 2, paras. 45 ff., that the principle of legality required that general or ambiguous statutory words should not be interpreted in a manner that infringed fundamental rights.

<sup>132</sup> See above, p. 95.

<sup>133</sup> See e.g. *Blathwayt v. Baron Cawley* [1976] AC 397.

<sup>134</sup> See e.g. in the context of the European Convention on Human Rights prior to its incorporation by the Human Rights Act 1998, *R v. Secretary of State for the Home Department, ex parte Bhajan Singh* [1975] 2 All ER 1081; 61 ILR, p. 260; *R v. Chief Immigration Officer, Heathrow Airport, ex parte Salamat Bibi* [1976] 3 All ER 843; 61 ILR, p. 267; *R v. Secretary of State for the Home Department, ex parte Phansopkar* [1976] QB 606; 61 ILR, p. 390; *Waddington v. Miah* [1974] 1 WLR 683; 57 ILR, p. 175; *Cassell v. Broome* [1972] AC 1027; *Malone v. MPC* [1979] Ch. 344; 74 ILR, p. 304; *R v. Secretary of State for the Home Department, ex parte Anderson* [1984] 1 All ER 920; *Trawnik v. Ministry of Defence* [1984] 2 All ER 791 and *Ex Parte Launder* [1997] 1 WLR 839. In *R v. Secretary of State for the Home Department, ex parte Brind* [1991] 1 AC 696, it was held that subordinate legislation and executive discretion did not fall into this category. See also *Derbyshire County Council v. Times Newspapers Ltd* [1993] AC 534 HL; *Rantzen v. Mirror Group Newspapers (1986) Ltd* [1993] 3 WLR 953 CA; *Attorney-General v. Associated Newspapers Ltd* [1993] 3 WLR 74; *R v. Secretary of State for the Home Department, ex parte Wynne* [1993] 1 WLR 115 and *R v. Brown* [1993] 2 WLR 556. See also A. Cunningham, 'The European Convention on Human Rights, Customary International Law and the Constitution', 43 ICLQ, 1994, p. 537.

<sup>135</sup> See e.g. *R v. Secretary of State for the Home Department, ex parte Fernandes* [1984] 2 All ER 390.

<sup>136</sup> See e.g. the Iraq and Kuwait (UN Sanctions) Order 1990, SI 1990 No. 1651; the Serbia and Montenegro (UN Sanctions) Orders 1992 and 1993, SI 1992 No. 1302 and SI 1993 No. 1188; the Libya (UN Sanctions) Orders 1992 and 1993, SI 1992 Nos. 973 and 975 and SI 1993 No. 2807; the Former Yugoslavia (UN Sanctions) Order 1994, SI 1994 No. 2673.

<sup>137</sup> See e.g. *Ex Parte Centro-Com* [1994] 1 CMLR 109; [1997] ECR I-81, and [1997] 3 WLR 239; 117 ILR, p. 444. See also R. Pavoni, ‘UN Sanctions in EU and National Law: The Centro-Com Case’, 48 ICLQ, 1999, p. 582. See further below, p. 908.

<sup>138</sup> The UN (International Tribunal) (Former Yugoslavia) Order 1996, SI 1996 No. 716. See for differing approaches to this procedure, C. Warbrick, ‘Co-operation with the International Criminal Tribunal for Yugoslavia’, 45 ICLQ, 1996, p. 947, and H. Fox, ‘The Objections to Transfer of Criminal Jurisdiction to the Tribunal’, 46 ICLQ, 1997, p. 434.

<sup>139</sup> See below, chapter 16, p. 675.

<sup>140</sup> See *Buchanan v. Babco* [1978] AC 141 and *Fothergill v. Monarch Airlines* [1981] AC 251; 74 ILR, p. 648. Compare in the latter case the restrictive approach of Lord Wilberforce, [1981] AC 278; 74 ILR, p. 656 with that of Lord Diplock, [1981] AC 283; 74 ILR, pp. 661–2. See also *Goldman v. Thai Airways International Ltd* [1983] 3 All ER 693. Note also that in *Wahda Bank v. Arab Bank plc* Times Law Reports, 16 December 1992, Phillips J referred to UN sanctions resolutions in examining the question of the applicability of the Order in Council implementing the sanctions internally to the case in question. See further *Re H (Minors)* [1998] AC 72.

<sup>141</sup> [1997] 1 All ER 193, 202. Lord Mustill in *Semco Salvage v. Lancer Navigation* emphasised the significance of a textual interpretation of the words in question as understood in their ordinary meaning, [1977] 1 All ER 502, 512.

<sup>142</sup> See e.g. *Ben Nevis (Holdings) Ltd v. Commissioners of HMRC* [2013] EWCA Civ 578, paras. 16 ff.

<sup>143</sup> See Mummery J. in *IRC v. Commerzbank AG* [1990] STC 285. This has been approved in *Memec v. IRC* [1998] STC 754 and in *Ben Nevis (Holdings) Ltd v. Commissioners of HMRC* [2013] EWCA Civ 578, paras. 16 ff. Lord Slynn stated in *R (Al Fawwaz) v. Governor of Brixton Prison* that ‘to apply to extradition treaties the strict canons appropriate to the construction of domestic statutes would often tend to defeat rather than to serve [their] purpose’, [2001] UKHL 69, para. 39, citing Lord Bridge in *Ex Parte Postlethwaite* [1988] AC 924, 947. See also *R (ST) v. Secretary of*

*State for the Home Department* [2012] UKSC 12 at para. 30 (Lord Hope). It was also noted that: ‘however generous and purposive its approach to interpretation may be, the court’s task remains one of interpreting the document to which the contracting parties have committed themselves by their agreement. As Lord Bingham was at pains to emphasise in the *Roma Rights* case, at para 18, it must interpret what the parties have agreed to’ (at para. 31).

<sup>144</sup> Section 3(2)b. Nor that of incompatible subordinate legislation where primary legislation prevents removal of the incompatibility: section 3(2)c.

<sup>145</sup> Section 3(2)a. See further H. Fenwick, *Civil Liberties and Human Rights*, 3rd edn, London, 2002, p. 139, and R. Clayton and H. Tomlinson, *Human Rights Law*, London, 2000, chapter 4.

<sup>146</sup> See e.g. the decision of the House of Lords in *R v. A* [2001] 2 WLR 1546 and *R (on the application of Alconbury Ltd) v. Secretary of State for the Environment, Transport and the Regions* [2001] 2 All ER 929. Note also the issue raised in *HM Treasury v. Ahmed* [2010] UKSC 2 concerning the application of UN sanctions imposed within the UK by Orders in Council under the terms of section 1(1) of the United Nations Act 1946. Lord Hope emphasised that ‘fundamental rights cannot be overridden by general or ambiguous words’, at para. 61.

<sup>147</sup> Section 2 of the Human Rights Act.

<sup>175</sup> 34 ILM, 1995, p. 1592.

<sup>176</sup> Note that the US Torture Victim Protection Act 1991, 106 Stat. 73 (1992) (codified at 28 U.S.C. § 1350 (1994)), provides a cause of action for official torture and extrajudicial killing where an individual, under actual or apparent authority or colour of law of any foreign law subjects, engages in such activities. In *Mohamad v Palestinian Authority*, the Supreme Court held that the Act only covered natural persons and did not impose liabilities against legal persons or corporations, 566 US (2012), slip opinion 11–88. The Act is not a jurisdictional statute, so that claims of official torture will be pursued under the jurisdiction conferred by the Alien Tort Statute or under the general federal question jurisdiction of section 1331: see e.g. *Xuncax v. Gramajo* 886 F.Supp. 162 (1995); 104 ILR, p. 165. In addition, local remedies must have been exhausted. See e.g. E. Apostolova, ‘The Relationship between the Alien Tort Statute and the Torture Victim Protection Act’, 28 *Berkeley Journal of International Law*, 2010, p. 640.

<sup>209</sup> See e.g. *Reference re Exemption of US Forces from Canadian Criminal Law* [1943] 4 DLR 11, 41 and *Reference re Powers to Levy Rates on Foreign Legations and High Commissioners' Residences* [1943] SCR 208. See also *R v. Munyaneza*, [2009] QJ No 4913; ILDC 1339 (CA 2009).

<sup>210</sup> See W. J. Hopkins, 'New Zealand' in Shelton, *International Law and Domestic Legal Systems*, p. 429 and e.g. *Marine Steel Ltd v. Government of the Marshall Islands* [1981] 2 NZLR 1; 64 ILR, p. 539; and *Governor of Pitcairn and Associated Islands v. Sutton* [1995] 1 NZLR 426; 104 ILR, p. 508. The courts have also referred to a presumption of statutory interpretation that, so far as wording allows, legislation should be read in a way that is consistent with New Zealand's obligations: see e.g. *Rajan v. Minister of Immigration* [1996] 3 NZLR 543, 551 and *Wellington District Legal Services v. Tangiora* [1998] 1 NZLR 129, 137; 115 ILR, pp. 655, 663. See, as to the use of treaties in statutory interpretation, *Attorney-General v. Zaoui* [2005] NZSC 38, [2006] 1 NZLR 289, (2005) 7 HRNZ 860. See also *Nguyen Tuong Van v. Public Prosecutor* [2004] SGCA 47; 134 ILR, p. 660 with regard to Singapore.

<sup>211</sup> See e.g. *Potter v. BHP Co. Ltd* (1906) 3 CLR 479, 495, 506–7 and 510; *Wright v. Cantrell* (1943) 44 SR (NSW) 45; *Polites v. Commonwealth* (1945) 70 CLR 60 and *Chow Hung Ching v. R* (1948) 77 CLR 449. These cases are unclear as to whether the incorporationist or transformation approaches have been adopted as the appropriate theoretical basis. As to the view that international law is the 'source' of domestic

law, see Dixon J in *Chow Hung Ching* and Merkel J in *Nulyarimma v. Thompson* (1999) 165 ALR 621, 653–5; 120 ILR, p. 353. See also *Public International Law: An Australian Perspective* (eds. S. Blay, R. Piotrowicz and B. M. Tsamenyi), Oxford, 1997, chapter 5, and H. Burmeister; S. Reye, ‘The Place of Customary International Law in Australian Law: Unfinished Business’, 21 Australian YIL, 2001, p. 39 and A. de Jonge, ‘Australia’ in Shelton, *International Law and Domestic Legal Systems*, p. 23.

<sup>212</sup> 132 ILR, pp. 407, 442.

<sup>213</sup> (1995) 128 ALR 353; 104 ILR, p. 466. See also Blay *et al.*, *Public International Law: An Australian Perspective*.

<sup>214</sup> See e.g. judgment by Mason CJ and Deane J, (1995) 128 ALR 353, 361. See also *Dietrich v. The Queen* (1992) 177 CLR 292, 305 and *Coe v. Commonwealth of Australia* (1993) 118 ALR 193, 200–1; 118 ILR, p. 322. Reaffirmed by the High Court in *Kruger v. Commonwealth of Australia* (1997) 146 ALR 126, 161; 118 ILR, p. 371. See e.g. *Kenneth Good v. Attorney-General*, Court of Appeal Civil Appeal No. 028 of 2005 for the similar situation in Botswana and *Nallarattnam Singarasa v. Attorney General*, S.C. Spl (LA) No. 182/99 (2006) with regard to Sri Lanka.

<sup>215</sup> (1995) 128 ALR 353, 362 and see e.g. *Simsek v. Macphee* (1982) 148 CLR 636, 641–2.

<sup>216</sup> Judgment of Mason CJ and Deane J. See also *Chung Kheng Lin v. Minister for Immigration* (1992) 176 CLR 1, 38. In *Kruger v. Commonwealth of Australia*, Dawson J noted that such a construction was not required where the obligations arise only under a treaty and the legislation in question was enacted before the treaty, (1997) 146 ALR 126, 161; 118 ILR, p. 371.

<sup>217</sup> See also *Kartinyeri v. The Commonwealth* (1998) 195 CLR 337 at 384 and *Ahmed Ali Al-Kateb v. Goodwin* [2004] HCA 37. In the latter case, McHugh J criticised the rule, but concluded that it was too well established to be repealed by judicial decision, *ibid.* at para. 65.

<sup>218</sup> (1995) 128 ALR 353, 361. See also *Polites v. The Commonwealth* (1945) 70 CLR 60, 68–9, 77, 80–1.

<sup>219</sup> [1991] 1 AC 696 at 748; 85 ILR, p. 29.

<sup>220</sup> (1995) 128 ALR 353, 362.

<sup>221</sup> *Ibid.*, 365. See also the judgment of Toohey J, *ibid.* at 371–2, and the judgment of Gaudron J, *ibid.* at 375–6. Cf. the judgment of McHugh J, *ibid.* at 385–7.

<sup>222</sup> Note that after the decision in *Teoh*, the Minister for Foreign Affairs and the Attorney General issued a Joint Statement (10 May 1995) denying the existence of any such legitimate expectation upon the ratification of a treaty: see M. Allars, ‘One Small Step for Legal Doctrine, One Giant Leap Towards Integrity in Government: *Teoh*’s Case and the Internationalisation of Administrative Law’, 17 *Sydney Law Review*, 1995, pp. 204, 237–41. The Government also introduced the Administrative Decisions (Effect of International Instruments) Bill 1995 into the Parliament with the specific purpose of denying that treaties or conventions give rise to a legitimate expectation of how a decision-maker will make a decision in an area affected by such international instruments. See also *Trick or Treaty? Commonwealth Power to Make and Implement Treaties*, a Report by the Senate Legal and Constitutional References Committee, November 1995. See now also *Minister for Immigration and Multicultural Affairs; Ex Parte Lam* [2003] HCA 6, which is critical of *Teoh*.

Réflexions sur la Compétence de la Cour de Cassation en Matière d'Interprétation des Conventions Internationales', *Revue Générale de Droit International Public*, 1996, p. 599; V. Kronenberger, 'A New Approach to the Interpretation of the French Constitution in Respect to International Conventions: From Hierarchy of Norms to Conflict of Competence', NILR, 2000, p. 323.

<sup>248</sup> See e.g. O'Connell, *International Law*, pp. 65–8; Rousseau, *Droit International Public*, and Peaslee, *Constitutions*, vol. III, p. 312. See also *SA Rothmans International France and SA Philip Morris France* 93 ILR, p. 308.

<sup>249</sup> See the *Cafés Jacques Vabre* case, 16 *Common Market Law Review*, 1975, p. 336 and *In re Nicolo* 84 AJIL, 1990, p. 765; 93 ILR, p. 286. Under article 54 of the Constitution, the Constitutional Council may declare a treaty to be contrary to the Constitution, so that the Constitution must first be amended before the treaty may be ratified or approved. See e.g. *Re Treaty on European Union* 93 ILR, p. 337. See also *Ligue Internationale Contre le Racisme et l'Antisémitisme*, AFDI, 1993, p. 963 and AFDI, 1994, pp. 963 ff.

<sup>250</sup> See *Pauline Fraisse*, 2 June 2000, *Bulletin de l'Assemblée Plénière*, No. 4, p. 7 and *Levacher*, RFDA, 2000, p. 79. The position with regard to customary law is unclear: see e.g. *Aquarone*, RGDIP, 1997–4, pp. 1053–4; *Barbie*, Cass. Crim., 6 October 1983, Bull., p. 610 and *Kadahfi*, RGDIP, 2001–2, pp. 474–6. See also Decaux, 'France', p. 235 ff with regard to divergent positions taken by the Conseil d'Etat and the Conseil Constitutionnel.

<sup>251</sup> See 33 ILM, 1994, p. 1043. This interim constitution came into force on 27 April 1994 and was intended to remain in force for five years to be replaced by a constitution adopted by a Constitutional Assembly consisting of the National Assembly and Senate of Parliament: see below. See J. Dugard, *International Law: A South African Perspective*, 4th edn, Kenwyn, 2011, and Hovell and Williams, 'A Tale of Two Systems', pp. 113 ff. See also E. de Wet, 'South Africa' in Shelton, *International Law and Domestic Legal Systems*, p. 567.

<sup>252</sup> See Dugard, *International Law*. Note that this change means that treaties entered into before the Constitution came into force do not form part of municipal law unless expressly incorporated by legislation, while those treaties that postdate the new Constitution may.

253 Note that article 144 of the Namibian Constitution provides that ‘unless otherwise provided by this Constitution or Act of Parliament, the general rules of public international law and international agreements binding upon Namibia under this Constitution shall form part of the law of Namibia’: see B. Erasmus, ‘The Namibian Constitution and the Application of International Law’, 15 *South African Yearbook of International Law*, 1989–90, p. 81.

254 See 36 ILM, 1997, p. 744.

255 Section 231(2). This is unless either such an agreement is of a ‘technical, administrative or executive nature’ or it is one not requiring ratification (or accession), in which case tabling in the Assembly and the Council within a reasonable time is required: section 231(3).

256 Section 231(4).

257 Note that O’Regan J stated in *Kaunda v. President of the Republic of South Africa* that ‘our Constitution recognises and asserts that, after decades of isolation, South Africa is now a member of the community of nations, and a bearer of obligations and responsibilities in terms of international law’, CCT 23/04, [2004] ZACC 5, para. 222.

258 See G. M. Danilenko, ‘The New Russian Constitution and International Law’, 88 AJIL, 1994, p. 451 and Danilenko, ‘Implementation of International Law in CIS States: Theory and Practice’, 10 EJIL, 1999, p. 51; V. S. Vereshchetin, ‘New Constitutions and the Old Problem of the Relationship between International Law and National Law’, 7 EJIL, 1996, p. 29, and S. Y. Marochkin, ‘International Law in the Courts of the Russian Federation: Practice of Application’, 6 Chinese JIL, 2007, p. 329. See also Y. Tikhomirov, ‘Russia’ in Shelton, *International Law and Domestic Legal Systems*, p. 517. See, as regards the practice of the Soviet Union, K. Grzybowski, *Soviet Public International Law*, Leiden, 1970, pp. 30–2.

259 See e.g. *Re Khordodovskiy*, 133 ILR, p. 365 (2006).

260 See also article 5 of the Russian Federal Law on International Treaties adopted on 16 June 1995, 34 ILM, 1995, p. 1370. This repeats article 15(4) of the

Constitution and also provides that ‘the provisions of officially published international treaties of the Russian Federation which do not require the publication of intra-state acts for application shall operate in the Russian Federation directly. Respective legal acts shall be adopted in order to effectuate other provisions of international treaties of the Russian Federation.’ See further W. E. Butler, *The Law of Treaties in Russia and the Commonwealth of Independent States*, Cambridge, 2002, who notes that the change brought about by article 15(4) ‘is among the most momentous changes of the twentieth century in the development of Russian Law’, at p. 36.

**287** [2006] UKHL 16, para. 65; 132 ILR, p. 696. He concluded that 'The decision to go to war [against Iraq], whether one thinks it was right or wrong, fell squarely within the discretionary powers of the Crown to defend the realm and conduct its foreign affairs...The discretionary nature or non-justiciability of the power to make war is in my opinion simply one of the reasons why aggression is not a crime in domestic law', paras. 66 and 67, *ibid.*, and see also Lord Mance, para. 103; *ibid.*, pp. 705–6. More cautiously, Lord Bingham noted that 'there are well established rules that the courts will be very slow to review the exercise of prerogative powers in relation to the conduct of foreign affairs and the deployment of the armed services', para. 30, *ibid.*, p. 684. The *Jones* approach was applied by the Court of Appeal in *R (Gentle) v. Prime Minister* [2006] EWCA Civ 1689, para. 33 (Clarke MR); 132 ILR, p. 737, where it was held that the question whether the UK had acted unlawfully in

sending troops to Iraq was non-justiciable for two reasons: first, because it would require consideration of at least two international instruments (Security Council resolutions 678 and 1441) and, secondly, because it would require detailed consideration of policy decisions in the fields of foreign affairs and defence ‘which are the exclusive responsibility of the executive government’. In the House of Lords, [2008] UKHL 20, their Lordships essentially focused on the meaning of article 2 of the European Convention on Human Rights, but Lord Bingham referred to the ‘restraint traditionally shown by the courts in ruling on what has been called high policy – peace and war, the making of treaties, the conduct of foreign relations’, *ibid.*, para. 2, while Lord Hope noted that, ‘The issue of legality in this area of international law [the use of force by states] belongs to the area of relations between states...[and]...is a matter of political judgment...It is not part of domestic law reviewable here’, *ibid.*, para. 24 (and see para. 26). See also Lady Hale, *ibid.*, para. 58.

**288** [1982] AC 888; 64 ILR, p. 331.

- 306** But see *Re McKerr*, where Lord Steyn noted that faced with the narrowness of this decision, a critical re-examination of this area of the law might become necessary in the future in the light of the ‘growing support for the view that human

rights treaties enjoy a special status', [2004] UKHL 12, paras. 51–2.

**307** [1995] 1 WLR 82, 93.

**308** Similarly, Colman J in *Westland Helicopters Ltd v. Arab Organisation for Industrialisation* [1995] 2 WLR 126, 149, held that reference to the terms of the treaty establishing an international organisation and to the terms of the basic statute of that organisation in order to ascertain the governing law of that organisation and its precise nature did not transgress the boundary between what was justiciable and what was non-justiciable.

**309** See *British Airways Board v. Laker Airways Ltd* [1985] AC 58, 85–6; *Ex parte Molyneaux* [1986] 1 WLR 331; 87 ILR, p. 329 and *Westland Helicopters Ltd v. Arab Organisation for Industrialisation* [1995] 2 WLR 126, 136. See also *Minister for Arts Heritage and Environment v. Peko-Wallsend Ltd* (1987) 75 ALR 218, 250–4; 90 ILR, pp. 32, 51–5, where the Australian Federal Court held that a Cabinet decision involving Australia's international relations in implementing a treaty was not a justiciable matter, and *Arab Republic of Syria v. Arab Republic of Egypt* 91 ILR, pp. 288, 305–6, where the Supreme Court of Brazil held that the courts of a third state could not exercise jurisdiction in a matter essentially of state succession between two other states even where the property was within the jurisdiction.

**310** *CND v. Prime Minister of the UK and Others* [2002] EWHC 2777 (Admin), paras. 23, 36 and 47. See also *R v. Lyons* [2002] 3 WLR 1562; 131 ILR, p. 538.

**311** *CND v. Prime Minister of the UK*, para. 47, cited with approval by the Irish High Court in *Horgan v. An Taoiseach*, judgment of 28 April 2003, as emphasising 'the strictly circumspect role which the courts adopt when called upon to exercise jurisdiction in relation to the Executive's conduct of international relations generally', 132 ILR, pp. 407, 440.

**312** [2006] UKHL 16, para. 30; 132 ILR, p. 684. See also *R (Islamic Human Rights Commission) v. CAA* [2006] EWHC 2465; 132 ILR, p. 707, and *R (Gentle) v. Prime Minister* [2008] UKHL 20, above, p. 130, [note 287](#).

**313** See Lord Oliver in *JH Rayner (Mincing Lane) Ltd v. Department of Trade and Industry* [1990] 2 AC 418, 500. Lord Steyn in *Kuwait Airways Corporation v. Iraqi*

*Airways Co. (Nos. 4 and 5)* [2002] 2 AC 883, 1101 considered that the principle was not ‘a categorical rule’. See also Fatima, *Using International Law*, pp. 273 ff.

**314** See e.g. *CND v. Prime Minister* [2002] EWHC 2777 (Admin), paras. 35–6 (Simon Brown LJ) and 61(iii) (Richards J).

**315** See e.g. *Ex parte Adan* [2000] UKHL 67.

**316** [2005] EWCA Civ 1116, paras. 31 and 37. Mance LJ went on to say that ‘For the English Court to treat the extent of such rights as non-justiciable would appear to us to involve an extension, rather than an application, of existing doctrines developed in different contexts’, *ibid.* See also paras. 39–42. Somewhat confusingly, Mance LJ concluded that the doctrine of non-justiciability could not be ousted by consent, *ibid.*, para. 57.

**317** [2006] EWHC 830 (Ch), paras. 51 ff. See also *R v. Director of the Serious Fraud Office and BAE Systems* [2008] EWHC 714 (Admin), paras. 118–20 and *Republic of Croatia v. Republic of Serbia* [2009] EWHC 1559 (Ch), para. 27 ff. Note that in this case, Briggs J declared that the *AY Bank* case was also authority for a further exception to the non-justiciability principle, to the effect that even where the English courts will not adjudicate upon the merits of a dispute between foreign states, they may none the less grant protective measures so as to preserve the status quo pending the outcome of such disputes, at para. 31.

**318** *R (Corner House Research) v. Serious Fraud Office* (HL(E)) [2009] 1 AC 756, at paras. 118–9.

**319** A distinction has recently been drawn between a narrower doctrine of act of state, which concerns the recognition of acts of a foreign state within its own territory, and a broader principle of non-justiciability in respect of ‘certain sovereign acts’ of a foreign state with effects beyond its own territory: see Mance J in *Kuwait Airways Corporation v. Iraqi Airways Company* 116 ILR, pp. 534, 568, basing himself upon Lord Wilberforce in *Buttes Gas and Oil v. Hammer* [1982] AC 888, 930–2; 64 ILR, p. 331. Mance J’s analysis was approved by Lord Lloyd in *Ex Parte Pinochet (No. 1)* [2000] 1 AC 61, 102; 119 ILR, pp. 51, 91. See further *Yukos v. Rosneft* [2012] EWCA Civ 855, para. 40 ff., particularly noting that non-justiciability was ‘not so much a *separate* principle’ from act of state but rather a

‘more *general and fundamental* principle’, para. 48.

<sup>320</sup> See e.g. the decision of the Belgian Conseil d’État in *T v. Belgium* on 9 April 1998 that the process of declaring a foreign diplomat persona non grata was not justiciable both because the request from the receiving state was a matter between states and because it was the sending state that had to recall the person in question or terminate his functions and the Conseil d’État had no jurisdiction over an act emanating from a foreign state: 115 ILR, p. 442.

<sup>321</sup> See e.g. *Ex parte Turkish Cypriot Association* 112 ILR, p. 735.

<sup>322</sup> See *Buck v. Attorney-General* [1965] 1 Ch. 745; 42 ILR, p. 11.

<sup>323</sup> See *Yukos v Rosneft* [2012] EWCA Civ 855, para. 68 ff. Note that in this case Rix LJ stated that where, a foreign court has acted in a way which is an abuse of its own responsibilities as a court of law: ‘the courts of this country are not obliged to give effect to the potential jurisdiction or past acts of such a court, provided that the failings of the foreign court are sufficiently cogently brought home to the English court. We consider that this is the teaching of the Privy Council in *AK Investment v. Kyrgyz Mobil* [2011] 4 All ER 1027’, at paras. 73 and 87. See also *Berezovsky v. Abramovich* [2011] EWCA Civ 153, para. 93 ff.

<sup>324</sup> Decision of 16 May 2002, [2002] UKHL 19; 125 ILR, p. 677.

## 5 The subjects of international law

---

### Legal personality – introduction

In any legal system, certain entities, whether they be individuals or companies, will be regarded as possessing rights and duties enforceable at law.<sup>1</sup> Thus an individual may prosecute or be prosecuted for assault and a company can sue for breach of contract. They are able to do this because the law recognises them as ‘legal persons’ possessing the capacity to have and to maintain certain rights, and being subject to perform specific duties. Just which persons will be entitled to what rights in what circumstances will depend upon the scope and character of the law. But it is the function of the law to apportion such rights and duties to such entities as it sees fit. Legal personality is crucial. Without it institutions and groups cannot operate, for they need to be able to maintain and enforce claims. In municipal law individuals, limited companies and public corporations are recognised as each possessing a distinct legal personality, the terms of which are circumscribed by the relevant legislation.<sup>2</sup> It is the law which will determine the scope and nature of personality. Personality involves the examination of certain concepts within the law such as status, capacity, competence, as well as the nature and extent of particular rights and duties. The status of a particular entity may well be determinative of certain powers and obligations, while capacity will link together the status of a person with particular rights and duties. The whole process operates within the confines of the relevant legal system, which circumscribes personality, its nature and definition. This is especially true in international law. A particular view adopted of the system will invariably reflect upon the question of the identity and nature of international legal persons.<sup>3</sup>

Personality in international law necessitates the consideration of the interrelationship between rights and duties afforded under the international system and capacity to enforce claims. One needs to have close regard to the rules of international law in order to determine the precise nature of the capacity of the entity in question. Certain preliminary issues need to be faced. Does the personality of a particular claimant, for instance, depend upon its possession of the capacity to enforce rights? Indeed, is there any test of the nature of enforcement, or can even the most restrictive form of operation on the international scene be sufficient? One view suggests, for example, that while the quality of responsibility for violation of a rule usually co-exists with the quality of being able to enforce a complaint against a breach in any legal person, it would be useful to consider those possessing one of these qualities as indeed having juridical personality.<sup>4</sup> Other writers, on the other hand, emphasise the crucial role played by the element of enforceability of rights

within the international system.<sup>5</sup>

However, a range of factors needs to be carefully examined before it can be determined whether an entity has international personality and, if so, what rights, duties and competences apply in the particular case. Personality is a relative phenomenon varying with the circumstances. One of the distinguishing characteristics of contemporary international law has been the wide range of participants. These include states, international organisations, regional organisations, non-governmental organisations, public companies, private companies and individuals. To these may be added groups engaging in international terrorism. Not all such entities will constitute legal persons, although they may act with some degree of influence upon the international plane. International personality is participation plus some form of community acceptance. The latter element will be dependent upon many different factors, including the type of personality under question. It may be manifested in many forms and may in certain cases be inferred from practice. It will also reflect a need. Particular branches of international law here are playing a crucial role. Human rights law, the law relating to armed conflicts and international economic law are especially important in generating and reflecting increased participation and personality in international law.

## States

Despite the increasing range of actors and participants in the international legal system, states remain by far the most important legal persons and despite the rise of globalisation and all that this entails, states retain their attraction as the primary focus for the social activity of humankind and thus for international law.

Lauterpacht observed that: ‘the orthodox positivist doctrine has been explicit in the affirmation that only states are subjects of international law’.<sup>6</sup> However, it is less clear that in practice this position was maintained. The Holy See (particularly from 1871 to 1929), insurgents and belligerents, international organisations, chartered companies and various territorial entities such as the League of Cities were all at one time or another treated as possessing the capacity to become international persons.<sup>7</sup>

## Creation of statehood<sup>8</sup>

The relationship in this area between factual and legal criteria is a crucial shifting one. Whether the birth of a new state is primarily a question of fact or law and how the interaction between the criteria of effectiveness and other relevant legal principles may be reconciled are questions of considerable complexity and significance. Since *terrae nullius* are no longer apparent,<sup>9</sup> the creation of new states

in the future, once the decolonisation process is at an end, can only be accomplished as a result of the diminution or disappearance of existing states, and the need for careful regulation thus arises. Recent events such as the break-up of the Soviet Union, the Socialist Federal Republic of Yugoslavia and Czechoslovakia underline this. In addition, the decolonisation movement has stimulated a re-examination of the traditional criteria. Article 1 of the Montevideo Convention on Rights and Duties of States, 1933<sup>10</sup> lays down the most widely accepted formulation of the criteria of statehood in international law. It notes that the state as an international person should possess the following qualifications: ‘(a) a permanent population; (b) a defined territory; (c) government; and (d) capacity to enter into relations with other states’.

The Arbitration Commission of the European Conference on Yugoslavia<sup>11</sup> in Opinion No. 1 declared that ‘the state is commonly defined as a community which consists of a territory and a population subject to an organised political authority’ and that ‘such a state is characterised by sovereignty’. It was also noted that the form of internal political organisation and constitutional provisions constituted ‘mere facts’, although it was necessary to take them into account in order to determine the government’s sway over the population and the territory.<sup>12</sup>

Such provisions are neither exhaustive nor immutable. As will be seen below, other factors may be relevant, including self-determination and recognition, while the relative weight given to such criteria in particular situations may very well vary. What is clear, however, is that the relevant framework revolves essentially around territorial effectiveness.

The existence of a permanent population<sup>13</sup> is naturally required and there is no specification of a minimum number of inhabitants, as examples such as Nauru and Tuvalu<sup>14</sup> demonstrate. However, one of the issues raised by the Falkland Islands conflict does relate to the question of an acceptable minimum with regard to self-determination issues,<sup>15</sup> and it may be that the matter needs further clarification as there exists a number of small islands awaiting decolonisation.<sup>16</sup>

The need for a defined territory focuses upon the requirement for a particular territorial base upon which to operate. However, there is no necessity in international law for defined and settled boundaries. A state may be recognised as a legal person even though it is involved in a dispute with its neighbours as to the precise demarcation of its frontiers, so long as there is a consistent band of territory which is undeniably controlled by the government of the alleged state. For this reason at least, therefore, the ‘State of Palestine’ declared in November 1988 at a conference in Algiers cannot be regarded as a valid state. The Palestinian organisations did not control any part of the territory they claim.<sup>17</sup>

Albania prior to the First World War was recognised by many countries even though its borders were in dispute.<sup>18</sup> More recently, Israel has been accepted by the majority of nations as well as the United Nations as a valid state despite the fact that its frontiers have not been finally settled and despite its involvement in hostilities with its Arab neighbours over its existence and territorial delineation.<sup>19</sup> What matters is the presence of a stable community within a certain area, even though its frontiers may be uncertain. Indeed, it is possible for the territory of the state to be split into distinct parts, for example Pakistan prior to the Bangladesh secession of 1971 or present-day Azerbaijan.

For a political society to function reasonably effectively it needs some form of government or central control. However, this is not a precondition for recognition as an independent country.<sup>20</sup> It should be regarded more as an indication of some sort of coherent political structure and society, than the necessity for a sophisticated apparatus of executive and legislative organs.<sup>21</sup> A relevant factor here might be the extent to which the area not under the control of the government is claimed by another state as a matter of international law as distinct from *de facto* control. The general requirement might be seen to relate to the nineteenth-century concern with 'civilisation' as an essential of independent statehood and ignores the modern tendency to regard sovereignty for non-independent peoples as the paramount consideration, irrespective of administrative conditions.<sup>22</sup>

As an example of the former tendency one may note the *Aaland Islands* case of 1920. The report of the International Committee of Jurists appointed to investigate the status of the islands remarked, with regard to the establishment of the Finnish Republic in the disordered days following the Russian revolution, that it was extremely difficult to name the date that Finland became a sovereign state. It was noted that:

[t]his certainly did not take place until a stable political organisation had been created, and until the public authorities had become strong enough to assert themselves throughout the territories of the state without the assistance of the foreign troops.<sup>23</sup>

Recent practice with regard to the new states of Croatia and Bosnia and Herzegovina emerging out of the former Yugoslavia suggests the modification of the criterion of effective exercise of control by a government throughout its territory. Both Croatia and Bosnia and Herzegovina were recognised as independent states by European Community member states<sup>24</sup> and admitted to membership of the United Nations (which is limited to 'states' by article 4 of the UN Charter<sup>25</sup>)<sup>26</sup> at a time when both

states were faced with a situation where non-governmental forces controlled substantial areas of the territories in question in civil war conditions. More recently, Kosovo declared independence on 17 February 2008 with certain Serb-inhabited areas apparently not under the control of the central government.<sup>27</sup> In such situations, lack of effective central control might be balanced by significant international recognition, culminating in membership of the UN. Nevertheless, a foundation of effective control is required for statehood. Conversely, however, a comprehensive breakdown in order and the loss of control by the central authorities in an independent state will not obviate statehood. Whatever the consequences in terms of possible humanitarian involvement, whether by the UN or otherwise depending upon the circumstances, the collapse of governance within a state (sometimes referred to as a 'failed state') has no necessary effect upon the status of that state as a state. Indeed the very designation of 'failed state' is controversial and, in terms of international law, misleading.<sup>28</sup>

The capacity to enter into relations with other states is an aspect of the existence of the entity in question as well as an indication of the importance attached to recognition by other countries. It is a capacity not limited to sovereign nations, since international organisations, non-independent states and other bodies can enter into legal relations with other entities under the rules of international law. But it is essential for a sovereign state to be able to create such legal relations with other units as it sees fit. Where this is not present, the entity cannot be an independent state. The concern here is not with political pressure by one country over another, but rather the lack of competence to enter into legal relations. The difference is the presence or absence of legal capacity, not the degree of influence that may affect decisions.

The essence of such capacity is independence. This is crucial to statehood and amounts to a conclusion of law in the light of particular circumstances. It is a formal statement that the state is subject to no other sovereignty and is unaffected either by factual dependence upon other states or by submission to the rules of international law.<sup>29</sup> It is arguable that a degree of actual as well as formal independence may also be necessary. This question was raised in relation to the grant of independence by South Africa to its Bantustans. In the case of the Transkei, for example, a considerable proportion, perhaps 90 per cent, of its budget at one time was contributed by South Africa, while Bophuthatswana was split into a series of areas divided by South African territory.<sup>30</sup> Both the Organization of African Unity and the United Nations declared such 'independence' invalid and called upon all states not to recognise the new entities. These entities were, apart from South Africa, totally unrecognised.<sup>31</sup> However, many states are as dependent upon aid from other states, and economic success would not have altered the attitude of the international

community. Since South Africa as a sovereign state was able to alienate parts of its own territory under international law, these entities would appear in the light of the formal criteria of statehood to have been formally independent. However, it is suggested that the answer as to their status lay elsewhere than in an elucidation of this category of the criteria of statehood. It lay rather in understanding that actions taken in order to pursue an illegal policy, such as apartheid, cannot be sustained.<sup>32</sup>

An example of the complexities that may attend such a process is provided by the unilateral declaration of independence by Lithuania, one of the Baltic states unlawfully annexed by the Soviet Union in 1940, on 11 March 1990.<sup>33</sup> The 1940 annexation was never recognised *de jure* by the Western states and thus the control exercised by the USSR was accepted only upon a *de facto* basis. The 1990 declaration of independence was politically very sensitive, coming at a time of increasing disintegration within the Soviet Union, but went unrecognised by any state. In view of the continuing constitutional crisis within the USSR and the possibility of a new confederal association freely accepted by the fifteen Soviet republics, it was at that time premature to talk of Lithuania as an independent state, not least because the Soviet authorities maintained substantial control within that territory.<sup>34</sup> The independence of Lithuania and the other Baltic States was recognised during 1991 by a wide variety of states, including crucially the Soviet Union.<sup>35</sup>

It is possible, however, for a state to be accepted as independent even though, exceptionally, certain functions of government are placed in the hands of an outside body. In the case of Bosnia and Herzegovina, for example, the Dayton Peace Agreement of 1995 provided for a High Representative to be appointed as the 'final authority in theatre' with regard to the implementation of the agreement,<sup>36</sup> and the High Representative has, for example, removed a number of persons from public office. None of this has been understood by the international community to affect Bosnia's status as an independent state, but the arrangement did arise as an attempt to reach and implement a peace agreement in the context of a bitter civil war with third-party intervention. More controversially, after a period of international administration,<sup>37</sup> Kosovo declared its independence on 17 February 2008, noting specifically that it accepted the obligations for Kosovo under the Comprehensive Proposal for the Kosovo Status Settlement (the Ahtisaari Plan).<sup>38</sup> This Plan called for 'independence with international supervision' and the obligations for Kosovo included human rights and decentralisation guarantees together with an international presence to supervise implementation of the Settlement. The provisions of the Settlement were to take precedence over all other legal provisions in Kosovo. The international presence was to take the form of an International Civilian Representative (ICR), who would also be the European Union Special

Representative, to be appointed by the International Steering Group.<sup>39</sup> The ICR would be the final authority in Kosovo regarding interpretation of the civilian aspects of the Settlement and, in particular, would have the ability to annul decisions or laws adopted by the Kosovo authorities and sanction and remove public officials whose actions were determined to be inconsistent with the Settlement terms.<sup>40</sup> In addition, an international military presence, led by NATO, would ensure a safe environment throughout Kosovo.<sup>41</sup>

## **Self-determination and the criteria of statehood**

It is the criterion of government which, as suggested above, has been most affected by the development of the legal right to self-determination. The traditional exposition of the criterion concentrated upon the stability and effectiveness needed for this factor to be satisfied,<sup>42</sup> while the representative and democratic nature of the government has also been put forward as a requirement. The evolution of self-determination has affected the standard necessary as far as the actual exercise of authority is concerned, so that it appears a lower level of effectiveness, at least in decolonisation situations, has been accepted.<sup>43</sup> This can be illustrated by reference to a couple of cases.

The former Belgian Congo became independent on 30 June 1960 in the midst of widespread tribal fighting which had spread to the capital. Within a few weeks the Force Publique had mutinied, Belgian troops had intervened and the province of Katanga announced its secession. Notwithstanding the virtual breakdown of government, the Congo was recognised by a large number of states after independence and was admitted to the UN as a member state without opposition. Indeed, at the time of the relevant General Assembly resolution in September 1960, two different factions of the Congo government sought to be accepted by the UN as the legitimate representatives of the state. In the event, the delegation authorised by the head of state was accepted and that of the Prime Minister rejected.<sup>44</sup> A rather different episode occurred with regard to the Portuguese colony of Guinea-Bissau. In 1972, a UN Special Mission was dispatched to the 'liberated areas' of the territory and concluded that the colonial power had lost effective administrative control of large areas of the territory.<sup>45</sup> On 24 September 1973, the PAIGC proclaimed the Republic of Guinea Bissau an independent state. The issue of the 'illegal occupation' by Portuguese military forces of certain sections of the Republic of Guinea-Bissau' came before the General Assembly and a number of states affirmed the validity of the independence of the new state in international law. Western states denied that the criteria of statehood had been fulfilled. However, ninety-three states voted in favour of Assembly resolution 3061 (XXVIII) which mentioned 'the recent accession to independence of the people of Guinea-Bissau thereby creating the sovereign state of

the Republic of Guinea-Bissau'.<sup>46</sup>

In addition to modifying the traditional principle with regard to the effectiveness of government in certain circumstances, the principle of self-determination may also be relevant as an additional criterion of statehood. In the case of Rhodesia, UN resolutions denied the legal validity of the unilateral declaration of independence on 11 November 1965 and called upon member states not to recognise it.<sup>47</sup> No state did recognise Rhodesia and a civil war ultimately resulted in its transformation into the recognised state of Zimbabwe. Rhodesia might have been regarded as a state by virtue of its satisfaction of the factual requirements of statehood, but this is a dubious proposition. The evidence of complete non-recognition, the strenuous denunciations of its purported independence by the international community and the developing civil war militate strongly against this. It could be argued on the other hand that, in the absence of recognition, no entity could become a state, but this constitutive theory of recognition is not acceptable.<sup>48</sup> The best approach is to accept the development of self-determination as an additional criterion of statehood, denial of which would obviate statehood. This can only be acknowledged in relation to self-determination situations and would not operate in cases, for example, of secessions from existing states.<sup>49</sup> In other words, in the case of an entity seeking to become a state and accepted by the international community as being entitled to exercise the right of self-determination, it may well be necessary to demonstrate that the internal requirements of the principle have not been offended. One cannot define this condition too rigorously in view of state practice to date, but it would appear to be a sound proposition that systematic and institutionalised discrimination might invalidate a claim to statehood.

In particular, one may point to the practice of the international community concerning the successor states to the former Yugoslavia. The European Community adopted Guidelines on Recognition of New States in Eastern Europe and the Soviet Union on 16 December 1991,<sup>50</sup> which constituted a common position on the process of recognition of such new states and referred specifically to the principle of self-determination. The Guidelines underlined the need to respect the rule of law, democracy and human rights and mentioned specifically the requirement for guarantees for the rights of minorities. Although these Guidelines deal with the issue of recognition and not as such the criteria for statehood, the two are interlinked and conditions required for recognition may in the circumstances, especially where expressed in general and not specific terms, often in practice be interpreted as additions to the criteria for statehood.

## **Recognition**

Recognition is a method of accepting certain factual situations and endowing them with legal significance, but this relationship is a complicated one. In the context of the creation of statehood, recognition may be viewed as constitutive or declaratory, as will be noted in more detail in chapter 9. The former theory maintains that it is only through recognition that a state comes into being under international law, whereas the latter approach maintains that once the factual criteria of statehood have been satisfied, a new state exists as an international person, recognition becoming merely a political and not a legal act in this context. Various modifications have been made to these theories, but the role of recognition, at the least in providing strong evidential demonstration of satisfaction of the relevant criteria, must be acknowledged. In many situations, expressed requirements for recognition may be seen as impacting upon the question of statehood as the comments in the previous section on the EC Guidelines indicate. There is also an integral relationship between recognition and the criteria for statehood in the sense that the more overwhelming the scale of international recognition is in any given situation, the less may be demanded in terms of the objective demonstration of adherence to the criteria. Conversely, the more sparse international recognition is, the more attention will be focused upon proof of actual adherence to the criteria concerned.

## **Extinction of statehood**<sup>51</sup>

Extinction of statehood may take place as a consequence of merger, absorption or, historically, annexation. It may also occur as a result of the dismemberment of an existing state.<sup>52</sup> In general, caution needs to be exercised before the dissolution of a state is internationally accepted.<sup>53</sup> While the disappearance, like the existence, of a state is a matter of fact,<sup>54</sup> it is a matter of fact that is legally conditioned in that it is international law that will apportion particular legal consequences to particular factual situations and the appreciation of these facts will take place within a certain legal framework.

While it is not unusual for governments to disappear, it is rather rarer for states to become extinct. This will not happen in international law as a result of the illegal use of force, as the Kuwait crisis of August 1990 and the consequent United Nations response clearly demonstrates,<sup>55</sup> nor as a consequence of internal upheavals within a state,<sup>56</sup> but it may occur by consent. Three recent examples may be noted. On 22 May 1990, North and South Yemen united, or merged, to form one state, the Republic of Yemen,<sup>57</sup> while on 3 October 1990, the two German states reunified as a result of the constitutional accession of the *Länder* of the German Democratic Republic to the Federal Republic of Germany.<sup>58</sup> The dissolution of Czechoslovakia<sup>59</sup> on 1 January 1993 and the establishment of the two new states of

the Czech Republic and Slovakia constitutes a further example of the dismemberment, or disappearance, of a state.<sup>60</sup>

During 1991, the process of disintegration of the Soviet Union gathered force as the Baltic states reasserted their independence<sup>61</sup> and the other Republics of the USSR stated their intention to become sovereign. In December of that year, the Commonwealth of Independent States was proclaimed, and it was stated in the Alma Ata Declaration<sup>62</sup> that, with the establishment of the CIS, 'the Union of Soviet Socialist Republics ceases to exist'. The states of the CIS agreed to support 'Russia's continuance of the membership of the Union of Soviet Socialist Republics in the United Nations, including permanent membership of the Security Council, and other international organisations'.<sup>63</sup> It has been commonly accepted that Russia constitutes a continuation of the USSR, with consequential adjustments to take account of the independence of the other former Republics of the Soviet Union.<sup>64</sup> It is therefore a case of dismemberment basically consisting of the transformation of an existing state. The disappearance of the USSR was accompanied by the claim, internationally accepted, of the Russian Federation to be the continuation of that state. While the element of continuity is crucial in the framework of the rules of state succession,<sup>65</sup> it does constitute a complication in the context of extinction of states.

By way of contrast, not all the relevant parties accepted that the process of dissolution of the former Socialist Federal Republic of Yugoslavia during 1991–2 resulted in the dissolution of that state.<sup>66</sup> The Federal Republic of Yugoslavia, comprising the former Republics of Serbia and Montenegro, saw itself as the continuation of the former state within reduced boundaries, while the other former Republics disputed this and maintained rather that the Federal Republic of Yugoslavia (Serbia and Montenegro) was a successor to the former Yugoslavia precisely on the same basis as the other former Republics such as Croatia, Slovenia and Bosnia and Herzegovina. The matter was discussed by the Yugoslav Arbitration Commission. In Opinion No. 1 of 29 November 1991, it was noted that at that stage the Socialist Federal Republic of Yugoslavia was 'in the process of dissolution'.<sup>67</sup> However, in Opinion No. 8, adopted on 4 July 1992, the Arbitration Commission stated that the process of dissolution had been completed and that the Socialist Federal Republic of Yugoslavia (SFRY) no longer existed. This conclusion was reached on the basis of the fact that Slovenia, Croatia and Bosnia and Herzegovina had been recognised as new states, the republics of Serbia and Montenegro had adopted a new constitution for the 'Federal Republic of Yugoslavia' and UN resolutions had been adopted referring to 'the former SFRY'.<sup>68</sup> The Commission also emphasised that the existence of federal states was seriously compromised when a majority of the constituent entities, embracing a majority of the territory and

population of the federal state, constitute themselves as sovereign states with the result that federal authority could no longer be effectively exercised.<sup>69</sup> The UN Security Council in resolution 777 (1992) stated that ‘the state formerly known as the Socialist Federal Republic of Yugoslavia has ceased to exist’. This was reiterated in resolution 1022 (1995) in which the Security Council, in welcoming the Dayton Peace Agreement (the General Framework Agreement for Peace in Bosnia and Herzegovina) between the states of the former Yugoslavia and suspending the application of sanctions, stated that the Socialist Federal Republic of Yugoslavia ‘has ceased to exist’. On 1 November 2000, Yugoslavia was admitted to the UN as a new member,<sup>70</sup> following its request sent to the Security Council on 27 October 2000.<sup>71</sup>

## **The fundamental rights of states**

The fundamental rights of states exist by virtue of the international legal order, which is able, as in the case of other legal orders, to define the characteristics of its subjects.<sup>72</sup>

### ***Independence***<sup>73</sup>

Perhaps the outstanding characteristic of a state is its independence, or sovereignty. This was defined in the Draft Declaration on the Rights and Duties of States prepared in 1949 by the International Law Commission as the capacity of a state to provide for its own well-being and development free from the domination of other states, providing it does not impair or violate their legitimate rights.<sup>74</sup> By independence, one is referring to a legal concept and it is no deviation from independence to be subject to the rules of international law. Any political or economic dependence that may in reality exist does not affect the legal independence of the state, unless that state is formally compelled to submit to the demands of a superior state, in which case dependent status is concerned.

A discussion on the meaning and nature of independence took place in the *Austro-German Customs Union* case before the Permanent Court of International Justice in 1931.<sup>75</sup> It concerned a proposal to create a free trade customs union between the two German-speaking states and whether this was incompatible with the 1919 Peace Treaties (coupled with a subsequent protocol of 1922) pledging Austria to take no action to compromise its independence without the consent of the Council of the League of Nations. In the event, and in the circumstances of the case, the Court held that the proposed union would adversely affect Austria’s economic independence. Judge Anzilotti noted that restrictions upon a state’s liberty, whether arising out of customary law or treaty obligations, do not as such affect its independence. As long

as such restrictions do not place the state under the legal authority of another state, the former maintains its status as an independent country.<sup>76</sup>

The Permanent Court emphasised in the *Lotus* case<sup>77</sup> that '[r]estrictions upon the independence of states cannot therefore be presumed'. A similar point in different circumstances was made by the International Court of Justice in the *Nicaragua* case,<sup>78</sup> where it was stated that 'in international law there are no rules, other than such rules as may be accepted by the state concerned, by treaty or otherwise, whereby the level of armaments of a sovereign state can be limited, and this principle is valid for all states without exception'. The Court also underlined in the *Legality of the Threat or Use of Nuclear Weapons*<sup>79</sup> that '[s]tate practice shows that the illegality of the use of certain weapons as such does not result from an absence of authorisation but, on the contrary, is formulated in terms of prohibition'. The starting point for the consideration of the rights and obligations of states within the international legal system remains that international law permits freedom of action for states, unless there is a rule constraining this. However, such freedom exists within and not outside the international legal system and it is therefore international law which dictates the scope and content of the independence of states and not the states themselves individually and unilaterally.

The notion of independence in international law implies a number of rights and duties: for example, the right of a state to exercise jurisdiction over its territory and permanent population, or the right to engage upon an act of self-defence in certain situations. It implies also the duty not to intervene in the internal affairs of other sovereign states. Precisely what constitutes the internal affairs of a state is open to dispute and is in any event a constantly changing standard. It was maintained by the Western powers for many years that any discussion or action by the United Nations<sup>80</sup> with regard to their colonial possessions was contrary to international law.

However, this argument by the European colonial powers did not succeed and the United Nations examined many colonial situations.<sup>81</sup> In addition, issues related to human rights and racial oppression do not now fall within the closed category of domestic jurisdiction. It was stated on behalf of the European Community, for example, that the 'protection of human rights and fundamental freedoms can in no way be considered an interference in a state's internal affairs'. Reference was also made to 'the moral right to intervene whenever human rights are violated'.<sup>82</sup>

This duty not to intervene in matters within the domestic jurisdiction of any state was included in the Declaration on Principles of International Law Concerning Friendly Relations and Co-operation among States adopted in October 1970 by the United Nations General Assembly. It was emphasised that

[n]o state or group of states has the right to intervene, directly or indirectly, for any reason whatever, in the internal or external affairs of any other state. Consequently, armed intervention and all other forms of interference or attempted threats against the personality of the state or against its political, economic and cultural elements, are in violation of international law.

The prohibition also covers any assistance or aid to subversive elements aiming at the violent overthrow of the government of a state. In particular, the use of force to deprive peoples of their national identity amounts to a violation of this principle of non-intervention.<sup>83</sup>

The principles surrounding sovereignty, such as non-intervention, are essential in the maintenance of a reasonably stable system of competing states. Setting limits on the powers of states vis-à-vis other states contributes to some extent to a degree of stability within the legal order. As the International Court of Justice pointed out in the *Corfu Channel* case in 1949, ‘between independent states, respect for territorial sovereignty is an essential foundation of international relations’.<sup>84</sup>

By a similar token a state cannot purport to enforce its laws in the territory of another state without the consent of the state concerned. However, international law would seem to permit in some circumstances the state to continue to exercise its jurisdiction, notwithstanding the illegality of the apprehension.<sup>85</sup> It also follows that the presence of foreign troops on the territory of a sovereign state requires the consent of that state.<sup>86</sup>

## ***Equality***<sup>87</sup>

One other crucial principle is the legal equality of states, that is equality of legal rights and duties. States, irrespective of size or power, have the same juridical capacities and functions, and are likewise entitled to one vote in the United Nations General Assembly. The doctrine of the legal equality of states is an umbrella category for it includes within its scope the recognised rights and obligations which fall upon all states.

This was recognised in the 1970 Declaration on Principles of International Law. This provides that:

All states enjoy sovereign equality. They have equal rights and duties and are equal members of the international community, notwithstanding differences of an economic, social, political or other nature.

In particular, sovereign equality includes the following elements:

- (a) States are juridically equal;
- (b) Each state enjoys the rights inherent in full sovereignty;
- (c) Each state has the duty to respect the personality of other states;
- (d) The territorial integrity and political independence of the state are inviolable;
- (e) Each state has the right freely to choose and develop its political, social, economic and cultural systems;
- (f) Each state has the duty to comply fully and in good faith with its international obligations and to live in peace with other states.<sup>88</sup>

In many respects this doctrine owes its origins to Natural Law thinking. Just as equality was regarded as the essence of man and thus contributed philosophically to the foundation of the state, so naturalist scholars treated equality as the natural condition of states. With the rise in positivism, the emphasis altered and, rather than postulating a general rule applicable to all and from which a series of rights and duties may be deduced, international lawyers concentrated upon the sovereignty of each and every state, and the necessity that international law be founded upon the consent of states.

The notion of equality before the law is accepted by states in the sense of equality of legal personality and capacity. However, it would not be strictly accurate to talk in terms of the equality of states in creating law. The major states will always have an influence commensurate with their status, if only because their concerns are much wider, their interests much deeper and their power more effective.<sup>89</sup>

Within the General Assembly of the United Nations, the doctrine of equality is maintained by the rule of one state, one vote.<sup>90</sup> However, one should not overlook the existence of the veto possessed by the USA, Russia, China, France and the United Kingdom in the Security Council.<sup>91</sup>

## ***Peaceful co-existence***

This concept has been formulated in different ways and with different views as to its legal nature by the USSR, China and the Third World. It was elaborated in 1954 as the Five Principles of Peaceful Co-existence by India and China, which concerned mutual respect for each other's territorial integrity and sovereignty, mutual non-aggression, non-interference in each other's affairs and the principle of equality.<sup>92</sup>

The idea was expanded in a number of international documents such as the final communiqué of the Bandung Conference in 1955 and in various resolutions of the United Nations.<sup>93</sup> Its recognised constituents also appeared in the list of Principles of the Charter of the Organization of African Unity. Among the points enumerated

are the concepts of sovereign equality, noninterference in the internal affairs of states, respect for the sovereignty and territorial integrity of states, as well as a condemnation of subversive activities carried out from one state and aimed against another. Other concepts that have been included in this category comprise such principles as non-aggression and the execution of international obligations in good faith. The Soviet Union had also expressed the view that peaceful coexistence constituted the guiding principle in contemporary international law.<sup>94</sup>

## **Protectorates and protected states<sup>95</sup>**

A distinction is sometimes made between a protectorate and a protected state. In the former case, in general, the entity concerned enters into an arrangement with a state under which, while separate legal personality may be involved, separate statehood is not. In the case of a protected state, the entity concerned retains its status as a separate state but enters into a valid treaty relationship with another state affording the latter certain extensive functions possibly internally and externally. However, precisely which type of arrangement is made and the nature of the status, rights and duties in question will depend upon the circumstances and, in particular, the terms of the relevant agreement and third-party attitudes.<sup>96</sup>

In the case of Morocco, the Treaty of Fez of 1912 with France gave the latter the power to exercise certain sovereign powers on behalf of the former, including all of its international relations. Nevertheless, the ICJ emphasised that Morocco had in the circumstances of the case remained a sovereign state.<sup>97</sup>

In the case of sub-Saharan Africa in the colonial period, treaties of protection were entered into with tribal entities that were not states. Such institutions were termed 'colonial protectorates' and constituted internal colonial arrangements. They did not constitute international treaties with internationally recognised states.<sup>98</sup>

The extent of powers delegated to the protecting state in such circumstances may vary, as may the manner of the termination of the arrangement. In these cases, formal sovereignty remains unaffected and the entity in question retains its status as a state, and may act as such in the various international fora, regard being had of course to the terms of the arrangement. The obligation may be merely to take note of the advice of the protecting state, or it may extend to a form of diplomatic delegation subject to instruction, as in the case of Liechtenstein. Liechtenstein was refused admission to the League of Nations since it was held unable to discharge all the international obligations imposed by the Covenant in the light of its delegation of sovereign powers, such as diplomatic representation, administration of post, telegraph and telephone services and final decisions in certain judicial cases.<sup>99</sup> Liechtenstein, however, has been a party to the Statute of the International Court of

Justice and was a party to the *Nottebohm*<sup>100</sup> case before the Court, a facility only open to states. Liechtenstein joined the United Nations in 1990.

## **Federal states**<sup>101</sup>

There are various forms of federation or confederation, according to the relative distribution of power between the central and local organs. In some states, the residue of power lies with the central government, in others with the local or provincial bodies. A confederation implies a more flexible arrangement, leaving a considerable degree of authority and competence with the component units to the detriment of the central organ.<sup>102</sup>

The Yugoslav Arbitration Commission noted in Opinion No. 1 that in the case of a federal state embracing communities possessing a degree of autonomy where such communities participate in the exercise of political power within the framework of institutions common to the federation, the ‘existence of the state implies that the federal organs represent the components of the federation and wield effective power’.<sup>103</sup> In addition, the existence of such a federal state would be seriously compromised ‘when a majority of these entities, embracing the greater part of the territory and population, constitute themselves as sovereign states with the result that federal authority may no longer be effectively exercised’.<sup>104</sup>

The division of powers inherent in such arrangements often raises important questions for international law, particularly in the areas of personality, responsibility and immunity. Whether the federation dissolves into two or more states also brings into focus the doctrine of self-determination in the form of secession. Such dissolution may be the result of an amicable and constitutional agreement or may occur pursuant to a forceful exercise of secession. In the latter case, international legal rules may be pleaded in aid, but the position would seem to be that (apart from recognised colonial situations) there is no right of self-determination applicable to independent states that would justify the resort to secession. There is, of course, no international legal duty to refrain from secession attempts, in the absence of a Security Council decision to the contrary: the situation remains subject to the domestic law. However, should such a secession prove successful in fact, then the concepts of recognition and the appropriate criteria of statehood would prove relevant and determinative as to the new situation.<sup>105</sup>

The federal state will itself, of course, have personality, but the question of the personality and capability of the component units of the federation on the international plane can really only be determined in the light of the constitution of the state concerned and state practice. For instance, the then Soviet Republics of Byelorussia and the Ukraine were admitted as members of the United Nations in

1945 and to that extent possessed international personality.<sup>106</sup> Component states of a federation that have been provided with a certain restricted international competence may thus be accepted as having a degree of international personality. The issue has arisen especially with regard to treaties. Lauterpacht, in his Report on the Law of Treaties, for example, noted that treaties concluded by component units of federal states 'are treaties in the meaning of international law',<sup>107</sup> although Fitzmaurice adopted a different approach in his Report on the Law of Treaties by stating that such units act as agents for the federation which alone possesses international personality and which is the entity bound by the treaty and responsible for its implementation.<sup>108</sup> Article 5(2) of the International Law Commission's Draft Articles on the Law of Treaties provided that

[s]tates members of a federal union may possess a capacity to conclude treaties if such capacity is admitted by the federal constitution and within the limits there laid down

but this was ultimately rejected at the Vienna Conference on the Law of Treaties,<sup>109</sup> partly on the grounds that the rule was beyond the scope of the Convention itself. The major reasons for the rejection, however, were that the provision would enable third states to intervene in the internal affairs of federal states by seeking to interpret the constitutions of the latter and that, from another perspective, it would unduly enhance the power of domestic law to determine questions of international personality to the detriment of international law. This perhaps would indeed have swung the balance too far away from the international sphere of operation.

Different federations have evolved different systems with regard to the allocation of treaty-making powers. In some cases, component units may enter into such arrangements subject to varying conditions. The Constitution of Switzerland, for example, enables the cantons to conclude treaties with foreign states on issues concerning public economy, frontier relations and the police, subject to the provision that the Federal Council acts as the intermediary.<sup>110</sup> In the case of the United States, responsibility for the conduct of foreign relations rests exclusively with the Federal Government,<sup>111</sup> although American states have entered into certain compacts with foreign states or component units (such as Manitoba and Quebec, provinces of Canada) dealing with the construction and maintenance of highways and international bridges, following upon consultations with the foreign state conducted by the federal authorities. In any event, it is clear that the internal constitutional structure is crucial in endowing the unit concerned with capacity. What, however, turns this into international capacity is recognition.

An issue recently the subject of concern and discussion has been the question of

the domestic implementation of treaty obligations in the case of federations, especially in the light of the fact that component units may possess legislative power relating to the subject-matter of the treaty concerned. Although this issue lies primarily within the field of domestic constitutional law, there are important implications for international law. In the US, for example, the approach adopted has been to insert ‘federal’ reservations to treaties in cases where the states of the Union have exercised jurisdiction over the subject-matter in question, providing that the Federal Government would take appropriate steps to enable the competent authorities of the component units to take appropriate measures to fulfil the obligations concerned.<sup>112</sup> In general, however, there have been few restrictions on entry into international agreements.<sup>113</sup>

The question as to divided competence in federations and international treaties has arisen in the past, particularly with regard to conventions of the International Labour Organization, which typically encompass areas subject to the law-making competence of federal component units. In Canada, for example, early attempts by the central government to ratify ILO conventions were defeated by the decisions of the courts on constitutional grounds, supporting the views of the provinces,<sup>114</sup> while the US has a poor record of ratification of ILO conventions on similar grounds of local competence and federal treaty-making.<sup>115</sup> The issue that arises therefore is either the position of a state that refuses to ratify or sign a treaty on grounds of component unit competence in the area in question or alternatively the problem of implementation and thus responsibility where ratification does take place. In so far as the latter is concerned, the issue has been raised in the context of article 36 of the Vienna Convention on Consular Relations, 1963, to which the US is a party, and which requires, among other things, that states parties inform a foreigner under arrest of his or her right to communicate with the relevant consulate. The International Court of Justice has twice held the US in violation of this requirement, noting that the domestic doctrine known as the procedural default rule, preventing a claimant from raising an issue on appeal or on review if it had not been raised at trial, could not excuse or justify that violation.<sup>116</sup> The US Supreme Court has held that while the International Court’s decisions were entitled to ‘respectful consideration’, they were not binding.<sup>117</sup> This was so even though the US President in a memorandum dated 28 February 2005 had declared that the US would fulfil its obligations under the *Avena* decision by having states’ courts give effect to it.<sup>118</sup> The Texas Court of Criminal Appeals, however, held that neither the *Avena* decision of the ICJ nor the President’s memorandum constituted binding federal law preempting Texas law, so that Medellin (the applicant) would not be provided with the review called for by the International Court and by the President.<sup>119</sup>

In Australia, the issue has turned on the interpretation of the constitutional grant

of federal power to make laws ‘with respect to...external affairs’.<sup>120</sup> Two recent cases have analysed this, in the light particularly of the established principle that the Federal Government could under this provision legislate on matters, not otherwise explicitly assigned to it, which possessed an intrinsic international aspect.<sup>121</sup>

In *Koowarta v. Bjelke-Petersen*<sup>122</sup> in 1982, the Australian High Court, in dealing with an action against the Premier of Queensland for breach of the Racial Discrimination Act 1975 (which incorporated parts of the International Convention on the Elimination of All Forms of Racial Discrimination adopted in 1965), held that the relevant legislation was valid with respect to the ‘external affairs’ provision under section 51(29) of the Constitution. In other words, the ‘external affairs’ power extended to permit the implementation of an international agreement, despite the fact that the subject-matter concerned was otherwise outside federal power. It was felt that if Australia accepted a treaty obligation with respect to an aspect of its own internal legal order, the subject of the obligation thus became an ‘external affair’ and legislation dealing with this fell within section 51(29), and was thereby valid constitutionally.<sup>123</sup> It was not necessary that a treaty obligation be assumed: the fact that the norm of non-discrimination was established in customary international law was itself sufficient in the view of Stephen J to treat the issue of racial discrimination as part of external affairs.<sup>124</sup>

In *Commonwealth of Australia v. Tasmania*,<sup>125</sup> the issue concerned the construction of a dam in an area placed on the World Heritage List established under the 1972 UNESCO Convention for the Protection of the World Cultural and Natural Heritage, to which Australia was a party. The Federal Government in 1983 wished to stop the scheme by reference *inter alia* to the ‘external affairs’ power as interpreted in *Koowarta*, since it possessed no specific legislative power over the environment. The majority of the Court held that the ‘external affairs’ power extended to the implementation of treaty obligations. It was not necessary that the subject-matter of the treaty be inherently international.

The effect of these cases seen, of course, in the context of the Australian Constitution, is to reduce the problems faced by federal states of implementing international obligations in the face of local jurisdiction.

The difficulties faced by federal states have also become evident with regard to issues of state responsibility.<sup>126</sup> As a matter of international law, states are responsible for their actions, including those of subordinate organs irrespective of domestic constitutional arrangements.<sup>127</sup> The International Court in the *Immunity from Legal Process of a Special Rapporteur* case stated that it was a well-established rule of customary international law that ‘the conduct of any organ of a State must be regarded as an act of that State’<sup>128</sup> and this applies to component units of a federal

state. As the Court noted in its Order of 3 March 1999 on provisional measures in the *LaGrand* case, ‘the international responsibility of a State is engaged by the action of the competent organs and authorities acting in that State, whatever they may be’. In particular, the US was under an obligation to transmit the Order to the Governor of the State of Arizona, while the Governor was under an obligation to act in conformity with the international undertakings of the US.<sup>129</sup> Similarly, the Court noted in the *Immunity from Legal Process of a Special Rapporteur* case that the government of Malaysia was under an obligation to communicate the Court’s Advisory Opinion to the Malaysian courts in order that Malaysia’s international obligations be given effect.<sup>130</sup>

Thus, international responsibility of the state may co-exist with an internal lack of capacity to remedy the particular international wrong. In such circumstances, the central government is under a duty to seek to persuade the component unit to correct the violation of international law,<sup>131</sup> while the latter is, it seems, under an international obligation to act in accordance with the international obligations of the state.

Federal practice in regulating disputes between component units is often of considerable value in international law. This operates particularly in cases of boundary problems, where similar issues arise.<sup>132</sup> Conversely, international practice may often be relevant in the resolution of conflicts between component units.<sup>133</sup>

## **Sui generis territorial entities**

### **Mandated and trust territories<sup>134</sup>**

After the end of the First World War and the collapse of the Axis and Russian empires, the Allies established a system for dealing with the colonies of the defeated powers that did not involve annexation. These territories would be governed according to the principle that ‘the well-being and development of such peoples form a sacred trust of civilisation’. The way in which this principle would be put into effect would be to entrust the tutelage of such people to ‘advanced nations who by reason of their resources, their experience or their geographical position’ could undertake the responsibility. The arrangement would be exercised by them as mandatories on behalf of the League.<sup>135</sup>

Upon the conclusion of the Second World War and the demise of the League, the mandate system was transmuted into the United Nations trusteeship system under Chapters XII and XIII of the UN Charter.<sup>136</sup> The strategic trust territory of the Pacific, taken from Japan, the mandatory power, was placed in a special category

subject to Security Council rather than Trusteeship Council supervision for security reasons,<sup>137</sup> while South Africa refused to place its mandated territory under the system. Quite who held sovereignty in such territories was the subject of extensive debates over many decades.<sup>138</sup>

As far as the trust territory of the Pacific was concerned, the US signed a Covenant with the Commonwealth of the Northern Mariana Islands and Compacts of Free Association with the Federated States of Micronesia and with the Republic of the Marshall Islands. Upon their entry into force in autumn 1986, it was determined that the trusteeship had been terminated. This procedure providing for political union with the US was accepted by the Trusteeship Council as a legitimate exercise of self-determination.<sup>139</sup> However, the proposed Compact of Free Association with the Republic of Palau (the final part of the former trust territory) did not enter into force as a result of disagreement over the transit of nuclear-powered or armed vessels and aircraft through Palauan waters and airspace and, therefore, the US continued to act as administering authority under the trusteeship agreement.<sup>140</sup> These difficulties were eventually resolved.<sup>141</sup>

South West Africa was administered after the end of the First World War as a mandate by South Africa, which refused after the Second World War to place the territory under the trusteeship system. Following this, the International Court of Justice in 1950 in its Advisory Opinion on the *International Status of South West Africa*<sup>142</sup> stated that, while there was no legal obligation imposed by the United Nations Charter to transfer a mandated territory into a trust territory, South Africa was still bound by the terms of the mandate agreement and the Covenant of the League of Nations, and the obligations that it had assumed at that time. The Court emphasised that South Africa alone did not have the capacity to modify the international status of the territory. This competence rested with South Africa acting with the consent of the United Nations, as successor to the League of Nations. Logically flowing from this decision was the ability of the United Nations to hear petitioners from the territory in consequence of South Africa's refusal to heed United Nations decisions and in pursuance of League of Nations practices.<sup>143</sup>

In 1962 the ICJ heard the case brought by Ethiopia and Liberia, the two African members of the League, that South Africa was in breach of the terms of the mandate and had thus violated international law. The Court initially affirmed that it had jurisdiction to hear the merits of the dispute.<sup>144</sup> However, by the Second Phase of the case, the Court (its composition having slightly altered in the meanwhile) decided that Ethiopia and Liberia did not have any legal interest in the subject-matter of the claim (the existence and supervision of the mandate over South West Africa) and accordingly their contentions were rejected.<sup>145</sup> Having thus declared on

the lack of standing of the two African appellants, the Court did not discuss any of the substantive questions which stood before it.

This judgment aroused a great deal of feeling, particularly in the Third World, and occasioned a shift in emphasis in dealing with the problem of the territory in question.<sup>146</sup>

The General Assembly resolved in October 1966 that since South Africa had failed to fulfil its obligations, the mandate was therefore terminated. South West Africa (or Namibia as it was to be called) was to come under the direct responsibility of the United Nations.<sup>147</sup> Accordingly, a Council was established to oversee the territory and a High Commissioner appointed.<sup>148</sup> The Security Council in a number of resolutions upheld the action of the Assembly and called upon South Africa to withdraw its administration from the territory. It also requested other states to refrain from dealing with the South African government in so far as Namibia was concerned.<sup>149</sup>

The Security Council ultimately turned to the International Court and requested an Advisory Opinion as to the *Legal Consequences for States of the Continued Presence of South Africa in Namibia*.<sup>150</sup> The Court concluded that South Africa's presence in Namibia was indeed illegal in view of the series of events culminating in the United Nations resolutions on the grounds of a material breach of a treaty (the mandate agreement) by South Africa, and further that 'a binding determination made by a competent organ of the United Nations to the effect that a situation is illegal cannot remain without consequence'. South Africa was obligated to withdraw its administration from the territory, and other states members of the United Nations were obliged to recognise the illegality and the invalidity of its acts with regard to that territory and aid the United Nations in its efforts concerning the problem.<sup>151</sup>

The opinion was approved by the Security Council in resolution 301 (1971), which also reaffirmed the national unity and territorial integrity of Namibia. In 1978 South Africa announced its acceptance of proposals negotiated by the five Western contact powers (UK, USA, France, Canada and West Germany) for Namibian independence involving a UN supervised election and peace-keeping force.<sup>152</sup> After some difficulties,<sup>153</sup> Namibia finally obtained its independence on 23 April 1990.<sup>154</sup>

## Germany 1945

With the defeat of Germany on 5 June 1945, the Allied Powers assumed 'supreme authority' with respect to that country, while expressly disclaiming any intention of annexation.<sup>155</sup> Germany was divided into four occupation zones with four-power control over Berlin. The Control Council established by the Allies acted on behalf of

Germany and in such capacity entered into binding legal arrangements. The state of Germany continued, however, and the situation, as has been observed, was akin to legal representation or agency of necessity.<sup>156</sup> Under the 1952 Treaty between the three Western powers and the Federal Republic of Germany, full sovereign powers were granted to the latter subject to retained powers concerning the making of a peace treaty, and in 1972 the Federal Republic of Germany and the German Democratic Republic, established in 1954 by the Soviet Union in its zone, recognised each other as sovereign states.<sup>157</sup>

However, following a series of dramatic events during 1989 in Central and Eastern Europe, deriving in essence from the withdrawal of Soviet control, the drive for a reunified Germany in 1990 became un-stoppable.<sup>158</sup> A State Treaty on German Economic, Monetary and Social Union was signed by the Finance Ministers of the two German states on 18 May and this took effect on 1 July.<sup>159</sup> A State Treaty on Unification was signed on 31 August, providing for unification on 3 October by the accession to the Federal Republic of Germany of the *Länder* of the German Democratic Republic under article 23 of the Basic Law of the Federal Republic, with Berlin as the capital.<sup>160</sup> The external obstacle to unity was removed by the signing on 12 September of the Treaty on the Final Settlement with Respect to Germany, between the two German states and the four wartime allies (UK, USA, USSR and France).<sup>161</sup> Under this treaty, a reunified Germany agreed to accept the current Oder–Neisse border with Poland and to limit its armed forces to 370,000 persons, while pledging not to acquire atomic, chemical or biological weapons. The Agreement on the Settlement of Certain Matters Relating to Berlin between the Federal Republic and the three Western powers on 25 September 1990 provided for the relinquishment of Allied rights with regard to Berlin.<sup>162</sup>

## Condominium

In this instance two or more states equally exercise sovereignty with respect to a territory and its inhabitants. There are arguments as to the relationship between the states concerned, the identity of the sovereign for the purposes of the territory and the nature of the competences involved.<sup>163</sup> In the case of the New Hebrides, a series of Anglo-French agreements established a region of joint influence, with each power retaining sovereignty over its nationals and neither exercising separate authority over the area.<sup>164</sup> A Protocol listed the functions of the condominium government and vested the power to issue joint regulations respecting them in a British and a French High Commissioner. This power was delegated to resident commissioners who dealt with their respective nationals. Three governmental systems accordingly co-existed, with something of a legal vacuum with regard to land tenure and the civil

transactions of the indigenous population.<sup>165</sup> The process leading to the independence of the territory also reflected its unique status as a condominium.<sup>166</sup> It was noted that the usual independence Bill would not have been appropriate, since the New Hebrides was not a British colony. Its legal status as an Anglo-French condominium had been established by international agreement and could only be terminated in the same fashion. The nature of the condominium was such that it assumed that the two metropolitan powers would always act together and unilateral action was not provided for in the basic constitutional documents.<sup>167</sup> The territory became independent on 30 July 1980 as the state of Vanuatu. The entity involved prior to independence grew out of an international treaty and established an administrative entity arguably distinct from its metropolitan governments but more likely operating on the basis of a form of joint agency with a range of delegated powers.<sup>168</sup>

The Central American Court of Justice in 1917<sup>169</sup> held that a condominium existed with respect to the Gulf of Fonseca providing for rights of co-ownership of the three coastal states of Nicaragua, *El Salvador and Honduras*. The issue was raised in the *El Salvador/Honduras* case before International Court of Justice.<sup>170</sup> The Court noted that a condominium arrangement being ‘a structured system for the joint exercise of sovereign governmental powers over a territory’ was normally created by agreement between the states concerned, although it could be created as a juridical consequence of a succession of states (as in the Gulf of Fonseca situation itself), being one of the ways in which territorial sovereignty could pass from one state to another. The Court concluded that the waters of the Gulf of Fonseca beyond the three-mile territorial sea were historic waters and subject to a joint sovereignty of the three coastal states. It based its decision, apart from the 1917 judgment, upon the historic character of the Gulf waters, the consistent claims of the three coastal states and the absence of protest from other states.<sup>171</sup>

## **International administration of territories**

In such cases a particular territory is placed under a form of international regime, but the conditions under which this has been done have varied widely, from autonomous areas within states to relatively independent entities.<sup>172</sup> The UN is able to assume the administration of territories in specific circumstances. The trusteeship system was founded upon the supervisory role of the UN,<sup>173</sup> while in the case of South West Africa, the General Assembly supported by the Security Council ended South Africa’s mandate and asserted its competence to administer the territory pending independence.<sup>174</sup> Beyond this, UN organs exercising their powers may assume a variety of administrative functions over particular territories where issues

of international concern have arisen. Attempts were made to create such a regime for Jerusalem under the General Assembly partition resolution for Palestine in 1947 as a 'corpus separatum under a special international regime...administered by the United Nations', but this never materialised for a number of reasons.<sup>175</sup> Further, the Security Council in 1947 adopted a Permanent Statute for the Free Territory of Trieste, under which the Council was designated as the supreme administrative and legislative authority of the territory.<sup>176</sup>

More recently, the UN has become more involved in important administrative functions, authority being derived from a mixture of international agreements, domestic consent and the powers of the Security Council under Chapter VII to adopt binding decisions concerning international peace and security, as the case may be. For example, the 1991 Paris Peace Agreements between the four Cambodian factions authorised the UN to establish civil administrative functions in that country pending elections and the adoption of a new constitution. This was accomplished through the UN Transitional Authority in Cambodia (UNTAC), to which were delegated 'all powers necessary to ensure the implementation' of the peace settlement and which also exercised competence in areas such as foreign affairs, defence, finance and so forth.<sup>177</sup>

Annex 10 of the General Framework Agreement for Peace in Bosnia and Herzegovina (the Dayton Agreement)<sup>178</sup> established the post of High Representative with extensive powers with regard to the civilian implementation of the peace agreement and with the final authority to interpret the civilian aspects of the settlement.<sup>179</sup> This was endorsed and confirmed by the Security Council in binding resolution 1031 (1995). The relatively modest powers of the High Representative under Annex 10 were subsequently enlarged in practice by the Peace Implementation Council, a body with fifty-five members established to review progress regarding the peace settlement, in the decisions it took at the Bonn Summit of December 1997 (the Bonn Conclusions).<sup>180</sup> These provided, for example, for measures to be taken against persons found by the High Representative to be in violation of legal commitments made under the Peace Agreement. This has included removal from public office, the competence to impose interim legislation where Bosnia's institutions had failed to do so<sup>181</sup> and 'other measures to ensure implementation of the Peace Agreement throughout Bosnia and Herzegovina and its Entities, as well as the smooth running of the common institutions'.<sup>182</sup> The High Representative has taken a wide-ranging number of decisions, from imposing the Law on Citizenship of Bosnia and Herzegovina in December 1997<sup>183</sup> and imposing the Law on the Flag of Bosnia and Herzegovina in February 1998<sup>184</sup> to enacting the Law on Changes and Amendments to the Election Law in January 2006 to mark the ongoing process of transferring High Representative powers to the domestic authorities in the light of

the improving situation.<sup>185</sup> This unusual structure with regard to an independent state arises, therefore, from a mix of the consent of the parties and binding Chapter VII activity by the Security Council.

In resolution 1244 (1999), the Security Council authorised the Secretary-General to establish an interim international civil presence in Kosovo (UNMIK),<sup>186</sup> following the withdrawal of Yugoslav forces from that part of the country consequent upon NATO action. Under this resolution, UNMIK performed a wide range of administrative functions, including health and education, banking and finance, post and telecommunications, and law and order. It was tasked *inter alia* to promote the establishment of substantial autonomy and self-government in Kosovo, to co-ordinate humanitarian and disaster relief, support the reconstruction of key infrastructure, maintain civil law and order, promote human rights and assure the return of refugees. Administrative structures were established and elections held. The first regulation adopted by the Special Representative of the UN Secretary-General appointed under resolution 1244 vested all legislative and executive authority in Kosovo in UNMIK as exercised by the Special Representative.<sup>187</sup> This regulation also established that the law in the territory was that in existence in so far as this did not conflict with the international standards referred to in section 2 of the regulation, the fulfilment of the mandate given to UNMIK under resolution 1244, or the present or any other regulation issued by UNMIK. A Constitutional Framework for Provisional Self-Government was promulgated by the Special Representative in May 2001.<sup>188</sup> This comprehensive administrative competence was founded upon the reaffirmation of Yugoslavia's sovereignty and territorial integrity (and thus continuing territorial title over the province) and the requirement for 'substantial autonomy and meaningful self-administration for Kosovo'.<sup>189</sup> Accordingly, this arrangement illustrated a complete division between title to the territory and the exercise of power and control over it. It flowed from a binding Security Council resolution, which referred to Yugoslavia's consent to the essential principles therein contained.<sup>190</sup>

The United Nations Transitional Administration in East Timor (UNTAET) was established by Security Council resolution 1272 (1999) acting under Chapter VII. It was 'endowed with overall responsibility for the administration of East Timor' and 'empowered to exercise all legislative and executive authority, including the administration of justice'.<sup>191</sup> Its widespread mandate included, in addition to public administration, humanitarian responsibilities and a military component and it was authorised to take all necessary measures to fulfil its mandate. UNTAET's mandate was extended to 20 May 2002, the date of East Timor's independence as the new state of Timor-Leste.<sup>192</sup> It was thereafter succeeded by the United Nations Mission of Support in East Timor (UNMISET).<sup>193</sup>

## Taiwan<sup>194</sup>

This territory was ceded by China to Japan in 1895 by the treaty of Shimonoseki and remained in the latter's hands until 1945. Japan undertook on surrender not to retain sovereignty over Taiwan and this was reaffirmed under the Peace Treaty, 1951 between the Allied Powers (but not the USSR and China) and Japan, under which all rights to the island were renounced without specifying any recipient. After the Chinese Civil War, the Communist forces took over the mainland while the Nationalist regime installed itself on Taiwan (Formosa) and the Pescadores. Both the US and the UK took the view at that stage that sovereignty over Taiwan was uncertain or undetermined.<sup>195</sup> The key point affecting status has been that both governments have claimed to represent the whole of China. No claim of separate statehood for Taiwan has been made and in such a case it is difficult to maintain that such an unsought status exists. Total lack of recognition of Taiwan as a separate independent state merely reinforces this point. In 1979 the US recognised the People's Republic of China as the sole and legitimate government of China.<sup>196</sup> Accordingly, Taiwan would appear to be a non-state territorial entity which is capable of acting independently on the international scene, but is most probably *de jure* part of China. It is interesting to note that when in early 1990 Taiwan sought accession to the General Agreement on Tariffs and Trade (GATT), it did so by requesting entry for the 'customs territory' of 'Taiwan, Penghu, Kinmen and Matsu', thus avoiding an assertion of statehood.<sup>197</sup> The accession of 'Chinese Taipei' to the World Trade Organization was approved by the Ministerial Conference in November 2001.<sup>198</sup>

## The 'Turkish Republic of Northern Cyprus' (TRNC)<sup>199</sup>

In 1974, following a coup in Cyprus backed by the military regime in Greece, Turkish forces invaded the island. The Security Council in resolution 353 (1974) called upon all states to respect the sovereignty, independence and territorial integrity of Cyprus and demanded an immediate end to foreign military intervention in the island that was contrary to such respect. On 13 February 1975 the Turkish Federated State of Cyprus was proclaimed in the area occupied by Turkish forces. A resolution adopted at the same meeting of the Council of Ministers and the Legislative Assembly of the Autonomous Turkish Cypriot Administration at which the proclamation was made, emphasised the determination 'to oppose resolutely all attempts against the independence of Cyprus and its partition or union with any other state' and resolved to establish a separate administration until such time as the 1960 Cyprus Constitution was amended to provide for a federal republic.<sup>200</sup>

On 15 November 1983, the Turkish Cypriots proclaimed their independence as the

‘Turkish Republic of Northern Cyprus’.<sup>201</sup> This was declared illegal by the Security Council in resolution 541 (1983) and its withdrawal called for. All states were requested not to recognise the ‘purported state’ or assist it in any way. This was reiterated in Security Council resolution 550 (1984). The Committee of Ministers of the Council of Europe decided that it continued to regard the government of the Republic of Cyprus as the sole legitimate government of Cyprus and called for respect for the independence and territorial integrity of Cyprus.<sup>202</sup> The European Court of Human Rights in its judgment of 10 May 2001 in *Cyprus v. Turkey* concluded that, ‘it is evident from international practice...that the international community does not recognise the “TRNC” as a state under international law’ and declared that ‘the Republic of Cyprus has remained the sole legitimate government of Cyprus’.<sup>203</sup> In the light of this and the very heavy dependence of the territory upon Turkey, it cannot be regarded as a sovereign state, but remains as a *de facto* administered entity within the recognised confines of the Republic of Cyprus and dependent upon Turkish assistance.<sup>204</sup>

## **The Saharan Arab Democratic Republic<sup>205</sup>**

In February 1976, the Polisario liberation movement conducting a war to free the Western Saharan territory from Moroccan control declared the independent sovereign Saharan Arab Democratic Republic (SADR).<sup>206</sup> Over the succeeding years, many states recognised the new entity, including a majority of Organization of African Unity members. In February 1982, the OAU Secretary-General sought to seat a delegation from SADR on that basis, but this provoked a boycott by some nineteen states and a major crisis. However, in November 1984 the Assembly of Heads of State and Government of the OAU did agree to seat a delegation from SADR, despite Morocco’s threat of withdrawal from the organisation.<sup>207</sup> This, therefore, can be taken as OAU recognition of statehood and, as such, of evidential significance. However, although in view of the reduced importance of the effectiveness of control criterion in such self-determination situations a credible argument can now be made regarding SADR’s statehood, the issue is still controversial in view of the continuing hostilities and what appears to be effective Moroccan control. It is to be noted that the legal counsel to the UN gave an opinion in 2002 to the effect that Western Sahara continued as a non-self-governing territory and that this status was unaffected by the transfer of administrative authority to Morocco and Mauritania in 1975. The view was also taken that exploration and exploitation activities undertaken in disregard of the interests and wishes of the people of Western Sahara would violate international law.<sup>208</sup>

## **Kosovo**

Following a period of UN administration authorised by Security Council resolution 1244 (1999),<sup>209</sup> the Yugoslav (later Serbian) province of Kosovo declared independence on 17 February 2008. This was preceded by the Comprehensive Proposal for the Kosovo Status Settlement formulated by Martti Ahtisaari which had in March 2007 called for independence for Kosovo with international supervision.<sup>210</sup> This was rejected by Serbia. The international community was divided as to the question of recognition of Kosovo's independence. It was recognised swiftly by the US, the UK, Germany and the majority of EU states, Japan and others. Russia and Serbia, on the other hand, made it clear that they opposed recognition, as did Spain and Greece. Accordingly, in the current circumstances, while many countries recognise Kosovo, many do not and entry into the UN is not possible until, for example, Russia is prepared to lift its opposition in view of its veto power.<sup>211</sup> The International Court of Justice in its advisory opinion on the *Accordance with International Law of the Unilateral Declaration of Independence in Respect of Kosovo*, although faced with wide-ranging arguments as to that entity and the criteria of statehood, confined itself to a narrow interpretation of the issue and found that the declaration of independence was not itself contrary to international law.<sup>212</sup>

At the moment of writing, Kosovo is recognised as a state by 96 states,<sup>213</sup> however this excludes some key members of the international community so that the question as to the status of Kosovo as a sovereign state is still, for the moment, open.

## **Palestine**<sup>214</sup>

The Palestine Liberation Organization (PLO) was permitted by the Security Council from 1972 to participate in its debates with the same rights of participation as conferred upon a member state not a member of the Council, although this was controversial.<sup>215</sup> In 1974, the General Assembly invited the PLO to participate as an observer.<sup>216</sup> In December 1988, the General Assembly decided that the designation 'Palestine' should be used in place of the designation 'Palestine Liberation Organization' in the United Nations system.<sup>217</sup>

The position of the PLO, however, began to evolve considerably with the Israel–PLO Declaration of Principles on Interim Self-Government Arrangements signed in Washington on 13 September 1993.<sup>218</sup> By virtue of this Declaration, the PLO team in the Jordanian–Palestinian delegation to the Middle East Peace Conference was accepted as representing the Palestinian people. It was agreed to establish a Palestinian Interim Self-Government Authority as an elected Council for the Palestinian people in the West Bank and Gaza (occupied by Israel since 1967) for a transitional period of up to five years leading to a permanent solution. Its jurisdiction was to cover the territory of the West Bank and Gaza, save for issues to

be negotiated in the permanent status negotiations. Upon the entry into force of the Declaration, a transfer of authority was to commence from the Israel military government and its civil administration. The Cairo Agreement of 4 May 1994<sup>219</sup> provided for the immediate withdrawal of Israeli forces from Jericho and the Gaza Strip and transfer of authority to a separately established Palestinian Authority. This Authority, distinct from the PLO it should be emphasised, was to have certain specified legislative, executive and judicial powers. The process continued with a transfer of further powers and responsibilities in a Protocol of 27 August 1995 and with the Interim Agreement on the West Bank and Gaza of 28 September 1995, under which an additional range of powers and responsibilities was transferred to the Palestinian Authority pending the election of the Council and arrangements were made for Israeli withdrawal from a number of cities and villages on the West Bank.<sup>220</sup> An accord concerning Hebron followed in 1997<sup>221</sup> and the Wye River agreement in 1998, both marking further Israeli redeployments, while the Sharm el Sheikh memorandum and a later Protocol of 1999 concerned safe-passage arrangements between the Palestinian Authority areas in Gaza and the West Bank.<sup>222</sup> The increase in the territorial and jurisdictional competence of the Palestinian Authority established as a consequence of these arrangements raised the question of legal personality. While Palestinian statehood was clearly not accepted by the international community, the Palestinian Authority could be regarded as possessing some form of limited international personality.<sup>223</sup> Such personality, however, derived from the agreements between Israel and the PLO and existed separately from the personality of the PLO as a national liberation movement, which relied upon the recognition of third parties.<sup>224</sup> Since neither side has to date denounced the Oslo Accords and succeeding instruments, they remain in effect.

