

The Risk of Education

an introduction to reality in its totality

Conference

What does it mean to educate and what does it mean to be educated? Is it enough to attend top-notch schools, achieve excellent test scores and participate in extra-curricular activities?

The foundation of every educational endeavor is what it proposes to young people as the reason to live. Does American education today attend well enough to this fundamental purpose of education? Is there more that educators can do to strengthen this first principle and, in so doing, enlarge the scope of what it means to be successful?

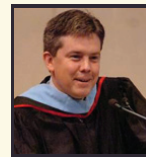

During this event we will discuss the fundamental factors of education in light of Luigi Giussani's book, *The Risk of Education*, and through the experiences of our speakers.

Reception

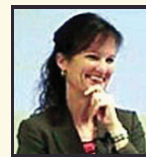

Refreshments provided after the conference.

THE EVENT IS **FREE** AND **OPEN TO THE PUBLIC**.
