| Probability Requirements |  |  |  | Notation |
| :---: | :---: | :---: | :---: | :---: |
| - The probability of event $E$ must be between 0 and 1 , inclusive. <br> - The sum of the probabilities of all outcomes in a sample must equal to 1 or $100 \%$. |  |  |  | $0 \leq P(E) \leq 1$ |
| Complimentary Events 3.1 |  |  |  |  |
| $P\left(E^{\prime}\right)=1-P(E)$ |  | $P($ At least one of " $A$ ") $=1-P($ None of " $A$ ") |  |  |
| Multiplication Rule-AND 3.2 |  |  |  |  |
| $P(A$ and $B)=P(A) \cdot P(B)$ |  | ( $A$ and $B$ are independent) |  |  |
| $P(A$ and $B)=P(A) \cdot P(B \mid A)$ |  | ( $A$ and $B$ are dependent) |  |  |
| Additional Rule - OR 3.3 |  |  |  |  |
| $P(A$ or $B)=P(A)+P(B)$ |  | ( $A$ and $B$ are mutually exclusive) |  |  |
| $P(A$ or $B)=P(A)+P(B)-P(A$ and $B)$ |  | ( $A$ and $B$ are NOT mutually exclusive) |  |  |
| Classical Approach | Empirical/Statistical | Conditional Probability |  | Independence Rule |
| $P(E)=\frac{\# \text { of outcomes in even } E}{\text { Total sample size }}$ | $\begin{gathered} P(E)=\frac{\text { Frequency of Event } E}{\text { Total frequency }} \\ =\frac{\boldsymbol{f}}{\boldsymbol{n}} \end{gathered}$ |  | $P(A \mid B)=\frac{P(A \text { and } B)}{P(B)}$ | $P(A \mid B)=P(A)$ <br> OR When $P(B \mid A)=P(B)$ |
| Counting Techniques 3.4 |  |  |  |  |
| Permutation (Order Matters): |  | Combination (Order Does Not Matter): |  |  |
| $\begin{aligned} { }_{n} P_{r} & =\frac{n!}{(n-r)!} \\ & =\operatorname{PERMUT}(n, r) \end{aligned}$ |  | $\begin{aligned} { }_{n} C_{r} & =\frac{n!}{(n-r)!r!} \\ & =\operatorname{COMBIN}(\mathrm{n}, \mathrm{r}) \end{aligned}$ |  |  |
| Distinct Items (Multiplication Principle of Counting): |  | Permutation (Distinguishable): |  |  |
| $\_^{\times} \times{ }^{\times} \times{ }^{\times} \times \ldots$ <br> Multiply all the possible outcomes |  | $\frac{n!}{n_{1}!n_{2}!\ldots n_{k}!}$ <br> Where: $\boldsymbol{n}=n_{1}+n_{2}+n_{3}+\ldots . .+n_{k}$ <br> nutations of $n$ objects where $n_{1}$ are one type, $n_{2}$ are another type and so on |  |  |
| NOTATION |  |  |  |  |
| $\boldsymbol{n}=$ Sample Size/Total \# of Items <br> $\boldsymbol{r}=$ \# of objects chosen <br> $\boldsymbol{k}=1,2,3 \ldots$ items | $\begin{aligned} & { }_{n} \boldsymbol{P}_{\boldsymbol{r}}=\text { Permutation } \\ & { }_{n} \boldsymbol{C}_{\boldsymbol{r}}=\text { Combination } \\ & !=\text { Factorial } \end{aligned}$ |  | $\begin{aligned} & \boldsymbol{P}(\boldsymbol{x})=\text { Probability of } \\ & \boldsymbol{P}(\boldsymbol{A} \mid \boldsymbol{B})=\text { Probability of } A \text { given } B \\ & \boldsymbol{P}(\boldsymbol{B} \mid \boldsymbol{A})=\text { Probability of } B \text { given } A \end{aligned}$ |  |