However, on 22 January 2009, the Palestinian Authority purported to accept the jurisdiction of the International Criminal Court,<sup>225</sup> such jurisdiction being limited under the Court's Statute to states.<sup>226</sup> After extensive argument, the Prosecutor of the Court made a decision on 3 April 2012 refusing the request on the basis that he did not possess the necessary competence.<sup>227</sup> On 23 September 2011, the Palestinian Authority applied to become a member of the United Nations,<sup>228</sup> but this did not succeed due to deep divisions (and the existence of the veto power) in the Security Council, whose approval is required for membership.<sup>229</sup> In November 2012, the General Assembly voted to accord 'Palestine' the status of non-member observer state status.<sup>230</sup> However, the matter remains controversial due to the divisions within the international community and the continuing application of the Oslo Accords as well as the efforts to seek a peace agreement founded upon the acceptance of two states (Israel and Palestine) within the boundaries of mandated Palestine.

## Various secessionist claimants

A number of secessionist claims from recognised independent states exist. The former territory of British Somaliland, being the northern part of the new state of Somalia after its independence in 1960, asserted its own independence on 17 May 1991.<sup>231</sup> A constitution was adopted in 2001, but the Organisation of African Unity refused to support any action that would affect the unity and sovereignty of Somalia.<sup>232</sup> ‘Somaliland’ is unrecognised by any state or international organisation, although a number of dealings with the authorities of that entity have taken place.<sup>233</sup> Following an armed conflict between Armenia and Azerbaijan in the early 1990s, Armenian forces captured and occupied the area of Nagorno-Karabakh (and seven surrounding districts) from Azerbaijan. Nagorno-Karabakh, an area with a majority ethnic Armenian population, declared its independence from Azerbaijan. However, it has not been recognised by any state (including Armenia) and the UN Security Council adopted resolutions 822, 853, 874 and 884 reaffirming the sovereign and territorial integrity of Azerbaijan and calling for withdrawal from the occupied territories of Azerbaijan.<sup>234</sup> The former USSR republic of Moldova became independent on 23 June 1990 as the USSR dissolved. On 2 September 1990 the ‘Moldavian Republic of Transnistria’ was proclaimed as an independent state in an area of Moldova bordering Ukraine. This entity has been able to maintain itself as a result of Russian assistance. However, it has not been recognised by any state.<sup>235</sup> Similarly, the areas of South Ossetia and Abkhazia in Georgia have sought to establish separate *de facto* governments and independence respectively with Russian support and have similarly not been recognised by any but a very few states.<sup>236</sup>

## Associations of states

There are a number of ways in which states have become formally associated with one another. Such associations do not constitute states but have a certain effect upon international law. Confederations, for example, are probably the closest form of co-operation and they generally involve several countries acting together by virtue of an international agreement, with some kind of central institutions with limited functions.<sup>237</sup> This is to be contrasted with federations. A federal unit is a state with strong centralised organs and usually a fairly widespread bureaucracy with extensive powers over the citizens of the state, even though the powers of the state are divided between the different units.<sup>238</sup> However, a state may comprise component units with extensive powers.<sup>239</sup>

There are in addition certain ‘associated states’ which by virtue of their smallness and lack of development have a close relationship with another state. One instance is the connection between the Cook Islands and New Zealand, where internal self-

government is allied to external dependence.<sup>240</sup> Another example was the group of islands which constituted the Associated States of the West Indies. These were tied to the United Kingdom by the terms of the West Indies Act 1967, which provided for the latter to exercise control with regard to foreign and defence issues. Nevertheless, such states were able to and did attain their independence.<sup>241</sup>

The status of such entities in an association relationship with a state will depend upon the constitutional nature of the arrangement and may in certain circumstances involve international personality distinct from the metropolitan state depending also upon international acceptance. It must, however, be noted that such status is one of the methods accepted by the UN of exercising the right to self-determination.<sup>242</sup> Provided that an acceptable level of powers, including those dealing with domestic affairs, remain with the associated state, and that the latter may without undue difficulty revoke the arrangement, some degree of personality would appear desirable and acceptable.

The Commonwealth of Nations (the former British Commonwealth) is perhaps the most well known of the loose associations which group together sovereign states on the basis usually of common interests and historical ties. Its members are all fully independent states who cooperate through the assistance of the Commonwealth Secretariat and periodic conferences of Heads of Government. Regular meetings of particular ministers also take place. The Commonwealth does not constitute a legally binding relationship, but operates as a useful forum for discussions. Relations between Commonwealth members display certain special characteristics, for example, ambassadors are usually referred to as High Commissioners. It would appear unlikely in the circumstances that it possesses separate international personality.<sup>243</sup> However, the more that the Commonwealth develops distinctive institutions and establishes common policies with the capacity to take binding decisions, the more the argument may be made for international legal personality.

Following the dissolution of the Soviet Union and the coming to independence of the constituent Republics, with the Russian Federation being deemed the continuation of the Soviet Union, it was decided to establish the Commonwealth of Independent States.<sup>244</sup> Originally formed by Russia, Belarus and Ukraine on 8 December 1991, it was enlarged on 21 December 1991 to include eleven former Republics of the USSR. Georgia joined the CIS on 8 October 1993. Thus all the former Soviet Republics, excluding the three Baltic states, are now members of that organisation.<sup>245</sup> The agreement establishing the CIS provided for respect for human rights and other principles and called for co-ordination between the member states. The Charter of the CIS was adopted on 22 June 1993 as a binding international treaty<sup>246</sup> and laid down a series of principles ranging from respect for the sovereignty and territorial integrity of states, self-determination of peoples,

prohibition of the use or threat of force and settlement of disputes by peaceful means. It was noted that the CIS was neither a state nor 'supranational' (article 1) and a number of common co-ordinating institutions were established. In particular, the Council of Heads of State is the 'highest body of the Commonwealth' and it may 'take decisions on the principal issues relating to the activity of the member states in the field of their mutual interests' (article 21), while the Council of the Heads of Government has the function of co-ordinating co-operation among executive organs of member states (article 22). Both Councils may take decisions on the basis of consensus (article 23). A Council of Foreign Ministers was also established together with a Co-ordination and Consultative Committee, as a permanent executive and co-ordinating body of the Commonwealth.<sup>247</sup> The CIS has adopted in addition a Treaty on Economic Union<sup>248</sup> and a Convention on Human Rights and Fundamental Freedoms.<sup>249</sup> The increasing development of the CIS as a directing international institution suggests its possession of international legal personality.

The European Union<sup>250</sup> is an association, of twenty-eight states, which has established a variety of common institutions and which has the competence to adopt not only legal acts binding upon member states but also acts having direct effect within domestic legal systems. The Union consists essentially of the European Community (itself an amalgam of the European Coal and Steel Community, EURATOM and the European Economic Community) and two additional pillars, viz. the Common Foreign and Security Policy, and Justice and Home Affairs. Only the European Coal and Steel Community Treaty provided explicitly for international legal personality (article 6), but the case-law of the European Court of Justice demonstrates its belief that the other two communities also possess such personality.<sup>251</sup> It is also established that Community law has superiority over domestic law. The European Court of Justice early in the history of the Community declared that the Community constituted 'a new legal order of international law'.<sup>252</sup> In the circumstances, it seems hard to deny that the Community possesses international legal personality, but unlikely that the co-operative processes involved in the additional two pillars are so endowed.<sup>253</sup> The European Community has the power to conclude and negotiate agreements in line with its external powers, to become a member of an international organisation and to have delegations in non-member countries. However, the Treaty on European Union contained no provision on the legal personality of the Union. The Union did not have institutionalised treaty-making powers, but was able to conclude agreements through the Council of the European Union or by asserting its position on the international stage, especially in connection with the Common Foreign and Security Policy. However, article 47 of the Consolidated Version of the Treaty on European Union now expressly asserts that the European Union has legal personality.<sup>254</sup>

## Conclusions

Whether or not the entities discussed above constitute international persons or indeed states or merely part of some other international person is a matter for careful consideration in the light of the circumstances of the case, in particular the claims made by the entity in question, the facts on the ground, especially with regard to third-party control and the degree of administrative effectiveness manifested, and the reaction of other international persons. The importance here of recognition, acquiescence and estoppel is self-evident. Acceptance of some international personality need not be objective so as to bind non-consenting states nor unlimited as to time and content factors. These elements will be considered below. It should, however, be noted here that the international community itself also has needs and interests that bear upon this question as to international status. This is particularly so with regard to matters of responsibility and the protection of persons via the rules governing the recourse to and conduct of armed conflicts.<sup>255</sup>

## Special cases

### The Sovereign Order of Malta

This Order, established during the Crusades as a military and medical association, ruled Rhodes from 1309 to 1522 and was given Malta by treaty with Charles V in 1530 as a fief of the Kingdom of Sicily. This sovereignty was lost in 1798, and in 1834 the Order established its headquarters in Rome as a humanitarian organisation.<sup>256</sup> The Order already had international personality at the time of its taking control of Malta and even when it had to leave the island it continued to exchange diplomatic legations with most European countries. The Italian Court of Cassation in 1935 recognised the international personality of the Order, noting that ‘the modern theory of the subjects of international law recognises a number of collective units whose composition is independent of the nationality of their constituent members and whose scope transcends by virtue of their universal character the territorial confines of any single state’.<sup>257</sup> This is predicated upon the functional needs of the entity as accepted by third parties. It is to be noted, for example, that the Order maintains diplomatic relations with or is recognised by over eighty states and has observer status in the UN General Assembly.<sup>258</sup> It is not a state and it is questionable whether it has general international personality beyond those states and organisations expressly recognising it.<sup>259</sup>

### The Holy See and the Vatican City<sup>260</sup>

In 1870, the conquest of the Papal states by Italian forces ended their existence as sovereign states. The question therefore arose as to the status in international law of the Holy See, deprived, as it then was, of normal territorial sovereignty. In 1929 the Lateran Treaty was signed with Italy which recognised the state of the Vatican City and ‘the sovereignty of the Holy See in the field of international relations as an attribute that pertains to the very nature of the Holy See, in conformity with its traditions and with the demands of its mission in the world’.<sup>261</sup> The question thus interrelates with the problem of the status today of the Vatican City. The latter has no permanent population apart from Church functionaries and exists only to support the work of the Holy See. Italy carries out a substantial number of administrative functions with regard to the City. Some writers accordingly have concluded that it cannot be regarded as a state.<sup>262</sup> Nevertheless, it is a party to many international treaties and is a member of the Universal Postal Union and the International Telecommunications Union. It would appear that by virtue of recognition and acquiescence in the context of its claims, it does exist as a state. The Vatican City is closely linked with the Holy See and they are essentially part of the same construct.

The Holy See, the central organisational authority of the Catholic Church, continued after 1870 to engage in diplomatic relations and enter into international agreements and concordats.<sup>263</sup> Accordingly its status as an international person was accepted by such partners. In its joint eleventh and twelfth report submitted to the UN Committee on the Elimination of Racial Discrimination in 1993,<sup>264</sup> the Holy See reminded the Committee of its ‘exceptional nature within the community of nations; as a sovereign subject of international law, it has a mission of an essentially religious and moral order, universal in scope, which is based on minimal territorial dimensions guaranteeing a basis of autonomy for the pastoral ministry of the Sovereign Pontiff’.<sup>265</sup> Crawford has concluded that the Holy See is both an international legal person in its own right and the government of a state (the Vatican City).<sup>266</sup>

## **Insurgents and belligerents**

International law has recognised that such entities may in certain circumstances, primarily dependent upon the *de facto* administration of specific territory, enter into valid arrangements.<sup>267</sup> In addition they will be bound by the rules of international law with respect to the conduct of hostilities and may in due course be recognised as governments. The traditional law is in process of modification as a result of the right to self-determination, and other legal principles such as territorial integrity, sovereign equality and non-intervention in addition to recognition will need to be taken into account.<sup>268</sup>

## National liberation movements (NLMs)

The question of whether or not NLMs constitute subjects of international law and, if so, to what extent, is bound up with the development of the law relating to non-self-governing territories and the principle of self-determination. What is noticeable is not only the increasing status of NLMs during the decolonisation period, but also the fact that in many cases the international community turned to bodies other than the NLMs in controversial situations.

The UN trusteeship system permitted the hearing of individual petitioners and this was extended to all colonial territories. In 1977, the General Assembly Fourth Committee voted to permit representatives of certain NLMs from Portugal's African territories to participate in its work dealing with such territories.<sup>269</sup> The General Assembly endorsed the concept of observer status for liberation movements recognised by the Organization of African Unity in resolution 2918 (XVII). In resolution 3247 (XXIX), the Assembly accepted that NLMs recognised by the OAU or the Arab League could participate in Assembly sessions, in conferences arranged under the auspices of the Assembly and in meetings of the UN specialised agencies and the various Assembly organs.<sup>270</sup>

The inclusion of the regional recognition requirement was intended both to require a minimum level of effectiveness with regard to the organisation concerned before UN acceptance and to exclude in practice secessionist movements. The Economic and Social Committee of the UN has also adopted a similar approach and under its procedural rules it may invite any NLM recognised by or in accordance with General Assembly resolutions to take part in relevant debates without a vote.<sup>271</sup>

The UN Security Council also permitted the Palestine Liberation Organization (PLO) to participate in its debates with the same rights of participation as conferred upon a member state not a member of the Security Council, although this did raise serious constitutional questions.<sup>272</sup> Thus the possibility of observer status in the UN and related organs for NLMs appears to have been affirmatively settled in international practice. The question of international personality, however, is more complex and more significant, and recourse must be made to state practice.<sup>273</sup> Whether extensive state recognition of a liberation movement is of itself sufficient to confer such status is still a controversial issue.

As far as Namibia was concerned, the territory was regarded as having an international status<sup>274</sup> and there existed an NLM recognised as the authentic representative of the people<sup>275</sup> but it was, theoretically, administered by the UN Council for Namibia. This body was established in 1967 by the General Assembly in order to administer the territory and to prepare it for independence; it was disbanded

in 1990. There were thirty-one UN member states on the Council, which was responsible to the General Assembly.<sup>276</sup> The Council sought to represent Namibian interests in international organisations and in conferences, and issued travel and identity documents to Namibians which were recognised by most states.<sup>277</sup> In 1974, the Council issued Decree No. 1 which sought to forbid the exploitation under South African auspices of the territory's resources, but little was in practice achieved by this Decree, which was not drafted in the clearest possible manner.<sup>278</sup> The status of the Council was unclear, but it was clearly recognised as having a role within the UN context and may thus have possessed some form of qualified personality. It was, of course, distinct from SWAPO, the recognised NLM.

## **International public companies**

This type of entity, which may be known by a variety of names, for example multinational public enterprises or international bodies corporate, is characterised in general by an international agreement providing for co-operation between governmental and private enterprises.<sup>279</sup> One writer, for example, defined such entities as corporations which

have not been constituted by the exclusive application of one national law; whose members and directors represent several national sovereignties; whose legal personality is not based, or at any rate not entirely, on the decision of a national authority or the application of a national law; whose operations, finally, are governed, at least partially, by rules that do not stem from a single or even from several national laws.<sup>280</sup>

Such enterprises may vary widely in constitutional nature and in competences. Examples of such companies would include INTELSAT, established in 1973 as an intergovernmental structure for a global commercial telecommunications satellite system; Eurofima, established in 1955 by fourteen European states in order to lease equipment to the railway administrations of those states, and the Bank of International Settlement, created in 1930 by virtue of a treaty between five states, and the host country, Switzerland. The personality question will depend upon the differences between municipal and international personality. If the entity is given a range of powers and is distanced sufficiently from municipal law, an international person may be involved, but it will require careful consideration of the circumstances.

## **Transnational corporations**

Another possible candidate for international personality is the transnational or multinational enterprise. Various definitions exist of this important phenomenon in international relations.<sup>281</sup> They in essence constitute private business organisations comprising several legal entities linked together by parent corporations and are distinguished by size and multinational spread. In the years following the *Barcelona Traction* case,<sup>282</sup> an increasing amount of practice has been evident on the international plane dealing with such corporations. What has been sought is a set of guidelines governing the major elements of the international conduct of these entities.<sup>283</sup> Progress has been slow and several crucial issues remain to be resolved, including the legal effect, if any, of such guidelines.<sup>284</sup> The question of the international personality of transnational corporations remains an open one.<sup>285</sup> However, on 6 July 2011, the UN Human Rights Council adopted the Guiding Principles on ‘Business and Human Rights: Implementing the United Nations “Protect, Respect and Remedy” Framework’.<sup>286</sup> These Principles do not create international legal obligations as such. They emphasise the duty of states to respect, protect and fulfil the human rights of individuals and in particular to protect against human rights abuse within their territory and/or jurisdiction by third parties, including business enterprises. States must ensure that those affected by abuses taking place within their territory and/or jurisdiction must have access to an effective remedy. The Principles declare that business enterprises should respect human rights, avoid infringing on the rights of others and should address adverse human rights impacts with which they are involved. The reference to human rights here refers to internationally recognised human rights. It is provided that the responsibility to respect human rights is a global standard of expected conduct for business enterprises. The realm is that of “soft law”, of expectations, of anticipation, not of binding international (as opposed to national) legal regulation. This responsibility to respect human rights requires that business enterprises avoid causing or contributing to adverse human rights impacts through their own activities and to seek to prevent or mitigate adverse human rights impacts that are *directly linked* to their operations, products or services by their business relationships.<sup>287</sup>

## **The right of all peoples to self-determination<sup>288</sup>**

### **The establishment of the legal right**

This principle, which traces its origin to the concepts of nationality and democracy as evolved primarily in Europe, first appeared in major form after the First World War. Despite President Wilson’s efforts, it was not included in the League of Nations Covenant and it was clearly not regarded as a legal principle.<sup>289</sup> However,

its influence can be detected in the various provisions for minority protection<sup>290</sup> and in the establishment of the mandates system based as it was upon the sacred trust concept. In the ten years before the Second World War, there was relatively little practice regarding self-determination in international law. A number of treaties concluded by the USSR in this period noted the principle,<sup>291</sup> but in the *Aaland Islands* case it was clearly accepted by both the International Commission of Jurists and the Committee of Rapporteurs dealing with the situation that the principle of self-determination was not a legal rule of international law, but purely a political concept.<sup>292</sup> The situation, which concerned the Swedish inhabitants of an island alleged to be part of Finland, was resolved by the League's recognition of Finnish sovereignty coupled with minority guarantees.

The Second World War stimulated further consideration of the idea and the principle was included in the UN Charter. Article 1(2) noted as one of the organisation's purposes the development of friendly relations among nations based upon respect for the principle of equal rights and self-determination, and article 55 reiterated the phraseology. It is disputed whether the reference to the principle in these very general terms was sufficient to entail its recognition as a binding right, but the majority view is against this. Not every statement of a political aim in the Charter can be regarded as automatically creative of legal obligations. On the other hand, its inclusion in the Charter, particularly within the context of the statement of purposes of the UN, provided the opportunity for the subsequent interpretation of the principle both in terms of its legal effect and consequences and with regard to its definition. It is also to be noted that Chapters XI and XII of the Charter deal with non-self-governing and trust territories and may be seen as relevant within the context of the development and definition of the right to self-determination, although the term is not expressly used.<sup>293</sup>

Practice since 1945 within the UN, both generally as regards the elucidation and standing of the principle and more particularly as regards its perceived application in specific instances, can be seen as having ultimately established the legal standing of the right in international law. This may be achieved either by treaty or by custom or indeed, more controversially, by virtue of constituting a general principle of law. All these routes are relevant, as will be seen. The UN Charter is a multilateral treaty which can be interpreted by subsequent practice, while the range of state and organisation practice evident within the UN system can lead to the formation of customary law. The amount of material dealing with self-determination in the UN testifies to the importance of the concept and some of the more significant of this material will be briefly noted.

Resolution 1514 (XV), the Declaration on the Granting of Independence to Colonial Countries and Peoples, adopted in 1960 by eighty-nine votes to none, with

nine abstentions, stressed that:

all peoples have the right to self-determination; by virtue of that right they freely determine their political status and freely pursue their economic, social and cultural development.

Inadequacy of political, social, economic or educational preparedness was not to serve as a protest for delaying independence, while attempts aimed at the partial or total disruption of the national unity and territorial integrity of a country were deemed incompatible with the UN Charter. The Colonial Declaration set the terms for the self-determination debate in its emphasis upon the colonial context and its opposition to secession, and has been regarded by some as constituting a binding interpretation of the Charter.<sup>294</sup> The Declaration was reinforced by the establishment of a Special Committee on Decolonisation, which now deals with all dependent territories and has proved extremely active, and by the fact that virtually all UN resolutions dealing with self-determination expressly refer to it. Indeed, the International Court has specifically referred to the Colonial Declaration as an 'important stage' in the development of international law regarding non-self-governing territories and as the 'basis for the process of decolonisation'.<sup>295</sup>

In 1966, the General Assembly adopted the International Covenants on Human Rights. Both these Covenants have an identical first article, declaring *inter alia* that '[a]ll peoples have the right to self-determination. By virtue of that right they freely determine their political status', while states parties to the instruments 'shall promote the realisation of the right of self-determination and shall respect that right in conformity with the provisions of the Charter of the United Nations'. The Covenants came into force in 1976 and thus constitute binding provisions as between the parties, but in addition they also may be regarded as authoritative interpretations of several human rights provisions in the Charter, including self-determination. The 1970 Declaration on Principles of International Law Concerning Friendly Relations can be regarded as constituting an authoritative interpretation of the seven Charter provisions it expounds. The Declaration states *inter alia* that 'by virtue of the principle of equal rights and self-determination of peoples enshrined in the Charter of the United Nations, all people have the right freely to determine...their political status' while all states are under the duty to respect this right in accordance with the Charter. The Declaration was specifically intended to act as an elucidation of certain important Charter provisions and was indeed adopted without opposition by the General Assembly.<sup>296</sup>

In addition to this general, abstract approach, the UN organs have dealt with self-determination in a series of specific resolutions with regard to particular situations

and this practice may be adduced as reinforcing the conclusions that the principle has become a right in international law by virtue of a process of Charter interpretation. Numerous resolutions have been adopted in the General Assembly and also the Security Council.<sup>297</sup> It is also possible that a rule of customary law has been created since practice in the UN system is still state practice, but the identification of the *opinio juris* element is not easy and will depend upon careful assessment and judgment.

Judicial discussion of the principle of self-determination has been relatively rare and centres on the *Namibia*<sup>298</sup> and *Western Sahara*<sup>299</sup> advisory opinions by the International Court. In the former case, the Court emphasised that ‘the subsequent development of international law in regard to non-self-governing territories as enshrined in the Charter of the United Nations made the principle of self-determination applicable to all of them’.<sup>300</sup> The *Western Sahara* case reaffirmed this point.<sup>301</sup> This case arose out of the decolonisation of that territory, controlled by Spain as the colonial power but subject to irredentist claims by Morocco and Mauritania. The Court was asked for an opinion with regard to the legal ties between the territory at that time and Morocco and the Mauritanian entity. The Court stressed that the request for an opinion arose out of the consideration by the General Assembly of the decolonisation of Western Sahara and that the right of the people of the territory to self-determination constituted a basic assumption of the questions put to the Court.<sup>302</sup> After analysing the Charter provisions and Assembly resolutions noted above, the Court concluded that the ties which had existed between the claimants and the territory during the relevant period of the 1880s were not such as to affect the application of resolution 1514 (XV), the Colonial Declaration, in the decolonisation of the territory and in particular the right to self-determination. In other words, it is clear that the Court regarded the principle of self-determination as a legal one in the context of such territories.

The Court moved one step further in the *East Timor (Portugal v. Australia)* case<sup>303</sup> when it declared that ‘Portugal’s assertion that the right of peoples to self-determination, as it evolved from the Charter and from United Nations practice, has an *erga omnes* character, is irreproachable.’ The Court emphasised that the right of peoples to self-determination was ‘one of the essential principles of contemporary international law’.<sup>304</sup> However, in that case, the Court, while noting that for both Portugal and Australia, East Timor (under Indonesian military occupation since the invasion of 1975) constituted a non-self-governing territory and pointing out that the people of East Timor had the right to self-determination, held that the absence of Indonesia from the litigation meant that the Court was unable to exercise its jurisdiction.<sup>305</sup> These propositions were all reaffirmed by the International Court in the *Construction of a Wall* advisory opinion<sup>306</sup> and in the *Kosovo* advisory

opinion.<sup>307</sup>

The issue of self-determination came before the Supreme Court of Canada in *Reference Re Secession of Quebec* in 1998 in the form of three questions posed. The second question asked whether there existed in international law a right to self-determination which would give Quebec the right unilaterally to secede.<sup>308</sup> The Court declared that the principle of self-determination ‘has acquired a status beyond “convention” and is considered a general principle of international law’.<sup>309</sup>

## The definition of self-determination

If the principle exists as a legal one, and it is believed that such is the case, the question arises then of its scope and application. As noted above, UN formulations of the principle from the 1960 Colonial Declaration to the 1970 Declaration on Principles of International Law and the 1966 International Covenants on Human Rights stress that it is the right of ‘all peoples’. If this is so, then all peoples would become thereby to some extent subjects of international law as the direct repositories of international rights, and if the definition of ‘people’ used was the normal political–sociological one,<sup>310</sup> a major rearrangement of international law perceptions would have been created. In fact, that has not occurred and an international law concept of what constitutes a people for these purposes has been evolved, so that the ‘self’ in question must be determined within the accepted colonial territorial framework. Attempts to broaden this have not been successful and the UN has always strenuously opposed any attempt at the partial or total disruption of the national unity and territorial integrity of a country.<sup>311</sup> The UN has based its policy on the proposition that ‘the territory of a colony or other non-self-governing territory has under the Charter a status separate and distinct from the territory of the state administering it’ and that such status was to exist until the people of that territory had exercised the right to self-determination.<sup>312</sup> Self-determination has also been used in conjunction with the principle of territorial integrity so as to protect the territorial framework of the colonial period in the decolonisation process and to prevent a rule permitting secession from independent states from arising.<sup>313</sup> The Canadian Supreme Court noted in the Quebec case that ‘international law expects that the right to self-determination will be exercised by peoples within the framework of existing sovereign states and consistently with the maintenance of the territorial integrity of those states’.<sup>314</sup> It clearly applies within the context, however, of decolonisation of the European empires and thus provides the peoples of such territories with a degree of international personality. Self-determination as a concept is capable of developing further so as to include the right to secession from existing states,<sup>315</sup> but that has not as yet convincingly happened. There is an argument, however, that seeks to build upon a savings clause in the 1970

Declaration on Principles of International Law Concerning Friendly Relations in order to justify an exception to the principle of territorial integrity and self-determination in this context. The clause in question states that nothing in the section on self-determination shall be construed as authorising or encouraging the dismembering or impairing of the territorial integrity of states conducting themselves in compliance with the principle of self-determination 'and thus possessed of a government representing the whole people belonging to the territory without distinction as to race, creed or colour'.<sup>316</sup> However, whether this apparent affirmation of the principle of territorial integrity and internal self-determination, can be seen *a contrario* as offering legitimacy to secession from an independent state in exceptional circumstances is highly controversial and indeed very doubtful.

The Canadian Supreme Court in the *Quebec* case emphasised that a right to *external* self-determination (i.e. a claim to a right to unilateral secession) 'arises in only the most extreme of cases and, even then, under carefully defined circumstances'.<sup>317</sup> The issue was raised in the *Kosovo* case. The Court in its advisory opinion noted that:

Whether, outside the context of non-self-governing territories and peoples subject to alien subjugation, domination and exploitation, the international law of self-determination confers upon part of the population of an existing State a right to separate from that State is, however, a subject on which radically different views were expressed by those taking part in the proceedings and expressing a position on the question. Similar differences existed regarding whether international law provides for a right of 'remedial secession' and, if so, in what circumstances.<sup>318</sup>

The Court did not take the matter further as it felt that it was not necessary to decide on such matters for the purposes of the case.<sup>319</sup> Nevertheless, it would be extraordinary for such a foundational principle as territorial integrity to be subject to a critical exception by way of an *a contrario* argument and not by way of positive affirmation. Furthermore, there is no international practice demonstrating the unequivocal acceptance of the so-called right of remedial secession, whether in general terms or with regard to specific situations.

To summarise: the principle of self-determination provides that the people of the colonially defined territorial unit in question may freely determine their own political status. Such determination may result in independence, integration with a neighbouring state, free association with an independent state or any other political status freely decided upon by the people concerned.<sup>320</sup> Self-determination also has a role within the context of creation of statehood, preserving the sovereignty and

independence of states, in providing criteria for the resolution of disputes, and in the area of the permanent sovereignty of states over natural resources.<sup>321</sup>

## Individuals<sup>322</sup>

The question of the status in international law of individuals is closely bound up with the rise in the international protection of human rights and, increasingly, with regard to investment protection. This section will be confined to some general comments about the former. The object theory in this regard maintains that individuals constitute only the subject-matter of intended legal regulation as such. Only states, and possibly international organisations, are subjects of the law.<sup>323</sup> This has been a theory of limited value. The essence of international law has always been its ultimate concern for the human being and this was clearly manifest in the Natural Law origins of classical international law.<sup>324</sup> The growth of positivist theories, particularly in the nineteenth century, obscured this and emphasised the centrality and even exclusivity of the state in this regard. Nevertheless, modern practice does demonstrate that individuals have become increasingly recognised as participants and subjects of international law. This has occurred primarily but not exclusively through human rights law.

The link between the state and the individual for international law purposes has historically been the concept of nationality. This was and remains crucial, particularly in the spheres of jurisdiction and the international protection of the individual by the state. It is often noted that the claim of an individual against a foreign state, for example, becomes subsumed under that of his national state.<sup>325</sup> Each state has the capacity to determine who are to be its nationals and this is to be recognised by other states in so far as it is consistent with international law, although in order for other states to accept this nationality there has to be a genuine connection between the state and the individual in question.<sup>326</sup>

Individuals as a general rule lack standing to assert violations of international treaties in the absence of a protest by the state of nationality,<sup>327</sup> although states may agree to confer particular rights on individuals which will be enforceable under international law, independently of municipal law. Under article 304(b) of the Treaty of Versailles, 1919, for example, nationals of the Allied and Associated Powers could bring cases against Germany before the Mixed Arbitral Tribunal in their own names for compensation, while the Treaty of 1907 between five Central American states establishing the Central American Court of Justice provided for individuals to bring cases directly before the Court.<sup>328</sup>

This proposition was reiterated in the *Danzig Railway Officials* case<sup>329</sup> by the

Permanent Court of International Justice, which emphasised that under international law treaties did not as such create direct rights and obligations for private individuals, although particular treaties could provide for the adoption of individual rights and obligations enforceable by the national courts where this was the intention of the contracting parties. Under the provisions concerned with minority protection in the 1919 Peace Treaties, it was possible for individuals to apply directly to an international court in particular instances. Similarly the Tribunal created under the Upper Silesia Convention of 1922 decided that it was competent to hear cases by the nationals of a state against that state.<sup>330</sup>

Since then a wide range of other treaties have provided for individuals to have rights directly and have enabled individuals to have direct access to international courts and tribunals. One may mention as examples the European Convention on Human Rights, 1950; the European Communities treaties, 1957; the Inter-American Convention on Human Rights, 1969; the Optional Protocol to the International Covenant on Civil and Political Rights, 1966; the International Convention for the Elimination of All Forms of Racial Discrimination, 1965 and the Convention on the Settlement of Investment Disputes, 1965.

However, the question of the legal personality of individuals under international law extends to questions of direct criminal responsibility also. It is now established that international law proscribes certain heinous conduct in a manner that imports direct individual criminal responsibility. This is dealt with in chapter 8.

## **International organisations**

International organisations have played a crucial role in the sphere of international personality. Since the nineteenth century a growing number of such organisations have appeared and thus raised the issue of international legal personality. In principle it is now well established that international organisations may indeed possess objective international legal personality.<sup>331</sup> Whether that will be so in any particular instance will depend upon the particular circumstances of that case. Whether an organisation possesses personality in international law will hinge upon its constitutional status, its actual powers and practice. Significant factors in this context will include the capacity to enter into relations with states and other organisations and conclude treaties with them, and the status it has been given under municipal law. Such elements are known in international law as the *indicia* of personality. International organisations will be dealt with in chapter 23.

## **The acquisition, nature and consequences of legal**

## personality – some conclusions

The above survey of existing and possible subjects of international law demonstrates both the range of interaction upon the international scene by entities of all types and the pressures upon international law to come to terms with the contemporary structure of international relations. The International Court clearly recognised the multiplicity of models of personality in stressing that ‘the subjects of law in any legal system are not necessarily identical in their nature or in the extent of their rights’.<sup>332</sup> There are, however, two basic categories – objective and qualified personality. In the former case, the entity is subject to a wide range of international rights and duties and it will be entitled to be accepted as an international person by any other international person with which it is conducting relations. In other words, it will operate *erga omnes*. The creation of objective international personality will of necessity be harder to achieve and will require the action in essence of the international community as a whole or a substantial element of it. The Court noted in the *Reparation* case that:

fifty states, representing the vast majority of the members of the international community, have the power, in conformity with international law, to bring into being an entity possessing objective international personality and not merely personality recognised by them alone, together with capacity to bring international claims.<sup>333</sup>

The attainment of qualified personality, on the other hand, binding only the consenting subject, may arise more easily and it is clear that in this respect at least theory ought to recognise existing practice. Any legal person may accept that another entity possesses personality in relation to itself and that determination will operate only *in personam*.

States are the original and major subjects of international law. Their personality derives from the very nature and structure of the international system. Statehood will arise as a result of the factual satisfaction of the stipulated legal criteria. The constitutive theory of recognition is not really acceptable, although recognition, of course, contributes valuable evidence of adherence to the required criteria. All states, by virtue of the principle of sovereign equality, will enjoy the same degree of international legal personality. It has been argued that some international organisations, rather than being derivative subjects of international law, will as sovereign or self-governing legal communities possess an inherent personality directly from the system and will thus constitute general and even objective subjects of international law. Non-sovereign persons, including non-governmental organisations and individuals, would be derived subjects possessing only such

international powers as conferred exceptionally upon them by the necessary subjects of international law.<sup>334</sup> This view may be questioned, but it is true that the importance of practice via the larger international organisations cannot be underestimated.

Similarly the role of the Holy See (particularly prior to 1929) as well as the UN experience demonstrates that the derivative denomination is unsatisfactory. The significance of this relates to their ability to extend their international rights and duties on the basis of both constituent instruments and subsequent practice and to their capacity to affect the creation of further international persons and to play a role in the norm-creating process.

Recognition, acquiescence and estoppel are important principles in the context of international personality, not only with regard to states and international organisations but throughout the range of subjects. They will affect not only the creation of new subjects but also the definition of their nature and rights and duties.

Personality may be acquired by a combination of treaty provisions and recognition or acquiescence by other international persons. For instance, the International Committee of the Red Cross, a private nongovernmental organisation subject to Swiss law, was granted special functions under the 1949 Geneva Red Cross Conventions and has been accepted as being able to enter into international agreements under international law with international persons, such as with the EEC under the World Food Programme.<sup>335</sup> Another possible method of acquiring international personality is by subjecting an agreement between a recognised international person and a private party directly to the rules of international law. This would have the effect of rendering the latter an international person in the context of the arrangement in question so as to enable it to invoke in the field of international law the rights it derives from that arrangement.<sup>336</sup> While this currently may not be entirely acceptable to Third World states, this is probably because of a perception of the relevant rules of international law which may very well alter.<sup>337</sup> Personality may also be acquired by virtue of being directly subjected to international duties. This would apply to individuals in specific cases such as war crimes, piracy and genocide, and might in the future constitute the method by which transnational corporations may be accepted as international persons.

Community needs with regard to the necessity to preserve international stability and life may well be of relevance in certain exceptional circumstances. In the case of non-state territorial entities that are not totally dominated by a state, there would appear to be a community need to ensure that at least the rules relating to the resort to force and the laws of war operate. Not to accept some form of qualified personality in this area might be to free such entities from having to comply with

such rules and that clearly would affect community requirements.<sup>338</sup> The determining point here, it is suggested, must be the degree of effective control maintained by the entity in its territorial confines. However, even so, recognition may overcome this hurdle, as the recognition of Byelorussia and the Ukraine as non-sovereign state entities prior to the demise of the Soviet Union and the emergence of these entities as the independent states of Belarus and Ukraine demonstrated.<sup>339</sup>

All these entities may be easily contained within the category of qualified personality, possessing a limited range of rights and duties valid as against those accepting their personality. There are no preset rules governing the extent of rights and duties of international persons. This will depend upon the type of entity concerned, its claims and expectations, functions and attitude adopted by the international community. The exception here would be states which enter upon life with an equal range of rights and obligations. Those entities with objective personality will, it is suggested, benefit from a more elastic perception of the extent of their rights and duties in the form of a wider interpretation of implied powers through practice. However, in the case of qualified subjects implied powers will be more difficult to demonstrate and accept and the range of their rights and duties will be much more limited. The presumption, thus, will operate the other way.

The precise catalogue of rights and duties is accordingly impossible to list in advance; it will vary from case to case. The capacity to function on the international scene in legal proceedings of some description will not be too uncommon, while the power to make treaties will be less widespread. As to this the International Law Commission noted that 'agreements concluded between entities other than states or than international organisations seem too heterogeneous a group to constitute a general category, and the relevant body of international practice is as yet too exiguous for the characteristics of such a general category to be inferred from it'.<sup>340</sup> The extent to which subjects may be internationally responsible is also unclear, although in general such an entity will possess responsibility to the extent of its rights and duties; but many problem areas remain. Similarly controversial is the norm-creating role of such diverse entities, but the practice of all international persons is certainly relevant material upon which to draw in an elucidation of the rules and principles of international law, particularly in the context of the entity in question.

International personality thus centres, not so much upon the capacity of the entity as such to possess international rights and duties, as upon the actual attribution of rights and/or duties on the international plane as determined by a variety of factors ranging from claims made to prescribed functions. Procedural capacity with regard to enforcement is important but not essential,<sup>341</sup> but in the case of non-individual entities the claimant will have to be in 'such a position that it possesses, in regard to

its members, rights which it is entitled to ask them to respect'.<sup>342</sup> This, noted the International Court, expressed 'the essential test where a group, whether composed of states, of tribes or of individuals, is claimed to be a legal entity distinct from its members'.<sup>343</sup>

A wide variety of non-subjects exist and contribute to the evolution of the international system. Participation and personality are two concepts, but the general role played in the development of international relations and international law by individuals and entities of various kinds that are not international legal subjects as such needs to be appreciated.

<sup>118</sup> 44 ILM, 2005, p. 964.

<sup>119</sup> *Medellin v. Dretke*, Application No. AP-75, 207 (Tex. Crim. App. 15 November 2006). Note that the US Supreme Court held that a writ of certiorari to consider the effect of the International Court's decision had been 'improvidently granted' prior to the Texas appeal: see 44 ILM, 2005, p. 965. However, the Supreme Court did grant certiorari on 30 April 2007 (after the Texas decision) to consider two questions: '1. Did the President of the United States act within his constitutional and statutory foreign affairs authority when he determined that the states must comply with the United States' treaty obligation to give effect to the Avena judgment in the cases of the 51 Mexican nationals named in the judgment? [and] 2. Are state courts bound by the Constitution to honor the undisputed international obligation of the United States, under treaties duly ratified by the President with the advice and consent of the Senate, to give effect to the Avena judgment in the cases that the judgment addressed?' See now *Medellin v. Texas*, 128 S.Ct. 1346 and above, p. 118.

<sup>120</sup> See e.g. L. R. Zines, *The High Court and the Constitution*, Sydney, 1981, and A. Byrnes and H. Charlesworth, 'Federalism and the International Legal Order: Recent Developments in Australia', 79 AJIL, 1985, p. 622.

Shaw, “Territorial Administration by Non-Territorial Sovereigns” in *The Allocation of Authority in International Law* (eds. T. Broude and Y. Shany), Oxford, 2008, p. 369, and Rousseau, *Droit International Public*, vol. II, pp. 413–48.

<sup>173</sup> See further above, p. 162.

<sup>174</sup> See above, p. 163.

<sup>175</sup> Resolution 18(II). See e.g. E. Lauterpacht, *Jerusalem and the Holy Places*, London, 1968, and Ydit, *Internationalised Territories*, pp. 273–314.

<sup>176</sup> See Security Council resolution 16 (1947). Like the Jerusalem idea, this never

came into being. See also the experiences of the League of Nations with regard to the Saar and Danzig, Ydit, *Internationalised Territories*, chapter 3.

<sup>177</sup> See Article 6 and Annex I of the Paris Peace Settlement. See also C. Stahn, 'International Territorial Administration in the Former Yugoslavia: Origins, Developments and Challenges Ahead', *ZaöRV*, 2001, p. 107. UNTAC lasted from March 1992 to September 1993 and involved some 22,000 military and civilian personnel: see [www.un.org/Depts/dpko/dpko/co\\_mission/untac.htm](http://www.un.org/Depts/dpko/dpko/co_mission/untac.htm). Note also e.g. the operations of the UN Transition Group in Namibia which, in the process leading to Namibian independence, exercised a degree of administrative power: see Report of the UN Secretary-General, A/45/1 (1991), and the UN Transitional Administration for Eastern Slavonia (UNTAES), which facilitated the transfer of the territory from Serb to Croat rule over a two-year period: see Security Council resolution 1037 (1996).

<sup>178</sup> Initialled at Dayton, Ohio, and signed in Paris, 1995.

<sup>179</sup> The final authority with regard to the military implementation of the agreement remains the commander of SFOR: see article 12 of the Agreement on the Military Aspects of the Dayton Peace Agreement. Note also the establishment of the Human Rights Chamber, the majority of whose members are from other states: see below, chapter 7, p. 306, and the Commission for Displaced Persons and Refugees: see Annexes 6 and 7 of the Peace Agreement.

<sup>180</sup> See e.g. the documentation available at [www.ohr.int](http://www.ohr.int). See also Security Council resolutions 1144 (1997), 1256 (1999) and 1423 (2002).

<sup>181</sup> [www.ohr.int/pic/default.asp?content\\_id=5182](http://www.ohr.int/pic/default.asp?content_id=5182). The competence of the High Representative to adopt binding decisions with regard to interim measures when the parties are unable to reach agreement remains in force until the Presidency or Council of Ministers has adopted a decision consistent with the Peace Agreement on the issue concerned.

<sup>182</sup> Paragraph XI of the Bonn Conclusions. See also Security Council resolutions 1247 (1999), 1395 (2000), 1357 (2001), 1396 (2002) and 1491 (2003).

## 6 The international protection of human rights

---

### the nature of human rights<sup>1</sup>

The preamble to the Universal Declaration of Human Rights adopted on 10 December 1948 emphasises that ‘recognition of the inherent dignity and of the equal and inalienable rights of all members of the human family is the foundation of freedom, justice and peace in the world’. While there is widespread acceptance of the importance of human rights in the international structure, there is considerable confusion as to their precise nature and role in international law.<sup>2</sup> The question of what is meant by a ‘right’ is itself controversial and the subject of intense jurisprudential debate.<sup>3</sup> Some ‘rights’, for example, are intended as immediately enforceable binding commitments, others merely as specifying a possible future pattern of behaviour.<sup>4</sup> The problem of enforcement and sanctions with regard to human rights in international law is another issue which can affect the characterisation of the phenomenon. There are writers who regard the high incidence of non-compliance with human rights norms as evidence of state practice that argues against the existence of a structure of human rights principles in international law.<sup>5</sup> Although sight must not be lost of violations of human rights laws, such an approach is not only academically incorrect but also profoundly negative.<sup>6</sup> The concept of human rights is closely allied with ethics and morality. Those rights that reflect the values of a community will be those with the most chance of successful implementation. Positive rights may be taken to include those rights enshrined within a legal system, whether or not reflective of moral considerations, whereas a moral right is not necessarily enforceable by law. One may easily discover positive rights. Deducing or inferring moral rights is another matter entirely and will depend upon the perception of the person seeking the existence of a particular right.<sup>7</sup>

Rights may be seen as emanating from various sources, whether religion or the nature of man or the nature of society. The Natural Law view, as expressed in the traditional formulations of that approach or by virtue of the natural rights movement, is that certain rights exist as a result of a higher law than positive or man-made law. Such a higher law constitutes a universal and absolute set of principles governing all human beings in time and space. The natural rights approach of the seventeenth century, associated primarily with John Locke, founded the existence of such inalienable rights as the rights to life, liberty and property upon a social contract marking the end of the difficult conditions of the state of nature. This theory enabled recourse to be had to a superior type of law and thus was able to provide a powerful method of restraining arbitrary power.<sup>8</sup> Although this approach

fell out of favour in the nineteenth century due to the problems of its non-empirical and diffuse methodology, it proved of immense value in the last century in the establishment of human rights within the international community as universal principles. Positivism as a theory emphasised the authority of the state and as such left little place for rights in the legal system other than specific rights emanating from the constitutional structure of that system,<sup>9</sup> while the Marxist doctrine, although based upon the existence of certain immutable historical laws governing the development of society, nevertheless denied the existence of rights outside the framework of the legal order.<sup>10</sup> Modern rights theories cover a wide range of approaches, and this clearly emphasises the need to come to terms with the requirements of an evolving legal system that cannot be totally comprehended in terms of that system itself.<sup>11</sup>

Of particular interest is the work of the policy-oriented movement that seeks to identify, characterise and order a wide variety of relevant factors in the process of human rights creation and equipment. Eight interdependent values are noted (viz. demands relating to respect, power, enlightenment, well-being, health, skill, affection and rectitude) and various environmental influences stressed. Human dignity is seen as the key concept in relation to these values and to the ultimate goal of a world community in which a democratic distribution of values is sought.<sup>12</sup>

All these theories emphasise the complexity of the nature of the concept of human rights in the context of general legal and political processes, but also the importance and centrality of such notions. The broad issues are similarly raised within the framework of international law.

## **Ideological approaches to human rights in international law**

The view adopted by the Western world with regard to international human rights law in general terms has tended to emphasise the basic civil and political rights of individuals, that is to say those rights that take the form of claims limiting the power of government over the governed. Such rights would include due process, freedom of expression, assembly and religion, and political participation in the process of government. The consent of the governed is seen as crucial in this process.<sup>13</sup> The approach of the Soviet Union was to note the importance of basic rights and freedoms for international peace and security, but to emphasise the role of the state. Indeed, the source of human rights principles was seen as the state. Tunkin wrote that the content of the principle of respect for human rights in international law focused upon the duties of the state and not upon the individual, who was not the

subject of international law and to whom rights were not granted by the human rights treaties.<sup>14</sup> The supremacy or centrality of the state was the key in this approach and the stress was upon economic and social matters and the importance of the traditional civil and political rights minimised. However, a new approach to the question of international human rights began to emerge by the end of the 1980s, reflecting the changes taking place politically.<sup>15</sup> In particular, the USSR began to take a different approach with regard to human rights treaties.<sup>16</sup>

The general approach of the Third World states has combined elements of both the previous perceptions.<sup>17</sup> Concern with the equality and sovereignty of states, together with a recognition of the importance of social and economic rights, has characterised the Third World view. Such countries, in fact constituting a wide range of nations with differing interests and needs, and at different stages of development, have been much influenced by decolonisation and the struggle to obtain it and by the phenomenon of apartheid in South Africa. In addition, economic problems have played a large role in focusing their attention upon general developmental issues. Accordingly, the traditional civil and political rights have tended to lose their priority in the concerns of Third World states.<sup>18</sup> Of particular interest is the tension between the universalism of human rights and the relativism of cultural traditions. This has led to arguments by some adherents of the latter tendency that human rights can only be approached within the context of particular cultural or religious traditions, thus criticising the view that human rights are universal or transcultural. The danger, of course, is that states violating human rights that they have accepted by becoming parties to human rights treaties, as well as being bound by relevant customary international law, might seek to justify their actions by pleading cultural differences.<sup>19</sup>

## **The development of international human rights law<sup>20</sup>**

In the nineteenth century, the positivist doctrines of state sovereignty and domestic jurisdiction reigned supreme. Virtually all matters that today would be classified as human rights issues were at that stage universally regarded as within the internal sphere of national jurisdiction. The major exceptions to this were related to piracy *jure gentium* and slavery. In the latter case a number of treaties were entered into to bring about its abolition.<sup>21</sup> Concern also with the treatment of sick and wounded soldiers and with prisoners of war developed as from 1864 in terms of international instruments,<sup>22</sup> while states were required to observe certain minimum standards in the treatment of aliens.<sup>23</sup> In addition, certain agreements of a general welfare nature were beginning to be adopted by the turn of the century.<sup>24</sup> The nineteenth century also appeared to accept a right of humanitarian intervention, although its range and

extent were unclear.<sup>25</sup>

An important change occurred with the establishment of the League of Nations in 1919.<sup>26</sup> Article 22 of the Covenant of the League set up the mandates system for peoples in ex-enemy colonies ‘not yet able to stand by themselves in the strenuous conditions of the modern world’. The mandatory power was obliged to guarantee freedom of conscience and religion and a Permanent Mandates Commission was created to examine the reports the mandatory authorities had undertaken to make. The arrangement was termed ‘a sacred trust of civilisation’. Article 23 of the Covenant provided for just treatment of the native populations of the territories in question.<sup>27</sup> The 1919 peace agreements with Eastern European and Balkan states included provisions relating to the protection of minorities,<sup>28</sup> providing essentially for equality of treatment and opportunities for collective activity.<sup>29</sup> These provisions were supervised by the League of Nations, to whom there was a right of petition.<sup>30</sup>

Part XIII of the Treaty of Versailles provided for the creation of the International Labour Organization, among the purposes of which were the promotion of better standards of working conditions and support for the right of association.<sup>31</sup> The impact of the Second World War upon the development of human rights law was immense as the horrors of the war and the need for an adequate international system to maintain international peace and protect human rights became apparent to all. In addition, the rise of non-governmental organisations, particularly in the sphere of human rights, has had an immense effect.<sup>32</sup> While the post-Second World War world witnessed the rise of intergovernmental committees and organs and courts to deal with human rights violations, whether by public debate, states’ reports, comments, inter-state or individual petition procedures, recent years have seen the interposition of domestic amnesty laws and this has given rise to the question of the acceptability of impunity.<sup>33</sup> Further developments have included the establishments of truth and reconciliation commissions<sup>34</sup> and various other alternative justice systems such as the Rwandan Gacaca court system,<sup>35</sup> while the extent to which participants in the international legal system apart from states have become involved both in the process of formulating and seeking the implementation of human rights and in being the subjects of human rights concern and regulation is marked.<sup>36</sup>

## **Some basic principles**

### **Domestic jurisdiction<sup>37</sup>**

The basic rule of international law providing that states have no right to encroach upon the preserve of other states’ internal affairs is a consequence of the equality

and sovereignty of states and is mirrored in article 2(7) of the UN Charter. It has, however, been subject to a process of reinterpretation in the human rights field<sup>38</sup> as this and the two succeeding chapters will make apparent, so that states may no longer plead this rule as a bar to international concern and consideration of internal human rights situations.<sup>39</sup> It is, of course, obvious that where a state accepts the right of individual petition under an international procedure, it cannot thereafter claim that the exercise of such a right constitutes interference with its domestic affairs.<sup>40</sup>

## **The rule as to the exhaustion of domestic remedies<sup>41</sup>**

This rule flows from the above principle. It is a method of permitting states to solve their own internal problems in accordance with their own constitutional procedures before accepted international mechanisms can be invoked, and is well established in general international law.<sup>42</sup> However, where such internal remedies are non-existent or unduly and unreasonably prolonged or unlikely to bring effective relief, the resort to international measures will not be required.<sup>43</sup> The existence of such a remedy must be certain not only in theory but also in practice.<sup>44</sup> A provision regarding the need to exhaust domestic or local remedies before the various international mechanisms may be resorted to appears in all the international and regional human rights instruments<sup>45</sup> and has been the subject of much consideration by the Human Rights Committee under the Optional Protocol procedure of the International Covenant on Civil and Political Rights,<sup>46</sup> and within the European Convention<sup>47</sup> and Inter-American Convention human rights systems.<sup>48</sup>

## **Priorities of rights**

Certain rights may not be derogated from in the various human rights instruments even in times of war or other public emergency threatening the nation. In the case of the European Convention<sup>49</sup> these are the rights to life (except in cases resulting from lawful acts of war), the prohibition on torture and slavery, and non-retroactivity of criminal offences.<sup>50</sup> In the case of the Inter-American Convention,<sup>51</sup> the following rights are non-derogable: the rights to juridical personality, life and humane treatment, freedom from slavery, freedom from *ex post facto* laws, freedom of conscience and religion, rights of the family, to a name, of the child, nationality and participation in government.<sup>52</sup> By article 4 of the International Covenant on Civil and Political Rights, the rights to life and recognition as a person before the law, the freedoms of thought, conscience and religion and the prohibition on torture, slavery, retroactivity of criminal legislation and imprisonment on grounds solely of inability to fulfil a contractual obligation are non-derogable.<sup>53</sup>

Such non-derogable rights clearly are regarded as possessing a special place in the hierarchy of rights.<sup>54</sup> In addition, it must be noted, many rights are subject to a limitation or clawback clause, whereby the absolute right provided for will not operate in certain situations.<sup>55</sup> Those rights therefore that are not so limited may be regarded as of particular value.<sup>56</sup>

## **Customary international law and human rights**

In addition to the many international and regional treaty provisions concerning human rights to be noted in this and the next two chapters,<sup>57</sup> certain human rights may now be regarded as having entered into the category of customary international law in the light of state practice. These would certainly include the prohibition of torture, genocide and slavery and the principle of non-discrimination.<sup>58</sup> In addition, human rights established under treaty may constitute obligations *erga omnes* for the states parties.<sup>59</sup>

## **Evolving principles**

Certain areas of international human rights law are rapidly evolving. First, for example, the increasing extraterritoriality of human rights is becoming evident in the case-law of the European Convention on Human Rights,<sup>60</sup> the approach of the Human Rights Committee under the International Covenant on Civil and Political Rights<sup>61</sup> and the case-law of the International Court of Justice.<sup>62</sup> Secondly, the responsibility of states to prevent human rights abuses is beginning to be seriously considered, particularly with regard to genocide<sup>63</sup> and torture,<sup>64</sup> while more generally the obligation upon states and, for example, international organisations positively to protect human rights is becoming part of the agenda of international human rights law. Thirdly, increasing interest is being manifested in national human rights institutions,<sup>65</sup> while the increasing interconnection between international human rights law and international humanitarian law is noted in chapter 21.

## **The United Nations system – general<sup>66</sup>**

There are a number of human rights provisions in the Charter.<sup>67</sup> Article 1 includes in the purposes of the organisation the promotion and encouragement of respect for human rights and fundamental freedoms for all without distinction as to race, sex, language or religion. Article 13(1) notes that the General Assembly shall initiate studies and make recommendations regarding the realisation of human rights for all, while article 55 provides that the United Nations shall promote universal respect for

and observance of human rights. In a significant provision, article 56 states that:

all members pledge themselves to take joint and separate action in cooperation with the organisation for the achievement of the purposes set forth in article 55.<sup>68</sup>

The mandate system was replaced by the trusteeship system, one of the basic objectives of which was, by article 76, the encouragement of respect for human rights, while, with regard to non-self-governing territories, the administering powers under article 73 of the Charter recognised the principle that the interests of the inhabitants were paramount, and accepted as a sacred trust the obligation to promote the well-being of the inhabitants. It can thus be seen that the Charter provisions on human rights were very general and vague. No enforcement procedures were laid down. Some have argued that the term 'pledge' in article 56 had the effect of converting the enumerated purposes of article 55 into legal obligations,<sup>69</sup> but this has been disputed.<sup>70</sup> Certainly, as of 1946, this would have been a difficult proposition to sustain, particularly in view of the hortatory language used in the provisions and the fact that the respect for human rights stipulation does not identify precise legal rights.<sup>71</sup> However, in the *Namibia* case of 1971, the Court noted that under the UN Charter:

the former Mandatory had pledged itself to observe and respect, in a territory having international status, human rights and fundamental freedoms for all without distinction as to race. To establish instead and to enforce, distinctions, exclusions, restrictions and limitations, exclusively based on grounds of race, colour, descent or national or ethnic origin which constitute a denial of fundamental human rights is a flagrant violation of the purposes and principles of the Charter.<sup>72</sup>

It may be that this provision can only be understood in the light of the special, international status of that territory, but in the light of extensive practice since the 1940s in the general area of non-discrimination and human rights, the broader interpretation is to be preferred.

The Charter does contain a domestic jurisdiction provision. Article 2(7) provides that:

nothing contained in the present Charter shall authorise the United Nations to intervene in matters which are essentially within the domestic jurisdiction of any state

but as noted later<sup>73</sup> this has over the years been flexibly interpreted, so that human rights issues are no longer recognised as being ‘essentially within the domestic jurisdiction’ of states.

The elucidation, development and protection of human rights through the UN has proved to be a seminal event. A range of declarations and treaties has emerged, coupled with the establishment of a variety of advisory services and implementation and enforcement mechanisms. Large numbers of studies and reports of various kinds have appeared, while the whole process has been accompanied by extensive debate and consideration in a variety of UN organs and committees. Notwithstanding a certain degree of cynicism, it can be concluded that the acceptance of the centrality of human rights concerns within the international community has been due in no small measure to the unceasing consideration of human rights issues within the framework of the United Nations.

The cornerstone of UN activity has been without doubt the Universal Declaration of Human Rights adopted by the UN General Assembly on 10 December 1948.<sup>74</sup> The Declaration was approved without a dissenting vote (the Byelorussian SSR, Czechoslovakia, Poland, Ukrainian SSR, USSR, Yugoslavia and Saudi Arabia abstained). It was intended not as a legally binding document as such but, as its preamble proclaims, ‘a common standard of achievement for all peoples and nations’. Its thirty articles cover a wide range of rights, from liberty and security of the person (article 3), equality before the law (article 7), effective remedies (article 8), due process (articles 9 and 10), prohibitions on torture (article 5) and arbitrary interference with privacy (article 12) to rights protecting freedom of movement (article 13), asylum (article 14), expression (article 19), conscience and religion (article 18) and assembly (article 20). One should also note that included in the Declaration are social and economic rights such as the right to work and equal pay (article 23), the right to social security (article 25) and the right to education (article 26).

Although clearly not a legally enforceable instrument as such, the question arises as to whether the Declaration has subsequently become binding either by way of custom<sup>75</sup> or general principles of law, or indeed by virtue of interpretation of the UN Charter itself by subsequent practice.<sup>76</sup> The Declaration has had a marked influence upon the constitutions of many states and upon the formulation of subsequent human rights treaties and resolutions.<sup>77</sup> It is also to be noted that in 1968, the Proclamation of Tehran at the conclusion of the UN-sponsored International Conference on Human Rights stressed that the Declaration constituted ‘an obligation for members of the international community’.<sup>78</sup> The Declaration has also been referred to in many cases,<sup>79</sup> and its importance within the context of United Nations human rights

law should not be disregarded.<sup>80</sup> The intention had been that the Declaration would be followed immediately by a binding universal convention on human rights, but this process took considerably longer than anticipated. In the meantime, a number of important international conventions dealing with selective human rights issues were adopted, including the Genocide Convention<sup>81</sup> and the Convention on the Elimination of Racial Discrimination.<sup>82</sup>

The Vienna Declaration and Programme of Action, adopted in 1993, emphasised that all human rights were universal, indivisible and interdependent and interrelated. The protection of human rights was seen as a priority objective of the UN and the interrelationship of democracy, development and respect for human rights and fundamental freedoms underlined. Additional facilities for the UN Centre for Human Rights were called for as well as the establishment of a UN High Commissioner for Human Rights. The Declaration made particular reference *inter alia* to the problems of racial discrimination, minorities, indigenous peoples, migrant workers, the rights of women, the rights of the child, freedom from torture, the rights of disabled persons and human rights education.<sup>83</sup> The post of UN High Commissioner for Human Rights was indeed established several months later<sup>84</sup> and filled in April 1994. In General Assembly resolution 48/141, it is provided that the UN High Commissioner for Human Rights would be the UN official with principal responsibility for UN human rights activities.<sup>85</sup>

## **The protection of the collective rights of groups and individuals<sup>86</sup>**

International law since 1945 has focused primarily upon the protection of individual human rights, as can be seen from the Universal Declaration of Human Rights. In recent years, however, more attention has been given to various expressions of the concept of collective rights, although it is often difficult to maintain a strict differentiation between individual and collective rights. Some rights are purely individual, such as the right to life or freedom of expression, others are individual rights that are necessarily expressed collectively, such as freedom of assembly or the right to manifest one's own religion. Some rights are purely collective, such as the right to self-determination or the physical protection of the group as such through the prohibition of genocide, others constitute collective manifestations of individual rights, such as the right of persons belonging to minorities to enjoy their own culture and practise their own religion or use their own language. In addition, the question of the balancing of the legitimate rights of the state, groups and individuals is in practice crucial and sometimes not sufficiently considered. States, groups and individuals have legitimate rights and interests that should not be ignored. All within

a state have an interest in ensuring the efficient functioning of that state in a manner consistent with respect for the rights of groups and individuals, while the balancing of the rights of groups and individuals may itself prove difficult and complex.

## Prohibition of genocide

The physical protection of the group as a distinct identity is clearly the first and paramount factor. The Convention on the Prevention and Punishment of the Crime of Genocide signed in 1948<sup>87</sup> reaffirmed that genocide, whether committed in time of war or peace, was a crime under international law. Genocide was defined as any of the following acts committed ‘with intent to destroy, in whole or in part, a national, ethnical, racial or religious group as such’:

(a) killing members of the group; (b) causing serious bodily or mental harm to members of the group; (c) deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part; (d) imposing measures intended to prevent births within the group; (e) forcibly transferring children of the group to another group.

The Convention, which does not have an implementational system,<sup>88</sup> provides that persons charged with genocide shall be tried by a competent tribunal of the state in the territory of which the act was committed or by an international penal tribunal. Several points should be noted. First, the question of intent is such that states may deny genocidal activity by noting that the relevant intent to destroy in whole or in part was in fact absent.<sup>89</sup> Secondly, the groups protected do not include political groups.<sup>90</sup> Thirdly, the concept of cultural genocide is not included,<sup>91</sup> and fourthly there is virtually no mention of means to prevent the crime (although the obligation is stated).

In the 1990s, the issue of genocide unfortunately ceased to be an item of primarily historical concern. Events in the former Yugoslavia and in Rwanda stimulated increasing anxiety in this context. The Statutes of both the International Criminal Tribunal for the Former Yugoslavia and the International Criminal Tribunal for Rwanda provide for the prosecution of individuals for the crime of genocide and a significant case-law has now developed through these tribunals.<sup>92</sup> In addition, the question of state responsibility for the crime of genocide has been raised.<sup>93</sup> The International Court of Justice in the *Bosnian Genocide* case reaffirmed in its Order of 8 April 1993 on provisional measures<sup>94</sup> the view expressed in the Advisory Opinion on *Reservations to the Genocide Convention* that the crime of genocide ‘shocks the conscience of mankind, results in great losses to humanity...and is

contrary to moral law and to the spirit and aims of the United Nations'.<sup>95</sup> The Court called upon both parties not to take any action that might aggravate or extend the dispute over the prevention or punishment of the crime of genocide.<sup>96</sup>

On 11 July 1996, the Court rejected the Preliminary Objections raised by Yugoslavia.<sup>97</sup> In particular, the Court emphasised that it followed from the object and purpose of the Genocide Convention that the rights and obligations contained therein were rights and obligations *erga omnes* and that the obligation upon each state to prevent and punish the crime of genocide was not dependent upon the type of conflict involved in the particular situation (whether international or domestic) and was not territorially limited by the Convention.<sup>98</sup> The type of state responsibility envisaged under article IX of the Convention did not exclude any form of state responsibility.<sup>99</sup> In addition, the Court observed that the Convention did not contain any clause the object or effect of which was to limit the scope of its jurisdiction *ratione temporis* so as to exclude events prior to a particular date.<sup>100</sup> On 26 February 2007, the Court rendered its judgment on the merits. The Court affirmed that the effect of the categorisation of genocide as a 'crime under international law', coupled with the obligation to prevent genocide contained in the Genocide Convention, is to prohibit states from committing genocide through the actions of their organs or persons or groups whose acts are attributable to them.<sup>101</sup> The Court also held that state responsibility could arise under the Convention for genocide and complicity, without an individual being convicted of the crime or an associated one,<sup>102</sup> and that such responsibility for genocide applied to a state wherever it may be acting.<sup>103</sup> It was noted that the essence of the intent, at the heart of the definition of genocide, is to destroy the protected group, in whole or in part, as such. It is a group which must have particular positive characteristics – national, ethnical, racial or religious – and not the lack of them. The intent must also relate to the group 'as such'. That means that the crime requires an intent to destroy a collection of people who have a particular group identity<sup>104</sup> and such intent refers to the intent to destroy at least a substantial part of the particular group and this may apply to a geographically limited area (such as Srebrenica).<sup>105</sup> The Court emphasised that claims against a state involving charges of exceptional gravity, such as genocide, must be proved by evidence that is fully conclusive.<sup>106</sup> However, the Court emphasised that the Convention established a separate and distinct duty to prevent genocide, which was both 'normative and compelling'<sup>107</sup> and an obligation of conduct, not of result,<sup>108</sup> provided that the offence was actually committed.<sup>109</sup> Such obligation arose at the instant that the state learned of, or should normally have learned of, the existence of a serious risk that genocide would be committed.<sup>110</sup> It was also held that Serbia was in violation of its duty to punish genocide.<sup>111</sup>

## Prohibition of discrimination

Apart from the overwhelming requirement of protection from physical attack upon their very existence as a group, groups need protection from discriminatory treatment as such.<sup>112</sup> The norm of non-discrimination thus constitutes a principle relevant both to groups and to individual members of groups.

The International Convention on the Elimination of All Forms of Racial Discrimination<sup>113</sup> was signed in 1965 and entered into force in 1969. It builds on the non-discrimination provisions in the UN Charter. Racial discrimination is defined as:

any distinction, exclusion, restriction or preference based on race, colour, descent or national or ethnic origin which has the purpose or effect of nullifying or impairing the recognition, enjoyment or exercise, on an equal footing, of human rights and fundamental freedoms in the political, economic, social, cultural or any other field of public life.

States parties undertake to prohibit racial discrimination and guarantee equality for all in the enjoyment of a series of rights and to assure to all within their jurisdiction effective protection and remedies regarding such human rights.<sup>114</sup> It is also fair to conclude that in addition to the existence of this Convention, the prohibition of discrimination on racial grounds is contrary to customary international law.<sup>115</sup> This conclusion may be reached on the basis *inter alia* of articles 55 and 56 of the UN Charter, articles 2 and 7 of the Universal Declaration of Human Rights, the International Covenants on Human Rights,<sup>116</sup> regional instruments on human rights protection<sup>117</sup> and general state practice. Discrimination on other grounds, such as religion<sup>118</sup> and gender,<sup>119</sup> may also be contrary to customary international law. The International Covenant on Civil and Political Rights provides in article 2(1) that all states parties undertake to respect and ensure to all individuals within their territories and within their jurisdictions the rights recognised in the Covenant 'without distinction of any kind such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status'.<sup>120</sup> Article 26 stipulates that all persons are equal before the law and thus, 'the law shall prohibit any discrimination and guarantee to all persons equal and effective protection against discrimination on any ground such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status'.<sup>121</sup> The UN Human Rights Committee established under this Covenant<sup>122</sup> has noted in its General Comment 18 on Non-Discrimination<sup>123</sup> that non-discrimination 'constitutes a basic and general principle relating to the

protection of human rights'. The Committee, while adopting the definition of the term 'discrimination' as used in the Racial Discrimination and Women's Discrimination Conventions, concludes that it should be understood to imply any distinction, exclusion, restriction or preference which is based on any ground such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status and which has the purpose or effect of nullifying or impairing the recognition, enjoyment or exercise by all persons, on an equal footing, of all rights and freedoms.

The principle of non-discrimination requires the establishment of equality in fact as well as formal equality in law. As the Permanent Court of International Justice noted in the *Minority Schools in Albania* case,<sup>124</sup> 'equality in law precludes discrimination of any kind; whereas equality in fact may involve the necessity of different treatment in order to attain a result which establishes an equilibrium between different situations'.<sup>125</sup> The appropriate test of acceptable differentiation in such circumstances will centre upon what is just or reasonable<sup>126</sup> or objectively and reasonably justified.<sup>127</sup> The application of equality in fact may also require the introduction of affirmative action measures in order to diminish or eliminate conditions perpetuating discrimination. Such measures would need to be specifically targeted and neither absolute nor of infinite duration.<sup>128</sup>

## **The principle of self-determination as a human right<sup>129</sup>**

The right to self-determination has already been examined in so far as it relates to the context of decolonisation.<sup>130</sup> The question arises whether this right, which has been widely proclaimed, has an application beyond the colonial context. Article 1 of both International Covenants on Human Rights provides that 'all peoples have the right to self-determination. By virtue of that right they freely determine their political status and freely pursue their economic, social and cultural development', while the Helsinki Final Act of 1975<sup>131</sup> refers to 'the principle of equal rights and self-determination...all peoples have the right, in full freedom, to determine, when and as they wish, their internal and external political status, without external interference, and to pursue as they wish their political, economic, social and cultural development'. Article 20 of the African Charter on Human and Peoples' Rights, 1981<sup>132</sup> stipulates that 'all peoples shall have the right to existence. They shall have the unquestionable and inalienable right to self-determination. They shall freely determine their political status and shall pursue their economic and social development according to the policy they have chosen.' The 1970 Declaration on Principles of International Law Concerning Friendly Relations<sup>133</sup> referred to the colonial situation and noted that subjection of peoples to alien subjugation,

domination and exploitation constituted a violation of the principle. A number of UN resolutions have discussed the relevance of self-determination also to situations of alien occupation where the use of force has been involved.<sup>134</sup> The International Law Commission in 1988 expressed its view that the principle of self-determination was of universal application,<sup>135</sup> while the practice of the UN Human Rights Committee has been of particular significance.

Before this is briefly noted, reference must be made to the crucial importance of the principle of territorial integrity.<sup>136</sup> This norm protects the territorial framework of independent states and is part of the overall concept of the sovereignty of states. In terms of the concept of the freezing of territorial boundaries as at the moment of independence (save by mutual consent), the norm is referred to as *uti possidetis juris*.<sup>137</sup> This posits that boundaries established and existing at the moment of independence cannot be altered unless the relevant parties consent to change. It is supported by international instruments<sup>138</sup> and by judicial pronouncement. In the *Burkina Faso/Mali* case,<sup>139</sup> the Chamber of the International Court of Justice emphasised that *uti possidetis* constituted a general principle, whose purpose was to prevent the independence and stability of new states from being endangered by fratricidal struggles provoked by the challenging of frontiers. This essential requirement of stability had induced newly independent states to consent to the respecting of colonial borders ‘and to take account of it in the interpretation of the principle of self-determination of peoples’. The Arbitration Commission of the European Conference on Yugoslavia emphasised in Opinion No. 2<sup>140</sup> that ‘it is well established that, whatever the circumstances, the right to self-determination must not involve changes to existing frontiers at the time of independence (*uti possidetis juris*) except where the states concerned agree otherwise’.

The principle of self-determination, therefore, applies beyond the colonial context, within the territorial framework of independent states. It cannot be utilised as a legal tool for the dismantling of sovereign states.<sup>141</sup> Its use, however, as a crucial principle of collective human rights<sup>142</sup> has been analysed by the Human Rights Committee in interpreting article 1 of the Civil and Political Rights Covenant.<sup>143</sup> In its General Comment on Self-Determination adopted in 1984,<sup>144</sup> the Committee emphasised that the realisation of the right was ‘an essential condition for the effective guarantee and observance of individual human rights’. Nevertheless, the principle is seen as a collective one and not one that individuals could seek to enforce through the individual petition procedures provided in the First Optional Protocol to the Covenant.<sup>145</sup> The Committee takes the view, as Professor Higgins<sup>146</sup> noted,<sup>147</sup> that ‘external self-determination requires a state to take action in its foreign policy consistent with the attainment of self-determination in the remaining areas of colonial or racist occupation. But internal self-determination is

directed to their own peoples.’ In the context of the significance of the principle of self-determination within independent states, the Committee has encouraged states parties to provide in their reports details about participation in social and political structures,<sup>148</sup> and in engaging in dialogue with representatives of states parties, questions are regularly posed as to how political institutions operate and how the people of the state concerned participate in the governance of their state.<sup>149</sup> This necessarily links in with consideration of other articles of the Covenant concerning, for example, freedom of expression (article 19), freedom of assembly (article 21), freedom of association (article 22) and the right to take part in the conduct of public affairs and to vote (article 25). The right of self-determination, therefore, provides the overall framework for the consideration of the principles relating to democratic governance.<sup>150</sup> The Committee on the Elimination of Racial Discrimination adopted General Recommendation 21 in 1996 in which it similarly divided self-determination into an external and an internal aspect and noted that the latter referred to the ‘right of every citizen to take part in the conduct of public affairs at any level’.<sup>151</sup> The Canadian Supreme Court has noted that self-determination ‘is normally fulfilled through *internal* self-determination – a people’s pursuit of its political, economic, social and cultural development within the framework of an existing state’.<sup>152</sup>

## **The protection of minorities**<sup>153</sup>

Various attempts were made in the post-First World War settlements, following the collapse of the German, Ottoman, Russian and Austro-Hungarian Empires and the rise of a number of independent nation-based states in Eastern and Central Europe, to protect those groups to whom sovereignty and statehood could not be granted.<sup>154</sup> Persons belonging to racial, religious or linguistic minorities were to be given the same treatment and the same civil and political rights and security as other nationals in the state in question. Such provisions constituted obligations of international concern and could not be altered without the assent of a majority of the League of Nations Council. The Council was to take action in the event of any infraction of minorities’ obligations. There also existed a petition procedure by minorities to the League, although they had no standing as such before the Council or the Permanent Court of International Justice.<sup>155</sup> However, the schemes of protection did not work well, ultimately for a variety of reasons ranging from the sensitivities of newly independent states to international supervision of minority issues to overt exploitation of minority issues by Nazi Germany in order to subvert neighbouring countries. After the Second World War, the focus shifted to the international protection of universal individual human rights, although several instruments

dealing with specific situations incorporated provisions concerning the protection of minorities,<sup>156</sup> and in 1947 the Sub-Commission on the Prevention of Discrimination and the Protection of Minorities was established.<sup>157</sup> It was not, however, until the adoption of the International Covenant on Civil and Political Rights in 1966 that the question of minority rights came back onto the international agenda. Article 27 of this Covenant provides that ‘in those states in which ethnic, religious or linguistic minorities exist, persons belonging to such minorities shall not be denied the right, in community with the other members of their group, to enjoy their own culture, to profess and practise their own religion, or to use their own language’.

This modest and rather negative provision as formulated centres upon ‘persons belonging’ to minorities rather than upon minorities as such and does not define the concept of minorities.<sup>158</sup> Nevertheless, the UN Human Rights Committee has taken the opportunity to consider the issue in discussing states’ reports, individual petitions and in a General Comment. In commenting upon states’ reports made pursuant to the International Covenant, the Committee has made clear, for example, that the rights under article 27 apply to all members of minorities within a state party’s territory and not just nationals,<sup>159</sup> and it has expressed concern with regard to the treatment of minorities within particular states.<sup>160</sup>

In the *Lovelace* case,<sup>161</sup> the Committee decided that there had been a violation of article 27 with regard to an Indian woman who, by having married a non-Indian, had lost her rights by Canadian law to reside on the Tobique Reserve, something which she wished to do upon the collapse of her marriage. The Committee noted that statutory restrictions affecting the right to residence on a reserve of a person belonging to the minority concerned had to have both a reasonable and objective justification and be consistent with the other provisions of the Covenant read as a whole. This had not been the case. There was no place outside the reserve where her right to access to her native culture and language could be conducted in community with other members of the minority in question.

In the *Kitok* case,<sup>162</sup> the Committee took the view with regard to a petition by a member of the Sami community in Sweden that where the regulation of economic activity was an essential element in the culture of an economic community, its application to an individual could fall within article 27. It was emphasised that a restriction upon an individual member of a minority must be shown to have a reasonable and objective justification and to be necessary for the continued viability and welfare of the minority as a whole.

In the *Lubicon Lake Band* case,<sup>163</sup> the Committee upheld the complaint that the Canadian Government, in allowing the Provincial Government of Alberta to expropriate the Band’s territory for the benefit of private corporate interests,

violated article 27. It was held that the rights protected under article 27 included the right of persons in community with others to engage in economic and social activities which were part of the culture of the community to which they belonged. However, measures with only a limited impact on the way of life and livelihood of persons belonging to a minority would not necessarily violate article 27.<sup>164</sup>

The Committee adopted a General Comment on article 27 in 1994 after much discussion and hesitation due to fears that such a comment might be perceived to constitute an encouragement to secession.<sup>165</sup> The General Comment pointed to the distinction between the rights of persons belonging to minorities on the one hand, and the right to self-determination and the right to equality and non-discrimination on the other. It was emphasised that the rights under article 27 did not prejudice the sovereignty and territorial integrity of states, although certain minority rights, in particular those pertaining to indigenous communities, might consist of a way of life closely associated with territory and the use of its resources, such as fishing, hunting and the right to live in reserves protected by law. The Committee, in an important part of the General Comment, underlined that persons belonging to a minority need not be nationals or permanent residents of the state concerned so that migrant workers or even visitors might be protected under article 27. Whether an ethnic, religious or linguistic minority exists was an objective question, not dependent upon a decision of the state party. Although article 27 is negatively formulated, the Committee pointed out that positive measures of protection were required not only against the acts of the state party itself, but also against the acts of other persons within the state party. Positive measures may also be necessary to protect the identity of the minority concerned and legitimate differentiation was permitted so long as it was based on reasonable and objective criteria.

The UN General Assembly adopted a Declaration on the Rights of Persons Belonging to National or Ethnic, Religious and Linguistic Minorities in December 1992.<sup>166</sup> Article 1 provides that states 'shall protect the existence and the national or ethnic, cultural, religious and linguistic identity of minorities within their respective territories' and shall adopt appropriate legislative and other measures to achieve these ends. The Declaration states that persons belonging to minorities have the right to enjoy their own culture, practise and profess their own religion and to use their own language in private and in public without hindrance. Such persons also have the right to participate effectively in cultural, social, economic and public life. The UN Sub-Commission has been considering the question of minorities for many years and in 1994 agreed to establish a five-person inter-sessional working group<sup>167</sup> to examine peaceful and constructive solutions to situations involving minorities and, in particular, to review the practical application of the Declaration, to provide recommendations to *inter alia* the Sub-Commission and the UN High Commissioner

for Human Rights to protect minorities where there is a risk of violence and generally to promote dialogue between minority groups in society and between those groups and governments. In 2005, the Commission on Human Rights appointed an Independent Expert on Minorities with the mandate to promote the implementation of the Declaration; to identify best practices and possibilities for technical co-operation by the Office of the United Nations High Commissioner for Human Rights at the request of Governments; and to co-operate closely with existing relevant UN bodies, while taking into account the views of non-governmental organisations and applying a gender perspective.<sup>168</sup>

The issue of minority rights has also been taken up recently particularly by European states, primarily as a consequence of the demise of the Soviet Union and its empire in Eastern Europe and the reintegration of Eastern and Central European states within the political system of Western Europe. The specific response to questions of minority rights within the Council of Europe and the Conference (as from 1995 Organization) on Security and Co-operation in Europe are addressed below.<sup>169</sup>

As has been noted, the UN Human Rights Committee has pointed to the special position of indigenous peoples as minorities with a particular relationship to their traditional territory. It has been accepted that such communities form a specific category of minorities with special needs.<sup>170</sup> The International Labour Organization adopted Convention No. 107 on Indigenous and Tribal Populations in 1957, an instrument with a predominantly assimilationist approach to the question of indigenous peoples. It was partially revised in Convention No. 169 on Indigenous and Tribal Peoples in Independent Countries, 1989. The change in terminology from ‘populations’ to ‘peoples’ is instructive<sup>171</sup> and the latter Convention focuses far more upon the protection of the social, cultural, religious and spiritual values and practices of indigenous peoples. Unlike the prevailing approach to the definition of minorities generally, which intermingles objective and subjective criteria, this Convention stipulates in article 1(2) that ‘self-identification as indigenous or tribal shall be regarded as a fundamental criterion’ for determining the groups to which the Convention applies. The Sub-Commission recommended that a study of discrimination against indigenous populations should be made and this was completed in 1984.<sup>172</sup> A definition of indigenous populations was suggested and various suggestions made as to future action. In 1982, the Sub-Commission established a Working Group on Indigenous Populations<sup>173</sup> and a Declaration on the Rights of Indigenous Peoples was finally adopted in 2007.<sup>174</sup>

The Declaration notes that indigenous peoples have the right to the full enjoyment, as a collective or as individuals, of all human rights and fundamental freedoms as recognised in the Charter of the United Nations, the Universal

Declaration of Human Rights and international human rights law (article 1). They have the right to self-determination (article 3) and, in exercising their right to self-determination, have the right to autonomy or self-government in matters relating to their internal and local affairs, as well as ways and means for financing their autonomous functions (article 4). They further have the right to maintain and strengthen their distinctive political, economic, social and cultural characteristics, as well as their legal systems, while retaining the right to participate fully in the life of the state (article 5), the right to a nationality (article 6) and the collective right to live in freedom and security as distinct peoples free from any act of genocide or violence (article 7(2)). They also have the right not to be subjected to forced assimilation or destruction of their culture, while states are to provide effective mechanisms for prevention of, and redress for, *inter alia* any action which has the aim or effect of depriving them of their integrity as distinct peoples, or of their cultural values or ethnic identities (article 8). The Declaration also lists their rights to practise their cultural traditions, and to education, access to media and health practices, together with a range of rights concerning their distinctive relationship to the land (articles 9–37). The United Nations, its bodies, including the Permanent Forum on Indigenous Issues, and specialised agencies, including at the country level, and states are called upon to promote respect for and full application of the Declaration (article 42). A special rapporteur on indigenous peoples was appointed in 2001 and a Voluntary Fund for Indigenous Populations established in 1985.<sup>175</sup> A Permanent Forum on Indigenous Issues was set up in 2000<sup>176</sup> and UN Development Group Guidelines on Indigenous Peoples' Issues were produced in 2008.<sup>177</sup> An expert mechanism, consisting of five independent experts, on the rights of indigenous peoples was called for in Human Rights Council resolution 6/36, 2007, in order to provide the Council with thematic expertise.

The question of an American Declaration on Indigenous Peoples has also been under discussion within the Organization of American States.<sup>178</sup> The Inter-American Court of Human Rights discussed the issue of the rights of indigenous peoples to ancestral lands and resources in *The Mayagna (Sumo) Awas Tingni Community v. Nicaragua* in 2001.<sup>179</sup> The Court emphasised the communitarian tradition regarding a communal form of collective property of the land and consequential close ties of indigenous people with that land,<sup>180</sup> and noted that the customary law of such people had especially to be taken into account so that 'possession of the land should suffice for indigenous communities lacking real title'.<sup>181</sup> In *Sawhoyamaxa Indigenous Community v. Paraguay*, the Court emphasised that the close ties of members of the indigenous communities with their traditional lands and the natural resources associated with their culture had to be secured under article 21 of the Inter-American Convention on Human Rights concerning the right to the use and enjoyment of

property. The Court, in interpreting this provision, also took account of Convention No. 169 of the ILO, which required *inter alia* respect for the special importance for the cultural and spiritual values of the communities concerned of their relationship with their lands. The collective nature of property ownership was also noted. In addition, the Court found a violation of the right to recognition as a person before the law under article 3 of the Convention as there had been no registration or official documentation for the existence of several members of the indigenous community. The Court ordered the state to adopt all legislative, administrative and other measures to guarantee the members of the community ownership rights over their traditional lands.<sup>182</sup>

## Other suggested collective rights

The subject of much concern in recent years has been the question of a right to development.<sup>183</sup> In 1986, the UN General Assembly adopted the Declaration on the Right to Development.<sup>184</sup> This instrument reaffirms the interdependence and indivisibility of all human rights and seeks to provide a framework for a range of issues (article 9). The right to development is deemed to be an inalienable human right of all human beings and peoples to participate in and enjoy economic, social, cultural and political development (article 1), while states have the primary responsibility to create conditions favourable to its realisation (article 3), including the duty to formulate international development policies (article 4). States are particularly called upon to ensure *inter alia* equal opportunity for all in their access to basic resources, education, health services, food, housing, employment and the fair distribution of income. Effective measures are to be undertaken to ensure that women participate in the development process and appropriate economic and social reforms are to be carried out with a view to eradicating all social injustices (article 8). The question of encouraging the implementation of this Declaration was the subject of continuing UN attention,<sup>185</sup> with the reaffirmation of the right to development by the UN Vienna Declaration and Programme of Action, 1993<sup>186</sup> and the establishment by the UN Commission on Human Rights of a Working Group on the Right to Development in the same year.<sup>187</sup> It should also be noted that Principle 3 of the Rio Declaration on Environment and Development, 1992 stipulated that ‘the right to development must be fulfilled so as to equitably meet developmental and environmental needs of present and future generations’.<sup>188</sup> While the general issue of development is clearly on the international agenda in the context of economic issues and broad human rights concerns, it is premature to talk in terms of a legal right in international law of groups or peoples or states to development.<sup>189</sup> Other suggested collective rights have included the right to a healthy environment<sup>190</sup> and

the right to peace.<sup>191</sup>

## **The United Nations system – implementation<sup>192</sup>**

The United Nations system has successfully generated a wide-ranging series of international instruments dealing with the establishment of standards and norms in the human rights field.<sup>193</sup> The question of implementation will now be briefly addressed.

### **Political bodies – general**

The General Assembly has power under article 13 of the Charter to initiate studies and make recommendations regarding *inter alia* human rights. Human rights items on its agenda may originate in Economic and Social Council (ECOSOC) reports or decisions taken by the Assembly at earlier sessions to consider particular matters, or are proposed for inclusion by the UN organs, the Secretary-General or member states. Most items on human rights go to the Assembly's Third Committee (Social, Humanitarian and Cultural Committee), but others may be referred to other committees such as the Sixth Committee (Legal) or the First Committee (Political and Security) or the Special Political Committee. The Assembly has also established subsidiary organs under Rule 161, several of which deal with human rights issues, such as the Special Committee on Decolonisation, the UN Council for Namibia, the Special Committee against Apartheid, the Special Committee to Investigate Israeli Practices in the Occupied Territories and the Committee on the Exercise of the Inalienable Rights of the Palestine People.<sup>194</sup> ECOSOC may, under article 62 of the Charter, make recommendations on human rights, draft conventions for the Assembly and call international conferences on human rights matters. It consists of fifty-four members of the UN elected by the General Assembly and hears annually the reports of a wide range of bodies including the UN High Commissioner for Refugees, the UN Children's Fund, the UN Conference on Trade and Development, the UN Environment Programme and the World Food Council. Of its subsidiary bodies, the Commission on Human Rights and the Commission on the Status of Women have the most direct connection with human rights issues.<sup>195</sup> The Commission on Human Rights was replaced by the Human Rights Council in 2006.

### **The Commission on Human Rights (1946–2006)<sup>196</sup>**

This was established in 1946 as a subsidiary organ of ECOSOC with extensive terms of reference, including making studies, preparing recommendations and drafting

international instruments on human rights. Originally consisting of forty-three representatives of member states of the UN selected by ECOSOC on the basis of equitable geographic distribution,<sup>197</sup> that number was increased to fifty-three by resolution 1990/48 in May 1990. For its first twenty years, it took the view that it had no power to take any action with regard to complaints concerning human rights violations, despite receiving many via the Secretary-General.<sup>198</sup> However, in 1967, ECOSOC resolution 1235 (XLII) authorised the Commission and its Sub-Commission on Prevention of Discrimination and Protection of Minorities to examine information relevant to gross violations of human rights contained in communications, and to study such situations as revealed a consistent pattern of violations with a view to making recommendations to ECOSOC.<sup>199</sup> This constituted the public debate function of the Commission relating to specific situations. The situations in question referred at first primarily to Southern Africa. The Commission also set up an ad hoc working group of experts on South Africa and then working groups on a variety of topics<sup>200</sup> and appointed special rapporteurs to deal with situations in specific countries.<sup>201</sup> A series of informal working groups were created to prepare drafts of international instruments, such as the Declaration on Religious Intolerance, the Convention against Torture and instruments on minority rights and the rights of the child.<sup>202</sup> The Commission also established a Group of Three pursuant to article IX of the Apartheid Convention to consider states' reports under that Convention. In 1970 a new procedure for dealing with human rights complaints was introduced in ECOSOC resolution 1503 (XLVIII).<sup>203</sup> By virtue of this resolution as modified in 2000,<sup>204</sup> the Sub-Commission appointed annually a Working Group on Communications to meet to consider communications received and to pass on to the Sub-Commission those that appeared to reveal 'a consistent pattern of gross and reliably attested violations of human rights'. These were examined by the Working Group on Situations of the Sub-Commission which then determined whether or not to refer particular situations to the Commission.<sup>205</sup> Those so transmitted were examined in two separate closed meetings by the Commission, which then decided whether or not to take further action, such as appointing an independent expert or discussing the matter under the resolution 1235 public procedure. The procedure, which was confidential until the final stage, did not fulfil initial high expectations. The confidentiality requirement and the highly political nature of the Commission itself combined to frustrate hopes that had been raised.<sup>206</sup>

Despite good work in the field of standard-setting and in drawing attention to abuses of human rights, albeit on rather less than a universalist basis, the Commission began to attract an increasing level of criticism, mainly concerning political selectivity and the failure to review objectively the situation in particular countries.<sup>207</sup> The High Level Panel on Threats, Challenge and Change convened by

the United Nations Secretary-General concluded in its Report of 2004 that, ‘In recent years, the Commission’s capacity to perform these tasks has been undermined by eroding credibility and professionalism.’<sup>208</sup> As a result, the Human Rights Council was created to replace the Commission by General Assembly resolution 60/251 on 3 April 2006.

## **The Human Rights Council**

The Council was established with a higher status in the UN hierarchy as a subsidiary organ of the General Assembly with forty-seven members,<sup>209</sup> elected by a majority of members of the Assembly for three years for up to two consecutive terms. The Commission’s special procedures function was retained, although all functions and responsibilities of the Commission assumed by the Council are subject to a review aimed at their rationalisation and improvement. A new universal periodic review mechanism by which the human rights record of all countries is to be examined was also established. This was intended as a partial response to the criticisms of the Commission’s selectivity.<sup>210</sup> The Council adopted resolution 5/1 on 18 June 2007 entitled ‘United Nations Human Rights Council: Institution-Building’, which ranged over a wide area and established the details of the universal periodic review mechanism. The principles laid down for this mechanism include the universality of human rights, universal coverage and equal treatment of all states and the conduct of the review in an objective, transparent, non-selective, constructive, non-confrontational and non-politicised manner. This resolution also laid down details for the conduct and review of the special procedures, provided for the creation of the Human Rights Council Advisory Committee, composed of eighteen experts serving in their personal capacity, intended to function as a think-tank for the Council and work at its direction, and provided for the establishment of a confidential complaints procedure based upon the mechanism created by ECOSOC resolution 1503 (1970).<sup>211</sup> The spectre of politicisation has not, however, vanished.

## **Expert bodies established by UN organs**

### ***The Sub-Commission on the Promotion and Protection of Human Rights***<sup>212</sup>

The Sub-Commission, initially entitled the Sub-Commission on Prevention of Discrimination and Protection of Minorities, was established by the Commission in 1947 with wide terms of reference, composed of twenty-six members elected by the Commission on the basis of nominations of experts made by the UN member states

and it was renamed the Sub-Commission on the Promotion and Protection of Human Rights in 1999.<sup>213</sup> It came to an end in 2006 as a consequence of General Assembly resolution 60/251, which established the Human Rights Council.<sup>214</sup> However, a number of its functions subsist within the Council.

