UNIVERSITY OF CALIFORNIA, IRVINE

2013–14 General Catalogue, Volume 47

The *UCI General Catalogue* is published annually in July by the University of California, Irvine, University Editor's Office, 435 Aldrich Hall, Irvine, CA 92697-1010.

The UCI General Catalogue constitutes the University of California, Irvine's document of record. While every effort is made to ensure the correctness and timeliness of information contained in the Catalogue, the University cannot guarantee its accuracy. Changes may occur, for example, in course descriptions; teaching and administrative staff; curriculum, degree, and graduation requirements; and fee information. Contact the individual academic program or administrative office for further information.

Chancellor's Welcome

Welcome to the University of California, Irvine. As a UC student, you have access to resources that extend across our campus, throughout our state, and beyond. This catalogue will serve as an invaluable guide to enhancing your UC Irvine experience.

UCI combines the strengths of a major research university with the highly personalized experience of a small college. Over four remarkable decades, we have become internationally recognized for efforts that are improving lives through research and discovery, fostering excellence in scholarship and teaching, and engaging and enriching the community. *Times Higher Education* magazine ranks UCI as the number one university in the nation—and fourth in the world—under 50 years of age.

Increasingly a first-choice campus for students, UCI attracted a record nearly 70,000 undergraduate applications for 2012 and admitted freshmen with highly competitive academic profiles.

Our recently launched programs in public policy, public health, and nursing science are critical to California's health and prosperity. Our law school, the state's first public law school to open in more than 40 years, graduated its first class in 2012. In July 2012 the Regents established the UC Irvine School of Education from the existing Department of Education in recognition of its national academic profile.

UCI is a center for quality education and is consistently ranked among the nation's best universities. Achievements in the sciences, arts, humanities, medicine, and management have garnered top 50 national rankings for more than 40 academic programs. Three UCI researchers have won Nobel Prizes—two in chemistry and one in physics.

UCI reaches beyond the classroom and laboratory to help solve societal issues and support human development. We are a hub for stem cell research, a trailblazer in understanding global warming, and a leader in the fight against breast cancer. Our nationally ranked medical center in Orange serves as Orange County's only Level I trauma center, and our state-of-the-art UC Irvine Douglas Hospital has been ranked among the country's top 50 hospitals for more than 10 years, providing outstanding care for the region's citizens.

A major intellectual and cultural center, UCI offers numerous public activities and events. The Claire Trevor School of the Arts and the School of Humanities produce engaging and entertaining cultural programs, while UCI's Anteater athletes have won more than two dozen national championships.

UCI is benefiting the community and the world in countless ways through its scholarly, scientific, creative, and economic contributions. Orange County's second largest employer, UCI generates an annual economic impact on the county of \$4.3 billion. We have implemented a strategic plan that will ensure that the campus continues to inspire excellence as it fulfills its research, teaching, and public service missions in the decades ahead.

Our actions and interactions are governed by a set of core values: respect, intellectual curiosity, commitment, integrity, empathy, appreciation, and fun. These values allow people to transcend limitations and create something greater than themselves. I am proud that—at UCI—we live these values every day.

I encourage you to take advantage of all that UCI has to offer. I look forward to seeing you on campus and to being a part of this very important time in your life.

Sincerely,

Michael V. Drake, M.D.
Chancellor

Academic Calendar

Fall Quarter, 2013

Event	Date(s)
Quarter Begins	Sept. 23 (Mon.)
Academic Advising and Orientation	Sept. 23–25 (Mon.–Wed.)
Instruction Begins	Sept. 26 (Thur.)
Veterans' Day Holiday	Nov. 11 (Mon.)
Thanksgiving Holiday	Nov. 28–29 (Thur.–Fri.)
Instruction Ends	Dec. 6 (Fri.)
Final Examinations	Dec. 7–13 (Sat.–Fri.)
Quarter Ends	Dec. 13 (Fri.)
Winter Administrative Recess	Dec. 24–Jan. 1 (Tue.–Wed.)

Winter Quarter, 2014

Event	Date(s)
Quarter Begins	Jan. 2 (Thurs.)
Instruction Begins	Jan. 6 (Mon.)
Martin Luther King Jr. Holiday	Jan. 20 (Mon.)
Presidents' Day Holiday	Feb. 17 (Mon.)
Instruction Ends	Mar. 14 (Fri.)
Final Examinations	Mar. 15–21 (Sat.–Fri.)
Quarter Ends	Mar. 21 (Fri.)

Spring Quarter, 2014

Event	Date(s)
Quarter Begins	Mar. 26 (Wed.)
Cesar Chavez Day Holiday	Mar. 28 (Fri.)
Instruction Begins	Mar. 31 (Mon.)
Memorial Day Holiday	May 26 (Mon.)
Instruction Ends	June 6 (Fri.)
Final Examinations	June 7–12 (Sat.–Thur.)
Quarter Ends	June 13 (Fri.)
Commencement	June 13–15 (Fri.–Sun.)

Summer Sessions, 2014

Event	Date(s)
Session I	June 23–Jul. 30 (Mon.–Wed.)
10-Week Session	June 23–Aug. 29 (Mon.–Fri.)
Independence Day Holiday	July 4 (Fri.)
Session II	Aug. 4–Sept. 10 (Mon.–Wed.)
Labor Day Holiday	Sept. 1 (Mon.)

Any calendar updates, detailed information on registration procedures and late charges, and the School of Law academic calendar are available on the Registrar's Web site at <http://www.reg.uci.edu>. For the M.D. program academic calendar, visit <http://www.meded.uci.edu/>.

Introduction

The University of California

The University of California (UC) was chartered as the State's only Land Grant College in 1868. Today, UC is one of the world's largest and most renowned centers of higher education and has a combined enrollment of more than 228,000 students on 10 campuses—Berkeley, Davis, Irvine, Los Angeles, Merced, Riverside, San Diego, San Francisco, Santa Barbara, and Santa Cruz. Among the campuses there are six medical schools, a school of veterinary medicine, and professional schools of business administration, education, engineering, law, oceanography, and many others. The collections of the more than 100 UC libraries are surpassed in size on the American continent only by the Library of Congress collection.

The UC faculty is internationally noted for its distinguished academic achievements. UC-affiliated faculty and researchers have won 57 Nobel Prizes and more than 50 National Medals of Science. National Academy of Sciences membership exceeds 350 and Institute of Medicine membership exceeds 160. UC creates an average of four new inventions every day, and for 15 years in a row, has developed more patents than any other university in the country.

UC maintains a variety of research facilities, agricultural field stations, and extension centers in more than 100 locations throughout California. Public services include medical and dental clinics, information services for agricultural and urban populations, a broad program of continuing education, museums and art galleries, and more. Detailed information about the University of California's teaching, research, and public service mission is available online at <http://www.universityofcalifornia.edu/>.

The Irvine Campus

Michael V. Drake, M.D., **Chancellor**

The University of California, Irvine (UCI) opened in 1965 with 116 faculty and 1,589 students. Since then, UCI programs, faculty and graduates have achieved distinction in virtually every discipline.

Two Nobel Prizes in 1995 for founding faculty F. Sherwood Rowland in Chemistry and Frederick Reines in Physics helped to secure UCI's position among the leading American research universities. In 2004, Irwin A. Rose, Department of Physiology and Biophysics, became UCI's third Nobel Laureate (chemistry). UCI has been ranked prominently along with much older universities for excellence in the arts and humanities, Earth system science, management, social sciences, technology, and information systems.

For quality of educational experience and caliber of faculty, UCI consistently ranks among the nation's best public universities, and among the top 50 research universities in the world. Election to the American Association of Universities (AAU), a group of 61 of the most distinguished research institutions, is another indication of UCI's stature in the academic community.

As a research university, UCI challenges students at every level, both academically and personally. While research is critical to graduate education, the research environment also opens up new educational experiences for undergraduates. Students have access to faculty at the forefront of their fields, and they also have opportunities to participate directly in faculty research projects. In addition, to empower students for

the future in an information-focused society, UCI has integrated computer technology throughout the curriculum and campus life.

UCI is committed to the discovery and transmission of knowledge. It makes available to its 28,184 students (22,216 undergraduate; 5,263 graduate, medical, and credential students; and 705 medical residents and fellows) the education, skills, and credentials which provide the basis for lifelong personal and professional growth.

UCI's education and research missions are fulfilled in its academic units, which are described briefly below, and in its formal research units, which are described in the Office of Research section later in this *Catalogue*.

The **Claire Trevor School of the Arts** teaches the creative as well as the academic and critical dimensions of the arts. It is concerned with the vitality of the arts in society. Faculty energies are directed toward the refinement, enhancement, and encouragement of students' artistic and creative talents and toward the development of the students' understanding of related theory and history. The School offers programs which emphasize extensive studio and workshop experiences, essential theoretical and historical background studies, and exercises in criticism. There are 915 students in the School, including 772 undergraduate and 143 graduate.

The **School of Biological Sciences** is one of the campus's larger academic units, with 4,188 students (3,924 undergraduate and 264 graduate). Faculty research areas include neural plasticity and behavior (which in part encompasses the development of the nervous system, memory, response to injury, and degenerative brain diseases such as Alzheimer's); the nature of cell-cell interactions; pattern formation; the elucidation of ecological conditions and evolutionary histories that have been the driving forces in organism design and functional diversity; the organization and expression of genes; biomolecular structure; molecular pathogenesis; human mitochondrial genetics; and cell biology.

The **Paul Merage School of Business** faculty conduct research and teach in the fields of accounting, economics, finance, health care management, information systems, marketing, operations and decision technologies, organization management, public policy, real estate and strategy. Based on a thematic approach throughout the curriculum, the School focuses on three critical drivers of business growth: strategic innovation, information technology, and analytic decision making. The Merage School enrolls 590 undergraduates, 233 students in the M.B.A. and Ph.D. programs, and 545 students in the Fully Employed M.B.A., Executive M.B.A., and Health Care Executive M.B.A. programs.

The **School of Education** offers graduate degree and credential programs for teachers and administrators in California's public elementary and secondary schools and an undergraduate minor in Educational Studies. The School integrates the themes of learning, cognition, and development; educational policy and social context; and language, literacy, and technology across its programs. The faculty is multidisciplinary; their scholarly work arises from the common belief that education environments, both in and out of school, are the loci of change in the quality of life and the availability of productive life choices for learners of all ages. The School has 136 graduate and 93 credential students.

The **Henry Samueli School of Engineering**, with 3,733 students (2,872 undergraduate, 861 graduate), focuses on advancing the frontier of innovative engineering education and pioneering research that will shape the future of the nation and the world. Through an integrative and cross-disciplinary educational experience that blends fundamentals, research, and hands-on experience, the School trains future leaders in

the engineering profession. Working in partnership with state and federal agencies and industry, the School promotes the transfer of research to applications that benefit society. The major research disciplines are aerospace, biochemical, biomedical, chemical, civil, computer, computer science, electrical, environmental, materials science, and mechanical engineering. Research areas include biochemical, biomedical, and rehabilitation engineering, earthquake engineering, water resources, transportation, parallel and distributed computer systems, embedded systems, intelligent systems and neural networks, image and signal processing, opto-electronic devices and materials, high-frequency devices and systems, integrated micro and nanoscale systems, green energy, fuel cell technology, fluid mechanics, combustion and jet propulsion, materials processing, robotics, and modern control theory.

The **School of Humanities** faculty have been repeatedly honored for their teaching and scholarly excellence. Included in the faculty's more than 100 research specialties are literary criticism, film studies, media studies, philosophical analysis, historical inquiry, art history, and East Asian languages and literatures. The faculty also participate in programs that cut across disciplinary boundaries such as African American Studies, Asian American Studies, Religious Studies, and Women's Studies. At the core of the educational mission of the humanities is imparting to students tools of analysis that will help them interpret, understand, describe, and explain the world around them. The School has 1,908 students, including 1,569 undergraduate and 339 graduate.

The **Donald Bren School of Information and Computer Sciences (ICS)** has 1,587 students (1,179 undergraduate and 408 graduate). Faculty are engaged in research and teaching in computer science and information technology. Research areas include the design of algorithms and data structures; computer architecture and embedded computer systems; networked and distributed systems; systems software; social and mobile computing; artificial intelligence, machine learning and data mining; computer games and virtual worlds; databases and information retrieval; computer graphics and visualization; bioinformatics, computational biology, and genomics; computer-supported cooperative work, human-centered computing, and human-computer interaction; security and privacy; software engineering; managerial and social aspects of computing technology; and statistics.

Interdisciplinary Studies programs provide students with opportunities to pursue subject areas which derive from the interaction of different disciplines such as Computer Science and Engineering, Civic and Community Engagement, and Transportation Science.

The **School of Law** has a student body of 297. It welcomed its inaugural class of students in fall 2009 and graduated its first class in May 2012. The School offers the J.D. (Juris Doctor). The curriculum includes traditional areas of legal doctrine taught in an innovative context designed to prepare students for the practice of law in the twenty-first century. The School's concurrent degree programs (J.D./M.B.A., J.D./M.A., and J.D./Ph.D.) connect UCI's legal education with the wide range of academic and professional opportunities at a major research university.

The **School of Medicine**, with 610 graduate and medical students, and 705 residents and fellows, is dedicated to advancing medical knowledge and clinical practice through scholarly research, physician education, and high-quality care; nurturing the development of medical students, resident physicians, and scholars in the clinical and basic sciences; and supporting the dissemination of research advances for the benefit of society. The new UC Irvine Douglas Hospital at UC Irvine Medical Center has modern facilities for conducting medical research and training future and practicing physicians, allowing more opportunities for researchers and clinicians to

collaborate on patient care. A state-of-the-art Medical Education building opened in February 2010 and houses the latest in technology to advance active, small group learning opportunities.

The **Program in Nursing Science** provides a strong research-based academic and professional program to prepare graduates for basic clinical and advanced practice roles, as well as for educational, administrative, and research positions across the healthcare delivery system, and for faculty positions in academic institutions. The Program has 166 undergraduate and 30 graduate students.

The **Department of Pharmaceutical Sciences**, founded in 2007, offers its 687 students interdisciplinary educational programs integrating concepts from fields as diverse as biology, chemistry, cell and molecular biology, chemical engineering, materials science, pharmaceuticals, pharmacology and physiology. Its faculty includes world-renowned scientists encompassing a variety of backgrounds with wide-ranging research programs that cover every facet of pharmaceutical research.

The **School of Physical Sciences** has a student body of 1,779 (1,254 undergraduate and 525 graduate). Researchers in the School are conducting investigations in atmospheric chemistry (including the discovery of the adverse impact of human-made chlorofluorocarbon compounds on the Earth's ozone layer), biogeochemistry and climate, synthetic chemistry, laser spectroscopy, condensed matter physics, elementary particle physics, plasma physics, and pure and applied mathematics and mathematical physics.

The **Program in Public Health** provides institutional focus for UC Irvine's academic strengths in various sub-disciplines of public health and facilitates well-grounded education and innovative research in emerging aspects of the field. Under the Program in Public Health, the Department of Population Health and Disease Prevention advances the collaborative interdisciplinary mission of public health research, education, and translational practice. The Program has 1,045 undergraduate and 30 graduate students.

The **School of Social Ecology**, a multidisciplinary unit established in 1970, is unique to UCI. The School's central objectives are the application of scientific methods to the analysis and resolution of societal problems, and the development of theory and knowledge pertinent to social, behavioral, environmental, and legal phenomena. Among issues of long-standing interest are crime and justice in society, social influences on human development over the life cycle, urban and community planning, and the effects of the physical environment on health and behavior. There are 2,719 students in the School, including 2,363 undergraduate and 356 graduate.

The **School of Social Sciences**, with 4,841 students (4,454 undergraduate and 387 graduate), is the largest academic unit at UCI. The faculty, many of whom are nationally recognized, have expertise in a wide range of specific social science topics. Research areas include mathematical modeling of perception and cognitive processes; economic analysis of transportation; examination of the impact of society's political system on its economy; study of social structure and values in different cultures through a rigorous scientific methodology; exploration of authority structures and inequality in society; and globalization and international affairs.

