X50V6 Series Quick Guide [English]

A. Begin Installation

1. Remove the cover on the back of the X50V6 first, unscrew four screws of the stand mount and remove the stand.
2. Unscrew four screws of the back cover and remove it.

B. HDD or SSD Installation

1. Unscrew four screws of the bracket and remove it.
2. Mount the HDD or SSD into the bracket with four screws.
3. Connect the Serial ATA and power cable to the HDD or SSD.

C. Memory Module Installation

1. Locate one of the two SD-DIMM slots on the mainboard.
2. Align the notch of the memory module with the one of the memory slot.
3. Gently insert the module into the slot at a 45-degree angle.
4. Push the memory module into the slot until it snaps into the locking mechanism.
5. Repeat the above steps to install additional memory modules, if required.

D. Component Installation

1. As shown, orient the screw first.
2. Repeat the cover, complete.

E. Complete

1. Replace the back cover.
2. Reattach the stand and the back cover with eight screws.

How to use the Touch Panel

- Experience the ease of managing your digital life with a few touches by using the stylus. The touch of your finger replaces the mouse and this is all you need to interact with the X50V6.
- Touch + left-click on the mouse
- Touch and hold + right-click on the mouse

Placeing on the desk

- To place the machine on the desk and to carry it, do the following:
  - Place the X50V6 on a flat surface such as a table (Picture 1), and pull the stand upwards to an angle of 30° (Picture 2). To carry or move your X50V6 fully extend the angle to 180° (Picture 3).

Powering on the system

- Follow the steps (1–3) below to connect the AC adapter to the “DC-In” jack. Press the “Power Button” to turn on the system.

Cleaning the screen

- Follow these guidelines for cleaning the outside and handling the screen of the computer:
  - Turn off the system and disconnect all cables.
  - Use a damp or cleaning cloth, ideally soft, lint-free and lightly humid to wipe the screen.

4 Points Calibration (Installation from CD-ROM)

- Run the screen calibration program and perform a 4 points on-screen calibration.
  - Click Start > All Programs > Shuttle Touch > Configure Utility
  - Select [Tools] tab and click (4 Points Calibration)

Touch and hold the center of the target. Repeat on four corners and the screen will adjust automatically.

Safety Information

Read the following precautions before setting up a Shuttle X50V6.

CAUTION
Do not walk on the power cord or allow anything to rest on it.
Danger of explosion if battery is incorrectly replaced.
Replace only with the same or equivalent type recommended by the manufacturer.
Dispose of used batteries according to the manufacturer’s instructions.

Note: The product’s colour and specifications may vary from the actually shipped product.