## **The International Covenant on Economic, Social and Cultural Rights<sup>215</sup>**

The International Covenant on Economic, Social and Cultural Rights was adopted in 1966 and entered into force in 1976. Article 2 provides that each state party undertakes to take steps to the maximum of its available resources 'with a view to achieving progressively the full realisation of the rights recognised in the present Covenant'. In other words, an evolving programme is envisaged depending upon the goodwill and resources of states rather than an immediate binding legal obligation with regard to the rights in question. The rights included range from self-determination (article 1), the right to work (articles 6 and 7), the right to social security (article 9), adequate standard of living (article 11) and education (article 13) to the right to take part in cultural life and enjoy the benefits of scientific progress and its applications (article 15).

Under the Covenant itself, states parties were obliged to send periodic reports to ECOSOC.<sup>216</sup> In 1978, a Sessional Working Group was set up, consisting of fifteen members elected by ECOSOC from amongst states parties for three-year renewable terms. The Group met annually and reported to the Council. It was not a success, however, and in 1985 it was decided to establish a new committee of eighteen members, this time composed of independent experts.<sup>217</sup> Accordingly in 1987 the new Committee on Economic, Social and Cultural Rights commenced operation.<sup>218</sup> But it is to be especially noted that unlike, for example, the Racial Discrimination Committee, the Human Rights Committee and the Torture Committee, the Economic Committee is not autonomous and it is responsible not to the states parties but to a main organ of the United Nations.

The implementation of this Covenant faces particular difficulties in view of the perceived vagueness of many of the principles contained therein, the relative lack of legal texts and judicial decisions, and the ambivalence of many states in dealing with economic, social and cultural rights. In addition, problems of obtaining relevant and precise information have loomed large, not least in the light of the fact that comparatively few non-governmental organisations focus upon this area.<sup>219</sup>

The Committee initially met annually in Geneva for three-week sessions, though it now meets twice per year. Its primary task lies in examining states' reports,

drawing upon a list of questions prepared by its pre-sessional working group. The problem of overdue reports from states parties applies here as it does with regard to other human rights implementation committees. The Economic Rights Committee adopted a decision at its sixth session, whereby it established a procedure allowing for the consideration of the situation of particular states where those states had not produced reports for a long time, thus creating a rather valuable means of exerting pressure upon recalcitrant states parties.<sup>220</sup> Additional information may also be requested from states parties where this is felt necessary.<sup>221</sup> The Committee also prepares ‘General Comments’, the second of which on international technical assistance measures was adopted at its fourth session in 1990.<sup>222</sup> The third general comment, adopted in 1991, is of particular interest and underlines that although the Covenant itself appears promotional and aspirational, nevertheless certain obligations of immediate effect are imposed upon states parties. These include the non-discrimination provisions and the undertaking to take steps which should be taken within a reasonably short time after the Covenant has entered into force for the state concerned and which should be ‘deliberate, concrete and targeted as clearly as possible towards meeting the obligations recognised in the Covenant’. The Committee also emphasised that international co-operation for development, and thus for the realisation of economic, social and cultural rights, was an obligation for all states.<sup>223</sup> The Committee also holds general discussions on particular rights in the form of a ‘day of general discussion’.<sup>224</sup> In December 2008, the Optional Protocol to the Covenant was adopted by the UN General Assembly, under which the Committee was enabled to hear individual petitions, and was provided with an inter-state complaints competence with regard to states accepting this procedure.<sup>225</sup> Although the Committee was not as such established by treaty, it is now regarded as one of the (currently) ten UN human rights treaty bodies.

## **Expert bodies established under particular treaties<sup>226</sup>**

A number of expert committees have been established under particular treaties. They are not subsidiary organs of the UN, but autonomous, although in practice they are closely connected with it, being serviced, for example, by the UN Secretariat through the UN Centre for Human Rights in Geneva.<sup>227</sup> These committees are termed ‘UN Treaty Organs’.

## **The Committee on the Elimination of Racial Discrimination<sup>228</sup>**

Under Part II of the Convention on the Elimination of All Forms of Racial

Discrimination, 1965, a Committee of eighteen experts was established consisting of persons serving in their personal capacity and elected by the states parties to the Convention.<sup>229</sup> States parties undertook to submit reports every two years regarding measures adopted to give effect to the provisions of the Convention to the Committee, which itself would report annually through the UN Secretary-General to the General Assembly. The Committee may make suggestions and general recommendations based on the examination of the reports and information received from the states parties, which are reported to the General Assembly together with any comments from states parties.<sup>230</sup> The Committee is also able to operate early warning measures and urgent procedures. Early warning measures are directed at preventing existing problems from escalating into conflicts, while urgent procedures are to respond to problems requiring immediate attention to prevent or limit the scale or number of serious violations of the Convention. Decisions, statements or resolutions may be adopted. Such action has been taken in relation to more than twenty states parties. The Committee has, for example, conducted two field visits in connection with the procedure and has drawn the attention of the Secretary-General, the Security Council or other relevant bodies to issues in relation to six states parties.<sup>231</sup>

The Committee has also established a procedure to deal with states whose reports are most overdue. Under this procedure, the Committee proceeds to examine the situation in the state party concerned on the basis of the last report submitted.<sup>232</sup> At its forty-ninth session, the Committee further decided that states parties whose initial reports were excessively overdue by five years or more would also be scheduled for a review of implementation of the provisions of the Convention. In the absence of an initial report, the Committee considers all information submitted by the state party to other organs of the United Nations or, in the absence of such material, reports and information prepared by organs of the United Nations. In practice the Committee also considers relevant information from other sources, including from non-governmental organisations, whether it is an initial or a periodic report that is seriously overdue.<sup>233</sup>

Under article 11, one state party may bring a complaint against another state party and the Committee will seek to resolve the complaint. Should the matter not be so settled, either party may refer it back to the Committee and by article 12 an ad hoc Conciliation Commission may be established, which will report back to the Committee with any recommendation thought proper for the amicable solution of the dispute.<sup>234</sup> In addition to hearing states' reports and inter-state complaints, the Committee may also hear individual petitions under the article 14 procedure. This, however, is subject to the state complained of having made a declaration recognising the competence of the Committee to receive and consider such communications. If

such a declaration has not been notified by a state, therefore, the Committee has no authority to hear a petition against the state.<sup>235</sup> Under this procedure, consideration of communications is confidential and the Committee may be assisted by a five-person working group making recommendations to the full Committee. The Committee began hearing individual communications in 1984 and a number of important cases have now been completed.<sup>236</sup>

The Committee regularly meets twice a year and has interpreted articles of the Convention, discussed reports submitted to it, adopted decisions<sup>237</sup> and general recommendations,<sup>238</sup> obtained further information from states parties and co-operated closely with the International Labour Organization and UNESCO. Many states have enacted legislation as a consequence of the work of the Committee and its record of impartiality is very good.<sup>239</sup> The Committee also receives copies of petitions and reports sent to UN bodies dealing with trust and non-self-governing territories in the general area of Convention matters and may make comments upon them.<sup>240</sup> The general article 9 reporting system appears to work well, with large numbers of reports submitted and examined, but some states have proved tardy in fulfilling their obligations.<sup>241</sup> The Committee has published guidelines for states parties as to the structure of their reports.<sup>242</sup>

The Committee, in order to speed up consideration of states' reports, has instituted the practice of appointing country rapporteurs, whose function it is to prepare analyses of reports of states parties.<sup>243</sup> The Committee has also called for additional technical assistance to be provided by the UN to help in the reporting process, while it has expressed serious concern that financial difficulties are beginning to affect its functioning.<sup>244</sup>

## **The Human Rights Committee<sup>245</sup>**

The International Covenant on Civil and Political Rights was adopted in 1966 and entered into force in 1976.<sup>246</sup> By article 2, all states parties undertake to respect and to ensure to all individuals within their territory and subject to their jurisdiction the rights recognised in the Covenant. These rights are clearly intended as binding obligations. They include the right of peoples to self-determination (article 1), the right to life (article 6), prohibitions on torture and slavery (articles 7 and 8), the right to liberty and security of the person (article 9), due process (article 14), freedom of thought, conscience and religion (article 18), freedom of association (article 22) and the rights of persons belonging to minorities to enjoy their own culture (article 27).

A Human Rights Committee was established under Part IV of the Covenant. It

consists of eighteen independent and expert members, elected by the states parties to the Covenant for four-year terms, with consideration given to the need for equitable geographical distribution and representation of the different forms of civilisation and of the principal legal systems.<sup>247</sup> The Committee meets three times a year (in Geneva and New York) and operates by way of consensus.<sup>248</sup> The Covenant is primarily implemented by means of a reporting system, whereby states parties provide information on the measures adopted to give effect to the rights recognised in the Covenant. Initial reports are made within one year of the entry into force of the Covenant for the state in question and general guidelines have been issued.<sup>249</sup> The Committee has decided that subsequent reports would be required every five years,<sup>250</sup> and the first of the second periodic reports became due in 1983. The reports are discussed by the Committee with representatives of the state concerned (following upon the precedent established by the Committee on the Elimination of Racial Discrimination).<sup>251</sup> The practice used to be that Committee members would informally receive information from sources other than the reporting state provided the source is not publicly identified. This enabled the Committee to be more effective than would otherwise have been the case.<sup>252</sup> However, no doubt due to the ending of Soviet control in Eastern Europe and the demise of the Soviet Union, there appears to be no problem now about acknowledging publicly the receipt of information from named non-governmental organisations.<sup>253</sup> The Committee may also seek additional information from the state concerned. For example, in October 1992, the Committee adopted a decision requesting the governments of the Federal Republic of Yugoslavia (Serbia and Montenegro), Croatia and Bosnia-Herzegovina to submit a short report concerning measures to prevent *inter alia* ethnic cleansing and arbitrary killings.<sup>254</sup> Such reports were forthcoming and were discussed with the state representatives concerned and comments adopted. The Committee thereafter adopted an amendment to its rules of procedure permitting it to call for reports at any time deemed appropriate.<sup>255</sup> The Committee has also noted that the peoples within a territory of a former state party to the Covenant remain entitled to the guarantees of the Covenant.<sup>256</sup> Where states parties have failed to report over several reporting cycles, or request a postponement of their scheduled appearance before the Committee at short notice, the Committee may continue to examine the situation in the particular state on the basis of material available to it.<sup>257</sup>

Under article 40(4), the Committee is empowered to make such 'general comments as it may deem appropriate'. After some discussion, a consensus was adopted in 1980, which permitted such comments provided that they promoted co-operation between states in the implementation of the Covenant, summarised the experience of the Committee in examining states' reports and drew the attention of states parties to matters relating to the improvement of the reporting procedure and

the implementation of the Covenant. The aim of the Committee was to engage in a constructive dialogue with each reporting state, and the comments would be non-country-specific.<sup>258</sup> However, in 1992, the Committee decided that at the end of the consideration of each state party's report, specific comments would be adopted referring to the country in question and such comments would express both the satisfaction and the concerns of the Committee as appropriate.<sup>259</sup> These specific comments are in a common format and refer to 'positive aspects' of the report and 'principal subjects for concern', as well as 'suggestions and recommendations'.<sup>260</sup> The Committee has also adopted the practice, where a due report has not been forthcoming, of considering the measures taken by the state party in question to give effect to rights in the Covenant in the absence of a report but in the presence of representatives of the state and of adopting provisional concluding observations.<sup>261</sup>

The Committee has also adopted a variety of General Comments.<sup>262</sup> These comments are generally non-controversial. One interesting comment on article 6 (the right to life), however, emphasised the Committee's view that 'the designing, testing, manufacture, possession and development of nuclear weapons are among the greatest threats to the right to life', and that the 'production, testing, possession and deployment and use of nuclear weapons should be prohibited and recognised as crimes against humanity'.<sup>263</sup>

In April 1989, the Committee adopted a General Comment on the rights of the child, as the process of adopting the Convention on the Rights of the Child neared its climax. It noted the importance of economic, social and cultural measures, such as the need to reduce infant mortality and prevent exploitation. Freedom of expression was referred to, as was the requirement that children be protected against discrimination on grounds such as race, sex, religion, national or social origin, property or birth. Responsibility for guaranteeing the necessary protection lies, it was stressed, with the family, society and the state, although it is primarily incumbent upon the family. Special attention needed to be paid to the right of every child to acquire a nationality.<sup>264</sup>

In November 1989, an important General Comment was adopted on non-discrimination. Discrimination was to be understood to imply for the purposes of the Covenant:

any distinction, exclusion, restriction or preference which is based on any ground such as race, colour, sex, language, religion, political or other opinion, national or social origin, property, birth or other status, and which has the purpose or effect of nullifying or impairing the recognition, enjoyment or exercise by all persons, on an equal footing, of all rights and freedoms.<sup>265</sup>

Identical treatment in every instance was not, however, demanded. The death sentence could not, under article 6(5) of the Covenant, be imposed on persons under the age of eighteen or upon pregnant women. It was also noted that the principle of equality sometimes requires states parties to take affirmative action in order to diminish or eliminate conditions which cause or help to perpetuate discrimination prohibited by the Covenant. In addition, it was pointed out that not every differentiation constituted discrimination, if the criteria for such differentiation were reasonable and objective and if the aim was to achieve a purpose which was legitimate under the Covenant.<sup>266</sup>

Important General Comments on Minorities<sup>267</sup> and Reservations<sup>268</sup> were adopted in 1994. In 1997, the Committee noted in General Comment 26 that the rights in the Covenant belonged to the people living in the territory of the state party concerned and that international law did not permit a state which had ratified or acceded or succeeded to the Covenant to denounce it or withdraw from it,<sup>269</sup> while in General Comment 28 the Committee pointed out that the rights which persons belonging to minorities enjoyed under article 27 of the Covenant in respect of their language, culture and religion did not authorise any state, group or person to violate the right to the equal enjoyment by women of any Covenant rights, including the right to equal protection of the law.<sup>270</sup>

Under article 41 of the Covenant, states parties may recognise the competence of the Committee to hear inter-state complaints. Both the complainant and the object state must have made such declarations. The Committee will seek to resolve the issue and, if it is not successful, it may under article 42 appoint, with the consent of the parties, an ad hoc Conciliation Commission.<sup>271</sup>

The powers of the Human Rights Committee were extended by Optional Protocol I to the Civil and Political Rights Covenant with regard to ratifying states to include the competence to receive and consider individual communications alleging violations of the Covenant by a state party to the Protocol.<sup>272</sup> The individual must have exhausted all available domestic remedies (unless unreasonably prolonged) and the same matter must not be in the process of examination under another international procedure.<sup>273</sup> The procedure under the Optional Protocol is divided into several stages. The gathering of basic information is done by the Secretary-General and laid before the Working Group on Communications of the Committee, which recommends whether, for example, further information is required from the applicant or the relevant state party and whether the communication should be declared inadmissible. The procedure before the Committee itself is divided into an admissibility and a merits stage. Interim decisions may be made by the Committee and ultimately a 'final view' communicated to the parties.<sup>274</sup>

An increasing workload, however, began to cause difficulties as the number of parties to the Optional Protocol increased. By mid-2006, 1,490 communications had been registered. Of these, 547 had been the subject of a final view (of which 429 concluded that a violation had occurred), 449 were declared inadmissible and 218 were discontinued or withdrawn, leaving 276 yet to be concluded.<sup>275</sup> In order to deal with the growth in applications, the Committee decided at its thirty-fifth session to appoint a Special Rapporteur to process new communications as they were received (i.e. between sessions of the Committee), and this included requesting the state or individual concerned to provide additional written information or observations relevant to the question of the admissibility of the communication.<sup>276</sup> The Committee has also authorised its five-member Working Group on Communications to adopt a decision declaring a communication admissible, providing there is unanimity.<sup>277</sup> The Committee may also adopt interim measures of protection under Rule 92 of its Rules of Procedure 2005. This has been used primarily in connection with cases submitted by or on behalf of persons sentenced to death and awaiting execution.<sup>278</sup> Such a request was made, for example, to Trinidad and Tobago in the *Ashby* case pending examination of the communication, but to no avail. After the individual was executed, the Committee adopted a decision expressing its indignation at the failure of the state party to comply with the request for interim measures and deciding to continue consideration of the case.<sup>279</sup> Where the state concerned has disregarded the Committee's decisions under Rule 92, the Committee has found that the state party has violated its obligations under the Optional Protocol.<sup>280</sup>

The Committee, however, is not a court with the power of binding decision on the merits of cases. Indeed, in instances of non-compliance with its final views, the Optional Protocol does not provide for an enforcement mechanism, nor indeed for sanctions, although follow-up techniques are being developed in order to address such problems.<sup>281</sup>

A variety of interesting decisions have so far been rendered. The first group of cases concerned complaints against Uruguay, in which the Committee found violations by that state of rights recognised in the Covenant.<sup>282</sup> In the *Lovelace* case,<sup>283</sup> the Committee found Canada in breach of article 27 of the Covenant protecting the rights of minorities since its law provided that an Indian woman, whose marriage to a non-Indian had broken down, was not permitted to return to her home on an Indian reservation. In the *Mauritian Women* case<sup>284</sup> a breach of Covenant rights was upheld where the foreign husbands of Mauritian women were liable to deportation whereas the foreign wives of Mauritian men would not have been.

The Committee has also held that the Covenant's obligations cover the decisions of diplomatic authorities of a state party regarding citizens living abroad.<sup>285</sup> In the *Robinson case*,<sup>286</sup> the Committee considered whether a state was under an obligation itself to make provision for effective representation by counsel in a case concerning a capital offence, in circumstances where the counsel appointed by the author of the communication declines to appear. The Committee emphasised that it was axiomatic that legal assistance be available in capital cases and decided that the absence of counsel constituted unfair trial.

The Committee has dealt with the death penalty issue in several cases<sup>287</sup> and has noted, for example, that such a sentence may only be imposed in accordance with due process rights.<sup>288</sup> The Committee has also taken the view that where the extradition of a person facing the death penalty may expose the person to violation of due process rights in the receiving state, the extraditing state may be in violation of the Covenant.<sup>289</sup> The Committee has also noted that execution by gas asphyxiation would violate the prohibition in article 7 of cruel and inhuman treatment.<sup>290</sup> The issue faced in the *Vuolanne case*<sup>291</sup> was whether the procedural safeguards in article 9(4) of the Covenant on Civil and Political Rights, whereby a person deprived of his liberty is to be allowed recourse to the courts, applied to military disciplinary detention. The Committee was very clear that it did. One issue of growing importance concerns the question of the extraterritorial application of human rights treaties, that is whether a state party to a particular human rights treaty is obliged to apply it outside of its own territory where it is acting abroad either by way of its state agents or organs or because it is in control of an area beyond its border. The Committee has consistently taken the view that the Covenant does apply in such circumstances, whether it be with regard to state agents acting abroad<sup>292</sup> or with regard to the obligations of Israel within the occupied territories.<sup>293</sup>

It is already apparent that the Committee has proved a success and is performing a very important role in the field of human rights protection.<sup>294</sup>

## **The Committee on the Elimination of Discrimination Against Women**

The Commission on the Status of Women was established in 1946 as one of the functional commissions of ECOSOC and has played a role both in standard-setting and in the elaboration of further relevant instruments.<sup>295</sup> The Committee on the Elimination of All Forms of Discrimination Against Women was established under article 22 of the 1979 Convention on the Elimination of all Forms of Discrimination

Against Women.<sup>296</sup> This Convention is implemented by means of states' reports. It is composed of twenty-three experts serving in individual capacities for four-year terms. It held its first regular session in October 1982 and at its second session examined the reports of seven states parties regarding measures taken to comply with the terms of the Convention. It reports annually to the UN General Assembly through ECOSOC.<sup>297</sup> The Committee has provided guidelines to states parties on reporting, whereby initial reports are intended to be detailed and comprehensive with subsequent reports being of an updating nature.<sup>298</sup> Since 1990, subsequent reports are examined first by a pre-sessional working group. Following discussion of a report, the Committee provides concluding comments. The Committee, in addition to hearing states' reports, may make suggestions and general recommendations, which are included in the report.<sup>299</sup> Since 1997 the process of adopting a general recommendation is preceded by an open dialogue between the Committee, non-governmental organisations and others regarding the topic of the general recommendation and a discussion of a draft prepared by a Committee member. General Recommendation No. 5 called upon states parties to make more use of 'temporary special measures such as positive action, preferential treatment or quota systems to advance women's integration into education, the economy, politics and employment', while General Recommendation No. 8 provided that states parties should take further measures to ensure to women, on equal terms with men and without discrimination, the opportunity to represent their government at the international level.<sup>300</sup> General Recommendation No. 12 called upon states parties to include in their reports information on measures taken to deal with violence against women, while General Recommendation No. 14 called for measures to be taken to eradicate the practice of female circumcision. General Recommendation No. 19 (1992) dealt at some length with the problem of violence against women in general and specific terms, and General Recommendation No. 21 is concerned with equality in marriage and family relations.<sup>301</sup> In 1999, the Committee adopted a General Recommendation No. 24 on women and health. General Recommendation No. 25 was adopted in 2004 and concerned temporary special measures.<sup>302</sup>

The Committee, however, met only for one session of two weeks a year, which was clearly inadequate. This was increased to two sessions a year from 1997.<sup>303</sup> An Optional Protocol adopted in 1999 and in force as from December 2000 allows for the right of individual petition provided a number of conditions are met, including the requirement for the exhaustion of domestic remedies. In addition, the Protocol creates an inquiry procedure enabling the Committee to initiate inquiries into situations of grave or systematic violations of women's rights where it has received reliable information of grave or systematic violations by a state party of rights established in the Convention.<sup>304</sup> In recent years, the importance of women's rights

has received greater recognition. The Vienna Declaration and Programme of Action adopted in 1993 emphasised that the human rights of women should be brought into the mainstream of UN system-wide activity and that women's rights should be regularly and systematically addressed throughout the UN bodies and mechanisms.<sup>305</sup> In the light of this, the fifth meeting of Chairpersons of Human Rights Treaty Bodies in 1994 agreed that the enjoyment of the human rights of women by each treaty body within the competence of its mandate should be closely monitored. Each of the treaty bodies took steps to examine its guidelines with this in mind.<sup>306</sup> It should also be noted, for example, that the Special Rapporteur on Torture was called upon by the Commission on Human Rights in 1994 to examine questions concerning torture directed disproportionately or primarily against women.<sup>307</sup> In addition, the General Assembly adopted a Declaration on the Elimination of Violence Against Women in February 1994,<sup>308</sup> and a Special Rapporteur on Violence against Women, its Causes and Consequences was appointed in 1994.<sup>309</sup> The International Labour Organization established the promotion of equality of opportunity and treatment of men and women in employment as a priority item in its programme and budget for 1994/5.<sup>310</sup> The Committee on the Rights of the Child has also discussed the issue of the 'girl-child' and the question of child prostitution.<sup>311</sup>

## **The Committee Against Torture<sup>312</sup>**

The prohibition of torture is contained in a wide variety of human rights<sup>313</sup> and humanitarian law treaties,<sup>314</sup> and has become part of customary international law. Indeed it is now established as a norm of *jus cogens*.<sup>315</sup> Issues concerning torture have come before a number of human rights organs, such as the Human Rights Committee,<sup>316</sup> the European Court of Human Rights<sup>317</sup> and the International Criminal Tribunal on the Former Yugoslavia.<sup>318</sup>

The Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment was signed on 10 December 1984 and entered into force in 1987. It built particularly upon the Declaration on the Protection of All Persons from being subjected to Torture and Other Cruel, Inhuman and Degrading Treatment or Punishment adopted by the General Assembly in 1975.<sup>319</sup> Other relevant instruments preceding the Convention were the Standard Minimum Rules for the Treatment of Prisoners, 1955, the Code of Conduct for Law Enforcement Officers, 1979 (article 5) and the Principles of Medical Ethics, 1982 (Principles 1 and 2).<sup>320</sup>

Torture is defined in article 1 of the Convention against Torture to mean:

[a]ny act by which severe pain or suffering, whether physical or mental, is

intentionally inflicted on a person for such purposes as obtaining from him or a third person information or a confession, punishing him for an act he or a third person has committed or is suspected of having committed, or intimidating or coercing him or a third person, or for any reason based on discrimination of any kind, when such pain or suffering is inflicted by or at the instigation of or with the consent or the acquiescence of a public official or other person acting in an official capacity. It does not include pain or suffering arising only from, inherent in or incidental to lawful sanctions.

The states parties to the Convention are under duties *inter alia* to take measures to prevent such activities in territories under their jurisdiction (article 2), not to return a person to a country where he may be subjected to torture (article 3), to make torture a criminal offence and establish jurisdiction over it (articles 4 and 5),<sup>321</sup> to prosecute or extradite persons charged with torture (article 7) and to provide a remedy for persons tortured (article 14).

The Committee against Torture was established under Part II of the Convention against Torture, 1984 and commenced work in 1987. It consists of ten independent experts. In an interesting comment on the proliferation of international human rights committees and the dangers of inconsistencies developing, article 17(2) provides that in nominating experts, states parties should 'bear in mind the usefulness of nominating persons who are also members of the Human Rights Committee'.

The Committee receives states' reports (article 19), has an inter-state complaint competence (article 21) and may hear individual communications (article 22). In both the latter cases, it is necessary that the state or states concerned should have made a declaration accepting the competence of the Committee.<sup>322</sup> Article 20 of the Convention provides that if the Committee receives 'reliable evidence' that torture is being systematically practised in the territory of a state party, it may invite the state in question to co-operate in examining the evidence. The Committee may designate one or more of its members to make a confidential inquiry. In doing so, it shall seek the co-operation of the state concerned and, with the latter's agreement, such an inquiry may include a visit to its territory. The Committee will transmit the findings of the inquiry to the state, together with appropriate comments or suggestions. The proceedings up to this point are to be confidential, but the Committee may, after consulting the state, decide to include a summary account of the results in its annual report. This additional, if cautiously phrased, power may provide the Committee with a significant role.<sup>323</sup> It should be noted that states parties have the ability to 'opt out' of this procedure if they so wish at the time of signature or ratification, or accession.<sup>324</sup>

The conduct of the reporting procedure bears much resemblance to the practice of

the UN Human Rights Committee.<sup>325</sup> Guidelines have been issued for states parties and the discussions with state representatives are held with a view to establishing a constructive dialogue. Many problems facing other treaty bodies also appear with regard to the Committee against Torture, for example, overdue reports and problems relating to implementation of the Convention generally. The Committee may also make comments on states' reports in the form of concluding observations<sup>326</sup> and may issue general comments.<sup>327</sup> Interim measures of protection may also be granted under Rule 108(1) and this is monitored by the rapporteurs for new complaints and interim measures.<sup>328</sup>

The first three cases before the Committee under article 22 were admissibility decisions concerning Argentinian legislation exempting junior military officers from liability for acts of torture committed during the 1976–83 period and its compatibility with the Torture Convention.<sup>329</sup> The Committee noted that there existed a general rule of international law obliging all states to take effective measures to prevent and punish acts of torture. However, the Convention took effect only from its date of entry (26 June 1987) and could not be applied retroactively to cover the enactment of legislation prior to that date.<sup>330</sup> Therefore, the communications were inadmissible. However, the Committee did criticise the Argentinian legislation and stated that Argentina was morally bound to provide a remedy to the victims of torture.<sup>331</sup> In May 2002, the Committee revised its rules of procedure and established the function of a Rapporteur for follow-up of decisions on complaints submitted under article 22.<sup>332</sup> The Committee has held that where substantial grounds exist for believing that the applicant would be in danger of being subjected to torture, the expulsion or return of the applicant by the state party concerned to the state in which he might be tortured would constitute a violation of article 3 of the Convention.<sup>333</sup> The Committee has also emphasised that the risk of torture must be assessed on grounds that go beyond mere theory or suspicion. The risk need not be highly probable, but it must be personal and present. While the Committee does give considerable weight to findings of fact made by the organs of the state party concerned, it is not bound by these and has the power of free assessment of the facts arising in the circumstances of each case. It has been particularly underlined that the prohibition enshrined in article 3 of the Convention was an absolute one.<sup>334</sup> It has also been noted that where complaints of torture are made during court proceedings, it is desirable that they be elucidated by means of independent proceedings.<sup>335</sup> A complaint must be submitted by the alleged victim, or by a close relative or a duly authorised representative, and must first be declared admissible. Requirements include that the matter must not be before another tribunal, that domestic remedies have been exhausted and that the complaint must reach a 'basic level of substantiation'.<sup>336</sup>

An Optional Protocol to the Convention to enable the Committee through a new Subcommittee on Prevention to conduct regular visits to places of detention and make recommendations to states parties was adopted by the General Assembly in December 2002 and came into force in 2006. Under the Protocol, states parties must establish a ‘national preventive mechanism’ for the prevention of torture at the domestic level. Visits by the Subcommittee and the national preventive mechanism to any place under the state party’s jurisdiction and control where persons are, or may be, deprived of their liberty must be permitted by the state concerned.<sup>337</sup>

In 1985, the United Nations Commission on Human Rights appointed a Special Rapporteur on Torture to examine questions relevant to torture and to seek and receive credible and reliable information on such questions and to respond to that information without delay.<sup>338</sup> The work of the rapporteur includes the sending of urgent appeals and an increasing number of country visits. He is directed to cooperate closely with the Committee against Torture.<sup>339</sup> The rapporteur also works with other UN officials. In 1994, for example, the rapporteur accompanied the Special Rapporteur on Rwanda on a visit to that country, while later that year the rapporteur accompanied the Special Rapporteur on Extrajudicial, Summary or Arbitrary Executions on a visit to Colombia.<sup>340</sup> The rapporteur produces an annual report.<sup>341</sup>

## **The Committee on the Rights of the Child<sup>342</sup>**

The Convention on the Rights of the Child was adopted by the General Assembly on 20 November 1989.<sup>343</sup> It provides that in all actions concerning children, the best interests of the child shall be a primary consideration. A variety of rights are stipulated, including the inherent right to life (article 6); the right to a name and to acquire a nationality (article 7); the right to freedom of expression (article 13); the right to freedom of thought, conscience and religion (article 14); the right not to be subjected to arbitrary or unlawful interference with privacy, family, home or correspondence and the right to the enjoyment of the highest attainable standard of health (article 24).

States parties agree to take all appropriate measures to protect the child from all forms of physical and mental violence (article 19) and from economic exploitation (article 32) and the illicit use of drugs (article 33), and there are specific provisions relating to refugees and disabled children. In addition, states parties agree to respect the rules of international humanitarian law applicable to armed conflicts relevant to children (article 38). This provision was one response to the use of children in the Iran–Iraq war.

Article 43 of the Convention on the Rights of the Child provides for the establishment of a Committee. This Committee, which was elected in 1991, was originally composed of ten independent experts<sup>344</sup> and has the competence to hear states' reports (article 44). The Committee itself submits reports every two years to the General Assembly through ECOSOC. The Committee can recommend to the General Assembly that the Secretary-General be requested to undertake on its behalf studies on specific issues relating to the rights of the child, an innovation in the functions of such treaty bodies, and it can make suggestions and general recommendations (article 45). The Committee (like the Committee on Economic, Social and Cultural Rights) sets aside time for general discussions on particular topics in accordance with Rule 75 of its provisional rules of procedure. For example, at its second session in 1992, the Committee discussed the question of children in armed conflicts,<sup>345</sup> while at its fourth session, the problem of the economic exploitation of children was discussed.<sup>346</sup> A general discussion on the 'girl-child' was held at the eighth session of the Committee in 1995,<sup>347</sup> and one on the administration of juvenile justice at the ninth session.<sup>348</sup>

As part of the general reporting process, the Committee adopted an urgent action procedure at its second session. Provided that the state concerned has ratified the Convention, that the situation is serious and there is a risk of further violations, the Committee may send a communication to the state 'in a spirit of dialogue' and may request the provision of additional information or suggest a visit.<sup>349</sup> At its fourth session, the Committee established a working group to study ways and means whereby the urgent action procedure could be pursued effectively.<sup>350</sup> The Committee has produced a set of guidelines concerning states' reports<sup>351</sup> and a pre-session working group considers these reports and draws up a list of issues needing further clarification which is sent to the state concerned.<sup>352</sup> As is the case with other reporting mechanisms, the state whose report is being considered by the Committee is invited to send representatives to the appropriate meetings. After the process is completed, the Committee issues Concluding Observations in which both the positive aspects of the report considered and the problems identified are noted, together with suggestions and recommendations.<sup>353</sup> Various follow-up measures to the consideration of reports exist, but usually they consist of the request for the provision of further information.<sup>354</sup> The Committee also holds 'days of discussion' to examine relevant issues<sup>355</sup> and issues General Comments.<sup>356</sup> An Optional Protocol on a Communications Procedure was adopted in 2011, providing for the Committee to hear petitions by individuals or groups of individuals alleging a breach of the Convention or its two earlier protocols and inter-state complaints and an inquiry mechanism was created for grave or systematic violations.<sup>357</sup>

## **The Committee on the Protection of Migrant Workers**<sup>358</sup>

The International Convention on the Protection of the Rights of All Migrant Workers and Members of Their Families was adopted by the General Assembly and opened for signature in December 1990 and came into force on 1 April 2003. The Convention defines a migrant worker as ‘a person who is to be engaged, is engaged, or has been engaged in a remunerated activity in a state of which he or she is not a national’ (article 2). This includes, for example, frontier and seasonal workers, workers on offshore installations and specified-employment workers, but excludes employees of international organisations or official state employees abroad, refugees, stateless persons, students and workers on offshore installations who have not been admitted to take up residence and engage in a remunerated activity in the state of employment (article 3).

Migrant workers are entitled to equality of treatment with nationals in areas such as matters before courts and tribunals (article 18), terms of employment (article 25), freedom to join trades unions (article 26), medical treatment (article 28), access to education for their children (article 30) and respect for cultural identity (article 31). Migrant workers are protected from collective expulsion (article 22). Further provisions deal with additional rights for migrant workers and members of their families in a documented or regular situation (Part IV).

The Convention provided for the creation of a Committee of fourteen independent experts (Part VII). States parties are required to provide reports on measures taken to give effect to the provisions of the Convention (article 73). An inter-state complaints procedure is provided for in article 76, on the condition that the states concerned have made a declaration expressly recognising the competence of the Committee to hear such complaints, while under article 77 an individual complaints procedure can be used with regard to states that have made a declaration recognising the competence of the Committee in this regard.<sup>359</sup>

## **The Committee on the Rights of Persons with Disabilities**<sup>360</sup>

The Convention on the Rights of Persons with Disabilities was adopted in December 2006 and came into force on 3 May 2008. The Convention provides for the prohibition of discrimination against persons with disability and for equality of opportunity and accessibility. States parties are to undertake immediate, effective and appropriate measures to raise awareness and combat prejudices and harmful practices (articles 5–9). A twelve-person Committee is provided for to examine

states' reports on measures taken to give effect to the obligations under the Convention (articles 34–6). States parties to the Optional Protocol, which also came into force on 3 May 2008, recognise the competence of the Committee to hear individual communications alleging a violation of the Convention against them. Further, where the Committee receives reliable information indicating grave or systematic violations by a state party of Convention rights, the Committee may invite the state to co-operate in the examination of the information and submit observations. The Committee may proceed to conduct an inquiry confidentially. A state party may, however, on signature or ratification of the Optional Protocol, declare that it does not accept the inquiry competence of the Committee.

## **The Committee on Enforced Disappearances**<sup>361</sup>

The Convention for the Protection of All Persons from Enforced Disappearance was adopted in December 2006 and entered into force on 23 December 2010. It requires states parties to make enforced disappearance, defined as the deprivation of liberty by agents of the state or persons acting with the support or acquiescence of the state coupled with the refusal to acknowledge the deprivation of liberty or concealment of the fate of the person in question (article 2), a criminal law offence (article 4). It is stated to be a crime against humanity (article 5). A ten-person Committee on Enforced Disappearances is provided for to examine states' reports on measures taken to give effect to the obligations under the Convention (article 29), to hear inter-state complaints (article 32) and to hear individual communications (article 31). The Committee may also, upon receiving a request for urgent action, transmit a request to the state party concerned to take interim measures to locate and protect the person in question (article 30). Where the Committee receives reliable information indicating a serious violation, it may seek, in consultation with the state party concerned, to organise a visit (article 33). Further, where the Committee receives information appearing to contain well-founded indications that enforced disappearance is being practised on a widespread or systematic basis in the territory under the jurisdiction of a state party, it may, after seeking information from the state, urgently bring the matter to the attention of the General Assembly through the Secretary-General (article 34).

## **Conclusions**

Most international human rights conventions obligate states parties to take certain measures with regard to the provisions contained therein, whether by domestic legislation or otherwise.<sup>362</sup> In addition, all nine of the treaty bodies (plus the Committee on Economic, Social and Cultural Rights) discussed above require states

parties to make periodic reports.<sup>363</sup> Nine have the competence to consider individual communications,<sup>364</sup> seven may consider inter-state complaints,<sup>365</sup> while six have the competence to inquire into allegations of grave or systematic violations.<sup>366</sup>

The proliferation of committees raises problems concerned both with resources and with consistency.<sup>367</sup> The question of resources is a serious and ongoing difficulty. The Vienna Declaration and Programme of Action, 1993 emphasised the necessity for a substantial increase in the resources for the human rights programme of the UN and particularly called for sufficient funding to be made available to the UN Centre for Human Rights, which *inter alia* provides the administrative support for the human rights organs and committees discussed in this chapter.<sup>368</sup> The various human rights committees themselves have pointed to the resource problem.<sup>369</sup> The Committee on the Elimination of Racial Discrimination and the Committee against Torture changed their financing system so that, since January 1994, they have been financed under the regular budget of the United Nations.<sup>370</sup> The Committee on Economic, Social and Cultural Rights sought additional resources from the Economic and Social Council.<sup>371</sup> Nevertheless, the fact remains that human rights activity within the UN system is seriously underfunded.

The question of consistency in view of the increasing number of human rights bodies within the UN system has been partially addressed by the establishment of an annual system of meetings between the chairpersons of the treaty bodies.<sup>372</sup> Issues of concern have been discussed, ranging from the need to encourage states to ratify all human rights treaties, concern about reservations made to human rights treaties,<sup>373</sup> attempts to establish that successor states are automatically bound by obligations under international human rights treaties from the date of independence irrespective of confirmation,<sup>374</sup> the formulation of new norms and instruments and the promotion of human rights education, to consideration of the continuing problem of overdue reports<sup>375</sup> and the role of nongovernmental organisations.<sup>376</sup> The development of early warning and preventive procedures by the committees is to be particularly noted.<sup>377</sup> The Committee on the Elimination of Racial Discrimination, for example, under its urgent procedures may, since 1994, review the human rights situation in states parties that give rise for especial concern,<sup>378</sup> while the Human Rights Committee is able to request states parties to submit special urgent reports.<sup>379</sup>

A continuing process of seeking to strengthen the human rights treaty bodies is underway.<sup>380</sup>

## **The specialised agencies**

## The International Labour Organization<sup>381</sup>

The ILO was created in 1919 and expanded in 1946.<sup>382</sup> The Declaration of Philadelphia of 1944 (which was incorporated in the ILO constitution in 1946) reaffirmed the basic principles of the organisation. These are (a) that labour is not a commodity, (b) that freedom of expression and of association are essential to sustained progress and (c) that poverty anywhere constitutes a danger to prosperity everywhere. The ILO is composed of a unique tripartite structure involving governments, workers and employers and consists of three organs: a General Conference of representatives of member states (the International Labour Conference), the Governing Body and the International Labour Office.<sup>383</sup> The ILO constitution enables the organisation to examine and elaborate international labour standards, whether Conventions or Recommendations. The former are the more formal method of dealing with important matters, while the latter consist basically of guidelines for legislation. Between 1919 and 1994, 175 Conventions and 182 Recommendations were adopted by the ILO, all dealing basically with issues of social justice.<sup>384</sup> Under article 19 of the ILO constitution, all members must submit Conventions and Recommendations to their competent national authorities within twelve to eighteen months of adoption. Under article 22, states which have ratified Conventions are obligated to make annual reports on measures taken to give effect to them to the International Labour Office.<sup>385</sup> Under article 19, members must also submit reports regarding both unratified Conventions and Recommendations to the Director-General of the International Labour Office at appropriate intervals as requested by the Governing Body, concerning the position of their law and practice in regard to the matters dealt with in the Convention or Recommendation and showing the extent to which effect has been given or is proposed to be given to the provisions of the Convention or Recommendation, including a statement of the difficulties which prevent or delay ratification of the Convention concerned.<sup>386</sup> In 1926–7, a Committee of Experts on the Application of Conventions and Recommendations was established to consider reports submitted by member states. The comments of the twenty-member Committee, appointed by the Governing Body on the suggestion of the Director-General of the International Labour Office, on ratified Conventions take the form of ‘observations’ included in the printed report of the Committee in the case of more important issues, or ‘requests’ to the government concerned for information, which are not published in the report of the Committee. In the case of unratified Conventions and Recommendations, a ‘general survey’ of the application of the particular instrument in question is carried out.<sup>387</sup> A Committee on the Application of Conventions and Recommendations of the International Labour Conference is appointed at each of its annual sessions, composed of tripartite representatives to discuss relevant issues based primarily

upon the general report of the Committee of Experts.<sup>388</sup> It may also draw up a 'Special List' of cases to be drawn to the attention of the Conference.

Two types of procedure exist. Under articles 24 and 25, a representation may be made by employers' or workers' organisations to the Office to the effect that any of the members have failed to secure the effective observation of any Convention to which it is a party. If deemed receivable by the Governing Body, the matter is examined first by a committee of three of the Governing Body then by the Governing Body itself. States are invited to reply and both the original representation and the reply (if any) may be publicised by the Governing Body. There have not been many representations of this kind.<sup>389</sup> Under articles 26–9 and 31–3 any member may file a complaint against another member state that the effective observance of a ratified Convention has not been secured. The Governing Body may call for a reply by the object state or establish a commission of inquiry. Such a commission is normally composed of three experts and the procedure adopted is of a judicial nature. Recourse may be had by the parties to the International Court of Justice. Ultimately the Governing Body may recommend to the Conference such action as it considers wise and expedient. The complaints procedure was first used by Ghana against Portugal regarding the Abolition of Forced Labour Convention, 1957 in its African territories.<sup>390</sup>

A special procedure regarding freedom of association was established in 1951, with a Committee on Freedom of Association which examines a wide range of complaints. It consists of nine members (three from each of the tripartite elements in the ILO). The Committee submits detailed reports to the Governing Body with proposed conclusions and suggested recommendations to be made to the state concerned, and a considerable case-law has been built up.<sup>391</sup> A Fact-finding and Conciliation Commission has been created for more serious and politically delicate cases which operates with the consent of the state concerned. Accordingly, few questions have been dealt with,<sup>392</sup> although in 1992 a visit was made to South Africa and recommendations made to the ILO and ECOSOC. The government of that country sent a response to the Director-General of the ILO and, at the request of ECOSOC, the ILO Committee on Freedom of Association examined South Africa's report in 1994. The Committee's report, noting changes taking place in that country, was approved by the Governing Body and transmitted to ECOSOC.<sup>393</sup> In addition, a system of 'direct contacts' has been instituted, consisting of personal visits by ILO officials, or independent persons named by the Director-General, in order to assist in overcoming particular difficulties. These have included, for example, questions regarding freedom of association in Argentina in 1990 and the situation of Haitian workers on sugar plantations in the Dominican Republic in 1991.<sup>394</sup>

## The United Nations Educational, Scientific and Cultural Organization<sup>395</sup>

UNESCO came into being in November 1946 and was brought into relationship with the UN on 14 December that year.<sup>396</sup> The aim of the organisation, proclaimed in article 1 of its constitution, is to contribute to peace and security by promoting collaboration through education, science and culture ‘in order to further universal respect for justice, for the rule of law and for the human rights and fundamental freedoms which are affirmed for the peoples of the world’. The organisation consists of a General Conference which meets every two years and in which all member states are represented, an Executive Board, elected by the conference, and a secretariat headed by a Director-General. Under article 4(4), member states undertake to submit Conventions and Resolutions to the competent national authorities within a year of adoption and may be required to submit reports on action taken.<sup>397</sup> Unlike the ILO, UNESCO has no constitution provision for reviewing complaints concerning the implementation of conventions procedure. However, in 1962 a Protocol instituting a Conciliation and Good Offices Commission was adopted to help resolve disputes arising between states parties to the 1960 Convention against Discrimination in Education. It entered into force in 1968 and the first meeting of the eleven-member Commission was in 1971. It aims to make available its good offices in order to reach a friendly settlement between the states parties to the convention in question. In 1978 the Executive Board of UNESCO adopted decision 104 EX/3.3, by which it established a procedure to handle individual communications alleging violations of human rights. Ten conditions for admissibility are laid down, including the requirement that the human rights violated must fall within UNESCO’s competence in the fields of education, science, culture and information, and the need for the communication to be compatible with international human rights interests. The condition with regard to domestic remedies is rather different than is the case with other human rights organs, in that all the communication needs to do is to ‘indicate whether an attempt has been made to exhaust domestic remedies...and the result of such an attempt, if any’. The investigating body is the Executive Board’s Committee on Conventions and Recommendations, which is composed of twenty-four members and normally meets twice a year in private session.<sup>398</sup> The examination of communications is confidential. The Committee decides whether a communication is admissible and then makes a decision on the merits. The task of the Committee is to reach a ‘friendly solution designed to advance the promotion of the human rights falling within UNESCO’s fields of competence’.<sup>399</sup> Confidential reports are submitted to the Executive Board each session, which contain appropriate information plus recommendations.<sup>400</sup> It is also to be noted that under this procedure the Director-

General generally has a role in seeking to strengthen the action of UNESCO in promoting human rights and initiating consultations in confidence to help reach solutions to particular human rights problems.<sup>401</sup> UNESCO published a report in 1993 concerning the operations of the procedure, noting that the Committee had examined 414 cases between 1978 and 1993, of which it settled 241 individual cases.<sup>402</sup> It is unclear how successful the procedure has been, in view of the strict confidentiality which binds it,<sup>403</sup> the length of time taken to produce results and the high proportion of cases declared inadmissible.<sup>404</sup>

A special procedure to deal with disappeared persons has been established by the Committee. Communications dealing with such persons are placed on a Special List, if insufficient information is forthcoming from the government in question, and examined by the Committee.<sup>405</sup> In addition to *cases* concerning violations of human rights which are individual and specific, UNESCO may also examine *questions* of massive, systematic or flagrant violations of human rights resulting either from a policy contrary to human rights applied by a state or from an accumulation of individual cases forming a consistent pattern.<sup>406</sup> In the instance of such *questions*, the issue is to be discussed by the Executive Board of the General Conference in public.<sup>407</sup>

<sup>92</sup> See further below, chapter 8, pp. 289 ff.

<sup>93</sup> See further generally below, chapter 14.

<sup>94</sup> ICJ Reports, 1993, pp. 3, 16 and 23; 95 ILR, pp. 1, 31. See also R. Maison, 'Les Ordonnances de la CIJ dans l'Affaire Relative à l'Application de la Convention sur la Prévention et la Répression du Crime du Génocide', 5 EJIL, 1994, p. 381.

<sup>95</sup> ICJ Reports, 1951, pp. 15, 23; 18 ILR, pp. 364, 370, quoting the terms of General Assembly resolution 96 (I) of 11 December 1946.

<sup>96</sup> The government of Yugoslavia (Serbia and Montenegro) was requested to take all measures within its power to prevent commission of the crime of genocide, and was specifically called upon to ensure that 'any military, paramilitary or irregular armed units which may be directed or supported by it, as well as any organisations and persons which may be subject to its control, direction or influence, do not commit any acts of genocide', ICJ Reports, 1993, pp. 3, 24; 95 ILR, pp. 1, 39. These provisional measures were reaffirmed by the Court in its Order on Provisional Measures of 13 September 1993 as measures which should be 'immediately and effectively implemented', ICJ Reports, 1993, pp. 325, 350; 95 ILR, pp. 43, 68. See also the Separate Opinion of Judge Lauterpacht, ICJ Reports, 1993, pp. 407, 431–2; 95 ILR, pp. 125, 149–50. Yugoslavia introduced an application in April 2001 for revision of the 1996 judgment on the basis that a 'new fact' had appeared since that state had become a new member of the UN during 2000. This was rejected by the Court, ICJ Reports, 2003, p. 7. See further below, chapter 19.

<sup>97</sup> Now so called, rather than the former Yugoslavia (Serbia and Montenegro), as from, and in consequence of, the Dayton Peace Agreement initialled at Dayton, USA, on 11 November 1995 and signed in Paris on 14 December 1995.

<sup>98</sup> ICJ Reports, 1996, pp. 595, 615; 115 ILR, p. 1.

<sup>99</sup> ICJ Reports, 1996, pp. 595, 616.

<sup>100</sup> *Ibid.*, p. 617. See also the *Legality of the Threat or Use of Nuclear Weapons*, ICJ Reports, 1996, pp. 226, 240; 110 ILR, p. 163. Yugoslavia subsequently withdrew the counter-claims it had introduced against Bosnia, ICJ, Order of 10 September 2001.

<sup>101</sup> ICJ Reports, 2007, pp. 43, 110–14. See also *Democratic Republic of the Congo v. Rwanda*, ICJ Reports, 2006, pp. 6, 31–2, where the Court noted that the rights and obligations in the Genocide Convention were rights and obligations *erga omnes* and stated that the prohibition of genocide was ‘assuredly’ a norm of *jus cogens*.

<sup>102</sup> ICJ Reports, 2007, pp. 43, 119–20.

<sup>103</sup> *Ibid.*, p. 120.

<sup>104</sup> *Ibid.*, pp. 124–5.

<sup>105</sup> *Ibid.*, pp. 126–7.

<sup>106</sup> *Ibid.*, pp. 128–9 and see also p. 175. The Court, however, was not convinced, on the basis of the evidence before it, that it had been conclusively established that the massive killings of members of the protected group were committed with the specific intent (*dolus specialis*) on the part of the perpetrators to destroy, in whole or in part, the group as such, *ibid.*, p. 155, nor that deportations and expulsions of the protected group amounted to genocide for the same reason, *ibid.*, p. 181–2, nor indeed the imposition of terrible conditions on camp detainees and other allegations, *ibid.*, pp. 190, 194–5 and 198. The exception to this was with regard to Srebrenica, where the Court found that the necessary intent had been established to the required standard of proof, pp. 155–66.

<sup>107</sup> *Ibid.*, pp. 219–20.

<sup>108</sup> *Ibid.*, p. 221.

<sup>109</sup> *Ibid.*, pp. 221–2.

<sup>110</sup> *Ibid.*

<sup>111</sup> *Ibid.*, p. 229.

<sup>219</sup> See Alston, ‘The Economic Rights Committee’, p. 474.

<sup>220</sup> See e.g. E/C.12/1994/20, p. 18.

<sup>221</sup> *Ibid.*, pp. 16–18.

<sup>222</sup> See HRI/GEN/Rev.1, p. 45.

<sup>223</sup> *Ibid.*, p. 48. Further general comments have discussed the right to adequate housing (General Comment 4, 1991); the rights of persons with disabilities (General Comment 5, 1994); the economic, social and cultural rights of older persons (General Comments 6, 1995); equal treatment of economic, social and cultural rights (General Comment 16, 2005); and the right to work and social security (General Comments 18, 2005 and 19, 2006). General Comment 21 (2009) discussed the right of everyone to take part in cultural right.

<sup>224</sup> At the ninth session, for example, in the autumn of 1993, the Committee discussed the right to health, E/1994/23, p. 56, while at the tenth session in May 1994 the role of social safety-nets as a means of protecting economic, social and cultural rights was discussed: see E/1995/22, p. 70. In 2010, the Committee discussed the right to sexual and reproductive health, E/C.12/2010/SR.49 and 50. See also generally C. Dommen, ‘Building from a Solid Basis: The Fourth Session of the Committee on Economic, Social and Cultural Rights’, 8 NQHR, 1990, p. 199, and C. Dommen and M. C. Craven, ‘Making Way for Substance: The Fifth Session of the Committee on Economic, Social and Cultural Rights’, 9 NQHR, 1991, p. 93.

<sup>225</sup> A/63/435. The Optional Protocol came into force on 5 May 2013.

<sup>226</sup> See e.g. Alston and Crawford, *Future*, and S. Lewis-Anthony and M. Scheinin, ‘Treaty-Based Procedures for Making Human Rights Complaints Within the UN System’ in Hannum, *Guide to International Human Rights Practice*, p. 43. See also M. O’Flaherty, *Human Rights and the UN: Practice Before the Treaty Bodies*, 2nd edn, The Hague, 2002.

<sup>227</sup> This link with the Secretariat has been termed ambiguous, particularly in the light of the difficulties in performing the two functions carried out by the Secretariat (Charter-based political activities and expert activities): see e.g. T. Opsahl, ‘The Human Rights Committee’ in Alston, *United Nations and Human Rights*, pp. 367, 388.

**228** See e.g. M. Banton, ‘Decision-Taking in the Committee on the Elimination of Racial Discrimination’ in Alston and Crawford, *Future*, p. 55; K. J. Partsch, ‘The Committee on the Elimination of Racial Discrimination’ in Alston, *United Nations and Human Rights*, p. 339; T. Meron, *Human Rights Law-Making in the United Nations*, Oxford, 1986, chapter 1; K. Das, ‘The International Convention on the Elimination of All Forms of Racial Discrimination’ in *The International Dimension of Human Rights* (eds. K. Vasak and P. Alston), Paris, 1982, p. 307; Lerner, *UN Convention* and ‘Curbing Racial Discrimination – Fifteen Years CERD’, 13 *Israel Yearbook on Human Rights*, 1983, p. 170; M. R. Burrowes, ‘Implementing the UN Racial Convention – Some Procedural Aspects’, 7 *Australian YIL*, p. 236, and T. Buergenthal, ‘Implementing the UN Racial Convention’, 12 *Texas International Law Journal*, 1977, p. 187.

**229** Rules of Procedure have been adopted, see CERD/C/35/Rev. 3 (1986), and are revised from time to time: see, for example, A/48/18, p. 137.

**230** Articles 8 and 9 of the Convention.

**231** A/48/18, paras. 496–506. For example, in 1993, the Committee, concerned at events in the former Yugoslavia, sought additional information on the implementation of the Convention as a matter of urgency, See e.g. CERD/C/248/Add.1 (Federal Republic of Yugoslavia); CERD/C/249/Add.1 (Croatia) and CERD/C/247/Add.1 (Bosnia and Herzegovina). See also CERD/C/65/DEC.1 (Darfur, 2004); CERD/C/66/DAR/Dec.2 (Darfur, 2005); CERD/C/DEC/1 (USA, 2006); and CERD/C/DEC/SUR/5 (Suriname, 2006). Revised Guidelines were adopted in 2007, see A/62/18, Annexes, Chapter III.

**232** See e.g. A/48/18, p. 20.

**233** See e.g. A/57/18, p. 99.

**234** Article 13.

**235** The provision entered into force on 31 December 1982 upon the tenth declaration.

<sup>236</sup> See e.g. the Report of the Committee for its forty-eighth session, A/48/18, 1994, pp. 105 and 130, and for the sixtieth and sixty-first sessions, A/57/18, p. 128. Note, for example, the case of *Durmic v. Serbia and Montenegro* concerning discrimination against Roma in Serbia, CERD/C/68/D/29/2003, 2006.

<sup>237</sup> For example, the decision adopted on 19 March 1993 requesting the governments of the Federal Republic of Yugoslavia (Serbia and Montenegro) and Croatia to submit further information concerning implementation of the Convention: see A/48/18, p. 112.

<sup>238</sup> See, for example, General Recommendation XII (42) encouraging successor states to declare that ‘they continue to be bound’ by the obligations of the Convention if predecessor states were parties to it; General Recommendation XIV (42) concerning non-discrimination, A/48/18, pp. 113 ff. and General Recommendation XXIX concerning discrimination based upon descent, A/57/18, p. 111.

<sup>239</sup> See e.g. Lerner, *UN Convention*.

<sup>240</sup> Article 15. See e.g. A/48/18, p. 107.

<sup>241</sup> See e.g. A/38/18, pp. 14–24. Note, for example, that by late 1983 fifteen reminders had been sent to Swaziland requesting it to submit its fourth, fifth, sixth and seventh overdue periodic reports, *ibid.*, p. 21. See also A/44/18, pp. 10–16.

<sup>242</sup> See CERD/C/70/Rev.1, 6 December 1983.

<sup>243</sup> See e.g. A/44/18, 1990, p. 7 and A/48/18, 1994, p. 149.

<sup>244</sup> A/44/18, p. 91.

<sup>245</sup> See e.g. Rehman, *International Human Rights Law*, chapter 5; Joseph *et al.*, *International Covenant*; Nowak, *UN Covenant*; Steiner, Alston and Goodman, *International Human Rights*, pp. 844 ff.; McGoldrick, *Human Rights Committee*; Opsahl, ‘Human Rights Committee’, p. 367; D. Fischer, ‘Reporting under the

Convention on Civil and Political Rights: The First Five Years of the Human Rights Committee', 76 AJIL, 1982, p. 142; Ramcharan, 'Implementing the International Covenants'; E. Schwelb, 'The International Measures of Implementation of the International Covenant on Civil and Political Rights and of the Optional Protocol', 12 *Texas International Law Review*, 1977, p. 141; M. Nowak, 'The Effectiveness of the International Covenant on Civil and Political Rights – Stock-taking after the First Eleven Sessions of the UN Human Rights Committee', 2 HRLJ, 1981, p. 168 and 5 HRLJ, 1984, p. 199. See also M. Bossuyt, *Guide to the Travaux Préparatoires of the International Covenant on Civil and Political Rights*, The Hague, 1987; and P. R. Gandhi, 'The Human Rights Committee and the Right of Individual Communication', 57 BYIL, 1986, p. 201. See also generally [www.ohchr.org/EN/HRBodies/CCPR/Pages/CCPRIndex.aspx](http://www.ohchr.org/EN/HRBodies/CCPR/Pages/CCPRIndex.aspx).

<sup>246</sup> See Rehman, *International Human Rights Law*, p. 83.

<sup>247</sup> See articles 28–32 of the Covenant.

<sup>248</sup> See e.g. Nowak, 'Effectiveness', p. 169, 1981 3 HRLJ, 1982, p. 209 and 1984, p. 202. See also A/36/40, annex VII, Introduction; CCPR/C/21/Rev.1 and A/44/40, p. 173.

<sup>249</sup> See article 40 and CCPR/C/5. Supplementary reports may be requested: see Rule 70(2) of the provisional rules of procedure, CCPR/C/3/Rev.1. See now the Rules of Procedure 2001, CCPR/C/3/Rev.6 and the revised consolidated guidelines 2001, CCPR/C/66/GUI/ Rev.2.

<sup>250</sup> See CCPR/C/18; CCPR/C/19 and CCPR/C/19/Rev.1. See also CCPR/C/20 regarding guidelines. Several states have been lax about producing reports, e.g. Zaire and the Dominican Republic, while the initial report of Guinea was so short as to be held by the Committee as not providing sufficient information: see Nowak, 'Effectiveness', 1984, p. 200.

<sup>251</sup> See Buergenthal, 'Implementing', pp. 199–201, and Fischer, 'Reporting', p. 145.

<sup>252</sup> Fischer, 'Reporting', pp. 146–7.

**253** Such documents may now be officially distributed, rather than being informally made available to Committee members individually: see McGoldrick, *Human Rights Committee*, p. liii.

**254** CCPR/C/SR/1178/Add.1.

**255** New Rule 66(2), see CCPR/C/SR/1205/Add.1. See also S. Joseph, ‘New Procedures Concerning the Human Rights Committee’s Examination of State Reports’, 13 NQHR, 1995, p. 5.

**256** See, with regard to former Yugoslavia, CCPR/C/SR.1178/Add.1, pp. 2–3 and CCPR/C/79/Add.14–16. See, with regard to the successor states of the USSR, CCPR/C/79/Add.38 (Azerbaijan). See also I. Boerefijn, ‘Towards a Strong System of Supervision’, 17 HRQ, 1995, p. 766.

<sup>268</sup> CCPR/C/21/Rev.1/Add.6. See further below, p. 662.

<sup>269</sup> A/53/40, annex VII.

<sup>270</sup> CCPR/C/21/Rev.1/Add.10, 2000. General Comment 29 adopted in 2001 dealt with the question of non-derogable provisions, see CCPR/C/21/Rev.1/Add.11. Note also General Comments 32 concerning the right to equality before courts and tribunals and to a fair trial, CCPR/C/GC/32, 2007; and 34 concerning freedom of opinion and expression, CCPR/C/GC/34, 2011.

<sup>271</sup> The inter-state procedure has not been used to date.

<sup>272</sup> Signed in 1966 and in force as from 23 March 1976. See e.g. H. Steiner, 'Individual Claims in a World of Massive Violations: What Role for the Human Rights Committee?' in Alston and Crawford, *Future*, p. 15; P. R. Ghandi, *The Human Rights Committee and the Right of Individual Communication: Law and Practice*, Aldershot, 1998; A. de Zayas, H. Möller and T. Opsahl, 'Application of the International Covenant on Civil and Political Rights under the Optional Protocol by

the Human Rights Committee’, 28 German YIL, 1985, p. 9, and *Selected Decisions of the Human Rights Committee under the Optional Protocol*, New York, vol. I, 1985 and vol. II, 1990. Two states (Jamaica and Trinidad and Tobago) have denounced the Protocol.

<sup>273</sup> Article 5, Optional Protocol.

<sup>274</sup> See Nowak, ‘Effectiveness’, 1980, pp. 153 ff., and 1981 Report of Human Rights Committee, A/36/40, pp. 85–91.

<sup>275</sup> Report of the Committee for 2005–6, A/61/40, para. 89 (2006).

<sup>276</sup> A/44/40, pp. 139–40. See also Rule 91 of the amended Rules of Procedure, *ibid.*, p. 180.

<sup>277</sup> *Ibid.*, p. 140.

<sup>278</sup> See, in particular, *Canepa v. Canada*, A/52/40, vol. II, annex VI, sect. K. See also *Ruzmetov v. Uzbekistan*, A/61/40, vol. II, p. 31 (2006) and *Boucherf v. Algeria*, *ibid.*, p. 312.

<sup>279</sup> A/49/40, pp. 70–1.

<sup>280</sup> See *Piandiong et al. v. The Philippines*, A/54/40, para. 420(b).

<sup>281</sup> Note that in October 1990, the Committee appointed a Special Rapporteur to follow up cases, CCPR/C/SR.1002, p. 8. See Rule 101 of the Rules of Procedure 2005. In 1994, the Committee decided that every form of publicity would be given to follow-up activities, including separate sections in annual reports, the issuing of annual press communiqués and the institution of such practices in a new rule of procedure (Rule 99) emphasising that follow-up activities were not confidential, A/49/40, pp. 84–6. See also A/56/40, vol. I, p. 131.

<sup>282</sup> These cases are reported in 1 HRLJ, 1980, pp. 209 ff. See, for other cases, 2 HRLJ, 1981, pp. 130 ff.; *ibid.*, pp. 340 ff.; 3 HRLJ, 1982, p. 188; 4 HRLJ, 1983, pp.

185 ff. and 5 HRLJ, 1984, pp. 191 ff. See also Annual Reports of the Human Rights Committee, 1981 to date.

<sup>283</sup> 1981 Report of the Human Rights Committee, A/36/40, p. 166.

<sup>284</sup> *Ibid.*, p. 134.

<sup>285</sup> See e.g. the *Waksman* case, 1 HRLJ, 1980, p. 220 and the *Lichtensztejn* case, 5 HRLJ, 1984, p. 207.

<sup>286</sup> A/44/40, p. 241 (1989).

<sup>287</sup> See e.g. *Thompson v. St Vincent and the Grenadines*, A/56/40, vol. II, annex X, sect. H, para. 8.2.

<sup>288</sup> See e.g. the *Berry, Hamilton, Grant, Currie* and *Champagnie* cases against Jamaica, A/49/40, vol. II, pp. 20, 37, 50, 73 and 136.

<sup>289</sup> See the *Ng* case, concerning extradition from Canada to the US. The Committee found that there was no evidence of such a risk, A/49/40, vol. II, p. 189.

<sup>290</sup> *Ibid.*

<sup>291</sup> *Ibid.*, p. 249.

<sup>292</sup> See e.g. *López Burgos v. Uruguay*, case no. 52/79, 68 ILR, p. 29, or *Lilian Celiberti de Casariego v. Uruguay*, case no. 56/79, 68 ILR, p. 41, concerning the activities of Uruguayan agents in Brazil and Argentina respectively.

<sup>293</sup> See e.g. CCPR/C/79/Add.93, para. 10 and CCPR/C0/78/1SR, para. 11 (concluding observations on Israel's reports). This approach was affirmed by the International Court of Justice in the *Construction of a Wall* case, ICJ Reports, 2004, pp. 136, 178–9; 129, ILR, pp. 37, 97–8.

**294** The second optional protocol aimed at the abolition of the death penalty was adopted in 1990, while the desirability of a third optional protocol to the Covenant, concerning the right to a fair trial and a remedy, has been considered by the Commission on Human Rights: see E/CN.4/Sub.2.1994/24, Sub-Commission resolution 1994/35 and Commission resolution 1994/107.

**295** See ECOSOC resolutions 1/5 (1946), 2/11 (1946) and 48 (IV) (1947). See also L. Reanda, 'The Commission on the Status of Women' in Alston, *United Nations and Human Rights*, p. 265. The mandate of the Commission was revised by ECOSOC resolutions 1987/22 and 1996/6. There is also an individual petition procedure by which complaints are considered by a Working Group on Communications which then reports to the Commission. The Commission in turn reports to ECOSOC.

**296** This came into force in 1981. See Rehman, *International Human Rights Law*, chapter 15; R. Jacobson, 'The Committee on the Elimination of Discrimination against Women' in Alston, *United Nations and Human Rights*, p. 444; A. Byrnes, 'The "Other" Human Rights Body: The Work of the Committee on the Elimination of Discrimination Against Women', 14 *Yale Journal of International Law*, 1989, p. 1; R. Cook, 'Women's International Human Rights Law', 15 HRQ, 1993, p. 230; *Human Rights of Women* (ed. R. Cook), Philadelphia, 1994; M. Freeman and A. Fraser, 'Women's Human Rights' in Herlin and Hargrove, *Human Rights: An Agenda for the Next Century*, p. 103; Steiner, Alston and Goodman, *International Human Rights*, pp. 175 and 541; J. Morsink, 'Women's Rights in the Universal Declaration', 13 HRQ, 1991, p. 229; H. Charlesworth and C. Chinkin, *The Boundaries of International Law: A Feminist Analysis*, Manchester, 2000, and M. Bustelo, 'The Committee on the Elimination of Discrimination against Women at the Crossroads' in Alston and Crawford, *Future*, p. 79.

**297** See articles 17–21 of the Convention and the first Report of the Committee, A/38/45, and *UN Chronicle*, November 1983, pp. 65–86.

**298** See CEDAW/C/7Rev.3 and with regard to reports submitted from 1 January 2003, [www.un.org/womenwatch/daw/cedaw/guidelines.PDF](http://www.un.org/womenwatch/daw/cedaw/guidelines.PDF).

**299** Article 21.

**300** A/43/38 (1988).

**301** HRI/GEN/1/Rev.1, 1994, pp. 72 ff.

**302** HRI/GEN/1/Rev.7, 2004, p. 282. General Recommendation 28 concerned the core obligations under the Convention, CEDAW/C/GC/28, 2010, while General Recommendation 29 dealt with the economic consequences of marriage, family relations and dissolution, CEDAW/C/GC/29, 2013.

**303** Although the Committee met exceptionally for three sessions during 2002 to deal with backlog reports. However, see General Assembly resolution 60/230 concerning the extension of meeting time in 2005 and 2006.

**304** Article 8 of the Optional Protocol. See, for example, for an earlier view, R. Cook, 'The Elimination of Sexual Apartheid: Prospects for the Fourth World Conference on Women', *ASIL Issue Papers on World Conferences*, Washington, 1995, pp. 48 ff.

**305** See Part II, Section 3, 32 ILM, 1993, p. 1678. See also the Beijing Conference 1995, Cook, 'Elimination of Sexual Apartheid'; the Beijing plus 5 process, see General Assembly resolution 55/71. In 2000, the General Assembly adopted resolution S-23/3 containing a Political Declaration and a statement on further actions and initiatives to implement the Beijing Declaration and Platform for Action.

**306** See HRI/MC/1995/2. See also the Report of the Expert Group Meeting on the Development of Guidelines for the Integration of Gender Perspectives into Human Rights Activities and Programmes, E/CN.4/1996/105, 1995. This called *inter alia* for the use of gender-inclusive language in human rights instruments and standards, the identification, collection and use of gender-disaggregated data, gender-sensitive interpretation of human rights mechanisms and education and the promotion of a system-wide co-ordination and collaboration on the human rights of women within the UN.

**307** See resolution 1994/37. See also the Report of the Special Rapporteur of January 1995, E/CN.4/1995/34, p. 8.

<sup>352</sup> See e.g. CRC/C/121, 2002.

<sup>353</sup> See e.g. A/49/41, pp. 20 ff.; CRC/C/38, pp. 10 ff. and CRC/C/43, pp. 10 ff. See also CRC/C/121, 2002, pp. 8 ff.

<sup>354</sup> See e.g. CRC/C/27/Rev.3, 1995 detailing such measures up to mid-1995.

<sup>355</sup> See e.g. the day of discussion on 'The private sector as service provider and its role in implementing child rights' held in September 2002, CRC/C/121, p. 145.

**356** *Ibid.*, p. 159 (on ‘The role of national human rights institutions in promoting and protecting children’s rights’). In 2007, the Committee adopted General Comment No. 10 on the rights of children in juvenile justice.

**357** See above footnotes [345] and [347] for the two earlier protocols. The Optional Protocol on Communications will come into force three months after the tenth ratification.

**358** See e.g. Rehman, *International Human Rights Law*, chapter 19; K. Samson, ‘Human Rights Co-ordination within the UN System’ in Alston, *United Nations and Human Rights*, pp. 620, 641 ff.; S. Hune and J. Niessen, ‘Ratifying the UN Migrant Workers Convention: Current Difficulties and Prospects’, 12 NQHR, 1994, p. 393, and S. Hune and J. Niessen, ‘The First UN Convention on Migrant Workers’, 9 NQHR, 1991, p. 133. See generally <http://www.ohchr.org/EN/HRBodies/CMW/Pages/CMWIndex.aspx>.

**359** See the Report of the Committee for 2006–7, A/62/48 (2007). This is not yet in force.

**360** See Rehman, *International Human Rights Law*, chapter 17 and A. Lawson, ‘The United Nations Convention on the Rights of Persons with Disabilities’, 34 *Syracuse Journal of International Law and Commerce*, 2007, p. 563. See also generally <http://www.ohchr.org/EN/HRBodies/CRPD/Pages/CRPDIndex.aspx>.

**361** See Rehman, *International Human Rights Law*, chapter 23 and S. McCrory, ‘The International Convention for the Protection of All Persons from Enforced Disappearance’, 7 *Human Rights Law Review*, 2007, p. 545. See also the report of its first two sessions, A/67/56, and generally [www.ohchr.org/EN/HRBodies/CED/Pages/CEDIndex.aspx](http://www.ohchr.org/EN/HRBodies/CED/Pages/CEDIndex.aspx).

**362** See e.g. article 2 of the Civil and Political Rights Covenant, 1966; article 1 of the European Convention on Human Rights, 1950; articles 1 and 2 of the American Convention on Human Rights, 1969; article 5 of the Genocide Convention, 1948; article 4 of the Convention on the Suppression and Punishment of the Crime of Apartheid, 1973 and article 3 of the Slavery Convention, 1926.

**363** See also article 7 of the Apartheid Convention, 1973. Several conventions provide for the communication of information to the UN Secretary-General: see e.g. article 33 of the Convention Relating to the Status of Stateless Persons, 1954 and articles 35 and 36 of the Convention Relating to the Status of Refugees, 1951.

**364** Although neither the Optional Protocol on Communications of the Convention on the Rights of the Child nor article 77 of the Migrant Workers Convention is yet in force.

**365** The Human Rights Committee, the Committee on the Elimination of Racial Discrimination, the Committee on Migrant Workers, the Committee against Torture, the Committee on Economic, Social and Cultural Rights, the Committee on Enforced Disappearances and the Committee on the Rights of the Child (although this provision is not yet in force).

**366** The Committee against Torture, the Committee on the Elimination of Discrimination against Women, the Committee on the Rights of Persons with Disabilities, the Committee on Enforced Disappearance, the Committee on Economic, Social and Cultural Rights and the Committee on the Rights of the Child (although this provision is not yet in force). Note the competence to visit under the Convention on Enforced Disappearance.

**367** See e.g. E. Tistounet, 'The Problem of Overlapping among Different Treaty Bodies' in Alston and Crawford, *Future*, p. 383.

**368** See Part II, Section A of the Vienna Declaration and Programme of Action, 32 ILM, 1993, pp. 1674–5.

**369** See e.g. the Human Rights Committee, A/49/44, and the Committee Against Torture, A/50/44. See also the Report of the Secretary-General to the sixth meeting of chairpersons of treaty bodies, HRI/MC/1995/2, p. 13.

**370** See General Assembly resolution 47/111 and HRI/MC/1995/2, p. 14.

**371** *Ibid.*, p. 15.

<sup>372</sup> See General Assembly resolution 49/178, 1994, which endorsed the recommendation of the chairpersons that the meetings be held annually. The first meeting of the chairpersons of treaty bodies was held in 1984, A/39/484 and the second in 1988, A/44/98. See also e.g. A/62/224 (2007). A working group on the harmonisation of working methods of the treaty bodies has been established, see e.g. HRI/MC/2006/3 and HRI/MC/2007/2. Note also that the first inter-committee meeting of the human rights treaty bodies took place in September 2002, HRI/ICM/2002/3.

<sup>373</sup> See further below, chapter 16, p. 668.

<sup>374</sup> See further below, chapter 17, p. 711.

<sup>375</sup> For example, the Committee on the Elimination of Racial Discrimination and the Committee on Economic, Social and Cultural Rights have established procedures enabling them to examine the situation in the state concerned: see above, pp. 224 and 222. Other Committees have sought to hold meetings with the officials of the states concerned in order to encourage submission of overdue reports, HRI/MC/1995/2, p. 7.

<sup>376</sup> See e.g. HRI/MC/1995.

<sup>377</sup> The role of the treaty bodies in seeking to prevent human rights violations has been emphasised: see e.g. A/47/628, para. 44.

<sup>378</sup> See above, p. 224.

<sup>379</sup> See above, p. 226. See also above, p. 238, with regard to the procedures of the Committee on the Rights of the Child.

<sup>380</sup> The UN Secretary-General in his report entitled 'In Larger Freedom' emphasised the need for streamlining procedures and called for the implementation of harmonised guidelines on reporting, A/59/2005 and A/59/2005/Add.3. The UN High Commissioner for Human Rights proposed at one stage for a unified standing treaty body, Concept Paper on the Proposal for a Unified Standing Treaty Body, HRI/MC/2006/2, 2006. However, this was not accepted. In June 2012, the High

Commissioner produced a report on the strengthening of the treaty body system (A/66/860). In 2012, an intergovernmental process was launched to strengthen and enhance the effective functioning of the treaty body system and the Ambassadors of Iceland and Indonesia appointed as Co-facilitators by the President of the General Assembly, see [www.ohchr.org/EN/HRBodies/HRTD/Pages/TBStrengthening.aspx](http://www.ohchr.org/EN/HRBodies/HRTD/Pages/TBStrengthening.aspx).

**381** See e.g. Weissbrodt, Fitzpatrick and Newman, *International Human Rights*, chapter 16; L. Betten, 'At its 75th Anniversary, the International Labour Organization Prepares Itself for an Active Future', 12 NQHR, 1994, p. 425; L. Swepston, 'Human Rights Complaints Procedures of the International Labour Organisation' in Hannum, *Guide to International Human Rights Practice*, p. 89; V. Leary, 'Lessons from the Experience of the International Labour Organization' in Alston, *United Nations and Human Rights*, p. 580; C. W. Jenks, 'Human Rights, Social Justice and Peace' in *The International Protection of Human Rights* (eds. A. Schou and A. Eide), Stockholm, 1968, p. 227, and *Social Justice in the Law of Nations*, Oxford, 1970; E. A. Landy, *The Effectiveness of International Supervision: Thirty Years of ILO Experience*, New York, 1966, and 'The Implementation Procedures of the International Labour Organization', 20 *Santa Clara Law Review*, 1980, p. 633; N. Valticos, 'The Role of the ILO: Present Action and Future Perspectives' in Ramcharan, *Human Rights: Thirty Years After the Universal Declaration*, p. 211, *Le Droit International du Travail*, Paris, 1980, and 'The International Labour Organization' in *The International Dimensions of Human Rights* (eds. K. Vasak and P. Alston), Paris, 1982, vol. I, p. 363; F. Wolf, 'ILO Experience in Implementation of Human Rights', 10 *Journal of International Law and Economics*, 1975, p. 599; J. M. Servais, 'ILO Standards on Freedom of Association and Their Implementation', 123 *International Labour Review*, 1984, p. 765, and Robertson and Merrills, *Human Rights*, p. 282. See also H. K. Nielsen, 'The Concept of Discrimination in ILO Convention No. 111', 43 *ICLQ*, 1994, p. 827. See generally [www.ilo.org/global/lang-en/index.htm](http://www.ilo.org/global/lang-en/index.htm).

**382** An agreement bringing the ILO into relationship with the UN as a specialised agency under article 63 of the UN Charter came into force on 14 December 1946: see General Assembly resolution 50 (I).

**383** See *UN Action*, p. 28. The tripartite structure means that the delegation of each member state to the International Labour Conference includes two representatives of the government, one representative of workers and one representative of the employers. There are fifty-six members of the Governing Body, with twenty-eight government representatives and fourteen each from employers' and workers'

organisations.

**384** See Valticos, 'International Labour Organization', p. 365, and Swepston, 'Human Rights Complaints Procedures of the International Labour Organization', p. 100. See also E/CN.4/Sub.2/1994/5, p. 3.

**385** However, in practice the annual rule is relaxed: see Valticos, 'International Labour Organization', p. 368. Governments are obliged by article 23(2) to communicate copies of the reports to employers' and workers' organisations.

**386** The latter provision does not, of course, apply in the case of Recommendations.

**387** Valticos, 'International Labour Organization', pp. 369–70, and Wolf, 'ILO Experience', pp. 608–10. See e.g. *Freedom of Association and Collective Bargaining: General Survey*, Geneva, 1983.

**388** The Committee usually consists of 200 members.

**389** But see e.g. Official Bulletin of the ILO, 1956, p. 120 (Netherlands Antilles); *ibid.*, 1967, p. 267 (Brazil) and *ibid.*, 1972, p. 125 (Italy). See also *ibid.*, 1978 (Czechoslovakia).

**390** See Official Bulletin of the ILO, 1962; *ibid.*, 1963 (Liberia) and *ibid.*, 1971 (Greece).

**391** See e.g. G. Von Potobsky, 'Protection of Trade Union Rights: Twenty Years Work of the Committee on Freedom of Association', 105 *International Labour Review*, 1972, p. 69. See also Servais, 'ILO Standards', and *Freedom of Association: Digest of Decisions of the Freedom of Association Committee of the Governing Body of the ILO*, 3rd edn, Geneva, 1985. By the end of 1991, over 1,600 cases had been considered by the Committee: see Swepston, 'Human Rights Complaints Procedures of the International Labour Organization', p. 109.

**392** See Valticos, 'International Labour Organization', pp. 384 ff. See also Official Bulletin of the ILO, 1966 (Japan), and N. Valticos, 'Un Double Type d'Enquête de

l'OIT au Chili', AFDI, 1975, p. 483.

**393** E/CN.4/Sub.2/1994/5, p. 4.

**394** See N. Valticos, 'Une Nouvelle Forme d'Action Internationale: Les "Contacts Directs"', 27 AFDI, 1981, p. 481, and V. Leary, 'Lessons from the Experience of the International Labour Organization' in Alston, *United Nations and Human Rights*, p. 611.

**395** See e.g. S. Marks, 'The Complaints Procedure of the United Nations Educational, Scientific and Cultural Organization' in Hannum, *Guide to International Human Rights Practice*, p. 107; D. Weissbrodt and R. Farley, 'The UNESCO Human Rights Procedure: An Evaluation', 16 HRQ, 1994, p. 391; P. Alston, 'UNESCO's Procedures for Dealing with Human Rights Violations', 20 *Santa Clara Law Review*, 1980, p. 665; H. S. Saba, 'UNESCO and Human Rights' in Vasak and Alston, *International Dimensions of Human Rights*, vol. II, p. 401; Robertson and Merrills, *Human Rights*, p. 288, and *UN Action*, pp. 308 and 321. See generally <http://en.unesco.org/>

**396** See General Assembly resolution 50 (I).

**397** See, for example, the obligation to submit reports under article 7 of the 1960 Convention against Discrimination in Education. See also *UN Action*, p. 163.

**398** Formerly the Committee on Conventions and Recommendations in Education, *ibid.*, pp. 321–2. See also A/CONF.157/PC/61/Add.6, 1993.

**399** Decision 104. EX/3.3, para. 14(k). See also *UNESCO's Procedure for the Protection of Human Rights*, Paris, 2009.

**400** In the April 1980 session, for example, forty-five communications were examined as to admissibility, of which five were declared inadmissible, thirteen admissible, twenty suspended and seven deleted from the agenda. Ten communications were examined on the merits, UNESCO Doc. 21 C/13, para. 65. Between 1978 and September 2003 508 communications were examined: see Marks, 'UNESCO Complaints Procedure', p. 120.

401 *Ibid.*, paras. 8 and 9.

402 See UNESCO Doc. 141/EX/6 and Weissbrodt and Farley, 'UNESCO Human Rights Procedure', p. 391. It was noted that during this period, 129 individuals were either released or acquitted, 20 authorised to leave and 34 to return to the state concerned, 24 were able to resume banned employment or activity, and 11 were able to resume a banned publication or broadcast, *ibid.*

403 See G. H. Dumont, 'UNESCO's Practical Action on Human Rights', 122 *International Social Sciences Journal*, 1989, p. 585, and K. Partsch, 'La Mise en Oeuvre des Droit de l'Homme par l'UNESCO', 36 *AFDI*, 1990, p. 482.

404 Weissbrodt and Farley note that of sixty-four cases studied only five were declared admissible, 'UNESCO Human Rights Procedure', p. 399. Of these, three concerned one particular country in Latin America. One case was considered over a nine-and-a-half-year period and another was considered over eight-and-a-half years.

405 UNESCO Doc. 108 EX/CR/HR/PROC/2 Rev. (1979).

406 Decision 104. EX/3.3, para. 10.

407 *Ibid.*, para. 18.

## 7 The regional protection of human rights

---

### Europe<sup>1</sup>

#### The Council of Europe

The Council of Europe was founded in 1949 as a European organisation for encouraging and developing intergovernmental and interparliamentary co-operation. Its aim as laid down in article 1 of the Statute is to achieve a greater unity between member states for the purpose of safeguarding and realising the ideals and principles which are their common heritage and facilitating their economic and social progress. The principles of the Council of Europe as established in article 3 of the Statute include pluralist democracy, respect for human rights and the rule of law. A Committee of Ministers, consisting of the Foreign Ministers of member states, and a Parliamentary Assembly, consisting of delegations of members of national parliaments, constitute the principal organs of the Council of Europe, together with a Secretary-General and supporting secretariat. There also exists a Standing Conference of Local and Regional Authorities of Europe, consisting of national delegations of local and regional elected representatives. The Council of Europe also maintains a number of support and assistance programmes.<sup>2</sup>

The demise of the Soviet Empire in Eastern and Central Europe has been the primary reason for the great increase in member states over the last few years.<sup>3</sup> The process of joining the Council of Europe has provided the Council with some influence over prospective members and this has led both to expert advice and assistance being proffered and to commitments being entered into in the field of human rights by applicants. For example, Parliamentary Assembly Opinion No. 191 on the Application for Membership by the Former Yugoslav Republic of Macedonia<sup>4</sup> notes that the applicant entered into commitments relating to revision and establishment of new laws (for example, with respect to the organisation and functioning of the criminal justice system), amendment of the constitution in order to include the right to a fair trial, and agreement to sign a variety of international instruments including the European Convention on Human Rights, the European Convention on the Prevention of Torture and the Framework Convention for the Protection of National Minorities. In addition, the applicant agreed to co-operate fully in the monitoring process for implementation of Assembly Order No. 508 (1995) on the honouring of obligations and commitments by member states of the Council of Europe as well as in monitoring processes established by virtue of the Committee of Ministers Declaration of 10 November 1994. The Council of Europe

has also moved beyond agreeing or noting commitments made at the time of application for membership and approval thereof to consideration of how those commitments have been honoured once an applicant has become a member state. The Committee of Ministers Declaration of 10 November 1994 provides a mechanism for examining state practice in this area and one may expect further developments in this context.<sup>5</sup> In 1999, the Council of Europe established the office of the Commissioner for Human Rights within the General Secretariat to promote education and awareness in the field of human rights.<sup>6</sup> The Commissioner may also issue opinions<sup>7</sup> and make recommendations<sup>8</sup> and undertake visits.<sup>9</sup>

Although a large number of treaties between member states have been signed under the auspices of the Council of Europe, undoubtedly the most important has been the European Convention on Human Rights.

