

## 42U S2 Standard & Expansion Rack

This 42U, industry-standard 19" rack cabinet supports BladeCenter® and rack-mountable System x® servers and options. Perforated front and rear doors provide improved air flow allowing for a fan-free rack environment. In addition to the EIA space, six sidewall compartments support installation of 1U power distribution units (PDUs) and switches without unnecessarily taking up valuable rack space. Front and rear rack doors and side panels all

include locks, helping keep your servers secure. Front door hinge design allows door swing from either direction, providing flexible placement options. This 42U rack conforms to the industry-standard, EIA-310-D for 19" type A rack cabinets.

- Value-priced rack for entry-level and midrange rack solutions
- The 42U Rack is less than 2 meters in height allowing the rack to fit under most doorways
- Six sidewall compartments support installation of 1U power distribution units (PDUs) and switches without unnecessarily taking up valuable rack space
- Support full density of all System x™ servers by improved air flow allowing for a fan-free rack environment
- Lockable doors and side walls provide a more secure environment for equipment and data
- The S2 Rack family can accommodate a single installation or hundreds of rack enabled products and can be easily deployed while at the same time offer a very competitive value to our customers
- External dimensions (HxWxD): 200x61x100cm (78.7"x24"x39.4")
- 93074XX 42U S2 Expansion Rack ships without side panels and includes buying kits and is intended to be used in conjunction with the 93074RX 42U S2 Standard Rack when creating a suite of racks
