

AMERICAN JOURNAL OF PRIMATOLOGY

INSTRUCTIONS FOR CONTRIBUTORS

The American Journal of Primatology welcomes manuscripts on primates in all areas of basic and applied life sciences. To meet the goals of the journal, each manuscript must explicitly present and support the significance of its contribution to primatology. To this end, it must be clear from the Abstract, Introduction and Discussion of each manuscript that the principal focus is to increase significantly the understanding of the behavior or biology of primates in natural, semi-natural or formal captive environments, enhance welfare, management or research value of primates in any or all of these environments, advance knowledge of the evolution of primate diversity, or contribute to the conservation of this diversity. The journal publishes both original research and review articles. In limited cases where the reported research is of scientific merit but compelling circumstances have limited number of subjects available or constrained the scope of the data collected, manuscripts may be considered for a brief report.

Manuscripts and all editorial correspondence should be sent to Dr. Michael W. Andrews, Editor, American Journal of Primatology, Department of Psychology, Southern Oregon University, 1250 Siskiyou Blvd., Ashland, OR 97520-5063. An original and four copies of all manuscripts must be submitted in English (American Style), and must be typewritten, doubled-spaced, and have 3-cm margins throughout. Number all pages in sequence beginning with the title page. The first author's surname and the page number should appear in the upper right hand corner of each page. Research Articles and Review Articles should not exceed 30 manuscript pages, and Brief Reports must not exceed 12 manuscript pages, including the abstract, all text, references, legends, tables, and figures. Manuscripts should be divided into the seven major divisions given below.

Title page. The first page of the manuscript should consist of a single page and include the complete title of the paper; the names of authors and their affiliations; a short title (not more than 40 characters including spaces) to be used as a running head; and name, postal address, e-mail address, and phone number of person to whom editorial correspondence, page proofs, and reprint requests should be sent.

Abstract. The abstract must be a factual condensation of the entire work, including a statement of its purpose, a succinct statement of research design, a clear description of the most important results, and a concise presentation of the conclusions. Abstracts should not exceed 300 words. Three to six key words for use in indexing should be listed immediately below the abstract.

Text. The body of Research Articles and Brief Reports must be organized into the following sections: Introduction, Methods, Results, Discussion, and Acknowledgments. In addition to summarizing key data using tables and figures where possible, the Results section must include the essential values from all statistical tests cited to support statements regarding findings. Acknowledgments may include funding sources such as agency and grant number; names of those who contributed but are not authors; accreditation of facilities, or other information relevant to scientific research ethics; new affiliations of authors; and other brief notes in lieu of footnotes to the text. The body of Review Articles should begin with an Introduction and end with a General Discussion, with the intervening text divided by topical headings as appropriate. If photos or identifiable data on human subjects are in any manuscript, they must be accompanied by a notarized copy of the consent form. Footnotes are not to be used except for tables and figures. Nonstandard abbreviations should be kept to a minimum and defined in the text. Measurements should be given in metric units and abbreviated according to the Style Manual for Biological Journal of the American Institute for Biological Sciences.

References. In the text, references should be cited consecutively with the author's surname and year of publication in brackets. The reference list should be arranged alphabetically by first author's surname.

Example for Journal Articles:

King VM, Armstrong DM, Apps R, Trott JR. 1998. Numerical aspects of pontine, lateral reticular, and inferior olivary projects of two paravermal cortical zones of the cat cerebellum. *J Comp Neurol* 390:537-551.

Example for Books and Monographs:

Voet D, Voet JG. 1990. *Biochemistry: textbook for students*. New York: John Wiley & Sons, Inc. 1223 p.

Example for Dissertations:

Ritzmann RE. 1974. The snapping mechanism of *Alpheid* shrimp [dissertation]. Charlottesville (VA): University of Virginia. 59 p. Available from: University Microfilms, Ann Arbor, MI: AAD74-23.

Example for Book Chapters:

Gilmor ML, Rouse ST, Heilman CJ, Nash NR, Levey AI. 1998. Receptor fusion proteins and analysis. In: Ariano MA, editor. *Receptor localization*. New York: Wiley-Liss. p 75-90.

Legends. A descriptive legend must be provided for each illustration and must define all abbreviations used therein.

Tables. Tables should be titled and designated with roman numerals conforming with the order of their appearance. They should be used primarily for presentation of data too complex to be included in the text. All tables must be cited in the text with approximate placement clearly identified.

Illustrations. Five copies of any photographs (13 × 18 cm) should be provided on glossy paper. All figures should be high contrast and labeled on the back with the first author's name, figure number corresponding in order of initial citation in the text, and an arrow indicating the orientation of the illustration. The approximate placement of each figure must be clearly identified in the text. The Editorial Office cannot be responsible for original artwork submitted. All color figures will be reproduced in full color in the online edition of the journal at no cost to authors. Authors are requested to pay the cost of reproducing color figures in print. Authors are encouraged to submit color illustrations that highlight the text and convey essential scientific information. For best reproduction, bright, clear colors should be used. Dark colors against a dark background do not reproduce well; please place your color images against a white background wherever possible. Please contact Lori-Marie Hamilton, Production Editor, at 937-885-3289 or by e-mail at LoriMarieH@aol.com, for further information.

All manuscripts submitted to the American Journal of Primatology must be submitted solely to this journal, and may not have been published in any substantial form in any other publication, professional or lay. The publisher reserves copyright, and no published material may be reproduced or published elsewhere without the written permission of the publisher and the author. The journal will not be responsible for the loss of manuscripts at any time. All statements in, or omissions from, published manuscripts are the responsibility of the authors who will assist the editors by reviewing proofs before publication. Reprint order forms will be sent with galley proofs. No page charges will be levied against authors or their institutions for publication in the journal.