Academic Goals

UCI offers programs designed to provide students with a foundation on which to continue developing their intellectual, aesthetic, and moral capacities. Programs and curricula are based on the belief that a student's

collective University experience should provide understanding and insight which are the basis for an intellectual identity and lifelong learning.

An important aspect of UCI's educational approach is the emphasis placed on student involvement in independent study, research, and the creative process as a complement to classroom study. Independent research in laboratories, field study, participation in writing workshops, and in arts productions are normal elements of the UCI experience. In many departments, special programs and courses which involve students in original research and creative activities are integrated into the curriculum.

UCI provides an atmosphere conducive to creative work and scholarship at all levels, to exploring the accumulated knowledge of humanity, and to developing new knowledge through basic and applied research. Along with these objectives, UCI has a serious commitment to public service. The campus generates research expertise that may be applied to regional and national social issues, and provides humanistic understanding of the problems facing society.

Academic Structure

UCI's instruction and research programs focus on fundamental areas of knowledge, and at the same time provide for interdisciplinary and professional study through the Claire Trevor School of the Arts, School of Biological Sciences, The Paul Merage School of Business, School of Education, The Henry Samueli School of Engineering, School of Humanities, Donald Bren School of Information and Computer Sciences, Interdisciplinary Studies, School of Law, School of Medicine, Program in Nursing Science, Department of Pharmaceutical Sciences, School of Physical Sciences, Program in Public Health, School of Social Ecology, and School of Social Sciences.

The Office of Academic Affairs has responsibility for all programs of instruction and research. Along with the Graduate Division and the Division of Undergraduate Education, Academic Affairs reports directly to the Executive Vice Chancellor/Provost. Matters of educational policy, including approval of programs, courses, and grades, are the responsibility of the Irvine Division of the Academic Senate.

UCI Student Affairs supports the University's academic mission from outreach to alumni participation. Student Affairs offers comprehensive programs and services to advance co-curricular learning, foster student leadership, enhance the quality of student life and leadership, and promote the general welfare of the campus community.

The Division of Undergraduate Education provides leadership in developing policies and programs for the improvement of undergraduate education in such areas as general education, retention, advising, curricular development, undergraduate scholarship and research activities, international education, academic internship, civic and community engagement, grant proposals, assessment, and improvement of instruction. The Division of Undergraduate Education also administers programs and services affecting undergraduate education that require campus-level attention and coordination and that do not come under the direct authority of the heads of academic units or the Irvine Division of the Academic Senate.

The Graduate Division serves as the campuswide advocate for the advancement of graduate education and oversees all master's and doctoral programs, postdoctoral training programs, and the postbaccalaureate teacher credential program. The Graduate Division has a leadership role with UCI's academic units and provides implementation guidelines and procedures related to University policy as it affects the interconnected aspects of graduate student education, including

admissions, student financial support, enrollment and registration, academic standards, requirements for graduate degree programs, student services, and diversity programs.

Accreditation

UCI is a member of the Western Association of Schools and Colleges (WASC). The campus is fully accredited by the Senior Commission of WASC. This accreditation requires periodic review in accord with WASC policies and standards. Further information is available from WASC, 985 Atlantic Avenue, Suite 100, Alameda, CA 94501; telephone: (510) 748-9001.

In addition, the undergraduate degree program of the Department of Chemistry is accredited by the American Chemical Society; the credential programs of the School of Education are approved by the California Commission on Teacher Credentialing (CCTC); the undergraduate majors in Aerospace Engineering (AE), Biomedical Engineering (BME), Chemical Engineering (ChE), Civil Engineering (CE), Computer Engineering (CpE), Computer Science and Engineering (CSE), Electrical Engineering (EE), Environmental Engineering (EnE), Materials Science Engineering (MSE), and Mechanical Engineering (ME) are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>; Computer Science and Engineering (CSE) is also accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>; the undergraduate major in Biomedical Engineering: Premedical (BMEP) is not designed to be accredited, therefore is not accredited by ABET; the M.S. program in Genetic Counseling is accredited by the American Board of Genetic Counseling; The School of Law is provisionally accredited by the American Bar Association (ABA); The Paul Merage School of Business is accredited by AACSB International—The Association to Advance Collegiate Schools of Business; the M.D. program of the UCI School of Medicine is accredited by the Liaison Committee of the Association of American Medical Colleges and the American Medical Association; the pre-licensure RN program and the nurse practitioner program are approved by the Board of Registered Nursing; the undergraduate and graduate degrees in Nursing Science are accredited by the Commission on Collegiate Nursing Education (CCNE); the Program in Public Health, including the Master of Public Health (M.P.H.), are accredited by the Council of Public Education for Public Health (CEPH); and the Master of Urban and Regional Planning program is accredited by the National Planning Accreditation Board.

Office of Equal Opportunity and Diversity

The Office of Equal Opportunity and Diversity (OEOD) provides consultation services and training programs to the UCI campus and the medical center on the interpretation and application of both UCI policies and Federal and State laws regarding sexual harassment, discrimination, equal opportunity, and diversity. It also develops and monitors UCI's Affirmative Action Plan for staff and faculty as required by Federal regulations.

OEOD investigates and provides assistance to UCI students, faculty, and staff in resolving complaints of discrimination and sexual harassment. OEOD also offers a variety of workshops on diversity, cross-cultural communication, sexual harassment prevention, and conflict resolution in a diverse workplace/community to promote awareness, create organizational change, and provide support for the University's commitment to diversity.

OEOD is located in 103 Multipurpose Science and Technology Building; telephone (949) 824-5594 (voice), 824-7593 (TDD); e-mail: oeod@uci.edu; <http://www.oeod.uci.edu>.

See the *Catalogue's* Appendix (p. 1037) for UCI's Nondiscrimination Policy Statements and Sexual Harassment and Consensual Relationships Policies.

Office of the University Ombudsman

The Office of the University Ombudsman receives complaints, concerns, or problems that students, faculty, staff, and visitors may encounter on the UC Irvine campus. The office is an informal resource. Users of the office are provided a confidential place to explore options to make informed decisions. When appropriate, the office will initiate an informal intervention with the goal of facilitating or negotiating a resolution that is acceptable to all parties involved.

The Ombudsman acts as an independent, impartial, and confidential problem solver. The office advocates for fairness and equity. If a matter cannot be resolved through the office, the appropriate referral will be made. The Office of the Ombudsman does not replace or substitute for formal grievance, investigative, or appeals processes made available by the University. The office does not have the authority to make decisions or decide policy. However, the office can elevate legitimate matters or concerns to decision makers when appropriate. In addition, the Ombudsman can make recommendations regarding policy review and change as appropriate.

The Office of the Ombudsman also manages the Campus Mediation Program which provides alternative dispute resolution services to the campus and UC Irvine Medical Center communities. The office is located in 205 Multipurpose Science and Technology Building; telephone (949) 824-7256. For more information about the office, visit <http://www.ombuds.uci.edu> and <http://www.mediate.uci.edu>.

The Campus Setting

UCI's location combines the cultural and economic resources of an urban area with access to Southern California's spectrum of recreational, scenic, and entertainment venues.

Fifty miles south of Los Angeles, five miles from the Pacific Ocean, and nestled in 1,474 acres of coastal foothills, UCI lies amid rapidly growing residential communities and the dynamic international business environment of Orange County and the surrounding region.

The famed sailing and surfing beaches of Newport, Laguna, and Huntington are a short bike ride from campus, while hiking trails, desert camping, and mountain resorts for snow boarding and skiing are within two-hour's travel distance from Irvine. The campus itself is a natural arboretum of native species, as well as of trees and shrubs from all over the world. Adjacent to the campus, the San Joaquin Marsh serves as a natural classroom or peaceful refuge, with trails for viewing the rich diversity of wildlife.

A full roster of intramural sports and recreation events helps fill the daily fitness needs of students, along with UCI's Anteater Recreation Center. This 115,000-square-foot, state-of-the-art facility includes a pool, gymnasiums, racquetball courts, weight room, and jogging track. UCI is an NCAA Division I campus that competes in men's and women's intercollegiate athletics.

Across Campus Drive, and linked by a pedestrian bridge, an area of shops and restaurants also features a movie theatre complex, post office, and other services. Complementing UCI on-campus sports and cultural events throughout the year is the vigorous Orange County arts and entertainment environment. It offers everything from small venues for bands and performers to galleries, museums, the Irvine Barclay Theatre, Orange County Performing Arts Center, and South Coast Repertory. And within a one- to two-hour drive are the metropolitan attractions of Los Angeles and San Diego.

With plenty of land for growth, UCI is building to accommodate greater numbers of students, as well as to provide the most updated classroom and laboratory space. Recent projects include Sue and Bill Gross Hall, with stem cell-focused research, office, clinical and lecture hall space; the Contemporary Arts Center, with studio, theatre, and rehearsal areas; the Medical Education building, the high-tech hub of all educational activities for UCI medical students; and luxury student housing complexes Camino del Sol and Puerto del Sol. On the west campus, the 180-acre University Research Park (URP) attracts businesses that want to access the resources of a major research university and form strategic partnerships. URP companies interact with UCI's academic programs, enhance the region's reputation as a center for advanced technology, and contribute to an educated workforce.

Due to the high caliber of UCI faculty and scholarship, the campus is home to national organizations including the National Fuel Cell Research Center and is a major site for the nationwide cancer genetics research network. For its range of services and research, UCI's Chao Family Comprehensive Cancer Center is the county's only cancer facility designated "comprehensive" by the National Cancer Institute. UCI is noted, in fact, for its strengths in cancer and neuroscience research, much of which takes place at the University of California, Irvine Medical Center. Located in the city of Orange, 13 miles to the north, the medical center is the primary teaching and research hospital for the UC Irvine School of Medicine.

Bus transportation makes travel convenient between the campus, medical center, and major housing areas, shopping centers, and recreation locales. In addition, the campus and surrounding communities are designed for bicycle traffic, with trails connecting UCI with student housing and the coast.

Celebrate UCI

One Day. One Campus. Many Options. Come to Celebrate UCI on Saturday April 12, 2014. This spring event features an outdoor Festival, Open House, and Car Show. Wayzgoose, UCI's oldest tradition, is a student-run festival in Aldrich Park filled with live entertainment, food, games, and rides for UCI and the community. Many offices and services are open or available with information for everyone, especially prospective students. Included are academic program information and sessions; campus, housing and recreation facilities tours; financial aid and admissions information; and much more. Events and parking are free. For information and specific times of events, visit <http://www.celebrate.uci.edu/>.

University Advancement

University Advancement is shaping the future of the UC Irvine campus by creating awareness, building relationships, and generating support for UC Irvine's mission of teaching, research, and public service. It accomplishes this through strategic efforts made by University Advancement's "Centers of Excellence," which include community and government relations, development, advancement services, and

strategic planning and administration. These combined efforts provide a bridge between the University and the community, thereby promoting a climate of understanding, access, and support. For additional information, contact University Advancement at (949) 824-8696 or visit <http://www.uadv.uci.edu>.

In an era of decreasing state support to the University of California, the importance of private support is greater than ever. The **Office of Development**, in conjunction with the University of California, Irvine Foundation, raises millions in private funds annually from individuals, corporations, and foundations for the University. UC Irvine's development program works hand-in-hand with UC Irvine's schools and units to secure philanthropic gifts that support the mission and vision of the University. In 2008, the campus publicly launched its \$1-billion "Shaping the Future" campaign for this purpose. In addition, numerous support groups offer affiliation with academic units, athletics, and student programs. For additional information, contact the Office of Development at (949) 824-6418.

The **Office of Community and Government Relations** is responsible for enhancing public understanding and support of UC Irvine and the University of California at local, state, and federal levels. The program works to ensure that the University's mission, as well as its legislative and budgetary objectives, are given due consideration by elected officials and the general public through strategic advocacy, civic engagement, and awareness activities. Community and Government Relations provides leadership for building effective and enduring relationships with community leaders, public policy makers, and other members of the public to increase the visibility and prominence of UC Irvine's research, teaching, and service missions. For additional information, contact Community and Government Relations at (949) 824-0061.

The **Office of Strategic Planning and Administration** is the operations management arm of University Advancement. In addition to being responsible for a number of internal functions, this office oversees gift processing, strategic planning, and human resources. This office is also responsible for the financial management of the University of California, Irvine Foundation's assets. For additional information, contact the Strategic Planning and Administration Office at (949) 824-4166.

Advancement Services provides management and direction to support and promote fundraising for the following functional areas: prospect development, donor relations, database administration, and gift agreements. This office employs best practices related to these functional areas through the development and administration of efficient systems and processes—providing an essential infrastructure designed to ensure maximum success toward the University's fundraising goals. For additional information, contact Advancement Services at (949) 824-0142.

UC Irvine Alumni

Located in the newly opened Newkirk Alumni Center, the UC Irvine Alumni office is committed to engaging UC Irvine's more than 140,000 alumni with the campus. The office sponsors many key campus events, including the annual homecoming street festival; Lauds & Laurels, the alumni awards program; Anteater Meetups; networking and career events; cap and gown sales; and the senior barbecue. UC Irvine Alumni also oversees the Student Alumni Association, a group of student volunteers who help organize the UC Irvine Care-a-thon, an annual dance-a-thon that raises money for the neonatal intensive care unit at the UC Irvine Medical Center; and Dinner for 12 Anteaters, which brings alumni and students together for an evening of dining and networking. UCI Alumni Association members receive a range of access and privileges at the general, annual, and

lifetime levels. For additional information, call (949) 824-2586 or visit <http://www.alumni.uci.edu>.

Strategic Communications

The Office of Strategic Communications advances UC Irvine's reputation, mission, priorities, and values through an integrated communication approach that includes the following:

- **Brand development and management:** Cultivating an emotional connection and loyalty to the University by articulating the institution's distinctive qualities, encouraging a positive experience, and developing and protecting the University's identity, marks, and graphic assets.
- **Media relations:** Establishing mutually beneficial relationships with members of the media—from internal publications and social networks to production studios and international news organizations—to support the accurate, appropriate, and fair use of University information.
- **Marketing services:** Developing effective tools and services to convey the University's message, from advertising and brochures to presentations and events.
- **Publications and digital properties:** Creating magazines, newsletters, Web sites, and other digital content that advance the University's mission.
- **Visual communication:** Providing photography, videography, graphic design, and other visual assets that create a compelling story.
- **Speakers bureau and spokesperson development:** Preparing University experts for interviews, lectures, events, and other opportunities.

The Office is the University's storyteller, providing information in a way that is accurate, credible, engaging, and influential. It uses a wide range of platforms to share the University's story—*UC Irvine* magazine, Web sites and social networks, University news and features in prominent media outlets, advertising and marketing materials, and visual assets such as photography, videography, and graphics—all designed to build connections with multiple constituents.

The Office also develops communication policies, procedures, and standards to ensure a consistent, accurate, and appropriate presence throughout the institution, as well as provide counsel, services, and support to the University's schools, programs, and units.

In the past year, the Office has introduced several initiatives to improve the University's presence. It transformed the online campus newsletter into a colorful, coffee table-ready magazine. The Facts & Figures folder was enlarged into a multipage brochure. The University's Web site was completely redesigned to become more attractive, intuitive, and mobile. A branding program was launched, supported by Universitywide messaging, positioning, graphic standards, and templates.

Looking ahead, the Office will have an integral role in the University's 50th Anniversary in 2015. A daylong celebration, commemorative book, and themed academic activities are currently being planned and promoted. Students, faculty, and staff will be included in the anniversary events.

For information call (949) 824-6922.

