# Technology Plan Implementation

Schools of the information age must effectively employ technology to better meet the needs of students, parents, teachers, and administrators. Since the Madison County Schools (MCS) completed its first written technology plan in May 1996, it has had an outline of very specific technology goals, along with objectives and strategies to reach those goals.

## Technology Goals

Equip all stakeholders to use technology to positively impact and interact with the world around them.

- Teach digital citizenship.
- Integrate technology seamlessly in the teaching and learning process while ensuring that the use of technology adds value to learning.
- Develop a new set of knowledge and skills for the 21<sup>st</sup>-century learner.
- Provide greater access to educational opportunities and differentiated instruction by utilizing access to technology for anytime, anywhere learning.
- Improve communication and widen our sense of community by expanding the way teachers, students, and parents are able to interact with each other.
- Integrate digital tools for students to develop products demonstrating their understanding.
- Provide greater access to digital content in a variety of formats and modes.

## Acceptable Use Policy

Madison County Schools (MCS) recognizes that access to technology in school gives students greater opportunities to learn, engage, communicate, and develop skills that will prepare them for work, life, and citizenship. The District is committed to helping students develop progressive technology and communication skills.

MCS is committed to providing educational opportunities for all students and maintaining compliance with the Individuals with Disabilities Education Act 2004 (20 U.S.C. 1400 et seq.).

To that end, the District provides the privilege of access to technologies for student and staff use.

This Acceptable Use Policy (AUP) outlines the guidelines and behaviors that all users are expected to follow when using school technologies or when using personally-owned devices on school property, including:

- The Madison County Schools network is intended for educational purposes.
- All activity over the network or use of District technologies may be monitored, documented and retained.
- Access to online content via the network may be restricted in accordance with District policies and procedures and federal regulations, such as the Children's Internet Protection Act (CIPA).
- Students are expected to follow the same rules for good behavior and respectful conduct online as offline.
- Misuse of school resources can result in disciplinary action.
- Using an Internet filter and other technologies. The District makes a reasonable effort to ensure students' safety and security online, but it will not be held accountable for any harm or

- damages resulting or arising from use of MCS technologies.
- Users of the District network or other technologies are expected to alert IT staff immediately of any concerns for safety or security.
- User have no expectation of privacy.

## **Technologies Covered**

MCS may provide the privilege of Internet access, desktop computers, mobile computers or devices, video conferencing capabilities, online collaboration capabilities, message boards, email, and more.

This Acceptable Use Policy applies to both District-owned technology equipment utilizing the MCS network, the MCS Internet connection, and/or private networks/Internet connections accessed from District-owned devices at any time. This AUP also applies to privately-owned devices accessing the MCS network, the MCS Internet connection, and/or private networks/Internet connections while on school property or participating in school functions or events off campus. MCS policies outlined in this document cover all available technologies now and in the future, not just those specifically listed or currently available.

## **Usage Policies**

All technologies provided by the District are intended for education purposes. All users are expected to use good judgment by following the MCS student code of conduct and social media policy. Users should be safe, appropriate, careful, and kind; should not try to disable or get around technological protection measures; use good common sense; and ask if they don't know.

## **Internet Access**

MCS provides its users the privilege of access to the Internet, including web sites, resources, content, and online tools. Access to the Internet will be restricted as required to comply with CIPA regulations and school policies. Web browsing may be monitored, and web activity records may be retained indefinitely.

Users are expected to respect the web filter as a safety precaution, and shall not attempt to circumvent the web filter when browsing the Internet. The determination of whether material is appropriate or inappropriate is based solely on the content of the material and the intended use of the material, not on whether a website has been blocked or not. If a user believes a site is unnecessarily blocked, the user should submit a request for website review through the MCS Technology Help Desk or restricted access screen.

## **Email**

MCS provides faculty, staff and students in grades 6-12 with the privilege of email accounts for the purpose of school-related communication. Availability and use may be restricted based on school policies.

Users provided with email accounts should use these accounts with care. Users should not send personal information and should not attempt to open files or follow links from unknown or untrusted origins. Users should use appropriate language and should only communicate with other people as allowed by District policy or the teacher or administrator.

Users are expected to communicate with the same appropriate, safe, mindful, courteous manner online

as offline. Email usage may be monitored and archived.

## **Laptop Usage**

MCS may provide users with laptops or other devices to promote learning outside of the classroom. Users should abide by the same Acceptable Use Policies when using school devices off the school network as on the school network.

