This book has evolved out of contributions from many authors, bringing together a variety of creative ideas. The salient features of this book are as follows:

- The online version of this book is available freely for educational use, under the conditions described in the Copyright Statement.
- The book is based on a highly detailed computer science syllabus, evolved out of the NCERT framework, for ICSE/CBSE schools in India.
- The Lessons and Activities in this book are based on free and open source software. Schools do not need to purchase any software in order to implement this curriculum.
- The Worksheets and Activities are designed in such a way that they also supplement the topics being covered in other subjects, to the extent possible.
- Each lesson has a Teacher's Corner section, which gives a lesson plan, some do's and don'ts, and other tips.

This book is meant to be used for teaching computers to children in the First standard, in a way that is mostly fun. It can also be used as a starting point for higher classes. It can be easily adapted for computer-literacy programs. Adults having little exposure to computers can also use this book for independent study.