UCI Libraries

<http://www.lib.uci.edu/>; (949) 824-6836
Lorelei Tanji, **University Librarian**

Established in 1963 as one of the founding academic units on campus, the UCI Libraries connect users—faculty, researchers, scholars, students, staff, or community members—to content, facilitating the creation and sharing of knowledge in all disciplines across campus. The Libraries support the research information needs of UCI and the community through the Libraries' Web site and at four library facilities: the Langson Library, the Ayala Science Library, and the Libraries Gateway Study Center on the UCI campus, and the Grunigen Medical Library in Orange. The UCI Libraries offer in electronic and print formats over 3.2 million volumes, 130,000 serial titles, and substantial collections of manuscripts and visual materials.

ANTPAC (the Libraries' online catalog) provides information about electronic and print books, periodicals, and other library materials at UCI. My ANTPAC provides a wide variety of personalized electronic services such as automatic customized searches and online renewals. The MELVYL® Catalog, via the UCI Libraries Web site (<http://www.lib.uci.edu>), connects with the vast collections of the University of California library system and with global resources. Expedited loans and digital desktop delivery services facilitate exchange of valuable research materials between the UC libraries, and traditional interlibrary loan services open the scholarly resources of the world to the campus community.

The UCI Libraries provide expert research assistance and conduct an active campuswide consultation and instruction program to develop students' lifelong learning skills and assist researchers to effectively utilize rapidly changing information resources and technologies. Reference services are available 24 hours a day, seven days a week via the UC-wide collaborative system which is linked with reference librarians worldwide. Over 37,000 personalized, one-on-one research consultations were conducted, and nearly 15,000 students attended library training sessions last year. A series of online "LibGuides" recommend research resources for various subjects and courses (<http://libguides.lib.uci.edu/>). Support for research via mobile devices is found at <http://www.lib.uci.edu/mobile/>.

Wireless access and 620 desktop and laptop computers are available for general use in the four library buildings. The Langson Library features a technology-enhanced classroom (Classroom 228) for hands-on learning. The Ayala Science Library features the state-of-the-art Multimedia Resources Center with multimedia production software, video equipment, and computer classrooms. The Grunigen Medical Library provides two computer technology facilities featuring an instructional laboratory and an Information Technology Center. A copy card system is used for photocopies and printing from networked public work stations, personal laptops, and mobile devices in all library buildings.

The Libraries Gateway Study Center, adjacent to the Langson Library, and the Ayala Science Library Study Center provide comfortable individual and group study areas. The Libraries Gateway Study Center also offers late-night study hours during the quarter, and 24 hours a day during prefinals and finals weeks.

Reserve Services offers access to both supplemental electronic and print materials selected by the faculty for individual courses.

Langson Library supports research and instruction in the arts, humanities, social sciences, education, and business and management. Assistive technology and study aids for students are supported through UCI's Disability Services Center.

The Department of Special Collections and Archives in the Langson Library holds non-circulating collections of rare books, archives, manuscripts, photographs, maps, and pamphlets, including the Regional

History Collections, emphasizing Orange County; the Southeast Asian Archive; the Critical Theory Archive; the Dance and Performing Arts Collections; the personal papers of distinguished UCI faculty, including Nobel Laureates; and the University Archives.

The Ayala Science Library supports research and instruction in science, medicine, and technology. More than 2,000 individual study spaces, faculty and graduate reading rooms, and 30 group study rooms are available.

The Grunigen Medical Library is located at the UCI Medical Center in Orange and serves the clinical and teaching needs of the health sciences programs.

Office of Information Technology

The Office of Information Technology (OIT) provides telephone, network, and computing services to support and enhance instruction, research, and administration at UCI. OIT provides central computing services, computer labs, departmental and research-group support, business application support, and campuswide technical coordination. The campus network infrastructure maintained by OIT provides connectivity on campus and to the Internet. Wireless network access is available in select areas of the campus as part of the UCInet Mobile Access project.

UCI's Electronic Educational Environment (EEE) is a campuswide collaboration of the Division of Undergraduate Education (DUE), UCI Libraries, University Extension, University Registrar, and OIT. EEE provides instructional technology training. OIT builds and maintains the EEE Web site (<https://eee.uci.edu>), which offers Web-based instructional tools and resources including quizzes, message boards, class Web sites, and class mailing lists. Most schools conduct official end-of-term instructor evaluations on EEE and beginning fall 2012, results summaries for many faculty teaching undergraduate courses are available to students via the Eater Evals Web site (<https://eatevals.eee.uci.edu>).

OIT provides media services including UCI Replay (<http://replay.uci.edu>), an audio/screen capture service for instructors, staff, and departments to easily record classes, presentations, or instructional vignettes; the Streaming Server (<https://www.oit.uci.edu/computing/stream>), a hosting option for streaming audio and video content; and the campus presence on iTunes U (<http://www.oit.uci.edu/itunesu>).

ZotPortal brings together campus tools and services into one simple-to-use place. It shows real-time summaries of diverse campus Web sites, as well as tools and resources needed to get things done online at UCI. Once users log in, they'll have access to customized news and announcements and a Facebook connector. Student users have access to Housing and Admissions dashboards and tools such as My Courses (which shows the student's schedule, grades, finals, and books for each quarter) and My Checklist (a task list).

OIT offers e-mail accounts for faculty, staff, and students. The Webmail service (<http://webmail.uci.edu>) is provided as one option for accessing these accounts. Faculty and staff are provided interactive Unix accounts on the server shell.nacs.uci.edu.

OIT provides Webfiles (<http://webfiles.uci.edu>), a network file-sharing service for faculty, staff, and graduate students.

OIT supports UCI Google Apps (<http://www.google.uci.edu>), a collection of services contracted from Google including UCI Gmail and Google Docs.

Incoming undergraduate students have UCI Gmail accounts as their default e-mail service.

OIT manages computer labs (<http://www.oit.uci.edu/computing/labs/>) distributed across campus in locations including the Student Center, Natural Sciences I, Multipurpose Science and Technology Building, and Social & Behavioral Sciences Gateway. Many common applications are available, including Microsoft Office as well as certain mathematical software and statistics packages. Computer peripherals including scanners and printers are available.

OIT offers a variety of additional services, detailed on the OIT Web site (<http://www.oit.uci.edu>). Offices are located in 242 Multipurpose Science and Technology Building, the modular buildings in Lot 16, and in the Ayala Science Library. The OIT Help Desk may be reached at oit@uci.edu or (949) 824-2222.

UCI Ecological Preserve

The 60-acre UCI Ecological Preserve consists of several small hills and surrounding flatlands bearing remnants of coastal sage scrub flora and associated fauna, including the California gnatcatcher (Federally listed as Threatened) and the coastal cactus wren. The Preserve is located on the campus and is set aside for teaching, research, and use by the campus community. Publications and species lists are available at <http://www.bio.uci.edu/research/natural-reserves-and-environmental-facilities/>.

Natural Reserve System

The University of California manages and maintains a system of 37 Reserves that are representative of the State's habitat and geographic diversity. These serve as outdoor classrooms and laboratories for students, faculty, and staff, and are intended primarily for purposes of education and research. For further information about the Natural Reserve System (NRS), visit <http://nrs.ucop.edu>.

UCI has primary responsibility for three Reserves: the Burns Piñon Ridge Reserve, the San Joaquin Marsh Reserve, and the Steele Burnand Anza-Borrego Desert Research Center. Additional information is available from the Burns and Marsh Reserves NRS Staff Manager at (949) 824-6031, and from the Anza-Borrego Desert Research Center Manager at dicej@uci.edu.

Burns Piñon Ridge Reserve

The Burns Piñon Ridge Reserve is located near the town of Yucca Valley in San Bernardino County. It is a 306-acre parcel of high-desert habitat representing an ecotone between montane and desert biota, with mixtures of Joshua tree, piñon pine, and juniper woodland. The Reserve has a dormitory and research station, as well as primitive camping facilities, and is used primarily for overnight field trips and research by faculty and students from the School of Biological Sciences. For further information, visit <http://nrs.ucop.edu> and <http://nrs.ucop.edu/reserves/burns/burns.htm>.

San Joaquin Marsh Reserve

The San Joaquin Marsh Reserve, one of the last remaining coastal marshes in Southern California, is a 202-acre wetland adjacent to the UCI campus. The Marsh consists of a series of freshwater ponds and their attendant aquatic flora and fauna, and is especially known for its rich bird life, both resident and migratory. The Reserve also sustains one of the largest Pacific pond turtle populations in Southern California. The Marsh has about 150 acres of cattail wetlands in three large cells, and 11 experimental bulrush-dominated ponds whose water levels can be manipulated for teaching and research purposes. For further

information, visit <http://nrs.ucop.edu> and http://nrs.ucop.edu/reserves/san_joaquin_marsh/san_joaquin_marsh.htm.

Steele/Burnand Anza-Borrego Desert Research Center

The Steele/Burnand Anza-Borrego Desert Research Center, adjacent to the town of Borrego Springs, includes approximately 80 acres, with a large historic clubhouse that will serve as home base for researchers and students. Through a cooperative agreement with California State Parks and the Anza-Borrego Foundation, the Reserve will offer access to California's largest state park. The 615,000-acre Anza-Borrego Desert State Park encompasses native fan palm oases and piñon pine-juniper forests, and is home to the endangered desert bighorn sheep. The Reserve will encourage the study of environmental and ecological problems in the region. For further information, visit <http://nrs.ucop.edu> and <http://nrs.ucop.edu/reserves/anza-borrego/anza-borrego.htm>.

UCI Arboretum and Herbarium (IRVC)

The UCI Arboretum is a botanical garden developed and managed by the School of Biological Sciences. It contains areas planted with floras adapted to climates similar to those of Southern California and maintains a large collection of plants native to Southern California and Baja California, as well as South African monocots. The Arboretum provides materials and space for research and teaching needs and its collections are also used as an educational resource for the community at large. The UCI Herbarium (IRVC) curates ca. 35,000 vascular plant specimens and is a part of the Arboretum. See <http://arboretum.bio.uci.edu/herbarium.cfm> for further information about the Herbarium. Volunteers and other interested parties are encouraged to participate in Arboretum activities. The Arboretum is open to the public 9 a.m. to 3 p.m., Tuesday through Saturday. For additional information, visit <http://arboretum.bio.uci.edu/> or call (949) 824-5833.

Laser Microbeam and Medical Program

The Laser Microbeam and Medical Program (LAMMP) is a Biomedical Technology Research Center supported by the National Center for Research Resources at the National Institutes of Health. Located within the Beckman Laser Institute and Medical Clinic at UCI, LAMMP is dedicated exclusively to the use of lasers and optics in biology and medicine. LAMMP supports activities in technological research and development, collaborative research, and training/dissemination. LAMMP research and technology development is based on fundamental light-tissue interaction mechanisms. The LAMMP program also emphasizes "translational" research by rapidly moving basic science and technology from "benchtop to bedside." Additional information is available online at <http://lammp.bli.uci.edu/> and from the LAMMP coordinator at (949) 824-5633.

University of California, Irvine Health

UC Irvine Health is committed to providing the highest quality healthcare to Orange County and surrounding communities through UC Irvine Medical Center.

UC Irvine Medical Center is the county's only university hospital and features more than 600 specialty and primary care physicians. The medical center offers a full scope of acute- and general-care services including cardiac surgery, cancer, digestive disease, neurosurgery, and trauma. *U.S. News & World Report* consistently lists UC Irvine among "America's Best Hospitals," and since 2001, has bestowed national recognition on its programs in urology, gynecology, geriatrics, cancer,

digestive disorders, kidney disease, and ear, nose and throat. It was only the third hospital in California and the first hospital in Orange County to receive Magnet Designation for nursing excellence.

Located in the city of Orange, 13 miles from the UC Irvine campus, UC Irvine Medical Center has 415 beds and is the principal clinical facility for the teaching and research programs of the UC Irvine School of Medicine. As part of its focus on family and preventive health, the medical center has additional patient care locations in Anaheim, Irvine, the UC Irvine campus, and Santa Ana.

UC Irvine Medical Center houses a 24-hour emergency department and is designated as Orange County's only Level I Trauma Center—the most comprehensive for the treatment of life-threatening injuries. Specialists at UC Irvine Medical Center are available for the expert management of high-risk pregnancies, and critically ill newborns are cared for in the county's most sophisticated Level III neonatal care unit.

The hospital is also home to the Chao Family Comprehensive Cancer Center, the only facility in Orange County designated as a comprehensive cancer center by the National Cancer Institute. It offers patients a full range of cancer therapies and research programs, including laser and radiation therapy, endoscopic ultrasound, and immunotherapy.

In March 2009, UC Irvine Douglas Hospital opened at UC Irvine Medical Center. It includes modern facilities for conducting the latest medical research and training for future and practicing physicians. The seven-story hospital has 236 beds, 19 operating rooms, and interventional procedure rooms. Private patient rooms emphasize individualized patient care and permit family members to stay overnight.

For additional information or to schedule an appointment, call toll free 1 (877) UCI-DOCS or visit <http://www.ucihealth.com>.

UCI Center for Occupational and Environmental Health

In 1980 the University established occupational health centers in Northern and Southern California for the purpose of training occupational health professionals, conducting research on occupational health issues, and providing clinical evaluation of workers/patients for work-related disease. The Centers have strong ties to the UC Schools of Medicine and Public Health.

The Irvine Center is comprised of UCI health professionals. Faculty research is concerned with identification of causal association between disease and occupational exposure as a basis for prevention of occupational disease and injury. The Center's primary areas are occupational medicine, toxicology, epidemiology, and environmental health sciences, and it houses a referral clinic, facilities for research and teaching in industrial hygiene and toxicology, and study space for residents in occupational medicine and other graduate students. For additional information, call (949) 824-8641 or visit <http://www.coeh.uci.edu/>.

Additional Facilities

Information about many other UCI research and instructional facilities and programs is available in the academic unit sections and the Office of Research section of this *Catalogue*, as well as at <http://www.research.uci.edu/centers/index.htm>.

UCI Academic Senate Distinguished Faculty

Michael R. Rose

Distinguished Faculty Award for Research, 2012-13

Professor of Ecology and Evolutionary Biology

Zuzanna S. Siwy

Distinguished Mid-Career Faculty Award for Research, 2012-13

Professor of Physics and Chemistry

Matthew Law

Distinguished Assistant Professor Award for Research, 2012-13

Assistant Professor of Chemistry

Robert M. Uriu

Distinguished Faculty Award for Teaching, 2012-13

Associate Professor of Political Science

M. Oreste Fiocco

Distinguished Assistant Professor Award for Teaching, 2012-13

Assistant Professor of Philosophy

James W. Hicks

Daniel G. Aldrich, Jr. Distinguished University Service Award, 2012-13

Associate Vice Chancellor for Research and Professor of Ecology and Evolutionary Biology

Michael B. Dennin

Distinguished Mid-Career Faculty Award for Service, 2012-13

Professor of Physics

More information about the Academic Senate Distinguished Faculty is available at <http://www.senate.uci.edu>. Click on "Distinguished Faculty Awards."

Preadmission Matters

Office of Admissions and Relations with Schools

The mission of the Office of Admissions and Relations with Schools (OARS), a division of Student Affairs, is to (1) optimize UCI's undergraduate enrollments by implementing Academic Senate, universitywide, and campus policies for the selection and admission of new freshman and transfer students; and (2) stimulate and advance cooperative educational relationships between UCI and California schools and colleges. OARS works to improve the preparation of prospective students for higher education and to promote their access to and success at UCI.

For additional information about OARS and the services listed below, call (949) 824-6703 or visit <http://www.admissions.uci.edu>.

Undergraduate Admissions

Staff are involved in monitoring applications and admission targets; collecting and evaluating personal and academic data to select and admit new undergraduate students; establishing students' permanent UCI academic record; and evaluating course work taken at other colleges and universities by new and continuing students for transfer credit.

Intersegmental Relations

Staff are involved as liaison with regard to curricular articulation between UCI and California Community Colleges as well as various educational organizations designed to facilitate regional cooperation (South Coast Higher Education Council, Southern California Intersegmental Articulation Council).

