

8/24/10

Ann Williams (EPA)

Telecom Ken Kimmel (MassDEP)

S: New Bedford
S. I. E.: 3.1
BREAK: 512491
OTHER: 512491

Wed - submitting final report w/ everything
Touching base on Quonset
Pier - still under agreement w/ Autoport long term
South area (27 ac) - 14.5 - under agreement
to another off shore wind farm; they're not interested
in giving long term lease. It's only good in conjunction
w/ the pier - long term vision to use as lay down space
(w/ hope of eventually
↳ too shallow

There will be letters from Siemens laying out criteria + how
everything wd be laid out at South Terminal.

They now say they need 28 ac - they'll get additional
upland

They spent the last 2 or 3 weeks pushing Siemens to
minimize - Apex + State has been involved in those
discussions.

2 key mes - min. acreage + berthing space
need 3 vessels operating all adjacent to time
2 tax incentives - cash grant in lieu of tax credit -
start const. this year and operational 11/1/13
or tax credit if operational by 11/1/13

State has reached out to ~~Mike Amaral~~ ^{Amaral}; they'll be bringing
Tom French

Matt can contact Deerin to coordinate details.

Ken will have Deerin talk to Mike about where he
wants to go, so Deerin can then make sure we can
get site access.