## ***The European Convention on Human Rights***<sup>10</sup>

The Convention was signed on 4 November 1950 and entered into force in September 1953.<sup>11</sup> Together with the fourteen Protocols currently in force, it covers a wide variety of primarily civil and political rights.<sup>12</sup> The preamble notes that the European states are like-minded and have a common heritage of political tradition, ideals, freedoms and the rule of law. The rights covered in the Convention itself include the right to life (article 2), prohibition of torture and slavery (articles 3 and 4), right to liberty and security of person (article 5), right to a fair and public hearing within a reasonable time by an independent and impartial tribunal established by law (article 6), prohibition of retroactive criminal legislation (article 7), right to respect for private and family life (article 8), freedom of thought, conscience and religion (article 9), freedom of expression (article 10), freedom of assembly and association (article 11), the right to marry and found a family (article 12), the right to an effective remedy before a national authority if one of the Convention rights or freedoms is violated (article 13) and a non-discrimination provision regarding the enjoyment of rights and freedoms under the Convention (article 14). In addition, several protocols have been added to the substantive rights protected under the Convention. Protocol No. 1 protects the rights of property, education and free elections by secret ballots, Protocol No. 4 prohibits imprisonment for civil debt and protects *inter alia* the rights of free movement and choice of residence and the right to enter one's own country, Protocol No. 6 provides for the abolition of the death penalty, while Protocol No. 7 provides *inter alia* that an alien lawfully resident in a state shall not be expelled therefrom except in pursuance of a decision reached in accordance with the law, that a person convicted of a criminal offence shall have the right to have that conviction or sentence reviewed by a higher tribunal and that no one may be tried or punished again in criminal proceedings for an offence for which

he has already been finally acquitted or convicted. Protocol No. 12 prohibits discrimination, while Protocol No. 13 abolishes the death penalty. Like other international treaties, the European Convention imposes obligations upon states parties to respect a variety of provisions. In this instance the Convention has also been incorporated into the domestic legislation of all current states parties<sup>13</sup> although the Convention does not provide as to how exactly the states parties are to implement internally the relevant obligations.<sup>14</sup> It has been emphasised that:

unlike international treaties of the classic kind, the Convention comprises more than mere reciprocal engagements between contracting states. It creates, over and above a network of mutual and bilateral undertakings, objective obligations, which in the words of the preamble, benefit from a 'collective enforcement'.<sup>15</sup>

In addition, a more teleological and flexible approach to the interpretation of the Convention has been adopted.<sup>16</sup> The European Court of Human Rights has emphasised that the Convention is a living instrument to be interpreted in the light of present-day conditions and this approach applies not only to the substantive rights protected under the Convention, but also to those provisions which govern the operation of the Convention's enforcement machinery.<sup>17</sup> In addition, the Court has noted that the object and purpose of the Convention as an instrument for the protection of individuals requires that its provisions be interpreted and applied so as to make its safeguards practical and effective.<sup>18</sup> The Convention should also be interpreted as far as possible in harmony with other principles of international law.<sup>19</sup> It has been emphasised that the Convention constitutes a 'constitutional instrument of European public order ("ordre public")'.<sup>20</sup>

The Convention applies, of course, within the territory of contracting states, but the issue of its extraterritorial application has been addressed. The Court has interpreted the concept of 'jurisdiction' under article 1 to include the possibility of application to extradition or expulsion of a person by a contracting state to the territory of a non-contracting state<sup>21</sup> and the situation where acts of the authorities of contracting states, whether performed within or outside national boundaries, produce effects outside their own territory.<sup>22</sup> Further, in a significant move, the Court in *Loizidou v. Turkey* emphasised that the responsibility of a contracting state may also arise when it exercises effective control or 'effective overall control' of an area outside its national territory, irrespective of the lawfulness of such control, whether by the state's own agents and officials or by the acts of a subordinate local administration.<sup>23</sup> This was underlined in *Banković v. Belgium*, where the Court stated that its recognition of the exercise of extraterritorial jurisdiction by a

contracting state was exceptional and that the Convention's notion of jurisdiction was essentially territorial.<sup>24</sup> These principles were reaffirmed in *Ilaşcu v. Moldova and Russia*, where the Court, while emphasising that jurisdiction was primarily territorial, noted that in exceptional circumstances the state might not be responsible for Convention violations where it was prevented from exercising its authority in a part of its territory, whether as a result of military occupation by the armed forces of another state which effectively controls the territory concerned, acts of war or rebellion, or the acts of a foreign state supporting the installation of a separatist state within the territory of the state concerned.<sup>25</sup> Further, a state's responsibility will be engaged where, as a consequence of military action, whether lawful or unlawful, it exercises in practice effective control of an area situated outside its national territory. Overall control of an area would suffice and the responsibility of the state would extend not only to the acts of its own soldiers and officials, but also to acts of the local administration which survives there by virtue of its military and other support.<sup>26</sup>

In *Al-Skeini v. UK*, building upon the *Issa* case,<sup>27</sup> the Court declared that extraterritorial jurisdiction (which remained as exceptional) flowed not only from effective control over foreign territory<sup>28</sup> but also from the activities of state officials and agents. It was noted that 'the use of force by a State's agents operating outside its territory may bring the individual thereby brought under the control of the State's authorities into the State's Article 1 jurisdiction' and that 'whenever the State through its agents exercises control and authority over an individual, and thus jurisdiction, the State is under an obligation under Article 1 to secure to that individual the rights and freedoms under Section 1 of the Convention that are relevant to the situation of that individual'.<sup>29</sup> Accordingly, as the UK had assumed authority and responsibility for the maintenance of security in South East Iraq, its soldiers engaged in security operations in Basrah at the relevant time 'exercised authority and control over individuals killed in the course of such security operations, so as to establish a jurisdictional link between the deceased and the United Kingdom for the purposes of Article 1 of the Convention'.<sup>30</sup>

Linked with the territorial jurisdictional issue is the question whether the Court has jurisdiction over the states in question (or jurisdiction *ratione personae*). In *Behrami v. France*, the Court, in an application against a number of states with regard to activities undertaken as part of the international presence in Kosovo (whether military, KFOR, or civil, UNMIK), had to decide whether the acts in question were attributable or imputable to the states concerned such as to found jurisdiction or whether the acts were imputable rather to the UN. The Court concluded that KFOR was exercising lawfully delegated Chapter VII powers of the UN Security Council so that the impugned action was, in principle, 'attributable' to

the UN and thus not to the states brought before the Court.<sup>31</sup> In *Al-Jedda v. UK*, the Court tackled the relationship between the Convention and binding resolutions of the UN Security Council in a situation where article 103 of the UN Charter states that obligations under the Charter have priority over obligations arising under any other international agreement. The Court declared that ‘in interpreting its [Security Council] resolutions, there must be a presumption that the Security Council does not intend to impose any obligation on Member States to breach fundamental principles of human rights. In the event of any ambiguity in the terms of a Security Council Resolution, the Court must therefore choose the interpretation which is most in harmony with the requirements of the Convention and which avoids any conflict of obligations. In the light of the United Nations’ important role in promoting and encouraging respect for human rights, it is to be expected that clear and explicit language would be used were the Security Council to intend States to take particular measures which would conflict with their obligations under international human rights law.’<sup>32</sup>

## ***The convention system***

With the coming into force of Protocol 11 on 1 November 1998, a single permanent and full-time Court was established, so that the former Court and Commission ceased to exist. The system and procedure since the coming into force of Protocol No. 14 will be briefly described. The Court consists of a number of judges equal to that of the contracting parties to the Convention. Judges are elected by the Parliamentary Assembly of the Council of Europe for non-renewable nine-year terms.<sup>33</sup> To consider cases before it, the Court may sit in single judges formation, in Committees of three judges, in Chambers of seven judges and in a Grand Chamber of seventeen judges.<sup>34</sup> The Rules of Court provide for the establishment of at least four Sections, the compositions of which are to be geographically and gender-balanced and reflective of the different legal systems among the contracting states.<sup>35</sup> The Chambers of seven judges provided for in the amended Convention are constituted from the Sections, as are the Committees of three judges.<sup>36</sup> The plenary Court is responsible for the election of the President and Vice-Presidents of the Court, the appointment of the Presidents of the Chambers, constituting Chambers and adopting rules of procedure.<sup>37</sup>

A single judge may declare inadmissible or strike out of the Court’s list of cases an individual application, where such a decision can be taken without further examination on the basis of the material supplied by the applicant. This decision shall be final. Where the single judge does not declare an application inadmissible or strike it out, that judge shall forward it to a committee or to a Chamber for further examination.<sup>38</sup> A committee may, by a unanimous vote, declare an application

inadmissible or strike it out of its list of cases, where such decision can be taken without further examination; or declare it admissible and render at the same time a judgment on the merits, if the underlying question in the case, concerning the interpretation or the application of the Convention or the Protocols thereto, is already the subject of well-established case-law of the Court.<sup>39</sup> Where neither of these applies, a Chamber shall decide on the admissibility and merits of individual applications submitted under Article 34. The decision on admissibility may be taken separately.<sup>40</sup>

In ascertaining whether an application is admissible, the President of the Section to which it has been assigned will appoint a judge as Judge Rapporteur to examine the application.<sup>41</sup> Once an application is declared admissible, the Chamber may invite the parties to submit further evidence and written observations and a hearing on the merits may be held if the Chamber decides or one of the parties so requests.<sup>42</sup> At this point the respondent government is usually contacted for written observations.<sup>43</sup> Where a serious question affecting the interpretation of the Convention or its Protocols is raised in a case, or where the resolution of a question might lead to a result inconsistent with earlier case-law, the Chamber may, unless one of the parties to the case objects, relinquish jurisdiction in favour of the Grand Chamber.<sup>44</sup>

The Court may give advisory opinions, although in very restrictive circumstances.<sup>45</sup> In all cases before a Chamber or the Grand Chamber, a contracting party, one of whose nationals is an applicant, shall have the right to submit written comments and to take part in hearings, while the President of the Court may, in the interest of the proper administration of justice, invite any contracting party which is not a party to the proceedings, or any person concerned who is not the applicant to submit written comments or take part in hearings.<sup>46</sup> Once an application has been declared admissible, the Court will pursue the examination of the case and place itself at the disposal of the parties with a view to securing a friendly settlement.<sup>47</sup> If a friendly settlement is reached, the Court will strike the case out of its list.<sup>48</sup> Hearings before the Court will be in public unless the Court in exceptional circumstances decides otherwise. The Court will be able to afford just satisfaction to the injured party if necessary, where a violation is found and the domestic law of the contracting party concerned allows only partial reparation to be made.<sup>49</sup> Under article 43, within a period of three months from the date of the judgment of the Chamber, any party to the case may, in exceptional cases, request that the case be referred to the Grand Chamber. A panel of five judges of the Grand Chamber will accept this request if the case raises a serious question affecting the interpretation or application of the Convention or Protocols, or a serious issue of general importance. If the panel does accept the request, the Grand Chamber will decide the case by

means of a judgment. Judgments of the Grand Chamber will be final, as will those of a Chamber where the parties declare that they will not request that the case be referred to the Grand Chamber, or three months after the date of judgment if reference to the Grand Chamber has not been requested, or when the panel of the Grand Chamber rejects the request to refer. The final judgment will be published<sup>50</sup> and is binding upon the parties,<sup>51</sup> and it will be transmitted to the Committee of Ministers, which shall supervise its execution.<sup>52</sup>

The Convention provides for the right of both inter-state and individual application. Under article 33, any contracting state may institute a case against another contracting state. To date applications have been lodged with the Commission by states involving seven situations.<sup>53</sup> The first inter-state application to reach the Court was *Ireland v. UK*.<sup>54</sup> Such applications are a means of bringing to the fore an alleged breach of the European public order, so that, for example, it is irrelevant whether the applicant state has been recognised by the respondent state.<sup>55</sup> Article 34 provides for the right of individual petition to the Commission and this has proved to be a crucial provision.<sup>56</sup> This right is now automatic.<sup>57</sup> The Convention system does not contemplate an *actio popularis*.<sup>58</sup> Individuals cannot raise abstract issues, but must be able to claim to be the victim of a violation of one or more of the Convention rights.<sup>59</sup> However, the Court has emphasised that:

an individual may, under certain conditions, claim to be the victim of a violation occasioned by the mere existence of secret measures or of legislation permitting secret measures, without having to allege that such measures were in fact applied to him.<sup>60</sup>

A near relative of the victim, for example, could also raise an issue where the violation alleged was personally prejudicial or where there existed a valid personal interest.<sup>61</sup>

The Court may only deal with a matter once all domestic remedies have been exhausted according to the generally accepted rules of international law and within a period of six months from the date on which the final decision was taken.<sup>62</sup> Such remedies must be effective. Where there are no domestic remedies to exhaust, the act or decision complained against will itself normally be taken as the 'final decision' for the purposes of article 26.<sup>63</sup> The need to exhaust domestic remedies applies also in the case of inter-state cases as does the six-month rule.<sup>64</sup> In addition, no petition may be dealt with which is anonymous or substantially the same as a matter already examined, and any petition which is incompatible with the Convention, manifestly ill-founded<sup>65</sup> or an abuse of the right of petition is to be

rendered inadmissible.<sup>66</sup> Further, an application shall be declared inadmissible where the applicant has not suffered a significant disadvantage, unless respect for human rights as defined in the Convention and the Protocols thereto requires an examination of the application on the merits and provided that no case may be rejected on this ground which has not been duly considered by a domestic tribunal.<sup>67</sup>

The Court, in an ever-increasing number of judgments,<sup>68</sup> has developed a jurisprudence of considerable importance.<sup>69</sup> It has operated on the basis of a number of evolving principles. In particular, the Court will allow states a degree of leeway in a system composed of obligations of contracting states and a European-level supervisory mechanism. The doctrine of ‘the margin of appreciation’ means that the Court will not interfere in certain domestic spheres while retaining a general overall supervision. For example, in *Brannigan and McBride v. UK*, the Court held that states benefit from a ‘wide margin of appreciation’ with regard to the process of determining the existence and scope of a public emergency permitting derogation from certain provisions of the Convention under article 15.<sup>70</sup> This margin of appreciation will vary depending upon the content of the rights in question in substantive proceedings or on the balancing of rights in contention. It will be wider with regard to issues of personal morality,<sup>71</sup> but narrower in other cases.<sup>72</sup> The essential point is, as the Court noted in *Z v. UK*, that: ‘It is fundamental to the machinery of protection established by the Convention that the national systems themselves provide redress for breaches of its provision, the Court exercising its supervisory role subject to the principle of subsidiarity.’<sup>73</sup> This also means that the Court is wary of undertaking fact-finding<sup>74</sup> and similarly cautious about indicating which measures a state should take in order to comply with its obligations under the Convention.<sup>75</sup>

The Court has dealt with a number of critical issues. In *Ireland v. UK*,<sup>76</sup> for example, the Court found that the five interrogation techniques used by the UK Forces in Northern Ireland amounted to a practice of inhuman and degrading treatment, contrary to article 3.<sup>77</sup> In *McCann v. UK*,<sup>78</sup> the Court narrowly held that the killing by members of the security forces of three members of an IRA unit suspected of involvement in a bombing mission in Gibraltar violated the right to life under article 2. In *Golder v. UK*,<sup>79</sup> the Court inferred from article 6(1) a fundamental right of access to the courts, and the Court has emphasised the importance of fair trial mechanisms such as the principle of contempt of court.<sup>80</sup> The Court has also developed a considerable jurisprudence in the field of due process<sup>81</sup> that is having a significant impact upon domestic law, not least in the UK. A brief reference to some further examples will suffice. In the *Marckx* case,<sup>82</sup> the Court emphasised that Belgian legislation discriminating against illegitimate

children violated the Convention, while in the *Young, James and Webster* case<sup>83</sup> it was held that railway workers dismissed for refusing to join a trade union in the UK were entitled to compensation. In the *Brogan* case,<sup>84</sup> the Court felt that periods of detention under anti-terrorist legislation in the UK before appearance before a judge or other judicial officer of at least four days violated the Convention. This decision, however, prompted a notice of derogation under article 15 of the Convention by the UK government.<sup>85</sup>

In the important *Soering* case,<sup>86</sup> the Court unanimously held that the extradition of a German national from the UK to the United States, where the applicant feared he would be sentenced to death on a charge of capital murder and be subjected to the 'death row' phenomenon, would constitute a breach of article 3 of the Convention prohibiting torture and inhuman and degrading treatment and punishment. Further, the Court has held that the deportation to Iran of a woman who in the circumstances would have been at risk of punishment by stoning would violate article 3.<sup>87</sup> The Court has also emphasised that national security considerations had no application where article 3 violations were in question.<sup>88</sup>

The Court has approached its task in a generally evolving way. For example, it has deduced from a number of substantive provisions that circumstances may arise in which a state would have a positive obligation to conduct an inquiry or effective official investigation. This would arise, for instance, where individuals have been killed as a result of the use of force by agents of the state,<sup>89</sup> or while in custody,<sup>90</sup> or 'upon proof of an arguable claim that an individual, who was last seen in the custody of agents of the state, subsequently disappeared in a context which may be considered life-threatening'.<sup>91</sup> Similarly, the Court has held that the right to life under article 2 entails also the obligation upon states to take appropriate steps for the safeguarding of life within the jurisdiction.<sup>92</sup> Linked with these provisions is article 13 which requires the state party to provide a remedy, effective in law and in practice, which is able both to deal with the substance of the applicant's complaint and to provide an appropriate legal redress.<sup>93</sup> The jurisprudence of the Court with regard to Article 13 demonstrates that in an increasing number of cases that provision is understood as requiring states to undertake an effective investigation into arguable claims of the violation of Convention rights. This has included claims of violations of Articles 2, 3, 5 and 6.<sup>94</sup>

Execution of Court decisions is the responsibility of the Committee of Ministers.<sup>95</sup> This is a political body, the executive organ of the Council of Europe,<sup>96</sup> and consists of the Foreign Ministers, or their deputies, of all the member states.<sup>97</sup> Under article 15 of the Statute of the Council of Europe, the Committee of Ministers, acting on the recommendation of the Parliamentary Assembly or on its

own initiative, considers the action required to further the aims of the Council of Europe, including the conclusion of conventions or agreements, and the adoption by governments of a common policy with regard to particular matters. Under article 16 of the Statute, it decides with binding effect all matters relating to the internal organisation and arrangements of the Council of Europe. Resolutions and recommendations on a wide variety of issues are regularly adopted.<sup>98</sup> The Committee of Ministers performs a variety of functions with regard to the protection of human rights. For example, in its Declaration on Compliance with Commitments Accepted by Member States of the Council of Europe, adopted on 10 November 1994, the Committee decided that it would consider the question of implementation of commitments concerning the situation of democracy, human rights and the rule of law in any member state which may be referred to it by member states, the Secretary-General or on the basis of a recommendation of the Parliamentary Assembly.

Where the Court has found a violation, the matter will be placed on the agenda of the Committee of Ministers and will stay there until the respondent government has confirmed that any sum awarded in just satisfaction under article 41 has been paid and/or any required individual measure has been taken and/or any general measures have been adopted preventing new similar violations or putting an end to continuing violation.<sup>99</sup> Information so provided by states is to be accessible to the public, unless the Committee decides otherwise in order to protect legitimate public or private interests.<sup>100</sup>

## **The European Social Charter<sup>101</sup>**

The wide social and economic differences between the European states, coupled with the fact that economic and social rights often depend for their realisation upon economic resources, has meant that this area of concern has lagged far behind that of civil and political rights. Seven years of negotiations were necessary before the Charter was signed in 1961.<sup>102</sup>

The Charter consists of a statement of long-term objectives coupled with a list of more restricted rights. The Charter covers labour rights and trade union rights,<sup>103</sup> the protection of specific groups such as children, women, disabled persons and migrant workers,<sup>104</sup> social security rights,<sup>105</sup> and protection of the family.<sup>106</sup> In an attempt to deal with economic disparities within Europe, the Charter provides for a system whereby only ten of the forty-five paragraphs (including five 'key articles'<sup>107</sup>) need to be accepted upon ratification. The Charter<sup>108</sup> is implemented by the European Committee of Social Rights, consisting of fifteen independent experts elected for a six-year period, renewable once. States parties submit annual reports on some of the

provisions of the Charter. These provisions have been divided since 2007 into four thematic groups, each group being the subject of an annual review.<sup>109</sup> These reports are examined by the Committee and its conclusions published. If a state does not implement a Committee decision, the Committee of Ministers addresses a recommendation to the state to the same effect. A system of Collective Complaints was established by an Additional Protocol adopted in 1995. This provides that international organisations of employers and trade unions, other international non-governmental organisations with consultative status with the Council of Europe placed on a list for this purpose by the Governmental Committee, and representative national organisations of employers and trade unions within the jurisdiction of the contracting party against which they have lodged a complaint may submit complaints alleging unsatisfactory application of the Charter.<sup>110</sup> Contracting parties may also make a declaration recognising the right of any other representative national non-governmental organisation within their jurisdiction which has particular competence in the matters governed by the Charter to lodge complaints against them.<sup>111</sup> Such complaints are lodged with the European Committee of Social Rights, which makes a decision on both admissibility and on the merits. Its decision is sent to the parties concerned and to the Committee of Ministers, which adopts a resolution on the matter.

## ***The European Convention for the Prevention of Torture and Inhuman and Degrading Treatment or Punishment***<sup>112</sup>

This innovative Convention was signed in 1987 and came into force on 1 February 1989.<sup>113</sup> The purpose of the Convention is to enable the supervision of persons deprived of their liberty and, in particular, to prevent the torture or other ill-treatment of such persons.<sup>114</sup> The Committee for the Prevention of Torture was established under the Convention,<sup>115</sup> placing, as it has noted, a ‘proactive non-judicial mechanism alongside the existing reactive judicial mechanisms of the European Commission and European Court of Human Rights’.<sup>116</sup> The Committee is given a fact-finding and reporting function. The Committee is empowered to carry out both visits of a periodic nature and ad hoc visits to places of detention in order to examine the treatment of persons deprived of their liberty with a view to strengthening, if necessary, the protection of such persons from torture and from inhuman or degrading treatment or punishment. Periodic visits are carried out to all contracting parties on a regular basis, while ad hoc visits are organised when they appear to the Committee to be required in the circumstances.<sup>117</sup> Thus periodic visits are planned in advance.<sup>118</sup> The real innovation of the Convention, however, lies in the competence of the Committee to visit places of detention when the situation so

warrants.<sup>119</sup> When the Committee is not in session, the Bureau (i.e. the President and Vice-President of the Committee)<sup>120</sup> may in cases of urgency decide, on the Committee's behalf, on the carrying out of such an ad hoc visit.<sup>121</sup> States parties agree to permit visits to any place within their jurisdiction where persons are deprived of their liberty by a public authority,<sup>122</sup> although in exceptional circumstances, the competent authorities of the state concerned may make representations to the Committee against a visit at the time or place proposed on grounds of national defence, public safety, serious disorder, the medical condition of a person or because an urgent interrogation relating to a serious crime is in progress.<sup>123</sup> The Committee may interview in private persons deprived of their liberty and may communicate freely with any person whom it believes can supply relevant information.<sup>124</sup>

After each visit, the Committee draws up a report for transmission to the party concerned. That report will remain confidential<sup>125</sup> unless and until the state party concerned decides to make it public.<sup>126</sup> Where a state refuses to co-operate or to improve matters in the light of recommendations made, the Committee may decide, after the state has had an opportunity to make known its views, by a two-thirds majority to issue a public statement.<sup>127</sup> The Committee makes an annual general report on its activities to the Committee of Ministers, which is transmitted to the Parliamentary Assembly and made public.<sup>128</sup> The relationship between the approach taken by the Committee as revealed in its published reports and the practice under the European Human Rights Convention is particularly interesting and appears to demonstrate that the Committee has adopted a more flexible attitude to issues relating to detention and ill-treatment.<sup>129</sup>

## ***The Council of Europe Framework Convention for the Protection of National Minorities***<sup>130</sup>

The question of minorities is addressed in the European Convention on Human Rights only in terms of one possible ground of prohibited discrimination stipulated in article 14. However, the Council of Europe has been dealing with the issue of minorities in a more vigorous manner in more recent years. Resolution 192 (1988) of the Standing Conference of Local and Regional Authorities of Europe proposed the text of a European Charter for Regional or Minority Languages, while Recommendation 1134 (1990) of the Parliamentary Assembly on the Rights of Minorities called for either a protocol to the European Convention or a special convention on this topic.<sup>131</sup> The Committee of Ministers adopted on 22 June 1992 the European Charter for Regional or Minority Languages.<sup>132</sup> Under this Charter, a variety of measures to promote the use of regional or minority languages is

suggested, for example, in the fields of education, court proceedings, public services, media, cultural facilities, economic and social life and transfrontier exchanges. Implementation is by periodic reports to the Secretary-General of the Council of Europe in a form prescribed by the Committee of Ministers.<sup>133</sup> Such reports are examined by a committee of experts,<sup>134</sup> composed of one member per contracting party, nominated by the party concerned, appointed for a period of six years and eligible for re-appointment.<sup>135</sup> Bodies or associations legally established in a party may draw the attention of the committee of experts to matters relating to the undertakings entered into by that party and, on the basis of states' reports, the committee will itself report to the Committee of Ministers. The committee of experts' report may be accompanied by the comments which the parties have been requested to make and may also contain the proposals of the committee of experts to the Committee of Ministers for the preparation of such recommendations of the latter body to one or more of the parties as may be required.<sup>136</sup> The Secretary-General also makes a two-yearly detailed report to the Parliamentary Assembly on the application of the Charter.<sup>137</sup> The Committee of Ministers may invite any non-member state of the Council of Europe to accede to the Charter.<sup>138</sup>

At the Vienna Meeting of Heads of State and Government of the Council of Europe in October 1993, it was decided that a legal instrument would be drafted with regard to the protection of national minorities, and appendix II of the Vienna Declaration instructed the Committee of Ministers to work upon both a framework convention on national minorities and a draft protocol on cultural rights complementing the European Convention on Human Rights.<sup>139</sup> The Framework Convention for the Protection of National Minorities was adopted by the Committee of Ministers on 10 November 1994 and opened for signature on 1 February 1995.<sup>140</sup> The Framework Convention underlines the right to equality before the law of persons belonging to national minorities and prohibits discrimination based on belonging to a national minority. Contracting parties to the Framework Convention undertake to adopt, where necessary, adequate measures to promote in all areas of economic, social, political and cultural life, full and effective equality between persons belonging to a national minority and to the majority.<sup>141</sup> The parties agree to promote the conditions necessary for persons belonging to minorities to develop their culture and to preserve the essential elements of their identity, namely their religion, language, traditions and cultural heritage.<sup>142</sup> The collective expression of individual human rights of persons belonging to national minorities is to be respected,<sup>143</sup> while in areas inhabited by such persons traditionally or in substantial numbers, the parties shall endeavour to ensure as far as possible the condition which would make it possible to use the minority languages in relations between those persons and the administrative authorities.<sup>144</sup> By article 15, the parties agree to

refrain from measures which alter the geographic proportions of the population in areas inhabited by persons belonging to national minorities.

The implementation of this Framework Convention is monitored by the Committee of Ministers of the Council of Europe<sup>145</sup> with the assistance of an advisory committee of experts<sup>146</sup> and on the basis of periodic reports from contracting states.<sup>147</sup> The Committee of Ministers adopted rules on monitoring arrangements in 1997<sup>148</sup> and the Advisory Committee started operating in June 1998. The Committee examines state reports,<sup>149</sup> which are made public by the Council of Europe upon receipt from the state party, and prepares an opinion on the measures taken by that party.<sup>150</sup> The Committee may request additional information from a state party or other sources, including individuals and NGOs, but cannot deal with individual complaints. It may hold meetings with governments, and has to do so if the government concerned so requests, and may hold meetings with others than the governments concerned, during the course of country visits. Having received the opinion of the Advisory Committee, the Committee of Ministers will take the final decisions (called conclusions) concerning the adequacy of the measures taken by the state party. Where appropriate, it may also adopt recommendations in respect of the state party concerned. The conclusions and recommendations of the Committee of Ministers shall be made public upon their adoption, together with any comments the state party may have submitted in respect of the opinion delivered by the Advisory Committee. The opinion of the Advisory Committee is as a rule made public together with the conclusions of the Committee of Ministers. A first cycle of monitoring began in 1998 with thirty-four opinions adopted by the Advisory Committee and twenty-nine resolutions adopted by the Committee of Ministers. A second cycle of monitoring began in February 2004.

While the range of rights accorded to members of minorities is clearly greater than that envisaged in UN instruments,<sup>151</sup> its ambit is narrower in being confined to 'national minorities'. The Framework Convention itself provides no definition of that term since no consensus existed as to its meaning,<sup>152</sup> although Recommendation 1201 (1993) adopted by the Parliamentary Assembly and reaffirmed in Recommendation 1255 (1995) suggests that it refers to persons who reside on the territory of the state concerned and are citizens of it; maintain longstanding, firm and lasting ties with that state; display distinctive ethnic, cultural, religious or linguistic characteristics; are sufficiently representative, although smaller in numbers than the rest of the population of that state or of a region of that state; and are motivated by a concern to preserve together that which constitutes their common identity, including their culture, their traditions, their religion or their language. The narrowing of regard to persons belonging to national minorities who are citizens of the state concerned is perhaps a matter of concern.<sup>153</sup> The issue of the protection of

minority rights is the subject of continuing discussion as to both their nature and scope.<sup>154</sup>

The Council of Europe has adopted measures with regard to other areas of human rights activities of some relevance to the above issues.<sup>155</sup>

## **The European Union<sup>156</sup>**

The Treaty of Rome, 1957 established the European Economic Community and is not of itself a human rights treaty. However, the European Court of Justice has held that subsumed within Community law are certain relevant unwritten general principles of law, emanating from several sources.<sup>157</sup> The Court noted in the *Internationale Handelsgesellschaft* case<sup>158</sup> that ‘respect for fundamental rights forms an integral part of the general principles of law protected by the Court of Justice’,<sup>159</sup> while in *Nold v. Commission*,<sup>160</sup> the Court emphasised that measures incompatible with fundamental rights recognised and protected by the constitutions of member states could not be upheld. It was also held that international treaties for the protection of human rights on which member states have collaborated, or of which they are signatories, could supply guidelines which should be followed within the framework of Community law.<sup>161</sup> The European Convention on Human Rights is clearly the prime example of this and it has been referred to on several occasions by the Court.<sup>162</sup> The EU is now to accede to European Convention on Human Rights. The effect of this will be to subject the EU and its legal acts to the jurisdiction of the European Court of Human Rights.<sup>163</sup>

The Treaty on European Union (the Maastricht Treaty), 1992 amended the Treaty of Rome and established the European Union, founded on the European Communities supplemented by the policies and forms of cooperation established under the 1992 Treaty. Article F (2) of Title I noted that the Union ‘shall respect fundamental rights’, as guaranteed by the European Convention on Human Rights and as they result from common constitutional traditions, ‘as general principles of Community law’. Under article K.1 of Title VI, the member states agreed that asylum, immigration, drug, fraud, civil and criminal judicial co-operation, customs co-operation and certain forms of police co-operation would be regarded as ‘matters of common interest’, which under article K.2 would be dealt with in compliance with the European Convention on Human Rights and the Convention relating to the Status of Refugees, 1951. From the early 1990s, the European Communities began to include human rights references in its trade and aid policies, formalised in article 177(2), and from the mid-1990s, all trade and co-operation agreements contained provisions concerning respect for human rights.<sup>164</sup>

The Treaty of Amsterdam, which came into force on 1 May 1999, inserted a new article 6 into the Treaty on European Union (now the Consolidated Treaty on European Union since the coming into force of the Treaty of Lisbon in 2009), which stated that the European Union ‘is founded on the principles of liberty, democracy, respect for human rights and fundamental freedoms, and the rule of law, principles which are common to the Member States’, and provided that the Union ‘shall respect fundamental rights as guaranteed by’ the European Convention on Human Rights.<sup>165</sup> Member states violating these principles in a ‘serious and persistent’ manner risk the suspension of certain of their rights deriving from the application of the Union Treaty.<sup>166</sup> In addition, candidate countries have to respect these principles to join the Union.<sup>167</sup> The European Union adopted the Charter of Fundamental Rights in December 2000,<sup>168</sup> although its status at that time was uncertain. However, Advocates-General of the European Court of Justice began referring to the Charter with great frequency as part of a shared set of values within the Union,<sup>169</sup> as has the Court of First Instance<sup>170</sup> and more recently the European Court of Justice.<sup>171</sup> The Charter became binding with the coming into force of the Treaty of Lisbon in 2009.

The European Parliament is also active in consideration of human rights issues.<sup>172</sup>

## **The OSCE (Organization for Security and Co-operation in Europe)<sup>173</sup>**

What was initially termed the ‘Helsinki process’, and which more formally was referred to as the Conference on Security and Co-operation in Europe, developed out of the Final Act of the Helsinki meeting, which was signed on 1 August 1975 after two years of discussions by the representatives of the then thirty-five participating states.<sup>174</sup> The Final Act<sup>175</sup> dealt primarily with questions of international security and state relations, and was seen as the method by which the post-war European territorial settlement would be finally accepted. In the Western view, the Final Act constituted a political statement and accordingly could not be regarded as a binding treaty. Nonetheless, the impact of the Final Act on developments in Europe has far exceeded the impact of most legally binding treaties.

The Final Act set out in ‘Basket I’ a list of ten fundamental principles dealing with relations between participating states, principle 7 of which refers to ‘respect for human rights and fundamental freedoms, including freedom of thought, conscience, religion and belief’. ‘Basket III’ dealt with Co-operation in Humanitarian and Other Fields and covered family reunification, free flow of information and cultural and educational cooperation.<sup>176</sup>

At the third ‘follow-up’ meeting at Vienna in January 1989, great progress

regarding human rights occurred,<sup>177</sup> primarily as a result of the changed attitudes in the then USSR and in Eastern Europe, especially as regards the extent of the detailed provisions and the recognition of concrete rights and duties. The part entitled 'Questions Relating to Security in Europe' contained a Principles section, in which *inter alia* the parties confirmed their respect for human rights and their determination to guarantee their effective exercise. Paragraphs 13–27 contain in a detailed and concrete manner a list of human rights principles to be respected, ranging from due process rights to equality and non-discrimination and the rights of religious communities, and from the rights of minorities to the rights of refugees.

The part entitled 'Co-operation in Humanitarian and Other Fields' included an important section on Human Contacts in which the right to leave one's country and return thereto was reaffirmed. It was decided that all outstanding human contacts applications would be resolved within six months and that thereafter there would be a series of regular reviews. Family reunion issues were to be dealt with in as short a time as possible and in normal practice within one month. The parties committed themselves to publishing all laws and statutory regulations concerning movement by individuals within their territory and travel between states, an issue that had caused a great deal of controversy, while the right of members of religions to establish and maintain personal contacts with each other in their own and other countries, *inter alia* through travel and participation in religious events, was proclaimed.<sup>178</sup>

In a further significant development, the Vienna Concluding Document contained a part entitled 'Human Dimension of the CSCE' in which some implementation measures were provided for. The participating states decided to exchange information and to respond to requests for information and to representations made to them by other participating states on questions relating to the human dimension of the CSCE. Bilateral meetings would be held with other participating states that so request, in order to examine such questions, while such questions could be brought to the attention of other participating states through diplomatic channels or raised at further 'follow-up' meetings or at meetings of the Conference on the Human Dimension. The procedure is confidential.<sup>179</sup>

The Charter of Paris, adopted at the Summit of Heads of State and of Government in 1990,<sup>180</sup> called for more regular consultations at ministerial and senior official level and marked an important stage in the institutionalisation of the process, with a Council of Foreign Ministers, a Committee of Senior Officials and a secretariat being established. The section on Human Rights, Democracy and Rule of Law consisted of a list of human rights, including the right to effective remedies, full respect for which constituted 'the bedrock' for the construction of 'the new Europe'. The Moscow Human Dimension meeting of 1991<sup>181</sup> described the Human Dimension mechanism as an essential achievement of the CSCE process and it was

strengthened.<sup>182</sup>

By the time of the Helsinki Conference in 1992, the number of participating states had risen to fifty-two,<sup>183</sup> the political climate in Europe having changed dramatically after the establishment of democratic regimes in Eastern Europe, the ending of the Soviet Union and the rise of tensions in Yugoslavia and other parts of Eastern Europe. The participating states strongly reaffirmed that Human Dimension commitments were matters of direct and legitimate concern to all participating states and did not belong exclusively to the internal affairs of the states concerned, while gross violations of such commitments posed a special threat to stability. This reference of the link between human rights and international stability was to increase in the following years. At Helsinki, the CSCE was declared to be a regional arrangement in the sense of Chapter VIII of the UN Charter.<sup>184</sup> The post of High Commissioner on National Minorities was established in order to provide early warning and early action where appropriate, concerning tensions relating to national minority issues that have the potential to develop into a conflict within the CSCE area affecting peace, stability or relations between participating states.<sup>185</sup> The High Commissioner, who acts in confidence, was also mandated to collect relevant information and make visits. Where the High Commissioner concludes that there is a *prima facie* risk of potential conflict in such situations, an early warning is to be issued, which will be promptly conveyed by the Chairman-in-Office of the CSCE to the Committee of Senior Officials. The High Commissioner is able to make recommendations to participating states regarding the treatment of national minorities.<sup>186</sup> In addition, a number of general recommendations have been made with regard to Roma<sup>187</sup> and other matters.<sup>188</sup>

As far as the Human Dimension mechanism was concerned, the Conference decided to permit any participating state to provide information on situations and cases that are the subject of requests for information, and it was also decided that in years in which a review conference was not being held, a three-week meeting at expert level of participating states would be organised in order to review implementation of the CSCE Human Dimension commitments. In addition, it was provided that the Office of Democratic Institutions and Human Rights would begin organising Human Dimension seminars.<sup>189</sup>

The next major step in the process took place at Budapest at the end of 1994.<sup>190</sup> The CSCE, in recognition of the institutional changes underway in recent years, changed its name to the OSCE (the Organization for Security and Co-operation in Europe) and took a number of steps in the field of security and conflict management. The Conference emphasised that human rights, the rule of law and democratic institutions represented a crucial contribution to conflict prevention and that the protection of human rights constituted an 'essential foundation of democratic civil

society',<sup>191</sup> and it was decided that Human Dimension issues would be regularly dealt with by the Permanent Council,<sup>192</sup> with the Office of Democratic Institutions and Human Rights (based in Warsaw) acting as the main institution of the Human Dimension in an advisory capacity to the organisation, with enhanced roles in election monitoring and the dispatch of missions.<sup>193</sup> States were encouraged to use the Human Dimension mechanism (now termed the Moscow Mechanism) and the Chairman-in-Office was encouraged to inform the Permanent Council of serious cases of alleged non-implementation of Human Dimension commitments. Further, an OSCE Representative on Freedom of the Media was appointed in 1997 and the role increased in 2004 to include the task of combating the misuse of hate speech regulations in order to silence legitimate dissent and alternative opinion.<sup>194</sup>

Thus, step by step over recent years, the Helsinki process has transformed itself into an institutional structure with a particular interest in describing and requiring the implementation of human rights.<sup>195</sup> The OSCE has also established a number of missions in order to help mitigate conflicts<sup>196</sup> and adopted a Treaty on Open Skies and a Convention on Conciliation and Arbitration within the OSCE in 1992. Although some overlap with the Council of Europe system does exist, the fact that a large proportion of participating states are now members of the Council of Europe obviates the most acute dangers inherent in differing human rights systems. Nevertheless, as the Council of Europe system moves beyond the strictly legal enforcement stage and as the OSCE develops and strengthens its institutional mechanisms, some overlapping is inevitable. However, in general terms, the OSCE system remains politically based and expressed, while the essence of the Council of Europe system remains juridically focused.

## **The CIS Convention on Human Rights and Fundamental Freedoms<sup>197</sup>**

The Commonwealth of Independent States, which links together the former Republics of the Soviet Union (with the exception of the three Baltic states), adopted a Convention on Human Rights in May 1995. Under this Convention, a standard range of rights is included, ranging from the right to life, liberty and security of person, equality before the judicial system, respect for private and family life, to freedom of religion, expression, assembly and the right to marry. The right to work is included (article 14) as is the right to social security, the right to education and the right of every minor child to special protective measures (article 17). The right of persons belonging to national minorities to express and develop their ethnic, linguistic, religious and cultural identity is protected (article 21), while everyone has the right to take part in public affairs, including voting (article 29). It is intended

that the implementation of the Convention be monitored by the Human Rights Commission of the CIS (article 34). Under Section II of the Regulations of the Human Rights Commission, adopted in September 1993, states parties may raise human rights matters falling within the Convention with other states parties and, if no satisfactory response is received within six months, the matter may be referred to the Commission. Domestic remedies need to be exhausted. Under Section III of the Regulations, the Commission may examine individual and collective applications submitted by any person or non-governmental organisation. The Convention entered into force on 11 August 1998 upon the third ratification.

Concerned with the level of protection afforded under this Convention (in particular the facts that the members of the Commission are appointed representatives of member states and the Commission implements the instrument by means of recommendations) and the problems of co-existence with the Council of Europe human rights system, the Parliamentary Assembly of the Council of Europe adopted a resolution in 2001 calling upon member or applicant states which are also members of the CIS not to sign or ratify the CIS Convention. In addition, it recommended that those that already had should issue a legally binding declaration stating that the European Convention procedures would not be replaced or weakened through recourse to the CIS Convention procedures.<sup>198</sup>

## **The Human Rights Chamber of Bosnia and Herzegovina**

The Chamber was established under Annex 6 of the Dayton Peace Agreement, 1995.<sup>199</sup> It consisted of fourteen members, eight of whom (not to be citizens of Bosnia or of any neighbouring state) were appointed by the Committee of Ministers of the Council of Europe.<sup>200</sup> The Chamber considered alleged or apparent violations of human rights as provided in the European Convention on Human Rights, as well as alleged or apparent discrimination on any ground. Applications could be submitted by all persons or groups of persons, including by way of referral from the Ombudsman, claiming to be a victim of a violation or acting on behalf of victims who were deceased or missing.<sup>201</sup> There were a number of admissibility requirements similar to those of international human rights bodies, including the exhaustion of effective remedies and the submission of the application within six months of the date of any final decision. The Chamber normally sat in panels<sup>202</sup> of seven, four of whom were not to be citizens of Bosnia or a neighbouring state. In such cases, the decision could be reviewed by the full Chamber.<sup>203</sup> The President could refer to the plenary Chamber any application not yet placed before a panel where a serious question was raised as to the interpretation of the Agreement or any other international agreement therein referred to or it appeared that a final decision should be taken without delay or there appeared to be any other justified reason.<sup>204</sup>

Decisions were final and binding.<sup>205</sup> The work of the Chamber, primarily concerning housing-related issues<sup>206</sup> and property rights,<sup>207</sup> steadily increased.<sup>208</sup> According to the Agreement Pursuant to Article XIV of Annex 6 of the Dayton Agreement, 2003, the mandate of the Human Rights Chamber expired on 31 December 2003. This Agreement established a five-member Human Rights Commission to operate during 2004 within the framework of the Constitutional Court of Bosnia and Herzegovina. After 1 January 2004, new cases alleging human rights violations were decided by the Constitutional Court.

## **The Inter-American Convention on Human Rights<sup>209</sup>**

The Inter-American Convention, which came into force in 1978, contains a range of rights to be protected by the states parties.<sup>210</sup> The rights are fundamentally those protected by the European Convention, but with some interesting differences.<sup>211</sup> For example, under article 4 the right to life is deemed to start in general as from conception,<sup>212</sup> while the prohibition on torture and inhuman or degrading treatment is more extensively expressed and is in the context of the right to have one's physical, mental and moral integrity respected (article 5). In addition, articles 18 and 19 of the Inter-American Convention protect the right to a name and the specific rights of the child, article 23 provides for a general right to participation in the context of public affairs and article 26 provides for the progressive achievement of the economic, social and cultural rights contained in the Charter of the Organization of American States, 1948, as amended by the Protocol of Buenos Aires, 1967.<sup>213</sup>

The Inter-American Commission on Human Rights was created in 1959 and its first Statute approved by the OAS Council in 1960. In 1971, it was recognised as one of the principal organs of the OAS.<sup>214</sup> Under its original Statute, it had wide powers to promote the awareness and study of human rights in America and to make recommendations to member states. In 1965, the Statute was revised and the Commission's powers expanded to include *inter alia* the examination of communications. With the entry into force of the 1969 Convention in 1978, the Commission's position was further strengthened. The Commission has powers regarding all member states of the OAS, not just those that have ratified the Convention, and its Statute emphasises that the human rights protected include those enumerated in both the Convention and the American Declaration of the Rights and Duties of Man.<sup>215</sup> Article 44 of the Convention provides that any person or group of persons or any non-governmental entity legally recognised in one or more of the OAS states may lodge petitions with the Commission alleging a violation of the Convention by a state party.<sup>216</sup> Contrary to the European Convention prior to its reform in Protocol 11, this right is automatic, whereas the right of inter-state

complaint, again contrary to the European Convention, is under article 45 subject to a prior declaration recognising the competence of the Commission in this regard. The admissibility requirements in articles 46 and 47 are very broadly similar to those in the European Convention, as is the procedure laid down in article 48 and the drawing-up of a report in cases in which a friendly settlement has been achieved.<sup>217</sup> The Commission has dealt with a number of issues in the individual application procedure. During 1994, for example, just under 300 cases were opened and the total number of cases being processed by early 1995 was 641.<sup>218</sup> In 2006, 1,936 complaints were received.<sup>219</sup>

The Commission has a wide-ranging competence to publicise human rights matters by way of reports, studies, lectures and so forth. It may also make recommendations to states on the adoption of progressive measures in favour of human rights and conduct on-site investigations with the consent of the state in question.<sup>220</sup> It provides states generally with advisory services in the human rights field and submits an annual report to the OAS General Assembly. Many special reports have been published dealing with human rights in particular states, e.g. Argentina, Bolivia, Chile, Colombia, Cuba, Dominican Republic, El Salvador, Guatemala, Haiti, Nicaragua, Paraguay, Suriname and Uruguay.<sup>221</sup> The Commission has also devoted attention to certain themes, such as disappearances, torture, refugees and economic and social rights.<sup>222</sup> Special Rapporteurs have been appointed, for example, on the rights of indigenous peoples, the rights of women and the rights of the child.<sup>223</sup> The Inter-American Court of Human Rights has declared that the Commission also has the authority to determine that any domestic law of a state party has violated the obligations assumed in ratifying or acceding to the Convention<sup>224</sup> and that the Commission may consequentially recommend that states repeal or amend the law that is in violation of the Convention. For the Commission to be able to do this, the law may have come to its attention by any means, regardless of whether or not that law is applied in any specific case before the Commission.<sup>225</sup> In the light of this, the Commission in 1994, for example, made a thorough study of the contempt laws (*leyes de desacato*), and concluded that many of these do not meet international human rights standards. The Commission recommended that all member states of the OAS that have such laws should repeal or amend them to bring them into line with international instruments, and with the obligations acquired under those instruments, so as to harmonise their laws with human rights treaties.<sup>226</sup>

In 1985, the OAS General Assembly adopted the Inter-American Convention to Prevent and Punish Torture,<sup>227</sup> while in 1988 an Additional Protocol on Economic, Social and Cultural Rights was signed.<sup>228</sup> Under article 19 of this instrument, states parties agreed to provide periodic reports on the progressive measures undertaken to

ensure respect for the rights set forth therein. Such reports go to the Secretary-General of the OAS, who sends them to the Inter-American Economic and Social Council and the Inter-American Council for Education, Science and Culture, with a copy to both the Inter-American Commission on Human Rights and the specialised agencies of the inter-American system. Violations by a state party of the rights to organise and join trades unions (article 8(a)) and to education (article 13) 'may give rise' to application of the system of individual or inter-state petition under the Inter-American Convention on Human Rights.

A Protocol on the Abolition of the Death Penalty was adopted on 8 June 1990<sup>229</sup> and a Convention on Forced Disappearances of Persons was adopted on 9 June 1994.<sup>230</sup> Under article 13 of this Convention, states parties agree that the processing of petitions or communications presented to the Inter-American Commission alleging the forced disappearance of persons will be subject to the procedures established under the Inter-American Convention on Human Rights, the Statute and Regulations of the Commission and the Statute and Rules of the Court. Particular reference is made to precautionary measures.<sup>231</sup> Under article 14, when the Commission receives a petition or communication alleging forced disappearance, its Executive Secretariat shall urgently and confidentially address the respective government and shall request that government to provide as soon as possible information as to the whereabouts of the allegedly disappeared person. The OAS also adopted the Inter-American Convention on the Prevention, Punishment and Eradication of Violence Against Women in 1994, which entered into force in March the following year. Article 10 provides that states parties are to include in their national reports to the Inter-American Commission of Women information on measures taken in this area, while under article 11, both states parties and the Commission of Women may request of the Inter-American Court advisory opinions on the interpretations of this Convention. Article 12 provides a procedure whereby any person, group of persons or any non-governmental entity legally recognised in one or more member states of the OAS may lodge petitions with the Inter-American Commission on Human Rights alleging violations of the duties of states under article 7 to pursue without delay and by all appropriate means policies to prevent, punish and eradicate violence against women.<sup>232</sup> The question of indigenous peoples has also been addressed and on 18 September 1995, the Inter-American Commission adopted a Draft Declaration on the Rights of Indigenous Peoples.<sup>233</sup>

The Commission itself consists of seven members elected in a personal capacity by the OAS General Assembly for four-year terms.<sup>234</sup> The Commission may indicate precautionary measures as provided for in article 25 of the Commission's Rules of Procedure. This grants the Commission the power in serious and urgent cases, and whenever necessary according to the information available, either on its

own initiative or upon request by a party, to request that the state concerned adopt precautionary measures to prevent irreparable harm to persons. The Commission may also request information from the interested parties related to any aspect of the adoption and observance of the precautionary measures.<sup>235</sup> Of particular interest has been the granting of precautionary measures in favour of individuals captured in connection with the US-led military operation against the former Taliban regime in Afghanistan and the Al-Qaida organisation and their detention at the US naval base at Guantanamo Bay, Cuba. Such measures were first granted on 12 March 2002 and requested that the United States take the ‘urgent measures necessary to have the legal status of the detainees at Guantanamo determined by a competent tribunal’. The Commission considered that, without this determination, the fundamental and non-derogable rights of the detainees might not be recognised and guaranteed by the United States. Such measures were repeated on four separate occasions and amplified in response to information indicating the possible torture or other cruel, inhuman or degrading treatment or punishment of detainees at Guantanamo Bay or the possible removal of detainees to jurisdictions where they could be subjected to torture. As these measures were not complied with – the US arguing that the Commission lacked jurisdiction – the Commission adopted resolution no. 2/06 on 28 July 2006, noting that the failure of the United States to give effect to the Commission’s precautionary measures had resulted in irreparable prejudice to the fundamental rights of the detainees at Guantanamo Bay, including their rights to liberty and to humane treatment, and urging the US to close the Guantanamo Bay facility without delay; to remove the detainees from Guantanamo Bay through a process undertaken in full accordance with applicable forms of international human rights and humanitarian law; to ensure that detainees who may face a risk of torture elsewhere are provided with a fair and independent examination of their circumstances and to ensure that any instances of torture at Guantanamo Bay are investigated, prosecuted and punished.<sup>236</sup>

Where in the case of petitions received, a friendly settlement has not been achieved,<sup>237</sup> then under article 50 a report will be drawn up, together with such proposals and recommendations as are seen fit, and transmitted to the parties. The Commission may, under article 46 of the Rules of Procedure, adopt the follow-up measures it deems appropriate, such as requesting information from the parties and holding hearings in order to verify compliance with friendly settlement agreements and its recommendations and report thereon. It also publishes a table indicating whether its recommendations have achieved total or partial compliance from the state concerned or whether compliance is pending.<sup>238</sup>

After its report, a three-month period is then available during which the Commission or the state concerned (but not the individual concerned) may go to the

Inter-American Court of Human Rights.<sup>239</sup> The Court consists of seven judges serving in an individual capacity and elected by an absolute majority of the states parties to the Convention in the OAS General Assembly for six-year terms.<sup>240</sup> The jurisdiction of the Court is subject to a prior declaration under article 62. Article 63(2) of the Convention provides that, in cases of extreme gravity and urgency, and when necessary to avoid irreparable damage to persons, the Court, in matters not yet submitted to it, may adopt such provisional measures as it deems pertinent in matters under its consideration. Where a case has not yet been submitted to it, the Court may act at the request of the Commission. This power has been used on a number of occasions.<sup>241</sup>

Under article 64, the Court also possesses an advisory jurisdiction with regard to the interpretation of the Inter-American Convention and other conventions concerning the protection of human rights in the American states at the request of any member state of the OAS. The Court has dealt with a variety of important issues by way of advisory opinions.<sup>242</sup> In *Definition of Other Treaties Subject to the Interpretation of the Inter-American Court*,<sup>243</sup> the Court took the view that the object of the Convention was to integrate the regional and universal systems of human rights protection and that, therefore, any human rights treaty to which American states were parties could be the subject of an advisory opinion. In *The Effect of Reservations*,<sup>244</sup> the Court stressed that human rights treaties involve the establishment of legal orders within which obligations are created towards all individuals within their jurisdiction and concluded that an instrument of ratification of adherence containing a reservation compatible with the object and purpose of the Convention does not require acceptance by the other states parties and the instrument thus enters into force as of the moment of deposit.<sup>245</sup> In a manner reminiscent of and clearly influenced by the European Court of Human Rights, the Inter-American Court stated that human rights treaties were different in nature from traditional multilateral treaties, since they focused not upon the reciprocal exchange of rights for the mutual benefit of the contracting states, but rather upon the protection of the basic rights of individuals. The obligations were *erga omnes*, rather than with regard to particular other states.<sup>246</sup>

In an important discussion of freedom of expression in the *Licensing of Journalists* case,<sup>247</sup> the Court advised that the compulsory licensing of journalists was incompatible with article 13, the freedom of expression provision in the Convention, if it denied any person access to the full use of the media as a means of expressing opinions. The Court emphasised that freedom of expression could only be restricted on the basis of 'compelling governmental interest' and that the restriction must be 'closely tailored to the accomplishment of the legitimate governmental objective necessitating it'.<sup>248</sup> In the *Habeas Corpus* case,<sup>249</sup> the Court declared that

the writ of habeas corpus was a non-suspendable 'judicial guarantee' for the protection of rights from which no derogation was permitted under the Convention under article 27. Reference was made to the 'inseparable bond between the principle of legality, democratic institutions and the rule of law'. The Court also emphasised that only democratic governments could avail themselves of the right to declare a state of emergency and then only under closely circumscribed conditions. The Court has also addressed the issue of the relationship between itself and the American Declaration of the Rights and Duties of Man, 1948 in the *Interpretation of the American Declaration* case.<sup>250</sup> In an opinion likely to be of significance in view of the fact that, for example, the USA is not a party to the Convention but, as a member of the OAS, has signed the Declaration, the Court stressed that in interpreting the Declaration regard had to be had to the current state of the Inter-American system and that, by a process of authoritative interpretation, the member states of the OAS have agreed that the Declaration contains and defines the human rights norms referred to in the OAS Charter.<sup>251</sup> Since the Charter was a treaty, the Court could, therefore, interpret the Declaration under article 64.<sup>252</sup> This rather ingenious argument is likely to open the door to a variety of advisory opinions on a range of important issues.

In the *Right to Information on Consular Assistance* opinion requested by Mexico,<sup>253</sup> the Court declared that article 36 of the Vienna Convention on Consular Relations, 1963, providing for the right to consular assistance of detained foreign nationals,<sup>254</sup> was part of international human rights law and that the state must comply with its duty to inform the detainee of the rights that the article confers upon him at the time of his arrest or at least before he makes his first statement before the authorities. Further, it was held that the enforceability of the right was not subject to the protests of the sending state and that the failure to observe a detained foreign national's right to information, recognised in article 36(1)(b) of the Vienna Convention, was prejudicial to the due process of law. In such circumstances, imposition of the death penalty constituted a violation of the right not to be deprived of life 'arbitrarily', as stipulated in the relevant provisions of the human rights treaties,<sup>255</sup> involving therefore the international responsibility of the state and the duty to make reparation.

The exercise of the Court's contentious jurisdiction was, however, less immediately successful. In the *Gallardo* case,<sup>256</sup> the Court remitted the claim to the Commission declaring it inadmissible, noting that a state could not dispense with the processing of the case by the Commission, while in the *Velásquez Rodríguez*<sup>257</sup> and *Godínez Cruz*<sup>258</sup> cases the Court in 'disappearance' situations found that Honduras had violated the Convention.<sup>259</sup> In the former case, it was emphasised that states had a legal responsibility to prevent human rights violations and to use the means at

their disposal to investigate and punish such violations. Where this did not happen, the state concerned had failed in its duty to ensure the full and free exercise of these rights within the jurisdiction.<sup>260</sup> In *Loayza Tamayo v. Peru*, the Court held Peru responsible for a number of breaches of the Convention concerned with the detention and torture of the applicant and for the absence of a fair trial.<sup>261</sup> In *Chumbipuma Aguirre v. Peru*, the *Barrios Altos* case, the Court tackled the issue of domestic amnesty laws and held that the Peruvian amnesty laws in question were incompatible with the Inter-American Convention and thus void of any legal effect.<sup>262</sup> The Court has also addressed the question of indigenous peoples in several cases, in which it has emphasised the close ties of such peoples with their traditional lands and the natural resources associated with their culture in the context particularly of the right to the use and enjoyment of property in article 21 of the Convention. It has concluded that the traditional possession of their lands by indigenous peoples has equivalent effects to those of a state-granted full property title; that traditional possession entitles indigenous peoples to demand official recognition and registration of property titles; that members of such peoples who have been obliged to leave their traditional lands maintain property rights thereto even though they lack legal title, unless the lands have been lawfully transferred to innocent third parties; and that in the latter instance, such members are entitled to restitution thereof or to obtain other lands of equal extension and quality.<sup>263</sup> It has also decided that a Chilean court was wrong to revoke custody of children on the basis of a woman's sexual orientation.<sup>264</sup>

## **The Banjul Charter on Human and Peoples' Rights<sup>265</sup>**

This Charter was adopted by the Organization of African Unity in 1981 and came into force in 1986. Currently all fifty-three members of the African Union (as the OAU was renamed in 2000) are parties.<sup>266</sup> The Charter contains a wide range of rights, including in addition to the traditional civil and political rights, economic, social and cultural rights and various peoples' rights. In this latter category are specifically mentioned the rights to self-determination, development and a generally satisfactory environment.<sup>267</sup> The reference to the latter two concepts is unusual in human rights instruments and it remains to be seen both how they will be interpreted and how they will be implemented.

One question that is immediately posed with respect to the notion of 'peoples' rights' is to ascertain the definition of a people. If experience with the definition of self-determination in the context of the United Nations is any guide,<sup>268</sup> and bearing in mind the extreme sensitivity which African states have manifested with regard to the stability of the existing colonial borders,<sup>269</sup> then the principle is likely to be

interpreted in the sense of independent states. This was confirmed in the *Katangese Peoples' Congress v. Zaire*,<sup>270</sup> where the Commission declared that Katanga was obliged to exercise a variant of self-determination that was compatible with the sovereignty and territorial integrity of Zaire.

The African Charter is the first human rights convention that details the duties of the individual to the state, society and family.<sup>271</sup> Included are the duties to avoid compromising the security of the state and to preserve and strengthen social and national solidarity and independence. It remains to be seen whether this distinctive approach brings with it more problems than advantages.

The Charter set up the African Commission on Human and Peoples' Rights, consisting of eleven persons appointed by the Conference of the Heads of State and Government of the OAU for six-year renewable terms, to implement the Charter. The Secretary to the Commission is appointed by the Secretary-General of the Organization of African Unity. The Commission has important educational and promotional responsibilities,<sup>272</sup> including undertaking studies, organising conferences, disseminating information and making recommendations to governments. This is quite unlike the European Commission as it used to be prior to Protocol 11, but rather more similar to the Inter-American Commission. The African Commission has developed a range of special mechanisms, including the appointment of Special Rapporteurs (not being independent experts but Commission members)<sup>273</sup> and working groups;<sup>274</sup> and the adoption of country and thematic resolutions.<sup>275</sup>

The Commission may hear as of right inter-state complaints.<sup>276</sup> The first such complaint was brought in 1999 by the Democratic Republic of the Congo alleging *inter alia* that it had been the victim of aggression perpetrated by Burundi, Rwanda and Uganda. The Commission held that the respondent states had contravened the principle of the peaceful settlement of disputes and had violated article 23 of the African Charter concerning the right to peace. It concluded that the three states concerned had occupied parts of the Congo in violation of the Charter and had committed a series of human rights violations as a consequence.<sup>277</sup>

Other, non-state, communications may also be sent to the Commission and the terminology used is far more flexible than is the case in the other regional human rights systems.<sup>278</sup> Where it appears that one or more communications apparently relates to special cases which reveal the existence of a series of serious or massive violations of rights, the Commission will draw the attention of the Assembly of Heads of State and Government to these special cases. The Commission may then be asked to conduct an in-depth study of these cases and make a factual report, accompanied by its finding and recommendations.<sup>279</sup> The Commission is able to

suggest provisional measures where appropriate.<sup>280</sup> The Commission adopted Rules of Procedure in 1988, which were amended in 1995.<sup>281</sup> A number of important individual communications have been dealt with.<sup>282</sup> In addition, there is an obligation upon states parties to produce reports every two years upon the measures taken to implement the rights under the Charter.<sup>283</sup> The Commission was given authority by the OAU to study the reports and make observations upon them and has indeed adopted guidelines. However, to date, it is fair to conclude that the reporting procedure has encountered serious problems, not least in that many states have failed to submit reports or adequate reports,<sup>284</sup> while the financial resources difficulties faced by the Commission have been significant.

No provision was made for a Court in the Charter, but a Protocol on the Establishment of an African Court of Human and Peoples' Rights was signed in 1998.<sup>285</sup> Under this Protocol, the Court has advisory, conciliatory and contentious jurisdiction. The African Commission, states parties and African intergovernmental organisations have automatic access to the Court,<sup>286</sup> but not individuals or non-governmental organisations, whose access depends upon the state concerned having made a declaration accepting the jurisdiction of the Court to hear relevant applications.<sup>287</sup> A Protocol was adopted in 2003 concerning the Court of Justice of the African Union. The AU decided to merge the two courts in 2004 and the protocol accomplishing this was adopted in 2008. This requires that the Constitutive Act of the AU be read in reference to the African Court of Justice and Human Rights. The new Court was to be divided into two Sections, a General Affairs Section and a Human Rights Section, both composed of eight judges. The former has the competence to hear all cases, except those concerning human and/or peoples' rights, which are reserved for the Human Rights Section. Each Section may decide to refer a case to the Full Court for consideration.<sup>288</sup>

## **The Arab Charter on Human Rights<sup>289</sup>**

An Arab Charter on Human Rights was adopted by the Council of the League of Arab States on 15 September 1994 and a revised version was adopted by the League of Arab States in May 2004. It affirms the principles contained in the UN Charter, the Universal Declaration of Human Rights, the International Covenants on Human Rights and the Cairo Declaration on Human Rights in Islam.<sup>290</sup> Reference is made to the national identity of the Arab states and the right to self-determination is affirmed. A number of traditional human rights are also provided for, including the right to liberty and security of persons, equality of persons before the law, fair trial, protection of persons from torture, the right to own private property, freedom to practise religious observance and freedom of peaceful assembly and association.<sup>291</sup>

The Charter also provides for the election of a seven-person Arab Human Rights Committee to consider states' reports.<sup>292</sup> The Charter came into force on 24 January 2008<sup>293</sup> upon the seventh ratification.<sup>294</sup>

<sup>11</sup> All forty-seven member states of the Council of Europe have ratified the Convention.

<sup>12</sup> Note that Protocol No. 15, which is not yet in force, introduces a reference to the principle of subsidiarity and the doctrine of the margin of appreciation. It also reduces from six to four months the time limit within which an application may be made to the Court following the date of a final domestic decision. Protocol No. 16, which is similarly not yet in force, will allow the highest courts and tribunals of a State Party to request the Court to give advisory opinions on questions of principle relating to the interpretation or application of the rights and freedoms defined in the Convention or the protocols thereto. Economic and social rights are covered in the European Social Charter, 1961. See below, p. 260.

<sup>13</sup> The UK incorporated the Convention in the Human Rights Act 1998. See e.g. J. Polakiewicz and V. Jacob-Foltzer, 'The European Human Rights Convention in Domestic Law', 12 HRLJ, 1991, pp. 65 and 125, and Harris *et al.*, *Law of the European Convention*, p. 23 ff.

<sup>23</sup> Series A, vol. 310, p. 20; 103 ILR, p. 622. See also *Cyprus v. Turkey*, European Court of Human Rights, Judgment of 10 May 2001, paras. 75 ff.; 120 ILR, p. 10.

<sup>24</sup> Judgment of 12 December 2001, paras. 63, 67 and 71; 123 ILR, pp. 110, 111 and 113. The Court noted that ‘the Convention is a multi-lateral treaty operating...in an essentially regional context and notably in the legal space (*espace juridique*) of the contracting states’, *ibid.*, para. 80. See also *Issa v. Turkey*, Judgment of 16

November 2004, paras. 65 ff., where the Court held that the degree of control exercised by Turkish troops during a large-scale incursion into northern Iraq did not amount to overall control, and *Assanidze v. Georgia*, Judgment of 8 April 2004.

<sup>25</sup> Judgment of 8 July 2004 at paras. 312–13.

<sup>26</sup> *Ibid.*, paras. 314–19. Note that this did not absolve the legitimate state deprived of control from all responsibility, *ibid.*, para. 331. See also *Catan v. Moldova and Russia*, Judgment of 19 October 2012.

<sup>27</sup> Judgment of 16 November 2004. See also *Pad v. Turkey*, Judgment of 28 June 2007.

<sup>28</sup> See also *Medvedyev v. France*, Judgment of 29 March 2010, with regard to France's control over a Cambodian vessel and *Al-Saadoon and Mufdhi v. United Kingdom*, Judgment of 3 July 2009 with regard to UK control over a prison.

<sup>29</sup> Judgment of 7 July 2011, paras. 136–7.

<sup>30</sup> This was accepted and applied by the UK Supreme Court in *Smith v. MOD* [2013] UKSC 41.

<sup>31</sup> Judgment of 2 May 2007, paras. 141 ff.; similarly with regard to those activities falling within the framework of the UNMIK, deemed to be a subsidiary organ of the Security Council, para. 143. But see *Bosphorus Airways v. Ireland*, Judgment of 30 June 2005. Cf. G. Gaja, *Seventh Report on Responsibility of International Organizations*, A/CN.4/610, 2009, at pp. 10–12.

<sup>32</sup> Judgment of 7 July 2011, para. 102.

<sup>33</sup> Articles 22 and 23. Note that there will no longer be a prohibition on two judges having the same nationality. The terms of office of the judges will end at the age of seventy.

<sup>34</sup> Article 26.

<sup>35</sup> Rule 25, European Court of Human Rights, Rules of Court, July 2013. There are now five Sections.

<sup>36</sup> Rules 26 and 27.

<sup>37</sup> Article 25 and Rule 8.

<sup>38</sup> Article 27 and Rule 49.

<sup>39</sup> Article 28.

<sup>40</sup> Article 29.

<sup>41</sup> Rule 49.

<sup>42</sup> Rule 59.

<sup>43</sup> In the case of inter-state cases, the respondent government will be automatically contacted: see Rule 51.

<sup>44</sup> Article 30. Note that the provision ‘unless one of the parties objects’ will be removed once Protocol No. 15 is in force. While there is no specific power in the Convention under which the Court may order interim measures of protection with binding effect, Rule 39 of the Rules of Court provides that the Chamber or, where appropriate, the President of the Section or a duty judge may, at the request of a party or of any other person concerned, or of its own motion, indicate to the parties any interim measure which it considers should be adopted in the interests of the parties or of the proper conduct of the proceedings before it. The Court in *Mamatkulov and Abdurasulovic v. Turkey*, Judgment of 6 February 2003, referring to the practice of other international organs including the International Court of Justice and the Inter-American Court and Commission of Human Rights, held that article 34 of the Convention requires that applicants are entitled to exercise their right to individual application effectively, while article 3, relevant in the context of expulsion, also necessitated an effective examination of the issues in question. The Court noting that Rule 39 indications ‘permit it to carry out an effective examination

of the application and to ensure that the protection afforded by the Convention is effective’, concluded that ‘any state party to the Convention to which interim measures have been indicated in order to avoid irreparable harm being caused to the victim of an alleged violation must comply with those measures and refrain from any act or omission that will undermine the authority and effectiveness of the final judgment’, paras. 107–10.

<sup>45</sup> Article 47. Only the Committee of Ministers can make such a request and advisory opinions cannot deal with any question relating to the content or scope of the rights and freedoms laid down in Section 1 of the Convention and its Protocols or with any question which the Court or Committee of Ministers might have to consider during proceedings instituted in accordance with the Convention. The first request for an advisory opinion concerned the co-existence of the Convention on Human Rights of the Commonwealth of Independent States and the European Convention on Human Rights, but on 2 June 2004 the Court concluded unanimously that the request did not come within its advisory competence. The first advisory opinion was given on 12 February 2008, where the Court unanimously concluded that it was not compatible with the European Convention on Human Rights for a list of candidates for election to the post of judge at the Court to be rejected on the sole ground that there was no woman included in the proposed list and called for exceptions to the principle that lists must contain a candidate of the under-represented sex to be defined as soon as possible. See now Protocol No. 16, which when it comes into force will allow for the ‘highest courts and tribunals’ of contracting states to seek an advisory opinion from the Grand Chamber, but only in the context of a case before such requesting court or tribunal. The government of the state of the requesting court or tribunal and the Commissioner of Human Rights would have the right to participate, while the court has expressed the view that it would, as a matter of course, invite the parties to the domestic proceedings before the requesting court or tribunal to take part in the procedure before the European Court, see Opinion of the Court of 6 May 2013, [http://echr.coe.int/Pages/home.aspx?p=basictexts&c=#n13739062744461326038770\\_pointer](http://echr.coe.int/Pages/home.aspx?p=basictexts&c=#n13739062744461326038770_pointer). See also the Court’s Practice Direction on Interim Measures, last amended in 2011, [www.echr.coe.int/Documents/PD\\_interim\\_measures\\_ENG.pdf](http://www.echr.coe.int/Documents/PD_interim_measures_ENG.pdf) and the interim measures granted on 13 March 2014 in the Ukraine–Russia interstate application calling on both Ukraine and Russia to refrain from taking any measures, in particular military actions, which might entail breaches the rights of civilians under the European Convention on Human Rights, [http://hudoc.echr.coe.int/sites/eng-press/pages/search.aspx?i=003-4699472-5703982#{%22itemid%22:\[%22003-4699472-5703982%22\]}](http://hudoc.echr.coe.int/sites/eng-press/pages/search.aspx?i=003-4699472-5703982#{%22itemid%22:[%22003-4699472-5703982%22]})

<sup>46</sup> Article 36.

<sup>47</sup> Articles 38 and 39. Proceedings in the latter case will be confidential.

<sup>48</sup> Article 39.

<sup>49</sup> Article 41.

<sup>50</sup> Article 44.

<sup>51</sup> Article 46(1).

<sup>52</sup> Article 46(2). If the Committee of Ministers considers that the supervision of the execution of a final judgment is hindered by a problem of interpretation of the judgment, it may refer the matter to the Court for a ruling on the question of interpretation. A referral decision requires a majority vote of two thirds of the representatives entitled to sit on the committee. If the Committee of Ministers considers that a High Contracting Party refuses to abide by a final judgment in a case to which it is a party, it may, after serving formal notice on that Party and by decision adopted by a majority vote of two thirds of the representatives entitled to sit on the committee, refer to the Court the question whether that Party has failed to fulfil its obligation under paragraph 1. If the Court finds a violation of paragraph 1, it shall refer the case to the Committee of Ministers for consideration of the measures to be taken. If the Court finds no violation of article 46(1), it shall refer the case to the Committee of Ministers, which shall close its examination of the case: article 46(3)–(5).

<sup>53</sup> *Cyprus case (Greece v. UK)*, 1956 and 1957, two applications; *Austria v. Italy*, 1960; five applications against Greece, 1967–70; *Ireland v. UK*, 1971; *Cyprus v. Turkey*, 1974–94, four applications, and five applications against Turkey, 1982 brought by Denmark and four other states; application brought by Denmark against Turkey, 1997; *Georgia v. Russia*, three applications brought by Georgia, 2007 (admissibility decision of 30 June 2009), 2008, and 2009 (struck out).

<sup>54</sup> Series A, vol. 25, 1978; 58 ILR, p. 188. Note also the Court's decision in *Cyprus v. Turkey*, Judgment of 10 May 2001; 120 ILR, p. 10.

<sup>55</sup> *Cyprus v. Turkey (Third Application)* 13 DR 85 (1978).

<sup>56</sup> The total number of applications allocated to a judicial formation in 2012 was 65,150. As at 31 December 2012, there were a total of 128, 100 applications pending before a judicial formation: see Annual Report for 2012, [http://echr.coe.int/Pages/home.aspx?p=echrpublications&c=#newComponent\\_1345118680892\\_pointer](http://echr.coe.int/Pages/home.aspx?p=echrpublications&c=#newComponent_1345118680892_pointer).

<sup>57</sup> Note that the issue of reservations to former articles 25 and 46 (concerning the jurisdiction of the Court prior to Protocol XI) was discussed in the case-law. The Court noted that while temporal reservations could be valid, reservations beyond this were not: see *Loizidou v. Turkey (Preliminary Objections)*, Series A, vol. 310, 1995; 103 ILR, p. 622. The Court, in dismissing the territorial limitations upon the Turkish declarations under articles 25 and 46, held that such declarations therefore took effect as valid declarations without such limitations, Series A, vol. 310 pp. 27–9. Turkey had argued that if the limitations were not upheld, the declarations themselves would fall. Not to adopt this approach would, the Court noted, have entailed a weakening of the Convention system for the protection of human rights, which constituted a European constitutional public order, and would run counter to the aim of greater unity in the maintenance and further realisation of human rights, *ibid*. See also the Commission Report in *Chrysostomos v. Turkey* 68 DR 216.

<sup>58</sup> See e.g. *X v. Austria* 7 DR 87 (1976) concerning legislation on abortion.

<sup>59</sup> See e.g. *Pine Valley v. Ireland*, Series A, vol. 222, 1991; *Johnston v. Ireland*, Series A, vol. 112, 1986; *Marckx v. Belgium*, Series A, vol. 31, 1979; *Campbell and Cosans v. UK*, Series A, vol. 48, 1982; *Eckle v. Federal Republic of Germany*, Series A, vol. 51, 1982 and *Vijayanathan and Pusparajah v. France*, Series A, vol. 241-B, 1992.

<sup>60</sup> The *Klass* case, Series A, vol. 28, 1979, pp. 17–18; 58 ILR, pp. 423, 442. See also e.g. the *Marckx* case, Series A, vol. 31, 1979, pp. 12–14; 58 ILR, pp. 561, 576; the *Dudgeon* case, Series A, vol. 45, 1982, p. 18; 67 ILR, pp. 395, 410; the *Belgian Linguistics* case, Series A, vol. 6, 1968; 45 ILR, p. 136 and *Norris v. Ireland*, Series A, No. 142, 1988; 89 ILR, p. 243.

<sup>61</sup> See e.g. Application 100/55, *X v. FRG*, 1 *Yearbook of the ECHR*, 1955–7, p. 162

and Application 1478/62, *Y v. Belgium*, *Yearbook of the ECHR*, 1963, p. 590. See also *Cyprus v. Turkey*, Judgment of 10 May 2001; 120 ILR, p. 10.

<sup>62</sup> Article 35. See *Akdivar v. Turkey*, Judgment of 16 September 1996. Note that the six-month time limit will be reduced to four months once Protocol No. 15 is in force. As to the meaning of domestic or local remedies in international law, see below, p. 595.

<sup>63</sup> See e.g. *X v. UK*, 8 DR, pp. 211, 212–13 and *Cyprus v. Turkey*, *Yearbook of the European Convention on Human Rights*, 1978, pp. 240–2. Where, however, there is a permanent state of affairs which is still continuing, the question of the six-month rule can only arise after the state of affairs has ceased to exist: see e.g. *De Becker v. Belgium*, 2 *Yearbook of the European Convention on Human Rights*, 1958, pp. 214, 244. The rule is strict and cannot be waived by the state concerned: see *Walker v. UK*, Judgment of 25 January 2000.

<sup>64</sup> See *Cyprus v. Turkey*, Judgment of 10 May 2001, paras. 82 ff. Note that the Court suggested that the remedies provided by the ‘Turkish Republic of Northern Cyprus’ had to be taken into account in this situation, *ibid.*

<sup>65</sup> See e.g. *Boyle and Rice v. UK*, Series A, vol. 131, 1988. This does not apply to inter-state cases.

<sup>66</sup> Article 35. See *Jacobs, White and Overy*, *The European Convention on Human Rights*, chapter 2 and e.g. the *Vagrancy* case, Series A, vol. 12, 1971; 56 ILR, p. 351.

<sup>67</sup> Article 35(3)b. The phrase ‘and provided that no case may be rejected on this ground which has not been duly considered by a domestic tribunal’ is to be deleted once Protocol No. 15 is in force.

<sup>68</sup> One judgment was delivered in its first year of operation in 1960; 6 in 1976; 17 in 1986; 126 in 1996; 844 in 2002 and 1,678 in 2012: see *Analysis of Statistics 2012*, [http://echr.coe.int/Pages/home.aspx?p=reports&c=#n1347956867932\\_pointer](http://echr.coe.int/Pages/home.aspx?p=reports&c=#n1347956867932_pointer).

<sup>69</sup> See e.g. P. Mahoney, ‘Judicial Activism and Judicial Self-Restraint in the European Court of Human Rights: Two Sides of the Same Coin’, 11 HRLJ, 1990, p.

57.

<sup>70</sup> Series A, No. 258-B, 1994, para. 43.

<sup>71</sup> See e.g. *Handyside v. UK*, Series A, vol. 24, 1981; 58 ILR, p. 150.

<sup>72</sup> E.g. fair trial and due process questions: see e.g. *The Sunday Times v. UK*, Series A, vol. 30, 1979; 58 ILR, p. 491.

<sup>73</sup> Judgment of 10 May 2001, para. 103. Note that once Protocol No. 15 is in force, the phrase ‘Affirming that the High Contracting Parties, in accordance with the principle of subsidiarity, have the primary responsibility to secure the rights and freedoms defined in this Convention and the Protocols thereto, and that in doing so they enjoy a margin of appreciation, subject to the supervisory jurisdiction of the European Court of Human Rights established by this Convention’ will be inserted at the end of the preamble to the Convention.

<sup>74</sup> See e.g. the *Tanli* case, Judgment of 10 April 2001.

<sup>75</sup> The *Vgt Verein gegen Tierfabriken* case, Judgment of 28 June 2001, para. 78.

<sup>76</sup> Series A, vol. 25, 1978; 58 ILR, p. 188.

<sup>77</sup> See also *Cyprus v. Turkey*, where the Court held that the discriminatory treatment of the Greek Cypriots in the Turkish occupied north of Cyprus amounted to degrading treatment, Judgment of 10 May 2001, paras. 302–11; 120 ILR, p. 10.

<sup>78</sup> Series A, vol. 324, 1995.

<sup>79</sup> Series A, vol. 18, 1975; 57 ILR, p. 200.

- <sup>90</sup> E.g. *Tanli*, Judgment of 10 April 2001, para. 152.
- <sup>91</sup> *Cyprus v. Turkey*, Judgment of 10 May 2001, para. 132; 120 ILR, p. 10.
- <sup>92</sup> *LCB v. UK*, Judgment of 9 June 1998.
- <sup>93</sup> *Soering v. UK*, Judgment of 7 July 1989, at para. 120. See also *Aksoy v. Turkey*, Judgment of 18 December 1996, at para. 95 and *Akdeniz v. Turkey*, Judgment of 31

May 2005, at para. 138.

<sup>94</sup> E.g. *Kaya v. Turkey*, Judgment of 19 February 1998, at para. 107; *Ilhan v. Turkey*, Judgment of 27 June 2000, at para. 97; *Kurt v. Turkey*, Judgment of 25 May 1998, at para. 140 and *Kudla v. Poland*, Judgment of 26 October 2000, at paras. 146–9. The Court has noted that ‘the requirements of Article 13 are broader than a Contracting State’s obligation under Article 2 to conduct an effective investigation into the disappearance of a person last seen in the hands of the authorities’, *Akdeniz v. Turkey*, Judgment of 31 May 2005, at para. 139 and *Estamirov and Others v. Russia*, Judgment of 12 October 2006, at para. 118.

<sup>95</sup> Article 46(2).

<sup>96</sup> Article 13 of the Statute of the Council of Europe.

<sup>97</sup> Article 14 of the Statute of the Council of Europe.

<sup>98</sup> These are non-binding. Resolutions relate to the general work of the Council as such, while recommendations concern action which it is suggested should be taken by the governments of member states.

<sup>99</sup> Rules 3 and 4 of the Rules of Procedure of the Committee of Ministers. Very occasionally there have been difficulties. For example, the decision of the Court in *Loizidou v. Turkey* awarding the applicant compensation for deprivation of property rights remains to be implemented: see e.g. *Jacobs, White and Overy, The European Convention on Human Rights*, chapter 3. See also e.g. interim Committee resolutions DH (2000) 105 and DH (2001) 80. Note that where the Court finds a systemic defect in the national legal order, which has or is likely to produce a large number of applications, a remedy may be required of the state that would apply to the class of individuals in the same category: see *Broniowski v. Poland*, Judgment of 22 June 2004. See also V. Colandrea, ‘On the Power of the European Court of Human Rights to Order Specific Non-monetary Measures’, 7 *Human Rights Law Review*, 2007, p. 396.

<sup>100</sup> Rule 5.

**101** See e.g. D.J. Harris, *The European Social Charter*, 2nd edn, Charlottesville, 2000, ‘A Fresh Impetus for the European Charter’, 41 ICLQ, 1992, p. 659, and ‘The System of Supervision of the European Social Charter – Problems and Options for the Future’ in *The Future of European Social Policy* (ed. L. Betten), 2nd edn, Deventer, 1991, p. 1; *25 Years of the European Social Charter* (eds. A. P. C. M. Jaspers and L. Betten), 1988; Rehman, *International Human Rights Law*, p. 233 ff; H. Wiebringhaus, ‘La Charte Sociale Européenne: 20 Ans Après la Conclusion du Traité’, AFDI, 1982, p. 934; O. Kahn-Freund, ‘The European Social Charter’ in *European Law and the Individual* (ed. F. G. Jacobs), London, 1976, and ‘La Charte Sociale Européenne et la Convention Européenne des Droits de l’Homme’, 8 HRJ, 1975, p. 527; F. M. Van Asbeck, ‘La Charte Sociale Européenne’ in *Mélanges Rolin*, Paris, 1964, p. 427, and T. Novitz, ‘Remedies for Violation of Social Rights Within the Council of Europe’ in *The Future of Remedies in Europe* (eds. C. Kilpatrick, T. Novitz and P. Skidmore), London, 2000, p. 230. See also <http://www.coe.int/T/DGHL/Monitoring/SocialCharter/>

**102** As at March 2013, there were forty-three states parties to the Charter.

**103** Articles 1–6, 9–10.

**104** Articles 7–8, 15, 18–19.

**105** Articles 11–14.

**106** Articles 16–17. An Additional Protocol was signed in 1988 which added four more economic and social rights, guaranteeing the rights to equal opportunities in employment without discrimination based on sex; information and consultation of workers within the undertaking; participation in the determination and improvement of working conditions, and social protection of elderly persons. The Protocol entered into force on 4 September 1992.

**107** Out of the following seven rights: the right to work, organise, bargain collectively, social security, social and medical assistance, and the rights of the family to special protection and of migrant workers and their families to protection and assistance: see article 20.

**108** As amended by the Turin Protocol 1991 and as revised in 1996. The revised Charter came into force in 1999 and gathered together the rights contained in the 1961 instrument as amended and the 1988 Protocol and added new rights, such as the right to protection against poverty and social exclusion, the right to housing, the right to protection in cases of termination of employment and the right to protection against sexual harassment in the workplace.

**109** These groups are employment, training and equal opportunities; health, social security and social protection; labour rights; and children, families and migrants respectively.

**110** Article 1.

**111** Article 2.

**112** See e.g. M. Evans and R. Morgan, *Combating Torture in Europe – The Work and Standards of the European Committee for the Prevention of Torture*, Strasbourg, 2001; J. Murdoch, ‘The Work of the Council of Europe’s Torture Committee’, 5 EJIL, 1994, p. 220; M. Evans and R. Morgan, ‘The European Torture Committee: Membership Issues’, 5 EJIL, 1994, p. 249; A. Cassese, ‘A New Approach to Human Rights: The European Convention for the Prevention of Torture’, 83 AJIL, 1989, p. 128, and Cassese, ‘Une Nouvelle Approche des Droits de l’Homme: La Convention Européenne pour la Prévention de la Torture’, 93 RGDIP, 1989, p. 6; M. Evans and R. Morgan, ‘The European Convention on the Prevention of Torture: Operational Practice’, 41 ICLQ, 1992, p. 590, and C. Jenkins, ‘An Appraisal of the Role and Work of the European Committee for the Prevention of Torture and Inhuman or Degrading Treatment or Punishment’, SOAS Working Paper No. 11, 1996. See also [www.cpt.coe.int/en/](http://www.cpt.coe.int/en/)

**113** All forty-seven members of the Council of Europe are parties. By Protocol No. 1 non-member states of the Council of Europe are allowed to accede to the Convention at the invitation of the Committee of Ministers, CPT/Inf (93) 17. This came into force in March 2002.

**114** The Committee established under the Convention described its function in terms of strengthening ‘the *cordon sanitaire* that separates acceptable and unacceptable treatment or behaviour’: see First General Report, CPT (91) 3, para. 3.

**115** See Resolution DH (89) 26 of the Committee of Ministers adopted on 19 September 1989 for the election of the members of the Committee. Note that under Protocol No. 2 to the Convention, the members of the Committee may be re-elected twice (rather than once as specified in article 5). The Protocol came into force in March 2002.

**116** See Fifth General Report, CPT/Inf (95) 10, 1995, p. 3.

**117** See articles 1 and 7. See also the Rules of Procedure of the Committee, 1989, CPT/Inf (89) 2, especially Rules 29–35. The Rules have been amended on a number of occasions, the most recent being 12 March 1997. See also Seventeenth General Report, 2007, CPT/Inf (2007) 39, p. 14.

**118** Note that as of July 2013, 206 periodic visits had been made, see [www.cpt.coe.int/en/about.htm](http://www.cpt.coe.int/en/about.htm)

**119** As of July 2013, 138 ad hoc visits had been made, see [www.cpt.coe.int/en/about.htm](http://www.cpt.coe.int/en/about.htm) See also Murdoch, ‘Work of the Council of Europe’s Torture Committee’, p. 227.

**120** Rule 9 of the Rules of Procedure, 2008.

**121** *Ibid.*, Rule 30.

**122** Article 2.

**123** Article 9(1).

**124** Article 8.

**125** As does the information gathered by the Committee in relation to a visit and its consultations with the contracting state concerned, article 11(1).

**126** See Rule 39. Most reports have been published together with the comments of

contracting states upon them: see e.g. Report to the Government of Liechtenstein, CPT/Inf (95) 7 and the Interim Report of the Government of Liechtenstein, CPT/Inf (95) 8; Report to the Government of Italy, CPT/Inf (95) 1 and the Response of the Government of Italy, CPT/Inf (95) 2; Report to the Government of the UK, CPT/Inf (94) 17 and the Response of the Government of the UK, CPT/Inf (94) 18; Report to the Government of Greece, CPT/Inf (94) 20 and the Response of the Government of Greece, CPT/Inf (94) 21. The Fifth General Report of the Committee revealed that twenty-one of the thirty-seven visit reports had been published and that there was good reason to believe that most of the remaining sixteen would be published soon, CPT/Inf (95) 10, p. 6. According to its 12th Report covering 2001, 91 of the 129 visit reports so far drawn up had been placed in the public domain. On 6 February 2002, the Committee of Ministers of the Council of Europe ‘encourage[d] all Parties to the Convention to authorise publication, at the earliest opportunity, of all CPT visit reports and of their responses’, CPT/Inf (2002) 15. See also CPT/Inf (2007), Appendix 4.

<sup>127</sup> Article 10(2). See e.g. the public statements concerning police detention conditions in Turkey, CPT/Inf (93) 1, paras. 21 and 37. The situation concerning Chechnya, Russia, has also led to public statements being made in 2001, 2003 and 2007: see e.g. CPT/Inf (2002) 15, Appendix 6 and CPT/Inf (2007), Appendix 9.

<sup>128</sup> Article 12. This is subject to the rules of confidentiality in article 11. Note that the Committee reports also include general substantive sections for the general guidance of states: see, for a collection of these, *The CPT Standards*, CPT/Inf/E (2002) 1.

<sup>129</sup> See e.g. Murdoch, ‘Work of the Council of Europe’s Torture Committee’, pp. 238 ff.

<sup>130</sup> See generally, *The Rights of Minorities: A Commentary on the European Framework Convention for the Protection of National Minorities* (ed. M. Weller), Oxford, 2006; *The European Convention for the Protection of National Minorities* (eds. P. Lemmens, A. Alen, B. de Witte and A. Verstichel), 2008; P. Thornberry and M. Estebanez, *The Council of Europe and Minorities*, Strasbourg, 1994, and G. Pentasugglia, *Minorities in International Law*, Strasbourg, 2002. See also [www.coe.int/t/dghl/monitoring/minorities/default\\_en.asp](http://www.coe.int/t/dghl/monitoring/minorities/default_en.asp)

<sup>131</sup> See also Recommendations 1177 (1992) and 1201 (1993).

- 132** It came into force in March 1998. See [www.coe.int/t/dg4/education/minlang/](http://www.coe.int/t/dg4/education/minlang/)
- 133** Article 15. See e.g. the reports by Germany, MIN-LANG/PR (2000) 1 and by the UK, MIN-LANG/PR (2002) 5.
- 134** Article 16. See e.g. the report on Germany, ECRML (2002) 1.
- 135** Article 17.
- 136** See e.g. the Committee of Ministers Recommendations to the Netherlands, RecChL (2001) 1 and to Germany, RecChL (2002) 1.
- 137** Article 16. See the first biennial report in 2000, Doc. 8879, and the second in 2002, Doc. 9540.
- 138** Article 20.
- 139** See 14 HRLJ, 1993, pp. 373 ff. See also the Explanatory Report to the Framework Convention for the Protection of National Minorities, 1995. An ad hoc Committee for the Protection of National Minorities (CAHMIN) was established. Note that in January 1996, it was decided to suspend the work of the Committee on the drafting of an Additional Protocol: see CAHMIN (95) 22 Addendum, 1996.
- 140** The Convention came into force on 1 February 1998.
- 141** Article 4.
- 142** Article 5. The parties also agree to refrain from assimilation policies and practices where this is against the will of persons belonging to national minorities.
- 143** E.g. the freedoms of peaceful assembly, association, expression and thought, conscience and religion, article 7. See also articles 8 and 9.
- 144** Upon request and where such a request corresponds to a real need, article 10(2).

Similarly with regard to the display of traditional local names, street names and other topographical indications intended for the public in the minority language, article 11(3), and with regard to adequate opportunities for being taught the minority language or for receiving instruction in that language, article 14(2).

<sup>145</sup> Article 24. Note that parties which are not members of the Council of Europe shall participate in the implementation mechanism according to modalities to be determined. Accordingly, the Federal Republic of Yugoslavia became a party to the Convention on 11 May 2001 and its first report became due on 1 September 2002.

<sup>146</sup> Article 26.

<sup>147</sup> Article 25. The first reports became due on 1 February 1999.

<sup>148</sup> Resolution (97) 10 and see H(1998)005 rev.11.

<sup>149</sup> Guidelines for such reports have been issued by the Committee: see e.g. ACFC/INF(2003)001 and ACFC/INF(1998)001.

<sup>150</sup> See, for a list of opinions delivered as of January 2003, ACFC(2002)Opinions bil. See also the Collection of Resolutions and Recommendations Referred to by the Advisory Committee in its Opinions, 2007 and the Activities of the Council of Europe in the Field of the Protection of National Minorities, DH-MIN (2005) 003.

<sup>151</sup> See above, p. 212.

<sup>152</sup> See the Explanatory Report to the Convention, which states that, ‘It was decided to adopt a pragmatic approach, based on the recognition that at this stage, it is impossible to arrive at a definition capable of mustering general support of all Council of Europe member States’, H(1995)010, para. 12. The European Court of Human Rights has also referred to the problem of defining national minorities: see *Gorzelik v. Poland*, Judgment of 20 December 2001, para. 62.

<sup>153</sup> See e.g. R. Higgins, ‘Minority Rights Discrepancies and Divergencies Between the International Covenant and the Council of Europe System’ in *Liber Amicorum*

for Henry Schermers, The Hague, 1994.

<sup>154</sup> See e.g. Parliamentary Assembly Recommendation Rec 1492 (2001) and the response of the Advisory Committee dated 14 September 2001.

**172** See e.g. the Annual Reports of the Parliament on Respect for Human Rights in the European Community, [www.europarl.europa.eu/comparl/afet/droi/annual\\_reports.htm](http://www.europarl.europa.eu/comparl/afet/droi/annual_reports.htm).

**173** See, for example, Rehman, *International Human Rights Law*, p. 267 ff; A. Bloed, 'Monitoring the CSCE Human Dimension: In Search of its Effectiveness' in *Monitoring Human Rights in Europe* (eds. Bloed et al.), Dordrecht, 1993, p. 45; *The CSCE* (ed. A. Bloed), Dordrecht, 1993; *Human Rights, International Law and the Helsinki Accord* (ed. T. Buergenthal), Montclair, NJ, 1977; T. Buergenthal, 'The Helsinki Process: Birth of a Human Rights System' in *Human Rights in the World Community* (eds. R. Claude and B. Weston), 2nd edn, Philadelphia, 1992, p. 256; *Essays on Human Rights in the Helsinki Process* (eds. A. Bloed and P. Van Dijk), Dordrecht, 1985; A. Bloed and P. Van Dijk, *The Human Dimension of the Helsinki Process*, Dordrecht, 1991; D. McGoldrick, 'Human Rights Developments in the Helsinki Process', 39 ICLQ, 1990, p. 923, and McGoldrick, 'The Development of the Conference on Security and Co-operation in Europe – From Process to Institution' in *Legal Visions of the New Europe* (eds. B. S. Jackson and D. McGoldrick), London, 1993, p. 135. See also [www.osce.org/what/human-rights](http://www.osce.org/what/human-rights).

**174** I.e. all the states of Western and Eastern Europe, except Albania, plus the United States and Canada.

175 For the text, see, for example, 14 ILM, 1975, p. 1292.

176 'Basket II' covered co-operation in the fields of economics, science, technology and the environment.

177 See the text of the Concluding Document in 10 HRLJ, 1989, p. 270.

178 Paragraphs 18 and 32.

179 The mechanism was used over 100 times between 1989 and 1992: see Bloed and Van Dijk, *Human Dimension*, p. 79, and McGoldrick, 'Development of the CSCE', p. 139. See also H. Tretter, 'Human Rights in the Concluding Document of the Vienna Follow-up Meeting of the Conference on Security and Co-operation in Europe of January 15, 1989', 10 HRLJ, 1989, p. 257; R. Brett, *The Development of the Human Dimension Machinery*, Essex University, 1992, and A. Bloed and P. Van Dijk, 'Supervisory Mechanisms for the Human Dimension of the CSCE: Its Setting-up in Vienna, its Present Functioning and its Possible Development towards a General Procedure for the Peaceful Settlement of Disputes' in Bloed and Van Dijk, *Human Dimension*, p. 74. In the Concluding Document of the Copenhagen meeting in 1990, the participating states proclaimed support for the principles of the rule of law, free and fair elections, democracy, pluralism and due process rights, see further 8 NQHR, 1990, p. 302 and Cm 1324 (1990).

180 See 30 ILM, 1991, p. 190.

181 See 30 ILM, 1991, p. 1670 and Cm 1771 (1991).

182 So that, for example, the written responses to requests for information were to occur within ten days, and the bilateral meetings were to take place as a rule within one week of the date of request, Section I(1). The time limits provided for at Copenhagen were reduced, and a resource list of experts was to be established. The Council of Ministers of the CSCE subsequently decided that the Office of Democratic Institutions and Human Rights (formerly the Office for Free Elections) would be the appropriate institution establishing the resource list. A variety of missions have now been employed in, for example, Nagorno-Karabakh, Georgia, Chechnya, Moldova and Croatia. See generally *OSCE Handbook*, Vienna, 2007.

**183** There are currently fifty-seven participating states. Note also the report entitled ‘Common Purposes: Towards a More Effective OSCE’ produced by a Panel of Eminent Persons in 2005 and the new OSCE Rules of Procedure adopted in 2006: see *OSCE Handbook*.

**184** See further below, p. 925.

**185** See Section II of the Helsinki Decisions. Note that the High Commissioner deals with situations and not with individual complaints. See also *Quiet Diplomacy in Action: The OSCE High Commissioner on National Minorities* (ed. W. A. Kemp), The Hague, 2001; K. Drzewicki, ‘The OSCE High Commissioner on National Minorities – Confronting Traditional and Emerging Challenges’ in *OSCE and Minorities. Assessment and Priorities* (ed. S. Parzymies), Warsaw, 2007, and J. Packer, ‘The OSCE High Commissioner on National Minorities: Pyrometer, Prophylactic, Pyrosvestis’ in *Minorities, Peoples and Self-Determination* (eds. N. Ghana and A. Xanthaki), Leiden, 2005, p. 249.