School and College Relations

Staff: (1) advise prospective students, their parents, teachers, counselors, and school administrators regarding academic programs, admission requirements, and admission selection, and assist them with UC application and enrollment processes; (2) increase public awareness by making presentations to schools, colleges, and the community regarding UCI and the University of California, and by creating publications which explain admissions policies and procedures, academic options, housing, financial aid, and student life opportunities; (3) provide general information on UC admissions and programs for all UC campuses; (4) explain University Admissions policies and procedures specific to undergraduate enrollment to the public; (5) assist prospective transfer students and community college faculty and staff; and (6) participate in activities and projects designed to enhance the academic success of students.

On-Campus Services

Staff: (1) host programs for prospective students and educational groups; (2) offer activities for applicants such as Discover UC Irvine; (3) inform UC and UCI administrators and faculty of developments in California schools and community colleges; and (4) provide consultative services to campus departments wishing to provide programs for schools and colleges or special recruitment for specific majors or programs.

Transfer Student Services

OARS' Transfer Student Services (TSS) provides advice and guidance to prospective UCI transfer students. Staff regularly visit California Community Colleges throughout the state and meet with prospective

transfer students to discuss admission requirements, academic planning and preparation, and UCI lower-division major and general education requirements. Articulation agreements, which identify how community college courses may be used to fulfill lower-division UCI degree requirements, are facilitated through TSS. Articulation agreements are available online at <http://www.assist.org>.

Campus Tours

Student-led tours of the campus are conducted weekdays at noon, except during academic recesses; Saturday tours are offered during October, November, and April only. Tours begin at the UC Irvine Visitor Center, located on the first floor of the Student Center, across from the Student Center parking structure. To confirm tour dates, times, and parking instructions and to arrange tours for school groups of 10 or more during the regular academic year, visit <http://www.campustours.uci.edu>.

How to Use the Catalogue

Because the *UCI General Catalogue* must be prepared well in advance of the year it covers, changes in some programs and courses inevitably will occur. The selection of courses to be offered each quarter is subject to change without notice, and some courses are not offered each year. The *Schedule of Classes*, available on the Registrar's Web site at <http://www.reg.uci.edu> shortly before registration begins each quarter, provides current information about course offerings, instructors, hours, and more. Students should consult the appropriate academic unit for even more up-to-date information. (Admission to UCI does not guarantee enrollment in any particular course.)

Presentation of information in the *Catalogue* is divided into six main concepts:

1. Introduction to UCI,
2. Preadmission Matters,
3. Information for Admitted Students,
4. Research,
5. Graduate Division, and
6. Academic Programs. Included in the academic program sections are the following kinds of information:
 - A. brief descriptions of the areas that are covered in each school or program and a brief statement of the educational philosophy and orientation of the unit;
 - B. requirements for undergraduate majors, minors, and graduate degrees;
 - C. additional areas of study referred to as concentrations, specializations, or emphases;
 - D. advice about planning a program of study, and other information relevant to the academic progress and experience of students majoring in fields within each school or program;
 - E. lists of faculty members; and
 - F. courses offered.

Course Listings

Undergraduate courses are classified as lower-division (numbered 1–99) and upper-division (numbered 100–199). Courses numbered 200 and above are graduate or professional courses. Lower-division usually refers to freshman-sophomore courses, upper-division to junior-senior courses. However, junior and senior students may take lower-division courses, and freshmen and sophomores may normally take upper-division courses when upper-division standing is not a prerequisite and when any

other prerequisites have been met. A course has no prerequisites unless indicated.

Some courses are structured as three-quarter sequences, such as 1A-1B-1C; *except as noted, each course in a sequence is prerequisite to the one following*. The letter L following a number usually designates a laboratory course. The letter H preceding a number designates an honors course.

The "4 Units" designation following the course title indicates the quarter unit credits toward graduation. Some courses give other than four units of credit; for example, two, five, or a range from one to 12.

When a course is approved for satisfaction of the UCI general education (GE) requirement, the general education category is indicated by a Roman numeral in parentheses at the end of the description. Courses approved to fulfill the upper-division writing requirement are designated with the letter W following the course number and the GE symbol **(Ib)** following the course description.

Undergraduate and Graduate Degrees

Physics	B.S., M.S. ² , Ph.D.
Planning, Policy, and Design	Ph.D.
Political Science	B.A., M.A. ² , Ph.D.
Psychology	B.A., M.A. ² , Ph.D.
Psychology and Social Behavior	B.A., Ph.D.
Public Health	M.P.H.
Public Health Policy	B.A.
Public Health Sciences	B.S.
Public Policy	M.P.P.
Quantitative Economics	B.A.
Religious Studies	B.A.
Social Ecology	B.A., M.A., Ph.D.
Social Policy and Public Service	B.A.
Social Science	B.A. ³ , M.A. ⁸ , Ph.D.
Sociology	B.A., M.A. ² , Ph.D.
Software Engineering	B.S., M.S., Ph.D.
Spanish	B.A., M.A. ² , Ph.D.
Statistics	M.S., Ph.D.
Studio Art	B.A. ³ , M.F.A. ³
Transportation Science	M.S., Ph.D.
Urban and Regional Planning	M.U.R.P.
Urban Studies	B.A.
Visual Studies	M.A. ² , Ph.D.
Women's Studies	B.A.

- ¹ Degrees: B.A. = Bachelor of Arts; B.F.A. = Bachelor of Fine Arts; B.S. = Bachelor of Science; B.Mus. = Bachelor of Music; J.D. = Juris Doctor; M.A. = Master of Arts; M.A.S. = Master of Advanced Study; M.A.T. = Master of Arts in Teaching; M.B.A. = Master of Business Administration; M.F.A. = Master of Fine Arts; M.P.Ac. = Master of Professional Accountancy; M.P.H. = Master of Public Health; M.P.P. = Master of Public Policy; M.S. = Master of Science; M.D. = Doctor of Medicine; M.U.R.P. = Master of Urban and Regional Planning; Ph.D. = Doctor of Philosophy. Titles of degrees may not correspond exactly with specific fields of study offered; see the Index and the academic unit sections for information.
- ² Emphasis at the graduate level is on the Ph.D. degree; the master's degree may be awarded to Ph.D. students after fulfillment of the requirements.
- ³ Admission to this program is no longer available.
- ⁴ Emphasis at the graduate level is on the Ph.D. degree; the M.S. degree may be awarded to Ph.D. students after fulfillment of the requirements. However, students may apply directly to the M.S. concentration in Biotechnology and to the M.S. concentration in Ecology and Evolutionary Biology.
- ⁵ In addition to the regular M.S. degree program, a program coordinated with the School of Education leads to an M.S. degree and a Teaching Credential.
- ⁶ UCI, UCR, and UCSD joint program.
- ⁷ UCI and UCSD joint program.
- ⁸ Emphasis at the graduate level is on the Ph.D. degree; the M.A. degree may be awarded to Ph.D. students after fulfillment of the requirements. However, an M.A. in Social Science (concentration in Demographic and Social Analysis; Mathematical Behavioral Sciences; or Medicine, Science, and Technology Studies) is available.

NOTE: A list of inactive degree programs is available in the Appendix (p. 1037).

Undergraduate Majors, Minors, and Associated Areas of Study

Students are urged to become informed of and understand all requirements concerning their intended majors, minors, and associated areas of study. Special restrictions apply to some majors and minors; for example, some minors require formal application or declaration by students, others may be completed without such formalities. Information about the programs listed below may be found in the academic unit sections of the *Catalogue*.

Undergraduate majors are offered in all of the bachelor's degree programs on the list of degree titles; the degree programs are referred to as majors in the following list. In association with these majors, UCI offers a number of minors, concentrations, specializations, and emphases.

A **minor** consists of a coordinated set of seven or more courses (28–40 units) which together take a student well beyond the introductory level in an academic field, subject matter, and/or discipline but which are not sufficient to constitute a major. An **interdisciplinary minor** consists of courses offered by two or more departments, schools, or programs. Generally, all minors are available to all students, with the following exceptions: (1) students may not minor in their major, and (2) students may not complete certain other major/minor combinations that

are expressly prohibited, as noted in the *Catalogue*. Minors are listed on a student's transcript but not on the baccalaureate diploma.

A **concentration** is a program of interdisciplinary study consisting of courses offered by two or more schools or programs. Concentrations are similar to minors in that they require fewer units of work than majors do, and the area of concentration appears on the student's transcript but not on the baccalaureate diploma. Concentrations are taken in combination with a major in one of the schools or programs offering the concentration.

A **specialization** is a program of study which enables students to focus on courses in a particular field within a major. The area of specialization pursued appears on the student's transcript but not on the baccalaureate diploma.

An **emphasis** is a program of study within a major which emphasizes a specific area of the discipline. Emphases usually have a defined course of study and are not listed on the transcript nor on the baccalaureate diploma.

In addition, the Campuswide Honors Program, various major-specific honors programs, and Excellence in Research programs are available. See the Division of Undergraduate Education section for information.

Claire Trevor School of the Arts

Majors

- Art, B.A.
- Dance, B.A. or B.F.A.
 - Specializations (B.F.A. only):
 - Choreography
 - Performance
- Drama, B.A.
- Music, B.A. or B.Mus.
 - Emphases (B.A. only):
 - Composition
 - Music History
 - Music Theory
 - Performance
 - Specializations (B.Mus. only):
 - Guitar and Lute Performance
 - Instrumental Performance
 - Bassoon
 - Clarinet
 - Double Bass
 - Flute
 - Horn
 - Oboe
 - Percussion
 - Trombone
 - Trumpet
 - Tuba
 - Viola
 - Violin
 - Violoncello
 - Jazz Studies
 - Bass

- Percussion
- Piano
- Saxophone
- Trombone
- Trumpet
- Piano Performance
- Vocal Performance

- Music Theatre, B.F.A.

Minor

- Digital Arts

School of Biological Sciences

Majors

- Biochemistry and Molecular Biology, B.S.
- Biological Sciences, B.S.
- Biology/Education, B.S.
- Developmental and Cell Biology, B.S.
- Ecology and Evolutionary Biology, B.S.
- Genetics, B.S.
- Microbiology and Immunology, B.S.
 - Specializations:
 - Immunology
 - Microbiology
 - Virology
- Neurobiology, B.S.
- Concentration: Biological Sciences Education

Minor

- Biological Sciences

The Paul Merage School of Business

Majors

- Business Administration, B.A.
 - Emphases:
 - Accounting
 - Finance
 - Health Care Management
 - Information Systems
 - Marketing
 - Operations and Decision Technologies
 - Organization and Management
- Business Information Management, B.S. (offered jointly with the Donald Bren School of Information and Computer Sciences)

Minors

- Accounting
- Management

School of Education

Cal Teach Science and Mathematics Program (Secondary Teaching Credential certification combined with a major in the Schools of Biological Sciences or Physical Sciences)

Minor

- Educational Studies

The Henry Samueli School of Engineering

Majors

- Aerospace Engineering, B.S.
- Biomedical Engineering, B.S.
 - Specializations:
 - Biophotonics
 - Micro and Nano Biomedical Engineering
- Biomedical Engineering: Premedical, B.S.
- Chemical Engineering, B.S.
 - Specializations:
 - Biomolecular Engineering
 - Energy and the Environment
 - Materials Science
- Civil Engineering, B.S.
 - Concentrations:
 - Computer Applications
 - Engineering Management
 - Infrastructure Planning
 - Mathematical Methods
 - Specializations:
 - General Civil Engineering
 - Environmental Hydrology and Water Resources
 - Structural Engineering
 - Transportation Systems Engineering
- Computer Engineering, B.S.
- Computer Science and Engineering, B.S. (offered jointly with the Donald Bren School of Information and Computer Sciences)
- Electrical Engineering, B.S.
 - Specializations:
 - Electronic Circuit Design
 - Semiconductors and Optoelectronics
 - RF, Antennas and Microwaves
 - Digital Signal Processing
 - Communications
- Engineering, B.S.
- Environmental Engineering, B.S.
- Materials Science Engineering, B.S.
 - Specializations:
 - Biomaterials
 - Electronics Processing and Materials
 - Materials and Mechanical Design
- Mechanical Engineering, B.S.
 - Specializations:
 - Aerospace Engineering

- Energy Systems and Environmental Engineering
- Flow Physics and Propulsion Systems
- Design of Mechanical Systems

- Concentration: Engineering and Computer Science in the Global Context (by approval of the Associate Dean, in combination with any major in The Henry Samueli School of Engineering)

Minors

- Biomedical Engineering
- Materials Science Engineering

School of Humanities

Majors

- African American Studies, B.A.
- Art History, B.A.
- Asian American Studies, B.A.
- Chinese Studies, B.A.
 - Emphases:
 - Chinese Culture and Society
 - Chinese Language and Literature
- Classics, B.A.
 - Emphases:
 - Classical Civilization
 - Greek and Latin Language and Literature
 - Latin Language and Literature
- Comparative Literature, B.A.
 - Emphases:
 - Comparative Literature and Critical Theory
 - Cultural Studies
 - World Literature
- East Asian Cultures, B.A.
- English, B.A.
 - Emphasis:
 - Creative Writing
- European Studies, B.A.
 - Emphases:
 - British Studies
 - Early Modern Europe
 - Encounters with the Non-European World
 - French Studies
 - German Studies
 - Italian Studies
 - Medieval Studies
 - The Mediterranean World: Past and Present
 - Modern Europe (1789–Present)
 - Russian Studies
 - Spanish-Portuguese Studies
- Film and Media Studies, B.A.
- French, B.A.
- German Studies, B.A.
- Global Cultures, B.A.
 - Emphases:

- Hispanic, U.S. Latino/Latina, and Luso-Brazilian Culture
- Africa (Nation, Culture) and Its Diaspora
- Asia (Nation, Culture) and Its Diaspora
- Europe and Its Former Colonies
- Atlantic Rim
- Pacific Rim
- Inter-Area Studies
- History, B.A.
- Japanese Language and Literature, B.A.
- Korean Literature and Culture, B.A.
- Literary Journalism, B.A.
- Philosophy, B.A.
- Religious Studies, B.A.
 - Emphases:
 - Judaism/Christianity/Islam
 - World Religious Traditions
- Spanish, B.A.
 - Emphases:
 - Cinema: Spain, Latin America, and U.S. Latino
 - Literature and Culture
 - Spanish for Future Teachers
- Women's Studies, B.A.

Minors

- African American Studies
- Archaeology
- Art History
- Asian American Studies
- Asian Studies
- Chinese Language and Literature
- Classical Civilization
- Comparative Literature
- English
- European Studies
- Film and Media Studies
- French
- German Studies
- Global Cultures

- Women's Studies

Donald Bren School of Information and Computer Sciences

Majors

- Business Information Management, B.S. (offered jointly with The Paul Merage School of Business)
- Computer Game Science, B.S.
- Computer Science, B.S.
 - Specializations:
 - Algorithms
 - Architecture and Embedded Systems
 - Bioinformatics
 - Information
 - Intelligent Systems
 - Networked Systems
 - Systems and Software
 - Visual Computing
- Computer Science and Engineering, B.S. (offered jointly with The Henry Samueli School of Engineering)
- Informatics, B.S.
 - Specializations:
 - Human-Computer Interaction
 - Organizations and Information Technology
- Information and Computer Science, B.S.
- Software Engineering, B.S.
- Concentration: Engineering and Computer Science in the Global Context (by approval of the Associate Dean, in combination with any major in the Bren School of ICS)

Minors

- Bioinformatics
- Digital Information Systems
- Health Informatics
- Informatics
- Information and Computer Science
- Statistics

Interdisciplinary Studies

Majors

- Business Information Management, B.S. (offered jointly by The Paul Merage School of Business and the Donald Bren School of Information and Computer Sciences)
- Computer Science and Engineering, B.S. (offered jointly by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering)

Minors

- Civic and Community Engagement
- Global Sustainability

- History and Philosophy of Science
- Native American Studies

Program in Nursing Science

Major

- Nursing Science, B.S.

Department of Pharmaceutical Sciences

Major

- Pharmaceutical Sciences, B.S.

