Its like putting on the glasses from "They Live" By Lee Sullivan Easily the most well written book on Human Behavior I've come across . A serious amount of information in only several hundred pages. After finishing this one I feel like I have the upper hand in any interaction. Highly recommend this book to anyone interested in the subject. 4 of 4 people found the following review helpful. Broad and Systematic teaching of profoundly powerful persuasion skills By robospierre The Ellipsis manual brings together diverse information in a systematic way, with good advice for how to learn the material. Mr Hughes has done a better job of presenting the information than many other sources in the fields of body language, NLP communication, and hypnosis. 4 of 4 people found the following review helpful.