**186** See generally [www.osce.org/hcnm/documents.html](http://www.osce.org/hcnm/documents.html).

**187** See [www.osce.org/documents/hcnm/2000/03/241\\_en.pdf](http://www.osce.org/documents/hcnm/2000/03/241_en.pdf).

**188** See e.g. the Hague Recommendation on Education Rights of National Minorities, 1996; the Oslo Recommendations on Linguistic Rights of National Minorities, 1998; the Lund Recommendations on Effective Participation of National Minorities in Public Life, 1999; the Guidelines on the Use of Minority Languages in the Broadcast Media, 2003, and the Recommendations on Policing in Multi-Ethnic Societies, 2006: see [www.osce.org/hcnm/documents.html](http://www.osce.org/hcnm/documents.html). Note also the deployment of an OSCE Special Monitoring Mission to Ukraine in March 2014, <http://www.osce.org/secretariat/116879>

**189** Section VI of the Helsinki Decisions and [www.osce.org/odihr/](http://www.osce.org/odihr/).

**190** See 5 HRLJ, 1994, p. 449.

**191** Section VIII of the Budapest Decisions.

**192** This group is responsible for the day-to-day operations of the OSCE and its members are the permanent representatives of the member states meeting weekly. It is based in Vienna.

**193** Note also that the Monitoring Section within the ODIHR analyses human rights developments and compliance with Human Dimension commitments by participating states and alerts the Chairman-in-Office to serious deteriorations in respect for human rights.

**194** See *OSCE Handbook*, p. 34 and the Sofia Decision 12, para. 16, 2004.

**195** An OSCE Advisory Panel for the Prevention of Torture was established in 1998: see e.g. the Final Report of the Supplementary Human Dimension Meeting on Human Rights and Inhuman Treatment and Punishment 2000, [www.osce.org/documents/odihr/2000/03/1787\\_en.pdf](http://www.osce.org/documents/odihr/2000/03/1787_en.pdf), and a restructured Advisory Panel of Experts on Freedom of Religion or Belief was established in 2000. Note that as a consequence of the Dayton Peace Agreement on Bosnia, 1995, it was agreed that the OSCE would supervise elections in that country and would closely monitor human rights throughout Bosnia and would appoint an international human rights Ombudsman: see MC (5) Dec/1, 1995. The OSCE also has a role in Kosovo: see *OSCE Handbook*, p. 46.

**196** See *OSCE Handbook*, pp. 39 ff. Of particular importance, perhaps, is the Minsk Process, dealing with the Nagorno-Karabakh conflict, *ibid.*, p. 76.

**197** See H/INF (95) 3, pp. 195 ff. See also the essays contained in 17 HRLJ, 1996 concerning the CIS and human rights.

**198** Resolution 1249 (2001). See also recommendation 1519 (2001) stating that recourse to the CIS Commission should not be regarded as another procedure of international settlement within the meaning of article 35(2)b of the European Convention.

**199** As part of the Commission on Human Rights, the other part being the Ombudsman: see article II of Annex 6 of the Dayton Agreement.

200 See resolutions (93)6 and (96)8. It should be noted that, at the time, Bosnia was not a member of the Council of Europe.

201 Article VIII.

202 Two panels were set up under Rule 26 of the Rules of Procedure 1996, as amended in 1998 and 2001.

203 Article X.

204 Rule 29.

205 Article XI. The Chamber could also order provisional measures: see article X. These were made particularly in housing-related cases where eviction was threatened: see *Annual Report 2000*, p. 6.

206 For example, the question of refugees seeking to regain possession of properties from which they had fled and which were being used to house other persons: see e.g. *Bašić et al. v. Republika Srpska*, Cases Nos. CH/98/752 *et al.*, *Decisions of the Human Rights Chamber August–December 1999, 2000*, pp. 149 ff.

207 For example, the question of restriction on withdrawal of foreign currency from bank accounts: see e.g. *Poropat v. Bosnia*, Cases Nos. CH/97/42, 52, 105 and 108, and the question of pensions from the Yugoslav army, *Šećerbegović v. Bosnia*, Cases Nos. CH/98/706, 740 and 776. Note in particular, however, the case of *Boudellaa et al. v. Bosnia and Herzegovina and the Federation of Bosnia and Herzegovina*, Judgment of 11 October 2002, where in a case involving expulsion of Bosnian citizens of Algerian origin into the custody of the US on terrorism charges, the chamber found that the respondents had violated relevant human rights provisions.

208 In 1996, 31 applications were received; 83 in 1997; 3,226 in 2000. By the end of 2000, a total of 6,675 applications had been registered and a total of 669 separate decisions reached: see *Annual Report 2000*, p. 3.

**209** See generally J. M. Pasqualucci, *The Practice and Procedure of the Inter-American Court of Human Rights*, 2nd edn, Cambridge, 2013; L. Burgogue-Larsen and A. U. de Torres, *The Inter-American Court of Human Rights*, Oxford, 2011; Rehman, *International Human Rights Law*, chapter 9; H. J. Steiner, P. Alston and R. Goodman, *International Human Rights in Context*, 3rd edn, Oxford, 2008, pp. 1020 ff.; *The Inter-American System of Human Rights* (eds. D. J. Harris and S. Livingstone), Oxford, 1998; T. Buergenthal and D. Shelton, *Protecting Human Rights in the Americas*, 4th edn, Strasbourg, 1995; D. Shelton, 'The Inter-American Human Rights System' in *Guide to International Human Rights Practice* (ed. H. Hannum), 4th edn, Ardsley, 2004, p. 127, and T. Buergenthal and R. Norris, *The Inter-American System*, Dobbs Ferry, 5 vols., 1983–4; S. Davidson, *The Inter-American Court of Human Rights*, Aldershot, 1992; S. Davidson, 'Remedies for Violations of the American Convention on Human Rights', 44 ICLQ, 1995, p. 405, and C. Grossman, 'Proposals to Strengthen the Inter-American System of Protection of Human Rights', 32 German YIL, 1990, p. 264.

**210** The Convention currently has twenty-five parties: see [www.oas.org/dil/treaties\\_B-32\\_American\\_Convention\\_on\\_Human\\_Rights\\_sign.htm](http://www.oas.org/dil/treaties_B-32_American_Convention_on_Human_Rights_sign.htm)

**211** See e.g. J. Frowein, 'The European and the American Conventions on Human Rights – A Comparison', 1 HRLJ, 1980, p. 44. See also the American Declaration of the Rights and Duties of Man, 1948.

**212** See e.g. 10 DR, 1977, p. 100.

**213** The Charter of the OAS has also been amended by the Protocols of Cartagena de Indias, 1985; Washington, 1992 and Managua, 1993.

**214** See e.g. C. Medina, 'The Inter-American Commission on Human Rights and the Inter-American Court of Human Rights: Reflections on a Joint Venture', 12 HRQ, 1990, p. 439.

**215** See generally the *Basic Documents Pertaining to Human Rights in the Inter-American System*, Washington, 1992. The competence of the Commission to hear petitions relates to the rights in the Convention for states parties and to rights in the American Declaration for states not parties to the Convention.

<sup>216</sup> Note that this is far broader than the equivalent article 34 of the European Convention, which requires that the applicant be a victim.

<sup>217</sup> Articles 49–51. The Secretary-General of the OAS has played the role assigned in the European Convention to the Committee of Ministers.

<sup>218</sup> See *Annual Report 1994*, p. 39.

<sup>219</sup> *Annual Report 2012*, [www.oas.org/en/iachr/docs/annual/2012/TOC.asp](http://www.oas.org/en/iachr/docs/annual/2012/TOC.asp).

<sup>220</sup> In 1994, for example, with regard to Guatemala, Haiti, the Bahamas, Ecuador and Jamaica, see *Annual Report 1994*, pp. 21 ff., while in 2006 on-site visits were made to Haiti, Colombia, Bolivia, Dominican Republic, Brazil, Argentina and Peru, *Annual Report 2006*, chapter II C, paras. 34 ff. See also the Rules of Procedure 2009, 49 ILM, 2010, p. 597.

<sup>221</sup> See *Annual Report 1994*, chapter IV, with regard to Colombia, Cuba, El Salvador and Guatemala, and *Annual Report 2006*, chapter IV, with regard to Colombia, Cuba, Haiti and Venezuela.

<sup>222</sup> See e.g. *Annual Report 1992–3*, pp. 539 ff. See also e.g. AG/Res.443, 1979, AG/Res.666, 1983, AG/Res.547, 1981, AG/Res.624, 1982 and AG/Res.644, 1983 (torture). In its *Annual Report 2000*, the Commission reported on migrant workers and made recommendations with regard to asylum and international crimes, and the promotion and protection of the mentally ill, chapter VI.

<sup>223</sup> *Annual Report 2006*, chapter II D, paras. 49 ff. See as to the Special Rapporteur for Freedom of Expression, *Annual Report 2006*, vol. II.

<sup>224</sup> *Some Powers of the Inter-American Commission on Human Rights*, Advisory Opinion OC-13/93 of 16 July 1993, Series A, No. 13, para. 26.

<sup>225</sup> *International Responsibility for Issuing and Applying Laws in Violation of the Convention*, Advisory Opinion OC-14/94 of 9 December 1994, Series A, No. 14, para. 39.

226 *Annual Report 1994*, pp. 199 ff.

227 This entered into force in February 1987. Under the Convention, states parties agree to inform the Inter-American Commission of measures taken in application of the Convention, and the Commission ‘will endeavour in its annual report to analyse the existing situation in the member states of the Organization of American States in regard to the prevention and elimination of torture’, article 17.

228 This came into force in November 1999. Eleven states parties were required for the Additional Protocol to come into force. See also L. Le Blanc, ‘The Economic, Social and Cultural Rights Protocol to the American Convention and its Background’, 10 NQHR, 1992, 130.

229 This entered into force the following year. It currently has eight parties. See e.g. C. Cerna, ‘US Death Penalty Tested Before the Inter-American Commission on Human Rights’, 10 NQHR, 1992, p. 155.

230 This entered into force in March 1996.

231 Article 63(2) of the Convention states that in cases of extreme gravity and urgency, and when necessary to avoid irreparable damage to persons, the Court shall adopt such provisional measures as it deems pertinent in matters it has under consideration. With respect to a case not yet submitted to the Court, it may act at the request of the Commission. Article 19(c) of the Statute of the Commission provides that the Commission has the power to request the Court to take such provisional measures as it considers appropriate in serious and urgent cases which have not yet been submitted to it for consideration, whenever this becomes necessary to prevent irreparable injury to persons. Under article 29 of the Regulations of the Commission, the Commission may on its own initiative or at the request of a party take any action it considers necessary for the discharge of its functions. In particular, in urgent cases, when it becomes necessary to avoid irreparable damage to persons, the Commission may request that provisional measures be taken to avoid irreparable damage in cases where the denounced facts are true. Article 24 of the Rules of Procedure of the Inter-American Court provides that at any stage of the proceeding involving cases of extreme gravity and urgency and when necessary to avoid irreparable damage to persons, the Court may, at the request of a party or on its own motion, order whatever provisional measures it deems appropriate, pursuant to article 63(2) of the Convention.

<sup>232</sup> Note also the Inter-American Convention on the Elimination of All Forms of Discrimination against Persons with Disabilities, 1999. This came into force in September 2001.

<sup>233</sup> See above, chapter 6, p. 216.

<sup>234</sup> See articles 34–8 of the Convention.

<sup>235</sup> See e.g. *Annual Report 2001*, chapter III C. I and *Annual Report 2006*, chapter III C I.

<sup>236</sup> See *Annual Report 2006*, chapter III E and see also 45 ILM, 2006, pp. 669 ff.

<sup>237</sup> See, for examples of friendly settlement procedures, *Annual Report 2001*, chapter III C. 4.

<sup>238</sup> See *Annual Report 2006*, chapter III D.

<sup>239</sup> Article 51. If this does not happen and the matter is not settled with the state concerned, the Commission by a majority vote may set forth its own opinion and conclusions on the matter, which may be published. See, for example, *Annual Report 1983–4*, pp. 23–75. See also [www.corteidh.or.cr/](http://www.corteidh.or.cr/)

<sup>240</sup> Articles 52–4. See also Davidson, *Inter-American Court*; C. Cerna, ‘The Structure and Functioning of the Inter-American Court of Human Rights (1979–1992)’, 63 BYIL, 1992, p. 135, and L. E. Frost, ‘The Evolution of the Inter-American Court of Human Rights’, 14 HRQ, 1992, p. 171.

<sup>241</sup> The first time was in January 1988, against Honduras, following the killing of a person due to testify before it and concerns expressed about the safety of other witnesses, H/Inf. (88) 1, p. 64. See also the provisional measures adopted by the Court against Peru, in similar circumstances, in August 1990, 11 HRLJ, 1990, p. 257, and the *Alemán Lacayo v. Nicaragua* case, Series E, Order of 2 February 1996; the *Álvarez et al. v. Colombia* case, Series E, Order of 22 July 1997, and the *Constitutional Court* case, Series E, Order of 14 August 2000. See also *Hilaire and*

*Others v. Trinidad and Tobago*, Judgment of 21 June 2002. The Court also granted provisional measures, for example, to protect the lives and personal integrity of witnesses in the *Mapiripán Massacre* case against Colombia, see *Annual Report of the Inter-American Court of Human Rights 2005*, p. 39, and in the case of the *Children and Adolescents Deprived of Liberty in the 'Complexo do Tatuapé' of FEBEM* against Brazil, *ibid.*, p. 41.

<sup>242</sup> Of the nineteen advisory opinions issued between 1959 and 2005, twelve concerned the interpretation of the Convention, four concerned the interpretation of other treaties and three concerned the compatibility between domestic laws and international instruments: see *Annual Report 2005*, p. 60.

<sup>243</sup> 22 ILM, 1983, p. 51; 67 ILR, p. 594.

<sup>244</sup> 22 ILM, 1983, p. 33; 67 ILR, p. 559.

<sup>245</sup> Para. 37. See article 74 of the Convention.

<sup>246</sup> *Ibid.*, para. 29. See also below, p. 587.

<sup>247</sup> 7 HRLJ, 1986, p. 74; 75 ILR, p. 31.

<sup>248</sup> *Ibid.*, para. 45. See also the *Sunday Times* case, European Court of Human Rights, Series A, vol. 30, 1979.

<sup>249</sup> 9 HRLJ, 1988, p. 94; 96 ILR, p. 392.

<sup>250</sup> 28 ILM, 1989, p. 378; 96 ILR, p. 416.

<sup>251</sup> *Ibid.*, pp. 388–9. See also T. Buergenthal, 'The Revised OAS Charter and the Protection of Human Rights', 69 AJIL, 1975, p. 828.

<sup>252</sup> The problem was that the Declaration clearly was not a treaty and article 64 provides for advisory opinions regarding the Convention itself and 'other treaties'.

Gumudz, 'Bringing Communications Before the African Commission on Human and Peoples' Rights', 3 *African Human Rights Law Journal*, 2003, p. 118.

**283** Article 62. See also Rules 81–6.

**284** See e.g. G. Oberleitner and C. Welch, 'Africa: 15th Session African Commission on Human and Peoples' Rights', 12 NQHR, 1994, p. 333; Rehman, *International Human Rights Law*, p. 255, and M. Vans, T. Ige and R. Murray, 'The Reporting Mechanism of the African Charter on Human and Peoples' Rights' in *The African Charter on Human and Peoples' Rights* (eds. M. Evans and R. Murray), Cambridge, 2002, p. 36.

**285** This came into force on 25 January 2004. Judges were elected in 2006. See e.g. D. Padilla, 'An African Human Rights Court: Reflections from the Perspective of the Inter-American System', 2 *African Human Rights Law Journal*, 2002, p. 185; R. W. Eno, 'The Jurisdiction of the African Court on Human and Peoples' Rights', 2 *African Human Rights Law Journal*, 2002, p. 223, and R. Murray, 'A Comparison Between the African and European Courts of Human Rights', 2 *African Human Rights Law Journal*, 2002, p. 195. To date, twenty-six states are parties to the Protocol. See generally [www.african-court.org/en/](http://www.african-court.org/en/)

**286** Article 5. See also Rule 33 of the Rules of Procedure 2010. As of March 2013, only seven states had made the necessary declaration, [www.african-court.org/en/index.php/about-the-court/brief-history](http://www.african-court.org/en/index.php/about-the-court/brief-history). By June 2012, twenty-four

applications had been made to the court, and twelve cases decided. The Court delivered its first judgment in 2009 following an application dated 11 August 2008 by Michelot Yogogombaye against the Republic of Senegal, *ibid.* and see 49 ILM, 2010, p. 850.

**287** Article 34(6).

**288** See 48 ILM, 2009, p. 334. Fifteen ratifications are required for the protocol to come into force. Note the existence of the ECOWAS (Economic Community of West African States) Community Court of Justice, following the ECOWAS treaty of 1975 and the Protocol establishing the court in 1991. Since the Supplemental Protocol of 2005, the court has been able to hear communications alleging breaches of human rights, see <http://www.courtecowas.org/site2012/index.php?lang=en>. See also 'Court for West Africa: The ECOWAS Community Court of Justice', 107 AJIL, 2013, p. 737. Note also the SADC (Southern African Development Community) Tribunal established by a Protocol adopted in 2000 and operative since 2005. After several judgments holding Zimbabwe in breach of human rights (see e.g. *Campbell v. Zimbabwe*, 48 ILM, 2009, p. 530), the Tribunal was *de facto* suspended at the 2010 SADC Summit. On 17 August 2012 in Maputo, Mozambique, the SADC Summit decided that a new tribunal should be negotiated and that its mandate should be confined to interpretation of the SADC Treaty and Protocols relating to disputes between Member States, see [www.sadc.int/about-sadc/sadc-institutions/tribun/](http://www.sadc.int/about-sadc/sadc-institutions/tribun/)

**289** See e.g. M. Rishmawi, 'The Revised Arab Charter on Human Rights: A Step Forward?', 5 *Human Rights Law Review*, 2005, p. 361, and *ibid.*, 'The Arab Charter on Human Rights and the League of Arab States: An Update', 10 *Human Rights Law Review*, 2010, p. 169; Rehman, *International Human Rights Law*, p. 377 ff; R. K. M. Smith, *Textbook on International Human Rights*, Oxford, 2002, p. 87. See also A. A. Naim, 'Human Rights in the Arab World: A Legal Perspective', 23 HRQ, 2001, p. 70.

**290** Adopted in 1990 by the Nineteenth Islamic Conference of Foreign Ministers. This Declaration emphasises that all rights and freedoms provided for are subject to Islamic Shari'ah (article 24), which is also 'the only source of reference for the explanation or clarification of any of the articles in the Declaration' (article 25).

**291** Articles 8, 11, 12, 13, 14, 30, 31 and 35. The right to development is proclaimed as a fundamental human right, see article 37.

292 Articles 45 and 48.

293 Note, however, the statement by the UN High Commissioner for Human Rights expressing concern with regard to the incompatibility of some of the provisions of the Arab Charter with international norms and standards. These concerns included the approach to the death penalty for children and the rights of women and non-citizens. The High Commissioner also noted that, in equating Zionism with racism, the Arab Charter was ‘not in conformity with General Assembly resolution 46/86, which rejects that Zionism is a form of racism and racial discrimination’: see statement of 30 January 2008, [www.unhcr.ch/hurricane/hurricane.nsf/0/6C211162E43235FAC12573E00056E19D?opendocument](http://www.unhcr.ch/hurricane/hurricane.nsf/0/6C211162E43235FAC12573E00056E19D?opendocument).

294 Note also the ASEAN (Association of South-East Asian Nations) Intergovernmental Commission on Human Rights established in 2009, which has various functions including research and promotional activity and which drafted the ASEAN Human Rights Declaration 2012. It is stated to be a consultative body and there is no competence to hear communications, see <http://aichr.org/>. See also Tae-Ung Baik, *Emerging Regional Human Rights Systems in Asia*, Cambridge, 2012. See also N. Doyle, ‘The ASEAN Human Rights Declaration’, 63 ICLQ, 2014, p. 67.

## 8 Individual criminal responsibility in international law<sup>1</sup>

---

The rise of individual criminal responsibility directly under international law marks the coming together of elements of traditional international law with more modern approaches to human rights law and humanitarian law, and involves consideration of domestic as well as international enforcement mechanisms. Although the rights of individuals in international law have evolved significantly in the post-1945 era, the placing of obligations directly upon persons as opposed to states has a distinct, if narrow, pedigree.<sup>2</sup> Those committing piracy or slave trading<sup>3</sup> have long been regarded as guilty of crimes against international society bearing direct responsibility, for which they may be punished by international tribunals or by any state at all. Jurisdiction to hear the offence is not confined to, for example, the state on whose territory the act took place, or the national state of the offender or the victim. This universal jurisdiction over piracy constitutes a long-established principle of the world community.<sup>4</sup> All states may both arrest and punish pirates, provided of course that they have been apprehended on the high seas<sup>5</sup> or within the territory of the state concerned. The punishment of the offenders takes place whatever their nationality and wherever they happened to carry out their criminal activities.

Piracy under international law (or piracy *jure gentium*) must be distinguished from piracy under municipal law. Offences that may be characterised as piratical under municipal laws do not necessarily fall within the definition of piracy in international law, and thus are not susceptible to universal jurisdiction (depending of course upon the content and form of international conventions). Piracy *jure gentium* was defined in article 15 of the High Seas Convention, 1958 (and reaffirmed in article 101 of the 1982 Convention on the Law of the Sea) as illegal acts of violence, detention or depredation committed for private ends by the crew or passengers of a private ship or private aircraft and directed against another ship or aircraft (or persons or property therein) on the high seas or *terra nullius*.<sup>6</sup> Attempts to commit such acts are sufficient to constitute piracy and it is not essential for the attempt to have been successful.<sup>7</sup>

However, the range of offences under international law for which individuals bore international responsibility was narrow indeed.<sup>8</sup> It is doubtful whether it had extended beyond piracy and slave trading by the turn of the twentieth century. Even then, jurisdiction was exercisable in practice only by domestic courts. It is a modern phenomenon to establish international courts or tribunals to exercise jurisdiction directly over individuals with regard to specified crimes. As will be seen in chapter 12, domestic courts are indeed exercising a greater jurisdiction with regard to

offences with international elements, for example, with regard to torture or war crimes committed outside of the territory of the state concerned provided that the alleged offender is within the territory of the state, but this is only where an international treaty authorises states to exercise such jurisdiction and this has been brought into effect internally.<sup>9</sup> However, the focus of this chapter is upon courts established internationally or with an international element in order to prosecute individuals directly accused of international offences.

## **International criminal courts and tribunals**

After the conclusion of the First World War, a commission set up by the Allied Powers recommended that as the defeated powers had violated the laws of war, high officials, including the Kaiser, be prosecuted for ordering such crimes and on the basis of command responsibility. It was also suggested that an Allied High Tribunal be established to try violations of the laws and customs of war and the laws of humanity.<sup>10</sup> Accordingly, the Treaty of Versailles, 1919 noted that the German government recognised the right of the Allied and Associated Powers to bring individuals accused of crimes against the laws and customs of war before military tribunals (article 228) and established the individual responsibility of the Kaiser (article 227). In the event, the Netherlands refused to hand over the Kaiser and only a few trials were held before German courts in Leipzig with, at best, mixed results.<sup>11</sup>

The Charter annexed to the Agreement for the Prosecution and Punishment of the Major War Criminals, 1945 provided specifically for individual responsibility for crimes against peace, war crimes and crimes against humanity. There was also a conspiracy charge.<sup>12</sup> The Nuremberg Tribunal, composed of four principal judges (from the US, UK, USSR and France) and four alternates, was the first international criminal tribunal and marks the true starting-point for international criminal law. It affirmed in ringing and lasting terms that ‘international law imposes duties and liabilities upon individuals as well as upon states’ as ‘crimes against international law are committed by men, not by abstract entities, and only by punishing individuals who commit such crimes can the provisions of international law be enforced’. Included in the relevant category for which individual responsibility was posited were crimes against peace, war crimes and crimes against humanity.<sup>13</sup> In addition, a number of war crimes trials were instituted within Allied-occupied Germany under the authority of Control Council Law No. 10.<sup>14</sup> The International Military Tribunal for the Far East was established in January 1946 to deal with Japanese war crimes.<sup>15</sup> This Tribunal was composed of judges from eleven states<sup>16</sup> and it essentially reaffirmed the Nuremberg Tribunal’s legal findings as to, for example, the criminality of aggressive war and the rejection of the absolute defence

of superior orders.<sup>17</sup> The Charter of the Tribunal also provided for individual responsibility with regard to certain crimes.<sup>18</sup>

The provisions of the Nuremberg Charter can now be regarded as part of international law, particularly since the General Assembly in 1946 affirmed the principles of this Charter and the decision of the Tribunal.<sup>19</sup> The Assembly also stated that genocide was a crime under international law bearing individual responsibility.<sup>20</sup> This was reaffirmed in the Genocide Convention of 1948, which also called for prosecutions by either domestic courts or 'an international penal tribunal'.<sup>21</sup> The International Law Commission produced a Draft Code of Offences against the Peace and Security of Mankind in 1954, article 1 of which provided that 'offences against the peace and security of mankind, as defined in this Code, are crimes under international law, for which the responsible individuals shall be punishable'.<sup>22</sup>

Individual responsibility has also been confirmed with regard to grave breaches of the four 1949 Geneva Red Cross Conventions and 1977 Additional Protocols I and II dealing with armed conflicts. It is provided specifically that the High Contracting Parties undertake to enact any legislation necessary to provide effective penal sanctions for persons committing or ordering to be committed any of a series of grave breaches.<sup>23</sup> Such grave breaches include wilful killing, torture or inhuman treatment, extensive destruction and appropriation of property not justified by military necessity and carried out unlawfully and wantonly, unlawful deportation or transfer of protected persons and the taking of hostages.<sup>24</sup> Protocol I of 1977 extends the list to include, for example, making the civilian population the object of attack and launching an attack against works or installations containing dangerous forces in the knowledge that such attack will cause excessive loss of life or damage to civilians or their property when committed wilfully and causing death or serious injury; other activities such as transferring civilian population from the territory of an occupying power to that of an occupied area or deporting from an occupied area, apartheid and racial discrimination and attacking clearly recognised historic monuments, works of art or places of worship, may also constitute grave breaches when committed wilfully.<sup>25</sup>

Any individual, regardless of rank or governmental status, would be personally liable for any war crimes or grave breaches committed, while the principle of command (or superior) responsibility means that any person in a position of authority ordering the commission of a war crime or grave breach would be as accountable as the subordinate committing it.<sup>26</sup> The International Law Commission in 1991 provisionally adopted a Draft Code of Crimes Against the Peace and Security of Mankind,<sup>27</sup> which was revised in 1996.<sup>28</sup> The 1996 Draft Code provides

for individual criminal responsibility<sup>29</sup> with regard to aggression,<sup>30</sup> genocide,<sup>31</sup> a crime against humanity,<sup>32</sup> a crime against United Nations and associated personnel<sup>33</sup> and war crimes.<sup>34</sup> The fact that an individual may be responsible for the crimes in question is deemed not to affect the issue of state responsibility.<sup>35</sup> The Security Council in two resolutions on the Somali situation in the early 1990s unanimously condemned breaches of humanitarian law and stated that the authors of such breaches or those who had ordered their commission would be held 'individually responsible' for them,<sup>36</sup> while Security Council resolution 674 (1990) concerning Iraq's occupation of Kuwait, reaffirming Iraq's liability under the Fourth Geneva Convention, 1949 dealing with civilian populations of occupied areas, noted that such responsibility for grave breaches extended to 'individuals who commit or order the commission of grave breaches'.<sup>37</sup>

## **The International Criminal Tribunal for the Former Yugoslavia (ICTY)<sup>38</sup>**

It was, however, the events in the former Yugoslavia that impelled a renewal of interest in the establishment of an international criminal court, which had long been under consideration, but in a desultory fashion.<sup>39</sup> The Yugoslav experience, and the Rwanda massacres of 1994, led to the establishment of two specific war crimes tribunals by the use of the authority of the UN Security Council to adopt decisions binding upon all member states of the organisation under Chapter VII of the Charter, rather than by an international conference as was to be the case with the International Criminal Court. This method was used in order both to enable the tribunal in question to come into operation as quickly as possible and to ensure that the parties most closely associated with the subject-matter of the war crimes alleged should be bound in a manner not dependent upon their consent (as would be necessary in the case of a court established by international agreement). The establishment of the Tribunal was preceded by a series of steps. In Security Council resolutions 764 (1992), 771 (1992) and 820 (1993) grave concern was expressed with regard to breaches of international humanitarian law and the responsibilities of the parties were reaffirmed. In particular, individual responsibility for the commission of grave breaches of the 1949 Conventions was emphasised. Under resolution 780 (1992), the Security Council established an impartial Commission of Experts to examine and analyse information concerning evidence of grave breaches of the Geneva Conventions and other violations of international humanitarian law committed in the territory of the former Yugoslavia. The Commission produced a report in early 1993 in which it concluded that grave breaches and other violations of international humanitarian law had been committed in the territory of the former Yugoslavia, including wilful killing, 'ethnic cleansing', mass killings, torture, rape,

pillage and destruction of civilian property, the destruction of cultural and religious property and arbitrary arrests.<sup>40</sup>

The Security Council then adopted resolution 808 (1993) calling for the establishment of an international tribunal to prosecute 'persons responsible for serious violations of international humanitarian law committed in the territory of the former Yugoslavia since 1991'. The Secretary-General of the UN produced a report incorporating a draft statute and commentary,<sup>41</sup> which was adopted by the Security Council in resolution 827 (1993) acting under Chapter VII of the UN Charter.<sup>42</sup>

The Tribunal has the power to prosecute persons responsible for serious violations of international humanitarian law committed in the territory of the former Yugoslavia since 1991 (articles 1 and 8 of the Statute). The absence of a closing date meant that the later conflict in Kosovo could be the subject of prosecutions.<sup>43</sup> The Tribunal consists of three main organs: the Registry, the office of the Prosecutor and the Chambers.<sup>44</sup> The Registry is the administrative body,<sup>45</sup> while the Office of the Prosecutor is responsible for investigations, issuing of indictments and bringing matters to trial. There are currently three Trial Chambers, each consisting of a presiding judge and two other judges, and an Appeals Chamber, consisting of seven members but sitting in a panel of five, headed by a President. Of the seven, five come from the ICTY and two from the International Criminal Tribunal for Rwanda.<sup>46</sup> The Chambers have a maximum of sixteen permanent judges and a maximum of twelve *ad litem* judges drawn from a pool of twenty-seven such judges elected by the General Assembly for four-year renewable terms.<sup>47</sup>

Articles 2 to 5 of the Statute lay down the crimes with regard to which the Tribunal can exercise jurisdiction. These are: grave breaches of the Geneva Conventions of 1949, violation of the laws or customs of war, genocide and crimes against humanity.<sup>48</sup>

Article 7 establishes that persons who 'planned, instigated, ordered, committed or otherwise aided and abetted in the planning, preparation or execution' of crimes listed in articles 2 to 5 shall be individually responsible for the crime. This article also provides that the official position of any accused person is not to relieve a person of criminal responsibility nor mitigate punishment, while the fact that a subordinate committed the crime is not to relieve a superior of responsibility if the latter knew or had reason to know that the subordinate was about to or had committed the crime and the superior failed to take the necessary and reasonable measures to prevent the acts or to punish the perpetrators thereof. It is also stipulated that the fact that an accused person acted pursuant to an order of a government or of a superior will not relieve him of criminal responsibility, although this may constitute a mitigating factor if the Tribunal determines that justice so

requires. The Appeals Chamber of the Tribunal in the *Tadić* case confirmed that customary international law had imposed criminal responsibility for serious violations of humanitarian law governing internal as well as international armed conflicts.<sup>49</sup>

The Tribunal and national courts have concurrent jurisdiction with regard to the prosecution of relevant accused persons, but the Tribunal has primacy over national courts, so that the former may request the latter to defer to its competence.<sup>50</sup> States are obliged to co-operate with the International Tribunal in the investigation and prosecution of persons accused of committing serious violations of international humanitarian law and must comply without undue delay with any request for assistance or an order issued by a Trial Chamber, including the identification and location of persons; the taking of testimony and the production of evidence; the arrest or detention of persons; and the surrender or the transfer of the accused to the International Tribunal.<sup>51</sup> No person may be tried by a national court for acts constituting serious violations of international humanitarian law under the Statute, for which he or she has already been tried by the International Tribunal, but the Tribunal may try a person for relevant acts after trial by a national court where the act for which he or she was tried was characterised as an ordinary crime; or where the national court proceedings were not impartial or independent, were designed to shield the accused from international criminal responsibility, or the case was not diligently prosecuted.<sup>52</sup>

Investigations into alleged offences under the Statute are initiated by the Prosecutor either *ex officio* or on the basis of information obtained from any source, particularly from governments, United Nations organs, intergovernmental and non-governmental organisations. Information received is assessed by the Prosecutor, who then decides whether there is a sufficient basis to proceed. The Prosecutor may question suspects, victims and witnesses, collect evidence and conduct on-site investigations. Where it is determined that a *prima facie* case exists, the Prosecutor shall prepare an indictment containing a concise statement of the facts and the crime or crimes with which the accused is charged, and this indictment is then transmitted to a judge of the Trial Chamber, who will review it. If satisfied that a *prima facie* case has been established by the Prosecutor, the judge will confirm the indictment. If not so satisfied, the indictment shall be dismissed. Upon confirmation of an indictment, the judge may, at the request of the Prosecutor, issue such orders and warrants for the arrest, detention, surrender or transfer of persons, and any other orders as may be required for the conduct of the trial. It will then be for the Trial Chambers to ensure that the trial is fair and expeditious and that proceedings are conducted in accordance with the rules of procedure and evidence, with full respect for the rights of the accused and due regard for the protection of victims and

witnesses.<sup>53</sup> Judgment will then be reached by the Trial Chamber concerned and punishment, limited to imprisonment, imposed upon conviction.<sup>54</sup> Appeal is to the Appeals Chamber on the grounds either of an error of law invalidating the decision or of an error of fact occasioning a miscarriage of justice. The Appeals Chamber may affirm, reverse or revise the decisions taken by the Trial Chambers.<sup>55</sup>

The Tribunal has dealt with a number of significant issues.<sup>56</sup> In an early case, the Appeal Chamber held that it had the power to review the question of the legality of the establishment of the Tribunal and noted that the Security Council had adopted a decision under Chapter VII of the UN Charter binding on all member states to create the Tribunal in the framework of the restoration of international peace and security.<sup>57</sup>

As of July 2013, the Tribunal had issued 161 indictments; 136 proceedings had been concluded, with regard to which 69 individuals had been sentenced, 18 acquitted, 36 indictments withdrawn (including where the accused had died) and 13 persons transferred to national jurisdictions. There were at this date ongoing proceedings with regard to 25 accused.<sup>58</sup> However, the UN Security Council has confirmed a completion strategy which was intended to ensure a phased and coordinated completion of the Tribunal's mission by the end of 2010.<sup>59</sup> Under this strategy, the ICTY has concentrated on the prosecution and trial of the most senior leaders while referring other cases involving intermediate and lower-rank accused to national courts. Two main categories of cases have been referred to national courts in the region of the former Yugoslavia, being those cases that were investigated to different levels by the Tribunal's Prosecution which did not result in the issuance of an indictment by the ICTY and the small number of cases that were investigated by the Tribunal's Prosecution and that resulted in the confirmation of indictments by the Tribunal and the transfer of accused persons to the Tribunal's custody. Cases began to be transferred to the national courts of successor states to the former Yugoslavia, particularly Bosnia and Croatia, in 2005.<sup>60</sup> By mid-2007, thirteen 'lower to mid-level accused' in eight had been transferred to local courts.<sup>61</sup>

## **The International Criminal Tribunal for Rwanda (ICTR)<sup>62</sup>**

Following events in Rwanda during 1994 and the mass slaughter that took place, the Security Council decided in resolution 955 (1994) to establish an International Criminal Tribunal for Rwanda, with the power to prosecute persons responsible for serious violations of international humanitarian law. The Statute of this Tribunal was annexed to the body of the Security Council resolution and bears many

similarities to the Statute of the Yugoslav Tribunal.

The Rwanda Tribunal consists of three Trial Chambers, an Office of the Prosecutor and a Registry with the same functions as those of the Yugoslav Tribunal.<sup>63</sup> The Chambers are composed of sixteen permanent independent judges, no two of whom may be nationals of the same state, and a maximum at any one time of nine *ad litem* independent judges. The ICTR and the ICTY share a joint Appeals Chamber, two members of whom are members of the Rwanda Tribunal.<sup>64</sup>

Articles 2 to 4 stipulate the crimes over which the Tribunal has jurisdiction. Article 2 deals with genocide; article 3 with crimes against humanity, being the crimes of (a) murder; (b) extermination; (c) enslavement; (d) deportation; (e) imprisonment; (f) torture; (g) rape; (h) persecutions on political, racial and religious grounds; and (i) other inhumane acts, when committed as part of a widespread or systematic attack against any civilian population on national, political, ethnic, racial or religious grounds; and article 4 deals with violations of article 3 common to the Geneva Conventions and of Additional Protocol II.<sup>65</sup> Article 6 provides for individual criminal responsibility with regard to persons planning, ordering, committing or aiding the crimes listed, while provisions similar to the Statute of the Yugoslav Tribunal with regard to the absence of immunity for persons holding official positions, command responsibility and superior orders apply.

The Tribunal has jurisdiction with regard to serious violations of international humanitarian law committed in the territory of Rwanda and Rwandan citizens responsible for such violations committed in the territory of neighbouring states between 1 January 1994 and 31 December 1994.<sup>66</sup> As is the case with the ICTY, the ICTR has concurrent jurisdiction with national courts and has primacy over national courts of all states, while at any stage of the procedure, the Tribunal may formally request national courts to defer to its competence.<sup>67</sup> Similarly, no person may be tried before a national court for acts constituting serious violations of international humanitarian law under the present Statute, for which he or she has already been tried by the International Criminal Tribunal for Rwanda, while a person who has been tried before a national court for acts constituting serious violations of international humanitarian law may be subsequently tried by the Tribunal only if either the act for which he or she was tried was characterised as an ordinary crime; or the national court proceedings were not impartial or independent, were designed to shield the accused from international criminal responsibility, or the case was not diligently prosecuted.<sup>68</sup>

After several difficult early years, during which problems of mismanagement with regard to the Office of the Prosecutor and the Registry predominated,<sup>69</sup> the Tribunal began to produce some significant decisions. These commenced with the *Kambanda*

case,<sup>70</sup> which was the first time that a former head of government was convicted for the crime of genocide (after having pleaded guilty), and the *Akayesu* case,<sup>71</sup> in which for the first time an international tribunal was called upon to interpret the definition of genocide in the Genocide Convention, 1948 and to define the crime of rape in international law. However, the rate of progress has been disappointing and tensions with Rwanda have surfaced from time to time.<sup>72</sup>

As in the case of the ICTY, the Rwanda Tribunal has formulated a completion strategy, which has been affirmed by Security Council resolutions 1503 (2003) and 1534 (2004), although it had in 2002 adopted Rule 11 *bis* of the Rules of Procedure permitting the transfer of cases to national jurisdictions, as had the ICTY. The Security Council, as with the ICTY, increased the number of *ad litem* judges and various other management decisions were taken. A separate Prosecutor for the ICTR was appointed in 2003. Attention was focused upon the prosecution of individuals who allegedly were in positions of leadership, and those who allegedly bore the greatest responsibility for the genocide, while the Prosecutor is continuously reviewing his files to determine which cases may be suitable for referral to national jurisdictions for trial. Such decision is for judicial determination. The Prosecutor also holds discussions with states, including Rwanda, regarding the referral of cases to national jurisdictions for trial, in particular with respect to accused persons who were investigated but not indicted by his office. Considerations of fair trial in the state concerned are also a relevant factor, as well as the alleged status and extent of participation of the individual during the genocide, the alleged connection that the individual may have had with other cases, the need to cover the major geographical areas of Rwanda, the availability of evidence with regard to the individual concerned and the availability of investigative material for transmission to a state for national prosecution.<sup>73</sup>

## ***The International Residual Mechanism for Criminal Tribunals***

An International Residual Mechanism for Criminal Tribunals to carry out a number of essential functions of the ICYT and ICTR after the closure of the Tribunals, including the trial of fugitives who were among the most senior leaders suspected of being most responsible for crimes was established in 2010.<sup>74</sup> The Mechanism was intended to be a small, temporary and efficient structure. In accordance with its statute,<sup>75</sup> the Mechanism has a President, a Prosecutor and a Registrar, who together have responsibility over two branches, one in Arusha one in The Hague. The Mechanism is planned to operate for an initial period of four years and then for subsequent periods of two years following reviews of its progress, unless the

Security Council decides otherwise. The Mechanism commenced operations at its Arusha branch on 1 July 2012, covering functions inherited from the ICTR and the branch in The Hague commenced on 1 July 2013 with regard to functions inherited from the ICTY.

## **The International Criminal Court (ICC)<sup>76</sup>**

Article VI of the Genocide Convention, 1948 provided for persons charged with genocide to be tried either by a court in the territory where the act had been committed or by an ‘international penal tribunal’ to be established. The International Law Commission was asked to study the possibility of the establishment of such an international court and a report was produced.<sup>77</sup> The matter was then transmitted to the General Assembly which produced a draft statute.<sup>78</sup> However, the question was postponed until a definition of aggression had been achieved and the draft Code of Offences completed. Due primarily to political reasons, no further progress was made until Trinidad and Tobago proposed the creation of a permanent international criminal court to deal with drug trafficking in 1989. Given additional urgency by the developing Yugoslav situation in the early 1990s, the International Law Commission adopted a Draft Statute for an International Criminal Court in 1994.<sup>79</sup> This draft statute proposed that an international criminal court be established with jurisdiction not only over genocide, war crimes, crimes against humanity and aggression, but also over certain ‘treaty crimes’ such as terrorism and drugs offences found in UN conventions. The draft statute was also less expansive than the International Criminal Court Statute proved to be in a number of ways, including not providing for the Prosecutor to initiate investigations on his or her own authority. However, the ILC draft proved very influential and a Preparatory Committee was convened in December 1995.<sup>80</sup> The work of this Committee<sup>81</sup> led to the Rome Conference in 1998, which produced after some effort the Rome Statute on the International Criminal Court on 17 July 1998. Sixty states were needed to ratify the Rome Statute in order for it to come into force and this duly happened on 1 July 2002. Unlike the two international criminal tribunals (for the former Yugoslavia and for Rwanda), the ICC is the product not of a binding Security Council resolution, but of an international treaty. This was essentially because states, while being prepared to accept the creation of geographically limited (the Former Yugoslavia) and temporally constrained (in Rwanda’s case) tribunals by Security Council action, were not willing to be so bound by the establishment of a permanent international criminal court with much more extensive jurisdiction without express consent. Secondly, it is to be noted that the range and content of the Rome Statute is far greater than those of the two international criminal tribunals. The Rome Statute contains 128 articles, while the ICTY Statute contains 34 articles and the ICTR

## Statute 32 articles

The Statute provides that the jurisdiction of the International Criminal Court is limited to the 'most serious crimes of concern to the international community as a whole', being genocide, crimes against humanity, war crimes and aggression,<sup>82</sup> and that a person who commits a crime within the jurisdiction of the Court 'shall be individually responsible and liable for punishment' in accordance with the Statute.<sup>83</sup> The ICC only has jurisdiction with respect to crimes committed after the Statute came into force and with respect to states which have become parties to the Statute.<sup>84</sup> Further, jurisdiction may only be exercised provided either the state on the territory of which the conduct in question occurred (or if the crime was committed on board a vessel or aircraft, the state of registration of that vessel or aircraft) or the state of which the person accused of the crime is a national is a party to the Statute.<sup>85</sup> This means that the jurisdiction of the ICC is not universal, but territorial or personal in nature. It also means that the national of a state which is not a party to the Statute may be prosecuted where the crime is committed in the territory of a state which is a party. However, the Court may also have jurisdiction where a situation has been referred to the Prosecutor by the Security Council acting under Chapter VII of the Charter, which is thereby binding and in which case it is unnecessary that a relevant state be a party to the Statute.<sup>86</sup> This has happened with regard to the situation in Darfur, Sudan, which was referred to the Prosecutor on 31 March 2005 by the Security Council in resolution 1593. After a preliminary examination of the situation, an investigation was opened on 1 June 2005 and after a twenty-month investigation into crimes allegedly committed in Darfur since 1 July 2002, the Prosecutor presented evidence to the judges and a summons to two named Sudanese individuals, one being a government minister and the other a military officer, to appear was issued with regard to charges alleging the commission of war crimes and crimes against humanity.<sup>87</sup> Warrants of arrest were issued on 27 April 2007 against the two individuals by Pre-Trial Chamber I.<sup>88</sup> Two warrants of arrest were subsequently issued against President Al-Bashir.<sup>89</sup> On 26 February 2011, the situation in Libya was referred to the Prosecutor by the Security Council in resolution 1970 (2011). This resulted in warrants of arrest being issued by Pre-Trial Chamber I for Muammar Gaddafi (the then leader of Libya), Saif Al-Islam Gaddafi and Abdualla Al-Senussi.<sup>90</sup>

In addition to the Security Council referral, the ICC is also able to exercise its jurisdiction with regard to one or more of the crimes in question where the situation in which one or more of these crimes appears to have been committed has been referred to the Prosecutor by a state party to the Statute,<sup>91</sup> or the where Prosecutor has himself or herself initiated an investigation.<sup>92</sup> In the latter case, where the Prosecutor concludes, after having analysed the seriousness of the information

received, that there is a reasonable basis to proceed to an investigation, a request for authorisation of an investigation, together with any supporting material collected, will be submitted to the Pre-Trial Chamber. Victims may also make representations to the Pre-Trial Chamber, in accordance with the Rules of Procedure and Evidence. Where the Pre-Trial Chamber, upon examination of the request and the supporting material, considers that there is a reasonable basis to proceed with an investigation, and that the case appears to fall within the jurisdiction of the Court, it shall authorise the commencement of the investigation, without prejudice to subsequent determinations by the Court with regard to the jurisdiction and admissibility of a case.<sup>93</sup>

There have been four examples to date of referral by a state party. In December 2003, Uganda referred to the Prosecutor the situation with regard to the Lord's Resistance Army;<sup>94</sup> in April 2004, the Democratic Republic of the Congo referred to the Prosecutor the situation of crimes committed in its territory;<sup>95</sup> in December 2004, the Central African Republic referred the situation in its country during the armed conflict of 2002–3 to the Prosecutor;<sup>96</sup> and in July 2012, the Government of Mali referred the situation in its country to the Prosecutor.<sup>97</sup> The Prosecutor may also initiate an investigation under article 13 *proprio motu* on the basis of information on crimes within the jurisdiction of the Court received from individuals or organisations. Pre-Trial Chamber II granted the Prosecution authorisation to open an investigation *proprio motu* in the situation of Kenya on 31 March 2010.<sup>98</sup> In addition, on 3 October 2011, Pre-Trial Chamber III granted the Prosecutor's request for authorisation to open investigations *proprio motu* into the situation in Côte d'Ivoire.<sup>99</sup> At the time of writing the Prosecutor is conducting preliminary examinations concerning alleged crimes committed on the territories of Honduras, Afghanistan, Korea and Comoros; and assessing if there are genuine national proceedings being carried out in Georgia, Guinea, Colombia, and Nigeria.<sup>100</sup>

However, in a concession to obtain the support of states to the ICC, article 16 provides that no investigation or prosecution may be commenced or proceeded with for a period of twelve months after the Security Council, in a resolution adopted under Chapter VII of the Charter, has so requested the Court. Such request may be renewed by the Council under the same conditions.<sup>101</sup> Article 98(2) provides that the Court may not proceed with a request for surrender which would require the requested state to act inconsistently with its obligations under international agreements pursuant to which the consent of a sending state is required to surrender a person of that state to the Court, unless the Court can first obtain the co-operation of the sending state for the giving of consent for the surrender. The provision, which was intended to deal with conflicting obligations, such as the position of soldiers stationed overseas under Status of Forces agreements which allow the sending state

to exercise elements of criminal jurisdiction with regard to its soldiers, has been used by the US for a much broader purpose. The US has signed a number of bilateral agreements with states, some parties to the Rome Statute and some not, which provide that no nationals, current or former officials, or military personnel of either party may be surrendered or transferred by the other state to the ICC for any purpose. This tactic has been widely criticised and is highly controversial.<sup>102</sup>

A key feature of the ICC, and one that distinguished it from the two international criminal tribunals, is that it is founded upon the concept of complementarity, which means essentially that the national courts have priority. A case will be inadmissible and the Court will be unable to exercise jurisdiction in a number of situations.<sup>103</sup> These are, first, where the case is being investigated or prosecuted by a state which has jurisdiction over it, unless the state is unwilling or unable genuinely to carry out the investigation or prosecution; secondly, where the case is being investigated or prosecuted by a state which has jurisdiction over it and the state has decided not to prosecute the person concerned, unless the decision resulted from the unwillingness<sup>104</sup> or inability<sup>105</sup> of the state genuinely to prosecute; and thirdly, where the person concerned has already been tried for conduct which is the subject of the complaint, unless the proceedings before the court other than the ICC were for the purpose of shielding the person concerned from criminal responsibility for crimes within the jurisdiction of the ICC or where those proceedings were not conducted independently or impartially.<sup>106</sup>

The Court consists of four organs. These are respectively the Presidency; an Appeals Division, a Trial Division and a Pre-Trial Division; the Office of the Prosecutor; and the Registry.<sup>107</sup> The eighteen judges elected must be independent and serve on a full-time basis,<sup>108</sup> have competence in criminal law or in relevant areas of international law and must represent the principal legal systems in the world, as well as reflect equitable geographical representation and the need for a fair representation of male and female judges. The judges are elected by the Assembly of States Parties using rather complicated voting rules.<sup>109</sup> The Presidency, consisting of the President and the First and Second Vice-Presidents, is responsible for the proper administration of the Court (apart from the Office of the Prosecutor),<sup>110</sup> while the Registry is responsible for the non-judicial aspects of the administration and servicing of the Court.<sup>111</sup> The Office of the Prosecutor acts independently as a separate organ of the Court. It is responsible for receiving referrals and any substantiated information on crimes within the jurisdiction of the Court, for examining them and for conducting investigations and prosecutions before the Court.<sup>112</sup> The Office is headed by the Prosecutor who is elected by secret ballot by members of the Assembly of States Parties and assisted by one or more Deputy Prosecutors.<sup>113</sup>

The Pre-Trial Division is composed of judges with predominantly criminal trial experience, who serve in the Division for a period of three years. The Pre-Trial Chamber is composed either of a single judge or of a bench of three judges<sup>114</sup> and confirms or rejects the authorisation to commence an investigation and makes a preliminary determination that the case falls within the jurisdiction of the Court, without prejudice to subsequent determinations by the Court with regard to the jurisdiction and admissibility of a case. The Pre-Trial Chamber may also review a decision of the Prosecutor not to proceed with an investigation either on its own initiative, or at the request of the state making a referral under article 14, or the United Nations Security Council under article 13(b),<sup>115</sup> and can issue warrants of arrests and summons to appear before the Court at the request of the Prosecutor, issue orders to grant the rights of the parties in the proceeding, and, where necessary, provide for the protection and privacy of victims and witnesses, the preservation of evidence, the protection of persons who have been arrested or appeared in response to a summons, and the protection of national security information. Within a reasonable time after the person's surrender or voluntary appearance before the Court, the Pre-Trial Chamber holds a hearing in the presence of the Prosecutor, the person charged and his/her counsel to confirm or reject the charges. Once the Pre-Trial Chamber has confirmed the charges and committed the person for trial by the Trial Chamber, the Presidency will establish a Trial Chamber to conduct subsequent proceedings.

The Trial Division is also predominantly composed of judges with criminal trial experience who serve for a period of three years. Three judges of the Division carry out the judicial functions of the Trial Chamber.<sup>116</sup> The primary function of the Trial Chamber is to ensure that a trial is fair and expeditious, and is conducted with full respect for the rights of the accused with regard for the protection of victims and witnesses.<sup>117</sup> The Trial Chamber will determine whether the accused is innocent or guilty. In the latter case, imprisonment for a specified number of years, which may not exceed a maximum of thirty years or a term of life imprisonment, may be imposed. Financial penalties may also be imposed<sup>118</sup> and the Trial Chamber can also order a convicted person to pay money for compensation, restitution or rehabilitation for victims.<sup>119</sup> The trial must be held in public unless special circumstances require that certain proceedings be in closed session to protect confidential or sensitive information to be given in evidence, or to protect victims and witnesses.<sup>120</sup>

The Appeals Division is composed of judges with established competence in relevant areas of international law and the Appeals Chamber is composed of all the judges assigned to the Appeals Division.<sup>121</sup> The Prosecutor or the convicted person can appeal against the decisions of the Pre-Trial and Trial Chambers to the Appeals

Chamber. A sentence may be appealed on the ground of procedural error, error of fact, error of law, or any other ground that affects the fairness or reliability of the proceedings or decision. Further, a sentence may be appealed on the ground of disproportion between the crime and the sentence.<sup>122</sup> The Appeals Chamber may decide to reverse or amend the decision, judgment or sentence, or order a new trial before a different Trial Chamber.<sup>123</sup>

## **Hybrid courts and other internationalised domestic courts and tribunals<sup>124</sup>**

In addition to the temporary and geographically limited international criminal tribunals and the permanent International Criminal Court, a new style of judicial institution has made an appearance recently in which both international and national elements co-exist in varying combinations. Such institutions, which may for convenience be termed hybrid courts, exist primarily to enhance legitimacy and increase acceptability both locally and internationally, invariably in difficult post-conflict situations where reliance upon purely domestic mechanisms carries significant political risks or costs. However, as will be seen, there are a number of models adopted which differ as to formal legal origin, constitutional status, applicable law and structure. Some of these mechanisms may more correctly be termed internationalised courts or tribunals<sup>125</sup> as the balance between the international and the domestic tips far to the latter. They are essentially domestic courts applying domestic law, but with a heightened international element in terms, for example, of their function or origins, the basis of their applicable law or the use of international experts. Some courts are difficult to place along the spectrum, but together this category marks an extension of international concern and involvement in issues focusing upon individual criminal responsibility for what are international crimes, even if subsequently incorporated into domestic law.

### ***The Special Court for Sierra Leone***

The Special Court for Sierra Leone was established, following a particularly violent civil war, by virtue of an agreement between the UN and Sierra Leone dated 16 January 2002, pursuant to Security Council resolution 1315 (2000), in order to prosecute persons bearing ‘the greatest responsibility for serious violations of international humanitarian law and Sierra Leonean law committed in the territory of Sierra Leone since 30 November 1996’ on the basis of individual criminal responsibility.<sup>126</sup> However, it is stipulated that any transgressions by peacekeepers and related personnel present in the country by virtue of agreements with the UN or other governments or regional organisations or otherwise with the consent of the

Sierra Leonean government are within the ‘primary jurisdiction’ of the sending state.<sup>127</sup>

The Special Court consists of the Chambers (two Trial Chambers and an Appeals Chamber), the Prosecutor and the Registry. Three judges serve in each Trial Chamber, of whom one is appointed by the Sierra Leonean government and two are appointed by the UN Secretary-General.<sup>128</sup> Five judges sit in the Appeals Chamber, of whom two are appointed by the government and three by the UN Secretary-General.<sup>129</sup> The Appeals Chamber hears appeals from persons convicted by the Trial Chamber or from the Prosecutor on the grounds of procedural error, an error on a question of law invalidating the decision or an error of fact which has occasioned a miscarriage of justice. The Appeals Chamber may affirm, reverse or revise the decisions taken by the Trial Chamber. In so acting, the judges of the Appeals Chamber of the Special Court are to be guided by the decisions of the Appeals Chamber of the International Tribunals for the former Yugoslavia and for Rwanda. In the interpretation and application of the laws of Sierra Leone, they are to be guided by the decisions of the Supreme Court of Sierra Leone.<sup>130</sup>

The Prosecutor, who is appointed by the UN Secretary-General for a three-year term and acts independently as a separate organ of the Special Court, is responsible for the investigation and prosecution of persons who bear the greatest responsibility for serious violations of international humanitarian law and crimes under Sierra Leonean law committed in the territory of Sierra Leone since 30 November 1996. The Office of the Prosecutor has the power to question suspects, victims and witnesses, to collect evidence and to conduct on-site investigations. The Prosecutor is assisted by a Sierra Leonean Deputy Prosecutor, and by a mixture of Sierra Leonean and international staff.<sup>131</sup> The Registry is responsible for the administration and servicing of the Special Court and is appointed by the UN Secretary-General after consultation with the President of the Special Court.<sup>132</sup>

The jurisdiction of the Special Court mirrors the hybrid nature of its creation and staffing. The Court has jurisdiction with regard to crimes against humanity; violations of article 3 common to the Geneva Conventions and of Additional Protocol II; other serious violations of international humanitarian law<sup>133</sup> and certain crimes under Sierra Leonean law.<sup>134</sup> Article 8 of the Statute provides that the Special Court and the national courts of Sierra Leone have concurrent jurisdiction, but that the Special Court has primacy over the national courts and that at any stage of the procedure it may formally request a national court to defer to its competence. The Annual Report of the Special Court for 2006–7 notes that thirteen persons were indicted, all between March and September 2003. Of these, nine were in custody, one dead, one still at large, while two indictments were withdrawn. Trials of the nine in custody began in 2004 and 2005 in three joint trials. Of particular interest has

been the Charles Taylor case. He was the former President of Liberia. His claim to immunity was rejected by the Appeals Chamber in May 2004<sup>135</sup> and he stood trial in The Hague at the premises of the ICC. He was convicted on all counts on 26 April 2012 and sentenced to fifty years' imprisonment.<sup>136</sup> Judgment in the AFRC trial was handed down on 20 June 2007 and the three accused convicted of offences. Sentencing took place on 19 July 2007 and the appeal against sentencing was dismissed on 22 February 2008.<sup>137</sup> On 2 August 2007, Trial Chamber I reached a decision in the trial of three persons accused of being leaders of the so-called 'Civil Defence Forces', of whom one died prior to pronouncement of judgment, in which the two remaining accused were convicted.<sup>138</sup> The Special Court adopted a completion strategy under which proceedings were due to be completed in 2007.<sup>139</sup> However, this date was not able to be met and a Residual Special Court was created.<sup>140</sup>

## ***Extraordinary Chambers in the Courts of Cambodia***

The Khmer Rouge regime under Pol Pot took power in Cambodia in 1975 following a civil war and proceeded to commit widescale atrocities which are believed to have resulted in the death of well over 1 million people. The regime was ousted by a Vietnamese invasion in 1979. In 1997, the Cambodian government requested the United Nations (UN) to assist in establishing a trial process in order to prosecute the senior leaders of the Khmer Rouge. In 2001, the Cambodian National Assembly passed a law to create a court to try serious crimes committed during the Khmer Rouge regime. On 13 May 2003, after a long period of negotiation, the UN General Assembly approved a Draft Agreement between the UN and Cambodia providing for Extraordinary Chambers in the courts of Cambodia, with the aim of bringing to trial senior leaders of Democratic Kampuchea and those who were most responsible for the crimes and serious violations of Cambodian penal law, international humanitarian law and custom, and international conventions recognised by Cambodia, that were committed during the period from 17 April 1975 to 6 January 1979.<sup>141</sup> The Agreement was ratified by Cambodia on 19 October 2004.

Article 2 of the Agreement provided that the Extraordinary Chambers were to have subject-matter jurisdiction consistent with that laid down in the Cambodian Law (of 2001) and that the Agreement was to be implemented via that law. However, it is provided also that the Vienna Convention on the Law of Treaties, 1969 is to apply to the Agreement. Accordingly, the Agreement must be seen as an international treaty, although one closely linked with the relevant domestic law. The Chambers are composed of a Trial Chamber, consisting of three Cambodian judges and two international judges, and a Supreme Court Chamber, serving as both appellate chamber and final instance and consisting of four Cambodian judges and

three international judges. The UN Secretary-General was to nominate seven judges and the Cambodian Supreme Council of Magistracy, the highest domestic judicial body, was to choose five of these to serve in the Chambers.<sup>142</sup> The Agreement also provided for independent co-investigation judges, one Cambodian and one international, who are responsible for the conduct of investigations,<sup>143</sup> and two independent co-prosecutors, one Cambodian and one international, competent to appear in both Chambers, who are responsible for the conduct of the prosecutions.<sup>144</sup>

The jurisdiction of the Extraordinary Chambers covers the crime of genocide as defined in the Genocide Convention, 1948, crimes against humanity as defined in the 1998 Rome Statute of the International Criminal Court and grave breaches of the 1949 Geneva Conventions and such other crimes as are defined in Chapter II of the Cambodian Law of 2001 with respect to senior leaders of Democratic Kampuchea.<sup>145</sup> The procedure of the Chambers is to be in accordance with Cambodian law, but where Cambodian law does not deal with a particular matter, or where there is uncertainty regarding the interpretation or application of a relevant rule of Cambodian law, or where there is a question regarding the consistency of such a rule with international standards, guidance may also be sought in procedural rules established at the international level. It is also provided that the Extraordinary Chambers are to exercise their jurisdiction in accordance with international standards of justice, fairness and due process of law, as set out in Articles 14 and 15 of the 1966 International Covenant on Civil and Political Rights, to which Cambodia is a party.<sup>146</sup>

A list of five suspects was submitted by the prosecutors on 19 July 2007 to the Chambers with a request that they be indicted and, on 31 July 2007, the first suspect (Khang Khek Ieu, known as ‘Duch’) was indicted.<sup>147</sup> He was convicted on 26 July 2010 of crimes against humanity and grave breaches of the 1949 Geneva Conventions. The decision was affirmed by the Supreme Court on 3 February 2012.<sup>148</sup> Further proceedings are continuing against other suspects.<sup>149</sup>

## ***Kosovo Regulation 64 panels***<sup>150</sup>

Following the conflict between the Federal Republic of Yugoslavia (as it then was, today Serbia) and NATO in 1999, the Security Council adopted resolution 1244, which *inter alia* called for the establishment of an ‘international civil presence’ in Kosovo. The international civil presence was granted responsibilities, including promoting ‘the establishment, pending a final settlement, of substantial autonomy and self-government’; performing basic civilian administrative functions; organising the development of provisional institutions for democratic and autonomous self-government pending a political settlement; and protecting and

promoting human rights.<sup>151</sup> The competence of the international civil presence carried out by the UN Interim Administration Mission in Kosovo (UNMIK) was extensive. Section 1.1 of the first regulation issued by UNMIK in 1999 stated that: ‘All legislative and executive authority with respect to Kosovo, including the administration of the judiciary, is vested in UNMIK and is exercised by the Special Representative of the Secretary General’,<sup>152</sup> while section 1.2 provided that the Special Representative could appoint any person to perform functions in the civil administration in Kosovo, including the judiciary, or remove such person in accordance with the applicable law.<sup>153</sup>

Following a series of disturbances in 2000, UNMIK Regulation 2000/6 was adopted, providing for the appointment of international judges and prosecutors,<sup>154</sup> and UNMIK Regulation 2000/64 was adopted, providing for UNMIK to create panels (known as Regulation 64 panels) of three judges, including at least two international judges, at the request of the accused, defence counsel or prosecutor. Such international judges functioned as regular court judges in Kosovo with powers derived from domestic legislation, but their involvement in a case was under either their own control or at the behest of the UN Secretary-General’s Special Representative in Kosovo. The applicable law was stated to be regulations promulgated by the Special Representative and subsidiary instruments issued thereunder and the law in force in Kosovo on 22 March 1989.<sup>155</sup> However, problems surfaced, particularly with regard to the high rate of national judge convictions overturned by retrials by international judges and lack of systematic publication of case decisions and brevity of such decisions.<sup>156</sup> Kosovo declared independence in early 2008.<sup>157</sup>

### ***East Timor Special Panels for Serious Crimes***<sup>158</sup>

Following a period of violence in East Timor instigated by pro-Indonesian militia after the ending of the long Indonesian occupation, the Security Council established the UN Transitional Administration in East Timor (UNTAET) with a wide-ranging mandate to administer the territory.<sup>159</sup> By Regulation No. 1 adopted on 27 November 1999, all legislative and executive authority with respect to East Timor, including the administration of the judiciary, was vested in UNTAET and exercised by the Transitional Administrator. This administrator was given the competence further to appoint any person to perform functions in the civil administration in the territory, including the judiciary, or remove such person and to issue regulations and directives. UNTAET created a new courts system,<sup>160</sup> including the establishment of special panels to deal with serious crimes within the District Court of Dili and in the Court of Appeal.<sup>161</sup> These serious crimes were defined as genocide, war crimes,

crimes against humanity, murder, sexual offences and torture,<sup>162</sup> for which there was individual criminal responsibility.<sup>163</sup> The applicable law was the law of East Timor as promulgated by sections 2 and 3 of UNTAET Regulation No. 1999/1 and any subsequent UNTAET regulations and directives; and, where appropriate, applicable treaties and recognised principles and norms of international law, including the established principles of the international law of armed conflict.

The Panels in the District Court of Dili were to be composed of two international judges and one East Timorese judge, as were the Panels in the Court of Appeal in Dili. In cases of special importance or gravity, a panel of five judges composed of three international and two East Timorese judges could be established.<sup>164</sup> However, the system had barely started before 2003 and in the *Armando Dos Santos* case, the Court of Appeal held, in a decision much criticised,<sup>165</sup> that since the Indonesian occupation was illegal, Indonesian law was never validly in force so that domestic law was Portuguese law and, further, Regulation 2000/15 could not be applied retroactively so that only Portuguese law could be applied to crimes committed before 6 June 2000.<sup>166</sup> On 20 May 2002, the UN handed over its authority to the new institutions of East Timor and UNTAET was replaced by the UN Mission of Support in East Timor (UNMISSET), although UNTAET regulations continued in force. In May 2005, UNMISSET came to an end and the Serious Crimes Unit closed. Partly no doubt as a consequence, the Special Panels suspended operations indefinitely. By this time, fifty-five trials, most involving relatively low-level defendants, had taken place, eighty-four individuals had been convicted and three acquitted.<sup>167</sup>

## ***The Bosnia War Crimes Chamber***<sup>168</sup>

In January 2003, the Office of the High Representative in Bosnia<sup>169</sup> and the International Criminal Tribunal for the Former Yugoslavia issued a set of joint conclusions recommending the creation of a specialised chamber within the State Court of Bosnia and Herzegovina to try war crimes cases.<sup>170</sup> This was supported by the UN Security Council.<sup>171</sup> The Chamber came into being in 2005 with jurisdiction concerning cases referred to it by the ICTY pursuant to Rule 11*bis* of the ICTY Rules of Procedure and Evidence with regard to lower- to mid-level accused persons. As such, this procedure forms part of the completion strategy of the ICTY.<sup>172</sup> In addition, the Chamber has jurisdiction with regard to cases submitted to it by the Office of the Prosecutor of the ICTY where investigations have not been completed, and the first case was referred to the Chamber on 1 September 2005.<sup>173</sup> Further, the Chamber also has jurisdiction over what have been termed ‘Rules of the Road’ cases. The ‘Rules of the Road’ procedure was first established in response to the widespread fear of arbitrary arrest and detention immediately after the conflict in

Bosnia. Originally, the Bosnian authorities were obliged to submit every war crimes case proposed for prosecution in Bosnia to the Office of the Prosecutor of the ICTY to determine whether the evidence was sufficient by international standards before proceeding to arrest. This review function was subsequently assumed by the Special Department for War Crimes within the Office of the Prosecutor of the State Court of Bosnia in October 2004. Where the case has not yet led to a confirmed indictment and where the prosecutor determines that the case is ‘highly sensitive’, it will be passed to the Chamber, otherwise it will be tried before the relevant cantonal or district court. If, however, the indictment has been confirmed, the case will remain with the relevant cantonal or district court.

The Chamber has both trial and appeals chambers and there are currently five judicial panels, each comprising two international judges and one local judge, the latter of whom is the presiding judge of the panel. The Office of the Prosecutor of the State Court includes a Special Department for War Crimes and there are five international prosecutors and one international acting prosecutor, as well as eight local prosecutors, including the deputy prosecutor.<sup>174</sup> The Registry manages the process of appointing and engaging international judges and prosecutors. The international judges are appointed by the High Representative after a joint recommendation of the President of the State Court and the President of the High Judicial and Prosecutorial Council, while the international prosecutors are appointed by the High Representative following a joint recommendation from the Bosnian Chief Prosecutor, the President of the High Judicial and Prosecutorial Council and the Registry.<sup>175</sup>

As of October 2006, the Chamber had confirmed a total of eighteen indictments involving thirty-two defendants. In addition to cases initiated locally, the Chamber had received five Rule 11 *bis* referrals, involving nine accused, from the ICTY.<sup>176</sup> The applicable law is that of Bosnia, including criminal and criminal procedure codes introduced by the High Representative in 2003. Currently more than 200 cases have been completed.<sup>177</sup>

## ***The Special Tribunal for Lebanon***<sup>178</sup>

Following the assassination of Rafiq Hariri, the former Prime Minister of Lebanon, in February 2005, the Security Council established an International Independent Investigation Commission to aid the Lebanese authorities in their investigation. As a result of its report and the request of the Lebanese government to establish ‘a tribunal of an international character’ to try those persons accused of the assassination,<sup>179</sup> the Security Council adopted resolution 1664 (2006) calling upon the UN Secretary-General to negotiate an agreement with the government of

Lebanon aimed at establishing a tribunal of an international character based on the highest international standards of criminal justice. The Secretary-General's report<sup>180</sup> was accepted by the Council in resolution 1757 (2007). Acting under Chapter VII of the Charter, the Council established the Special Tribunal for Lebanon by virtue of an agreement with the government of Lebanon, annexed to the resolution. The Statute of the Tribunal is attached to the agreement.

The Tribunal has jurisdiction not only with regard to those responsible for the assassination of Rafiq Hariri but also with regard to those responsible for other attacks that occurred in Lebanon between 1 October 2004 and 12 December 2005, or any later date decided by the parties and with the consent of the Security Council, that are seen as connected in accordance with the principles of criminal justice and are of a nature and gravity similar to the attack of 14 February 2005.<sup>181</sup> The Tribunal was inaugurated on 1 March 2009 and is composed of four organs: the Chambers, the Office of the Prosecutor, the Registry and the Defence Office. The Chambers is composed of eleven independent judges, divided into a Pre-Trial Judge, a Trial Chamber and an Appeals Chamber. A single international judge serves as Pre-Trial Judge, while three judges serve in the Trial Chamber, being one Lebanese judge and two international judges. Five judges serve in the Appeals Chamber, of whom two are Lebanese and three international judges.<sup>182</sup> The Prosecutor and the Registrar were appointed by the UN Secretary-General after consultation with the Lebanese government, while the Head of the Defence Office was appointed by the Secretary-General after consultation with the President of the Tribunal.<sup>183</sup> The applicable law is Lebanese criminal law and the Tribunal has concurrent jurisdiction with Lebanese courts and possesses primacy over them.<sup>184</sup> A number of cases are currently before the Tribunal and a decision has been taken, for example, to hold a trial *in absentia*.<sup>185</sup> In an important interlocutory decision, the Appeals Chamber held that customary international law now recognizes a distinct crime of terrorism, applicable to individuals, in peacetime.<sup>186</sup>

## ***The Iraqi High Tribunal***<sup>187</sup>

The Governing Council of Iraq was authorised by the Coalition Provisional Authority on 10 December 2003 to establish the Iraqi Special Tribunal to hear crimes alleged against the former regime of Saddam Hussein.<sup>188</sup> A revised Statute was enacted in 2005 and the tribunal renamed the Iraqi High Tribunal. The Tribunal has jurisdiction over genocide, crimes against humanity and war crimes, the definitions of which are based upon the provisions of the Rome Statute and newly incorporated into Iraqi law, committed between 16 July 1968 and 1 May 2003<sup>189</sup> by Iraqi nationals or residents.<sup>190</sup> Persons accused of committing crimes within the

jurisdiction of the Tribunal bear individual criminal responsibility.<sup>191</sup> The Tribunal has concurrent jurisdiction with national courts but primacy over them. Article 6(b) of the Statute provides that the President of the Tribunal shall be required to appoint non-Iraqi nationals to act in advisory capacities or as observers to the Trial Chambers and to the Appeals Chamber. The role of the non-Iraqi nationals is stated to be to provide assistance to the judges with respect to international law and the experience of similar tribunals (whether international or otherwise), and to monitor the protection by the Tribunal of general due process of law standards. In appointing such non-Iraqi experts, the President of the Tribunal is entitled to request assistance from the international community, including the United Nations. However, the judges and prosecutors of the Tribunal are all Iraqi nationals. Criticisms have been made of the Tribunal, including the fact that it can impose the death penalty, as for example with regard to Saddam Hussein upon his conviction in the *Dujail* case.<sup>192</sup>

## ***The Serbian War Crimes Chamber***

On 1 July 2003, the Serbian National Assembly adopted a law establishing a specialised War Crimes Chamber within the Belgrade District Court to prosecute and investigate crimes against humanity and serious violations of international humanitarian law as defined in Serbian law. A War Crimes Prosecutor's Office was established in Belgrade. The Chamber consists of two panels of three judges each selected from the Belgrade District Court or seconded from other courts, and two investigative judges.<sup>193</sup> The International Criminal Tribunal for the Former Yugoslavia has referred some cases to this Chamber, both where no indictment was issued and under rule 11 *bis*.<sup>194</sup> It is, however, essentially a national court.

## **International crimes**

A brief survey of some of the main features of international crimes for which individual criminal responsibility now exists will follow, noting that issues concerning the jurisdiction of purely domestic courts for those international crimes that have been incorporated into domestic legislation are covered in chapter 12, while state responsibility for such offences is covered in chapter 14.

## **Genocide<sup>195</sup>**

Article 4 of the Statute of the ICTY, by way of example, provides that:

2. Genocide means any of the following acts committed with intent to destroy, in whole or in part, a national, ethnical, racial or religious group, as such: (a)

killing members of the group; (b) causing serious bodily or mental harm to members of the group; (c) deliberately inflicting on the group conditions of life calculated to bring about its physical destruction in whole or in part; (d) imposing measures intended to prevent births within the group; (e) forcibly transferring children of the group to another group

and that the following acts shall be punishable:

(a) genocide; (b) conspiracy to commit genocide; (c) direct and public incitement to commit genocide; (d) attempt to commit genocide; (e) complicity in genocide.<sup>196</sup>

Genocide has been regarded as an international crime since the Second World War and the Genocide Convention, 1948 was a critical step in that process. The crime of genocide has also been included in the operative provisions of the statutes of most of the courts and tribunals discussed in the previous section. Case-law before the two international criminal tribunals (ICTY and ICTR) has, however, helped clarify many of the relevant principles. For example, perhaps the distinctive feature of the crime is the importance of establishing the specific intent to destroy the group in question in whole or in part, for genocide is more than the act of killing. This was emphasised by the ICTY in the *Jelisić* case, which noted that ‘it is in fact the *mens rea* [i.e. the intention as distinct from the actual act] which gives genocide its speciality and distinguishes it from an ordinary crime and other crimes against international humanitarian law’.<sup>197</sup> This was reaffirmed by the ICTR in the *Akayesu* case,<sup>198</sup> which defined the specific intent necessary as ‘the specific intention, required as a constitutive element of the crime, which demands that the perpetrator clearly seeks to produce the act charged’. The Trial Chamber underlined the difficulties in establishing the critical intent requirement and held that recourse may be had in the absence of confessions to inferences from facts.<sup>199</sup> In the *Ruggiu* case, the ICTR held that a person who incites others to commit genocide must himself have a specific intent to commit genocide.<sup>200</sup> However, in the *Jelisić* case, the ICTY pointed to the difficulty in practice of proving the genocidal intention of an individual if the crimes committed were not widespread or backed up by an organisation or a system.<sup>201</sup> This may be distinguished from the *Ruggiu* case, where a systematic scheme to destroy the Tutsis was not in doubt.

The element of intention was further discussed by the ICTY in the *Krstić* case, where it was noted that the intent to eradicate a group within a limited geographical area, such as a region of a country or even a municipality, could be characterised as genocide,<sup>202</sup> while ‘the intent to destroy a group, even if only in part, means seeking

to destroy a distinct part of the group as opposed to an accumulation of isolated individuals within it'. The part of the group sought to be destroyed had to constitute a distinct element.<sup>203</sup> In the decision of the Appeal Chamber in this case, it was emphasised that it was well established that

where a conviction for genocide relies on the intent to destroy a protected group' in part', the part must be a substantial part of that group. The aim of the Genocide Convention is to prevent the intentional destruction of entire human groups, and the part targeted must be significant enough to have an impact on the group as a whole.<sup>204</sup>

It was concluded that the intent requirement of genocide under article 4 of the Statute was satisfied where evidence shows that the alleged perpetrator

intended to destroy at least a substantial part of the protected group. The determination of when the targeted part is substantial enough to meet this requirement may involve a number of considerations. The numeric size of the targeted part of the group is the necessary and important starting point, though not in all cases the ending point of the inquiry. The number of individuals targeted should be evaluated not only in absolute terms, but also in relation to the overall size of the entire group. In addition to the numeric size of the targeted portion, its prominence within the group can be a useful consideration. If a specific part of the group is emblematic of the overall group, or is essential to its survival, that may support a finding that the part qualifies as substantial within the meaning of Article 4.<sup>205</sup>

It was also emphasised that each perpetrator must possess the necessary specific intent.<sup>206</sup>

The intention to 'destroy' means the physical or biological destruction of all or part of the group and not, for example, attacks upon the cultural or sociological characteristics of a group in order to remove its separate identity.<sup>207</sup> The sometimes difficult question of the definition of membership of the groups specifically referred to in the relevant instruments has also been analysed. In *Akayesu*,<sup>208</sup> the Trial Chamber of the Rwanda Tribunal leaned towards the objective definition of membership of groups,<sup>209</sup> but this has been mitigated by other cases emphasising the importance of subjective elements as part of the relevant framework.<sup>210</sup>

In so far as the material elements of the crime are concerned, killing is clearly the key conduct involved and it has been held that the act in question must be intentional if not necessarily premeditated.<sup>211</sup> Forced migration (or 'ethnic cleansing') as such

does not constitute genocide,<sup>212</sup> but may amount to a pattern of conduct demonstrating genocidal intent.<sup>213</sup> The *Akayesu* case has also been important in emphasising that rape and sexual violence may amount to genocide when committed with the necessary specific intent to commit genocide. The Trial Chamber concluded that ‘Sexual violence was an integral part of the process of destruction, specifically targeting Tutsi women and specifically contributing to their destruction and to the destruction of the Tutsi group as a whole.’<sup>214</sup> Further, where it is intended to prevent births within the group whether by impelling the child born of rape to be part of another group or where the woman raped refuses subsequently to procreate, this may amount to genocide.<sup>215</sup> The Rwanda Tribunal has also held that genocide may be committed by omission as well as by acts.<sup>216</sup>

## War crimes<sup>217</sup>

War crimes are essentially serious violations of the rules of customary and treaty law concerning international humanitarian law, otherwise known as the law governing armed conflicts.<sup>218</sup> Article 2 of the Statute of the ICTY, by way of example, provides for jurisdiction with regard to:

grave breaches of the Geneva Conventions of 12 August 1949, namely the following acts against persons or property protected under the provisions of the relevant Geneva Convention: (a) wilful killing; (b) torture or inhuman treatment, including biological experiments; (c) wilfully causing great suffering or serious injury to body or health; (d) extensive destruction and appropriation of property, not justified by military necessity and carried out unlawfully and wantonly; (e) compelling a prisoner of war or a civilian to serve in the forces of a hostile power; (f) wilfully depriving a prisoner of war or a civilian of the rights of fair and regular trial; (g) unlawful deportation or transfer or unlawful confinement of a civilian; (h) taking civilians as hostages.

Article 3 provides for jurisdiction for violation of the laws or customs of war. Such violations include, but are not be limited to:

(a) employment of poisonous weapons or other weapons calculated to cause unnecessary suffering; (b) wanton destruction of cities, towns or villages, or devastation not justified by military necessity; (c) attack, or bombardment, by whatever means, of undefended towns, villages, dwellings, or buildings; (d) seizure of, destruction or wilful damage done to institutions dedicated to religion, charity and education, the arts and sciences, historic monuments and works of art and science; (e) plunder of public or private property.<sup>219</sup>

Accordingly, war crimes are a discrete part of the principles of international humanitarian law, being those which have become accepted as criminal offences for which there is individual responsibility (in addition to state responsibility). Essentially, war crimes law applies to individuals and international humanitarian law to states. There is a long history of provision for individual responsibility for war crimes,<sup>220</sup> and article 6(b) of the Nuremberg Charter included war crimes within the jurisdiction of the Tribunal, while the concept of grave breaches of the Geneva Conventions of 1949 recognised certain violations as crimes subject to universal jurisdiction. Traditionally, international humanitarian law has distinguished between international and non-international armed conflicts, with legal provision being relatively modest with regard to the latter. However, common article 3 to the Geneva Conventions laid down certain minimum standards which were elaborated in Additional Protocol II of 1977.<sup>221</sup> In addition, since the conflict in Rwanda was clearly an internal one, the ICTR Statute necessarily provided for individual responsibility for violations of the principles concerning non-international armed conflicts, in effect recognising that common article 3 and Additional Protocol II formed the basis of criminal liability.

The key modern decision has been the *Tadić* case before the ICTY. The Appeals Chamber in the jurisdictional phase of the case noted that an armed conflict existed whenever there was a resort to armed force between states or protracted armed violence between governmental authorities and organised armed groups or between such groups within a state. International humanitarian law applied from the initiation of such armed conflicts and extended beyond the cessation of hostilities until a general conclusion of peace was reached; or, in the case of internal conflicts, a peaceful settlement achieved. Until that moment, international humanitarian law continued to apply in the whole territory of the warring states or, in the case of internal conflicts, the whole territory under the control of a party, whether or not actual combat takes place there.<sup>222</sup> The distinction between international and non-international armed conflicts was thus minimised. Although it was noted that international law did not regulate internal conflict in all aspects, it was held to 'cover such areas as protection of civilians from hostilities, in particular from indiscriminate attacks, protection of civilian objects, in particular cultural property, protection of all those who do not (or no longer) take active part in hostilities, as well as prohibition of means of warfare proscribed in international armed conflicts and ban of certain methods of conducting hostilities'.<sup>223</sup> Further, it was held that individual criminal responsibility existed with regard to violations laid down in customary and treaty law, irrespective of whether the conflict was an international or an internal one.<sup>224</sup> It was concluded that in order for article 3 of the ICTY Statute to be applicable, the violation had to be 'serious', which meant that it had to constitute

a breach of a rule protecting important values, and the breach must involve grave consequences for the victim. In addition, the violation of the rule must entail, under customary or conventional law, the individual criminal responsibility of the person breaching the rule.<sup>225</sup>

This *Tadić* judgment can now be taken as reflecting international law and it is to be noted that a significant number of provisions dealing with international conflicts now apply to internal conflicts as laid down in the Statute of the International Criminal Court.<sup>226</sup>

## Crimes against humanity<sup>227</sup>

Article 6(c) of the Nuremberg Charter included ‘crimes against humanity’ within the jurisdiction of the Tribunal and these were defined as ‘murder, extermination, enslavement, deportation and other inhumane acts committed against any civilian population, before or during the war, or persecutions on political, racial or religious grounds in execution of or in connection with any crime within the jurisdiction of the Tribunal, whether or not in violation of the law of the country where perpetrated’.<sup>228</sup>

Article 5 of the Statute of the ICTY provided for jurisdiction with regard to the following crimes when committed in armed conflict, whether international or internal in character, and directed against any civilian population: ‘(a) murder; (b) extermination; (c) enslavement; (d) deportation; (e) imprisonment; (f) torture; (g) rape; (h) persecutions on political, racial and religious grounds; (i) other inhumane acts’. Article 3 of the Statute of the ICTR is in similar form, other than that it is specified that the crimes in question (which are the same as those specified in the ICTY Statute) must have been committed as part of a widespread or systematic attack against any civilian population on national, political, ethnic, racial or religious grounds. Article 7 of the Statute of the ICC notes that the crimes in question (enforced disappearance and apartheid are added to the list appearing in the Statutes of the two international criminal tribunals) have to be committed as part of a widespread or systematic attack directed against any civilian population, with knowledge of the attack.

Although article 5 of the ICTY Statute did not specifically refer, unlike the other instruments, to the necessity of a widespread or systematic attack as the required framework for the commission of acts amounting to crimes against humanity, this was incorporated into the jurisprudence through the *Tadić* trial decision of 7 May 1997. This interpreted the phrase ‘directed against any civilian population’ as meaning ‘that the acts must occur on a widespread or systematic basis, that there must be some form of a governmental, organizational or group policy to commit

these acts and that the perpetrator must know of the context within which his actions are taken'.<sup>229</sup>

The requirement of 'widespread or systematic' was examined in *Akayesu*, where the Trial Chamber declared that the concept of widespread could be defined as 'massive, frequent, large scale action, carried out collectively with considerable seriousness and directed against a multiplicity of victims', while 'systematic' could be defined as 'thoroughly organised and following a regular pattern on the basis of a common policy involving substantial public or private resources'. It was noted that there was no requirement that this policy must be adopted formally as the policy of a state, although there had to be some kind of preconceived plan or policy.<sup>230</sup> In *Blaškić*, the ICTY Trial Chamber defined 'systematic' in terms of

the existence of a political objective, a plan pursuant to which the attack is perpetrated or an ideology, in the broad sense of the word, that is, to destroy, persecute or weaken a community; the perpetration of a criminal act on a very large scale against a group of civilians or the repeated and continuous commission of inhumane acts linked to one another; the preparation and use of significant public or private resources, whether military or other, and the implication of high-level political and/or military authorities in the definition and establishment of the methodical plan. The plan, however, need not necessarily be declared expressly or even stated clearly and precisely. It may be surmised from the occurrence of a series of events.<sup>231</sup>

In *Kunarac*, the ICTY Appeals Chamber held that while proof that the attack was directed against a civilian population and proof that it was widespread or systematic were legal elements of the crime, it was not necessary to show that they were the result of the existence of a policy or plan. The existence of a policy or plan could be evidentially relevant, but it was not a legal element of the crime.<sup>232</sup>

Many of the same acts may constitute both war crimes and crimes against humanity, but what is distinctive about the latter is that they do not need to take place during an armed conflict. However, to constitute crimes against humanity the acts in question have to be committed as part of a widespread or systematic activity, and to be committed against any civilian population, thus any reference to nationality is irrelevant. However, it is important to maintain a clear distinction between civilian and non-civilian in this context. The Trial Chamber in the *Martić* case noted that one could not allow the term 'civilian' for the purposes of a crime against humanity to include all persons who were not actively participating in combat, including those who were *hors de combat*, at the time of the crimes, as this would blur the necessary distinction between combatants and non-combatants.<sup>233</sup>

Of course, any act of genocide by definition will constitute also a crime against humanity, although the reverse is clearly not the case. What is required for crimes against humanity is an ‘attack’ and this has been broadly defined. In the *Akayesu* case, for example, this term was defined as an

unlawful act of the kind enumerated in Article 3(a) to (i) of the Statute, like murder, extermination, enslavement etc. An attack may also be non-violent in nature, like imposing a system of apartheid, which is declared a crime against humanity in Article 1 of the Apartheid Convention of 1973, or exerting pressure on the population to act in a particular manner, may come under the purview of an attack, if orchestrated on a massive scale or in a systematic manner.<sup>234</sup>

It is also necessary for the alleged perpetrator to be aware that his act was part of a broader attack. The Appeals Chamber in its jurisdiction decision in *Tadić* concluded that to convict an accused of crimes against humanity, it had to be proved that the crimes were related to the attack on a civilian population and that the accused knew that his crimes were so related.<sup>235</sup> This is so even if he does not identify with the aims of the attack and his act was committed for personal reasons.<sup>236</sup>

## **Aggression**<sup>237</sup>

Aggression is recognised as a crime in customary international law. Article 6 of the Nuremberg Charter defined its jurisdiction as including ‘(a) Crimes against peace. Namely, planning, preparation, initiation, or waging of a war of aggression or a war in violation of international treaties, agreements or assurances, or participation in a common plan or conspiracy for the accomplishment of any of the foregoing’ and a number of defendants were convicted of offences under this head. General Assembly resolution 95(1) affirmed the principles recognised by the Nuremberg Charter and its judgment. Aggression was termed the ‘supreme international crime’ in one of the judgments.<sup>238</sup> The Tokyo Charter included the same principle as did Allied Control Council Law No. 10. General Assembly resolution 3314 (XXIX) of 14 December 1974 contained a definition of aggression in contravention of the Charter.<sup>239</sup> The crime of aggression is referred to in article 5 of the Statute of the ICC, but in no other such instrument. Indeed, article 5(2) provides that the Court cannot exercise jurisdiction over the crime of aggression until a provision is adopted defining the crime and setting out the conditions under which the Court may exercise jurisdiction with respect to it. The delay in achieving this has been caused by several problems. The first is that, unlike the other substantive international crimes, aggression is a crime of ‘leadership’ and necessarily requires that it be determined as an initial point that the state, of whom the accused is a ‘leader’ in some capacity, has

committed aggression. This is a wholly different proposition from asserting the responsibility of individuals for genocide, war crimes or crimes against humanity. It is also unclear what differences may exist between the state's act of aggression and the individual's crime of aggression. Secondly, article 5(2) of the ICC Statute provides that the conditions for the exercise of the Court's jurisdiction must be consistent with the relevant provisions of the UN Charter. The Security Council has the competence under Chapter VII of the Charter to determine whether an act of aggression has taken place and it has been argued that a prior determination by the Council is necessary before the Court may exercise jurisdiction with regard to individual responsibility for aggression. This has been contested.<sup>240</sup> At the ICC Review Conference held in Kampala in 2010, amendments to the Statute were adopted, which defined the crime of aggression in a new article 8 *bis*,<sup>241</sup> and laid down jurisdictional conditions.<sup>242</sup>

## **Conclusion – fair trial provisions**

Part of the rapidly developing international law concerning individual responsibility for international crimes relates to the protection of the human rights of the accused. The following provisions constitute the essence of the requirements of fair trial. Article 21 of the ICTY Statute, for example, provides that:

1. All persons shall be equal before the International Tribunal.
2. In the determination of charges against him, the accused shall be entitled to a fair and public hearing, subject to article 22 of the Statute [which concerns the protection of victims and witnesses].
3. The accused shall be presumed innocent until proved guilty according to the provisions of the present Statute.
4. In the determination of any charge against the accused pursuant to the present Statute, the accused shall be entitled to the following minimum guarantees, in full equality:
  - (a) to be informed promptly and in detail in a language which he understands of the nature and cause of the charge against him;
  - (b) to have adequate time and facilities for the preparation of his defence and to communicate with counsel of his own choosing;
  - (c) to be tried without undue delay;
  - (d) to be tried in his presence, and to defend himself in person or through legal assistance of his own choosing; to be informed, if he does not have legal assistance, of this right; and to have legal assistance assigned to him, in any case where the interests

- of justice so require, and without payment by him in any such case if he does not have sufficient means to pay for it;
- (e) to examine, or have examined, the witnesses against him and to obtain the attendance and examination of witnesses on his behalf under the same conditions as witnesses against him;
  - (f) to have the free assistance of an interpreter if he cannot understand or speak the language used in the International Tribunal;
  - (g) not to be compelled to testify against himself or to confess guilt.