School of Physical Sciences

Majors

- Chemistry, B.S.
 - Concentrations:
 - Biochemistry
 - Chemistry Education (with Secondary Teaching Certification option)
- Earth System Science, B.S.
 - Concentration:
 - Geosciences Education with Secondary Teaching Certification
 - Specializations:
 - Atmospheric Science
 - Hydrology and Terrestrial Ecosystems
 - Oceanography
- Environmental Science, B.A.
 - Concentration:
 - Geosciences Education with Secondary Teaching Certification
- Mathematics, B.S.
 - Concentrations:
 - Mathematical Finance
 - Mathematics for Education/Secondary Teaching Certification
 - Specializations:
 - Applied and Computational Mathematics
 - Mathematical Biology
 - Mathematics for Education
- Physics, B.S.
 - Concentrations:
 - Applied Physics
 - Biomedical Physics
 - Computational Physics
 - Philosophy of Physics
 - Physics Education (with Secondary Teaching Certification option)
 - Specialization:
 - Astrophysics

Minors

- Earth and Atmospheric Sciences
- Mathematics
- Mathematics for Biology

Program in Public Health

Majors

- Public Health Policy, B.A.
- Public Health Sciences, B.S.

Minor

- Public Health

School of Social Ecology

Majors

- Criminology, Law and Society, B.A.
- Psychology and Social Behavior, B.A.
- Social Ecology, B.A.
- Urban Studies, B.A.

Minors

- Criminology, Law and Society
- Psychology and Social Behavior
- Urban and Regional Planning
- Urban Studies

School of Social Sciences

Majors

- Anthropology, B.A.
- Business Economics, B.A.
 - Specialization:
 - International Issues and Economics
- Chicano/Latino Studies, B.A.
- Economics, B.A.
 - Specialization:
 - International Issues and Economics
- International Studies, B.A.
- Political Science, B.A.
- Psychology, B.A.
- Quantitative Economics, B.A.
 - Specialization:
 - International Issues and Economics
- Social Policy and Public Service, B.A.
- Sociology, B.A.

Minors

- Anthropology
- Chicano/Latino Studies
- Conflict Resolution
- Economics
- International Studies
- Linguistics
- Medical Anthropology
- Political Science

- Psychology
- Sociology

Areas of Graduate Study

For information about any area of graduate or professional study, **including the precise title of the degree conferred**, consult the *Catalogue's* academic unit sections.

Claire Trevor School of the Arts

- Acting
- Art
- Choral Conducting
- Collaborative Piano
- Critical and Curatorial Studies

Majors and Careers

Choosing a Major

Many students select their University major, the field of study which represents their principal academic interest, at the time they fill out their *University of California Undergraduate Application for Admission and Scholarship*. Some students, however, are not ready to choose a major at the time they apply, and still others may wish to change to a different major after they have enrolled.

In preparation for choosing a major, students need to familiarize themselves as much as possible with UCI and its academic programs. Entering students are exposed to a wide range of areas of study, and it is not unusual for students to become enthusiastic about academic disciplines previously unfamiliar to them. At UCI a number of traditionally separate academic disciplines have strong interrelationships, so that the academic environment is influenced by broad interactions among disciplines. As a complement to classroom study, UCI encourages its students to become involved in a variety of educational experiences such as independent study, laboratory research, field study, writing workshops, computing, and arts productions. Such experiences can help students identify additional areas of interest.

The *UCI General Catalogue* is a good place to find specific information about programs available and requirements. Students are encouraged to talk to academic counselors and faculty advisors and to go to any department to learn more about its programs of study, its requirements for graduation, and possible enrollment limitations. While advisors may not be

familiar with all fields, they can suggest ways to investigate other areas of study and be helpful in planning a lower-division program which will keep several options open. Courses and workshops designed to assist students in choosing a major are offered by the UCI Career Center, the Division of Undergraduate Education, and some of the academic units.

All students are required to choose a major by the time they reach junior status. It is important to look well ahead to this decision and to think about it carefully during the freshman and sophomore years. When considering possible majors, students should keep in mind that some major programs require quite specific preliminary study. At the same time, excessive early concentration could reduce a student's options and could cause the student to need more than four years to obtain the baccalaureate degree. Furthermore, courses required for graduation need to be considered. For these reasons, it is desirable for students to plan their programs carefully and thoughtfully, seeking a balance between exposure to a variety of academic areas and completion of courses which are prerequisite to a major under consideration. A qualified student interested in two areas of study may graduate with a double major by fulfilling the degree requirements of any two programs. Certain restrictions may apply; students should check with their academic advisor.

Each school or program has its own standards for change of major. Once a student selects a major, or decides to change majors, the student should visit the academic advising office for their prospective major to obtain current information about prerequisites, program planning, and policies and procedures. For most majors, students may request a change of major by submitting an online application through StudentAccess. Further information and a list of excluded majors is available on the Registrar's Web site at <http://www.reg.uci.edu/request/changemajor.html>.

All schools with exceptional requirements have major-change criteria approved by the Academic Senate and published on the Division of Undergraduate Education Web site (<http://www.changeofmajor.uci.edu>). Students changing majors may meet the approved major-change criteria of the unit they wish to enter that are in place at the time of their change of major or those in effect up to one year before.

Undecided/Undeclared Students

Students who enter the University as freshmen or sophomores, who are uncertain about their major, and who wish to explore, experiment, and then decide, may participate in the Undecided/Undeclared Advising Program administered by the Division of Undergraduate Education. The Division is devoted to enriching the learning environment for lower-division students, especially those in the freshman year. Detailed information about the Undecided/Undeclared Advising Program is available in the Division of Undergraduate Education section of the *Catalogue*.

Preparation for Graduate or Professional Study

Undergraduate students should keep the possibility of future graduate or professional study in mind as they plan their academic programs, and they should discuss their career goals with their advisors. Students who have an idea of the direction in which they would like to go should familiarize themselves with the basic requirements for postbaccalaureate study and keep those requirements in mind when selecting courses. Furthermore, students should supplement their undergraduate programs by anticipating foreign language or other special requirements at major graduate schools and by intensive work in areas outside their major that are of special relevance to their intended graduate work. Students should consult the graduate advisor or academic counselor in the academic unit

corresponding to their area of interest and visit the UCI Career Center which offers a number of services useful to those considering graduate or professional study.

General information for prospective graduate students is available on the Graduate Division Web site (<http://www.grad.uci.edu/>), while information about UCI's graduate education policies and procedures is available in *The Manual of the Irvine Division of the Academic Senate* (<http://www.senate.uci.edu>).

Preprofessional Preparation

Law

Law schools educate lawyers to serve the entire spectrum of legal issues (e.g., tax, criminal, entertainment, or immigration law), and across a wide variety of careers in private, public, and nonprofit sectors. As a result, a wide range of academic backgrounds can serve as good preparation for a career in law. Law schools look less for specific areas of study than they do for evidence of academic excellence. A good record in physics or classics, for example, will be preferred over a mediocre record in history or political science. Most law schools give equal preference to students from all academic disciplines. Courses that demand strong writing and analytical work (e.g., logic, writing, mathematics, research methods, and statistics) build skills that are the key to doing well on the Law School Admissions Test (LSAT) and succeeding in law school and the legal profession.

UCI offers a number of law-related courses that students in any major may take. The School of Humanities offers a Humanities and Law minor, emphasizing courses that require critical reading and analysis, and courses that focus on theoretical and applied analytical perspectives on ethical, political, and social issues relevant to the law. Further, the globalization and increased diversity of our world puts a premium on strong language skills and an understanding of multiple cultures. The School of Social Sciences offers courses in the study of law, international relations, and economics of law and recommends that students take some political science courses as well. The School of Social Ecology offers many law-related courses in both substantive law (such as environmental and criminal law) and in law and society and criminal justice. Social Ecology majors are provided the opportunity to apply theories learned in the classroom to actual problems through its field study program. Students may pursue fieldwork in both public and private law practices, law enforcement, and corrections agencies. Through these placements, students gain direct experience and have the opportunity to shadow professionals in these areas.

Students should know that law schools look closely at five aspects of a student's application: grades, LSAT results, the applicant's statement of purpose, in-depth letters of recommendation, extracurricular activities, and law-related work experience. Students should be aware that not everyone who applies is admitted to law school. One consideration in selecting an undergraduate major is alternative careers should one's goals change.

Medicine and Other Health-Related Sciences

Although health science educators strongly recommend that students obtain a bachelor's degree prior to admission to the health sciences, there is no preferred major. Many UCI students who plan to enter the health professions major in Biological Sciences because much of the basic course work for that major is also required for medical school admission; however, students may major in any academic field as long as they also take the prerequisite courses required by professional health science schools. In general, the minimum amount of undergraduate preparation

required includes one year each of English writing/composition, physics, biology with laboratory, chemistry (to include inorganic, organic, and biochemistry), and mathematics (especially calculus and statistics). Courses in cell biology, developmental biology, genetics, molecular biology, physiology, and computer science are recommended. In addition, some health sciences schools have additional course requirements or recommendations, for example, English and/or a foreign language, in particular, Spanish.

Although many factors ultimately are considered when reviewing applicants for admission, admission committees look carefully at the undergraduate grade point average and the results of the Medical College Admission Test (MCAT); the student's personal essay and/or interview; letters of recommendation; clinical exposure; research experience, especially in a biological, medical, or behavioral science; and extracurricular activities which demonstrate the applicant's ability to interact successfully with others.

Since medical programs cannot accommodate all qualified applicants and competition for entrance is keen, it is important to keep in mind alternative career opportunities should one not be accepted to a health science school, or should one decide to pursue instead one of the expanding number of health-related programs now available.

Business/Management

The contemporary executive or manager must be a creative thinker, make complex decisions, and have the ability to perceive and participate in the full scope of an enterprise while understanding its role in the economy. Effective management requires leadership ability, strong problem-solving skills, the ability to successfully deploy and manage information technologies, effective oral and written communication skills, analytical skills, an understanding of global economic trends, and a basic knowledge of behavioral processes in organizations.

Although not required for preprofessional school preparation, The Paul Merage School of Business offers a major in Business Administration and a major in Business Information Management with the Bren School of Information and Computer Sciences. The Merage School also offers a minor in Management as well as a minor in Accounting as a supplement to any undergraduate major. The Management minor can provide students with a broad understanding of management theory and practice and may be helpful to students in determining whether they wish to pursue a career in business or management or undertake graduate-level study in management. The Accounting minor prepares students for careers in the accounting field or for graduate-level study.

Students can also supplement their major course work to develop the skills needed for business and management by taking electives such as calculus, statistics, economics, psychology, sociology, computer science, and political science, and are encouraged to take intensive course work in the culture, history, geography, economy, politics, and language of specific foreign countries.

For admission purposes, the majority of graduate schools of business look at five areas: grades, scores on the Graduate Management Admission Test (GMAT), the applicant's statement of purpose, in-depth letters of recommendation, evidence of leadership in school and community activities, and work experience. Substantive work experience is becoming an increasingly important prerequisite for many programs.

Students from a variety of undergraduate disciplines including liberal arts, social sciences, physical or biological sciences, computer science, and

engineering are encouraged to apply to UCI's Paul Merage School of Business.

Career Opportunities

UCI's academic units which offer undergraduate education leading to the bachelor's degree provide students with opportunities to explore a wide range of interests leading to a career choice or to further education at the graduate or professional level. The lists which follow show the varied career areas pursued by UCI graduates. Any major can lead to a number of careers. Additional discussions of careers are presented in individual academic unit sections.

Arts Career Areas

Acting, Advertising, Animation, Arts Administration, Art Therapy, Broadcasting, Choreography, Composition, Conducting, Conservation/Restoration, Consulting, Criticism, Curating, Digital Arts Production, Direction, Environmental Design, Instrument Repair/Tuning, Interior/Industrial Design, Journalism, Law, Librarianship, Lighting, Marketing, Medical Illustration, Performance, Photography, Physical Fitness, Printing, Production, Publicity, Public Relations, Publishing, Set/Stage/Costume Design, Stage Management, Teaching, Tourism, Visual Resources Management, Writing

The exceptionally talented Claire Trevor School of the Arts graduate may choose to become a professional actor, art historian, artist, dancer, or musician. However, there are many other careers to explore in numerous arts-related areas, or the graduate may wish to combine part-time professional performance with supplemental work. The field of arts administration is an increasingly important career area, offering opportunities to work with opera and dance companies, repertory theatre companies, museums, state and local arts councils, community arts organizations, and arts festivals.

Biological Sciences Career Areas

Bioanalysis, Biochemistry, Biomedical Engineering, Cell Biology, Chiropractic Medicine, Dentistry, Developmental Biology, Dietetics, Environmental Management, Forestry, Genetic Engineering, Health Administration, Industrial Hygiene, Marine Biology, Medical Technology, Medicine, Microbiology, Nurse Practitioner, Occupational Therapy, Oceanography, Optometry, Osteopathy, Plant Biology, Pharmacology, Pharmacy, Physicians' Assistant, Physical Therapy, Podiatry, Public Health, Quality Control, Research, Sales, Speech Pathology, Teaching, Technical Writing and Editing, Veterinary Medicine

The health field is one of the fastest-growing career areas in the country. Work sites may include private corporations, educational institutions, hospitals, health care complexes, private foundations, city and county governments, state agencies, the federal government, and many others.

Engineering Career Areas

Aerospace, Biochemical, Biomedical, Biotechnology, Chemical Engineering, Communications, Computer Architecture, Computer Engineering, Computer Software, Control Systems, Digital Signal Processing, Earthquake Safety, Electric Power, Electronics, Electro-optics, Environmental Control, Environmental Engineering, Flood Control, Geotechnical, High-Speed Image Processing, Hydraulics, High-Frequency Devices and Systems, Land Development and Urban Planning, Manufacturing Engineering, Materials, Process Control, Propulsion and Power, Public Works, Reliability, Robotics, Structures, Traffic, Transportation, Water Resources, Water Supply

These are some areas for employment available to UCI engineering graduates. Career paths typically involve one or more of the following: design, research and development, manufacturing or construction, operations, consulting, applications and sales, management, or teaching. At UCI they will have had the choice of Aerospace, Biomedical, Biomedical: Premedical, Chemical, Civil, Computer, Computer Science and Engineering, Electrical, Environmental, Materials Science, or Mechanical Engineering, as well as a general program in Engineering. However, they will frequently find challenging positions in related areas such as industrial engineering, for which their general and specialty course work at UCI, followed by formal or informal, on-the-job training will qualify them. Approximately half of UCI's Engineering graduates obtain advanced degrees from UCI or other universities, and almost all engage in continuing education to keep abreast of advances in technology. Many Engineering graduates build on their engineering background and enter graduate programs to obtain degrees in the fields of administration, law, medicine, physics, or mathematics.

Humanities Career Areas

Advertising, Banking, Broadcasting, Business, Counseling, Communications, Diplomacy, Education, Film and Television, Foreign Service, Government Service, Human Resources, Insurance, International Relations, Journalism, Law, Library Science, Management/Administration, Marketing, Personnel, Politics, Public Administration, Public Relations, Publicity, Publishing, Research, Retail Sales, Screenwriting, Social Welfare, Teaching, Technical Writing, Tourism, Translating/Interpreting, Writing

Diverse career fields available to Humanities graduates include entry-level positions in both the public and private sectors or professional-level opportunities combining the degree with further specialization. Humanities graduates may also elect to enter professional graduate programs in law, library science, medicine (with proper prerequisites), or public administration. Business and industry utilize Humanities graduates for management training programs in banking, retail sales, and insurance. Graduates with special skills in oral and written communications may look to positions with newspapers, advertising agencies, public relations firms, radio and television stations, and publishing houses.

Technical writers are currently in demand, particularly those who have had some preparation in engineering, computer science, and the sciences. Opportunities for graduates fluent in languages other than English exist in government, business, social service, counseling, foreign service, and international trade, among others.

