New Ideas for Teaching

Neuroscience & the Classroom: Making Connections
A COURSE FOR K-12 TEACHERS

OVERVIEW
Insights drawn from neuroscience not only provide educators with a scientific basis for understanding some of the best practices in teaching, but also offer a new lens through which to look at the problems teachers grapple with every day. By gaining insights into how the brain works—and how students actually learn—teachers will be able to create their own solutions to the classroom challenges they face and improve their practice. [see video](#)

about this course | [using this site](#)

UNITS:

Introduction	Different Brains	Emotion & Thinking	Seeing Others	Different Learners	Neural Networks	Implications for schools	Conclusion
--------------	------------------	--------------------	---------------	--------------------	-----------------	--------------------------	------------