This formulation is essentially repeated in article 20 of the ICTR Statute. Article 55 of the ICC Statute provides that:

1. In respect of an investigation under this Statute, a person:
  - (a) Shall not be compelled to incriminate himself or herself or to confess guilt;
  - (b) Shall not be subjected to any form of coercion, duress or threat, to torture or to any other form of cruel, inhuman or degrading treatment or punishment;
  - (c) Shall, if questioned in a language other than a language the person fully understands and speaks, have, free of any cost, the assistance of a competent interpreter and such translations as are necessary to meet the requirements of fairness; and
  - (d) Shall not be subjected to arbitrary arrest or detention, and shall not be deprived of his or her liberty except on such grounds and in accordance with such procedures as are established in this Statute.
  
2. Where there are grounds to believe that a person has committed a crime within the jurisdiction of the Court and that person is about to be questioned either by the Prosecutor, or by national authorities pursuant to a request made under Part 9, that person shall also have the following rights of which he or she shall be informed prior to being questioned:
  - (a) To be informed, prior to being questioned, that there are grounds to believe that he or she has committed a crime within the jurisdiction of the Court;
  - (b) To remain silent, without such silence being a consideration in

- the determination of guilt or innocence;
- (c) To have legal assistance of the person's choosing, or, if the person does not have legal assistance, to have legal assistance assigned to him or her, in any case where the interests of justice so require, and without payment by the person in any such case if the person does not have sufficient means to pay for it; and
  - (d) To be questioned in the presence of counsel unless the person has voluntarily waived his or her right to counsel.

In addition, article 66 provides for the presumption of innocence and for the fact that it is for the Prosecutor to prove the guilt of the accused beyond reasonable doubt. Article 67 lays down that:

1. In the determination of any charge, the accused shall be entitled to a public hearing, having regard to the provisions of this Statute, to a fair hearing conducted impartially, and to the following minimum guarantees, in full equality:
  - (a) To be informed promptly and in detail of the nature, cause and content of the charge, in a language which the accused fully understands and speaks;
  - (b) To have adequate time and facilities for the preparation of the defence and to communicate freely with counsel of the accused's choosing in confidence;
  - (c) To be tried without undue delay;
  - (d) Subject to article 63, paragraph 2, to be present at the trial, to conduct the defence in person or through legal assistance of the accused's choosing, to be informed, if the accused does not have legal assistance, of this right and to have legal assistance assigned by the Court in any case where the interests of justice so require, and without payment if the accused lacks sufficient means to pay for it;
  - (e) To examine, or have examined, the witnesses against him or her and to obtain the attendance and examination of witnesses on his or her behalf under the same conditions as witnesses against him or her. The accused shall also be entitled to raise defences and to present other evidence admissible under this Statute;
  - (f) To have, free of any cost, the assistance of a competent interpreter and such translations as are necessary to meet the requirements of fairness, if any of the proceedings of or

documents presented to the Court are not in a language which the accused fully understands and speaks;

- (g) Not to be compelled to testify or to confess guilt and to remain silent, without such silence being a consideration in the determination of guilt or innocence;
- (h) To make an unsworn oral or written statement in his or her defence; and
- (i) Not to have imposed on him or her any reversal of the burden of proof or any onus of rebuttal.

2. In addition to any other disclosure provided for in this Statute, the Prosecutor shall, as soon as practicable, disclose to the defence evidence in the Prosecutor's possession or control which he or she believes shows or tends to show the innocence of the accused, or to mitigate the guilt of the accused, or which may affect the credibility of prosecution evidence. In case of doubt as to the application of this paragraph, the Court shall decide.<sup>243</sup>

<sup>71</sup> ICTR T. Ch. 1 2 September 1998.

<sup>72</sup> As of August 2013, 47 cases had been completed, with 16 awaiting appeal and 12 acquittals. A further four cases had been transferred to national jurisdictions and nine accused were still at large, see [www.unictt.org/Cases/StatusofCases/tabid/204/Default.aspx](http://www.unictt.org/Cases/StatusofCases/tabid/204/Default.aspx)

<sup>73</sup> As at 10 May 2013, the Tribunal had completed its work at the trial level with respect to all of the 93 accused. This included 55 first-instance judgments involving 75 accused, 10 referrals to national jurisdictions (four apprehended accused and six fugitive cases), three top-priority fugitives whose cases have been transferred to the International Residual Mechanism for Criminal Tribunals, two withdrawn indictments and three indictees who died prior to or in the course of trial. The final substantive trial judgment was delivered as projected in December 2012, and appellate proceedings have been concluded in respect of 46 persons. All but one of the remaining appeals will be completed in 2014. Owing to delays in translation and other factors as described herein, the final appeal (in the *Butare* case) is now projected to be completed by July 2015, see Report on the completion strategy of the International Criminal Tribunal for Rwanda, S/2013,310.

<sup>78</sup> UNGAOR A/2645.

<sup>79</sup> See Report of the ILC on the Work of its 46th Session, A/49/10, pp. 43 ff. See in particular J. Crawford, 'The ILC's Draft Statute for an International Criminal Court', 88 AJIL, 1994, p. 140, and Crawford, 'The Making of the Rome Statute' in *From Nuremberg to The Hague: The Future of International Criminal Justice* (ed. P. Sands), Cambridge, 2003, p. 109

<sup>80</sup> General Assembly resolution 50/46. See also resolutions 51/207 and 52/160.

<sup>81</sup> See A/51/22 and A/CONF.183/13 (III), p. 5.

<sup>82</sup> Article 5. These provisions are further defined in detail in articles 6–8 and see below, p. 309. In addition, article 9 provides for the preparation of Elements of Crimes to assist the Court in the interpretation and application of articles 6, 7 and 8. This was adopted on 9 September 2002 by the Assembly of States Parties, together with the Rules of Procedure and Evidence. However, jurisdiction could not be exercised with regard to the crime of aggression until the Statute had been amended by its definition and the acceptance of conditions for jurisdiction. A review conference was held in Kampala in 2010 and a definition of the crime of aggression agreed, resulting in the insertion of new article 8 *bis* into the Rome Statute. Under new article 15 *bis*, the Court will only have jurisdiction over the crime of aggression one year after the amendment has entered into force for thirty states parties and, on a date after 1 January 2017, the same majority of States Parties as is required for the adoption of an amendment to the Statute (seven-eighths) has voted in favour of allowing the Court to have such jurisdiction, see C.N.651.2010.TREATIES-8 and

[http://www.icc-cpi.int/en\\_menus/asp/reviewconference/Pages/crime%20of%20aggression.aspx](http://www.icc-cpi.int/en_menus/asp/reviewconference/Pages/crime%20of%20aggression.aspx). See also below, note 241.

<sup>83</sup> Article 25.

<sup>84</sup> Article 11. Note, however, that a state may make a declaration under article 12(3) to permit the Court to exercise jurisdiction in the particular case as from 1 July 2002. Note also that under article 124, a state may, upon ratification, decide not to accept the jurisdiction of the ICC over war crimes with regard to its nationals or to crimes committed on its territory for a period of seven years. In fact, only France and Colombia have taken advantage of this provision.

<sup>85</sup> Article 12(2).

<sup>86</sup> Article 13(b).

<sup>87</sup> See [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/situation%20icc%200205.aspx](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/situation%20icc%200205.aspx)

<sup>88</sup> See ICC-02/05-01/07-2 01-05-2007 1/16 CB PT and ICC-02/05-01/07-3 01-05-2007 1/17 CB PT. See also Schabas, *International Criminal Court*, pp. 47 ff. The Prosecutor applied for a warrant of arrest against the President of Sudan on 14 July 2008 alleging genocide, war crimes and crimes against humanity, ICC-OTP-20080714-PR341-ENG

<sup>89</sup> On 4 March 2009 and 12 July 2010, see [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/situation%20icc%200205.aspx](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/situation%20icc%200205.aspx)

<sup>90</sup> See [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/icc0111/Pages/situation%200111.aspx](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/icc0111/Pages/situation%200111.aspx). The warrant against Muammar Gaddafi was terminated upon his death in November 2011. Saif Gaddafi is at the time of writing in custody in Libya which is contesting the obligation reaffirmed by the Court, rejecting the admissibility challenge, to

transfer him to the Court, see e.g. Decision of the Appeals Chamber, ICC-01/11-01/1104A4, 18 July 2013 and see as to Al-Senussi where there is a similar challenge, ICC-01/11-01/11, 19 August 2013, see also [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/icc0111/related%20cases](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/icc0111/related%20cases)

<sup>91</sup> Articles 13(a) and 14.

<sup>92</sup> Article 13(c).

<sup>93</sup> Article 15. The refusal of the Pre-Trial Chamber to authorise the investigation will not preclude the presentation of a subsequent request by the Prosecutor based on new facts or evidence regarding the same situation. If, after the preliminary examination referred to in paragraphs 1 and 2, the Prosecutor concludes that the information provided does not constitute a reasonable basis for an investigation, he or she shall inform those who provided the information. This shall not preclude the Prosecutor from considering further information submitted to him or her regarding the same situation in the light of new facts or evidence.

<sup>94</sup> In July 2004, an investigation was opened by the Prosecutor, and on 8 July 2005, warrants of arrest for crimes against humanity and war crimes against five senior commanders (one of whom died in 2006) of the Lord's Resistance Army were issued under seal by Pre-Trial Chamber II, see [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/situation%20icc%20020](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/situation%20icc%20020)

<sup>95</sup> See ICC-OTP-20040419-50-En. An investigation was opened in June 2004, the first such investigation by the Prosecutor: see ICC-OTP-20040623-59-En. An arrest warrant was issued in early 2006 against Thomas Lubanga Dyilo, who was convicted on 14 March 2012 and sentenced to 14 years. This is subject to an appeal, [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/situation%20icc%20010](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/situation%20icc%20010). An arrest warrant was issued against Germain Katanga and Mathieu Ngudjolo Chui in July 2007 and after the trial, the charges were severed and the latter acquitted (although this has been appealed), while the verdict against the former is awaited, [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/Pages/situations%20and%20cases](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/Pages/situations%20and%20cases). A further accused (Mbarushimana) has been released, while in March 2013, Bosco Ntaganda surrendered himself voluntarily and is in custody, *ibid*.

<sup>96</sup> An investigation was opened by the Prosecutor in May 2007 and an arrest warrant issued. The trial of Jean-Pierre Bemba Gombo is underway, [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/situation%20icc%20010pierre%20bemba%20gombo.aspx](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/situation%20icc%20010pierre%20bemba%20gombo.aspx)

<sup>97</sup> [www.icc-cpi.int/EN\\_Menu/icc/situations%20and%20cases/situations/icc0112/pages/situation](http://www.icc-cpi.int/EN_Menu/icc/situations%20and%20cases/situations/icc0112/pages/situation)  
After conducting a preliminary examination of the situation, including an assessment of admissibility of potential cases, the Office of the Prosecutor determined that there was a reasonable basis to proceed with an investigation and on 16 January 2013, the investigation was opened, [http://www.icc-cpi.int/en\\_menus/icc/press%20and%20media/press%20releases/Pages/pr869.aspx](http://www.icc-cpi.int/en_menus/icc/press%20and%20media/press%20releases/Pages/pr869.aspx)

<sup>98</sup> Charges against four individuals (including Uhuru Kenyatt, the current President of Kenya) were confirmed, although charges against Francis Kirimi Muthaura were withdrawn; the trial of the remaining three persons is scheduled for late 2013, see [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/situation%20icc%20010](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/situation%20icc%20010)

<sup>99</sup> Côte d'Ivoire had accepted the jurisdiction of the ICC on 18 April 2003 (reconfirmed in 2010 and in 2011) even though it is not a party to the Rome Statute; more recently, and on both 14 December 2010 and 3 May 2011. Pre-Trial Chamber III granted the Prosecutor's request for authorisation to open investigations *proprio motu* into the situation in that country on 3 October 2011. Shortly thereafter, a warrant of arrest was issued against Laurent Gbagbo, who was transferred to the Court in November 2011. Proceedings are ongoing, [http://www.icc-cpi.int/en\\_menus/icc/situations%20and%20cases/situations/icc0211/related%20case](http://www.icc-cpi.int/en_menus/icc/situations%20and%20cases/situations/icc0211/related%20case)

<sup>100</sup> [http://www.icc-cpi.int/en\\_menus/icc/structure%20of%20the%20court/office%20of%20the%20prose](http://www.icc-cpi.int/en_menus/icc/structure%20of%20the%20court/office%20of%20the%20prose)  
Note the unsuccessful attempt by the Palestinian Authority to deposit an acceptance of the Court's jurisdiction concerning 'acts committed on the territory of Palestine since 1 July 2002', see [http://www.icc-cpi.int/en\\_menus/icc/structure%20of%20the%20court/office%20of%20the%20prose](http://www.icc-cpi.int/en_menus/icc/structure%20of%20the%20court/office%20of%20the%20prose) [cdnp/palestine/Pages/palestine.aspx](http://www.icc-cpi.int/en_menus/icc/structure%20of%20the%20court/office%20of%20the%20prose/cdnp/palestine/Pages/palestine.aspx) and see above, chapter 5, p. 172.

<sup>101</sup> See Security Council resolution 1422 (2002) calling for the ICC to defer any exercise of jurisdiction for twelve months if a case arises involving current or

former officials or personnel from a contributing state not a party to the Rome Statute over acts or omissions relating to a UN established or authorised operation. This was renewed for a further twelve months in resolution 1487 (2003), but not subsequently: see e.g. D. McGoldrick, 'Political and Legal Responses to the ICC' in McGoldrick *et al.* *The Permanent International Criminal Court*, p. 415. However, resolutions 1497 (2003) and 1593 (2005) provide that personnel from a state not a party to the Rome Statute will be subject to the exclusive jurisdiction of that state for all acts related to the multinational force or UN force in Liberia and Darfur respectively: see Cryer *et al.*, *Introduction to International Criminal Law*, pp. 142 ff.

**102** See e.g. Cryer *et al.*, *Introduction to International Criminal Law*, pp. 144–5; M. Benzing, 'US Bilateral Non-Surrender Agreements and Article 98 of the Statute of the International Criminal Court', 8 *Max Planck Yearbook of United Nations Law*, 2004, p. 182, and Schabas, *International Criminal Court*, pp. 1037 ff.

**103** Article 17. See also the *Thomas Lubanga Dyilo* case, ICC-01/04-01/06, Decision on the Prosecutor's Application for a Warrant of Arrest, 10 February 2006 and Schabas, *International Criminal Court*, p. 334 ff.

**104** In order to determine this, the Court must consider whether the proceedings were being undertaken or the decision made in order to shield the person concerned from criminal responsibility for crimes within the jurisdiction of the ICC; whether there has been an unjustified delay in the proceedings, and whether the proceedings have been conducted independently or impartially, article 17(2)a–c.

**105** In order to determine this, the Court must consider whether, due to a total or substantial collapse or unavailability of its national judicial system, the state is unable to obtain the accused or the necessary evidence and testimony or is otherwise unable to carry out its proceedings, article 17(3).

**106** Article 20(3)

**107** Article 34.

115 Article 53.

116 Article 39(2)(b)(ii).

117 Article 64.

118 Article 77.

119 Article 75(2).

120 Article 68.

121 Article 39(2)(b)(i).

122 Article 81. Either party may appeal against decisions as to, for example, jurisdiction or admissibility; decisions as to the grant or denial of the release of the person being investigated or prosecuted; and decisions of the Pre-Trial Chamber to act on its own initiative under article 56(3): see article 82.

123 Article 83. The revision of the sentence can be requested if new evidence has been discovered which was not available at the time of the trial and is sufficiently

important or decisive for the Appeals Chamber to revise or amend the sentence: see article 84.

<sup>124</sup> See e.g. S. Williams, *Hybrid and Internationalised Criminal Tribunals*, Oxford, 2013; *Internationalized Criminal Courts* (eds. C. P. R. Romano, A. Nollkaemper and J. K. Kleffner), Oxford, 2004; Cryer *et al.*, *Introduction to International Criminal Law*, chapter 9; Schabas, *The UN International Criminal Tribunals*; and L. A. Dickinson, 'The Promise of Hybrid Courts', 97 *AJIL*, 2003, p. 295.

<sup>125</sup> See for this terminology, M. P. Scharf, 'The Iraqi High Tribunal', 5 *Journal of International Criminal Justice*, 2007, pp. 258, 259.

<sup>126</sup> Article 1 of the Agreement contained in S/2002/246, Appendix II, and articles 1 and 6 of the Statute of the Special Court, contained in S/2002/246, Appendix III, and see Security Council resolution 1436 (2002) affirming 'strong support' for the Court, and the Report on the Special Court by Professor A. Cassese, the independent expert commissioned by the UN Secretary-General to review the work of the Special Court, December 2006, <http://www.sc-sl.org/DOCUMENTS/tabid/176/Default.aspx>. See also R. Cryer, 'A "Special Court" for Sierra Leone', 50 *ICLQ*, 2001, p. 435; Schabas, *The UN International Criminal Tribunals*; A. Smith, 'Sierra Leone: The Intersection of Law, Policy and Practice', P. Mochochoko and G. Tortora, 'The Management Committee for the Special Court for Sierra Leone', and W. A. Schabas, 'Internationalized Courts and their Relationship with Alternative Accountability Mechanisms', in Romano *et al.*, *Internationalized Criminal Courts*, at pp. 125, 141 and 157 respectively, and C. da Silva, 'The Hybrid Experience of the Special Court for Sierra Leone' in Brown, *Research Handbook on International Criminal Law*, p. 232.

<sup>127</sup> Article 1(2) of the Statute of the Special Court for Sierra Leone.

<sup>128</sup> Note that with the conclusion of the Charles Taylor trial, the functions of Trial Chamber II came to an end, see Ninth Annual Report of the Special Court for Sierra Leone, 2011–12.

<sup>129</sup> Article 12(1). Eight judges were appointed in July 2002: see UN Press Release SG/A/813. There are currently eleven judges and one alternate judge, see [www.sc-sl.org/PRESSROOM/PhotoLibrary/Judges/tabid/129/Default.aspx](http://www.sc-sl.org/PRESSROOM/PhotoLibrary/Judges/tabid/129/Default.aspx)

**130** Article 20. Under article 21, the convicted person or the Prosecutor may apply to the Appeals Chamber for review where a new fact has been discovered which was not known at the time of the proceedings before the Trial Chamber or Appeals Chamber and which could have been a decisive factor in reaching the decision. The Appeals Chamber may reject the application, reconvene the Trial Chamber or retain jurisdiction over the matter.

**131** Article 15.

**132** Article 16.

**133** Articles 2–4 of the Statute.

**134** Article 5 of the Statute. These crimes relate to offences relating to the abuse of girls under the Prevention of Cruelty to Children Act 1926 and offences relating to the wanton destruction of property under the Malicious Damages Act 1861. However, the Special Court has no jurisdiction with regard to any person under the age of fifteen at the time of the alleged commission of the crime. No person may be tried before a national court of Sierra Leone for acts for which he or she has already been tried by the Special Court. But a person who has been tried by a national court for the acts referred to in articles 2 to 4 of the Statute may be subsequently tried by the Special Court if either the act for which he or she was tried was characterised as an ordinary crime; or the national court proceedings were not impartial or independent, or were designed to shield the accused from international criminal responsibility or the case was not diligently prosecuted: see article 9.

142 Article 3 of the Agreement. The Secretary-General nominated seven judges in March 2006 and the Supreme Council of Magistracy approved a list of thirty Cambodian and international judges in May that year to be followed by appointment by Royal Decree. The judges were duly sworn in in July 2006 and Internal Rules were adopted in June 2007 and revised in February 2008.

143 Article 5.

144 Article 6. In the case of both the co-investigating judges and co-prosecutors, the UN Secretary-General was to make two nominations out of which the Supreme

Council of Magistracy was to choose one international investigating judge and one international prosecutor. Any differences between the two co-investigating judges and the two co-prosecutors are to be settled by a Pre-Trial Chamber of five judges, three appointed by the Supreme Council of the Magistracy, with one as President, and two appointed by the Supreme Council of the Magistracy upon nomination by the Secretary-General: see article 7.

239 See also the General Treaty for the Renunciation of War (the ‘Kellogg–Briand Pact’), 1928, which condemned recourse to war as an instrument of international policy; article 1 of the International Law Commission’s Draft Code of Offences against Peace and Security, 1954, and article 1(2) of the revised Draft Code adopted in 1996. Article 16 of the latter instrument provides that a leader who as leader or organiser actively participates in or orders the planning, preparation, initiation or waging of aggression committed by a state shall be responsible for a crime of aggression.

240 See e.g. Cryer *et al.*, *Introduction to International Criminal Law*, pp. 276 ff. See also A. Carpenter, ‘The International Criminal Court and the Crime of Aggression’, 64 *Nordic Journal of International Law*, 1995, p. 223; A. Zimmermann, ‘The Creation of a Permanent International Criminal Court’, 25 *Suffolk Transnational Law Review*, 2005, p. 1, and C. Kress, ‘Versailles–Nuremberg–The Hague: Germany and the International Criminal Law’, 40 *International Lawyer*, 2006, p. 15.

241 This states that: ‘1. For the purpose of this Statute, “crime of aggression” means the planning, preparation, initiation or execution, by a person in a position effectively to exercise control over or to direct the political or military action of a State, of an act of aggression which, by its character, gravity and scale, constitutes a manifest violation of the Charter of the United Nations. 2. For the purpose of paragraph 1, “act of aggression” means the use of armed force by a State against the sovereignty, territorial integrity or political independence of another State, or in any other manner inconsistent with the Charter of the United Nations. Any of the following acts, regardless of a declaration of war, shall, in accordance with United Nations General Assembly resolution 3314 (XXIX) of 14 December 1974, qualify as an act of aggression:

- (a) The invasion or attack by the armed forces of a State of the territory of another State, or any military occupation, however temporary, resulting from such invasion or attack, or any annexation by the use of force of the territory of another State or part thereof;
- (b) Bombardment by the armed forces of a State against the territory of another State or the use of any weapons by a State against the territory of another State;
- (c) The blockade of the ports or coasts of a State by the armed forces of another

- State;
- (d) An attack by the armed forces of a State on the land, sea or air forces, or marine and air fleets of another State;
  - (e) The use of armed forces of one State which are within the territory of another State with the agreement of the receiving State, in contravention of the conditions provided for in the agreement or any extension of their presence in such territory beyond the termination of the agreement;
  - (f) The action of a State in allowing its territory, which it has placed at the disposal of another State, to be used by that other State for perpetrating an act of aggression against a third State;
  - (g) The sending by or on behalf of a State of armed bands, groups, irregulars or mercenaries, which carry out acts of armed force against another State of such gravity as to amount to the acts listed above, or its substantial involvement therein.'

See Resolution 6, [www.icc-cpi.int/en\\_menus/asp/crime%20of%20aggression/Pages/default.aspx](http://www.icc-cpi.int/en_menus/asp/crime%20of%20aggression/Pages/default.aspx). As of the date of writing, thirteen states have ratified the amendments, the resolution requires at least thirty acceptances or ratifications to come into force.

<sup>242</sup> See article 15 *bis* and *ter*, [http://www.icc-cpi.int/en\\_menus/asp/crime%20of%20aggression/Pages/default.aspx](http://www.icc-cpi.int/en_menus/asp/crime%20of%20aggression/Pages/default.aspx). In order for this special jurisdictional regime to come into force, not only would at least 30 acceptances or ratifications of the amendments be required, but also a decision must be taken by two-thirds of the States Parties to activate the jurisdiction at any time after 1 January 2017.

<sup>243</sup> Note among other relevant issues, the principle of command responsibility, whereby a superior is criminally responsible for acts committed by subordinates that he knew or had reason to know had been or were about to be committed and no action was taken: see e.g. Green, *Armed Conflict*, pp. 303–4; I. Bantekas, 'The Contemporary Law of Superior Responsibility', 93 *AJIL*, 1999, p. 573, and Kittichaisaree, *International Criminal Law*, p. 251. See also article 87 of Additional Protocol I, 1977; article 7(3) of the Statute of the International Criminal Tribunal for the Former Yugoslavia, 1993; article 6(3) of the Statute of the International Criminal Tribunal for Rwanda, 1994 and article 28 of the Statute of the International Criminal Court, 1998. Note the *Čelebići* case, IT-96-21, 16 November 1998, paras. 370 ff.; the *Krnjela* case, IT-97-25-A, 17 September 2003 and the *Blagojević* case,

IT-02-60-A, 2007. Further, military necessity may not be pleaded as a defence, see e.g. *In re Lewinski (called von Manstein)*, 16 AD, p. 509, and the claim of superior orders will not provide a defence, although it may be taken in mitigation depending upon the circumstances: see e.g. Green, *Armed Conflict*, pp. 305–7; Green, *Superior Orders in National and International Law*, Leiden, 1976; Kittichaisaree, *International Criminal Law*, p. 266, and Y. Dinstein, *The Defence of ‘Obedience to Superior Orders’ in International Law*, Leiden, 1965. See also article 8 of the Nuremberg Charter, 39 AJIL, 1945, Supp., p. 259; Principle IV of the International Law Commission’s Report on the Principles of the Nuremberg Tribunal 1950, *Yearbook of the ILC*, 1950, vol. II, p. 195; article 7(4) of the Statute of the International Criminal Tribunal for the Former Yugoslavia, 1993; article 6(4) of the Statute of the International Criminal Tribunal for Rwanda, 1994 and article 33 of the Statute of the International Criminal Court, 1998.

## 9 Recognition

---

International society is not an unchanging entity, but is subject to the ebb and flow of political life.<sup>1</sup> New states are created and old units fall away. New governments come into being within states in a manner contrary to declared constitutions whether or not accompanied by force. Insurgencies occur and belligerent administrations are established in areas of territory hitherto controlled by the legitimate government. Each of these events creates new facts and the question that recognition is concerned with revolves around the extent to which legal effects should flow from such occurrences. Each state will have to decide whether or not to recognise the particular eventuality and the kind of legal entity it should be accepted as.

Recognition involves consequences both on the international plane and within municipal law. If an entity is recognised as a state in, for example, the United Kingdom, it will entail the consideration of rights and duties that would not otherwise be relevant. There are privileges permitted to a foreign state before the municipal courts that would not be allowed to other institutions or persons.

It is stating the obvious to point to the very strong political influences that bear upon this topic.<sup>2</sup> In more cases than not the decision whether or not to recognise will depend more upon political considerations than exclusively legal factors. Recognition is not merely applying the relevant legal consequences to a factual situation, for sometimes a state will not want such consequences to follow, either internationally or domestically.

To give one example, the United States refused for many years to recognise either the People's Republic of China or North Korea, not because it did not accept the obvious fact that these authorities exercised effective control over their respective territories, but rather because it did not wish the legal effects of recognition to come into operation.<sup>3</sup> It is purely a political judgment, although it has been clothed in legal terminology. In addition, there are a variety of options open as to what an entity may be recognised as. Such an entity may, for example, be recognised as a full sovereign state, or as the effective authority within a specific area or as a subordinate authority to another state.<sup>4</sup> It is a matter of fact in all cases what precisely is being sought and granted and recognition may in certain circumstances constitute a significant political gesture without any legal consequences being intended, such as recognition as 'representative of the people'. More usually, recognition is a statement by an international legal person as to the status in international law of another real or alleged international legal person or of the validity of a particular factual situation. Once recognition has occurred, the new situation is deemed opposable to the recognising state, that is the pertinent legal

consequences will flow. As such, recognition constitutes participation in the international legal process generally while also being important within the context of bilateral relations and, of course, domestically.

## **Recognition of states**

There are basically two theories as to the nature of recognition. The constitutive theory maintains that it is the act of recognition by other states that creates a new state and endows it with legal personality and not the process by which it actually obtained independence. Thus, new states are established in the international community as fully fledged subjects of international law by virtue of the will and consent of already existing states.<sup>5</sup> The disadvantage of this approach is that an unrecognised 'state' may not be subject to the obligations imposed by international law and may accordingly be free from such restraints as, for instance, the prohibition on aggression. A further complication would arise if a 'state' were recognised by some but not other states. Could one talk then of, for example, partial personality?

The second theory, the declaratory theory, adopts the opposite approach and is a little more in accord with practical realities.<sup>6</sup> It maintains that recognition is merely an acceptance by states of an already existing situation. A new state will acquire capacity in international law not by virtue of the consent of others but by virtue of a particular factual situation. It will be legally constituted by its own efforts and circumstances and will not have to await the procedure of recognition by other states. This doctrine owes a lot to traditional positivist thought on the supremacy of the state and the concomitant weakness or non-existence of any central guidance in the international community.

For the constitutive theorist, the heart of the matter is that fundamentally an unrecognised 'state' can have no rights or obligations in international law. The opposite stance is adopted by the declaratory approach that emphasises the factual situation and minimises the power of states to confer legal personality.

Actual practice leads to a middle position between these two perceptions. The act of recognition by one state of another indicates that the former regards the latter as having conformed with the basic requirements of international law as to the creation of a state. Of course, recognition is highly political and is given in a number of cases for purely political reasons. This point of view was emphasised by the American representative on the Security Council during discussions on the Middle East in May 1948. He said that it would be:

highly improper for one to admit that any country on earth can question the sovereignty of the United States of America in the exercise of the high political

act of recognition of the *de facto* status of a state.

Indeed, he added that there was no authority that could determine the legality or validity of that act of the United States.<sup>7</sup> This American view that recognition is to be used as a kind of mark of approval was in evidence with regard to the attitude adopted towards Communist China for a generation.<sup>8</sup>

The United Kingdom, on the other hand, has often tended to extend recognition once it is satisfied that the authorities of the state in question have complied with the minimum requirements of international law, and have effective control which seems likely to continue over the country.<sup>9</sup> Recognition is constitutive in a political sense, for it marks the new entity out as a state within the international community and is evidence of acceptance of its new political status by the society of nations. This does not imply that the act of recognition is legally constitutive, because rights and duties do not arise as a result of the recognition.

Practice over the last century or so is not unambiguous but does point to the declaratory approach as the better of the two theories. States which for particular reasons have refused to recognise other states, such as in the Arab world and Israel and the USA and certain communist nations,<sup>10</sup> rarely contend that the other party is devoid of powers and obligations before international law and exists in a legal vacuum. The stance is rather that rights and duties are binding upon them, and that recognition has not been accorded for primarily political reasons. If the constitutive theory were accepted it would mean, for example, in the context of the former Arab non-recognition of Israel, that the latter was not bound by international law rules of non-aggression and non-intervention. This has not been adopted in any of the stances of non-recognition of 'states'.<sup>11</sup>

Of course, if an entity, while meeting the conditions of international law as to statehood, went totally unrecognised, this would undoubtedly hamper the exercise of its rights and duties, especially in view of the absence of diplomatic relations, but it would not seem in law to amount to a decisive argument against statehood itself.<sup>12</sup> For example, the Charter of the Organization of American States adopted at Bogotá in 1948 notes in its survey of the fundamental rights and duties of states that:

the political existence of the state is independent of recognition by other states. Even before being recognised the state has the right to defend its integrity and independence.<sup>13</sup>

And the Institut de Droit International emphasised in its resolution on recognition of new states and governments in 1936 that the

existence of the new state with all the legal effects connected with that existence is not affected by the refusal of one or more states to recognise.<sup>14</sup>

In the period following the end of the First World War, the courts of the new states of Eastern and Central Europe regarded their states as coming into being upon the actual declaration of independence and not simply as a result of the Peace Treaties. The tribunal in one case pointed out that the recognition of Poland in the Treaty of Versailles was only declaratory of the state which existed 'par lui-même'.<sup>15</sup> In addition, the Arbitration Commission established by the International Conference on Yugoslavia in 1991 stated in its Opinion No. 1 that 'the existence or disappearance of the state is a question of fact' and that 'the effects of recognition by other states are purely declaratory'.<sup>16</sup>

On the other hand, the constitutive theory is not totally devoid of all support in state practice. In some cases, the creation of a new state, or the establishment of a new government by unconstitutional means, or the occupation of a territory that is legally claimed will proceed uneventfully and be clearly accomplished for all to see and with little significant opposition. However, in many instances, the new entity or government will be insecure and it is in this context that recognition plays a vital role. In any event, and particularly where the facts are unclear and open to different interpretations, recognition by a state will amount to a declaration by that state of how it understands the situation, and such an evaluation will be binding upon it. It will not be able to deny later the factual position it has recognised, unless, of course, circumstances radically alter in the meantime. In this sense, recognition can be constitutive. Indeed, the Yugoslav Arbitration Commission noted in Opinion No. 8 that 'while recognition of a state by other states has only declarative value, such recognition, along with membership of international organisations, bears witness to these states' conviction that the political entity so recognised is a reality and confers on it certain rights and obligations under international law'.<sup>17</sup> By way of contrast, the fact of non-recognition of a 'new state' by a vast majority of existing states will constitute tangible evidence for the view that such an entity has not established its conformity with the required criteria of statehood.<sup>18</sup>

Another factor which leans towards the constitutive interpretation of recognition is the practice in many states whereby an unrecognised state or government cannot claim the rights available to a recognised state or government before the municipal courts. This means that the act of recognition itself entails a distinct legal effect and that after recognition a state or government would have enforceable rights within the domestic jurisdiction that it would not have had prior to the recognition.<sup>19</sup>

This theoretical controversy is of value in that it reveals the functions of

recognition and emphasises the impact of states upon the development of international law. It points to the essential character of international law, poised as it is between the state and the international community. The declaratory theory veers towards the former and the constitutive doctrine towards the latter.

There have been a number of attempts to adapt the constitutive theory.<sup>20</sup> Lauterpacht maintained, for example, that once the conditions prescribed by international law for statehood have been complied with, there is a duty on the part of existing states to grant recognition. This is because, in the absence of a central authority in international law to assess and accord legal personality, it is the states that have to perform this function on behalf, as it were, of the international community and international law.<sup>21</sup>

This operation is both declaratory, in that it is based upon certain definite facts (i.e. the entity fulfils the requirements of statehood) and constitutive in that it is the acceptance by the recognising state of the particular community as an entity possessing all the rights and obligations that are inherent in statehood. Before the act of recognition, the community that is hoping to be admitted as a state will only have such rights and duties as have been expressly permitted to it, if any.

The Lauterpacht doctrine is an ingenious bid to reconcile the legal elements in a coherent theory. It accepts the realities of new creations of states and governments by practical (and occasionally illegal) means, and attempts to assimilate this to the supremacy of international law as Lauterpacht saw it. However, in so doing it ignores the political aspects and functions of recognition, that is, its use as a method of demonstrating or withholding support from a particular government or new community. The reality is that in many cases recognition is applied to demonstrate political approval or disapproval. Indeed, if there is a duty to grant recognition, would the entity involved have a right to demand this where a particular state (or states) is proving recalcitrant? If this were so, one would appear to be faced with the possibility of a non-state with as yet no rights or duties enforcing rights against non-recognising states.

Nevertheless, state practice reveals that Lauterpacht's theory has not been adopted.<sup>22</sup> The fact is that few states accept that they are obliged in every instance to accord recognition. In most cases they will grant recognition, but that does not mean that they have to, as history with regard to some Communist nations and with respect to Israel illustrates. This position was supported in Opinion No. 10 of the Yugoslav Arbitration Commission in July 1992, which emphasised that recognition was 'a discretionary act that other states may perform when they choose and in a manner of their own choosing, subject only to compliance with the imperatives of general international law'.<sup>23</sup>

The approach of the United States was emphasised in 1976. The Department of State noted that:

[i]n the view of the United States, international law does not require a state to recognise another entity as a state; it is a matter for the judgment of each state whether an entity merits recognition as a state. In reaching this judgment, the United States has traditionally looked to the establishment of certain facts. These facts include effective control over a clearly defined territory and population; an organised governmental administration of that territory and a capacity to act effectively to conduct foreign relations and to fulfil international obligations. The United States has also taken into account whether the entity in question has attracted the recognition of the international community of states.<sup>24</sup>

The view of the UK government was expressed as follows:

The normal criteria which the government apply for recognition as a state are that it should have, and seem likely to continue to have, a clearly defined territory with a population, a government who are able of themselves to exercise effective control of that territory, and independence in their external relations. Other factors, including some United Nations resolutions, may also be relevant.<sup>25</sup>

Recent practice suggests that ‘other factors’ may, in the light of the particular circumstances, include human rights and other matters. The European Community adopted a Declaration on 16 December 1991 entitled ‘Guidelines on the Recognition of New States in Eastern Europe and in the Soviet Union’ in which a common position on the process of recognition of the new states was adopted. It was noted in particular that recognition required:

- respect for the provisions of the Charter of the United Nations and the commitments subscribed to in the Final Act of Helsinki and in the Charter of Paris,<sup>26</sup> especially with regard to the rule of law, democracy and human rights;
- guarantees for the rights of ethnic and national groups and minorities in accordance with the commitments subscribed to in the framework of the CSCE;<sup>27</sup>
- respect for the inviolability of all frontiers which can only be changed by peaceful means and by common agreement;
- acceptance of all relevant commitments with regard to disarmament and

- nuclear non-proliferation as well as to security and regional stability;
- commitment to settle by agreement, including where appropriate by recourse to arbitration, all questions concerning state succession and regional disputes.<sup>28</sup>

On the same day that the Guidelines were adopted, the European Community also adopted a Declaration on Yugoslavia,<sup>29</sup> in which the Community and its member states agreed to recognise the Yugoslav republics fulfilling certain conditions. These were that such republics wished to be recognised as independent; that the commitments in the Guidelines were accepted; that provisions laid down in a draft convention under consideration by the Conference on Yugoslavia were accepted, particularly those dealing with human rights and the rights of national or ethnic groups; and that support would be given to the efforts of the Secretary-General of the UN and the Security Council and the Conference on Yugoslavia. The Community and its member states also required that the particular Yugoslav republic seeking recognition would commit itself prior to recognition to adopting constitutional and political guarantees ensuring that it had no territorial claims towards a neighbouring Community state. The United States took a rather less robust position, but still noted the relevance of commitments and assurances given by the new states of Eastern Europe and the former USSR with regard to nuclear safety, democracy and free markets within the process of both recognition and the establishment of diplomatic relations.<sup>30</sup>

Following a period of UN administration authorised by Security Council resolution 1244 (1999),<sup>31</sup> the Yugoslav (later Serbian) province of Kosovo declared independence on 17 February 2008. This was preceded by the Comprehensive Proposal for the Kosovo Status Settlement formulated by Martti Ahtisaari which had in March 2007 called for independence for Kosovo with international supervision.<sup>32</sup> This was rejected by Serbia. The international community was divided as to the question of recognition of Kosovo's independence. It was recognised swiftly by the US, the UK, Germany and the majority of EU states, Japan and others. Russia and Serbia, on the other hand, made it clear that they opposed recognition, as did Spain and Greece. Accordingly, in the current circumstances, while many countries recognise Kosovo, many do not and entry into the UN is not possible until, for example, Russia is prepared to lift its opposition in view of its veto power.<sup>33</sup> For those states that have recognised Kosovo, the latter will be entitled to all the privileges and responsibilities of statehood in the international community and within the legal systems of the recognising states. However, for those that have not, the state and diplomatic agents of Kosovo will not be entitled to, for example, diplomatic and state immunities, while the international status of Kosovo will be

controversial and disputed. While recognition may cure difficulties in complying with the criteria of statehood, a situation where the international community is divided upon recognition will, especially in the absence of UN membership, ensure the continuation of uncertainty.

There are many different ways in which recognition can occur and it may apply in more than one kind of situation. It is not a single, constant idea but a category comprising a number of factors. There are indeed different entities which may be recognised, ranging from new states, to new governments, belligerent rights possessed by a particular group and territorial changes. Not only are there various objects of the process of recognition, but recognition may itself be *de facto* or *de jure* and it may arise in a variety of manners.

Recognition is an active process and should be distinguished from cognition, or the mere possession of knowledge, for example, that the entity involved complies with the basic international legal stipulations as to statehood. Recognition implies both cognition of the necessary facts and an intention that, so far as the acting state is concerned, it is willing that the legal consequences attendant upon recognition should operate. For example, the rules as to diplomatic and sovereign immunities should apply as far as the envoys of the entity to be recognised are concerned. It is not enough for the recognising state simply to be aware of the facts, it must desire the coming into effect of the legal and political results of recognition. This is inevitable by virtue of the discretionary nature of the act of recognition, and is illustrated in practice by the lapse in time that often takes place between the events establishing a new state or government and the actual recognition by other states. Once given, courts have generally regarded recognition as retroactive so that the statehood of the entity recognised is accepted as of the date of statehood (which is a question of fact), not from the date of recognition.<sup>34</sup>

## **Recognition of governments<sup>35</sup>**

The recognition of a new government is quite different from the recognition of a new state. As far as statehood is concerned, the factual situation will be examined in terms of the accepted criteria.<sup>36</sup> Different considerations apply where it is the government which changes. Recognition will only really be relevant where the change in government is unconstitutional. In addition, recognition of governments as a category tends to minimise the fact that the precise capacity or status of the entity so recognised may be characterised in different ways. Recognition may be of a *de facto*<sup>37</sup> government or administration or of a government or administration in effective control of only part of the territory of the state in question. Recognition constitutes acceptance of a particular situation by the recognising state both in terms

of the relevant factual criteria and in terms of the consequential legal repercussions, so that, for example, recognition of an entity as the government of a state implies not only that this government is deemed to have satisfied the required conditions, but also that the recognising state will deal with the government as the governing authority of the state and accept the usual legal consequences of such status in terms of privileges and immunities within the domestic legal order.

Political considerations have usually played a large role in the decision whether or not to grant recognition. However, certain criteria have emerged to cover recognition of illegal changes in government. Such criteria amounted to an acceptance of the realities of the transfer of power and suggested that once a new government effectively controlled the country and that this seemed likely to continue, recognition should not be withheld. The United Kingdom on a number of occasions adopted this approach.<sup>38</sup> It was declared by the Under-Secretary of State for Foreign Affairs in 1970 that the test employed was whether or not the new government enjoyed, 'with a reasonable prospect of permanence, the obedience of the mass of the population... effective control of much of the greater part of the territory of the state concerned'.<sup>39</sup>

It is this attitude which prompted such policies as the recognition of the communist government of China and the Russian-installed government of Hungary in 1956 after the failure of the uprising. However, this general approach cannot be regarded as an absolute principle in view of the British refusal over many *years* to recognise as states North Vietnam, North Korea and the German Democratic Republic.<sup>40</sup> The effective control of a new government over the territory of the state is thus an important guideline to the problem of whether to extend recognition or not, providing such control appears well established and likely to continue. But it was no more than that and in many cases appeared to yield to political considerations.

The *Tinoco* arbitration<sup>41</sup> constitutes an interesting example of the 'effective control' concept. In 1919, the government of Tinoco in Costa Rica was overthrown and the new authorities repudiated certain obligations entered into by Tinoco with regard to British nationals. Chief Justice Taft, the sole arbitrator, referred to the problems of recognition or non-recognition as relating to the Tinoco administration. He decided that since the administration was in effective control of the country, it was the valid government irrespective of the fact that a number of states, including the United Kingdom, had not recognised it. This was so despite his opinion that:

the non-recognition by other nations of a government claiming to be a national personality, is usually appropriate evidence that it has not attained the independence and control entitling it by international law to be classed as

such.<sup>42</sup>

Where recognition has been refused because of the illegitimacy or irregularity of origin of the government in question, rather than because of the lack of effectiveness of its control in the country, such non-recognition loses some of its evidential weight. In other words, where the degree of authority asserted by the new administration is uncertain, recognition by other states will be a vital factor. But where the new government is firmly established, non-recognition will not affect the legal character of the new government. The doctrine of effective control is an indication of the importance of the factual nature of any situation. But in those cases where recognition is refused upon the basis of the improper origins of the new government, it will have less of an impact than if recognition is refused because of the absence of effective control. Taft's view of the nature of recognition is an interesting amalgam of the declaratory and constitutive theories, in that recognition can become constitutive where the factual conditions (i.e. the presence or absence of effective control) are in dispute, but otherwise is purely declaratory or evidential.

A change in government, however accomplished, does not affect the identity of the state itself. The state does not cease to be an international legal person because its government is overthrown. That is not at issue. The recognition or non-recognition of a new administration is irrelevant to the legal character of the country. Accordingly one can see that two separate recognitions are involved and they must not be confused. Recognition of a state will affect its legal personality, whether by creating or acknowledging it, while recognition of a government affects the status of the administrative authority, not the state.

It is possible, however, for recognition of state and government to occur together in certain circumstances. This can take place upon the creation of a new state. Israel, to take one example, was recognised by the United States and the United Kingdom by the expedient of having its government recognised *de facto*.<sup>43</sup> Recognition of the government implies recognition of the state, but it does not work the other way.

It should be noted that recognition of a government has no relevance to the establishment of new persons in international law. Where it is significant is in the realm of diplomatic relations. If a government is unrecognised, there is no exchange of diplomatic envoys and thus problems can arise as to the enforcement of international rights and obligations.

Although the effective control doctrine is probably accepted as the most reliable guide to recognition of governments, there have been other theories put forward, the most prominent amongst them being the Tobar doctrine or the so-called doctrine of legitimacy. This suggested that governments which came into power by extra-

constitutional means should not be recognised, at least until the change had been accepted by the people.<sup>44</sup> This policy was applied particularly by the United States in relation to Central America and was designed to protect stability in that delicate area adjacent to the Panama Canal. Logically, of course, the concept amounts to the promotion of non-recognition in all revolutionary situations and it is, and was, difficult to reconcile with reality and political consideration. In American eyes it became transmuted into the Wilson policy of democratic legitimacy. Where the revolution was supported by the people, it would be recognised. Where it was not, there would be no grant of recognition. It was elaborated with respect to the Soviet Union until 1933, but gradually declined until it can now be properly accepted merely as a political qualification for recognition to be considered by the recognising state.<sup>45</sup>

A doctrine advocating the exact opposite, the automatic recognition of governments in all circumstances, was put forward by Estrada, the Mexican Secretary of Foreign Relations.<sup>46</sup> But this suffers from the same disadvantage as the legitimacy doctrine. It attempts to lay down a clear test for recognition in all instances excluding political considerations and exigencies of state and is thus unrealistic, particularly where there are competing governments.<sup>47</sup> It has also been criticised as minimising the distinction between recognition and maintenance of diplomatic relations.<sup>48</sup>

The problem, of course, was that recognition of a new government that has come to power in a non-constitutional fashion was taken to imply approval. Allied with the other factors sometimes taken into account in such recognition situations,<sup>49</sup> an unnecessarily complicated process had resulted. Accordingly, in 1977 the United States declared that:

US practice has been to de-emphasise and avoid the use of recognition in cases of changes of governments and to concern ourselves with the question of whether we wish to have diplomatic relations with the new governments...The Administration's policy is that establishment of relations does not involve approval or disapproval but merely demonstrates a willingness on our part to conduct our affairs with other governments directly.<sup>50</sup>

In 1980, the UK government announced that it would no longer accord recognition to governments as distinct from states.<sup>51</sup> This was stated to be primarily due to the perception that recognition meant approval, a perception that was often embarrassing, for example, in the case of regimes violating human rights. There were, therefore, practical advantages in not according recognition as such to governments. This change to a policy of not formally recognising governments had

in fact taken place in certain civil law countries rather earlier. Belgium<sup>52</sup> and France<sup>53</sup> appear, for example, to have adopted this approach in 1965. By the late 1980s, this approach was also adopted by both Australia<sup>54</sup> and Canada,<sup>55</sup> and indeed by other countries.<sup>56</sup>

The change, however, did not remove all problems, but rather shifted the focus from formal recognition to informal ‘dealings’. The UK announced that it would continue to decide the nature of dealings with unconstitutional regimes:

in the light of [an] assessment of whether they are able of themselves to exercise effective control of the territory of the state concerned, and seem likely to continue to do so.<sup>57</sup>

The change, therefore, is that recognition of governments is abolished but that the criterion for dealing with such regimes is essentially the same as the former test for the recognition of governments.<sup>58</sup> In that context, regard should also be had to the phrase ‘of themselves’.<sup>59</sup>

However, this change of policy should not be taken as meaning that no significant comments as to a change of government would be made in controversial circumstances and it did not, apparently, preclude the exceptional recognition of governments as such. For example, following the elections in the Côte d’Ivoire in November 2010 and the acceptance by ECOWAS and the African Union of the election of Mr Ouattara (and the hostility of the sitting president), the UK recognised Mr Ouattara as the democratically elected president of the country.<sup>60</sup> Further, the UK decided on 27 July 2011 to recognise and deal with the Libyan National Transitional Council, which was engaged in an armed conflict with the Gaddafi government in that country, ‘as the sole governmental authority in Libya’.<sup>61</sup> This recognition of the Council as the government of Libya was affirmed in an executive certificate dated 24 August 2011 in *British Arab Commercial Bank v. The National Transitional Council of the State of Libya*.<sup>62</sup>

## ***De facto* and *de jure* recognition**<sup>63</sup>

In addition to the fact that there are different entities to be recognised, recognition itself may take different forms. It may be either *de facto* or *de jure*. A more correct way of putting this might be to say that a government (or other entity or situation) may be recognised *de facto* or *de jure*.

Recognition *de facto* implies that there is some doubt as to the long-term viability of the government in question. Recognition *de jure* usually follows where the

recognising state accepts that the effective control displayed by the government is permanent and firmly rooted and that there are no legal reasons detracting from this, such as constitutional subservience to a foreign power. *De facto* recognition involves a hesitant assessment of the situation, an attitude of wait and see, to be succeeded by *de jure* recognition when the doubts are sufficiently overcome to extend formal acceptance. To take one instance, the United Kingdom recognised the Soviet government *de facto* in 1921 and *de jure* in 1924.<sup>64</sup> A slightly different approach is adopted in cases of civil war where the distinction between *de jure* and *de facto* recognition is sometimes used to illustrate the variance between legal and factual sovereignty. For example, during the 1936–9 Spanish Civil War, the United Kingdom, while recognising the Republican government as the *de jure* government, extended *de facto* recognition to the forces under General Franco as they gradually took over the country. Similarly, the government of the Italian conquering forces in Ethiopia was recognised *de facto* by the UK in 1936, and *de jure* two years later.<sup>65</sup>

By this method a recognising state could act in accordance with political reality and its own interests while reserving judgment on the permanence of the change in government or its desirability or legality. It is able to safeguard the affairs of its citizens and institutions by this, because certain legal consequences will flow in municipal law from the recognition.<sup>66</sup>

There are in reality few meaningful distinctions between a *de facto* and a *de jure* recognition, although only a government recognised *de jure* may enter a claim to property located in the recognising state.<sup>67</sup> Additionally, it is generally accepted that *de facto* recognition does not of itself include the exchange of diplomatic relations.

## **Premature recognition<sup>68</sup>**

There is often a difficult and unclear dividing line between the acceptable recognition of a new state, particularly one that has emerged or is emerging as a result of secession, and intervention in the domestic affairs of another state by way of premature or precipitate recognition, such as, for example, the view taken by the Nigerian federal government with respect to the recognition of 'Biafra' by five states.<sup>69</sup> In each case, the state seeking to recognise will need to consider carefully the factual situation and the degree to which the criteria of statehood (or other relevant criteria with regard to other types of entity with regard to which recognition is sought) have been fulfilled. It is therefore a process founded upon a perception of fact. In the case of Croatia, it could be argued that the recognition of that state by the European Community and its member states (together with Austria and Switzerland) on 15 January 1992 was premature.<sup>70</sup> Croatia at that time, and for several years thereafter, did not effectively control some one-third of its territory. In addition, the

Yugoslav Arbitration Commission had taken the view in Opinion No. 5 on 11 January 1992 that Croatia did not meet fully the conditions for recognition laid down in the European Community Guidelines of 16 December 1991,<sup>71</sup> since the Constitutional Act adopted by Croatia did not fully incorporate the required guarantees relating to human rights and minority rights.<sup>72</sup> It could also be argued that the recognition of Bosnia-Herzegovina on 6 April 1992 by the European Community and member states and on 7 April 1992 by the USA was premature, particularly since the government of that state effectively controlled less than one-half of its territory, a situation that continued until the Dayton Peace Agreement of November 1995.<sup>73</sup> On the other hand, it could be argued that in the special circumstances of Former Yugoslavia, the international community (particularly by means of membership of the UN which is restricted to states) was prepared to accept a loosening of the traditional criteria of statehood, so that essentially international recognition compensated for lack of effectivity.

Recognition may also be overdue, in the sense that it occurs long after it is clear as a matter of fact that the criteria of statehood have been satisfied, but in such cases, different considerations apply since recognition is not compulsory and remains a political decision by states.<sup>74</sup>

## **Implied recognition<sup>75</sup>**

Recognition itself need not be express, that is in the form of an open, unambiguous and formal communication, but may be implied in certain circumstances.<sup>76</sup> This is due to the fact that recognition is founded upon the will and intent of the state that is extending the recognition. Accordingly, there are conditions in which it might be possible to declare that in acting in a certain manner, one state has by implication recognised another state or government. Because this facility of indirect or implied recognition is available, states may make an express declaration to the effect that a particular action involving another party is by no means to be interpreted as comprehending any recognition. This attitude was maintained by Arab countries with regard to Israel, and in certain other cases.<sup>77</sup> It automatically excludes any possibility of implied recognition but does suggest that without a definite and clear waiver, the result of some international actions may be recognition of a hitherto unrecognised entity in certain circumstances.

The point can best be explained by mentioning the kind of conditions which may give rise to the possibility of a recognition where no express or formal statement has been made. A message of congratulations to a new state upon attaining sovereignty will imply recognition of that state, as will the formal establishment of diplomatic

relations,<sup>78</sup> but the maintenance of informal and unofficial contacts (such as those between the United States and Communist China during the 1960s and early 1970s in Warsaw) will not.<sup>79</sup> The issuing of a consular *exequatur*, the accepted authorisation permitting the performance of consular functions, to a representative of an unrecognised state will usually amount to a recognition of that state, though not in all cases.<sup>80</sup> A British Consul has operated in Taiwan, but the UK does not recognise the Taiwan government.<sup>81</sup> It is possible that the conclusion of a bilateral treaty between the recognising and unrecognised state, as distinct from a temporary agreement, might imply recognition, but the matter is open to doubt since there are a number of such agreements between parties not recognising each other. One would have to study the circumstances of the particular case to clarify the issue.<sup>82</sup> The making of claims by a state against an entity will not necessarily imply recognition.<sup>83</sup>

Recognition is not normally to be inferred from the fact that both states have taken part in negotiations and signed a multilateral treaty,<sup>84</sup> for example the United Nations Charter. Practice shows that many of the member states or their governments are not recognised by other member states.<sup>85</sup> Although Israel and many Arab countries are UN members, this did not affect Arab non-recognition of the Israeli state.<sup>86</sup> However, where the state concerned has voted in favour of membership in the UN of the entity in question, it is a natural inference that recognition has occurred. The UK, for example, regarded its vote in favour of UN membership for the former Yugoslav republic of Macedonia as amounting to recognition of that entity as a state.<sup>87</sup> Indeed, irrespective of recognition by individual states, there is no doubt that membership of the UN is powerful evidence of statehood since being a state is a necessary precondition to UN membership by virtue of article 4 of the UN Charter.<sup>88</sup>

In the case of common participation in an international conference, similar considerations apply, although the element of doubt has often stimulated non-recognising states to declare expressly that their presence and joint signature on any agreement issuing forth from the meeting is in no way to be understood as implying recognition. Such has been the case particularly with the Arab states over the years with regard to Israel.

State practice has restricted the possible scope of operation of this concept of implied recognition to a few instances only and all the relevant surrounding circumstances will have to be carefully evaluated before one can deduce from conduct the intention to extend recognition. States like to retain their control of such an important political instrument as recognition and are usually not keen to allow this to be inferred from the way they behave. They prefer recognition to be, in

general, a formal act accorded after due thought.

## **Conditional recognition**

The political nature of recognition has been especially marked with reference to what has been termed conditional recognition. This refers to the practice of making the recognition subject to fulfilment of certain conditions, for example, the good treatment of religious minorities as occurred with regard to the independence of some Balkan countries in the late nineteenth century, or the granting of most-favoured-nation status to the recognised state. One well-known instance of this approach was the Litvinov Agreement of 1933 whereby the United States recognised the Soviet government upon the latter undertaking to avoid acts prejudicial to the internal security of the USA, and to come to a settlement of various financial claims.<sup>89</sup>

However, breach of the particular condition does not invalidate the recognition. It may give rise to a breach of international law and political repercussions but the law appears not to accept the notion of a conditional recognition as such. The status of any conditions will depend upon agreements specifically made by the particular parties.<sup>90</sup> It is, however, important to distinguish conditional recognition in this sense from the evolution of criteria for recognition generally, although the two categories may in practice overlap.<sup>91</sup>

## **Collective recognition<sup>92</sup>**

The expediency of collective recognition has often been noted. This would amount to recognition by means of an international decision, whether by an international organisation or not. It would, of course, signify the importance of the international community in its collective assertion of control over membership and because of this it has not been warmly welcomed, nor can one foresee its general application for some time to come. The idea has been discussed particularly since the foundation of the League of Nations and was re-emphasised with the establishment of the United Nations. However, it rapidly became clear that member states reserved the right to extend recognition to their own executive authorities and did not wish to delegate it to any international institution. The most that could be said is that membership of the United Nations constitutes powerful evidence of statehood. But that, of course, is not binding upon other member states who are free to refuse to recognise any other member state or government of the UN.<sup>93</sup>

## Withdrawal of recognition<sup>94</sup>

Recognition once given may in certain circumstances be withdrawn. This is more easily achieved with respect to *de facto* recognition, as that is by its nature a cautious and temporary assessment of a particular situation. Where a *de facto* government loses the effective control it once exercised, the reason for recognition disappears and it may be revoked. It is in general a preliminary acceptance of political realities and may be withdrawn in accordance with a change in political factors.<sup>95</sup> *De jure* recognition, on the other hand, is intended to be more of a definitive step and is more difficult to withdraw.

Of course, where a government recognised *de jure* has been overthrown a new situation arises and the question of a new government will have to be faced, but in such instances withdrawal of recognition of the previous administration is assumed and does not have to be expressly stated, providing always that the former government is not still in existence and carrying on the fight in some way. Withdrawal of recognition of one government without recognising a successor is a possibility and indeed was the approach adopted by the UK and France, for example, with regard to Cambodia in 1979.<sup>96</sup> However, with the adoption of the new British policy on recognition with regard to governments,<sup>97</sup> the position is now that the UK government will neither recognise nor withdraw recognition of regimes.<sup>98</sup>

Withdrawal of recognition in other circumstances is not a very general occurrence but in exceptional conditions it remains a possibility. The United Kingdom recognised the Italian conquest of Ethiopia *de facto* in 1936 and *de jure* two years later. However, it withdrew recognition in 1940, with the intensification of fighting and the dispatch of military aid.<sup>99</sup> Recognition of belligerency will naturally terminate with the defeat of either party, while the loss of one of the required criteria of statehood would affect recognition. It is to be noted that the 1979 recognition of the People's Republic of China as the sole legal government of China entailed the withdrawal of recognition or 'derecognition' of the Republic of China (Taiwan). This was explained to mean that, 'so far as the formal foreign relations of the United States are concerned, a government does *not* exist in Taiwan any longer'.<sup>100</sup>

Nevertheless, this was not to affect the application of the laws of the United States with respect to Taiwan in the context of US domestic law.<sup>101</sup> To some extent in this instance the usual consequences of non-recognition have not flowed, but this has taken place upon the background of a formal and deliberate act of policy.<sup>102</sup> It does show how complex the topic of recognition has become.

The usual method of expressing disapproval with the actions of a particular government is to break diplomatic relations. This will adequately demonstrate

aversion as did, for example, the rupture in diplomatic relations between the UK and the USSR in 1927, and between some Arab countries and the United States in 1967, without entailing the legal consequences and problems that a withdrawal of recognition would initiate. But one must not confuse the ending of diplomatic relations with a withdrawal of recognition.

Since recognition is ultimately a political issue, no matter how circumscribed or conditioned by the law, it logically follows that, should a state perceive any particular situation as justifying a withdrawal of recognition, it will take such action as it regards as according with its political interests.

## **Non-recognition**<sup>103</sup>

There has been developing since the 1930s a doctrine of non-recognition where, under certain conditions, a factual situation will not be recognised because of strong reservations as to the morality or legality of the actions that have been adopted in order to bring about the factual situation. It is a doctrine that has also been reinforced by the principle that legal rights cannot derive from an illegal situation (*ex injuria jus non oritur*).<sup>104</sup>

This approach was particularly stimulated by the Japanese invasion of Manchuria in 1931. The US Secretary of State declared in 1932 that the illegal invasion would not be recognised as it was contrary to the 1928 Pact of Paris (the Kellogg–Briand Pact) which had outlawed war as an instrument of national policy. The doctrine of not recognising any situation, treaty or agreement brought about by non-legal means was named the Stimson doctrine after the American Secretary of State who put it forward. It was reinforced not long afterwards by a resolution of the Assembly of the League of Nations stressing that League members should not recognise any situation, treaty or agreement brought about by means contrary to the League's Covenant or the Pact of Paris.<sup>105</sup>

However, state practice until the Second World War was not encouraging. The Italian conquest of the Empire of Ethiopia was recognised and the German takeover of Czechoslovakia accepted. The Soviet Union made a series of territorial acquisitions in 1940, ranging from areas of Finland to the Baltic States (of Lithuania, Estonia and Latvia) and Bessarabia. These were recognised *de facto* over the years by Western powers (though not by the United States).<sup>106</sup>

The doctrine was examined anew after 1945. Article 2(4) of the UN Charter prohibits the threat or use of force *inter alia* against the territorial integrity of states, while the draft Declaration on the Rights and Duties of States, 1949, emphasised that territorial acquisitions by states were not to be recognised by other states where

achieved by means of the threat or use of force or in any other manner inconsistent with international law and order. The Declaration on Principles of International Law, 1970, also included a provision to the effect that no territorial acquisition resulting from the threat or use of force shall be recognised as legal,<sup>107</sup> and Security Council resolution 242 (1967) on the solution to the Middle East conflict emphasised ‘the inadmissibility of the acquisition of territory by war’.<sup>108</sup>

Rhodesia unilaterally proclaimed its independence in November 1965 and in the years of its existence did not receive official recognition from any state at all, although it did maintain diplomatic relations with South Africa and Portugal prior to the revolution of 1974. The day following the Rhodesian declaration of independence, the Security Council passed a resolution calling upon all states not to accord it recognition and to refrain from assisting it.<sup>109</sup> The Council imposed selective mandatory economic sanctions on Rhodesia and these were later made comprehensive.<sup>110</sup> Similar action was also taken with regard to the Bantustans, territories of South Africa declared by that state to be independent.<sup>111</sup> The Security Council also adopted resolution 541 in 1983, which deplored the purported secession of part of Cyprus occupied by Turkey in 1974 and termed the proposed Turkish Cypriot state ‘legally invalid’.<sup>112</sup> In 1990, the Security Council adopted resolution 662, which declared the Iraqi annexation of Kuwait ‘null and void’ and called on all states and institutions not to recognise the annexation.<sup>113</sup> The principle of non-recognition of title to territory acquired through aggression in violation of international law was also reaffirmed in the Brcko Inter-Entity Boundary award with regard to aggression in Bosnia.<sup>114</sup>

The role of non-recognition as an instrument of sanction as well as a means of pressure and a method of protecting the wronged inhabitants of a territory was discussed more fully in the Advisory Opinion of the International Court of Justice in the Namibia case, 1971, dealing with South Africa’s presence in that territory. The Court held that since the continued South African occupancy was illegal, member states of the United Nations were obliged to recognise that illegality and the invalidity of South Africa’s acts concerning Namibia and were under a duty to refrain from any actions implying recognition of the legality of, or lending support or assistance to, the South African presence and administration.<sup>115</sup>

## **The legal effects of recognition**

In this section some of the legal results that flow from the recognition or non-recognition of an entity, both in the international sphere and within the municipal law of particular states, will be noted. Although recognition may legitimately be regarded as a political tool, it is one that nevertheless entails important

consequences in the legal field.

## **Internationally**

In the majority of cases, it can be accepted that recognition of a state or government is a legal acknowledgement of a factual state of affairs. Nevertheless, it should not be assumed that non-recognition of, for example, a state will deprive that entity of rights and duties before international law, excepting, of course, those situations where it may be possible to say that recognition is constitutive of the legal entity.

In general, the political existence of a state is independent of recognition by other states, and thus an unrecognised state must be deemed subject to the rules of international law. It cannot consider itself free from restraints as to aggressive behaviour, nor can its territory be regarded as *terra nullius*. States which have signed international agreements are entitled to assume that states which they have not recognised but which have similarly signed the agreement are bound by that agreement. For example, the United Kingdom treated the German Democratic Republic as bound by its signature of the 1963 Nuclear Test Ban Treaty even when the state was not recognised by the UK.

Non-recognition, with its consequent absence of diplomatic relations, may affect the unrecognised state in asserting its rights or other states in asserting its duties under international law, but will not affect the existence of such rights and duties. The position is, however, different under municipal law.

## **Internally**

Because recognition is fundamentally a political act, it is reserved to the executive branch of government. This means that the judiciary must as a general principle accept the discretion of the executive and give effect to its decisions. The courts cannot recognise a state or government. They can only accept and enforce the legal consequences which flow from the executive's political decision, although this situation has become more complex with the change in policy from express recognition of governments to acceptance of dealings with such entities.

To this extent, recognition is constitutive, because the act of recognition itself creates legal results within the domestic jurisdiction. In the United Kingdom and the United States particularly, the courts feel themselves obliged to accept the verdict of the executive branch of government as to whether a particular entity should be regarded as recognised or not. If the administration has recognised a state or government and so informs the judiciary by means of a certificate, the position of that state or government within the municipal structure is totally transformed.

It may sue in the domestic courts and be granted immunity from suit in certain instances. Its own legislative and executive acts will be given effect to in the courts of the recognising state and its own diplomatic representatives will be able to claim the various immunities accorded to the official envoys of a recognised state. In addition, it will be entitled to possession in the recognising state of property belonging to its predecessor.

## **The UK<sup>116</sup>**

The English courts have adopted the attitude over many years that an entity unrecognised by the Foreign Office would be treated before the courts as if it did not exist and accordingly it would not be able to claim immunity before the courts.<sup>117</sup> This meant in one case that ships of the unrecognised 'Provisional Government of Northern Russia' would not be protected by the courts from claims affecting them.<sup>118</sup> Similarly an unrecognised state or government is unable to appear before the courts as a plaintiff in an action. This particular principle prevented the revolutionary government of Berne in 1804 from taking action to restrain the Bank of England from dealing with funds belonging to the previous administration of the city.<sup>119</sup>

The leading case in English law on the issue of effects of recognition of an entity within the domestic sphere is *Luther v. Sagor*.<sup>120</sup> This concerned the operations and produce of a timber factory in Russia owned by the plaintiffs, which had been nationalised in 1919 by the Soviet government. In 1920 the defendant company purchased a quantity of wood from the USSR and this was claimed in England by the plaintiffs as their property since it had come from what had been their factory. It was argued by them that the 1919 Soviet decree should be ignored before the English courts since the United Kingdom had not recognised the Soviet government. The lower court agreed with this contention and the matter then came to the Court of Appeal.<sup>121</sup>

In the meantime the UK recognised the Soviet government *de facto* and the Foreign Office informed the Court of Appeal of this in writing. The result was that the higher court was bound to take note of the Soviet decree and accordingly the plaintiffs lost their case, since a court must give effect to the legislation of a recognised state or government. The Court also held that the fact that the Soviet government was recognised *de facto* and not *de jure* did not affect the issue. Another interesting point is that since the Foreign Office certificate included a statement that the former Provisional Government of Russia recognised by the UK had been dispersed during December 1917, the Court inferred the commencement of the Soviet government from that date.

The essence of the matter was that the Soviet government was now accepted as the sovereign government of the USSR as from December 1917. And since recognition once given is retroactive and relates back to the date that the authority of the government was accepted as being established, and not the date on which recognition is granted, the Soviet decree of 1919 was deemed to be a legitimate act of a recognised government. This was so even though at that date the Soviet government was not recognised by the United Kingdom.

The purpose of the retroactivity provision<sup>122</sup> is to avoid possible influence in the internal affairs of the entity recognised, since otherwise legislation made prior to recognition might be rejected. However, this will depend always upon the terms of the executive certificate by which the state informs its courts of the recognition. Should the Foreign Office insist that the state or government in question is to be recognised as a sovereign state or government as of the date of the action, the courts would be bound by this.

As is the case with legislation, contracts made by an unrecognised government will not be enforced in English courts. Without the required action by the political authorities, an unrecognised entity does not exist as a legal person before the municipal courts. The case of *Luther v. Sagor* suggested that in general the legal consequences of a *de facto* recognition would be the same as a *de jure* one. This was emphasised in *Haile Selassie v. Cable and Wireless Ltd (No. 2)*,<sup>123</sup> but regarded as restricted to acts in relation to persons or property in the territory which the *de facto* government has been recognised as effectively controlling.

In other words, a different situation would ensue with regard to persons or property situated outside the territory of the state or government. In the *Haile Selassie* case, the Emperor of Ethiopia was suing a British company for money owing to him under an agreement. The problem was that when the action was brought, the UK had recognised the Italian forces as the *de facto* authority in Ethiopia while Haile Selassie was still recognised as the *de jure* sovereign. The Court held that since the case concerned a debt recoverable in England and not the validity of acts with regard to persons or property in Ethiopia, the *de jure* authority, Emperor Haile Selassie, was entitled to the sum due from the company, and the *de facto* control of the Italians did not affect this.

However, before the defendant's appeal was heard, the United Kingdom extended *de jure* recognition to the Italian authorities in Ethiopia. The Court of Appeal accepted that this related back to, and was deemed to operate as from the date of, the *de facto* recognition. Since this had occurred prior to the case starting, it meant that the Italian government was now to be recognised as the *de jure* government of Ethiopia, before and during the time of the hearing of the action. Accordingly, Haile

Selassie was divested of any right whatsoever to sue for the recovery of the money owing.

This problem of the relationship between a *de facto* government and a *de jure* government as far as English courts were concerned, manifested itself again during the Spanish Civil War. The case of the *Arantzazu Mendi*<sup>124</sup> concerned a private steamship registered in Bilbao in the Basque province of Spain. In June 1937, following the capture of that region by the forces of General Franco, the opposing Republican government issued a decree requisitioning all ships registered in Bilbao. Nine months later the Nationalist government of Franco also passed a decree taking control over all Bilbao vessels. In the meantime, the *Arantzazu Mendi* itself was in London when the Republican government issued a writ to obtain possession of the ship. The owners opposed this while accepting the Nationalists' requisition order.

It was accepted rule of international law that a recognised state cannot be sued or otherwise brought before the courts of another state. Accordingly, the Nationalists argued that since their authority had been recognised *de facto* by the UK government over the areas they actually controlled, their decree was valid and could not be challenged in the English courts. Therefore, the action by the Republican government must be dismissed.

The case came before the House of Lords, where it was decided that the Nationalist government, as the *de facto* authority of much of Spain including the region of Bilbao, was entitled to be regarded as a sovereign state and was able to benefit from the normal immunities which follow therefrom. Thus, the action by the Republican government failed. The House of Lords pointed out that it did not matter that the territory over which the *de facto* authority was exercising sovereign powers was from time to time increased or diminished.<sup>125</sup> This case marks the high-point in the attribution of characteristics to a *de facto* authority and can be criticised for its over-generous assessment of the status of such an entity.<sup>126</sup>

The problems faced by the English court when the rights and obligations of a *de jure* government and a *de facto* government, claiming the same territory, appear to be in conflict have been briefly noted. Basically, the actions of a *de facto* authority with regard to people and property within this sphere of control will be recognised in an English court, but where property is situated and recoverable in England, the *de jure* sovereign will have precedence. A similarly complicated situation arises where the interests of two recognised *de jure* governments of the same state are involved, as one supersedes the other. Problems can arise concerning the issue of retroactivity, that is, how far the court will relate back actions of a *de jure* government, since recognition is normally retroactive to the moment of inception of the particular state or government.

The matter was discussed in the *Gdynia Ameryka Linie v. Boguslawski* case.<sup>127</sup> During the Second World War the Polish government-in-exile stationed in London was recognised by the UK as the *de jure* government of Poland. However, on 28 June 1945 the communist provisional government was established with effective control of the country and at midnight on 5 July the UK recognised that government as the *de jure* government of Poland. A couple of days prior to this recognition, the Polish government-in-exile made an offer to Polish seamen of compensation in the event of leaving the merchant navy service. The money was to be paid by the particular employers to seamen not wanting to work for the communist provisional government. In the *Boguslawski* case the employers refused to pay the compensation to seamen requesting it, and argued that the UK recognition *de jure* of the provisional government was retroactive to 28 June, this being the date that the government effectively took control of the country. If this was the case, then acts of the government-in-exile after 28 June ceased to be of effect and thus the offers of compensation could not be enforced in the English courts.

The House of Lords emphasised the general proposition that recognition operates retroactively. However, they modified the statement by declaring that the courts had to give effect not only to acts done by the new government after recognition, but also to acts done before the recognition 'in so far as those acts related to matters under its control at the time when the acts were done'.<sup>128</sup> It was stated that while the recognition of the new government had certain retroactive effects, the recognition of the old government remained effective down to the date when it was in fact withdrawn. Problems might have arisen had the old government, before withdrawal of recognition, attempted to take action with respect to issues under the control of the new government. However, that was not involved in this case.

In other words, and in the circumstances of the case, the principle of retroactivity of recognition was regarded as restricted to matters within the effective control of the new government. Where something outside the effective control of the new government is involved, it would appear that the recognition does not operate retroactively and that prior to the actual date of recognition one would have to accept and put into effect the acts of the previous *de jure* government.

This could lead to many complicated situations, especially where a court is faced with conflicting courses of action, something which is not hard to envisage when one *de jure* government has been superseded by another. It could permit abuses of government such as where a government, knowing itself to be about to lose recognition, awards its supporters financial or other awards in decrees that may be enforced in English courts. What would happen if the new government issued contrary orders in an attempt to nullify the effect of the old government's decrees is something that was not examined in the *Boguslawski* case.

Another case which came before the courts in the same year was *Civil Air Transport Inc. v. Central Air Transport Corporation*,<sup>129</sup> and it similarly failed to answer the question mentioned above. It involved the sale of aircraft belonging to the nationalist government of China, which had been flown to the British Crown Colony of Hong Kong. Such aircraft were sold to an American company after the communist government established effective control over the country but before it had been recognised by the UK. The Court accepted that the nationalist government had been entitled to the aircraft and pointed out that:

retroactivity of recognition operates to validate acts of a *de facto* Government which has subsequently become the new *de jure* Government, and not to invalidate acts of the previous *de jure* Government.<sup>130</sup>

It is to be noted that the communist government did not attempt to nullify the sale to the American company. Had it done so, a new situation would have been created, but it is as yet uncertain whether that would have materially altered the legal result.

The general doctrine adhered to by the UK with regard to recognition (and now diplomatic dealings) is that it will be accorded upon the evidence of effective control. It is used to acknowledge factual situations and not as a method of exhibiting approval or otherwise. However, this is not so in all cases and there are a number of governments in effective control of their countries and unrecognised by the UK. One major example was the former German Democratic Republic. Since the prime consequence of non-recognition is that the English courts will not give effect to any laws of an unrecognised entity, problems are thus likely to arise in ordinary international political and commercial life.

The issue came before the courts in the *Carl Zeiss Stiftung v. Rayner and Keeler Ltd (No. 2)* case.<sup>131</sup> It concerned the Carl Zeiss foundation which was run by a special board, reconstituted in 1952 as the Council of Gera. The problem was that it was situated in the German Democratic Republic (GDR) and the establishment of the Council of Gera as the governing body of the Carl Zeiss foundation was effected by a reorganisation of local government in the GDR. When Carl Zeiss brought a claim before the English courts, the issue was at once raised as to whether, in view of the UK non-recognition of the GDR, the governing body of the foundation could be accepted by the courts. The Court of Appeal decided that since the Foreign Office certified that the UK recognised 'the State and Government of the Union of Soviet Socialist Republics as *de jure* entitled to exercise governing authority in respect of that zone'<sup>132</sup> (i.e. the GDR, being the former Soviet zone of occupation), it was not possible to give effect to any rules or regulations laid down by the GDR. The House of Lords, however, extricated the English courts system from a rather difficult

position by means of an elaborate fiction.

It stated that as a Foreign Office certificate is binding on the courts as to the facts it contains, it logically followed that the courts must recognise the USSR as the *de jure* governing authority of East Germany, irrespective of the creation of the GDR. The courts were not entitled to enter into a political examination of the actual situation but were obliged to accept and give effect to the facts set out in the Foreign Office certificate. Thus, the Soviet Union was the *de jure* sovereign and the GDR government must be accepted as a subordinate and dependent body.

Accordingly, the Court could recognise the existence of the Carl Zeiss Stiftung by virtue of the UK recognition of the *de jure* status of the Soviet Union, the GDR as an administrative body being relevant only as a legal creature of the USSR.

The problem brought out in the *Carl Zeiss* case and sidestepped there was raised again in a series of cases concerning Rhodesia, following the unilateral declaration of independence by the Smith regime in 1965. Basically, if a government or state which exercises effective control over its own territory is unrecognised by the UK a strict enforcement of the 'no recognition, no existence' rule could lead to much hardship and inconvenience. Accordingly, in *Adams v. Adams*<sup>133</sup> a Rhodesian divorce decree was not recognised in an English court. However, in *Hesperides Hotels Ltd v. Aegean Turkish Holidays*,<sup>134</sup> concerning an action in trespass with respect to hotels owned by Greek Cypriots but run by Turkish Cypriots following the Turkish invasion of 1974, Lord Denning stated *obiter* that he believed that the courts could recognise the laws and acts of an unrecognised body in effective control of territory, at least with regard to laws regulating the day-to-day affairs of the people.<sup>135</sup> It is certainly an attractive approach, provided it is carefully handled and strictly limited to determinations of a humanitarian and non-sovereign nature.<sup>136</sup> In *Caglar v. Bellingham*, it was noted that while the existence of a foreign unrecognised government could be acknowledged in matters relating to commercial obligations or matters of private law between individuals or matters of routine administration such as registration of births, marriages and deaths, the courts would not acknowledge the existence of an unrecognised state if to do so would involve them in acting inconsistently with the foreign policy or diplomatic stance of the UK.<sup>137</sup> In *Emin v. Yeldag*, the Court held that private acts taking place within an unrecognised state could be regarded as valid within the English legal system provided that there was no statutory prohibition<sup>138</sup> and that such acceptance did not compromise the UK government in the conduct of foreign relations.<sup>139</sup> Indeed, where the issue concerns the lawful acts of a person recognised as existing in English law, they will be justiciable before the English courts and will not be tainted by illegality because the unrecognised state can be associated with the actions.<sup>140</sup>

In many cases, however, the problems with regard to whether an entity is or is not a 'state' arise in connection with the interpretation of a particular statutory provision. The approach of the courts has been to focus upon the construction of the relevant instrument rather than upon the Foreign Office certificate or upon any definition in international law of statehood.<sup>141</sup>

Some of the consequential problems of non-recognition were addressed in the Foreign Corporations Act 1991. This provides that a corporation incorporated in a territory not recognised by the UK government as a state would be regarded as having legal personality within the UK where the laws of that territory were applied by a settled court system. In other words, the territory would be treated for this purpose as if it were a recognised state, thereby enabling its legislation to be applied in this circumstance on the normal conflict of rules basis. The point should, however, be stressed that the legislation was not intended at all to impact upon recognition issues as such.<sup>142</sup>

Since the UK decision to abandon recognition of governments in 1980, the question arises as to the attitude of the courts on this matter. In particular, it appears that they may be called upon to examine the nature of the UK government's dealings with a new regime in order to determine its status for municipal law purposes.<sup>143</sup>

In *Gur Corporation v. Trust Bank of Africa*<sup>144</sup> the Court was in fact called upon to decide the status of Ciskei. This territory, part of South Africa, was one of the Bantustans granted 'independence' by South Africa. This was accomplished by virtue of the Status of Ciskei Act 1981. The preliminary issue that came before the Court in a commercial dispute was whether Ciskei had locus standi to sue or be sued in England. The Foreign and Commonwealth Office certified that Ciskei was not recognised as an independent sovereign state either *de facto* or *de jure* and that representations were made to South Africa in relation to matters occurring in Ciskei. The Court of Appeal held that it was able to take account of such declarations and legislation as were not in conflict with the certificates.

The effect of that, noted Lord Donaldson, was that the Status of Ciskei Act 1981 could be taken into account, except for those provisions declaring the territory independent and relinquishing South African sovereignty. This led to the conclusion that the Ciskei legislature was in fact exercising power by virtue of delegation from the South African authorities.<sup>145</sup> Accordingly, the government of Ciskei could sue or be sued in the English courts 'as being a subordinate body set up by the Republic of South Africa to act on its behalf'.<sup>146</sup> Clearly the Court felt that the situation was analogous to the *Carl Zeiss* case. Whether this was in fact so is an open question. It is certainly open to doubt whether the terms of the certificates in the cases were on all fours. In the *Gur* case, the executive was far more cautious and non-committal.

Indeed, one of the certificates actually stated that the UK government did not have a formal position regarding the exercise of governing authority over the territory of Ciskei,<sup>147</sup> whereas in *Carl Zeiss* the certificate noted expressly that the USSR was recognised as *de jure* entitled to exercise governing authority in respect of the territory (the GDR).<sup>148</sup> The gap was bridged by construction and inference.

More widely, it is unclear to what extent the change in policy on recognition of governments has actually led to a change in attitude by the courts. There is no doubt that the attitude adopted by the government in certifying whether or not diplomatic dealings were in existence with regard to the entity in question is crucial. An assertion of such dealing would, it appears, be determinative.<sup>149</sup> The problem arises where the Foreign Office statement is more ambiguous than the mere assertion of dealings with the entity. The consequence is that a greater burden is imposed on the courts as an answer as to status is sought. On the one hand, the *Gur* case suggests that the courts are not willing to examine for themselves the realities of any given situation, but would seek to infer from the terms of any certificate what the answer ought to be.<sup>150</sup> On the other hand, Hobhouse J in the High Court in *Republic of Somalia v. Woodhouse Drake and Carey (Suisse) SA*<sup>151</sup> took the wider view that in deciding whether a regime was the government of a state, the court would have to take into account the following factors: (a) whether it is the constitutional government of the state; (b) the degree, nature and stability of administrative control, if any, that it of itself exercises over the territory of the state; (c) whether the UK government has any dealings with it, and if so the nature of those dealings; and (d) in marginal cases, the extent of international recognition that it has as the government of the state.<sup>152</sup> Part of the answer as to why a different emphasis is evident is no doubt due to the fact that in the latter case, there were competing bodies claiming to be the government of Somalia and the situation on the ground as a matter of fact was deeply confused. It should also be noted that in the *Republic of Somalia* case, the court took the view that Foreign Office statements were no more than part of the evidence in the case, although likely to be the best evidence as to whether the government had dealings with the entity in question.<sup>153</sup>

## ***The USA***

The situation in the United States with regard to the recognition or non-recognition of foreign entities is similar to that pertaining in the UK, with some important differences. Only a recognised state or government can in principle sue in the US courts.<sup>154</sup> This applies irrespective of the state of diplomatic relations, providing there is no war between the two.<sup>155</sup> However, an unrecognised state or government may in certain circumstances be permitted access before the American courts. This would appear to depend on the facts of each case and a practical appreciation of the

entity in question.<sup>156</sup> For example, in *Transportes Aereos de Angola v. Ronair*,<sup>157</sup> it was held that in the particular circumstances where the US State Department had clearly stated that allowing the plaintiff (a corporation owned by the unrecognised government of Angola) access to the Court would be consistent with the foreign policy interests of the United States, the jurisdictional bar placed upon the Court would be deemed to have been lifted.

As in the UK, a declaration by the executive will be treated as binding the courts, but in the USA the courts appear to have a greater latitude. In the absence of the 'suggestion' clarifying how far the process of non-recognition is to be applied, the courts are more willing than their UK counterparts to give effect to particular acts of an unrecognised body. Indeed, in the *Carl Zeiss* case Lords Reid and Wilberforce referred in approving terms to the trend evident in decisions of US courts to give recognition to the 'actual facts or realities found to exist in the territory in question', in the interests of justice and common sense. Such recognition did not apply to every act, but in Lord Wilberforce's words, it did apply to 'private rights, or acts of everyday occurrence, or perfunctory acts of administration'.<sup>158</sup> How far this extends, however, has never been precisely defined.

It was the difficulties engendered by the American Civil War that first stimulated a reappraisal of the 'no recognition, no existence' doctrine. It was not possible to ignore every act of the Confederate authorities and so the idea developed that such rules adopted by the Confederate states as were not hostile to the Union or the authority of the Central Government, or did not conflict with the terms of the US Constitution, would be treated as valid and enforceable in the courts system.<sup>159</sup> The doctrine was developed in a case before the New York Court of Appeals, when, discussing the status of the unrecognised Soviet government, Judge Cardozo noted that an unrecognised entity which had maintained control over its territory, 'may gain for its acts and decrees a validity quasi-governmental, if violence to fundamental principles of justice or to our public policy might otherwise be done'.<sup>160</sup>

This thesis progressed rapidly in the period immediately preceding the American recognition of the USSR and led in *Salimoff v. Standard Oil Co. of New York*<sup>161</sup> to the enforcement of a Soviet oil nationalisation decree, with the comment that: 'to refuse to recognise that Soviet Russia is a government regulating the internal affairs of the country, is to give to fictions an air of reality which they do not deserve'.

This decision, diametrically opposed to the *Luther v. Sagor* approach,<sup>162</sup> constituted a step towards the abolition of differences between the judicial treatment of the acts of recognised and unrecognised governments.

However, the limits of this broad doctrine were more carefully defined in *The*

*Maret*,<sup>163</sup> where the Court refused to give effect to the nationalisation of an Estonian ship by the government of the unrecognised Soviet Republic of Estonia. However, the ship in dispute was located in an American port at the date of the nationalisation order, and there appears to be a difference in treatment in some cases depending upon whether the property was situated inside or outside the country concerned.

One can mention, in contrast to *The Maret*, the case of *Upright v. Mercury Business Machines*,<sup>164</sup> in which the non-recognition of the German Democratic Republic was discussed in relation to the assignment of a bill to the plaintiff by a state-controlled company of the GDR. The judge of the New York Supreme Court declared, in upholding the plaintiff's claim, that a foreign government, although unrecognised by the executive:

may nevertheless have *de facto* existence which is judicially cognisable. The acts of such a *de facto* government may affect private rights and obligations arising either as a result of activity in, or with persons or corporations within, the territory controlled by such *de facto* government.

However, the creation of judicial entities by unrecognised states will not be allowed to circumvent executive policy. In *Kunstsammlungen zu Weimar v. Elicofon*,<sup>165</sup> the KZW was an East German governmental agency until 1969, when it was transformed into a separate juristic person in order to avoid the problems relating to unrecognised states in the above litigation. This concerned the recovery of pictures stolen from a museum during the American occupation of Germany.

As a branch of an unrecognised state, the KZW could not of course be permitted to sue in an American court, but the change of status in 1969 was designed to circumvent this. The Court, however, refused to accept this and emphasised that to allow the KZW to intervene in the case 'would render our government's non-recognition of the German Democratic Republic a meaningless gesture'.<sup>166</sup> Further, in *Autocephalous Church of Cyprus v. Goldberg*, the Court of Appeals held that it would not give effect to confiscatory decrees adopted by the unrecognised 'Turkish Federated State of Cyprus', later called the 'Turkish Republic of Northern Cyprus'.<sup>167</sup>

In *Ministry of Defense of the Islamic Republic of Iran v. Gould*,<sup>168</sup> the Court was faced with an action in which the unrecognised Iranian government sought to enforce an award. However, the US intervened and filed a statement of interest supporting Iran's argument and this proved of significant influence. This general approach was reinforced in *National Petrochemical v. The M/T Stolt Sheaf*,<sup>169</sup> where the Court stressed that the executive must have the power to deal with unrecognised

governments and that therefore the absence of formal recognition did not necessarily result in a foreign government being barred from access to US courts.<sup>170</sup> However, where the executive has issued a non-recognition certificate and makes known its view that in the instant case the unrecognised party should not be permitted access to the courts, the courts appear very willing to comply.<sup>171</sup>

It is somewhat difficult to reconcile the various American cases or to determine the extent to which the acts of an unrecognised state or government may be enforced in the courts system of the United States. But two factors should be particularly noted. First of all, the declaration of the executive is binding. If that intimates that no effect is to be given to acts of the unrecognised entity, the courts will be obliged to respect this. It may also be the case that the State Department 'suggestions' will include some kind of hint or indication which, while not clearly expressed, may lead the courts to feel that the executive is leaning more one way than another in the matter of the government's status, and this may influence the courts. For example, in the *Salimoff*<sup>172</sup> case the terms of the certificate tended to encourage the court to regard the Soviet government as a recognised government, whereas in the case of *The Maret*<sup>173</sup> the tone of the executive's statement on the Soviet Republic of Estonia was decidedly hostile to any notion of recognition or enforcement of its decrees.

The second point is the location of the property in question. There is a tendency to avoid the enforcement of acts and decrees affecting property situated outside the unrecognised state or government and in any event the location of the property often introduces additional complications as regards municipal law provision.<sup>174</sup>

There is some uncertainty in the United States as to the operation of the retroactivity doctrine, particularly as it affects events occurring outside the country. There is a line of cases suggesting that only those acts of the unrecognised government performed in its own territory could be validated by the retroactive operation of recognition<sup>175</sup> while, on the other hand, there are cases illustrating the opposite proposition decided by the Supreme Court.<sup>176</sup>

See also above, chapter 4, p. 140. See, as to recognition of belligerency and insurgency, e.g. O’Connell, *International Law*, pp. 148–53; Lauterpacht, *Recognition*, p. 270, and *Oppenheim’s International Law*, pp. 161 ff.

<sup>60</sup> UKMIL, 82 BYIL, 2011, p. 737–8. See also Security Council resolution 1962 (2010).

<sup>61</sup> UKMIL, 82 BYIL, 2011, p. 742. This followed the meeting on 15 July 2011 of the Libya Contact Group underlining that the parties would deal only with the National Transitional Council as the ‘legitimate governing authority’ in Libya [www.mfa.gov.tr/fourth-meeting-of-the-libya-contact-group-chair\\_s-statement\\_-15-](http://www.mfa.gov.tr/fourth-meeting-of-the-libya-contact-group-chair_s-statement_-15-)

<sup>62</sup> [2011] EWHC 2274 (Comm), para. 23.

<sup>63</sup> See e.g. *Oppenheim's International Law*, p. 154.

<sup>64</sup> See e.g. O'Connell, *International Law*, p. 161. See also the Morrison statement, above, note 38.

<sup>65</sup> See below, pp. 342–3.

<sup>66</sup> See below, p. 341.

<sup>67</sup> See e.g. *Haile Selassie v. Cable and Wireless Ltd (No. 2)* [1939] 1 Ch. 182; 9 AD, p. 94.

<sup>68</sup> See e.g. *Oppenheim's International Law*, pp. 143 ff.

<sup>69</sup> See e.g. J. Stremlau, *The International Politics of the Nigerian Civil War, 1967–70*, Princeton, 1977, pp. 127–9, and D. Ijalaye, 'Was "Biafra" at Any Time a State in International Law?', 65 *AJIL*, 1971, p. 51. See also Lauterpacht, *Recognition*, pp. 7–8. See also generally, J. Dugard, *The Secession of States and Their Recognition in the Wake of Kosovo*, The Hague, 2013.

<sup>70</sup> See e.g. R. Müllerson, *International Law, Rights and Politics*, London, 1994, p. 130, and R. Rich, 'Recognition of States: The Collapse of Yugoslavia and the Soviet Union', 4 *EJIL*, 1993, p. 36.

<sup>71</sup> See above, p. 326.