Information and Computer Science Career Areas

Applications Programming, Bioinformatics, Computer-Aided Design, Computer Animation, Computer Architecture, Computer Networks, Computer Simulation, Computer Systems Design, Databases, Information Systems Design and Consulting, Embedded Systems, Management Information Systems, Multimedia Applications, Parallel and Distributed Systems, Software Engineering, Human-Computer Interface Design, Supercomputing, Systems Administration, Systems Analysis and Design, Systems Programming, Business Information Management

Graduates of the Donald Bren School of Information and Computer Sciences pursue a variety of careers. Many graduates specify, design, and develop a variety of computer-based systems comprised of software and hardware in virtually every application domain, such as aerospace, automotive, biomedical, consumer products, engineering, entertainment, environmental, finance, gaming, investment, law, management,

manufacturing, and pharmacology. Bren School graduates also find jobs as members of research and development teams, developing advanced technologies, designing software and hardware systems, and specifying, designing, and maintaining computing infrastructures for a variety of institutions. Some work for established or start-up companies while others work as independent consultants. After a few years in industry, many move into management or advanced technical positions. Some Bren School students also use the undergraduate major as preparation for graduate study in computer science or another field (e.g., medicine, law, engineering, management).

Nursing Science Career Areas

Patient Care, Provider Relations, Policy Analysis, Policy Development, Risk Assessment, Global Health, Consulting, Program Evaluation, Incident/Disease Investigation, Research Methodology, Data Analysis, Clinical Trials, Social and Economic Development, Health Policy and Law, Women's Health, Children's Health, Health and Behavior, Design of Health Care Systems, Pharmaceutical Production and Development, Biotechnology, Medicinal Chemistry, Medicine, Pharmacy, Health Promotion, Health Care Delivery Systems, Physical Restoration and Rehabilitation, Program Management and Design, Disease Prevention and Control, Community Health and Outreach, Health Forensics, Health Insurance and Management, Information Technology, Marketing, Public Relations

Graduates of Nursing Science are prepared for a wide range of unparalleled career opportunities at the frontiers of many emerging and established fields in health care, industry, government, and research and education. Opportunities include working with private corporations, hospitals, medical clinics, health care agencies, pharmaceutical industry, biotechnology industry, local and state government agencies, the federal government, educational providers, court and probation systems, and many others. Graduates can use their education and training to enter a rich variety of graduate programs and to earn professional degrees in related fields.

Pharmaceutical Sciences Career Areas

Pharmaceutical Production and Development, Biotechnology, Medicinal Chemistry, Medicine, Pharmacy, Health Promotion, Health Care Delivery Systems, Physical Restoration and Rehabilitation, Program Management and Design, Disease Prevention and Control, Community Health and Outreach, Health Forensics, Health Insurance and Management

Graduates of Pharmaceutical Sciences are prepared for an unparalleled range of career opportunities in emerging and established biomedical fields in industry, government, research institutes, and education. Opportunities include working in private corporations, hospitals, medical clinics, health care agencies, pharmaceutical industry, biotechnology industry, local and state government agencies, the federal government, educational providers, court and probation systems, and many others. Graduates have a rich variety of choices in filling professional positions in any of these settings or first pursuing additional training at the graduate level in pharmaceuticals, chemistry, pharmacology, or biological sciences. Earning professional degrees in medicine, dentistry, or pharmacy is yet another popular option.

Physical Sciences Career Areas

Actuarial Science, Aerospace, Analytical Chemistry, Applied Physics and Chemistry, Astrophysics/Astronomy, Bioscience, Computers, Energy Science, Electronics, Engineering Applications, Environmental Science, Food Chemistry, Forensic Chemistry, Geoscience, Inorganic Chemistry,

Instrumentation, Laboratory Science, Lasers, Materials Science, Medicine, Nuclear Science, Optical Devices, Organic Chemistry, Pharmacology, Physical Chemistry, Plasma Physics, Quality Control, Radiation Science, Radiology, Solid State Devices, Space Science, Statistics, Teaching

Graduates of the School of Physical Sciences have backgrounds appropriate to a variety of areas in research, teaching, and management. Career opportunities for physical scientists are found in federal, state, and local government as well as in private industry. Chemists may work in research and development and in jobs dealing with health, pollution, energy, fuel, drugs, and plastics. Water districts, crime labs, and major chemical and oil companies are also good resources for employment. Earth System Science and Environmental Science majors will find employment in areas such as hazardous waste treatment, resource extraction, pollution remediation, and as consultants to government and high-technology fields. Mathematics graduates find employment in both government and the private sector in such technical fields as operations research, computer programming, marketing research, actuarial work, banking, retail management, and scientific research. Physics graduates find professional positions in education, research and development, and in the electronic and aerospace industries. Possible careers include science teaching and writing, computer and electrical engineering, device and instrumentation development, nuclear and reactor physics, environmental and radiological science, laser and microchip development, astronomy, and geophysics.

Public Health Career Areas

Global and International Health, Disease Prevention, Surveillance, Natural Disasters, Emergency Preparedness and Response, Environmental Health Science, Epidemiology, Health Behavior, Health Psychology, Health Economics, Engineering and Health, Health Policy Analysis, Health Care Management, Health Services Administration, Biostatistics, Health Communication, Health Informatics, Complementary and Alternative Medicine, Health Promotion, Health Demography, Health Insurance, Community Health, Health Risk Assessment, Forensics, Biotechnology, Vaccinology, Genetic Engineering, Health Geography, Health Education, Infectious Disease Prevention, Chronic Disease Prevention, Wellness, Clinical Trials, Urban Health, Rural Health, Water Quality, Nutrition and Food Protection, Air Quality and Health, Health Geology, Vulnerable Populations, Burden of Disease Assessment

Increasing human population, diversity, and global mobilization makes a cogent argument for pursuing careers in public health in today's world. Emerging government policies such as the United States Affordable Care Act emphasize disease prevention and population health. Graduates of the UC Irvine Program in Public Health are prepared for careers in research, teaching, and public health practice in private and public sectors. Challenges in public health require acquisition and ready deployment of fundamental knowledge and practical skills. Employment opportunities exist at city and county health care agencies, state departments of public health, national institutions such as the Centers for Disease Control and Prevention, and international agencies such as the World Health Organization. Private foundations and corporations employ public health graduates, including, for example, the Bill and Melinda Gates Foundation and various health insurance providers. Nonprofit organizations and community service groups also employ public health degree holders. Graduates who are interested in academic career tracks focusing on research and/or teaching will find employment at various units within public and private universities and think-tanks.

Social Ecology Career Areas

Administration, Architecture, Biostatistics, Clinical Psychology, Corrections/Probation, Counseling, Education Support Services, Environmental Design, Environmental Planning and Consulting, Epidemiology, Government Service, Health Service, Hospital Administration, Housing Development, Law, Management/Administration, Mental Health, Program Coordination, Psychology, Public Health Research, Public Relations, Real Estate/Development, Research and Research Design, Social Service, Teaching, Urban Planning, Water Quality Control

Graduates of the School of Social Ecology may hold positions as urban planners, environmental consultants, juvenile probation officers, counselors, elementary and secondary school teachers, legal aides, coordinators of juvenile diversion programs, social workers, mental health workers, special education teachers, architectural consultants, and elected officials, just to cite some examples of career choices. Many School of Social Ecology graduates have used their training to enter graduate programs and obtain advanced degrees in the fields of law; clinical, community, social, developmental, and environmental psychology; public health; public and business administration; environmental studies; urban planning; social welfare; criminology; and the administration of justice.

Social Sciences Career Areas

Banking, Correction/Probation, Counseling, Environmental Analysis, Finance, Foreign Service, Government Service, Health Services, Human Services, Industrial Relations, International Affairs, Labor Relations, Law, Library Science, Management/Administration, Marketing, Personnel, Psychology, Public Relations, Publishing, Real Estate, Research, Sales, Statistical Analysis, Teaching, Writing

Business and industry often look to social science graduates to fill positions in management, finance, marketing and advertising, personnel, production supervision, and general administration. In the public sector, a wide variety of opportunities are available in city, county, state, and federal government. Teaching is a frequently chosen career at all levels from elementary school teacher to university professor. In addition, many graduates enter professional practice, becoming lawyers, psychologists, researchers, or consultants in various fields.

Special Programs

Access UCI and Summer Session Enrollment

Exceptional high school students can enroll in UCI classes without formal admission to the University year-round.

During the academic year, concurrent enrollment through UC Irvine Extension's Access UCI program is ideal for well-prepared high school seniors who have exhausted the curriculum available in high school and who are looking for advanced-level course work, or for students who are seeking an enrichment course or course work not available at their high school. For information, call (949) 824-5414; e-mail: unex-services@uci.edu; http://extension.uci.edu/courses/access_uci.

During the summer, highly qualified high school students can enroll in UC Irvine Summer Session's High School Summer Scholar Program. This program provides students with the opportunity to experience college-level course work and preview university life through a combination of academic course work and co-curricular activities. Students may also enroll directly

in regular UCI summer quarter courses through UC Irvine Summer Session. For information, contact the UCI Summer Session Office at (949) 824-6494; e-mail: summer-session@uci.edu; <http://summer.uci.edu>.

Admission and enrollment in courses either through Access UCI or UC Irvine Summer Session does not constitute admission to UCI as an entering freshman student. See the Undergraduate Admissions (p. 37) section of this *Catalogue* for information about applying to UCI and the formal admission process.

UCI Center for Educational Partnerships

The mission of the UCI Center for Educational Partnerships (CFEP) is to create collaborations that support preparation for and success in higher education. CFEP's focus is on equity and access for all students in order to achieve the University of California's goal of academic excellence. CFEP has three guiding principles: (1) diversity among students and faculty enhances the educational experience the University provides and the scholarship it produces; (2) collaboration promotes the exchange of ideas, leverages resources, and drives collective action; and (3) research guides practice, promotes accountability, and advances knowledge. In order to achieve its mission, CFEP builds lasting partnerships with individuals and institutions committed to improving education; facilitates faculty involvement; engages in K–12 academic preparation; provides teacher professional development; promotes college-going culture; supports undergraduate retention; enhances graduate school preparation; conducts research and evaluation; participates in the national dialogue about educational reform and collaboration; and fosters learning communities to support ongoing professional and intellectual development.

For additional information, contact the Center for Educational Partnerships at (949) 824-7482; <http://www.cfep.uci.edu>.

Student Support Services

Housed within the Division of Undergraduate Education, Student Support Services (SSS) is an academic support program dedicated to helping first-generation college, Pell eligible/low-income, and/or disabled students succeed and thrive at UCI. The goal of SSS is to help students successfully transition to UC Irvine and enhance their academic experience. SSS offers drop-in counseling and advising provided by professional staff, faculty, and student peers; organizes weekly workshops on academic and social opportunities at UCI; and coordinates summer academic programs for incoming students. See the Division of Undergraduate Education (p. 52) section of the *Catalogue* for additional information.

Graduate Diversity Programs

The University of California believes that a diverse student and faculty population is integral to academic excellence. It is critical to promoting the lively intellectual exchange and the variety of ideas and perspectives that are essential to advanced scholarly research. The University remains committed to expanding outreach, recruitment, and retention efforts. Through the Graduate Division's diversity programs, steps are taken to increase the participation of diverse groups of U.S. citizens and permanent residents who have been disadvantaged in obtaining graduate education in the United States. See the Graduate Division (p. 106) section of the *Catalogue* for additional information.

Medical Student Support Programs

The School of Medicine's Office of Admissions and Outreach is designed to meet the challenges of California's changing demographics and to

contribute to the School's goal of achieving a broad spectrum of diversity in the student population, and ultimately, in the medical profession. The office plays a major role in the recruitment and retention of targeted socioeconomically disadvantaged students who have the potential of service to the medically underserved communities in California. The School's Office of Diversity and Community Engagement (ODCE) augments the recruitment and retention of students from populations underrepresented in medicine and works closely with the Office of Admissions and Outreach. ODCE also serves as a resource for students by providing a supportive learning environment through advising and counseling prospective students and mentoring students following their admission to medical school. See the School of Medicine (p. 649) section for additional information.

Expenses, Tuition, and Fees

- Tuition and Fees
- Special Tuition and Fee Programs, Waivers, and Exemptions
- California Residence and Nonresident Supplemental Tuition
- Tuition and Fee Refunds

Estimated Expenses

The range of estimated nine-month expenses, including projected tuition, fees, books and supplies, room and board, and miscellaneous expenses for California-resident students attending UCI during the 2013–14 academic year are shown in the following chart; tuition and fees are subject to change without notice, and the University may impose additional fees.

Expenses for students living off campus vary depending upon number of roommates, location of apartment, amenities, and other factors. Graduate student expenses assume two students sharing a two-bedroom apartment. All other on- and off-campus estimates are based on two students sharing a bedroom. Figures are based on periodic surveys and are adjusted for inflation for years when surveys are not conducted. These are intended only as a guide in computing average expenses.

California-Resident Student Status	Living Arrangement	Estimated Nine-Month Expenses
Undergraduate	On campus	\$29,661.00
	Off campus	\$28,929.00
	At home	\$23,513.00
Graduate	On campus - Verano	\$32,758.50
	On campus - Palo Verde	\$33,777.50
	Off campus	\$38,523.50
	At home	\$32,578.50

Tuition and Fees

All tuition, fees, and charges are subject to change without notice, and the University may impose additional tuition and fees. Consult the Registrar's Web site at <http://www.reg.uci.edu> for the most up-to-date information.

NOTE: The fee levels shown in the following charts are for the 2012–13 academic year; see the Registrar's Web site at <http://www.reg.uci.edu> for information about the 2013–14 fee levels.

Undergraduate Student Tuition and Fees for Academic Year 2012–13¹

Fee	Resident	Nonresident
Tuition	\$11,220.00	\$11,220.00
Student Services Fee	\$972.00	\$972.00
Associated Students Fee	\$54.00	\$54.00
UCI Student Center Fee	\$409.50	\$409.50
Bren Events Center Fee	\$69.00	\$69.00
Recreation Center Fee	\$264.00	\$264.00
Campus Spirit Fee	\$99.00	\$99.00
Measure S Fee	\$24.00	\$24.00
TGIF Fee	\$10.50	\$10.50
eTech Fee ³	varies	varies
UG Student Health Insurance Fee	\$924.00	\$924.00
Nonresident Supplemental Tuition	-----	\$22,878.00
TOTAL	\$14,046.00	\$36,924.00

Graduate Student Tuition and Fees for Academic Year 2012–13^{1, 2}

Fee	Resident	Nonresident
Tuition	\$11,220.00	\$11,220.00
Student Services Fee	\$972.00	\$972.00
Associated Graduate Student Fee	\$27.00	\$27.00
UCI Student Center Fee	\$409.50	\$409.50
Bren Events Center Fee	\$69.00	\$69.00
Recreation Center Fee	\$264.00	\$264.00
eTechFee ³	varies	varies
Grad. Student Health Insurance Fee	\$2,088.00	\$2,088.00
Nonresident Supplemental Tuition	-----	\$15,102.00
TOTAL	\$15,049.50	\$30,151.50

¹ Student fees shown are based on three quarters of attendance.

² The exact cost of attending UCI varies by program. Students in the the Full-time M.B.A., J.D., M.D., Master's in Public Health, Master's in Public Policy, M.S. in Biotechnology Management, M.S. in Engineering Management, M.S. in Genetic Counseling, M.S. in Nursing Science, CSU-UCI Joint Ed.D. program, Executive M.B.A. programs, M.A.S. in Criminology, Law and Society program, and M.P.Ac. program should refer to the tuition and fee information posted on the Registrar's Web site at <http://www.reg.uci.edu>.

³ The nonrefundable eTech fee is \$4 per undergraduate lecture course unit, up to a maximum of \$60 per quarter or \$180 per year.

Payment of Tuition and Fees

Tuition and fees for each quarter are due and payable in advance within deadlines published in the Quarterly Academic Calendar on the Registrar's Web site at <http://www.reg.uci.edu>. A student will not be

officially registered in classes until tuition and fees are paid in full, with the exception of students who are participating in the PACE Plan.

