

### ***Funding for Presenting Papers at Refereed Conferences***

There is a small fund for limited support to students presenting papers at refereed conferences for second and third year DDes students. The student must be a candidate having passed the general exam and have an accepted prospectus. The DDes steering committee will consider applications for support twice a year. The student must be presenting a paper and it must be relative to his/her research. A request needs to be submitted to the program administrator which will be brought to the DDes Council meeting for discussion and either approval or disapproval. The student can expect to receive \$300-500 dollars. It will be awarded as a stipend, therefore, receipts do not need to be submitted.

**Request for funding for Conference**