<sup>72</sup> 92 *ILR*, pp. 179, 181. Note that the President of Croatia on 15 January 1992 announced that Croatia would abide by the necessary conditions and on 8 May 1992 its Constitution was amended. The amended Constitution was considered by the Arbitration Commission on 4 July 1992, which concluded that the requirements of

general international law with regard to the protection of minorities had been satisfied, *ibid.*, p. 209. Note, however, the critical views of the UN Human Rights Committee with regard to the distinctions made in the Croatian Constitution between ethnic Croats and other citizens: see CCPR/C/79/Add.15, p. 3. Croatia became a member of the UN on 22 May 1992. See also M. Weller, 'The International Response to the Dissolution of the Socialist Federal Republic of Yugoslavia', 86 AJIL, 1992, p. 569.

<sup>73</sup> See e.g. Weller, 'International Response'. Cf. the views of the UK Minister of State at the Foreign Office, UKMIL, 63 BYIL, 1992, p. 645. Note that Bosnia became a member of the UN on 22 May 1992.

<sup>74</sup> See e.g. with regard to the delays in recognising Macedonia, Henkin *et al.*, *International Law*, p. 253. Israel, of course, remained unrecognised by its Arab neighbours until long after its establishment in 1948. It was recognised in 1979 by Egypt and in 1995 by Jordan.

<sup>75</sup> See e.g. *Oppenheim's International Law*, p. 169; Lauterpacht, *Recognition*, pp. 369–408, and Chen, *Recognition*, pp. 201–16. See also Talmon, 'Recognition of Governments', pp. 255 ff., and M. Lachs, 'Recognition and Modern Methods of International Co-operation', 35 BYIL, 1959, p. 252.

<sup>76</sup> Note that article 7 of the Montevideo Convention on Rights and Duties of States, 1933 provides that 'the recognition of a state may be express or tacit. The latter results from any act which implies the intention of recognising the new state.' See also R. Higgins, *The Development of International Law by the Political Organs of the United Nations*, Oxford, 1963, pp. 140 ff.

<sup>77</sup> See e.g. UK and North Vietnam, Cmd 9763, p. 3, [note 1](#), and Israel and Arab countries, International Convention on the Elimination of all Forms of Racial Discrimination, 1965: see *Human Rights International Instruments*, UN, ST/HR/4/rev.4, 1982. Note that Egypt withdrew its declarations regarding non-recognition of Israel with regard to this Convention on 18 January 1980, *ibid.*, p. 86.

<sup>78</sup> See O'Connell, *International Law*, pp. 154–5. Note that the UK stated that in the case of Namibia 'there was no formal recognition of statehood, but it was implicit in the establishment of diplomatic relations in March 1990', UKMIL, 63 BYIL, 1992,

p. 642. Instructing an ambassador to make suitable, friendly contact with the new administration in question might also suffice: see UKMIL, 50 BYIL, 1979, p. 294.

<sup>79</sup> See e.g. *Pan American World Airways Inc. v. Aetna Casualty and Surety Co.* 13 ILM, 1974, pp. 1376, 1397.

<sup>80</sup> See *Oppenheim's International Law*, p. 171, [note 9](#).

<sup>81</sup> Discussions with an unrecognised entity conducted by consular officers will not of itself imply recognition: see e.g. H. de Smith, *Great Britain and the Law of Nations*, London, 1932, vol. I, p. 79, and *Civil Air Transport Inc. v. Central Air Transport Corporation* [1953] AC 70, 88–9. The establishment of an office in the UK, for example, of an unrecognised entity is not as such prohibited nor does it constitute recognition: see e.g. with regard to the PLO, 483 HL Deb., cols. 1248–52, 27 January 1987 and UKMIL, 58 BYIL, 1987, p. 531. Note that under section 1 of the Diplomatic and Consular Premises Act 1987, the permission of the Foreign Secretary is required if the premises in question are to be regarded as diplomatic or consular.

<sup>82</sup> See e.g. *Republic of China v. Merchants' Fire Assurance Corporation of New York* 30 F.2d 278 (1929); 5 AD, p. 42 and *Clerget v. Banque Commerciale pour l'Europe du Nord* 52 ILR, p. 310. See, with regard to the special position as between the German Federal Republic and the German Democratic Republic, *Re Treaty on the Basis of Relations Between the Federal Republic of Germany and the German Democratic Republic* 78 ILR, p. 150. See also Whiteman, *Digest*, vol. II, pp. 567 ff.

<sup>83</sup> See e.g. with regard to Formosa/Taiwan, 6 ICLQ, 1957, p. 507 and with regard to Turkish-occupied northern Cyprus, 957 HC Deb., col. 247, Written Answer, 8 November 1978.

<sup>84</sup> See e.g. UKMIL, 49 BYIL, 1978, p. 339 and Whiteman, *Digest*, vol. II, pp. 563 ff. See also *Civil Aeronautics Administration v. Singapore Airlines Ltd* [2004] 1 SLR 570; [2004] SGCA 3, para. 35; 133 ILR, pp. 371, 383.

<sup>85</sup> See the Memorandum on the Legal Aspects of the Problem of Representation in the United Nations, S/1466, 1950 and 4 *International Organisation*, 1950, pp. 356, 359.

<sup>86</sup> See e.g. Q. Wright, 'Some Thoughts about Recognition', 44 AJIL, 1950, p. 548. See also, with regard to the Ukraine and Byelorussia, members of the UN prior to the demise of the USSR of which they were constituent republics, UKMIL, 55 BYIL, 1978, p. 339.

<sup>87</sup> See 223 HC Deb., col. 241, Written Answer, 22 April 1993 and UKMIL, 64 BYIL, 1993, p. 601. Note that a similar view was taken with regard to the Democratic People's Republic of Korea, 62 BYIL, 1991, p. 559.

<sup>88</sup> See the *Conditions of Membership of the United Nations* case, ICJ Reports, 1948, pp. 57 ff.; 15 AD, p. 333.

<sup>89</sup> See e.g. *United States v. Pink* 315 US 203, 229 (1942), Whiteman, *Digest*, vol. II, pp. 120 ff.; 10 AD, p. 48, and A. Kiss, *Répertoire de la Pratique Française en Matière de Droit International Public*, Paris, 1962–72, vol. III, pp. 40 ff.

<sup>90</sup> See e.g. Lauterpacht, *Recognition*, chapter 19. See also the Treaty of Berlin, 1878 concerning Bulgaria, Montenegro, Serbia and Romania and the provisions dealing with freedom of religion, articles V, XXVII, XXXV and XLIII.

<sup>91</sup> See further above, p. 451, with regard to the approach of the European Community to the emergence of new states in Eastern Europe and out of the former USSR and Yugoslavia. This constituted a co-ordinated stand with regard to criteria for recognition by the Community and its member states rather than collective recognition as such.

<sup>92</sup> See e.g. Higgins, *Development of International Law*; Dugard, *Recognition*; Lauterpacht, *Recognition*, p. 400; Chen, *Recognition*, p. 211, and Oppenheim's *International Law*, pp. 177 ff.

<sup>93</sup> See further above, p. 323.

<sup>94</sup> See Lauterpacht, *Recognition*, p. 349

<sup>95</sup> Withdrawal of *de facto* recognition does not always entail withdrawal of *de jure*

recognition: see, with regard to Latvia, *Re Feivel Pikelny's Estate*, 32 BYIL, 1955–6, p. 288.

<sup>96</sup> See 975 HC Deb., col. 723, 6 December 1979, and C. Warbrick, ‘*Kampuchea: Representation and Recognition*’, 30 ICLQ, 1981, p. 234. See also AFDI, 1980, p. 888.

<sup>97</sup> See above, p. 331.

## 10 Territory

---

### The concept of territory in international law

International law is based on the concept of the state. The state in its turn lies upon the foundation of sovereignty, which expresses internally the supremacy of the governmental institutions and externally the supremacy of the state as a legal person.<sup>1</sup>

But sovereignty itself, with its retinue of legal rights and duties, is founded upon the fact of territory. Without territory a legal person cannot be a state.<sup>2</sup> It is undoubtedly the basic characteristic of a state and the one most widely accepted and understood. There are currently some 200 distinct territorial units, each one subject to a different territorial sovereignty and jurisdiction.

Since such fundamental legal concepts as sovereignty and jurisdiction can only be comprehended in relation to territory, it follows that the legal nature of territory becomes a vital part in any study of international law. Indeed, the principle whereby a state is deemed to exercise exclusive power over its territory can be regarded as a fundamental axiom of classical international law.<sup>3</sup> The development of international law upon the basis of the exclusive authority of the state within an accepted territorial framework meant that territory became 'perhaps the fundamental concept of international law'.<sup>4</sup> Most nations indeed developed through a close relationship with the land they inhabited.<sup>5</sup>

The central role of territory in the scheme of international law may be seen by noting the development of legal rules protecting its inviolability. The principle of respect for the territorial integrity of states is well founded as one of the linchpins of the international system, as is the norm prohibiting interference in the internal affairs of other states.<sup>6</sup> A number of factors, however, have tended to reduce the territorial exclusivity of the state in international law. Technological and economic changes have had an impact as interdependence becomes more evident and the rise of such transnational concerns as human rights and self-determination have tended to impinge upon this exclusivity.<sup>7</sup> The growth of international organisations is another relevant factor, as is the development of the 'common heritage' concept in the context of the law of the sea and air law.<sup>8</sup> Nevertheless, one should not exaggerate the effects upon international law doctrine today of such trends.<sup>9</sup> Territorial sovereignty remains as a key concept in international law.

Since the law reflects political conditions and evolves, in most cases, in harmony with reality, international law has had to develop a series of rules governing the

transfer and control of territory. Such rules, by the very nature of international society, have often (although not always) had the effect of legitimising the results of the exercise of power. The lack of a strong, central authority in international law has emphasised, even more than municipal legal structures, the way that law must come to terms with power and force.

The rules laid down by municipal legislation and judicial decisions regarding the transfer and control of land within a particular state are usually highly detailed, for they deal with one of the basic resources and wealth-creating factors of the nation. Land law has often reflected the power balance within a society, with feudal arrangements being succeeded by free market contracts and latterly the introduction of comprehensive provisions elaborating the rights and duties of landlords and their tenants, and the development of more sophisticated conveyancing techniques. A number of legal interests are capable of existing over land and the possibility exists of dividing ownership into different segments.<sup>10</sup> The treatment of territory in international law has not reached this sophisticated stage for a number of reasons, in particular the horizontal system of territorial sovereignty that subsists internationally as distinct from the vertical order of land law that persists in most municipal systems. There is thus a critical difference in the consequences that result from a change in the legal ownership of land in international law and in municipal law.

In international law a change in ownership of a particular territory involves also a change in sovereignty, in the legal authority governing the area. This means that the nationality of the inhabitants is altered, as is the legal system under which they live, work and conduct their relations, whereas in municipal law no such changes are involved in an alteration of legal ownership. Accordingly international law must deal also with all the various effects of a change in territorial sovereignty and not confine its attentions to the mere mechanism of acquisition or loss of territory.<sup>11</sup>

## **Territorial sovereignty**

Judge Huber noted in the *Island of Palmas* case<sup>12</sup> that:

sovereignty in relation to a portion of the surface of the globe is the legal condition necessary for the inclusion of such portion in the territory of any particular state.

Brierly defined territorial sovereignty in terms of the existence of rights over territory rather than the independence of the state itself or the relation of persons to persons. It was a way of contrasting 'the fullest rights over territory known to the

law' with certain minor territorial rights, such as leases and servitudes.<sup>13</sup> Territorial sovereignty has a positive and a negative aspect. The former relates to the exclusivity of the competence of the state regarding its own territory,<sup>14</sup> while the latter refers to the obligation to protect the rights of other states.<sup>15</sup>

The international rules regarding territorial sovereignty are rooted in the Roman law provisions governing ownership and possession, and the classification of the different methods of acquiring territory is a direct descendant of the Roman rules dealing with property.<sup>16</sup> This has resulted in some confusion. Law, being so attached to contemporary life, cannot be easily transposed into a different cultural milieu.<sup>17</sup> And, as shall be noted, the Roman method of categorising the different methods of acquiring territory faces difficulties when applied in international law.

The essence of territorial sovereignty is contained in the notion of title. This term relates to both the factual and legal conditions under which territory is deemed to belong to one particular authority or another. In other words, it refers to the existence of those facts required under international law to entail the legal consequences of a change in the juridical status of a particular territory.<sup>18</sup> As the International Court noted in the *Burkina Faso/Mali* case,<sup>19</sup> the word 'title' comprehends both any evidence which may establish the existence of a right and the actual source of that right.<sup>20</sup>

One interesting characteristic that should be noted and which again points to the difference between the treatment of territory under international law and municipal law is that title to territory in international law is more often than not relative rather than absolute.<sup>21</sup> Thus, a court, in deciding to which of contending states a parcel of land legally belongs, will consider all the relevant arguments and will award the land to the state which relatively speaking puts forward the better (or best) legal case.<sup>22</sup> Title to land in municipal law is much more often the case of deciding in uncertain or contentious circumstances which party complies with the legal requirements as to ownership and possession, and in that sense title is absolute. It is not normally a question of examining the facts to see which claimant can under the law put forward a better claim to title. Further, not all rights or links will amount to territorial sovereignty. Personal ties of allegiance may exist but these may not necessarily lead to a finding of sovereignty.<sup>23</sup> The special characteristics of the territory need to be taken into account, as does the particular structure of the sovereignty in question.<sup>24</sup>

Disputes as to territory in international law may be divided into different categories. The contention may be over the status of the country itself, that is, all the territory comprised in a particular state, as for example Arab claims against Israel at one time and claims formerly pursued by Morocco against Mauritania.<sup>25</sup> Or the dispute may refer to a certain area on the borders of two or more states, as for

example Somali claims against the north-east of Kenya and south-east of Ethiopia.<sup>26</sup> Similarly, claims to territory may be based on a number of different grounds, ranging from the traditional method of occupation or prescription to the newer concepts such as self-determination, with various political and legal factors, for example, geographical contiguity, historical demands and economic elements, possibly being relevant. These issues will be noted during the course of this chapter.

Apart from territory actually under the sovereignty of a state, international law also recognises territory over which there is no sovereign. Such territory is known as *terra nullius*. In addition, there is a category of territory called *res communis* which is (in contrast to *terra nullius*) generally not capable of being reduced to sovereign control. The prime instance of this is the high seas, which belong to no-one and may be used by all. Another example would be outer space. The concept of common heritage of mankind has also been raised and will be examined in this chapter.

## **New states and title to territory<sup>27</sup>**

The problem of how a state actually acquires its own territory in international law is a difficult one and one that may ultimately only be explained in legal-political terms. While with long-established states one may dismiss the question on the basis of recognition and acceptance, new states pose a different problem since, under classical international law, until a new state is created, there is no legal person in existence competent to hold title. None of the traditional modes of acquisition of territorial title satisfactorily resolves the dilemma, which has manifested itself particularly in the post-Second World War period with the onset of decolonisation. The international community has traditionally approached the problem of new states in terms of recognition, rather than in terms of acquisition of title to territory. This means that states have examined the relevant situation and upon ascertainment of the factual conditions have accorded recognition to the new entity as a subject of international law. There has been relatively little discussion of the method by which the new entity itself acquires the legal rights to its lands. The stress has instead been on compliance with factual requirements as to statehood coupled with the acceptance of this by other states.<sup>28</sup>

One approach to this problem has been to note that it is recognition that constitutes the state, and that the territory of the state is, upon recognition, accepted as the territory of a valid subject of international law irrespective of how it may have been acquired.<sup>29</sup> While this theory is not universally or widely accepted,<sup>30</sup> it does nevertheless underline how the emphasis has been upon recognition of a situation and not upon the method of obtaining the rights in law to the particular territory.<sup>31</sup>

One major factor that is relevant is the crucial importance of the doctrine of domestic jurisdiction. This constitutes the legal prohibition on interference within the internal mechanisms of an entity and emphasises the supremacy of a state within its own frontiers. Many of the factual and legal processes leading up to the emergence of a new state are therefore barred from international legal scrutiny and this has proved a deterrent to the search for the precise method by which a new entity obtains title to the territory in question.<sup>32</sup>

In recent years, however, the scope of the domestic jurisdiction rule has been altered. Discussions in international conferences and institutions, such as the United Nations, have actively concerned themselves with conditions in non-independent countries and it has been accepted that territorial sovereignty in the ordinary sense of the words does not really exist over mandate or trust territories.<sup>33</sup> This is beginning to encourage a re-examination of the procedures of acquiring title. However, the plea of domestic jurisdiction does at least illustrate the fact that not only international law but also municipal law is involved in the process of gaining independence.

There are basically two methods by which a new entity may gain its independence as a new state: by constitutional means, that is by agreement with the former controlling administration in an orderly devolution of power, or by non-constitutional means, usually by force, against the will of the previous sovereign.

The granting of independence according to the constitutional provisions of the former power may be achieved either by agreement between the former power and the accepted authorities of the emerging state, or by a purely internal piece of legislation by the previous sovereign. In many cases a combination of both procedures is adopted. For example, the independence of Burma was preceded by a Burmese–United Kingdom agreement and treaty (June and October, 1947) and by the Burma Independence Act of 1947 passed by the British legislature, providing for Burmese independence to take effect on 4 January 1948. In such cases what appears to be involved is a devolution or transfer of sovereignty from one power to another and the title to the territory will accordingly pass from the previous sovereign to the new administration in a conscious act of transference.

However, a different situation arises where the new entity gains its independence contrary to the wishes of the previous authority, whether by secession or revolution. It may be that the dispossessed sovereign may ultimately make an agreement with the new state recognising its new status, but in the meantime the new state might well be regarded by other states as a valid state under international law.<sup>34</sup>

The principle of self-determination is also very relevant here. Where a state gains its sovereignty in opposition to the former power, new facts are created and the

entity may well comply with the international requirements as to statehood, such as population, territory and government. Other states will then have to make a decision as to whether or not to recognise the new state and accept the legal consequences of this new status. But at this point a serious problem emerges.

For a unit to be regarded as a state under international law it must conform with the legal conditions as to settled population, a definable area of land and the capacity to enter into legal relations. However, under traditional international law, until one has a state one cannot talk in terms of title to the territory, because there does not exist any legal person capable of holding the legal title. So to discover the process of acquisition of title to territory, one has first to point to an established state. A few ideas have been put forward to explain this. One theory is to concentrate upon the factual emergence of the new state and to accept that since a new state is in existence upon a certain parcel of land, international law should look no further but accept the reality of possession at the moment of independence as denoting ownership, that is, legal title.<sup>35</sup> While in most cases this would prove adequate as far as other states are concerned, it can lead to problems where ownership is claimed of an area not in possession and it does little to answer the questions as to the international legal explanation of territorial sovereignty. Another approach is to turn to the constitutive theory of recognition, and declare that by recognition not only is a new state in the international community created, but its title to the territory upon which it is based is conclusively determined.<sup>36</sup> The disadvantage of this attitude is that it presupposes the acceptance of the constitutive theory by states in such circumstances, something which is controversial.<sup>37</sup>

One possibility that could be put forward here involves the abandonment of the classical rule that only states can acquire territorial sovereignty, and the substitution of a provision permitting a people to acquire sovereignty over the territory pending the establishment of the particular state. By this method the complicated theoretical issues related to recognition are avoided. Some support for this view can be found in the provision in the 1970 Declaration on Principles of International Law that the territory of a colony or other non-self-governing entity possesses, under the United Nations Charter, a status separate and distinct from that of the administering power, which exists until the people have exercised the right of self-determination.<sup>38</sup> However, the proposition is a controversial one and must remain tentative.<sup>39</sup>

## **The acquisition of additional territory**

The classical technique of categorising the various modes of acquisition of territory is based on Roman law and is not adequate.<sup>40</sup> Many of the leading cases do not specify a particular category or mode but tend to adopt an overall approach. Five

modes of acquisition are usually detailed: occupation of *terra nullius*, prescription, cession, accretion and subjugation (or conquest); and these are further divided into original and derivative modes.<sup>41</sup>

## Boundary treaties and boundary awards

Boundary treaties, whereby either additional territory is acquired or lost or uncertain boundaries are clarified by agreement between the states concerned, constitute a root of title in themselves. They constitute a special kind of treaty in that they establish an objective territorial regime valid *erga omnes*.<sup>42</sup> Such a regime will not only create rights binding also upon third states, but will exist outside of the particular boundary treaty and thus will continue even if the treaty in question itself ceases to apply.<sup>43</sup> The reason for this exceptional approach is to be found in the need for the stability of boundaries.<sup>44</sup> Further, the establishment or confirmation of a particular boundary line by way of referring in a treaty to an earlier document (which may or may not be binding of itself) laying down a line is also possible and as such invests the line in question with undoubted validity.<sup>45</sup> Indeed, this earlier document may also be a map upon which a line has been drawn.

Accordingly, many boundary disputes in fact revolve around the question of treaty interpretation. It is accepted that a treaty should be interpreted in the light of Articles 31 and 32 of the Vienna Convention on the Law of Treaties, 1969, 'in good faith, in accordance with the ordinary meaning to be given to its terms in their context and in the light of its object and purpose'.<sup>46</sup> Essentially the aim is to find the 'common will' of the parties, a concept which includes consideration of the subsequent conduct of the parties.<sup>47</sup> Since many of the boundary treaties that need to be interpreted long pre-date the coming into force of the Vienna Convention,<sup>48</sup> the problem of the applicability of its provisions has arisen. Courts have taken the view that the Convention in this respect at least represents customary international law, thus apparently obviating the problem.<sup>49</sup>

More generally, the difficulty in seeking to interpret both general concepts and geographical locations used in early treaties in the light of modern scientific knowledge has posed difficulties. In the *Botswana/Namibia* case, the Court, faced with the problem of identifying the 'main channel' of the River Chobe in the light of an 1890 treaty, emphasised that 'the present-day state of scientific knowledge' could be used in order to illuminate terms of that treaty.<sup>50</sup> In the *Eritrea/Ethiopia* case, the Boundary Commission referred to the principle of contemporaneity, by which it meant that a treaty should be interpreted by reference to the circumstances prevailing when the treaty was concluded. In particular, the determination of a geographical name (whether of a place or of a river) depended upon the

contemporary understanding of the location to which that name related at the time of the treaty. However, in seeking to understand what that was, reference to subsequent practice and to the objects of the treaty was often required.<sup>51</sup> In interpreting a boundary treaty, in particular in seeking to resolve ambiguities, the subsequent practice of the parties will be relevant. Even where such subsequent practice cannot in the circumstances constitute an authoritative interpretation of the treaty, it may be deemed to 'be useful' in the process of specifying the frontier in question.<sup>52</sup> However, where the boundary line as specified in the pertinent instrument is clear, it cannot be changed by a court in the process of interpreting delimitation provisions.<sup>53</sup>

Like boundary treaties, boundary awards may also constitute roots or sources of legal title to territory.<sup>54</sup> A decision by the International Court or arbitral tribunal allocating title to a particular territory or determining the boundary line as between two states will constitute establishment or confirmation of title that will be binding upon the parties themselves and for all practical purposes upon all states in the absence of maintained protest.<sup>55</sup> It is also possible that boundary allocation decisions that do not constitute international judicial or arbitral awards may be binding, providing that it can be shown that the parties consented to the initial decision.<sup>56</sup>

## Accretion<sup>57</sup>

This describes the geographical process by which new land is formed and becomes attached to existing land, as for example the creation of islands in a river mouth or the change in direction of a boundary river leaving dry land where it had formerly flowed. Where new land comes into being within the territory of a state, it forms part of the territory of the state and there is no problem. When, for example, an island emerged in the Pacific after an under-sea volcano erupted in January 1986, the UK government noted that: 'We understand the island emerged within the territorial sea of the Japanese island of Iwo Jima. We take it therefore to be Japanese territory.'<sup>58</sup>

As regards a change in the course of a river forming a boundary, a different situation is created depending whether it is imperceptible and slight or a violent shift (*avulsion*). In the latter case, the general rule is that the boundary stays at the same point along the original river bed.<sup>59</sup> However, where a gradual move has taken place the boundary may be shifted.<sup>60</sup> If the river is navigable, the boundary will be the middle of the navigable channel, whatever slight alterations have occurred, while if the river is not navigable the boundary will continue to be the middle of the river itself. This aspect of acquiring territory is relatively unimportant in international law but these rules have been applied in a number of cases involving disputes between

particular states of the United States of America.<sup>61</sup>

## Cession<sup>62</sup>

This involves the peaceful transfer of territory from one sovereign to another (with the intention that sovereignty should pass) and has often taken place within the framework of a peace treaty following a war. Indeed the orderly transference of sovereignty by agreement from a colonial or administering power to representatives of the indigenous population could be seen as a form of cession.

Because cession has the effect of replacing one sovereign by another<sup>63</sup> over a particular piece of territory, the acquiring state cannot possess more rights over the land than its predecessor had. This is an important point, so that where a third state has certain rights, for example, of passage over the territory, the new sovereign must respect them. It is expressed in the land law phrase that the burden of obligations runs with the land, not the owner. In other words, the rights of the territorial sovereign are derived from a previous sovereign, who could not, therefore, dispose of more than he had.

This contrasts with, for example, accretion which is treated as an original title, there having been no previous legal sovereign over the land.

The *Island of Palmas* case<sup>64</sup> emphasised this point. It concerned a dispute between the United States and the Netherlands. The claims of the United States were based on an 1898 treaty with Spain, which involved the cession of the island. It was emphasised by the arbitrator and accepted by the parties that Spain could not thereby convey to the Americans greater rights than it itself possessed.

The basis of cession lies in the intention of the relevant parties to transfer sovereignty over the territory in question.<sup>65</sup> Without this it cannot legally operate. Whether an actual delivery of the property is also required for a valid cession is less certain. It will depend on the circumstances of the case. For example, Austria ceded Venice to France in 1866, and that state within a few weeks ceded the territory to Italy. The cession to the Italian state through France was nonetheless valid.<sup>66</sup> In the *Iloilo* case,<sup>67</sup> it was held that the cession of the Philippines to the United States took place, on the facts of the case, upon the ratification of the Treaty of Paris of 1898, even though American troops had taken possession of the town of Iloilo two months prior to this.

Although instances of cession usually occur in an agreement following the conclusion of hostilities,<sup>68</sup> it can be accomplished in other circumstances, such as the purchase of Alaska by the United States in 1867 from Russia or the sale by Denmark of territories in the West Indies in 1916 to the United States. It may also

appear in exchanges of territories or pure gifts of territory.<sup>69</sup>

## Conquest and the use of force

How far a title based on force can be regarded as a valid, legal right recognisable by other states and enforceable within the international system is a crucial question. Ethical considerations are relevant and the principle that an illegal act cannot give birth to a right in law is well established in municipal law and is an essential component of an orderly society.

However, international law has sometimes to modify its reactions to the consequences of successful violations of its rules to take into account the exigencies of reality. The international community has accepted the results of illegal aggression in many cases by virtue of recognition.

Conquest, the act of defeating an opponent and occupying all or part of its territory, does not of itself constitute a basis of title to the land.<sup>70</sup> It does give the victor certain rights under international law as regards the territory, the rights of belligerent occupation,<sup>71</sup> but the territory remains subject to the legal title of the ousted sovereign.<sup>72</sup> Sovereignty as such does not merely pass by conquest to the occupying forces, although complex situations may arise where the legal status of the territory occupied is, in fact, in dispute prior to the conquest.<sup>73</sup>

Conquest, of course, may result from a legal or an illegal use of force. By the Kellogg–Briand Pact of 1928, war was outlawed as an instrument of national policy, and by article 2(4) of the United Nations Charter all member states must refrain from the threat or use of force against the territorial integrity or political independence of any state. However, force will be legitimate when exercised in self-defence.<sup>74</sup> Whatever the circumstances, it is not the successful use of violence that in international law constituted the valid method of acquiring territory. Under the classical rules, formal annexation of territory following upon an act of conquest would operate to pass title. It was a legal fiction employed to mask the conquest and transform it into a valid method of obtaining land under international law.<sup>75</sup> However, it is doubtful whether an annexation proclaimed while war is still in progress would have operated to pass a good title to territory. Only after a war is concluded could the juridical status of the disputed territory be finally determined. This follows from the rule that has developed to the effect that the control over the relevant territory by the state purporting to annex must be effective and that there must be no reasonable chance of the former sovereign regaining the land.

These points were emphasised by the Nuremberg War Crimes Tribunal after the Second World War, in discussing the various purported German annexations of 1939

and 1940. The Tribunal firmly declared that annexations taking place before the conclusion of a war were ineffective and invalid in international law.<sup>76</sup> Intention to annex was a crucial aspect of the equation so that, for example, the conquest of Germany by the Allies in 1945 did not give rise to an implied annexation by virtue of the legislative control actually exercised (as it could have done) because the Allies had specifically ruled out such a course in a joint declaration.<sup>77</sup> It is, however, clear today that the acquisition of territory by force alone is illegal under international law. This may be stated in view of article 2(4) of the UN Charter and other practice. Security Council resolution 242, for example, emphasised the ‘inadmissibility of the acquisition of territory by war’, while the 1970 Declaration of Principles of International Law adopted by the UN General Assembly provides that:

the territory of a state shall not be the object of acquisition by another state resulting from the threat or use of force. No territorial acquisition resulting from the threat or use of force shall be recognised as legal.<sup>78</sup>

In Security Council resolution 662 (1990), adopted unanimously, the Council decided that the declared Iraqi annexation of Kuwait ‘under any form and whatever pretext has no legal validity and is considered null and void’. All states and institutions were called upon not to recognise the annexation and to refrain from actions which might be interpreted as indirect recognition.<sup>79</sup>

Acquisition of territory following an armed conflict would require further action of an international nature in addition to domestic legislation to annex. Such further necessary action would be in the form either of a treaty of cession by the former sovereign or of international recognition.<sup>80</sup>

## **The exercise of effective control**

It is customary in the literature to treat the modes of occupation and prescription as separate categories. However, there are several crucial factors that link the concepts, so that the acquisition of territory by virtue of these methods, based as they are upon the exercise of effective control, is best examined within the same broad framework. The traditional definition of these two modes will be noted first.

Occupation is a method of acquiring territory which belongs to no one (*terra nullius*) and which may be acquired by a state in certain situations. The occupation must be by a state and not by private individuals, it must be effective and it must be intended as a claim of sovereignty over the area. The high seas cannot be occupied in this manner for they are *res communis*, but vacant land may be subjected to the sovereignty of a claimant state. It relates primarily to uninhabited territories and

islands, but may also apply to certain inhabited lands.

The issue was raised in the *Western Sahara* case before the International Court of Justice.<sup>81</sup> The question was asked as to whether the territory in question had been *terra nullius* at the time of colonisation. It was emphasised by the Court that the concept of *terra nullius* was a legal term of art used in connection with the mode of acquisition of territory known as 'occupation'.<sup>82</sup> The latter mode was defined legally as an original means of peaceably acquiring sovereignty over territory otherwise than by cession or succession.<sup>83</sup> In an important statement, the Court unambiguously asserted that the state practice of the relevant period (i.e. the period of colonisation) indicated that territories inhabited by tribes or peoples having a social and political organisation were not regarded as *terrae nullius*.<sup>84</sup> Further, international case-law has recognised that sovereign title may be suspended for a period of time in circumstances that do not lead to the status of *terra nullius*. Such indeterminacy could be resolved by the relevant parties at a relevant time.<sup>85</sup>

In fact the majority of territories brought under European control were regarded as acquired by means of cessions, especially in Asia and Africa.<sup>86</sup> However, there were instances of title by occupation, for example Australia, and many sparsely inhabited islands.

Occupation, both in the normal sense of the word and in its legal meaning, was often preceded by discovery, that is the realisation of the existence of a particular piece of land.<sup>87</sup> But mere realisation or sighting was never considered (except for periods in the fifteenth and sixteenth centuries and this is not undisputed) as sufficient to constitute title to territory. Something more was required and this took the form of a symbolic act of taking possession, whether it be by the raising of flags or by solemn proclamations or by more sophisticated ritual expressions. As time passed, the conditions changed and the arbitrator in the *Island of Palmas* case pointed to the modern effect of discovery as merely giving an inchoate title which had to be completed within a reasonable time by the effective occupation of the relevant region. Discovery only put other states on notice that the claimant state had a prior interest in the territory which, to become legally meaningful, had to be supplemented by effective occupation within a certain period.<sup>88</sup>

Prescription<sup>89</sup> is a mode of establishing title to territory which is not *terra nullius* and which has been obtained either unlawfully or in circumstances wherein the legality of the acquisition cannot be demonstrated. It is the legitimisation of a doubtful title by the passage of time and the presumed acquiescence of the former sovereign, and it reflects the need for stability felt within the international system by recognising that territory in the possession of a state for a long period of time and uncontested cannot be taken away from that state without serious consequences for

the international order. It is the legitimisation of a fact. If it were not for some such doctrine, the title of many states to their territory would be jeopardised.<sup>90</sup> The International Court in the *Botswana/Namibia* case, while making no determination of its own, noted that the two parties were agreed that acquisitive prescription was recognised in international law and further agreed on the criteria to be satisfied for the establishment of such a title, viz. the possession must be *à titre de souverain*, peaceful and uninterrupted, public and endure for a certain length of time. The Court did not contradict this position.<sup>91</sup>

Prescription differs from occupation in that it relates to territory which has previously been under the sovereignty of a state. In spite of this, both concepts are similar in that they may require evidence of sovereign acts by a state over a period of time. And although distinct in theory, in practice these concepts are often indistinct since sovereignty over an area may lapse and give rise to doubts whether an abandonment has taken place,<sup>92</sup> rendering the territory *terra nullius*.

In fact, most cases do not fall into such clear theoretical categories as occupation or prescription. Particular modes of acquisition that can be unambiguously related to the classic definitions tend not to be specified. Most cases involve contesting claims by states, where both (or possibly all) the parties have performed some sovereign acts. As in the instance of occupation, so prescription too requires that the possession forming the basis of the title must be by virtue of the authority of the state or *à titre de souverain*, and not a manifestation of purely individual effort unrelated to the state's sovereign claims. And this possession must be public so that all interested states can be made aware of it.

This latter requirement also flows logically from the necessity for the possession to be peaceful and uninterrupted, and reflects the vital point that prescription rests upon the implied consent of the former sovereign to the new state of affairs. This means that protests by the dispossessed sovereign may completely block any prescriptive claim.<sup>93</sup>

In the *Chamizal* arbitration<sup>94</sup> between the United States and Mexico, the Rio Grande River forming the border between the parties changed course and the United States claimed the ground between the old and the new river beds partly on the basis of peaceful and uninterrupted possession. This claim was dismissed in view of the constant protests by Mexico and in the light of a Convention signed by both parties that there existed a dispute as to the boundary which had to be resolved. The fact that Mexico did not go to war over the issue was not of itself sufficient to make the possession of the tract of land by the United States peaceful.

Thus acquiescence in the case of prescription, whether express or implied from all the relevant circumstances, is essential, whereas in the case of occupation it is

merely an evidential point reinforcing the existence of an effective occupation, but not constituting the essence of the legal claim.

Precisely what form the protest is to take is open to question but resort to force is not acceptable in modern international law, especially since the 1928 Kellogg–Briand Pact and article 2(4) of the United Nations Charter.<sup>95</sup> The bringing of a matter before the United Nations or the International Court of Justice will be conclusive as to the existence of the dispute and thus of the reality of the protests, but diplomatic protests will probably be sufficient. This, however, is not accepted by all academic writers, and it may well be that in serious disputes further steps should be taken such as severing diplomatic relations or proposing arbitration or judicial settlement.<sup>96</sup> What is clear is that anything less than sustained and credible protests may well risk the title of the dispossessed party.

The requirement of a ‘reasonable period’ of possession is similarly imprecise and it is not possible to point to any defined length of time.<sup>97</sup> It will depend, as so much else, upon all the circumstances of the case, including the nature of the territory and the absence or presence of any competing claims.

In the *Minquiers and Ecrehos* case,<sup>98</sup> concerning disputed sovereignty over a group of islets and rocks in the English Channel, claimed by both France and the United Kingdom, the International Court of Justice exhaustively examined the history of the region since 1066. However, its decision was based primarily on relatively recent acts relating to the exercise of jurisdiction and local administration as well as the nature of legislative enactments referable to the territory in question. And upon these grounds, British sovereignty was upheld. The sovereign acts of the United Kingdom relating to the islets far outweighed any such activities by the French authorities and accordingly the claims of the latter were dismissed.

As in other cases, judgment was given not on the basis of clearly defined categories of occupation or prescription, but rather in the light of the balance of competing state activities.

De Visscher has attempted to render the theoretical classifications more consonant with the practical realities by the introduction of the concept of historical consolidation.<sup>99</sup> This idea is founded on proven long use, which reflects a complex of interests and relations resulting in the acquisition of territory (including parts of the sea). Such a grouping of interests and relations is considered by the courts in reaching a decision as of more importance than the mere passage of time, and historical consolidation may apply to *terra nullius* as well as to territories previously occupied. Thus it can be distinguished from prescription. It differs from occupation in that the concept has relevance to the acquisition of parts of the sea, as well as of land. And it may be brought into existence not only by acquiescence and consent, but

also by the absence of protest over a reasonable period by relevant states.<sup>100</sup>

However, de Visscher's discussion, based on the *Anglo-Norwegian Fisheries* case,<sup>101</sup> does fail to note the important distinction between the acquisition of territory in accordance with the rules of international law, and the acquisition of territory as a permitted exception to the generally accepted legal principles. The passage in the *Anglo-Norwegian Fisheries* case relied upon<sup>102</sup> is really concerned with general acquiescence with regard to a maritime area, while the criticism has been made<sup>103</sup> that de Visscher has over-emphasised the aspect of 'complex of interests and relations which *in themselves* have the effect of attaching a territory or an expanse of sea to a given state'.<sup>104</sup> Effectiveness, therefore, rather than consolidation would be the appropriate term. Both occupation and prescription rely primarily upon effective possession and control. The element of time is here also relevant as it affects the effectiveness of control.

## ***Intertemporal law***<sup>105</sup>

One question that arises is the problem of changing conditions related to particular principles of international law, in other words the relevant time period at which to ascertain the legal rights and obligations in question. This can cause considerable difficulties since a territorial title may be valid under, for example, sixteenth-century legal doctrines but ineffective under nineteenth-century developments. The general rule in such circumstances is that in a dispute the claim or situation in question (or relevant treaty, for example)<sup>106</sup> has to be examined according to the conditions and rules in existence at the time it was made and not at a later date. This meant, for example, that in the *Island of Palmas* case,<sup>107</sup> the Spanish claim to title by discovery, which the United States declared it had inherited, had to be tested in the light of international legal principles in the sixteenth century when the discovery was made. This aspect of the principle is predicated upon a presumption of, and need for, stability.<sup>108</sup>

But it was also noted in this case that while the creation of particular rights was dependent upon the international law of the time, the continued existence of such rights depended upon their according with the evolving conditions of a developing legal system, although this stringent test would not be utilised in the case of territories with an 'established order of things'.<sup>109</sup> This proviso has in practice been carefully and flexibly interpreted within the context of all the relevant rules relating to the acquisition of territory, including recognition and acquiescence.<sup>110</sup> However, the Court in the *Aegean Sea Continental Shelf* case<sup>111</sup> declared that the phrase 'disputes relating to the territorial status of Greece' contained in a Greek reservation to the 1928 Kellogg-Briand Pact had to be interpreted 'in accordance with the rules

of international law as they exist today, and not as they existed in 1931'. The evolution of international law concerning the continental shelf, therefore, had to be considered, so that the territorial status of Greece was taken to include its continental shelf, although that concept was completely unknown in the 1920s. How far this aspect of the principle of international law may be extended is highly controversial. The better view is to see it as one element in the bundle of factors relevant to the determination of effective control, but one that must be applied with care.<sup>112</sup>

## ***Critical date***

In certain situations there may exist a determining moment at which it might be inferred that the rights of the parties have crystallised so that acts after that date cannot alter the legal position.<sup>113</sup> Such a moment might be the date of a particular treaty where its provisions are at issue<sup>114</sup> or the date of occupation of territory.<sup>115</sup> It is not correct that there will or should always be such a critical date in territorial disputes, but where there is, acts undertaken after that date will not be taken into consideration, unless such acts are a normal continuation of prior acts and are not undertaken for the purpose of improving the legal position of the party relying on them.<sup>116</sup>

The concept of a critical date is of especial relevance with regard to the doctrine of *uti possidetis*, which posits that a new state has the boundaries of the predecessor entity, so that the moment of independence itself is invariably the critical date.<sup>117</sup> This does not preclude the possibility that the relevant territorial situation or rights had crystallised at an earlier time, in the sense of having become established and not altered subsequently.<sup>118</sup> Where there is more than one state involved, then the date of later independence<sup>119</sup> or possibly the dates of the independence of the respective states,<sup>120</sup> may be taken depending on the circumstances.<sup>121</sup> Further, it is possible for there to be different critical dates for different circumstances (for example, land and maritime disputes within the same case).<sup>122</sup> However, the date of independence may simply mark the date of succession to boundaries which have been established with binding force by earlier instruments.<sup>123</sup>

The moment of independence may not be 'critical' for these purposes for several possible reasons. There may be a dispute between the parties as to whether the date of independence or the date of the last exercise of jurisdiction for administrative organisational purposes by the former sovereign is the more appropriate date<sup>124</sup> or the *uti possidetis* line may in some circumstances only be determined upon a consideration of materials appearing later than the date of independence,<sup>125</sup> or such a 'critical date' may have been moved to a later date than that of independence by a

subsequent treaty<sup>126</sup> or by an adjudication award.<sup>127</sup> The importance of the critical date concept, thus, is relative and depends entirely upon the circumstances of the case.<sup>128</sup>

## ***Sovereign activities (effectivités)***

The exercise of effective authority, therefore, is the crucial element. As Huber argued, ‘the actual continuous and peaceful display of state functions is in case of dispute the sound and natural criterion of territorial sovereignty’.<sup>129</sup>

However, control, although needing to be effective, does not necessarily have to amount to possession and settlement of all of the territory claimed. Precisely what acts of sovereignty are necessary to found title will depend in each instance upon all the relevant circumstances of the case, including the nature of the territory involved, the amount of opposition (if any) that such acts on the part of the claimant state have aroused, and international reaction.

Indeed in international law many titles will be deemed to exist not as absolute but as relative concepts. The state succeeding in its claim for sovereignty over *terra nullius* over the claims of other states will in most cases have proved not an absolute title, but one relatively better than that maintained by competing states and one that may take into account issues such as geography and international responses.<sup>130</sup> The Court noted in the *Eastern Greenland* case that ‘It is impossible to read the records of the decisions in cases as to territorial sovereignty without observing that in many cases the tribunal has been satisfied with very little in the way of the actual exercise of sovereign rights, provided that the other state could not make out a superior claim. This is particularly true in the case of claims to sovereignty over areas in thinly populated or unsettled countries.’<sup>131</sup> However, the arbitral tribunal in *Eritrea/Yemen* emphasised that the issue did not turn solely upon relativity since ‘there must be some absolute minimum requirement’ for the acquisition of territorial sovereignty.<sup>132</sup>

In the *Island of Palmas* arbitration<sup>133</sup> the dispute concerned sovereignty over a particular island in the Pacific. The United States declared that, since by a treaty of 1898 Spain had ceded to it all Spanish rights possessed in that region and since that included the island discovered by Spain, the United States of America therefore had a good title. The Netherlands, on the other hand, claimed the territory on the basis of the exercise of various rights of sovereignty over it since the seventeenth century. The arbitrator, Max Huber, in a judgment which discussed the whole nature of territorial sovereignty, dismissed the American claims derived from the Spanish discovery as not effective to found title.<sup>134</sup> Huber declared that the Netherlands possessed sovereignty on the basis of ‘the actual continuous and peaceful display of

state functions' evidenced by various administrative acts performed over the centuries.<sup>135</sup> It was also emphasised that manifestations of territorial sovereignty may assume different forms, according to conditions of time and place. Indeed, 'the intermittence and discontinuity compatible with the maintenance of the right necessarily differ according as inhabited or uninhabited regions are involved'. Additionally, geographical factors were re-levant.<sup>136</sup>

The *Clipperton Island* arbitration<sup>137</sup> concerned a dispute between France and Mexico over an uninhabited island. The arbitrator emphasised that the actual, and not the nominal, taking of possession was a necessary condition of occupation, but noted that such taking of possession may be undertaken in different ways depending upon the nature of the territory concerned. In this case, a proclamation of sovereignty by a French naval officer later published in Honolulu was deemed sufficient to create a valid title. Relevant to this decision was the weakness of the Mexican claims to the guano-rich island, as well as the uninhabited and inhospitable nature of the territory.

These two cases, together with the *Eastern Greenland* case,<sup>138</sup> reveal that the effectiveness of the occupation may indeed be relative and may in certain rare circumstances be little more than symbolic.<sup>139</sup> In the *Eastern Greenland* case before the Permanent Court of International Justice, both Norway and Denmark claimed sovereignty over Eastern Greenland. Denmark had colonies in other parts of Greenland and had granted concessions in the uninhabited Eastern sector. In addition, it proclaimed that all treaties and legislation regarding Greenland covered the territory as a whole, as for example its establishment of the width of the territorial sea, and it sought to have its title to all of the territory recognised by other states. The Court felt that these acts were sufficient upon which to base a good title and were superior to various Norwegian actions such as the wintering of expeditions and the erection of a wireless station in Eastern Greenland, against which Denmark had protested. It is also to be noted that it was not until 1931 that Norway actually claimed the territory.

Such activity in establishing a claim to territory must be performed by the state in the exercise of sovereign powers (*à titre de souverain*)<sup>140</sup> or by individuals whose actions are subsequently ratified by their state,<sup>141</sup> or by corporations or companies permitted by the state to engage in such operations and thus performed on behalf of the sovereign.<sup>142</sup> Otherwise, any acts undertaken are of no legal consequence.<sup>143</sup> Another relevant factor, although one of uncertain strength, is the requirement of the intention by the state in performing various activities to assert claim in its sovereign capacity. In other words the facts are created pursuant to the will of the state to acquire sovereignty. This point was stressed in the *Eastern Greenland* case,<sup>144</sup> but

appears not to have been considered as of first importance in the *Island of Palmas* case<sup>145</sup> or in the *Minquiers and Ecrehos* case,<sup>146</sup> where concern centred upon the nature and extent of the actual actions carried out by the contending states. Whatever the precise role of this subjective element, some connection between the actions undertaken and the assertion of sovereignty is necessary.

Account will also be taken of the nature of the exercise of the sovereignty in question, so that in the *Rann of Kutch* case, it was noted that:

the rights and duties which by law and custom are inherent in and characteristic of sovereignty present considerable variations in different circumstances according to time and place, and in the context of various political systems.<sup>147</sup>

Similarly, the Court was willing to take into account the special characteristics of the Moroccan state at the relevant time in the *Western Sahara* case<sup>148</sup> in the context of the display of sovereign authority, but it was the exercise of sovereignty which constituted the crucial factor. While international law does appear to accept a notion of geographical or natural unity of particular areas, whereby sovereignty exercised over a certain area will raise the presumption of title with regard to an outlying portion of the territory comprised within the claimed unity,<sup>149</sup> it is important not to overstate this. It operates to raise a presumption and no more and that within the wider concept of display of effective sovereignty which need not apply equally to all parts of the territory.<sup>150</sup> Neither geographical unity nor contiguity are as such sources of title with regard to all areas contained within the area in question, nor is the proximity of islands to the mainland determinative as such of the question of legal title.<sup>151</sup> The Tribunal in the *Eritrea/Yemen* case felt able to consider separately the legal situation with regard to sub-groups existing within such natural unities,<sup>152</sup> as did the Boundary Commission in the *Eritrea/Ethiopia* case.<sup>153</sup> However, the significance in law of state activities or *effectivités* will depend upon the existence or not of a legal title to the territory. Where there is such a valid legal title, this will have pre-eminence and *effectivités* may play a confirmatory role. However, where the *effectivités* are in contradiction to the title, the latter will have pre-eminence. In the absence of any legal title, then *effectivités* must invariably be taken into consideration, while where the legal title is not capable of exactly defining the relevant territorial limits, *effectivités* then play an essential role in showing how the title is interpreted in practice.<sup>154</sup> Accordingly, examples of state practice may confirm or complete but not contradict legal title established, for example, by boundary treaties.<sup>155</sup> In the absence of any clear legal title to any area, state practice comes into its own as a law-establishing mechanism. But its importance is always contextual in that it relates to the nature of the territory and the nature of competing

state claims.<sup>156</sup> Relative state practice would include legislative acts or acts of administrative control, acts relating to the application and enforcement of criminal or civil law, acts regulating immigration, acts regulating fishing and other economic activities, naval patrols and search and rescue operations,<sup>157</sup> as well as the conduct of enquiries.<sup>158</sup>

## ***The role of subsequent conduct: recognition, acquiescence and estoppel***

Subsequent conduct may be relevant in a number of ways: first, as a method of determining the true interpretation of the relevant boundary instrument in the sense of the intention of the parties;<sup>159</sup> secondly, as a method of resolving an uncertain disposition or situation, for example, whether a particular area did or did not fall within the colonial territory in question for purposes of determining the *uti possidetis* line<sup>160</sup> or thirdly, as a method of modifying such an instrument or pre-existing arrangement. The *Eritrea/Ethiopia* Boundary Commission explained the general principle that ‘the effect of subsequent conduct may be so clear in relation to matters that appear to be the subject of a given treaty that the application of an otherwise pertinent treaty provision may be varied, or may even cease to control the situation, regardless of its original meaning’.<sup>161</sup> The various manifestations of the subsequent conduct of relevant parties have a common foundation in that they all rest to a stronger or weaker extent upon the notion of consent.<sup>162</sup> They reflect expressly or impliedly the presumed will of a state, which in turn may in some situations prove of great importance in the acquisition of title to territory. However, there are significant theoretical differences between the three concepts (recognition, acquiescence and estoppel), even if in practice the dividing lines are often blurred. In any event, they flow to some extent from the fundamental principles of good faith and equity.

Recognition is a positive act by a state accepting a particular situation and, even though it may be implied from all the relevant circumstances, it is nevertheless an affirmation of the existence of a specific factual state of affairs,<sup>163</sup> even if that accepted situation is inconsistent with the term in a treaty.<sup>164</sup> Acquiescence, on the other hand, occurs in circumstances where a protest is called for and does not happen<sup>165</sup> or does not happen in time in the circumstances.<sup>166</sup> In other words, a situation arises which would seem to require a response denoting disagreement and, since this does not transpire, the state making no objection is understood to have accepted the new situation.<sup>167</sup> The idea of estoppel in general is that a party which has made or consented to a particular statement upon which another party relies in subsequent activity to its detriment or the other’s benefit cannot thereupon change

its position.<sup>168</sup> This rests also upon the notion of preclusion.<sup>169</sup>

While, of course, the consent of a ceding state to the cession is essential, the attitude adopted by other states is purely peripheral and will not affect the legality of the transaction. Similarly, in cases of the acquisition of title over *terra nullius*, the acquiescence of other states is not strictly relevant although of useful evidential effect.<sup>170</sup> However, where two or more states have asserted competing claims, the role of consent by third parties is much enhanced. In the *Eastern Greenland* case,<sup>171</sup> the Court noted that Denmark was entitled to rely upon treaties made with other states (apart from Norway) in so far as these were evidence of recognition of Danish sovereignty over all of Greenland.

Recognition and acquiescence are also important in cases of acquisition of control contrary to the will of the former sovereign. Where the possession of the territory is accompanied by emphatic protests on the part of the former sovereign, no title by prescription can arise, for such title is founded upon the acquiescence of the dispossessed state, and in such circumstances consent by third states is of little consequence. However, over a period of time recognition may ultimately validate a defective title, although much will depend upon the circumstances, including the attitude of the former sovereign. Where the territory involved is part of the high seas (i.e. *res communis*), acquiescence by the generality of states may affect the subjection of any part of it to another's sovereignty, particularly by raising an estoppel.<sup>172</sup>

Acquiescence and recognition<sup>173</sup> are also relevant where the prescriptive title is based on what is called immemorial possession, that is, the origin of the particular situation is shrouded in doubt and may have been lawful or unlawful but is deemed to be lawful in the light of general acquiescence by the international community or particular acquiescence by a relevant other state. Accordingly, acquiescence may constitute evidence reinforcing a title based upon effective possession and control, rendering it definitive.<sup>174</sup> In such cases, failure to protest would be particularly significant.<sup>175</sup>

Estoppel is a legal technique whereby states deemed to have consented to a state of affairs cannot afterwards alter their position.<sup>176</sup> It has been noted that a party relying on estoppel must show, among other things, that it has taken distinct actions in reliance upon the other party's statement.<sup>177</sup> Although it cannot found title by itself, it is of evidential and often of practical importance. Estoppel may arise either by means of a prior recognition or acquiescence, but the nature of the consenting state's interest is vital. Where, for example, two states put forward conflicting claims to territory, any acceptance by one of the other's position will serve as a bar to a renewal of contradictory assertions. This was illustrated in the *Eastern*

*Greenland* case,<sup>178</sup> where the Court regarded the Norwegian acceptance of treaties with Denmark, which incorporated Danish claims to all of Greenland, as preventing Norway from contesting Danish sovereignty over the area.

The leading case on estoppel is the *Temple of Preah Vihear*<sup>179</sup> which concerned a border dispute between Cambodia and Thailand. The frontier was the subject of a treaty in 1904 between Thailand and France (as sovereign over French Indo-China which included Cambodia) which provided for a delimitation commission. The border was duly surveyed but was ambiguous as to the siting of the Preah Vihear temple area. Thailand called for a map from the French authorities and this placed the area within Cambodia. The Thai government accepted the map and asked for further copies.<sup>180</sup> A number of other incidents took place, including a visit by a Thai prince to the temple area for an official reception with the French flag clearly flying there, which convinced the International Court that Thailand had tacitly accepted French sovereignty over the disputed area.<sup>181</sup> In other words, Thailand was estopped by its conduct from claiming that it contested the frontier in the temple area. However, it is to be noted that estoppel in that case was one element in a complexity of relevant principles which included prescription and treaty interpretation. The case also seemed to show that in situations of uncertainty and ambiguity, the doctrines of acquiescence and estoppel come into their own,<sup>182</sup> but it would not appear correct to refer to estoppel as a rule of substantive law.<sup>183</sup> The extent to which silence as such may create an estoppel is unclear and much will depend upon the surrounding circumstances, in particular the notoriety of the situation, the length of silence maintained in the light of that notoriety and the type of conduct that would be seen as reasonable in the international community in order to safeguard a legal interest.<sup>184</sup> The existence of an estoppel should not, however, be lightly assumed.<sup>185</sup>

Subsequent conduct itself would in the material sense include the examples of the exercise of sovereign activity, various diplomatic and similar exchanges and records, and maps. So far as the status of maps is concerned, this will depend upon the facts of their production as an item of evidence. It was noted in the *Burkina Faso/Mali* case that ‘maps are only extrinsic evidence of varying reliability or unreliability which may be used, along with other evidence of a circumstantial kind, to establish or reconstitute the real facts’.<sup>186</sup> In such circumstances, courts have often exhibited a degree of caution, taking into account, for example, that some maps may be politically self-serving and that topographic knowledge at the time the map is made may be unreliable.<sup>187</sup> However, maps annexed to treaties illustrating the boundary so delimited will be accepted as authoritative.<sup>188</sup> Where there is a conflict between the text of an instrument and an annexed map, all the relevant circumstances will need to be considered in order to arrive at a correct understanding of the intentions of the authors of the relevant delimitation

instrument.<sup>189</sup> Beyond this, it is possible that cartographic material, prepared in order to help draft a delimitation instrument, may itself be used as assistance in seeking to determine the intentions of the parties where the text itself is ambiguous, while more generally the effect of a map will in other circumstances vary according to a number of factors ranging from its provenance and cartographic quality to its consistency with other maps and the use made of it by the parties.<sup>190</sup>

One argument has been that peaceful possession coupled with acts of administration may in the absence of protest found the basis of title by way of 'historical consolidation'.<sup>191</sup> However, the International Court has emphasised that this doctrine is 'highly controversial and cannot replace the established modes of acquisition of title under international law'. It was also noted that a period of such activity of some twenty years was 'far too short, even according to the theory relied on it'.<sup>192</sup>

## Conclusions

It will be clear from the above that apart from the modes of acquisition that rely purely on the consent of the state and the consequences of sovereignty (cession or accretion), the method of acquiring additional territory is by the sovereign exercise of effective control. Both occupation and prescription are primarily based upon effective possession and, although the time element is a factor in prescription, this in fact is really concerned with the effectiveness of control.

The principle of effective control applies in different ways to different situations, but its essence is that 'the continuous and peaceful display of territorial sovereignty...is as good as title'.<sup>193</sup> Such control has to be deliberate sovereign action, but what will amount to effectiveness is relative and will depend upon, for example, the geographical nature of the region, the existence or not of competing claims and other relevant factors, such as international reaction.<sup>194</sup> It will not be necessary for such control to be equally effective throughout the region.<sup>195</sup> The doctrine of effectiveness has displaced earlier doctrines relating to discovery and symbolic annexation as in themselves sufficient to generate title.<sup>196</sup> Effectiveness has also a temporal as well as a spatial dimension as the doctrine of intertemporal law has emphasised, while clearly the public or open nature of the control is essential. The acquiescence of a party directly involved is also a very important factor in providing evidence of the effectiveness of control. Where a dispossessed sovereign disputes the control exercised by a new sovereign, title can hardly pass. Effectiveness is related to the international system as a whole, so that mere possession by force is not the sole determinant of title. This factor also emphasises and justifies the role played by recognition.

Bilateral recognition is important as evidence of effective control and should be regarded as part of that principle. International recognition, however, involves not only a means of creating rules of international law in terms of practice and consent of states, but may validate situations of dubious origin. A series of recognitions may possibly validate an unlawful acquisition of territory and could similarly prevent effective control from ever hardening into title.<sup>197</sup> The significance of UN recognition is self-evident, so that the UN Security Council itself could adopt a binding resolution ending a territorial dispute by determining the boundary in question.<sup>198</sup>

Sovereign territory may not only be acquired, it may also be lost in ways that essentially mirror the modes of acquisition. Territory may be lost by express declaration or conduct such as a treaty of cession or acceptance of secession; by loss of territory by erosion or natural geographic activity or by acquiescence through prescription. Further, territory may be abandoned, but in order for this to operate both the physical act of abandonment and the intention to surrender title are required.<sup>199</sup>

## **Territorial integrity, self-determination and sundry claims**

There are a number of other concepts which may be of some relevance in territorial situations ranging from self-determination to historical and geographical claims. These may not necessarily be legal principles as such but rather purely political or moral expressions. Although they may be extremely persuasive within the international political order, they would not necessarily be juridically effective. One of the core principles of the international system is the need for stability and finality in boundary questions and much flows from this.<sup>200</sup> Case-law has long maintained this principle.<sup>201</sup> Reflective of this concept is the principle of territorial integrity.

The principle of the territorial integrity of states is well established and constitutes a foundational principle of international law.<sup>202</sup> It is protected by a series of consequential rules prohibiting interference within the domestic jurisdiction of states as, for example, article 2(7) of the United Nations Charter, and forbidding the threat or use of force against the territorial integrity and political independence of states, particularly article 2(4) of the United Nations Charter. This principle has been particularly emphasised by Third World states and also by other regions.<sup>203</sup>

However, it does not apply where the territorial dispute centres upon uncertain frontier demarcations. In addition, the principle appears to conflict on the face of it

with another principle of international law, that of the self-determination of peoples.<sup>204</sup>

This principle, noted in the United Nations Charter and emphasised in the 1960 Colonial Declaration, the 1966 International Covenants on Human Rights and the 1970 Declaration on Principles of International Law, can be regarded as a rule of international law in the light of, *inter alia*, the number and character of United Nations declarations and resolutions and actual state practice in the process of decolonisation. However, it has been interpreted as referring only to the inhabitants of non-independent territories.<sup>205</sup> Practice has not supported its application as a principle conferring the right to secede upon identifiable groups within already independent states.<sup>206</sup> The Canadian Supreme Court in the *Reference Re Secession of Quebec* case declared that ‘international law expects that the right to self-determination will be exercised by peoples within the framework of existing sovereign states and consistently with the maintenance of the territorial integrity of those states’,<sup>207</sup> and that the right to unilateral secession ‘arises only in the most extreme of cases and, even then, under carefully defined circumstances’.<sup>208</sup> The only arguable exception to this rule that the right to external self-determination applies only to colonial situations (and arguably situations of occupation) might be where the group in question is subject to ‘extreme and unremitting persecution’ coupled with the ‘lack of any reasonable prospect for reasonable challenge’,<sup>209</sup> but even this is controversial not least in view of definitional difficulties.<sup>210</sup> The situation of secession is probably best dealt with in international law within the framework of a process of claim, effective control and international recognition. Thus there is no international law right of secession held by groups within independent states. Similarly, there is no international law duty upon such groups not to secede. It is a matter for the relevant domestic law. Thus Crimea’s claimed secession from Ukraine in March 2014 has to be seen as contrary to the applicable domestic law, which does not permit regions to secede in the absence of an all-Ukrainian referendum (article 73 of the Ukrainian constitution). The secession was not contrary to international law as such. However, Russia’s threat or use of force in the process of taking control of Crimea may be seen as at the least intervention in the internal affairs of another state and at most an act of aggression.<sup>211</sup> The context of this situation also includes the violation of treaties to which Russia is a party which guarantee the sovereignty and territorial integrity of Ukraine.<sup>212</sup> The decision by Russia to annex Crimea on 18 March 2014<sup>213</sup> was contrary to international law being in violation of Ukraine’s sovereignty and territorial integrity.<sup>214</sup> However, in certain situations there may be a pertinent Security Council decision which calls upon particular groups seeking to secede from a specific independent state to respect the national unity and territorial integrity of that state. In such a case, it may be said

there does exist an international legal duty not to secede.<sup>215</sup> This would be subject to any agreement to the contrary by the parties in question, for example, the agreed independence of South Sudan from Sudan in 2011.

Accordingly the principle of self-determination as generally accepted fits in with the concept of territorial integrity,<sup>216</sup> as it cannot apply once a colony or trust territory attains sovereignty and independence, except, arguably, in extreme circumstances. Probably the most prominent exponent of the relevance of self-determination to post-independence situations has been Somalia with its claims to those parts of Ethiopia and Kenya populated by Somali tribes, but that country received very little support for its demands.<sup>217</sup>

Self-determination cannot be used to further larger territorial claims in defiance of internationally accepted boundaries of sovereign states, but it may be of some use in resolving cases of disputed and uncertain frontier lines on the basis of the wishes of the inhabitants. In addition, one may point to the need to take account of the interests of the local population where the determination of the boundary has resulted in a shift in the line, at least in the view of one of the parties.<sup>218</sup> Geographical claims have been raised throughout history.<sup>219</sup> France for long maintained that its natural frontier in the east was the west bank of the Rhine, and the European powers in establishing their presence upon African coastal areas often claimed extensive hinterland territories. Much utilised also was the doctrine of contiguity, whereby areas were claimed on the basis of the occupation of territories of which they formed a geographical continuation. However, such claims, although relevant in discussing the effectivity and limits of occupation, are not able in themselves to found title, and whether or not such claims will be taken into account at all will depend upon the nature of the territory and the strength of competing claims.<sup>220</sup> A rather special case is that of islands close to the coast of the mainland. The Tribunal in *Eritrea/Yemen* stated that: 'There is a strong presumption that islands within the twelve-mile coastal belt will belong to the coastal state', to be rebutted only by evidence of a superior title.<sup>221</sup>

Of some similarity are claims based upon historical grounds.<sup>222</sup> This was one of the grounds upon which Iraq sought to justify its invasion and annexation of the neighbouring state of Kuwait in August 1990,<sup>223</sup> although the response of the United Nations demonstrated that such arguments were unacceptable to the world community as a whole.<sup>224</sup> Morocco too has made extensive claims to Mauritania, Western Sahara and parts of Algeria as territories historically belonging to the old Moroccan empire.<sup>225</sup> But such arguments are essentially political and are of but little legal relevance. The International Court of Justice in the *Western Sahara* case<sup>226</sup> of 1975 accepted the existence of historical legal ties between the tribes of

that area and Morocco and Mauritania, but declared that they were not of such a nature as to override the right of the inhabitants of the colony to self-determination and independence.<sup>227</sup>

## The doctrine of *uti possidetis*<sup>228</sup>

The influence of the principle of territorial integrity may be seen in the Latin American idea of *uti possidetis*, whereby the administrative divisions of the Spanish empire in South America were deemed to constitute the boundaries for the newly independent successor states, thus theoretically excluding any gaps in sovereignty which might precipitate hostilities and encourage foreign intervention.<sup>229</sup> It is more accurately reflected in the practice of African states, explicitly stated in a resolution of the Organization of African Unity in 1964, which declared that colonial frontiers existing as at the date of independence constituted a tangible reality and that all member states pledged themselves to respect such borders.<sup>230</sup>

Practice in Africa has reinforced the approach of emphasising the territorial integrity of the colonially defined territory, witness the widespread disapproval of the attempted creation of secessionist states whether in the former Belgian Congo, Nigeria or Sudan. Efforts to prevent the partition of the South African controlled territory of Namibia into separate Bantustans as a possible prelude to a dissolution of the unity of the territory are a further manifestation of this.<sup>231</sup>

The question of *uti possidetis* was discussed by a Chamber of the International Court in *Burkina Faso v. Republic of Mali*,<sup>232</sup> where the *compromis* (or special agreement) by which the parties submitted the case to the Court specified that the settlement of the dispute should be based upon respect for the principle of the 'intangibility of frontiers inherited from colonisation'.<sup>233</sup> It was noted, however, that the principle had in fact developed into a general concept of contemporary customary international law and was unaffected by the emergence of the right of peoples to self-determination.<sup>234</sup> In the African context particularly, the obvious purpose of the principle was 'to prevent the independence and stability of new states being endangered by fratricidal struggles provoked by the challenging of frontiers following the withdrawal of the administering power'.<sup>235</sup> The application of the principle has the effect of freezing the territorial title existing at the moment of independence to produce what the Chamber described as the 'photograph of the territory' at the critical date.<sup>236</sup> The Chamber, however, went further than emphasising the application of the principle to Africa. It declared that the principle applied generally and was logically connected with the phenomenon of independence wherever it occurred in order to protect the independence and stability of new states.<sup>237</sup> *Uti possidetis* was defined as follows:

The essence of the principle lies in its primary aim of securing respect for the territorial boundaries at the moment when independence is achieved. Such territorial boundaries might be no more than delimitations between different administrative divisions or colonies all subject to the same sovereign. In that case, the application of the principle of *uti possidetis* resulted in administrative boundaries being transformed into international frontiers in the full sense of the term.<sup>238</sup>

The term ‘jus’ in this principle refers not to international law as such but rather to the constitutional or administrative law of the previous sovereign.<sup>239</sup> The International Court has also emphasised that ‘the *uti possidetis juris* principle requires not only that reliance be placed on existing legal titles, but also that account be taken of the manner in which those titles were interpreted and applied by the competent public authorities of the colonial Power’.<sup>240</sup> However, the doctrine of *uti possidetis* is dependent upon there being a clear boundary delimitation prior to independence. The doctrine cannot create a boundary where there was none (or an ambiguous one) at the relevant time.<sup>241</sup>

The application of this principle beyond the purely colonial context was underlined particularly with regard to the former USSR<sup>242</sup> and the former Yugoslavia. In the latter case, the Yugoslav Arbitration Commission established by the European Community and accepted by the states of the former Yugoslavia made several relevant comments. In Opinion No. 2, the Arbitration Commission declared that ‘whatever the circumstances, the right to self-determination must not involve changes to existing frontiers at the time of independence (*uti possidetis juris*) except where the states concerned agree otherwise’.<sup>243</sup> In Opinion No. 3, the Arbitration Commission emphasised that, except where otherwise agreed, the former boundaries<sup>244</sup> became frontiers protected by international law. This conclusion, it was stated, derived from the principle of respect for the territorial status quo and from the principle of *uti possidetis*.<sup>245</sup> It is thus arguable that, at the least, a presumption exists that, in the absence of evidence to the contrary, internally defined units within a pre-existing sovereign state will come to independence within the spatial framework of that territorially defined unit.<sup>246</sup>

## ***Beyond uti possidetis***

The principle of *uti possidetis* is not able to resolve all territorial or boundary problems.<sup>247</sup> Where there is a relevant applicable treaty, then this will dispose of the matter completely.<sup>248</sup> Indeed, once defined in a treaty, an international frontier achieves permanence so that even if the treaty itself were to cease to be in force, the

continuance of the boundary would be unaffected and may only be changed with the consent of the states directly concerned.<sup>249</sup> On the other hand, where the line which is being transformed into an international boundary by virtue of the principle cannot be conclusively identified by recourse to authoritative material, then the principle of *uti possidetis* must allow for the application of other principles and rules. Essentially these other principles focus upon the notion of *effectivités* or effective control.

The issue was extensively analysed by the International Court in the *Burkina Faso/Mali* case<sup>250</sup> and later in the *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras; Nicaragua Intervening)* case.<sup>251</sup> The Court noted the possible relevance of colonial *effectivités*, immediate post-colonial *effectivités* and more recent *effectivités*. Each of these might be relevant in the context of seeking to determine the *uti possidetis* pre-independence line. In the case of colonial *effectivités*, i.e. the conduct of the colonial administrators as proof of the effective exercise of territorial jurisdiction in the area during the colonial period, the Court in the former case distinguished between certain situations. Where the act concerned corresponded to the title comprised in the *uti possidetis juris*, then the *effectivités* simply confirmed the exercise of the right derived from a legal title. Where the act did not correspond with the law as described, i.e. the territory subject to the dispute was effectively administered by a state other than the one possessing the legal title, preference would be given to the holder of the title. In other words, where there was a clear *uti possidetis* line, this would prevail over inconsistent practice. Where, however, there was no clear legal title, then the *effectivités* ‘play an essential role in showing how the title is interpreted in practice’.<sup>252</sup> It would then become a matter for evaluation by the Court with regard to each piece of practice adduced. This approach was reaffirmed in the *Land, Island and Maritime Frontier Dispute* case with regard to the grant of particular lands to individuals or to Indian communities or records of such grants.<sup>253</sup> Where the colonial *effectivités* were insufficient to establish the position of the relevant administrative line, the principle of *uti possidetis* could not operate.<sup>254</sup> The Court also noted in the *Land, Island and Maritime Frontier Dispute* case that it could have regard in certain instances to documentary evidence of post-independence *effectivités* when it considered that they afforded indications with respect to the *uti possidetis* line, provided that there was a relationship between the *effectivités* concerned and the determination of the boundary in question.<sup>255</sup> Such post-independence practice could be examined not only in relation to the identification of the *uti possidetis* line but also in the context of seeking to establish whether any acquiescence could be demonstrated both as to where the line was and as to whether any changes in that line could be proved to have taken place.<sup>256</sup> This post-independence practice could even be very recent practice and was not confined to immediate post-independence practice.

Where the *uti possidetis* line could be determined neither by authoritative decisions by the appropriate authorities at the relevant time nor by subsequent practice with regard to a particular area, recourse to equity<sup>257</sup> might be necessary. What this might involve would depend upon the circumstances. In the *Burkina Faso/Mali* case, it meant that a particular frontier pool would be equally divided between the parties;<sup>258</sup> in the *Land, Island and Maritime Frontier Dispute* case, it meant that resort could be had to an unratified delimitation of 1869.<sup>259</sup> It was also noted that the suitability of topographical features in providing an identifiable and convenient boundary was a material aspect.<sup>260</sup>

## **International boundary rivers<sup>261</sup>**

Special rules have evolved in international law with regard to boundary rivers. In general, where there is a navigable channel, the boundary will follow the middle line of that channel (the *thalweg* principle).<sup>262</sup> Where there is no such channel or where the parties so choose, the boundary line will, in general, be the middle line of the river itself or of its principal arm.<sup>263</sup> These respective boundary lines would continue as median lines (and so would shift also) if the river itself changed course as a result of gradual accretion on one bank or degradation of the other bank. Where, however, the river changed course suddenly and left its original bed for a new channel, the international boundary would continue to be the middle of the deserted river bed.<sup>264</sup> It is possible for the boundary to follow one of the banks of the river, thus putting it entirely within the territory of one of the states concerned where this has been expressly agreed, but this is unusual.<sup>265</sup>

## **‘The common heritage of mankind’**

The proclamation of certain areas as the common heritage of mankind has raised the question as to whether a new form of territorial regime has been, or is, in process of being created.<sup>266</sup> In 1970, the UN General Assembly adopted a Declaration of Principles Governing the Seabed and Ocean Floor in which it was noted that the area in question and its resources were the common heritage of mankind. This was reiterated in articles 136 and 137 of the 1982 Convention on the Law of the Sea, in which it was provided that no sovereign or other rights would be recognised with regard to the area (except in the case of minerals recovered in accordance with the Convention) and that exploitation could only take place in accordance with the rules and structures established by the Convention.<sup>267</sup> Article XI of the 1979 Moon Treaty emphasises that the moon and its natural resources are the common heritage of mankind, and thus incapable of national appropriation and subject to a particular

regime of exploitation.<sup>268</sup> As is noted in the next section, attempts were being made to establish a common heritage regime over the Antarctic. There are certain common characteristics relating to the concept. Like *res communis*, the areas in question are incapable of national appropriation. Sovereignty is not an applicable principle and the areas in question would not be 'owned', nor would any jurisdictional rights exist outside the framework of the appropriate common heritage regime institutional arrangements. However, while a *res communis* regime permits freedom of access, exploration and exploitation, a common heritage regime as envisaged in the examples noted above would strictly regulate exploration and exploitation, would establish management mechanisms and would employ the criterion of equity in distributing the benefits of such activity.

It is too early to predict the success or failure of this concept. The 1982 Law of the Sea Convention entered into force in 1994, while the Moon Treaty has the bare minimum number of ratifications and its exploitation provisions are not yet operative. As a legal concept within the framework of the specific treaties concerned, it provides an interesting contrast to traditional *jus communis* rules, although the extent of the management structures required to operate the regime may pose considerable problems.<sup>269</sup>

## The polar regions<sup>270</sup>

The Arctic region is of some strategic importance, constituting as it does a vast expanse of inhospitable territory between North America and Russia. It consists to a large extent of ice packs beneath which submarines may operate.

Denmark possesses Greenland and its associated islands within the region,<sup>271</sup> while Norway has asserted sovereign rights over Spitzbergen and other islands. The Norwegian title is based on occupation and long exploitation of mineral resources and its sovereignty was recognised by nine nations in 1920, although the Soviet Union had protested.<sup>272</sup>

More controversial are the respective claims made by Canada<sup>273</sup> and the former USSR.<sup>274</sup> Use has been made of the concept of contiguity to assert claims over areas forming geographical units with those already occupied, in the form of the so-called sector principle. This is based on meridians of longitude as they converge at the North Pole and as they are placed on the coastlines of the particular nations, thus producing a series of triangular sectors with the coasts of the Arctic states as their baselines.

The other Arctic states of Norway, Finland, Denmark and the United States have abstained from such assertions.<sup>275</sup> Accordingly, it is exceedingly doubtful whether

the sector principle can be regarded as other than a political proposition.<sup>276</sup> Part of the problem is that such a large part of this region consists of moving packs of ice. The former USSR made some claims to relatively immovable ice formations as being subject to its national sovereignty,<sup>277</sup> but the overall opinion remains that these are to be treated as part of the high seas open to all.<sup>278</sup> The US and Canada both claim 'pie-shaped' sectors in the Beaufort Sea, Canada and Denmark (Greenland) have a dispute with regard to boundaries in the Lincoln Sea and Norway, and Russia long disagreed over the boundary between their continental shelves in the Barents Sea.<sup>279</sup>

Occupation of the land areas of the Arctic region may be effected by states by relatively little activity in view of the decision in the *Eastern Greenland* case<sup>280</sup> and the nature of the territory involved. The fact that climate change appears to be melting Arctic ice on a permanent basis thus leading to the possibility of Arctic navigation as well as the exploitation of natural resources there are together destabilising the current situation.

Claims have been made by seven nations (Argentina, Australia, Chile, France, New Zealand, Norway and the United Kingdom) to the Antarctic region, which is an ice-covered landmass in the form of an island.<sup>281</sup> Such claims have been based on a variety of grounds, ranging from mere discovery to the sector principle employed by the South American states, and most of these are of rather dubious quality. Significantly, the United States of America has refused to recognise any claims at all to Antarctica, and although the American Admiral Byrd discovered and claimed Marie Byrd Land for his country, the United States refrained from adopting the claim.<sup>282</sup> Several states have recognised the territorial aspirations of each other in the area, but one should note that the British, Chilean and Argentinian claims overlap.<sup>283</sup>

However, in 1959 the Antarctic Treaty was signed by all states concerned with territorial claims or scientific exploration in the region.<sup>284</sup> Its major effect, apart from the demilitarisation of Antarctica, is to suspend, although not to eliminate, territorial claims during the life of the treaty. Article IV(2) declares that:

no acts or activities taking place while the present treaty is in force shall constitute a basis for asserting, supporting or denying a claim to territorial sovereignty in Antarctica or create any rights of sovereignty in Antarctica. No new claim or enlargement of an existing claim to territorial sovereignty in Antarctica shall be asserted while the present treaty is in force.

Since the treaty does not provide for termination, an ongoing regime has been

created which, because of its inclusion of all interested parties, appears to have established an international regime binding on all.<sup>285</sup> Subsequent meetings of the parties have resulted in a number of recommendations, including proposals for the protection of flora and fauna in the region, and other environmental preservation measures.<sup>286</sup>

Of the current parties to the treaty, twelve were original signatories, while a further thirty-eight have acceded to the treaty. Twenty-eight states have consultative status, while a further twenty-two have non-consultative status.<sup>287</sup> Full participation in the work of the consultative meetings of the parties is reserved to the original parties to the treaty and those contracting parties which demonstrate substantial scientific research activity in the area. Antarctic treaty consultative meetings take place annually.<sup>288</sup>

The issue of a mineral resources regime has been under discussion since 1979 by the consultative parties and a series of special meetings on the subject held.<sup>289</sup> This resulted in the signing in June 1988 of the Convention on the Regulation of Antarctic Minerals Resource Activities.<sup>290</sup> The Convention provided for three stages of mineral activity, being defined as prospecting, exploration and development. Four institutions were to be established, once the treaty came into force (following sixteen ratifications or accessions, including the US, the former USSR and claimant states). The Commission was to consist of the consultative parties, any other party to the Convention engaged in substantive and relevant research in the area and any other party sponsoring mineral resource activity. A Scientific, Technical and Environmental Advisory Committee consisting of all parties to the Convention was to be established, as were Regulatory Committees, in order to regulate exploration and development activity in a specific area. Such committees would consist of ten members of the Commission, including the relevant claimant and additional claimants up to a maximum of four, the US, the former USSR and representation of developing countries. A system for Special Meetings of Parties, consisting of all parties to the Convention, was also provided for. Several countries signed the Convention.<sup>291</sup> However, opposition to the Convention began to grow. The signing of the 1988 Convention on mineral resource activities stimulated opposition and in resolution 43/83, adopted by the General Assembly that year, 'deep regret' was expressed that such a convention should have been signed despite earlier resolutions calling for a moratorium on negotiations to create a minerals regime in the Antarctic. France and Australia proposed at the October 1989 meeting of the signatories of the Antarctic Treaty that all mining be banned in the area, which should be designated a global 'wilderness reserve'.<sup>292</sup>

At a meeting of the consultative parties to the Antarctic Treaty in April 1991 the Protocol on Environmental Protection to the Antarctic Treaty was adopted, article 7

of which prohibited any activity relating to mineral resources other than scientific research. This prohibition is to continue unless there is in force a binding legal regime on Antarctic mineral resource activities that includes an agreed means of determining whether and, if so, under which conditions any such activities would be acceptable. A review conference with regard to the operation of the Protocol may be held after it has been in force for fifty years if so requested.<sup>293</sup> In addition, a Committee for Environmental Protection was established.<sup>294</sup> This effectively marked the end of the limited mining approach, which had led to the signing of the Convention on the Regulation of Antarctic Mineral Resource Activities. The Protocol came into force in 1998 and may be seen as establishing a comprehensive integrated environmental regime for the area.<sup>295</sup>

## Leases and servitudes<sup>296</sup>

Various legal rights exercisable by states over the territory of other states, which fall short of absolute sovereignty, may exist. Such rights are attached to the land and so may be enforced even though the ownership of the particular territory subject to the rights has passed to another sovereign. They are in legal terminology formulated as rights *in rem*. They constitute treaty-based regimes, dependent upon the terms of the particular treaty. Thus, for example, the applicable law would be specified in such treaty.<sup>297</sup>

Leases of land rose into prominence in the nineteenth century as a way of obtaining control of usually strategic points without the necessity of actually annexing the territory. Leases were used extensively in the Far East, as for example Britain's rights over the New Territories amalgamated with Hong Kong,<sup>298</sup> and sovereignty was regarded as having passed to the lessee for the duration of the lease, upon which event it would revert to the original sovereign who made the grant. This form of words, however, disguised the reality that ultimate sovereignty lay with the lessor.

An exception to this usual construction of a lease in international law as limited to a defined period occurred with regard to the Panama Canal, with the strip of land through which it was constructed being leased to the United States in 1903 'in perpetuity'. However, by the 1977 Panama Canal Treaty, sovereignty over the Canal Zone was transferred to Panama. The United States had certain operating and defensive rights until the treaty ended in 1999.<sup>299</sup> Another such example is Guantanamo Bay in Cuba, which has been leased to the US by virtue of treaties signed in 1903 and in 1934. Under the latter treaty, the lease continues until either the US abandons the base or both states otherwise agree.<sup>300</sup> Russia has concluded a

number of lease arrangements with former Soviet Republics, now independent states.<sup>301</sup>

A servitude exists where the territory of one state is under a particular restriction in the interests of the territory of another state. Such limitations are bound to the land as rights *in rem* and thus restrict the sovereignty of the state concerned, even if there is a change in control of the relevant territory, for instance upon merger with another state or upon decolonisation.<sup>302</sup>

Examples of servitudes would include the right to use ports or rivers in, or a right of way across, the territory so bound, or alternatively an obligation not to fortify particular towns or areas in the territory.<sup>303</sup>

Servitudes may exist for the benefit of the international community or a large number of states. To give an example, in the *Aaland Islands* case in 1920, a Commission of Jurists appointed by the Council of the League of Nations declared that Finland since its independence in 1918 had succeeded to Russia's obligations under the 1856 treaty not to fortify the islands. And since Sweden was an interested state in that the islands are situated near Stockholm, it could enforce the obligation although not a party to the 1856 treaty. This was because the treaty provisions had established a special international regime with obligations enforceable by interested states and binding upon any state in possession of the islands.<sup>304</sup> Further, the Tribunal in *Eritrea/Yemen* noted that the traditional open fishing regime in the southern Red Sea together with the common use of the islands in the area by the populations of both coasts was capable of creating historic rights accruing to the two states in dispute in the form of an international servitude.<sup>305</sup> The award in this case emphasised that the findings of sovereignty over various islands in the Red Sea entailed 'the perpetuation of the traditional fishing regime in the region'.<sup>306</sup>

The situation of the creation of an international status by treaty, which is to be binding upon all and not merely upon the parties to the treaty, is a complex one and it is not always clear when it is to be presumed. However, rights attached to territory for the benefit of the world community were created with respect to the Suez and Panama Canals. Article 1 of the Constantinople Convention of 1888<sup>307</sup> declared that 'the Suez Maritime Canal shall always be free and open in time of war as in time of peace, to every vessel of commerce or of war without distinction of flag' and this international status was in no way affected by the Egyptian nationalisation of the Canal Company in 1956. Egypt stressed in 1957 that it was willing to respect and implement the terms of the Convention, although in fact it consistently denied use of the canal to Israeli ships and vessels bound for its shores or carrying its goods.<sup>308</sup> The canal was reopened in 1975 following the disengagement agreement with Israel, after a gap of eight years.<sup>309</sup> Under article V of the 1979 Peace Treaty between Israel

and Egypt, it was provided that ships of Israel and cargoes destined for or coming from Israel were to enjoy 'the right of free passage through the Suez Canal...on the basis of the Constantinople Convention of 1888, applying to all nations'.

In the *Wimbledon* case,<sup>310</sup> the Permanent Court of International Justice declared that the effect of article 380 of the Treaty of Versailles, 1919 maintaining that the Kiel Canal was to be open to all the ships of all countries at peace with Germany was to convert the canal from an internal to an international waterway 'intended to provide under treaty guarantee easier access to the Baltic for the benefit of all nations of the world'.

Some of the problems relating to the existence of servitudes have arisen by virtue of the *North Atlantic Fisheries* arbitration.<sup>311</sup> This followed a treaty signed in 1818 between the United Kingdom and the United States, awarding the inhabitants of the latter country 'forever...the liberty to take fish of every kind' from the southern coast of Newfoundland. The argument arose as to Britain's capacity under the treaty to issue fishing regulations binding American nationals. The arbitration tribunal decided that the relevant provision of the treaty did not create a servitude, partly because such a concept was unknown by American and British statesmen at the relevant time (i.e. 1818). However, the terms of the award do leave open the possibility of the existence of servitudes, especially since the tribunal did draw a distinction between economic rights (as in the case) and a grant of sovereign rights which could amount to a servitude in international law.<sup>312</sup>

## The law of outer space<sup>313</sup>

There were a variety of theories prior to the First World War with regard to the status of the airspace above states and territorial waters<sup>314</sup> but the outbreak of that conflict, with its recognition of the security implications of use of the air, changed this and the approach that then prevailed, with little dissension, was based upon the extension of state sovereignty upwards into airspace. This was acceptable both from the defence point of view and in the light of evolving state practice regulating flights over national territory.<sup>315</sup> It was reflected in the 1919 Paris Convention for the Regulation of Aerial Navigation, which recognised the full sovereignty of states over the airspace above their land and territorial sea.<sup>316</sup> Accordingly, the international law rules protecting sovereignty of states apply to the airspace as they do to the land below. As the International Court noted in the *Nicaragua* case, 'The principle of respect for territorial sovereignty is also directly infringed by the unauthorised overflight of a state's territory by aircraft belonging to or under the control of the government of another state.'<sup>317</sup> The Court noted in the *Benin/Niger* case that 'a

boundary represents the line of separation between areas of state sovereignty, not only on the earth's surface but also in the subsoil and in the superjacent column of air'.<sup>318</sup>

There is no right of innocent passage through the airspace of a state.<sup>319</sup> Aircraft may only traverse the airspace of states with the agreement of those states, and where that has not been obtained an illegal intrusion will be involved which will justify interception, though not (save in very exceptional cases) actual attack.<sup>320</sup> However, the principle of the complete sovereignty of the subjacent state is qualified not only by the various multilateral and bilateral conventions which permit airliners to cross and land in the territories of the contracting states under recognised conditions and in the light of the accepted regulations, but also by the development of the law of outer space.

Ever since the USSR launched the first earth satellite in 1957, space exploration has developed at an ever-increasing rate.<sup>321</sup> Satellites now control communications and observation networks, while landings have been made on the moon and information-seeking space probes dispatched to survey planets like Venus and Saturn. The research material gathered upon such diverse matters as earth resources, ionospheric activities, solar radiation, cosmic rays and the general structure of space and planet formations has stimulated further efforts to understand the nature of space and the cosmos.<sup>322</sup> This immense increase in available information has also led to the development of the law of outer space, formulating generally accepted principles to regulate the interests of the various states involved as well as taking into account the concern of the international community as a whole.

## **The definition and delimitation of outer space**

It soon became apparent that the *usque ad coelum* rule, providing for state sovereignty over territorial airspace to an unrestricted extent, was not viable where space exploration was concerned. To obtain the individual consents of countries to the passage of satellites and other vehicles orbiting more than 100 miles above their surface would prove cumbersome in the extreme and in practice states have acquiesced in such traversing. This means that the sovereignty of states over their airspace is limited in height at most to the point where the airspace meets space itself. Precisely where this boundary lies is difficult to say and will depend upon technological and other factors, but figures between 50 and 100 miles have been put forward.<sup>323</sup>

As conventional aircraft are developed to attain greater heights, so states will wish to see their sovereignty extend to those heights and, as well as genuine uncertainty, this fear of surrendering what may prove to be in the future valuable sovereign rights

has prevented any agreement on the delimitation of this particular frontier.<sup>324</sup>

## The regime of outer space

Beyond the point separating air from space, states have agreed to apply the international law principles of *res communis*, so that no portion of outer space may be appropriated to the sovereignty of individual states. This was made clear in a number of General Assembly resolutions following the advent of the satellite era in the late 1950s. For instance, UN General Assembly resolution 1962 (XVII), adopted in 1963 and entitled the Declaration of Legal Principles Governing the Activities of States in the Exploration and Use of Outer Space, lays down a series of applicable legal principles which include the provisions that outer space and celestial bodies were free for exploration and use by all states on a basis of equality and in accordance with international law, and that outer space and celestial bodies were not subject to national appropriation by any means.<sup>325</sup> In addition, the Declaration on International Co-operation in the Exploration and Use of Outer Space adopted in resolution 51/126, 1996, called for further international co-operation, with particular attention being given to the benefit for and the interests of developing countries and countries with incipient space programmes stemming from such international co-operation conducted with countries with more advanced space capabilities.<sup>326</sup> Such resolutions constituted in many cases and in the circumstances expressions of state practice and *opinio juris* and were thus part of customary law.<sup>327</sup>

The legal regime of outer space was clarified by the signature in 1967 of the Treaty on Principles Governing the Activities of States in the Exploration and Use of Outer Space, including the Moon and Other Celestial Bodies. This reiterates that outer space, including the moon and other celestial bodies, is not subject to national appropriation by any means and emphasises that the exploration and use of outer space must be carried out for the benefit of all countries. The Treaty does not establish as such a precise boundary between airspace and outer space but it provides the framework for the international law of outer space.<sup>328</sup> Article 4 provides that states parties to the Treaty agree:

not to place in orbit around the earth any objects carrying nuclear weapons or any other kinds of weapons of mass destruction, install such weapons on celestial bodies, or station such weapons in outer space in any other manner.

