FOREWORD

Globally, the importance of research is widely recognized by governments, industries and other stakeholders as a major driver of social and economic development. The contribution of higher education institutions to the generation of new ideas and knowledge cannot be overemphasized. In accordance with the vision of the University of Ibadan to impact societal needs, academic research activities are directed towards knowledge creation, innovation and dissemination, to achieve industrial development.

Currently, evidence of research activity and research publication output are key indices for the ranking of universities. Therefore, it is essential to constantly update the database of the research output of our institution. The 2010 and 2011 research report documents the publication citations of the researchers at the University of Ibadan. This document provides insight into the research activity and the contribution to knowledge by the academic staff in the various departments and institutes of the University during the stated period. Worthy of note are the large numbers of research publications across the spectrum in the fields of sciences and the humanities. A number of these are related to the Millennium Development Goals, sustainable development and issues addressing relevant societal challenges. Evidently, the University of Ibadan continues to demonstrate its role as a leading research institution in Nigeria and Sub-Saharan Africa.

However, there is a lot of room for improvement in the University of Ibadan's research performance. To this end, efforts are being made to develop researchers' capacity to access funding for future research, improve research infrastructure, train early career researchers and facilitate south-south and north-south research collaborations. The recently established University of Ibadan Research Foundation will provide excellent opportunities for accessing research funding, supporting collaborative research and will ultimately enhance research output in the coming years. The Research Management Office (RMO) will also play its oversight role by providing support for researchers to conduct cutting-edge research while ensuring that good research administrative practices are maintained.

The roles of the Director, RMO, and Deputy Vice-Chancellor (Academic) in bringing this novel effort to reality deserve commendation.

Professor Isaac F. Adewole *FAS*
Vice-Chancellor
22 June, 2013