Users are expected to treat the devices with extreme care and caution; these are expensive devices that the District is entrusting to users' care. Users should immediately report any loss, damage, or malfunction to IT staff. Users will be financially accountable for any damage resulting from negligence or misuse.

Use of District-issued laptops off the District network can be monitored.

## **Policy**

In some cases, a separate network may be provided for personally-owned devices. Please remember, this Responsible Use Policy applies to privately owned devices accessing the MCS network, the MCS Internet connection, and private networks/Internet connections while on school property.

## **Security**

Users are expected to take reasonable safeguards against the transmission of security threats over the MCS network. This includes not opening or distributing infected files or programs and not opening files or programs of unknown or untrusted origin. Users should never share personal information.

If users believe a computer or laptop they are using might be infected with a virus, they should alert IT. Users should not attempt to remove the virus themselves or download any programs to help remove the virus.

## **Netiquette**

Users should always use the Internet, network resources, and online sites in a courteous and respectful manner.

Users should recognize that among the valuable content online there is also unverified, incorrect, or inappropriate content. Users should only use known or trusted sources when conducting research via the Internet.

Users should remember not to post anything online that they would not want students, parents, teachers, or future colleges or employers to see. Once something is online, it cannot be completely retracted and can sometimes be shared and spread in ways the user never intended.

## **Plagiarism**

Users should not plagiarize (or use as their own, without citing the original creator) content, including words or images, from the Internet. Users should not take credit for things they did not create themselves, or misrepresent themselves as an author or creator of something found online.

Information obtained via the Internet should be appropriately cited, giving credit to the original author.

## **Personal Safety**

Users should never share personal information, including phone number, address, social security number, birthday, or financial information, over the Internet without adult permission. Users should recognize that communicating over the Internet brings anonymity and associated risks and should carefully safeguard the personal information of themselves and others. Users should never agree to meet in person someone they meet online without parental permission.

If users see a message, comment, image, or anything else online that makes them concerned for their personal safety or the safety of someone else, they should immediately bring it to the attention of an adult (teacher or administrator if at school, parent if using the device at home).

## **Cyberbullying**

Cyberbullying including, but not limited to, harassing, flaming, denigrating, impersonating, outing, tricking, excluding, and cyber stalking will not be tolerated. Users should not be mean or send emails or post comments with the intent to harass, ridicule, humiliate, intimidate, or harm the targeted student and create for the targeted student a hostile school environment.

Engaging in these behaviors or in any online activities intended to harm (physically or emotionally) another person, will result in severe disciplinary action and loss of privileges. In some cases, cyberbullying can be a crime. Users should remember that online activities may be monitored.

All students will be educated about appropriate online behavior, including interacting with other persons on social networking websites and in chat rooms, and cyberbullying awareness and response.

## **Social Media Policy**

The District has a separate Social Media Policy that applies to all employees and may have implications for students. By signing the Acceptable Use Policy, users are acknowledging they have read the Social Media Policy and agree to abide by its requirements. Violations of the Social Media Policy are violations of the Responsible Use Policy.

## **Examples of Responsible Use**

I will:

- Use school technologies for school-related activities.
- Follow the same guidelines for respectful, responsible behavior online that I am expected to follow offline.
- Treat school resources carefully and alert staff if there is any problem with their operation.
- Encourage positive, constructive discussion if allowed to use communicative or collaborative technologies.
- Alert a teacher, administrator, or other staff member if I see threatening, inappropriate, or harmful content (images, messages, posts) online.
- Use District technologies at appropriate times, in approved places, for educational pursuits.

This is not intended to be an exhaustive list. Users should use their own good judgment when using District technologies. You can also visit [www.commonsensemedia.org](http://www.commonsensemedia.org) for further information.

## **Limitation of Liability**

MCS will not be responsible for damage or harm to persons, files, data, or hardware.

While MCS employs filtering and other safety and security mechanisms, and attempts to ensure their proper function, it makes no guarantees as to their effectiveness.

MCS will not be responsible or liable for, financially or otherwise, for unauthorized transactions conducted over the MCS network.

Violations of this policy may have disciplinary consequences, including:

- Suspension of network, technology, or computer privileges;
- Notification of parents;
- Detention or suspension from school and school-related activities;
- Employment disciplinary action up to and including termination of employment;
- Legal action and/or prosecution.

To this end, the MCS provides Intranet (internal) and Internet (external) connections for staff, students, and faculty. MCS encourages the responsible use of computers, computer networks, including the Internet, e-mail, and other electronic resources in support of the mission and goals of the MCS and its schools.