Continuing and returning students are required to pay all outstanding fines and other debts in full before they pay their tuition and fees for an upcoming term.

Information about tuition and fee refunds appears later in this section.

Tuition provides general support for the University's operating budget, including costs related to instruction, and funds student financial aid. Graduate students studying out of the State may be eligible to pay 15 percent of tuition. M.D. students are required to pay the full tuition for each quarter in which they enroll, including the summer quarter. The summer quarter tuition level for M.D. students will be the same as that of the previous spring quarter.

The **Student Services Fee** is required of all students regardless of the number of courses taken, unless otherwise noted. This fee is a charge to each student for co-curricular programs, activities, and services which benefit the student and which are complementary to, but not a part of, the instructional programs. A portion of the fee is returned to support student financial aid. No part of this fee is refundable to students who do not use all or any of these services. Graduate students studying out of the State may be eligible to pay 15 percent of the Student Services Fee. M.D. students are required to pay the full Student Services Fee for each fall, winter, and spring quarter, and a reduced Student Services Fee of \$80 for each summer quarter.

The **Associated Students Fee** is administered by the Associated Students of UCI, the Associated Graduate Students, The Paul Merage School of Business Student Association, and the Associated Medical Students. These funds provide social activities, lectures, forums, concerts, and other activities at either a reduced charge, or no charge, to UCI students. The fees are required of all students.

The **UCI Student Center Fee** is required of all students regardless of the number of courses taken. The fee is used to pay the debt service on revenue bonds sold to finance the construction costs of the UCI Student Center.

The **Bren Events Center Fee** is required of all students regardless of the number of courses taken or units carried. The fee is used to pay the debt service on revenue bonds sold to finance the construction costs of the Bren Events Center.

The **Recreation Center Fee** is required of all students regardless of the number of courses taken or units carried. The fee is used to pay the debt service on revenue bonds sold to finance the construction costs of the Student Recreation Center and Athletics facilities improvements.

The **Campus Spirit Fee** is required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to support Athletics and Campus Spirit Programs.

The **Measure S Fee** is required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to support, upgrade, and expand the ASUCI Express Shuttle.

The **Green Initiative Fund (TGIF) Fee** is required of all undergraduate students for the fall, winter, and spring quarters regardless of the number of courses taken or units carried. The fee is used to support undergraduate student efforts to reduce the campus's environmental footprint and to promote sustainable educational projects at UCI.

The **eTech Fee** is a nonrefundable per-unit fee, required of all students enrolled in undergraduate lecture courses during the fall, winter, and spring quarters. The fee is used to fund the UC Irvine Educational Technology Initiative maintaining and improving existing educational technology, and providing new educational technology services and capabilities supporting the educational goals of UCI students. The fee is \$4 per unit of undergraduate lecture course, up to a maximum amount of \$60 (or 15 units) per quarter. It will be assessed after the third week of instruction. Further information is available at <http://etech.uci.edu>.

The **Undergraduate Student Health Insurance Fee** is charged over three quarters (fall, winter, and spring) to provide 12-month coverage from September through August. The fee is required of all undergraduate students regardless of the number of courses taken or units carried. The fee is used to provide undergraduate students with health insurance. If students provide evidence of comparable coverage from another source, participation in the mandatory plan may be waived. This fee is subject to change pending the outcome of negotiations with insurance carriers.

The **Graduate Student Health Insurance Fee** is charged over three quarters (fall, winter, and spring) to provide 12-month coverage from September through August. First-year law and medical students who matriculate prior to September, any returning students not enrolled in the previous spring quarter, and transfer students must also pay a prorated GSHIP premium in addition to the fall premium. The fee is required of all graduate and medical students regardless of the number of courses taken or units carried. The fee is used to provide graduate and medical students with health insurance. If students provide evidence of comparable coverage from another source, participation in the mandatory plan may be waived. This fee is subject to change pending the outcome of negotiations with insurance carriers.

The **Medical Student Disability Insurance Fee** is required of all medical students. The entire annual fee is charged for the fall quarter.

The **Professional Degree Supplemental Tuition** is required of all students in the full-time M.B.A., J.D., M.D., Master's in Public Health, Master's in Public Policy, M.S. in Biotechnology Management, M.S. in Engineering Management, M.S. in Genetic Counseling, and M.S. in Nursing Science programs, regardless of the number of units taken.

A \$1,000 advance deposit on the Professional Degree Supplemental Tuition is required of all new M.B.A. students upon their acceptance of admission. This deposit is nonrefundable.

Service Charges (subject to change without notice)

Item	Charge
Changes in Class Enrollment after Announced Dates (each transaction)	\$3.00
Credit by Examination (each petition)	\$5.00
Late Payment of Tuition and Fees	\$50.00
Late Enrollment in Classes	\$50.00
Returned Check Collection	\$25.00
Student Parking Permits ¹	
- Zone Commuter, monthly	\$62.00
- Zone Commuter, Preferred, Monthly	\$81.00
- Resident, monthly	\$93.00

In addition, students may be assessed a course materials fee. Consult the online *Schedule of Classes* for courses requiring the fee and the fee level.

- ¹ In accordance with Regents policy, UC parking systems are self-supporting auxiliary enterprises receiving no State appropriations. See <http://www.parking.uci.edu/> for fee levels of other types of parking permits. Prices shown are for 2012–13 and are subject to change for 2013–14.

Miscellaneous Fees (subject to change without notice)

Item	Fee
Application Fee ^{1,2}	
-Domestic Undergraduate	\$70.00
- International Undergraduate	\$80.00
- Domestic Graduate ³	\$80.00
- International Graduate ³	\$100.00
- Secondary Application Fee (Medical)	\$80.00
Application Fee for Readmission ¹	
- Domestic Undergraduate	\$70.00
- International Undergraduate	\$70.00
- Domestic Graduate	\$80.00
- International Graduate	\$80.00
Advancement to Candidacy for Ph.D.	\$90.00
Duplicate Diploma	\$22.00
Duplicate Diploma, School of Medicine	\$125.00
Filing Fee (graduate programs; one-half Student Services Fee) ⁴	\$162.00
Graduate Special Library Borrowing Privileges (per year, nonrefundable, renewable) ⁵	\$50.00
Master's Thesis Electronic Submission Fee	\$55.00
M.B.A. Acceptance of Admissions Deposit ¹	\$1,000.00
Transcript of Record (per copy)	\$13.00
Undergraduate Acceptance of Admission Fee (applied toward Student Services Fee) ¹	\$100.00
Verification of Student Status (per copy)	\$13.00

¹ Nonrefundable in all cases.

² The fee entitles an applicant to apply to one UC campus. Applicants who are applying to more than one campus must pay the fee for each campus selected.

³ The Application Fee for The Paul Merage School of Business is \$150.

⁴ The Filing Fee is one half of the quarterly Student Services Fee; the fee level shown is for 2012–13 and is subject to change for 2013–14.

⁵ This fee entitles graduate students on Official Leave of Absence or Filing Fee Status to keep their library privileges.

Special Tuition and Fee Programs, Waivers, and Exemptions

PACE Plan

The PACE Installment Plan allows students to spread the quarterly costs of tuition and fee payment over a three-month period. A fee is charged for this privilege. Information about PACE is available from Campus Billing Services, 109 Aldrich Hall; telephone (949) 824-2455.

Reduced-Fee Part-Time Study Program

Part-time study for credit leading to an undergraduate or graduate degree is available in some academic units. To take advantage of reduced tuition and fees for part-time status, quarterly course enrollment is limited to 10 units or fewer for undergraduate students and to eight units or fewer for graduate students. Students enrolled in excess units after Friday of the third week of instruction are liable for full tuition and fees.

The same admissions standards that apply to full-time students apply to part-time students. Under University policy, academic deans (the Dean of the Division of Undergraduate Education, for Undecided/Undeclared students; the Dean of Graduate Studies, for graduate students) may approve Petitions for Part-Time Status *only* for reasons of occupation, family responsibilities, or health.

Undergraduate and graduate students on approved part-time status pay the full Student Services Fee and one-half of Tuition. Those part-time students who have been determined to be nonresidents of the State of California are assessed one-half the Nonresident Supplemental Tuition, in addition to the full Student Services Fee and one-half of Tuition. Part-time students pursuing a professional degree are assessed one-half the Professional Degree Supplemental Tuition, the full Student Services Fee, and one-half of Tuition.

Part-time status lapses at the end of each academic year; therefore, a student must reapply each year that part-time status is desired. See the Registrar's Web site at <http://www.reg.uci.edu> for more information.

Undergraduate petitions are available from academic counselors or the Registrar's Office; graduate students may obtain further information and petitions from the Graduate Division. All students are encouraged to consult with the Office of Financial Aid and Scholarships regarding minimum unit requirements.

Tuition and Fee Reduction for Staff and Academic Employees

Students who are career employees at UCI or the University of California, Irvine Medical Center are eligible for a two-thirds reduction of the Student Services Fee, Tuition, and campus-based fees. This applies for up to nine units or three regular session University courses per quarter, whichever is greater. For staff employees, additional information and the Employee Application for Reduced Fees is available from Human Resources. Academic employees should contact the Office of Academic Personnel.

Exemptions from Nonresident Supplemental Tuition

See the California Residence and Nonresident Supplemental Tuition section below for information about exemptions from Nonresident Supplemental Tuition.

Exemptions from Tuition and Fees

A student who is a child, spouse, or registered domestic partner of a resident law enforcement officer or fire fighter killed in active duty shall be exempted from nonresident supplemental tuition and mandatory system wide fees in accordance with Section 68120 of the Education Code of the State of California.

In accordance with Section 66025.3 of the Education Code of the State of California, a resident student may be exempted from mandatory system wide tuition and fees if:

1. the student is the child or dependent of a veteran of the United States military who has a service-connected disability or who has been killed in service;
2. the student is the dependent of a member of the California National Guard who, while in active service of the State, has acquired a service-connected disability or has been killed in service; or
3. the student is the surviving spouse (who has not remarried) or registered domestic partner (who has not married or registered as a domestic partner) of a member of the California National Guard who, while in active service of the State, has acquired a service-connected disability or has been killed in service.

A nonresident student who meets the requirements of Section 68130.5 of the Educational Code of the State of California regarding attendance and graduation from a California high school shall be exempt from paying nonresident supplemental tuition.

California Residence and Nonresident Supplemental Tuition

All students who have not lived in California with the intent to make California their permanent home for more than one calendar year prior to the residence determination date for each quarter or semester they propose to attend the University must pay Nonresident Supplemental Tuition. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Laws Governing Residence

The rules regarding residence classification for tuition purposes at the University of California are governed in accordance to the California Educational Code and the Standing Orders of the Regents of the University of California and are implemented through the University of California Residence Policy and Guidelines. UC's Residence Policy and Guidelines are available at <http://ucal.us/fSuZtr>.

Who Is a Resident?

Adult students (at least 18 years of age) may establish residence for tuition purposes in California if they are a U.S. citizen, a permanent resident or other immigrant, or a nonimmigrant who is not precluded from establishing a domicile in the U.S. This includes nonimmigrants who hold valid visas of the following types: A, E, H-1, H-4, I, K, L, O-1, O-3, R, T, U, or V.

To establish residence a student must, immediately prior to the residence determination date:

1. Be physically present in California for more than one calendar year, *and*

2. Must have come to California with the intent to make California the permanent home. For example, physical presence within the state of California solely for educational purposes does not constitute the establishment of California residence regardless of the length of stay.
3. Students under 24 years of age whose parents are not residents of California will be required to meet the Financial Independence requirement in order to be classified as a resident for tuition purposes.

Residence cannot be derived from a spouse.

Requirements for Financial Independence

The financial independence requirement will not be a factor in residence determination if the student meets one of the following criteria:

1. The student's parents upon whom the student is financially dependent, are residents of California.
2. At least 24 years of age by December 31 of the calendar year of the term for which resident classification is requested.
3. Veteran of the U.S. Armed Forces.
4. A ward of the court or both parents are deceased.
5. Has legal dependents other than a spouse or registered domestic partner.
6. A married or registered domestic partner student, a graduate student, or a professional student who was not claimed as an income tax deduction by parents or any other individual for the tax year immediately preceding the term for which resident classification is requested.
7. Financial independence is not a factor in residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time in the term for which resident classification is requested.
8. An unmarried undergraduate student, not claimed as an income tax deduction by parents or any other individual for the two tax years immediately preceding the term for which resident classification is requested, who can demonstrate self-sufficiency for those years.
9. Reached the age of majority in California while his/her parents were residents of this state *and* the California resident parents leave the state to establish a residence elsewhere *and* the student continues to reside in California after the parents' departure.

Establishing Intent to become a California Resident

Relevant indicia that contribute to the demonstration of a student's intent to make California the permanent home include, but are not limited to, the following: registering to vote and voting in California elections; designating a California permanent address on *all* records (i.e., school, employment, military); obtaining a California Driver License or California Identification Card; obtaining a California vehicle registration; paying California income taxes as a resident (including taxes on income earned outside California from the date California residence was established); maintaining a California residence in which personal belongings are kept; licensing for professional practice in California; and the *absence* of these indicia in places other than California during any period for which residence in California is asserted.

General Rules Applying to Minors

The residence of the parent with whom an unmarried minor (under the age of 18) lives is the residence of the unmarried minor. When the unmarried minor does not live with either parent, the residence of the unmarried minor is that of the parent with whom the unmarried minor last lived.

An unmarried minor may establish his or her own residence when both parents are deceased and a legal guardian has not been appointed unless the unmarried minor is a minor non-citizen who is precluded by the Immigration and Nationality Act from establishing domicile in the U.S.

The residence of an unmarried minor who has a parent living cannot be changed by the unmarried minor's own act, by the appointment of a legal guardian, or by the relinquishment of a parent's right of control.

Specific Rules Applying to Minors

1. **Parent of Minor Moves from California.** If the California resident parent(s) of an eligible minor moves from California, the minor will be entitled to resident classification as long as the minor enrolls full-time in a California public postsecondary institution within one calendar year of the parent's departure, and remains physically present in California. This classification will continue until the minor has attained the age of majority and has resided in California for the minimum time required to become a resident. The Financial Independence requirement does not apply to this situation.
2. **Self-Supporting Minor.** Minor students who are U.S. citizens or eligible non-citizens may be eligible for resident classification if documentation of physical presence, intent to be a California resident, and self-support through the student's own employment or credit is provided for the entire calendar year prior to the residence determination date.
3. **Two-Year Care and Control.** Minor students who are U.S. citizens or eligible non-citizens may be eligible for resident classification if they have lived with and been under the continuous care and control of an adult or series of adults other than a parent for not less than two calendar years. The adult or series of adults must have been responsible for care and control for the entire two-year period and must be California residents for 366 days prior to the residence determination date of the term for which resident classification is requested. Contact the Residence Officer for additional criteria necessary to qualify under this provision.

Exemptions from Nonresident Supplemental Tuition

Students for whom any of the following conditions apply may be eligible for an exemption from Nonresident Supplemental Tuition.

1. **Member of the Armed Forces, dependent spouse, registered domestic partner, or child.** A student on active duty as a member of the Armed Forces of the United States stationed in California, and their spouses or registered domestic partner, and dependent children. An undergraduate who is the natural or adopted child, stepchild, spouse, or registered domestic partner who is the dependent of a member of the U.S. Armed Forces, stationed in California on active duty, may be entitled to an exemption from the nonresident supplemental tuition. Graduate and professional school students are also entitled to this exemption under both state and federal regulations.

