

KFSSI Pain Pad

A NEW PARADIGM IN PAIN RELIEF

The time of popping pills to relieve pain is over! Introducing the Keshe Pain Aid Pad.

Using plasma technology, which is based on magnetic-gravitational field interaction, the pad emits **plasma fields** that penetrate up to 3cm below the skin, helping to bring the **body back to balance**.

With its unique ergonomic design, which fits like a second skin, you can now **enjoy comfort and well-being** very quickly. The KFSSI Pain Aid Pad is made with adaptive elastics that conforms organically and comfortably to the contours of your body.

Built from denier-500 nylon with hook-and-loop fasteners, The KFSSI Pain Aid Pad has **no moving parts or batteries**, making it lightweight, durable, easy to wear and quick to remove.

"Helping to bring the body back to balance naturally."

- MT Keshe

KFSSI PAIN PAD Plasma Energy Generator

The pain is completely gone!

I ordered the pain pad because I wanted to give it a try.. I have been following this technology for some time and as a Doctor I often research new health/healing claims and products. I am happy to say that I got my order yesterday and tried the pad and it worked beautifully on my shoulder which I had hurt some time ago and which flares up now and then. The pain is completely gone. Thank you and note that I will be spreading the word and I would be interested in selling this product via a distributorship.

Have a wonderful day!

Laurie MD., Seattle, Washington

Within minutes the pain was gone!

I wanted to say thank you! Why? I have three slipped discs in my back and went to my doctor yesterday. He put one of your pain pads on my back and within minutes the pain was gone! I couldn't believe it and I am so very pleased and elated! I might not ever opt for surgery now. I want to order one of the pads immediately so please let me know how to do that?

God bless.

Mary, USA (2015)

She now has free movement in her knee!

(Testimonial from a Distributor)

Hi,

...the first Pain Pad [I] "tested" was by a good friend who is a massage therapist extraordinaire. She has had a knee injury since her early teens (regular inflammation, flare ups etc). She tried the Pad for 2 sessions over 2 days of approximately 30 minutes. She now has free movement in her knee and will share this info and gladly offer them to her clients!

Regards,

Christopher
