

Handbook of Research on Andragogical Leadership and Technology in a Modern World

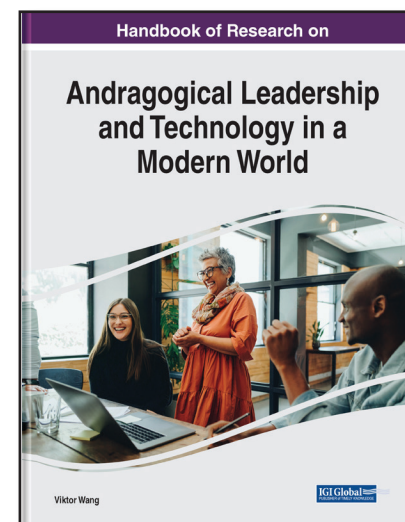

Part of the Advances in Human and Social Aspects of Technology Book Series

Viktor Wang (California State University San Bernardino, USA)

Description:

Innovation and creativity in organizations are pivotal to survival as human activity fuses with technological domains. Exploiting the potential of technology to use it in innovative and creative ways that change how and what humans do for the better lies within the influence of the andragogical leader. Leading by example, when andragogical leaders model the use of technology, they also model creativity, innovation, and failure as a positive learning experience. Andragogical leaders should model effective technology use daily.

Handbook of Research on Andragogical Leadership and Technology in a Modern World provides diverse perspectives, experiences, theories, and philosophies related to andragogical leadership and technology across all levels of education. Covering key topics such as transformational leadership, learning pedagogy, and instructional technology, this major reference work is ideal for policymakers, managers, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students.