There are, however, disagreements as to the meaning of this provision.<sup>329</sup> The article bans only nuclear weapons and weapons of mass destruction from outer space, the celestial bodies and from orbit around the earth, but article 1 does emphasise that the exploration and use of outer space 'shall be carried out for the benefit and in the

interests of all countries' and it has been argued that this can be interpreted to mean that any military activity in space contravenes the Treaty.<sup>330</sup>

Under article 4, only the moon and other celestial bodies must be used exclusively for peaceful purposes, although the use of military personnel for scientific and other peaceful purposes is not prohibited. There are minimalist and maximalist interpretations as to how these provisions are to be understood. The former, for example, would argue that only aggressive military activity is banned, while the latter would prohibit all military behaviour.<sup>331</sup> Article 6 provides for international responsibility for national activities in outer space, including the moon and other celestial bodies, whether such activities are carried on by governmental agencies or by non-governmental entities, and for assuring that national activities are carried out in conformity with the Treaty. The activities of non-governmental entities in outer space, including the moon and other celestial bodies, require authorisation and continuing supervision by the appropriate state party to the Treaty. When activities are carried on in outer space, including the moon and other celestial bodies, by an international organisation, responsibility for compliance with the Treaty is to be borne both by the international organisation and by the states parties to the Treaty participating in such organisation.<sup>332</sup>

Under article 8, states retain jurisdiction and control over personnel and vehicles launched by them into space and under article 7 they remain responsible for any damage caused to other parties to the Treaty by their space objects.<sup>333</sup>

This aspect of space law was further developed by the Convention on International Liability for Damage Caused by Space Objects signed in 1972, article XII of which provides for the payment of compensation in accordance with international law and the principles of justice and equity for any damage caused by space objects. Article II provides for absolute liability to pay such compensation for damage caused by a space object on the surface of the earth or to aircraft in flight, whereas article III provides for fault liability for damage caused elsewhere or to persons or property on board a space object.<sup>334</sup> This Convention was invoked by Canada in 1979 following the damage allegedly caused by Soviet Cosmos 954.<sup>335</sup> In 2007, the UN General Assembly endorsed the Space Debris Mitigation Guidelines as guidelines for the mission, planning, design, manufacture and operational phases of spacecraft and launch vehicle orbital stages with the aim of limiting space debris.<sup>336</sup>

As a reinforcement to this evolving system of state responsibility, the Convention on the Registration of Objects Launched into Outer Space was opened for signature in 1975, coming into force in 1976. This laid down a series of stipulations for the registration of information regarding space objects, such as, for example, their purpose, location and parameters, with the United Nations Secretary-General.<sup>337</sup> In

1993, the UN General Assembly adopted Principles Relevant to the Use of Nuclear Power Sources in Outer Space.<sup>338</sup> Under these Principles, the launching state is, prior to the launch, to ensure that a thorough and comprehensive safety assessment is conducted and made publicly available. Where a space object appears to malfunction with a risk of re-entry of radioactive materials to the earth, the launching state is to inform states concerned and the UN Secretary-General and respond promptly to requests for further information or consultations sought by other states. Principle 8 provides that states shall bear international responsibility for national activities involving the use of nuclear power sources in outer space, whether such activities are carried out by governmental agencies or by non-governmental agencies. Principle 9 provides that each state which launches or procures the launching of a space object and each state from whose territory or facility a space object is launched shall be internationally liable for damage caused by such space object or its component parts.

The Agreement on the Rescue of Astronauts, the Return of Astronauts and the Return of Objects Launched into Outer Space was signed in 1968 and sets out the legal framework for the provision of emergency assistance to astronauts. It provides for immediate notification of the launching authority or, if that is not immediately possible, a public announcement regarding space personnel in distress as well as the immediate provision of assistance. It also covers search and rescue operations as well as a guarantee of prompt return. The Convention also provides for recovery of space objects.<sup>339</sup>

In 1979, the Agreement Governing the Activities of States on the Moon and other Celestial Bodies was adopted.<sup>340</sup> This provides for the demilitarisation of the moon and other celestial bodies, although military personnel may be used for peaceful purposes, and reiterates the principle established in the 1967 Outer Space Treaty. Under article IV, the exploration and the use of the moon shall be the province of all mankind and should be carried out for the benefit of all. Article XI emphasises that the moon and its natural resources are the common heritage of mankind and are not subject to national appropriation by any means. That important article emphasises that no private rights of ownership over the moon or any part of it or its natural resources in place may be created, although all states parties have the right to exploration and use of the moon. The states parties also agreed under article XI(5) and (7) to establish an international regime to govern the exploitation of the resources of the moon, when this becomes feasible.<sup>341</sup> The main purposes of the international regime to be established are to include:

- a. the orderly and safe development of the natural resources of the moon;
- b. the rational management of those resources;

- c. the expansion of opportunities in the use of those resources; and
- d. an equitable sharing by all states parties in the benefits derived from those resources, whereby the interests and needs of the developing countries, as well as the efforts of those countries which have contributed either directly or indirectly to the exploration of the moon, shall be given special consideration.

Several points are worth noting. First, the proposed international regime is only to be established when exploitation becomes feasible. Secondly, it appears that until the regime is set up, there is a moratorium on exploitation, although not on 'exploration and use', as recognised by articles XI(4) and VI(2). This would permit the collection of samples and their removal from the moon for scientific purposes. Thirdly, it is to be noted that private ownership rights of minerals or natural resources not in place are permissible under the Treaty.<sup>342</sup>

An issue of especial concern relates to the commercialisation of activities in outer space, in particular the legal regulation of non-state private activities such as proposed space tourism.<sup>343</sup>

## **Telecommunications**<sup>344</sup>

Arguably the most useful application of space exploitation techniques has been the creation of telecommunications networks. This has revolutionised communications and has an enormous educational as well as entertainment potential.<sup>345</sup>

The legal framework for the use of space in the field of telecommunications is provided by the various INTELSAT (international telecommunications satellites) agreements which enable the member states of the International Telecommunications Union to help develop and establish the system, although much of the work is in fact carried out by American corporations, particularly COMSAT. In 1971 the communist countries established their own network of telecommunications satellites, called INTER-SPUTNIK. The international regime for the exploitation of the orbit/spectrum resource<sup>346</sup> has built upon the 1967 Treaty, the 1973 Telecommunications Convention and Protocol and various International Telecommunication Union Radio Regulations. Regulation of the radio spectrum is undertaken at the World Administrative Radio Conferences and by the principal organs of the ITU.

However, there are a number of problems associated with these ventures, ranging from the allocation of radio wave frequencies to the dangers inherent in direct broadcasting via satellites to willing and unwilling states alike. Questions about the control of material broadcast by such satellites and the protection of minority

cultures from ‘swamping’ have yet to be answered, but are being discussed in various UN organs, for instance UNESCO and the Committee on the Peaceful Uses of Outer Space.<sup>347</sup>

Two principles are relevant in this context: freedom of information, which is a right enshrined in many international instruments,<sup>348</sup> and state sovereignty. A number of attempts have been made to reconcile the two.

In 1972, UNESCO adopted a Declaration of Guiding Principles on the Use of Satellite Broadcasting, in which it was provided that all states had the right to decide on the content of educational programmes broadcast to their own peoples, while article IX declared that prior agreement was required for direct satellite broadcasting to the population of countries other than the country of origin of the transmission. Within the UN support for the consent principle was clear, but there were calls for a proper regulatory regime, in addition.<sup>349</sup>

In 1983, the General Assembly adopted resolution 37/92 entitled ‘Principles Governing the Use by States of Artificial Earth Satellites for International Direct Television Broadcasting’. This provides that a state intending to establish or authorise the establishment of a direct television broadcasting satellite service must first notify the proposed receiving state or states and then consult with them. A service may only be established after this and on the basis of agreements and/or arrangements in conformity with the relevant instruments of the International Telecommunications Union. However, the value of these principles is significantly reduced in the light of the fact that nearly all the Western states voted against the resolution.<sup>350</sup>

ITU regulations call for technical co-ordination between the sending and receiving states as to frequency and orbital positioning before any direct broadcasting by satellite can be carried out and thus do not affect regulation of the conduct of the broadcast activity as such, although the two elements are clearly connected.<sup>351</sup>

The question of remote sensing has also been under consideration for many years by several bodies, including the UN Committee on the Peaceful Uses of Outer Space. Remote sensing refers to the detection and analysis of the earth’s resources by sensors carried in aircraft and spacecraft and covers, for example, meteorological sensing, ocean observation, military surveillance and land observation. It clearly has tremendous potential, but the question of the uses of the information received is highly controversial.<sup>352</sup> In 1986, the General Assembly adopted fifteen principles relating to remote sensing.<sup>353</sup> These range from the statement that such activity is to be carried out for the benefit and in the interests of all countries, taking into particular account the needs of developing countries, to the provision that sensing states should promote international co-operation and environmental protection on

earth. There is, however, no requirement of prior consent from states that are being sensed,<sup>354</sup> although consultations in order to enhance participation are called for there. One key issue relates to control over the dissemination of information gathered by satellite. Some have called for the creation of an equitable regime for the sharing of information<sup>355</sup> and there is concern over the question of access to data about states by those, and other, states. The USSR and France, for example, jointly proposed the concept of the inalienable right of states to dispose of their natural resources and of information concerning those resources,<sup>356</sup> while the US in particular pointed to the practical problems this would cause and the possible infringement of freedom of information. The UN Committee on the Peaceful Uses of Outer Space has been considering the problem for many years and general agreement has proved elusive.<sup>357</sup> The Principles on Remote Sensing provide that the sensed state shall have access to the primary and processed data produced upon a non-discriminatory basis and on reasonable cost terms. States conducting such remote sensing are to bear international responsibility for their activities.

The increase in the use of satellites for all of the above purposes has put pressure upon the geostationary orbit. This is the orbit 22,300 miles directly above the equator, where satellites circle at the same speed as the earth rotates. It is the only orbit capable of providing continuous contact with ground stations via a single satellite. The orbit is thus a finite resource.<sup>358</sup> However, in 1976, Brazil, Colombia, the Congo, Ecuador, Indonesia, Kenya, Uganda and Zaire signed the Bogotá Declaration under which they stated that 'the segments of geostationary synchronous orbit are part of the territory over which equatorial states exercise their sovereignty'.<sup>359</sup>

Other states have vigorously protested against this and it therefore cannot be taken as other than an assertion and a bargaining counter.<sup>360</sup> Nevertheless, the increase in satellite launches and the limited nature of the geostationary orbit facility call for urgent action to produce an acceptable series of principles governing its use.<sup>361</sup>

<sup>54</sup> See e.g. Verzijl, *International Law*, pp. 378–81. See also *Brownlie’s Principles*, p. 229.

<sup>55</sup> See e.g. the *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras)*, ICJ Reports, 1992, pp. 351, 401; 97 ILR, p. 112.

<sup>56</sup> See e.g. the *Dubai/Sharjah* case, 91 ILR, pp. 543, 577 (where the Court of Arbitration termed such procedures ‘administrative decisions’, *ibid.*) and *Qatar/Bahrain*, ICJ Reports, 2001, paras. 110 ff.

<sup>57</sup> See e.g. C. C. Hyde, *International Law*, 2nd edn, Boston, 1947, vol. I, pp. 355–6; O’Connell, *International Law*, pp. 428–30, and *Oppenheim’s International Law*, pp. 696–8.

<sup>58</sup> 478 HL Deb., col. 1005, Written Answer, 17 July 1986. See also A. J. Day, *Border and Territorial Disputes*, 2nd edn, London, 1987, p. 277, regarding a new island appearing after a cyclone in 1970 on a river boundary between India and Bangladesh. Title is disputed. See also *Georgia v. South Carolina* 111 L.Ed.2d 309; 91 ILR, p. 439.

<sup>59</sup> See e.g. *Georgia v. South Carolina* 111 L.Ed.2d 309, 334; 91 ILR, pp. 439, 458. See also the *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras)*, ICJ Reports, 1992, pp. 351, 546.

<sup>60</sup> ICJ Reports, 1992, pp. 351, 546.

<sup>61</sup> See e.g. *The Anna* 5 C.Rob. 373 (1805); *Arkansas v. Tennessee* 246 US 158 (1918); *Louisiana v. Mississippi* 282 US 458 (1940); *Georgia v. South Carolina* 111 L.Ed.2d 309; 91 ILR, p. 439, and the *Chamizal* arbitration, 5 AJIL, 1911, p. 782. See also E. Lauterpacht, 'River Boundaries: Legal Aspects of the Shatt-Al-Arab Frontier', 9 ICLQ, 1960, pp. 208, 216; L. J. Bouchez, 'The Fixing of Boundaries in International Boundary Rivers', 12 ICLQ, 1963, p. 789; S. McCaffrey, *The Law of International Watercourses*, 2nd edn, Oxford, 2007, and the *Botswana/Namibia* case, ICJ Reports, 1999, p. 1045.

<sup>62</sup> See e.g. *Oppenheim's International Law*, pp. 679–86, and O'Connell, *International Law*, pp. 436–40.

<sup>63</sup> See *Christian v. The Queen* [2006] UKPC 47, para. 11, 130 ILR 696, 700, 711, where the Privy Council noted that cession 'contemplates a transfer of sovereignty by one sovereign power to another'.

<sup>64</sup> 2 RIAA, p. 829 (1928); 4 AD, p. 103.

<sup>65</sup> Sovereignty over the territorial sea contiguous to and the airspace above the territory concerned would pass with the land territory: see the *Grisbadarna* case, 11 RIAA, p. 147 (1909) and the *Beagle Channel* case, HMSO, 1977; 52 ILR, p. 93. This suggests the corollary that a cession of the territorial sea or airspace would include the relevant land territory: see *Oppenheim's International Law*, p. 680.

<sup>66</sup> See *Oppenheim's International Law*, p. 681. Note also that in 1859 Austria ceded Lombardy to France, which then ceded it to Sardinia without having taken possession: see O'Connell, *International Law*, p. 438. Cf. *The Fama* 5 C.Rob. 106, 115 (1804).

<sup>67</sup> 4 RIAA, p. 158 (1925); 3 AD, p. 336.

<sup>68</sup> Note now that article 52 of the Vienna Convention on the Law of Treaties, 1969 provides that a treaty is void if its conclusion has been procured by the threat or use of force in violation of the principles of international law embodied in the Charter of the United Nations. However, prior treaties of cession are subject to the rule of intertemporal law: see below, p. 366.

- <sup>69</sup> See, for further examples, *Oppenheim's International Law*, pp. 681–2.
- <sup>70</sup> *Ibid.*, p. 699. See also S. Korman, *The Right of Conquest*, Oxford, 1996.
- <sup>71</sup> See e.g. M. S. McDougal and F. P. Feliciano, *Law and Minimum World Public Order*, New Haven, 1961, pp. 733–6 and 739–44, and J. Stone, *Legal Controls of International Conflict*, London, 1959, pp. 744–51. See also E. Benveniste, *The International Law of Occupation*, 2nd edn, Princeton, 2012.
- <sup>72</sup> See generally *The Arab–Israeli Conflict* (ed. J. N. Moore), Princeton, 4 vols., 1974–89.
- <sup>73</sup> But cf. Y. Blum, ‘The Missing Reversioner’, in *ibid.*, vol. II, p. 287.
- <sup>74</sup> See article 51 of the UN Charter and below, chapter 20, p. 820.
- <sup>75</sup> See e.g. *Oppenheim's International Law*, p. 699. See also O’Connell, *International Law*, pp. 431–6.
- <sup>76</sup> O’Connell, *International Law*, p. 436. See also e.g. *Re Goering* 13 AD, p. 203 (1946).
- <sup>77</sup> Cmd 6648 (1945). See also *Oppenheim's International Law*, pp. 699–700.
- <sup>78</sup> See also article 5(3) of the Consensus Definition of Aggression adopted in 1974 by the UN General Assembly. Similarly, by article 52 of the Vienna Convention on the Law of Treaties, 1969, a treaty providing for the transfer of territory may be void for duress.
- <sup>79</sup> See *The Kuwait Crisis: Basic Documents* (eds. E. Lauterpacht, C. Greenwood, M. Weller and D. Bethlehem), Cambridge, 1991, p. 90.
- <sup>80</sup> See, for example, Security Council resolution 497 (1981), condemning Israel’s decision to extend its laws, jurisdiction and administration to the occupied Golan

Heights. The UN has also condemned Israel's policy of establishing settlements in the occupied territories: see e.g. Security Council resolution 465 (1980). See further below, chapter 20, p. 832, with regard to self-determination and the use of force.

<sup>81</sup> ICJ Reports, 1975, p. 12; 59 ILR, p. 14. See also M. N. Shaw, 'The *Western Sahara* case', 49 BYIL, 1978, pp. 119, 127–34.

<sup>82</sup> ICJ Reports, 1975, pp. 12, 39; 59 ILR, pp. 14, 56.

<sup>83</sup> *Ibid.*

<sup>84</sup> *Ibid.* This ran counter to some writers of the period: see e.g. M. F. Lindley, *The Acquisition and Government of Backward Territory in International Law*, London, 1926, pp. 11–20; J. Westlake, *Chapters on the Principles of International Law*, London, 1894, pp. 141–2; Jennings, *Acquisition*, p. 20, and Oppenheim's *International Law*, p. 687, footnote 4.

<sup>85</sup> See *Eritrea/Yemen*, 114 ILR, pp. 1, 51. See also N. S. M. Antunes, 'The *Eritrea–Yemen* Arbitration: First Stage – The Law of Title to Territory Re-averred', 48 ICLQ, 1999, p. 362, and A. Yannis, 'The Concept of Suspended Sovereignty in International Law and Its Implications in International Politics', 13 EJIL, 2002, p. 1037.

<sup>86</sup> See Shaw, *Title to Territory*, chapter 1, and C. H. Alexandrowicz, *The European–African Confrontation*, Leiden, 1973.

<sup>87</sup> See e.g. Oppenheim's *International Law*, pp. 689–90, and F. A. F. Von der Heydte, 'Discovery, Symbolic Annexation and Virtual Effectiveness in International Law', 29 AJIL, 1935, p. 448. See also A. S. Keller, O. J. Lissitzyn and F. J. Mann, *Creation of Rights of Sovereignty Through Symbolic Acts, 1400–1800*, New York, 1938.

<sup>88</sup> 2 RIAA, pp. 829, 846 (1928); 4 AD, pp. 103, 108.

Vidmar, 'Territorial Integrity and the Law of Statehood', 44 *The George Washington International Law Review*, 2012, p. 101.

**203** See generally, Shaw, *Title to Territory*, chapter 5. But see, as regards Europe, Principle III of the Helsinki Final Act, 14 ILM, 1975, p. 1292 and the Guidelines on Recognition of New States in Eastern Europe and the Soviet Union adopted by the European Community and its member states on 16 December 1991, 92 ILR, p. 173.

**204** See *Burkina Faso/Mali*, ICJ Reports, 1986, pp. 554, 565; 80 ILR, p. 469.

**205** As to the application of the principle to Gibraltar, see UKMIL, 70 BYIL, 1999, p. 443.

**206** See J. Crawford, 'State Practice and International Law in Relation to Secession', 69 BYIL, 1998, p. 85; Daillier *et al.*, *Droit International Public*, p. 584, and *Self-Determination in International Law: Quebec and Lessons Learned* (ed. A. Bayefsky), The Hague, 2000. See also above, chapter 5, p. 183. Self-determination does have a continuing application in terms of human rights situations within the territorial framework of independent states (i.e. internal self-determination), *ibid.*

**207** (1998) 161 DLR (4th) 385, 436; 115 ILR, p. 536.

**208** (1998) 161 DLR (4th) 385, 438.

**209** A. Cassese, *Self-Determination of Peoples*, Cambridge, 1995, p. 120. See also T. Musgrave, *Self-Determination and National Minorities*, Oxford, 1997, pp. 188 ff.; J. Castellino, *International Law and Self-Determination*, The Hague, 2000, and K. Knop, *Diversity and Self-Determination in International Law*, Cambridge, 2002, pp. 65 ff. See also Judge Wildhaber's Concurring Opinion (joined by Judge Rysdøl) in

*Loizidou v. Turkey*, Judgment of 18 December 1996, 108 ILR, pp. 443, 470–3. See also *Secession: International Law Perspectives* (ed. M. G. Kohen), Cambridge, 2006. See also e.g. the Written Statement of the Russian Federation in the *Kosovo* case, [www.icj-cij.org/docket/index.php?p1=3&p2=4&k=21&case=141&code=kos&p3=1](http://www.icj-cij.org/docket/index.php?p1=3&p2=4&k=21&case=141&code=kos&p3=1) at pp. 39–40, underlining that, ‘outside the colonial context, international law allows for secession of a part of a state against the latter’s will only as a matter of self-determination of peoples, and only in extreme circumstances, when the people concerned is continuously subjected to most severe forms of oppression that endangers the very existence of the people’.

<sup>210</sup> The Court in the *Quebec* case, citing Cassese, *Self-Determination*, suggested that the right to external self-determination (i.e. secession) might apply to cases of foreign occupation and as a last resort where a people’s right to internal self-determination (i.e. right to public participation, etc.) was blocked, *ibid.*, pp. 438 ff. See also J. Dugard, ‘The Secession of States and Their Recognition in the Wake of Kosovo’, 357 HR, 2013, p. 9.

<sup>211</sup> [www.bbc.co.uk/news/world-middle-east-26248275](http://www.bbc.co.uk/news/world-middle-east-26248275) and <http://rt.com/news/crimea-parliamentindependence-ukraine-086/>. Note also that the International Court stated in the *Kosovo Advisory Opinion*, ICJ Reports, 2010, pp. 403, 437, that unilateral and non-consensual declarations of independence, while not as such illegal, may be contrary to international law where ‘connected with the unlawful use of force or other egregious violations of norms of general international law, in particular those of a peremptory character (*jus cogens*)’.

<sup>212</sup> See the Budapest Memorandum 1994 and the 1997 Partition Treaty on the Status and Conditions of the Black Sea Fleet with Ukraine. See also the UN Charter and the OSCE Helsinki Final Act 1976.

<sup>213</sup> [www.bbc.co.uk/news/world-europe-26630062](http://www.bbc.co.uk/news/world-europe-26630062). See also General Assembly resolution 68/262, 27 March 2014, entitled ‘Territorial integrity of Ukraine’, which reaffirmed the territorial integrity and sovereignty of Ukraine, declared the referendum in Crimea illegal, and called for political dialogue

<sup>214</sup> See also the Russian war with Georgia in 2008 following the latter’s attack upon secessionist enclaves of Abkhazia and South Ossetia (in the territory of Georgia) backed by Russia and Russia’s support of the self-proclaimed independence of the entities, see the EU commission Independent Fact-Finding Mission on the Conflict

in Georgia, 2009, [www.ceiig.ch/Report.html](http://www.ceiig.ch/Report.html).

<sup>215</sup> See, for example, Security Council resolutions 1766 (2007), 1801 (2008), and 1853 (2008) with regard to Somalia and resolutions 1756 (2007), 1794 (2007) and 1804 (2008) with regard to the Democratic Republic of Congo.

<sup>216</sup> This analysis is supported by *Burkina Faso/Mali*, ICJ Reports, 1986, p. 554; 80 ILR, p. 459.

<sup>217</sup> Shaw, *Title to Territory*, chapter 5. See also the Moroccan approach, *ibid.*

<sup>218</sup> See, with regard to the preservation of acquired rights, *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 400; 97 ILR, p. 112. See also *Cameroon v. Nigeria*, ICJ Reports, 2002, pp. 370 and 373–4. In particular, the Court stated in relation to the Bakassi peninsula and Lake Chad regions which contain Nigerian populations, that ‘the implementation of the present judgment will afford the parties a beneficial opportunity to co-operate in the interests of the population concerned, in order notably to enable it to continue to have access to educational and health services comparable to those it currently enjoys’, *ibid.*, p. 452. The Court also referred to the commitment of the Cameroon Agent made during the Oral Pleadings to protect Nigerians living in the areas recognised as belonging to Cameroon, *ibid.*, p. 452 and para. V(C) of the Dispositif.

Bartoš, 'Uti Possidetis. Quo Vadis?', 18 Australian YIL, 1997, p. 37; 'L'Applicabilité de l'Uti Possidetis Iuris dans les Situations de Sécession ou de Dissolution d'États', Colloque, RBDI, 1998, p. 5, and *Démembrements d'États et Délimitations Territoriales* (ed. O. Corten), Brussels, 1999.

<sup>229</sup> See the *Colombia–Venezuela* arbitral award, 1 RIAA, pp. 223, 228 (1922); 1 AD, p. 84; the *Beagle Channel* case, HMSO, 1977; 52 ILR, p. 93, and *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras)*, ICJ Reports, 1992, pp. 351, 544; 97 ILR, pp. 266, 299–300.

<sup>230</sup> AHG/Res.16(1). See Security Council resolution 1234 (1999) which refers directly to OAU resolution 16(1) and see also article 4(i) of the Protocol Relating to the Establishment of the Peace and Security Council of the African Union, 2002, and the preamble to the Protocol on Politics, Defence and Security Cooperation adopted by the Southern African Development Community in 2001: see further below, chapter 18. See Shaw, *Title to Territory*, pp. 185–7. See also the Separate Opinion by Judge Ajibola in the *Libya/Chad* case, ICJ Reports, pp. 6, 83 ff.; 100 ILR, pp. 1, 81 ff.

<sup>231</sup> Shaw, *Title to Territory*, chapter 5. The principle has also been noted in Asian practice: see e.g. the *Temple of Preah Vihear* case, ICJ Reports, 1962, p. 6; 33 ILR, p. 48, and the *Rann of Kutch* case, 7 ILM, 1968, p. 633; 50 ILR, p. 2.

<sup>232</sup> ICJ Reports, 1986, p. 554; 80 ILR, p. 459.

<sup>233</sup> ICJ Reports, 1986, p. 557; 80 ILR, p. 462.

<sup>234</sup> ICJ Reports, 1986, p. 565; 80 ILR, p. 469.

<sup>235</sup> *Ibid.*

<sup>236</sup> ICJ Reports, 1986, p. 568; 80 ILR, p. 473. See, as to the notion of critical date, above, p. 367.

<sup>237</sup> ICJ Reports, 1986, p. 565; 80 ILR, p. 470.

<sup>238</sup> ICJ Reports, 1986, p. 566; 80 ILR, p. 459. This was reaffirmed by the Court in the *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras)* case, ICJ Reports, 1992, pp. 351, 386–7; 97 ILR, pp. 266, 299–300. The Court in the latter case went on to note that ‘*uti possidetis juris* is essentially a retrospective principle,

investing as international boundaries administrative limits intended originally for quite other purposes’, *ibid.*, p. 388; 79 ILR, p. 301. See M. N. Shaw, ‘Case Concerning the Land, Island and Maritime Frontier Dispute’, 42 ICLQ, 1993, p. 929. See also *Nicaragua v. Honduras*, ICJ Reports, 2007, pp. 659, 706 ff.

<sup>239</sup> *El Salvador/Honduras*, ICJ Reports, 1992, pp. 351, 559. See also *Nicaragua v. Colombia*, ICJ Reports, 2012, para. 64.

<sup>240</sup> *Benin/Niger*, ICJ Reports, 2005, pp. 90, 148 and *Burkina Faso/Niger*, ICJ Reports, 2013, para. 66.

<sup>241</sup> See eg *Nicaragua v. Colombia*, ICJ Reports, 2012, pp. 624, 651.

<sup>242</sup> See e.g. R. Yakemtchouk, ‘Les Conflits de Territoires and de Frontières dans les États de l’Ex-URSS’, AFDI, 1993, p. 401. See also, with regard to the application of *uti possidetis* to the dissolution of the Czech and Slovak Federal Republic, J. Malenovsky, ‘Problèmes Juridiques Liés à la Partition de la Tchécoslovaquie’, *ibid.*, p. 328.

<sup>243</sup> 92 ILR, p. 168. See also A. Pellet, ‘Note sur la Commission d’Arbitrage de la Conférence Européenne pour la Paix en Yougoslavie’, AFDI, 1991, p. 329, and Pellet, ‘Activité de la Commission d’Arbitrage de la Conférence Européenne pour la Paix en Yougoslavie’, AFDI, 1992, p. 220.

<sup>244</sup> The Arbitration Commission was here dealing specifically with the internal boundaries between Serbia and Croatia and Serbia and Bosnia-Herzegovina.

<sup>245</sup> 92 ILR, p. 171. The Arbitration Commission specifically cited here the views of the International Court in the *Burkina Faso/Mali* case: see above, p. 381. Note also that the Under-Secretary of State of the Foreign and Commonwealth Office stated in January 1992 that ‘the borders of Croatia will become the frontiers of independent Croatia, so there is no doubt about that particular issue. That has been agreed amongst the Twelve, that will be our attitude towards those borders. They will just be changed from being republican borders to international frontiers’, UKMIL, 63 BYIL, 1992, p. 719.

<sup>246</sup> See e.g. M. N. Shaw, 'Peoples, Territorialism and Boundaries', 3 EJIL, 1997, pp. 477, 504, but cf. S. Ratner, 'Drawing a Better Line: *Uti Possidetis* and the Borders of New States', 90 AJIL, 1996, pp. 590, 613 ff. and M. Craven, 'The European Community Arbitration Commission on Yugoslavia', 65 BYIL, 1995, pp. 333, 385 ff.

<sup>247</sup> See generally K. H. Kaikobad, *Interpretation and Revision of International Boundary Decisions*, Cambridge, 2007; M. Kohen, 'La Relation Titres/Effectivités dans le Contentieux Territorial à la Lumière de la Jurisprudence Récente', 108 RGDIP, 2004, p. 561; M. Mendelson, 'The Cameroon–Nigeria Case in the International Court of Justice: Some Territorial Sovereignty and Boundary Delimitation Issues', 75 BYIL, 2004, p. 223; B. H. Oxman, 'The Territorial Temptation: A Siren Song at Sea', 100 AJIL, 2006, p. 830, and S. R. Ratner, 'Land Feuds and Their Solutions: Finding International Law Beyond the Tribunal Chamber', 100 AJIL, 2006, p. 808. Note that the International Court has emphasised that the principle of *uti possidetis* is concerned as much with title to territory as with the location of boundaries: see the *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras)* case, ICJ Reports, 1992, pp. 351, 387; 97 ILR, pp. 266, 300.

<sup>248</sup> See the *Libya/Chad* case, ICJ Reports, 1994, pp. 6, 38–40; 100 ILR, pp. 1, 37–9. See also *Oppenheim's International Law*, p. 663. Note that by virtue of article 11 of the Convention on Succession of States in Respect of Treaties, 1978, a succession of states does not as such affect a boundary established by a treaty or obligations or rights established by a treaty and relating to the regime of a boundary. Article 62 of the Vienna Convention on the Law of Treaties, 1969 provides that the doctrine of *rebus sic stantibus* does not apply to boundary treaties: see below, chapter 16, p. 688.

<sup>249</sup> ICJ Reports, 1994, p. 37; 100 ILR, p. 36.

<sup>250</sup> ICJ Reports, 1986, p. 554; 80 ILR, p. 440.

<sup>251</sup> ICJ Reports, 1992, p. 351; 97 ILR, p. 266. See also Shaw, 'Land, Island and Maritime Frontier Dispute'.

<sup>314</sup> See e.g. *Oppenheim's International Law*, pp. 650–1, and N. Matte, *Treatise on Air–Aeronautical Law*, Montreal, 1981, [chapters 4 and 5](#).

<sup>315</sup> Matte, *Treatise*, pp. 91–6.

<sup>316</sup> Article 1. Each party also undertook to accord in peacetime freedom of innocent passage to the private aircraft of other parties so long as they complied with the rules made by or under the authority of the Convention. Articles 5–10 provided that the nationality of aircraft would be based upon registration and that registration would take place in the state of which their owners were nationals. An International Commission for Air Navigation was established. See also the 1928 American Convention on Commercial Aviation.

<sup>317</sup> ICJ Reports, 1986, pp. 14, 128; 76 ILR, p. 1.

<sup>318</sup> ICJ Reports, 2005, p. 142.

**319** See e.g. *Oppenheim's International Law*, p. 652. It should, however, be noted that articles 38 and 39 of the Convention on the Law of the Sea, 1982 provide for a right of transit passage through straits used for international navigation between one part of the high seas or an exclusive economic zone and another part of the high seas or an exclusive economic zone for aircraft as well as ships. Note also that under article 53 of this Convention, aircraft have a right of overflight with regard to designated air routes above archipelagic waters.

**320** See also *Pan Am Airways v. The Queen* (1981) 2 SCR 565; 90 ILR, p. 213, with regard to the exercise of sovereignty over the airspace above the high seas.

**321** Note the role played by the UN Committee on the Peaceful Uses of Outer Space established in 1958 and consisting currently of sixty-nine states. The Committee has a Legal Sub-Committee and a Scientific and Technical Sub-Committee: see, in particular, Christol, *Modern International Law*, pp. 13–20, and [www.unoosa.org/oosa/COPUOS/copuos.html](http://www.unoosa.org/oosa/COPUOS/copuos.html).

**322** See e.g. Fawcett, *Outer Space*, chapter 7.

**323** The UK has noted, for example, that, ‘for practical purposes the limit [between airspace and outer space] is considered to be as high as any aircraft can fly’, 70 BYIL, 1999, p. 520.

**324** See generally Christol, *Modern International Law*, chapter 10, and see also e.g. UKMIL, 64 BYIL, 1993, p. 689. A variety of suggestions have been put forward regarding the method of delimitation, ranging from the properties of the atmosphere to the lowest possible orbit of satellites. They appear to fall within either a spatial or a functional category: see *ibid.*, and UN Doc. A/AC.105/C.2/7/Add.1, 21 January 1977. Some states have argued for a 110 km boundary: see e.g. USSR, 21(4) *UN Chronicle*, 1984, p. 37; others feel it is premature to establish such a fixed delimitation, e.g. USA and UK, *ibid.* See also 216 HL Deb., col. 975, 1958–9, and D. Goedhuis, ‘The Problems of the Frontiers of Outer Space and Airspace’, 174 HR, 1982, p. 367.

**327** See above, chapter 3, and B. Cheng, ‘United Nations Resolutions on Outer Space: “Instant” International Customary Law?’, 5 IJIL, 1965, p. 23.

**328** See e.g. Christol, *Modern International Law*, chapter 2. See also *Oppenheim’s International Law*, p. 828.

**329** The issue became particularly controversial in the light of the US Strategic Defence Initiative (‘Star Wars’), which aimed to develop a range of anti-satellite and anti-missile weapons based in space. The UN Committee on the Peaceful Uses of Outer Space considered the issue, although without the participation of the US, which objected to the matter being considered: see e.g. 21(6) *UN Chronicle*, 1984, p. 18.

**330** See e.g. Marcoff, *Traité*, pp. 361 ff.

**331** See e.g. Christol, *Modern International Law*, pp. 25–6. See also Goedhuis, ‘Legal Issues Involved in the Potential Military Uses of Space Stations’ in *Liber Amicorum for Rt Hon. Richard Wilberforce* (eds. M. Bos and I. Brownlie), Oxford, 1987, p. 23, and Gorove, *Developments*, part VI.

**332** See e.g. B. Cheng, ‘Article VI of the 1967 Treaty Revisited’, 1 *Journal of Space Law*, 1998, p. 7.

**333** See further Cheng, *Studies in Space Law*, [chapters 17](#) and [18](#).

**334** See e.g. the Exchange of Notes between the UK and Chinese governments with regard to liability for damages arising during the launch phase of the Asiasat Satellite in 1990 in accordance with *inter alia* the 1967 and 1972 Conventions, UKMIL, 64 BYIL, 1993, p. 689.

**335** The claim was for \$6,401,174.70. See 18 ILM, 1979, pp. 899 ff. See also Christol, *Modern International Law*, pp. 59 ff., and Christol, 'International Liability for Damage Caused by Space Objects', 74 AJIL, 1980, p. 346. B. Cheng has drawn attention to difficulties concerning the notion of damage here as including environmental damage: see International Law Association, Report of the Sixty-ninth Conference, London, 2000, p. 581. Note also that under article 3 of the 1967 Treaty, all states parties to the Treaty agree to carry on activities 'in accordance with international law', which clearly includes rules relating to state responsibility. See also Gorove, *Developments*, part V, and B. Hurwitz, *State Liability for Outer Space Activities in Accordance with the 1972 Convention on International Liability for Damage Caused by Space Objects*, Dordrecht, 1992.

**336** GA resolution 62/217. The Guidelines were produced by the UN Committee on the Peaceful Uses of Outer Space, A/62/20, A/AC.105/890, para. 99 and A/AC.105/848, annex II.

**337** The International Law Association adopted in 1994 the 'Buenos Aires International Instrument on the Protection of the Environment from Damage Caused by Space Debris'. This provides that each state or international organisation party to the Instrument that launches or procures the launching of a space object is internationally liable for damage arising therefrom to another state, persons or objects, or international organisation party to the Instrument as a consequence of space debris produced by any such object: see Report of the Sixty-sixth Conference at Buenos Aires, London, 1994, p. 7.

**338** Resolution 47/68.

**339** The UK Outer Space Act 1986, for example, provides a framework for private sector space enterprises by creating a licensing system for outer space activities and by establishing a system for indemnification for damage suffered by third parties or elsewhere. The Act also establishes a statutory register of the launch of space objects. Note also that the US has signed a number of agreements with other states providing for assistance abroad in the event of an emergency landing of the space shuttle. These agreements also provide for US liability to compensate for damage and loss caused as a result of an emergency landing, in accordance with the 1972 Treaty: see Cumulative DUSPIL 1981–8, vol. II, p. 2269. In 1988 an Agreement on Space Stations was signed between the US, the governments of the member states of the European Space Agency, Japan and Canada. This provides *inter alia* for

registration of flight elements as space objects under the Registration Convention of 1975, each state retaining jurisdiction over the elements it so registers and personnel in or on the space station who are its nationals. There is also an interesting provision (article 22) permitting the US to exercise criminal jurisdiction over misconduct committed by a non-US national in or on a non-US element of the manned base or attached to the manned base, which endangers the safety of the manned base or the crew members thereon. Before proceeding to trial with such a prosecution, the US shall consult with the partner state whose nationality the alleged perpetrator holds, and shall either have received the agreement of that partner to the prosecution or failed to have received an assurance that the partner state intends to prosecute.

## 11 The law of the sea

---

The seas have historically performed two important functions: first, as a medium of communication, and secondly as a vast reservoir of resources, both living and non-living. Both of these functions have stimulated the development of legal rules.<sup>1</sup> The fundamental principle governing the law of the sea is that ‘the land dominates the sea’ so that the land territorial situation constitutes the starting point for the determination of the maritime rights of a coastal state.<sup>2</sup>

The seas were at one time thought capable of subjection to national sovereignties. The Portuguese in particular in the seventeenth century proclaimed huge tracts of the high seas as part of their territorial domain, but these claims stimulated a response by Grotius who elaborated the doctrine of the open seas, whereby the oceans as *res communis* international law were to be accessible to all nations but incapable of appropriation.<sup>3</sup> This view prevailed, partly because it accorded with the interests of the North European states, which demanded freedom of the seas for the purposes of exploration and expanding commercial intercourse with the East.

The freedom of the high seas rapidly became a basic principle of international law, but not all the seas were so characterised. It was permissible for a coastal state to appropriate a maritime belt around its coastline as territorial waters, or territorial sea, and treat it as an indivisible part of its domain. Much of the history of the law of the sea has centred on the extent of the territorial sea or the precise location of the dividing line between it and the high seas and other recognised zones. The original stipulation linked the width of the territorial sea to the ability of the coastal state to dominate it by military means from the confines of its own shore. But the end of the previous and the present century have witnessed continual pressure by states to enlarge the maritime belt and thus subject more of the oceans to their exclusive jurisdiction.

Beyond the territorial sea, other jurisdictional zones have been in process of development. Coastal states may now exercise particular jurisdictional functions in the contiguous zone, and the trend of international law today is moving rapidly in favour of even larger zones in which the coastal state may enjoy certain rights to the exclusion of other nations, such as fishery zones, continental shelves and, more recently, exclusive economic zones. However, in each case whether a state is entitled to a territorial sea, continental shelf or exclusive economic zone is a question to be decided by the law of the sea.<sup>4</sup>

This gradual shift in the law of the sea towards the enlargement of the territorial sea (the accepted maximum limit is now a width of 12 nautical miles in contrast to 3 nautical miles some sixty years ago), coupled with the continual assertion of

jurisdictional rights over portions of what were regarded as high seas, reflects a basic change in emphasis in the attitude of states to the sea.

The predominance of the concept of the freedom of the high seas has been modified by the realisation of resources present in the seas and seabed beyond the territorial seas. Parallel with the developing tendency to assert ever greater claims over the high seas, however, has been the move towards proclaiming a 'common heritage of mankind' regime over the seabed of the high seas. The law relating to the seas, therefore, has been in a state of flux for several decades as the conflicting principles have manifested themselves.

A series of conferences have been held, which led to the four 1958 Conventions on the Law of the Sea and then to the 1982 Convention on the Law of the Sea.<sup>5</sup> The 1958 Convention on the High Seas was stated in its preamble to be 'generally declaratory of established principles of international law', while the other three 1958 instruments can be generally accepted as containing both reiterations of existing rules and new rules.

The pressures leading to the Law of the Sea Conference, which lasted between 1974 and 1982 and involved a very wide range of states and international organisations, included a variety of economic, political and strategic factors. Many Third World states wished to develop the exclusive economic zone idea, by which coastal states would have extensive rights over a 200-mile zone beyond the territorial sea, and were keen to establish international control over the deep seabed, so as to prevent the technologically advanced states from being able to extract minerals from this vital and vast source freely and without political constraint. Western states were desirous of protecting their navigation routes by opposing any weakening of the freedom of passage through international straits particularly, and wished to protect their economic interests through free exploitation of the resources of the high seas and the deep seabed. Other states and groups of states sought protection of their particular interests.<sup>6</sup> Examples here would include the landlocked and geographically disadvantaged states, archipelagic states and coastal states. The effect of this kaleidoscopic range of interests was very marked and led to the 'package deal' concept of the final draft. According to this approach, for example, the Third World accepted passage through straits and enhanced continental shelf rights beyond the 200-mile limit from the coasts in return for the internationalisation of deep sea mining.<sup>7</sup>

The 1982 Convention contains 320 articles and 9 Annexes. It was adopted by 130 votes to 4, with 17 abstentions. The Convention entered into force on 16 November 1994, twelve months after the required 60 ratifications. In order primarily to meet Western concerns with regard to the International Seabed Area (Part XI of the Convention), an Agreement relating to the Implementation of Part XI of the 1982

Convention was adopted on 29 July 1994.<sup>8</sup>

Many of the provisions in the 1982 Convention repeat principles enshrined in the earlier instruments and others have since become customary rules, but many new rules were proposed. Accordingly, a complicated series of relationships between the various states exists in this field, based on customary rules and treaty rules.<sup>9</sup> All states are *prima facie* bound by the accepted customary rules, while only the parties to the five treaties involved will be bound by the new rules contained therein, and since one must envisage some states not adhering to the 1982 Conventions, the 1958 rules will continue to be of importance.<sup>10</sup> During the twelve-year period between the signing of the Convention and its coming into force, the influence of its provisions was clear in the process of law creation by state practice.<sup>11</sup>

## The territorial sea

### Internal waters<sup>12</sup>

Internal waters are deemed to be such parts of the seas as do not form part of the high seas or the territorial sea or the contiguous or exclusive economic zones, and are accordingly classed as appertaining to the land territory of the coastal state. Internal waters, whether harbours, lakes or rivers, are such waters as are to be found on the landward side of the baselines from which the width of the territorial and other zones is measured,<sup>13</sup> and are assimilated with the sovereign territory of the state.<sup>14</sup> They differ from the territorial sea primarily in that there does not exist any right of innocent passage from which the shipping of other states may benefit. There is an exception to this rule where the straight baselines enclose as internal waters what had been territorial waters.<sup>15</sup>

In general, a coastal state may exercise its jurisdiction over foreign ships within its internal waters to enforce its laws, although the judicial authorities of the flag state (i.e. the state whose flag the particular ship flies) may also act where crimes have occurred on board ship. This concurrent jurisdiction may be seen in two cases.

In *R v. Anderson*,<sup>16</sup> in 1868, the Court of Criminal Appeal in the UK declared that an American national who had committed manslaughter on board a British vessel in French internal waters was subject to the jurisdiction of the British courts, even though he was also within the sovereignty of French justice (and American justice by reason of his nationality), and thus could be correctly convicted under English law. The US Supreme Court held in *Wildenhus'* case<sup>17</sup> that the American courts had jurisdiction to try a crew member of a Belgian vessel for the murder of another

Belgian national when the ship was docked in the port of Jersey City in New York.<sup>18</sup>

A merchant ship in a foreign port or in foreign internal waters is automatically subject to the local jurisdiction (unless there is an express agreement to the contrary), although where purely disciplinary issues related to the ship's crew are involved, which do not concern the maintenance of peace within the territory of the coastal state, *then* such matters would by courtesy be left to the authorities of the flag state to regulate.<sup>19</sup> Although some writers have pointed to theoretical differences between the common law and French approaches, in practice the same fundamental proposition applies.<sup>20</sup>

However, a completely different situation operates where the foreign vessel involved is a warship. In such cases, the authorisation of the captain or of the flag state is necessary before the coastal state may exercise its jurisdiction over the ship and its crew. This is due to the status of the warship as a direct arm of the sovereign of the flag state.<sup>21</sup>

## Baselines<sup>22</sup>

The width of the territorial sea is defined from the low-water mark around the coasts of the state. This is the traditional principle under customary international law and was reiterated in article 3 of the Geneva Convention on the Territorial Sea and the Contiguous Zone in 1958 and article 5 of the 1982 Convention, and the low-water line along the coast is defined 'as marked on large-scale charts officially recognised by the coastal state'.<sup>23</sup>

In the majority of cases, it will not be very difficult to locate the low-water line which is to act as the baseline for measuring the width of the territorial sea.<sup>24</sup> By virtue of the 1958 Convention on the Territorial Sea and the 1982 Law of the Sea Convention, the low-water line of a low-tide elevation<sup>25</sup> may now be used as a baseline for measuring the breadth of the territorial sea if it is situated wholly or partly within the the territorial sea measured from the mainland or an island. However, a low-tide elevation wholly situated beyond the territorial sea will generate no territorial sea of its own.<sup>26</sup> When a low-tide elevation is situated in the overlapping area of the territorial sea of two states, both are in principle entitled to use this as part of the relevant low-water line in measuring their respective territorial sea.<sup>27</sup> However, the International Court has taken the view that low-tide elevations may not be appropriated as part of the territory of the state concerned, unless within the territorial sea and thus part of the sovereignty of the coastal state over those waters, and thus cannot be fully assimilated with islands.<sup>28</sup> A low-tide elevation with a lighthouse or similar installation built upon it may be used for the

purpose of drawing a straight baseline.<sup>29</sup>

Sometimes, however, the geography of the state's coasts will be such as to cause certain problems: for instance, where the coastline is deeply indented or there are numerous islands running parallel to the coasts, or where there exist bays cutting into the coastlines. Special rules have evolved to deal with this issue, which is of importance to coastal states, particularly where foreign vessels regularly fish close to the limits of the territorial sea. A more rational method of drawing baselines might have the effect of enclosing larger areas of the sea within the state's internal waters, and thus extend the boundaries of the territorial sea further than the traditional method might envisage.

This point was raised in the *Anglo-Norwegian Fisheries* case,<sup>30</sup> before the International Court of Justice. The case concerned a Norwegian decree delimiting its territorial sea along some 1,000 miles of its coastline. However, instead of measuring the territorial sea from the low-water line, the Norwegians constructed a series of straight baselines linking the outermost parts of the land running along the *skjaergaard* (or fringe of islands and rocks) which parallels the Norwegian coastline. This had the effect of enclosing within its territorial limits parts of what would normally have been the high seas if the traditional method had been utilised. As a result, certain disputes involving British fishing boats arose, and the United Kingdom challenged the legality of the Norwegian method of baselines under international law. The Court held that it was the outer line of the *skjaergaard* that was relevant in establishing the baselines, and not the low-water line of the mainland. This was dictated by geographic realities. The Court noted that the normal method of drawing baselines that are parallel to the coast (the *tracé parallèle*) was not applicable in this case because it would necessitate complex geometrical constructions in view of the extreme indentations of the coastline and the existence of the series of islands fringing the coasts.<sup>31</sup>

Since the usual methods did not apply, and taking into account the principle that the territorial sea must follow the general direction of the coasts, the concept of straight baselines drawn from the outer rocks could be considered.<sup>32</sup> The Court also made the point that the Norwegian system had been applied consistently over many years and had met no objections from other states, and that the UK had not protested until many years after it had first been introduced.<sup>33</sup> In other words, the method of straight baselines operated by Norway:

had been consolidated by a constant and sufficiently long practice, in the face of which the attitude of governments bears witness to the fact that they did not consider it to be contrary to international law.<sup>34</sup>

Thus, although noting that Norwegian rights had been established through actual practice coupled with acquiescence, the Court regarded the straight baseline system itself as a valid principle of international law in view of the special geographic conditions of the area. The Court provided criteria for determining the acceptability of any such delimitations. The drawing of the baselines had not to depart from the general direction of the coast, in view of the close dependence of the territorial sea upon the land domain; the baselines had to be drawn so that the sea area lying within them had to be sufficiently closely linked to the land domain to be subject to the regime of internal waters, and it was permissible to consider in the process ‘certain economic interests peculiar to a region, the reality and importance of which are evidenced by long usage’.<sup>35</sup>

These principles emerging from the *Fisheries* case were accepted by states as part of international law within a comparatively short period.

Article 4 of the Geneva Convention on the Territorial Sea, 1958 declared that the straight baseline system could be used in cases of indented coastlines or where there existed a *skjaergaard*, provided that the general direction of the coast was followed and that there were sufficiently close links between the sea areas within the lines and the land domain to be subject to the regime of internal waters. In addition, particular regional economic interests of long standing may be considered where necessary.<sup>36</sup>

A number of states now use the system, including, it should be mentioned, the United Kingdom as regards areas on the west coast of Scotland.<sup>37</sup> However, there is evidence that, perhaps in view of the broad criteria laid down, many states have used this system in circumstances that are not strictly justifiable in law.<sup>38</sup> However, the Court made it clear in *Qatar v. Bahrain* that

the method of straight baselines, which is an exception to the normal rules for the determination of baselines, may only be applied if a number of conditions are met. This method must be applied restrictively. Such conditions are primarily that either the coastline is deeply indented and cut into, or that there is a fringe of islands along the coast in its immediate vicinity.<sup>39</sup>

Further, the Court emphasised that the fact that a state considers itself a multiple-island state or a *de facto* archipelago does not allow it to deviate from the normal rules for the determination of baselines unless the relevant conditions are met.<sup>40</sup>

Where the result of the straight baseline method is to enclose as internal waters areas previously regarded as part of the territorial sea or high seas, a right of innocent passage shall be deemed to exist in such waters by virtue of article 5(2) of the 1958 Convention.<sup>41</sup>

## Bays<sup>42</sup>

Problems also arise as to the approach to be adopted with regard to bays, in particular whether the waters of wide-mouthed bays ought to be treated as other areas of the sea adjacent to the coast, so that the baseline of the territorial sea would be measured from the low-water mark of the coast of the bay, or whether the device of the straight baseline could be used to 'close off' the mouth of the bay of any width and the territorial limit measured from that line.

It was long accepted that a straight closing line could be used across the mouths of bays, but there was considerable disagreement as to the permitted width of the bay beyond which this would not operate.<sup>43</sup> The point was settled in article 7 of the 1958 Convention on the Territorial Sea. This declared that: otherwise a straight baseline of 24 miles may be drawn.<sup>44</sup>

if the distance between the low-water marks of the natural entrance points of a bay does not exceed twenty-four miles, a closing line may be drawn between these two low-water marks, and the waters enclosed thereby shall be considered as internal waters,

This provision, however, does not apply to historic bays. These are bays the waters of which are treated by the coastal state as internal in view of historic rights supported by general acquiescence rather than any specific principle of international law.<sup>45</sup> A number of states have claimed historic bays: for example, Canada with respect to Hudson Bay (although the US has opposed this)<sup>46</sup> and certain American states as regards the Gulf of Fonseca.<sup>47</sup> The question of this Gulf came before the International Court in the *Land, Island and Maritime Frontier Dispute (El Salvador/Honduras; Nicaragua intervening)*.<sup>48</sup> The Court noted that the states concerned and commentators were agreed that the Gulf was a historic bay, but this was defined in terms of the particular historical situation of that Gulf, especially as it constituted a pluri-state bay, for which there were no agreed and codified general rules of the kind well established for single-state bays.<sup>49</sup> In the light of the particular historical circumstances and taking particular note of the 1917 decision, the Court found that the Gulf, beyond a long-accepted 3-mile maritime belt for the coastal states, constituted historic waters subject to the co-ownership or a condominium of the three coastal states.<sup>50</sup> The Court continued by noting that the vessels of other states would enjoy a right of innocent passage in the waters beyond the coastal belt in order to ensure access to any one of the three coastal states.<sup>51</sup> Having decided that the three states enjoyed a condominium within the Gulf, the Court concluded that there was a tripartite presence at the closing line of the Gulf.<sup>52</sup>

The United States Supreme Court has taken the view that where waters are outside the statutory limits for inland waters, the exercise of sovereignty required to establish title to a historic bay amounted to the exclusion of all foreign vessels and navigation from the area claimed. The continuous authority exercised in this fashion had to be coupled with the acquiescence of states. This was the approach in the *US v. State of Alaska* case<sup>53</sup> concerning the waters of Cook Inlet. The Supreme Court held that Alaska had not satisfied the terms and that the Inlet had not been regarded as a historic bay under Soviet, American or Alaskan sovereignty. Accordingly, it was the federal state and not Alaska which was entitled to the subsurface of Cook Inlet.<sup>54</sup>

In response to the Libyan claim to the Gulf of Sirte (Sidra) as a historic bay and the consequent drawing of a closing line of nearly 300 miles in length in 1973, several states immediately protested, including the US and the states of the European Community.<sup>55</sup> The US in a note to Libya in 1974 referred to ‘the international law standards of past open, notorious and effective exercise of authority, and the acquiescence of foreign nations’<sup>56</sup> and has on several occasions sent naval and air forces into the Gulf in order to maintain its opposition to the Libyan claim and to assert that the waters of the Gulf constitute high seas.<sup>57</sup> Little evidence appears, in fact, to support the Libyan contention.

## **Islands<sup>58</sup>**

As far as islands are concerned, the general provisions noted above regarding the measurement of the territorial sea apply. Islands are defined in the 1958 Convention on the Territorial Sea as consisting of ‘a naturally-formed area of land, surrounded by water, which is above water at high tide’,<sup>59</sup> and they can generate a territorial sea, contiguous zone, exclusive economic zone and continental shelf where relevant.<sup>60</sup> Where there exists a chain of islands which are less than 24 miles apart, a continuous band of territorial sea may be generated.<sup>61</sup> However, article 121(3) of the 1982 Convention provides that ‘rocks which cannot sustain human habitation or economic life of their own shall have no exclusive economic zone or continental shelf’.<sup>62</sup> Article 121(3) begs a series of questions, such as the precise dividing line between rocks and islands and as to the actual meaning of an ‘economic life of their own’, and a number of states have made controversial claims.<sup>63</sup> Whether this provision over and above its appearance in the Law of the Sea Convention is a rule of customary law is unclear.<sup>64</sup>

## **Archipelagic states<sup>65</sup>**

Problems have arisen as a result of efforts by states comprising a number of islands

to draw straight baselines around the outer limits of their islands, thus 'boxing in' the whole territory. Indonesia in particular has resorted to this method, against the protests of a number of states since it tends to reduce previously considered areas of the high seas extensively used as shipping lanes to the sovereignty of the archipelago state concerned.<sup>66</sup>

There has been a great deal of controversy as to which international law principles apply in the case of archipelagos and the subject was not expressly dealt with in the 1958 Geneva Convention.<sup>67</sup> Article 46(a) defines an archipelagic state as 'a state constituted wholly by one or more archipelagos and may include other islands', while article 46(b) defines archipelagos as 'a group of islands, including parts of islands, interconnecting waters and other natural features which are so closely interrelated that such islands, waters and other natural features form an intrinsic geographical, economic and political entity, or which historically have been regarded as such'. This raises questions as to whether states that objectively fall within the definition are therefore automatically to be regarded as archipelagic states. The list of states that have not declared that they constitute archipelagic states, although they would appear to conform with the definition, would include the UK and Japan.<sup>68</sup> Bahrain contended in *Qatar v. Bahrain* that it constituted a 'de facto archipelago or multiple island state' and that it could declare itself an archipelagic state under the Law of the Sea Convention, 1982, enabling it to take advantage of the straight baselines rule contained in article 47. The Court, however, noted that such a claim did not fall within Bahrain's formal submissions and thus it did not need to take a position on the issue.<sup>69</sup> Article 47 provides that an archipelagic state may draw straight archipelagic baselines joining the outermost points of the outermost islands and drying reefs of the archipelago, which would then serve as the relevant baselines for other purposes. There are a number of conditions before this may be done, however, and article 47 provides as follows:

1. An archipelagic state may draw straight archipelagic baselines joining the outermost points of the outermost islands and drying reefs of the archipelago provided that within such baselines are included the main islands and in areas in which the ratio of the area of the water to the area of the land, including atolls, is between 1 to 1 and 9 to 1.
2. The length of such baselines shall not exceed 100 nautical miles, except that up to 3 per cent of the total number of baselines enclosing any archipelago may exceed that length, up to a maximum length of 125 nautical miles.
3. The drawing of such baselines shall not depart to any appreciable extent from the general configuration of the archipelago.
4. Such baselines shall not be drawn from low-tide elevations, unless

- lighthouses or similar installations which are permanently above sea level have been built on them or where a low-tide elevation is situated wholly or partly at a distance not exceeding the breadth of the territorial sea from the nearest island.
5. The system of such baselines shall not be applied by an archipelagic state in such a manner as to cut off from the high seas or the exclusive economic zone the territorial sea of another state.
  6. If a part of the archipelagic waters of an archipelagic state lies between two parts of an immediately adjacent neighbouring state, existing rights and all other legitimate interests which the latter state has traditionally exercised in such waters and all rights stipulated by agreement between those states shall continue and be respected.
  7. For the purpose of computing the ratio of water to land under paragraph 1, land areas may include waters lying within the fringing reefs of islands and atolls, including that part of a steep-sided oceanic plateau which is enclosed or nearly enclosed by a chain of limestone islands and drying reefs lying on the perimeter of the plateau.
  8. The baselines drawn in accordance with this article shall be shown on charts of a scale or scales adequate for ascertaining their position. Alternatively, lists of geographic co-ordinates of points, specifying the geodetic datum, may be substituted.
  9. The archipelagic states shall give due publicity to such charts or lists of geographical co-ordinates and shall deposit a copy of each such chart or list with the Secretary-General of the United Nations.

All the waters within such baselines are archipelagic waters<sup>70</sup> over which the state has sovereignty,<sup>71</sup> but existing agreements, traditional fishing rights and existing submarine cables must be respected.<sup>72</sup> In addition, ships of all states shall enjoy the rights of innocent passage through archipelagic waters<sup>73</sup> and all the ships and aircraft are to enjoy a right of archipelagic sea lanes passage through such lanes and air routes designated by the archipelagic state for ‘continuous and expeditious passage’.<sup>74</sup>

In response to a reported closure in 1988 of the Straits of Sunda and Lombok by Indonesia, the US stressed that the archipelagic provisions of the 1982 Convention reflected customary international law and that those straits were subject to the regime of archipelagic sea lanes passage. Accordingly, it was pointed out that any interference with such passage would violate international law.<sup>75</sup>

## **The width of the territorial sea<sup>76</sup>**

There has historically been considerable disagreement as to how far the territorial sea may extend from the baselines. Originally, the ‘cannon-shot’ rule defined the width required in terms of the range of shore-based artillery, but at the turn of the nineteenth century, this was transmuted into the 3-mile rule. This was especially supported by the United States and the United Kingdom, and any detraction had to be justified by virtue of historic rights and general acquiescence as, for example, the Scandinavian claim to 4 miles.<sup>77</sup>

However, the issue was much confused by the claims of many coastal states to exercise certain jurisdictional rights for particular purposes: for example, fisheries, customs and immigration controls. It was not until after the First World War that a clear distinction was made between claims to enlarge the width of the territorial sea and claims over particular zones.

More recently the 3-mile rule has been discarded as a rule of general application to be superseded by contending assertions. The 1958 Geneva Convention on the Territorial Sea did not include an article on the subject because of disagreements among the states, while the 1960 Geneva Conference failed to accept a United States–Canadian proposal for a 6-mile territorial sea coupled with an exclusive fisheries zone for a further 6 miles by only one vote.<sup>78</sup>

Article 3 of the 1982 Convention, however, notes that all states have the right to establish the breadth of the territorial sea up to a limit not exceeding 12 nautical miles from the baselines. This clearly accords with the evolving practice of states.<sup>79</sup> The UK adopted a 12-mile limit in the Territorial Sea Act 1987, for instance, as did the US by virtue of Proclamation No. 5928 in December 1988.<sup>80</sup>

## **The juridical nature of the territorial sea<sup>81</sup>**

The territorial sea appertains to the territorial sovereignty of the coastal state and thus belongs to it automatically. For example, all newly independent states (with a coast) come to independence with an entitlement to a territorial sea.<sup>82</sup> There have been a number of theories as to the precise legal character of the territorial sea of the coastal state, ranging from treating the territorial sea as part of the *res communis*, but subject to certain rights exercisable by the coastal state, to regarding the territorial sea as part of the coastal state’s territorial domain subject to a right of innocent passage by foreign vessels.<sup>83</sup> Nevertheless, it cannot be disputed that the coastal state enjoys sovereign rights over its maritime belt and extensive jurisdictional control, having regard to the relevant rules of international law. The fundamental restriction upon the sovereignty of the coastal state is the right of other nations to innocent passage through the territorial sea, and this distinguishes the

territorial sea from the internal waters of the state, which are fully within the unrestricted jurisdiction of the coastal nation.

Articles 1 and 2 of the Convention on the Territorial Sea, 1958<sup>84</sup> provide that the coastal state's sovereignty extends over its territorial sea and to the airspace and seabed and subsoil thereof, subject to the provisions of the Convention and of international law. The territorial sea forms an undeniable part of the land territory to which it is bound, so that a cession of land will automatically include any band of territorial waters.<sup>85</sup>

The coastal state may, if it so desires, exclude foreign nationals and vessels from fishing within its territorial sea and (subject to agreements to the contrary) from coastal trading (known as cabotage), and reserve these activities for its own citizens.

Similarly the coastal state has extensive powers of control relating to, amongst others, security and customs matters. It should be noted, however, that how far a state chooses to exercise the jurisdiction and sovereignty to which it may lay claim under the principles of international law will depend upon the terms of its own municipal legislation, and some states will not wish to take advantage of the full extent of the powers permitted them within the international legal system.<sup>86</sup>

## **The right of innocent passage**

The right of foreign merchant ships (as distinct from warships) to pass unhindered through the territorial sea of a coastal has long been an accepted principle in customary international law, the sovereignty of the coast state notwithstanding. However, the precise extent of the doctrine is blurred and open to contrary interpretation, particularly with respect to the requirement that the passage must be 'innocent'.<sup>87</sup> Article 17 of the 1982 Convention lays down the following principle: 'ships of all states, whether coastal or land-locked, enjoy the right of innocent passage through the territorial sea'.

The doctrine was elaborated in article 14 of the Convention on the Territorial Sea, 1958, which emphasised that the coastal state must not hamper innocent passage and must publicise any dangers to navigation in the territorial sea of which it is aware. Passage is defined as navigation through the territorial sea for the purpose of crossing that sea without entering internal waters or of proceeding to or from that sea without entering internal waters or of proceeding to or from internal waters. It may include temporary stoppages, but only if they are incidental to ordinary navigation or necessitated by distress or *force majeure*.<sup>88</sup>

The coastal state may not impose charges for such passage unless they are in payment for specific services,<sup>89</sup> and ships engaged in passage are required to comply

with the coastal state's regulations covering, for example, navigation in so far as they are consistent with international law.<sup>90</sup>

Passage ceases to be innocent under article 14(4) of the 1958 Convention where it is 'prejudicial to the peace, good order or security of the coastal state' and in the case of foreign fishing vessels when they do not observe such laws and regulations as the coastal state may make and publish to prevent these ships from fishing in the territorial sea. In addition, submarines must navigate on the surface and show their flag.

Where passage is not innocent, the coastal state may take steps to prevent it in its territorial sea and, where ships are proceeding to internal waters, it may act to forestall any breach of the conditions to which admission of such ships to internal waters is subject. Coastal states have the power temporarily to suspend innocent passage of foreign vessels where it is essential for security reasons, provided such suspension has been published and provided it does not cover international straits.

Article 19(2) of the 1982 Convention has developed the notion of innocent passage contained in article 14(4) of the 1958 Convention by the provision of examples of prejudicial passage such as the threat or use of force; weapons practice; spying; propaganda; breach of customs, fiscal, immigration or sanitary regulations; wilful and serious pollution; fishing; research or survey activities and interference with coastal communications or other facilities. In addition, a wide-ranging clause includes 'any activity not having a direct bearing on passage'. This would appear to have altered the burden of proof from the coastal state to the other party with regard to innocent passage, as well as being somewhat difficult to define. By virtue of article 24 of the 1982 Convention, coastal states must not hamper the innocent passage of foreign ships, either by imposing requirements upon them which would have the practical effect of denying or impairing the right or by discrimination. Article 17 of the Geneva Convention on the Territorial Sea, 1958 provided that foreign ships exercising the right of innocent passage were to comply with the laws and regulations enacted by the coastal state, in particular those relating to transport and navigation. This was developed in article 21(1) of the 1982 Convention, which expressly provided that the coastal state could adopt laws and regulations concerning innocent passage with regard to:

- (a) the safety of navigation and the regulation of maritime traffic;
- (b) the protection of navigational aids and facilities and other facilities or installations;
- (c) the protection of cables and pipelines;
- (d) the conservation of the living resources of the sea;
- (e) the prevention of infringement of the fisheries laws and regulations of

- the coastal state;
- (f) the preservation of the environment of the coastal state and the prevention, reduction and control of pollution thereof;
- (g) marine scientific research and hydrographic surveys;
- (h) the prevention of infringement of the customs, fiscal, immigration or sanitary laws and regulations of the coastal state.

Breach of such laws and regulations will render the offender liable to prosecution, but will not make the passage non-innocent as such, unless article 19 has been infringed.<sup>91</sup>

One major controversy of considerable importance revolves around the issue of whether the passage of warships in peacetime is or is not innocent.<sup>92</sup> The question was further complicated by the omission of an article on the problem in the 1958 Convention on the Territorial Sea, and the discussion of innocent passage in a series of articles headed 'Rules applicable to all ships'. This has led some writers to assert that this includes warships by inference, but other authorities maintain that such an important issue could not be resolved purely by omission and inference, especially in view of the reservations by many states to the Convention rejecting the principle of innocent passage for warships and in the light of comments in the various preparatory materials to the 1958 Geneva Convention.<sup>93</sup>

It was primarily the Western states, with their preponderant naval power, that historically maintained the existence of a right of innocent passage for warships, to the opposition of the then communist and Third World nations. However, having regard to the rapid growth in their naval capacity and the ending of the Cold War, Soviet attitudes underwent a change.<sup>94</sup>

In September 1989, the US and the USSR issued a joint 'Uniform Interpretation of the Rules of International Law Governing Innocent Passage'.<sup>95</sup> This reaffirmed that the relevant rules of international law were stated in the 1982 Convention. It then provided that:

[a]ll ships, including warships, regardless of cargo, armament or means of propulsion, enjoy the right of innocent passage through the territorial sea in accordance with international law, for which neither prior notification nor authorisation is required.

The statement noted that where a ship in passage through the territorial sea was not engaged in any of the activities laid down in article 19(2), it was 'in innocent passage' since that provision was exhaustive. Ships in passage were under an

obligation to comply with the laws and regulations of the coastal state adopted in conformity with articles 21, 22, 23 and 25 of the 1982 Convention, provided such laws and regulations did not have the effect of denying or impairing the exercise of the right of innocent passage.

This important statement underlines the view that the list of activities laid down in article 19(2) is exhaustive so that a ship passing through the territorial sea not engaging in any of these activities is in innocent passage. It also lends considerable weight to the view that warships have indeed a right of innocent passage through the territorial sea and one that does not necessitate prior notification or authorisation.<sup>96</sup>

## **Jurisdiction over foreign ships<sup>97</sup>**

Where foreign ships are in passage through the territorial sea, the coastal state may only exercise its criminal jurisdiction as regards the arrest of any person or the investigation of any matter connected with a crime committed on board ship in defined situations. These are enumerated in article 27(1) of the 1982 Convention, reaffirming article 19(1) of the 1958 Convention on the Territorial Sea, as follows:

(a) if the consequences of the crime extend to the coastal state; or (b) if the crime is of a kind likely to disturb the peace of the country or the good order of the territorial sea; or (c) if the assistance of the local authorities has been requested by the master of the ship or by a diplomatic agent or consular officer of the country of the flag state; or (d) if such measures are necessary for the suppression of illicit traffic in narcotic drugs or psychotropic substances.<sup>98</sup>

However, if the ship is passing through the territorial sea having left the internal waters of the coastal state, then the coastal state may act in any manner prescribed by its laws as regards arrest or investigation on board ship and is not restricted by the terms of article 27(1). But the authorities of the coastal state cannot act where the crime was committed before the ship entered the territorial sea, providing the ship is not entering or has not entered internal waters.

Under article 28 of the 1982 Convention, the coastal state should not stop or divert a foreign ship passing through its territorial sea for the purpose of exercising civil jurisdiction in relation to a person on board ship, nor levy execution against or arrest the ship, unless obligations are involved which were assumed by the ship itself in the course of, or for the purpose of, its voyage through waters of the coastal state, or unless the ship is passing through the territorial sea on its way from internal waters. The above rules do not, however, prejudice the right of a state to levy execution against or to arrest, for the purpose of any civil proceedings, a foreign ship lying in

the territorial sea or passing through the territorial sea after leaving internal waters.<sup>99</sup>

Warships and other government ships operated for non-commercial purposes are immune from the jurisdiction of the coastal state, although they may be required to leave the territorial sea immediately for breach of rules governing passage and the flag state will bear international responsibility in cases of loss or damage suffered as a result.<sup>100</sup>

## **International straits<sup>101</sup>**

Article 16(4) of the 1958 Convention on the Territorial Sea declares that:

there shall be no suspension of the innocent passage of foreign ships through straits which are used for international navigation between one part of the high seas and another part of the high seas or the territorial sea of a foreign state.

This provision should be read in conjunction with the decision in the *Corfu Channel* case.<sup>102</sup> In this case, British warships passing through the straits were fired upon by Albanian guns. Several months later, an augmented force of cruisers and destroyers sailed through the North Corfu Channel and two of them were badly damaged after striking mines. This impelled the British authorities to sweep the Channel three weeks later, and to clear it of some twenty mines of German manufacture. The Court, in a much-quoted passage, emphasised that:

states in time of peace have a right to send their warships through straits used for international navigation between two parts of the high seas without the previous authorisation of a coastal state, provided that the passage is innocent.<sup>103</sup>

It was also noted that the minesweeping operation was in no way ‘innocent’ and was indeed a violation of Albania’s sovereignty, although the earlier passages by British naval vessels were legal.<sup>104</sup>

The 1982 Convention established a new regime for straits used for international navigation. The principle is reaffirmed that the legal status of the waters of the straits in question is unaffected by the provisions dealing with passage.<sup>105</sup>

A new right of transit passage is posited with respect to straits used for international navigation between one part of the high seas or an exclusive economic zone and another part of the high seas or an exclusive economic zone.<sup>106</sup> It involves

the exercise of the freedom of navigation and overflight solely for the purpose of continuous and expeditious transit of the strait and does not preclude passage through the strait to enter or leave a state bordering that strait.<sup>107</sup> States bordering the straits in question are not to hamper or suspend transit passage.<sup>108</sup>

There are three exceptions to the right: under article 36 where a route exists through the strait through the high seas or economic zone of similar navigational convenience; under article 38(1) in the case of a strait formed by an island of a state bordering the strait and its mainland, where there exists seaward of the island a route through the high seas or economic zone of similar navigational convenience; and under article 45 where straits connect an area of the high seas or economic zone with the territorial sea of a third state. Ships and aircraft in transit must observe the relevant international regulations and refrain from all activities other than those incidental to their normal modes of continuous and expeditious transit, unless rendered necessary by *force majeure* or by distress.<sup>109</sup> Thus, although there is no formal requirement for 'innocent' transit passage, the effect of articles 38 and 39 would appear to be to render transit passage subject to the same constraints. Under article 45, the regime of innocent passage will apply with regard to straits used for international navigation excluded from the transit passage provisions by article 38(1) and to international straits between a part of the high seas or economic zone and the territorial sea of a foreign state. In such cases, there shall be no suspension of the right to innocent passage.<sup>110</sup> The regime of transit passage specifically allows for the passage of aircraft and probably for underwater submarines, while there are fewer constraints on conduct during passage and less power for the coastal state to control passage than in the case of innocent passage.<sup>111</sup> Transit passage cannot be suspended for security or indeed any other reasons.<sup>112</sup>

It is unclear whether the right of transit passage has passed into customary law. Practice is as yet ambiguous.<sup>113</sup> Some states have provided explicitly for rights of passage through international straits. When the UK extended its territorial sea in 1987 to 12 miles, one of the consequences was that the high sea corridor through the Straits of Dover disappeared. The following year an agreement was signed with France which related to the delimitation of the territorial sea in the Straits of Dover and a joint declaration was issued in which both governments recognised:

rights of unimpeded transit passage for merchant vessels, state vessels and, in particular, warships following their normal mode of navigation, as well as the right of overflight for aircraft, in the Straits of Dover. It is understood that, in accordance with the principles governing this regime under the rules of international law, such passage will be exercised in a continuous and expeditious manner.<sup>114</sup>

A number of straits are subject to special regimes, which are unaffected by the above provisions.<sup>115</sup> One important example is the Montreux Convention of 1936 governing the Bosphorus and Dardanelles Straits. This provides for complete freedom of transit or navigation for merchant vessels during peacetime and for freedom of transit during daylight hours for some warships giving prior notification to Turkey.<sup>116</sup>

## **The contiguous zone<sup>117</sup>**

Historically some states have claimed to exercise certain rights over particular zones of the high seas. This has involved some diminution of the principle of the freedom of the high seas as the jurisdiction of the coastal state has been extended into areas of the high seas contiguous to the territorial sea, albeit for defined purposes only. Such restricted jurisdiction zones have been established or asserted for a number of reasons: for instance, to prevent infringement of customs, immigration or sanitary laws of the coastal state, or to conserve fishing stocks in a particular area, or to enable the coastal state to have exclusive or principal rights to the resources of the proclaimed zone.

In each case they enable the coastal state to protect what it regards as its vital or important interests without having to extend the boundaries of its territorial sea further into the high seas. It is thus a compromise between the interests of the coastal state and the interests of other maritime nations seeking to maintain the status of the high seas, and it marks a balance of competing claims. The extension of rights beyond the territorial sea has, however, been seen not only in the context of preventing the infringement of particular domestic laws, but also increasingly as a method of maintaining and developing the economic interests of the coastal state regarding maritime resources. The idea of a contiguous zone (i.e. a zone bordering upon the territorial sea) was virtually formulated as an authoritative and consistent doctrine in the 1930s by the French writer Gidel,<sup>118</sup> and it appeared in the Convention on the Territorial Sea. Article 24 declared that:

In a zone of the high seas contiguous to its territorial sea, the coastal state may exercise the control necessary to:

- (a) Prevent infringement of its customs, fiscal, immigration or sanitary regulations within its territory or territorial sea;
- (b) Punish infringement of the above regulations committed within its territory or territorial sea.

Thus, such contiguous zones were clearly differentiated from claims to full sovereignty as parts of the territorial sea, by being referred to as part of the high seas over which the coastal state may exercise particular rights. Unlike the territorial sea, which is automatically attached to the land territory of the state, contiguous zones have to be specifically claimed.

While sanitary and immigration laws are relatively recent additions to the rights enforceable over zones of the high seas and may be regarded as stemming by analogy from customs regulations, in practice they are really only justifiable since the 1958 Convention. On the other hand, customs zones have a long history and are recognised in customary international law as well. Many states, including the UK and the USA, have enacted legislation to enforce customs regulations over many years, outside their territorial waters and within certain areas, in order to suppress smuggling which appeared to thrive when faced only with territorial limits of 3 or 4 miles.<sup>119</sup>

Contiguous zones, however, were limited to a maximum of 12 miles from the baselines from which the territorial sea is measured. So if the coastal state already claimed a territorial sea of 12 miles, the question of contiguous zones would not arise.

This limitation, plus the restriction of jurisdiction to customs, sanitary and immigration matters, is the reason for the decline in the relevance of contiguous zones in international affairs in recent years. Under article 33 of the 1982 Convention, however, a coastal state may claim a contiguous zone (for the same purpose as the 1958 provisions) up to 24 nautical miles from the baselines. In view of the accepted 12 miles territorial sea limit, such an extension was required in order to preserve the concept. One crucial difference is that while under the 1958 system the contiguous zone was part of the high seas, under the 1982 Convention it would form part of the exclusive economic zone complex.<sup>120</sup> This will clearly have an impact upon the nature of the zone.

## **The exclusive economic zone<sup>121</sup>**

This zone has developed out of earlier, more tentative claims, particularly relating to fishing zones,<sup>122</sup> and as a result of developments in the negotiating processes leading to the 1982 Convention.<sup>123</sup> It marks a compromise between those states seeking a 200-mile territorial sea and those wishing a more restricted system of coastal state power.

One of the major reasons for the call for a 200-mile exclusive economic zone has

been the controversy over fishing zones. The 1958 Geneva Convention on the Territorial Sea did not reach agreement on the creation of fishing zones and article 24 of the Convention does not give exclusive fishing rights in the contiguous zone. However, increasing numbers of states have claimed fishing zones of widely varying widths. The European Fisheries Convention, 1964, which was implemented in the UK by the Fishing Limits Act 1964, provided that the coastal state has the exclusive right to fish and exclusive jurisdiction in matters of fisheries in a 6-mile belt from the baseline of the territorial sea; while within the belt between 6 and 12 miles from the baseline, other parties to the Convention have the right to fish, provided they had habitually fished in that belt between January 1953 and December 1962. This was an attempt to reconcile the interests of the coastal state with those of other states who could prove customary fishing operations in the relevant area. In view of the practice of many states in accepting at one time or another a 12-mile exclusive fishing zone, either for themselves or for some other states, it seems clear that there has already emerged an international rule to that effect. Indeed, the International Court in the *Fisheries Jurisdiction* cases<sup>124</sup> stated that the concept of the fishing zone, the area in which a state may claim exclusive jurisdiction independently of its territorial sea for this purpose, had crystallised as customary law in recent years and especially since the 1960 Geneva Conference, and that 'the extension of that fishing zone up to a 12-mile limit from the baselines appears now to be generally accepted'. That much is clear, but the question was whether international law recognised such a zone in excess of 12 miles.

In 1972, concerned at the proposals regarding the long-term effects of the depletion of fishing stocks around her coasts, Iceland proclaimed unilaterally a 50-mile exclusive fishing zone. The UK and the Federal Republic of Germany referred the issue to the ICJ and specifically requested the Court to decide whether or not Iceland's claim was contrary to international law.

The Court did not answer that question, but rather held that Iceland's fishing regulations extending the zone were not binding upon the UK and West Germany, since they had in no way acquiesced in them. However, by implication the ICJ based its judgment on the fact that there did not exist any rule of international law permitting the establishment of a 50-mile fishing zone. Similarly, it appeared that there was no rule prohibiting claims beyond 12 miles and that the validity of such claims would depend upon all relevant facts of the case and the degree of recognition by other states.

The Court emphasised instead the notion of preferential rights, which it regarded as a principle of customary international law. Such rights arose where the coastal state was 'in a situation of special dependence on coastal fisheries'.<sup>125</sup> However, this concept was overtaken by developments at the UN Conference and the 1982

Convention. Article 55 of the 1982 Convention provides that the exclusive economic zone is an area beyond and adjacent to the territorial sea, subject to the specific legal regime established under the Convention.

Under article 56, the coastal state in the economic zone has *inter alia*:

- (a) sovereign rights for the purpose of exploring and exploiting, conserving and managing the natural resources, whether living<sup>126</sup> or non-living, of the waters superjacent to the seabed and of the seabed and its subsoil and with regard to other activities for the economic exploitation and exploration of the zone, such as the production of energy from the water, currents and winds;
- (b) jurisdiction with regard to (i) the architecture and use of artificial islands, installations and structures;<sup>127</sup> (ii) marine scientific research;<sup>128</sup> (iii) the protection and preservation of the marine environment.<sup>129</sup>

Article 55 provides that the zone starts from the outer limit of the territorial sea, but by article 57 shall not extend beyond 200 nautical miles from the baselines from which the breadth of the territorial sea is measured. Accordingly, in reality, the zone itself would be no more than 188 nautical miles where the territorial sea was 12 nautical miles, but rather more where the territorial sea of the coastal state was less than 12 miles. Where the relevant waters between neighbouring states are less than 400 miles, delimitation becomes necessary.<sup>130</sup> Islands generate economic zones, unless they consist of no more than rocks which cannot sustain human habitation.<sup>131</sup>

Article 58 lays down the rights and duties of other states in the exclusive economic zone. These are basically the high seas freedom of navigation, overflight and laying of submarine cables and pipelines. It is also provided that in exercising their rights and performing their duties, states should have due regard to the rights, duties and laws of the coastal state. In cases of conflict over the attribution of rights and jurisdiction in the zone, the resolution is to be on the basis of equity and in the light of all the relevant circumstances.<sup>132</sup> Article 60(2) provides that in the exclusive economic zone, the coastal state has jurisdiction to apply customs laws and regulations in respect of artificial islands, installations and structures. The International Tribunal for the Law of the Sea took the view in *M/V Saiga (No. 2) (Admissibility and Merits)* that a coastal state was not competent to apply its customs laws in respect of other parts of the economic zone.<sup>133</sup> Accordingly, by applying its customs laws to a customs radius which included parts of the economic zone, Guinea had acted contrary to the Law of the Sea Convention.<sup>134</sup>

A wide variety of states have in the last two decades claimed exclusive economic zones of 200 miles.<sup>135</sup> A number of states that have not made such a claim have proclaimed fishing zones.<sup>136</sup> It would appear that such is the number and distribution of states claiming economic zones, that the existence of the exclusive economic zone as a rule of customary law is firmly established. This is underlined by the comment of the International Court of Justice in the *Libya/Malta Continental Shelf* case<sup>137</sup> that ‘the institution of the exclusive economic zone...is shown by the practice of states to have become a part of customary law’.<sup>138</sup>

In addition to such zones, some other zones have been announced by states over areas of the seas. Canada has, for example, claimed a 100-mile-wide zone along her Arctic coastline as a special, pollution-free zone.<sup>139</sup> Certain states have also asserted rights over what have been termed security or neutrality zones,<sup>140</sup> but these have never been particularly well received and are rare.

In an unusual arrangement, pursuant to a US–USSR Maritime Boundary Agreement of 1 June 1990, it was provided that each party would exercise sovereign rights and jurisdiction derived from the exclusive economic zone jurisdiction of the other party in a ‘special area’ on the other party’s side of the maritime boundary in order to ensure that all areas within 200 miles of either party’s coast would fall within the resource jurisdiction of one party or the other. It would appear that jurisdiction over three special areas within the USSR’s 200-mile economic zone and one special area within the US’s 200-mile economic zone were so transferred.<sup>141</sup>

## **The continental shelf<sup>142</sup>**

The continental shelf is a geological expression referring to the ledges that project from the continental landmass into the seas and which are covered with only a relatively shallow layer of water (some 150–200 metres) and which eventually fall away into the ocean depths (some thousands of metres deep). These ledges or shelves take up some 7 to 8 per cent of the total area of ocean and their extent varies considerably from place to place. Off the western coast of the United States, for instance, it is less than 5 miles wide, while, on the other hand, the whole of the underwater area of the North Sea and Persian Gulf consists of shelf.

The vital fact about the continental shelves is that they are rich in oil and gas resources and quite often are host to extensive fishing grounds. This stimulated a round of appropriations by coastal states in the years following the Second World War, which gradually altered the legal status of the continental shelf from being part of the high seas and available for exploitation by all states until its current recognition as exclusive to the coastal state.

The first move in this direction, and the one that led to a series of similar and more extensive claims, was the Truman Proclamation of 1945.<sup>143</sup> This pointed to the technological capacity to exploit the riches of the shelf and the need to establish a recognised jurisdiction over such resources, and declared that the coastal state was entitled to such jurisdiction for a number of reasons: first, because utilisation or conservation of the resources of the subsoil and seabed of the continental shelf depended upon co-operation from the shore; secondly, because the shelf itself could be regarded as an extension of the land mass of the coastal state, and its resources were often merely an extension into the sea of deposits lying within the territory; and finally, because the coastal state, for reasons of security, was profoundly interested in activities off its shores which would be necessary to utilise the resources of the shelf.

Accordingly, the US government proclaimed that it regarded the 'natural resources of the subsoil and seabed of the continental shelf beneath the high seas but contiguous to the coasts of the United States as appertaining to the United States, subject to its jurisdiction and control'. However, this would in no way affect the status of the waters above the continental shelf as high seas.

This proclamation precipitated a whole series of claims by states to their continental shelves, some in similar terms to the US assertions, and others in substantially wider terms. Argentina and El Salvador, for example, claimed not only the shelf but also the waters above and the airspace. Chile and Peru, having no continental shelf to speak of, claimed sovereignty over the seabed, subsoil and waters around their coasts to a limit of 200 miles, although this occasioned vigorous protests by many states.<sup>144</sup> The problems were discussed over many years, leading to the 1958 Geneva Convention on the Continental Shelf.<sup>145</sup>

In the *North Sea Continental Shelf* cases,<sup>146</sup> the Court noted that:

the rights of the coastal state in respect of the area of continental shelf that constitutes a natural prolongation of its land territory into and under the sea exist *ipso facto and ab initio*, by virtue of its sovereignty over the land, and as an extension of it in an exercise of sovereign rights for the purpose of exploring the seabed and exploiting its natural resources. In short there is here an inherent right.

The development of the concept of the exclusive economic zone has to some extent confused the issue, since under article 56 of the 1982 Convention the coastal state has sovereign rights over all the natural resources of its exclusive economic zone, including the seabed resources.<sup>147</sup> Accordingly, states possess two sources of rights

with regard to the seabed,<sup>148</sup> although claims with regard to the economic zone, in contrast to the continental shelf, need to be specifically made. It is also possible, as will be seen, that the geographical extent of the shelf may be different from that of the 200-mile economic zone.

## Definition

Article 1 of the 1958 Convention on the Continental Shelf defined the shelf in terms of its exploitability rather than relying upon the accepted geological definition, noting that the expression referred to the seabed and subsoil of the submarine areas adjacent to the coast but outside the territorial sea to a depth of 200 metres or ‘beyond that limit to where the depth of the superjacent waters admits of the exploitation of the natural resources of the said areas’.

This provision caused problems, since developing technology rapidly reached a position to extract resources to a much greater depth than 200 metres, and this meant that the outer limits of the shelf, subject to the jurisdiction of the coastal state, were consequently very unclear. Article 1 was, however, regarded as reflecting customary law by the Court in the *North Sea Continental Shelf* case.<sup>149</sup> It is also important to note that the basis of title to continental shelf is now accepted as the geographical criterion, and not reliance upon, for example, occupation or effective control. The Court emphasised this and declared that:

The submarine areas concerned may be deemed to be actually part of the territory over which the coastal state already has dominion in the sense that although covered with water, they are a prolongation or continuation of that territory, an extension of it under the sea.<sup>150</sup>

This approach has, however, been somewhat modified. Article 76(1) of the 1982 Convention provides as to the outer limit of the continental shelf that:

[t]he continental shelf of a coastal state comprises the seabed and subsoil of the submarine areas that extend beyond its territorial sea throughout the natural prolongation of its land territory to the outer edge of the continental margin, or to a distance of 200 nautical miles from the baselines from which the breadth of the territorial sea is measured where the outer edge of continental margin does not extend up to that distance.<sup>151</sup>

Thus, an arbitrary, legal and non-geographical definition is provided. Where the continental margin actually extends beyond 200 miles, geographical factors are to be taken into account in establishing the limit, which in any event shall not exceed

either 350 miles from the baselines or 100 miles from the 2,500-metre isobath.<sup>152</sup> Where the shelf does not extend as far as 200 miles from the coast, natural prolongation is complemented as a guiding principle by that of distance.<sup>153</sup> Not surprisingly, this complex formulation has caused difficulty<sup>154</sup> and, in an attempt to provide a mechanism to resolve problems, the Convention established a Commission on the Limits of the Continental Shelf, consisting of twenty-one experts elected by the states parties. Article 4 of Annex II to the Convention provides that a coastal state intending to establish the outer limits to its continental shelf beyond 200 nautical miles is obliged to submit particulars of such limits to the Commission along with supporting scientific and technical data as soon as possible but in any case within ten years of the entry into force of the Convention for that state. The limits of the shelf established by a coastal state on the basis of these recommendations are final and binding.<sup>155</sup> The first submission to the Commission was made by the Russian Federation on 21 December 2001.<sup>156</sup> In support of this claim, Russian explorers planted the national flag on the seabed below the North Pole on 2 August 2007, arguing that parts of underwater mountains underneath the Pole were extensions of the Eurasian continent.<sup>157</sup> A joint submission in respect of the area of the Celtic Sea and the Bay of Biscay was made by France, Ireland, Spain and the UK on 19 May 2006,<sup>158</sup> while on 21 April 2008, the Commission confirmed Australia's continental shelf claim made in 2004.<sup>159</sup>

Islands generate continental shelves, unless they consist of no more than rocks which cannot sustain human habitation.<sup>160</sup>

## **The rights and duties of the coastal state<sup>161</sup>**

The coastal state may exercise 'sovereign rights' over the continental shelf for the purposes of exploring it and exploiting its natural resources under article 77 of the 1982 Convention. Such rights are exclusive in that no other state may undertake such activities without the express consent of the coastal state. These sovereign rights (and thus not territorial title as such since the Convention does not talk in terms of 'sovereignty') do not depend upon occupation or express proclamation.<sup>162</sup> The Truman concept of resources, which referred only to mineral resources, has been extended to include organisms belonging to the sedentary species.<sup>163</sup> However, this vague description did lead to disputes between France and Brazil over lobster, and between the USA and Japan over the Alaskan King Crab in the early 1960s.<sup>164</sup> The sovereign rights recognised as part of the continental shelf regime specifically relate to natural resources, so that, for example, wrecks lying on the shelf are not included.<sup>165</sup> The Convention expressly states that the rights of the coastal state do not affect the status of the superjacent waters as high seas, or that of the airspace

above the waters.<sup>166</sup> This is stressed in succeeding articles which note that, subject to its right to take reasonable measures for exploration and exploitation of the continental shelf, the coastal state may not impede the laying or maintenance of cables or pipelines on the shelf. In addition, such exploration and exploitation must not result in any unjustifiable interference with navigation, fishing or the conservation of the living resources of the sea.<sup>167</sup>

The coastal state may, under article 80 of the 1982 Convention,<sup>168</sup> construct and maintain installations and other devices necessary for exploration on the continental shelf and is entitled to establish safety zones around such installations to a limit of 500 metres, which must be respected by ships of all nationalities. Within such zones, the state may take such measures as are necessary for their protection. But although under the jurisdiction of the coastal state, these installations are not to be considered as islands. This means that they have no territorial sea of their own and their presence in no way affects the delimitation of the territorial waters of the coastal state. Such provisions are, of course, extremely important when considering the status of oil rigs situated, for example, in the North Sea. To treat them as islands for legal purposes would cause difficulties.<sup>169</sup>

Where the continental shelf of a state extends beyond 200 miles, article 82 of the 1982 Convention provides that the coastal state must make payments or contributions in kind in respect of the exploitation of the non-living resources of the continental shelf beyond the 200-mile limit. The payments are to be made annually after the first five years of production at the site in question on a sliding scale up to the twelfth year, after which they are to remain at 7 per cent. These payments and contributions are to be made to the International Seabed Authority, which shall distribute them amongst state parties on the basis of 'equitable sharing criteria, taking into account the interests and needs of developing states particularly the least developed and the landlocked among them'.<sup>170</sup>

## **Maritime delimitation**<sup>171</sup>

While delimitation is in principle an aspect of territorial sovereignty, where other states are involved, agreement is required. However valid in domestic law, unilateral delimitations will not be binding upon third states.<sup>172</sup> The International Court noted in *Nicaragua v. Honduras* that the establishment of a permanent maritime boundary was 'a matter of grave importance and agreement is not easily to be presumed'.<sup>173</sup> It was also pointed out that the principle of *uti possidetis* applied in principle to maritime spaces.<sup>174</sup>

In so far as the delimitation of the territorial sea between states with opposite or