2. **Child, spouse, or registered domestic partner of a faculty member.** To the extent that university funds are available, a student who is the unmarried, dependent child under the age of 21 or the spouse or registered domestic partner of a University of California faculty member who is a member of the Academic Senate.
3. **University employee or dependent child, spouse, or registered domestic partner of a University employee.** A student who is a full-time University employee who is permanently assigned to work outside the State of California or the unmarried, dependent child or the spouse or registered domestic partner of a full-time employee of the University of California who is permanently assigned to work outside the State of California (i.e., Los Alamos National Laboratory).
4. **Child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee.** A student who is the child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee, who was a California resident and was killed in the course of law enforcement or fire suppression duties.
5. **Dependent child of a California resident.** A student who has not been an adult resident for more than one year and is the natural or adopted, dependent child of a California resident who has been a resident for more than one year immediately prior to the residence determination date. The student must also maintain full-time attendance in a California public postsecondary institution.
6. **Graduate of a California school operated by the Federal Bureau of Indian Affairs (B.I.A.).** A student who is a graduate of a California school operated by the B.I.A. (i.e., Sherman Indian High School) and who enrolls at the University of California.
7. **Employee of California public school district.** A student holding a valid credential authorizing service in California public schools and employed by a school district in a full-time certificate position.
8. **Student athlete in training at U.S. Olympic Training Center, Chula Vista.** An amateur student athlete in training at the U.S. Olympic Training Center in Chula Vista, until the student has resided in California the minimum time necessary to become a resident.
9. **Graduate of California high school.** A student who attended high school in California for three or more years (9th grade included), does not hold a valid nonimmigrant visa, and graduated from California high school (or attained the equivalent).
10. **Congressional Medal of Honor recipient.** An undergraduate student under age 27 who is the recipient of the Congressional Medal of Honor or a child of a recipient who at the time of his or her death was a California resident.
11. **Surviving dependents of 9/11 terrorist attacks.** Undergraduate students who are the surviving dependents of a California resident who was killed in the 9/11/01 terrorist attacks of the World Trade Center, the Pentagon Building, or the crash of United Airlines flight 93.

Temporary Absences

If a nonresident student is in the process of establishing a domicile in California and returns to his or her former home during noninstructional periods, the student's presence in California will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. *Students who are in the State of California solely for educational purposes will not be classified as residents for tuition purposes regardless of their length of stay in California.*

If a student who has been classified as a resident for tuition purposes leaves California temporarily, the absence could result in the loss of

California residence. The burden of proof is on the student to demonstrate through documentation that he or she (or the parents if the student is a minor) did nothing inconsistent with a claim of continuing California residence during a temporary absence. Steps that should be taken to retain California residence include, but are not limited to:

1. Continue to use a California address on all records (educational, employment, military, among others).
2. Continue to satisfy California tax obligations. A student claiming California residence is liable for payment of income taxes on his or her total income from the date he or she begins to establish residence in California, *including* income earned in another state or country.
3. Retain a California voter's registration and vote by absentee ballot.
4. Maintain a California Driver License, California Identification Card, and vehicle registration in California. If it is necessary to change the driver's license or vehicle registration, it *must* be changed back to California in the time prescribed by law.

Change in Resident Classification

Continuing students who are classified as nonresidents for tuition purposes, and who believe that they will be eligible for resident status for an upcoming quarter, must submit a Petition for Resident Classification to the University Registrar in order to have their residence status changed before they submit their tuition and fee payment for the applicable quarter. Students must initiate all changes of status before the submission deadline of the quarter for which they want to be reclassified. (Specific deadline dates are listed on the Registrar's Web site at <http://www.reg.uci.edu>.) Students are strongly encouraged to submit their petition at the earliest possible date in order to expedite the review process. As long as submission deadlines are met, students may be allowed a period of time no later than the end of the quarter to provide any additional documentation required for residence determination.

Incorrect Classification

Any student found to be incorrectly classified as a resident is subject to nonresident classification and to payment of all previously unpaid Nonresident Fees. If a student has concealed information or furnished false information, and was classified incorrectly as a result, the student is also subject to University discipline. Resident students who become nonresidents of California must immediately notify the UCI Residence Officer.

Inquiries and Appeals

Inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the:

University of California, Irvine
Residence Officer
Registrar's Office
215 Aldrich Hall
Irvine, CA 92697-4975
Telephone (949) 824-6129

or to the:

Residence Analyst
Office of the General Counsel
1111 Franklin Street, 8th Floor
Oakland, CA 94607-5200

No other University personnel are authorized to supply information relative to residence requirements for tuition fee purposes.

This summary is *not* a complete explanation of the law regarding residence classification. Additional information is available from the University Registrar. Changes may be made in the residence requirements between the publication of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the Residence Officer, may file an application to appeal in writing to the Office of the General Counsel within 30 days of notification of the Residence Officer's final decision.

Tuition and Fee Refunds

Student Tuition and Fee Refunds

Students who pay tuition and fees for a regular academic term and then decide to withdraw from the University must submit a Withdrawal form, complete with the signature of their academic dean. Undergraduate students must submit the form to the University Registrar; graduate students to the Graduate Division; medical students to the Curricular Affairs Office in the School of Medicine; law students to the Law School Registrar's Office. This form serves two purposes:

1. a refund of tuition and fees, if applicable; and
2. withdrawal from classes.

The effective date of withdrawal is used in determining the percentage of tuition and fees to be refunded. This date is normally the date that the student submits the form to the appropriate Dean for approval. It is presumed that no University services will be provided to the student after that date. Tuition and fees are refunded as follows.

Prior to and including the first day of instruction, tuition and fees are refunded in full, except for

1. a \$10 service charge for continuing and readmitted students, or the \$100 Acceptance of Admission Fee for new undergraduate students, or the applicable deposit fee for new health sciences and M.B.A. students, and
2. the Student Health Insurance Fee. (The Student Health Insurance Fee is refunded only if the Withdrawal form is submitted *prior to the first day of the quarter*.) Students should bear in mind that the "first day of the quarter" often is several days prior to the "first day of instruction." Refer to the Academic Calendar for exact dates.

A refund of the Medical Student Disability Insurance Fee (if applicable) may be requested.

After the first day of instruction, the tuition and fee refund is prorated as shown (with the exception of the Health Insurance Fee).

Standard Refund Schedule

Calendar days (beginning with the Refund first day of instruction)

1	100 percent
2-7	90 percent
8-18	50 percent
19-35	25 percent
over 35	no refund

New students receiving Federal Financial Aid follow the refund schedule outlined below.

Refund Schedule for New Students Receiving Federal Financial Aid

Calendar days (beginning with the Refund first day of instruction)

1	100 percent
2-7	90 percent
8-14	80 percent
15-21	70 percent
22-28	60 percent
29-35	50 percent
36-42	40 percent
over 42	no refund

Financial aid recipients should see the UCI Office of Financial Aid and Scholarships Student Withdrawal Policy, or consult their Web site at <http://www.ofas.uci.edu/content/PoliciesAndConditions.aspx>.

Claims for a refund of tuition and fees must be presented during the fiscal year (July 1 to June 30) in which the claim is applicable. Refund checks are issued by the Accounting Office approximately three weeks after the official notice of withdrawal is initiated.

Law students follow refund schedules set by the School of Law. Refer to the School of Law Web site at <http://www.law.uci.edu> for further information.

Housing Refunds

UCI Housing refund policies are included in the housing contracts.

Financial Aid

Lack of funds need not be a barrier to attending UCI; over 70 percent of UCI's enrolled students receive some form of financial aid. Students who demonstrate that they need financial assistance in order to attend may be eligible for scholarships, grants, loans, and/or work-study awards through the Office of Financial Aid and Scholarships. In addition to awarding aid on the basis of financial need, some scholarships are awarded on the basis of academic excellence. Information regarding the application process, deadlines, and financial aid programs for undergraduate, graduate, and medical students may be found online at <http://www.ofas.uci.edu/>.

Free Application for Federal Student Aid (FAFSA/Renewal Application and FAFSA on the Web). To obtain financial aid, new and continuing students must file the FAFSA or FAFSA on the Web (FOTW) and submit the necessary supporting documents each year. FAFSA on the Web is available at <http://www.fafsa.gov/>, and paper forms are available either by completing a PDF FAFSA at <http://www.fafsa.ed.gov/options.htm> or by calling (800) 4-FED-AID/(800) 433-3243. Renewal notifications are mailed to current financial aid recipients starting in mid-January. Students are encouraged to apply as early as possible after January 1. The priority deadline to file the FAFSA/FOTW for loans, work-study, and most grants is March 2. For priority consideration of these funds, all other supporting documentation must be submitted to the Office of Financial Aid and Scholarships by June 30 or the specified due date.

The University expects the student and the parent (or spouse) to contribute toward the educational costs to the extent possible. For

dependent students, an analysis of the FAFSA and supporting documents determines the amount a student and the student's parents can be expected to contribute toward the cost of the student's education. For independent students, the analysis determines the amount a student and, if applicable, a spouse, can contribute to the cost of the student's education. Income, assets, size of family, and the number of family members in college (excluding parents) are the major factors considered in the analysis. Assets include, but are not limited to, equity in real estate other than family residence; stocks, bonds, and other securities; business equity; and cash, savings, and checking accounts. Income includes wages, salaries, interest, dividends, and nontaxable income such as Social Security, Veterans' benefits, and foreign income.

All undergraduate financial aid applicants are required to apply for a Pell Grant, and eligible California residents are required to apply for a Cal Grant. The application deadline for Cal Grants is March 2 for the following academic year.

Special Expenditures. Financial aid recipients who are in need of money for special expenditures (beyond the cost of books and basic supplies associated with certain courses of study) may make an appointment to see a financial aid counselor to explore the possibility of a budget extension, based on the availability of funds. Examples of such special expenditures include special equipment for students with disabilities and computer purchases.

Eligibility Requirements for Federal Student Aid

Federal financial aid programs are subject to regulations that define the criteria students must meet to qualify and maintain eligibility for those programs. The regulations state that a student must:

1. be a U.S. citizen or an eligible noncitizen of the U.S.;
2. be accepted for admission to the University;
3. be enrolled in good standing at the University; units taken through the University Extension program are not counted toward half- or full-time enrollment;
4. demonstrate financial need (except for William D. Ford Federal Direct Unsubsidized Loans and Federal PLUS loans); financial need is the difference between the reasonable, approved expenses of attending UCI and all available resources, including the expected contribution from parents, the student, and any outside aid;
5. maintain satisfactory academic progress for financial aid, as outlined below;
6. be registered with the Selective Service if the student is a male at least 18 years old, born after December 31, 1960, and not on active duty with the armed forces;
7. not owe a refund on a federal grant or be in default on a federal educational loan.

Once a student meets the above criteria, disbursement of financial aid funds is made only if the student does not have outstanding debts owed to UCI.

California Dream Application. Students who qualify for the AB 540 fee exemption and are not able to file a FAFSA, can apply for certain types of financial aid by completing the California Dream Application.

The California Dream Acts—AB 130 and AB 131—extend eligibility for privately funded UC scholarships, other UC scholarships and grants (beginning in January 2013), and Cal Grants (beginning in Fall 2013) to students, including undocumented students, who qualify for benefits under

another California law—AB 540—which exempts students from paying nonresident supplemental tuition.

Students who think they might be eligible for an AB 540 nonresident tuition exemption should:

1. Submit a California Dream Application as soon as possible after it becomes available on January 1, but no later than March 2. The application is available from <http://www.caldreamact.org/>.
2. Students who are admitted to the University and intend to enroll should submit a Statement of Legal Residence. Those who receive a nonresident classification from the campus residence deputy should submit a California Nonresident Tuition Exemption Request or a University of California Nonresident Tuition Exemption Application and Affidavit, available at the University Registrar's Office or Web site. Official high school transcripts and proof of high school graduation may be requested.

Once applicants have completed these steps, the University will notify them of any financial aid eligibility.

UCI Policies on Satisfactory Academic Progress for Financial Aid

Undergraduate and Graduate Students

In defining student eligibility for financial aid, the Higher Education Act Amendments state that a student must maintain "satisfactory progress in the course of study the student is pursuing, according to the standards and practices of the institution at which the student is in attendance." Federal regulations state that each institution shall establish, publish, and apply "reasonable standards" for assuring that every student receiving need-based financial aid should maintain "satisfactory progress in his/her course of study." Final Federal regulations state that "in order to receive student financial aid under the programs authorized by Title IV of the Higher Education Act, a student must be maintaining satisfactory progress in the course of study he or she is pursuing according to the standards and practices of the institution in which he or she is enrolled."

The following disclosures on the UCI Web site provide detailed information about satisfactory academic progress requirements for receiving financial aid at UCI. The Office of Financial Aid and Scholarships will provide a paper copy of this information upon request.

Undergraduate and Teaching Credential Students:

UCI Office of Financial Aid and Scholarships Student Withdrawal Policy

Students who withdraw from UCI prior to completing 60 percent of the period for which they received federal financial aid will be subject to

both the UC Fee Refund Policy and the Federal Return of Title IV Funds policy. Title IV Funds are federal funds awarded to a student to meet educational expenses. Examples of Title IV Funds include Pell Grants, Federal Supplemental Educational Opportunity Grants (SEOG), Federal Direct Loans, and Federal Perkins Loans.

Cancellation of Enrollment. Students who cancel their registration or have their registration cancelled by the University prior to the first day of classes will be invoiced for all financial aid disbursed on their behalf.

The full text of this official policy is available on the Office of Financial Aid and Scholarships Web site at <http://www.ofas.uci.edu/content/PoliciesAndConditions.aspx>.

Any student contemplating withdrawing from the University should contact the Office of Financial Aid and Scholarships to speak with a financial aid counselor concerning the financial ramifications of withdrawing.

Students who are receiving a Cal Grant should also contact the Office of Financial Aid and Scholarships to discuss the ramifications of withdrawing on their Cal Grant status. Students should check with their financial aid counselor on how they may be able to re-establish a quarter of eligibility for their Cal Grant.

Scholarships

Scholarships are awarded on the basis of academic ability, achievement, and promise. They do not require repayment. Although a few honorary scholarships are awarded on the basis of academic excellence alone, many also require that an applicant demonstrate financial need. UCI offers students with proven high academic achievement and leadership potential two top honors awards: Regents' Scholarships and Alumni Association Scholarships.

Entering Freshman and Transfer Students

Students entering UCI in the fall must complete the *UC Application for Undergraduate Admission and Scholarships* and submit the application by November 30. The Office of Financial Aid and Scholarships automatically collects information about applicants' scholarship qualifications. Applications that meet the requirements are reviewed by the Board on Undergraduate Scholarships, Honors, and Financial Aid. Information about the Alumni Scholarship is available in the *UC Application for Undergraduate Admission and Scholarships*. However, a separate application is required for the Alumni Scholarship.

Regents' Scholarships

Regents' scholarships, among the highest honors conferred upon UC students, are awarded on the basis of academic excellence and exceptional promise. Undergraduate students are eligible upon graduation from high school or transfer from community college. Medical students are eligible upon admission to the School of Medicine. The scholarship may be renewed for an additional one or three years depending on the year of appointment, provided the student completes an average of 12 units per quarter and maintains a grade point average of at least 3.25. The amount of the scholarship may vary depending on the student's established financial need.

Restrictive Scholarships

Eligibility requirements for Restrictive Scholarships vary greatly and are restricted in terms of such student characteristics as geographic location, family background, academic major, and career goals. For the most part, these scholarship awards are based on the student's established financial

need. All UCI students will be considered for Restrictive Scholarships based upon information from the *UC Application for Undergraduate Admission and Scholarships* and their current academic records.

Grants

Grants are awarded on the basis of financial need. There is no repayment requirement. A student's financial aid award includes grant funds whenever regulations, UCI policies, and funding levels permit.

Federal Pell Grant is the largest federally funded grant program and provided up to a maximum of \$5,550 for the 2012–13 academic year. To be eligible, applicants must be U.S. citizens or eligible noncitizens, be enrolled as undergraduates, have not previously received a bachelor's degree, and demonstrate financial need. Students must use the FAFSA to apply for this grant. Students must be enrolled full-time (12 units) to receive the full grant and enrolled at least half-time (6 or more units) to receive a prorated amount. The amount of Pell Grant funds students may receive over their lifetime is limited to the equivalent of six years of Pell Grant funding.

Cal Grant A is a state-funded scholarship program which currently provides awards to be applied to the payment of University tuition and fees. In 2013–14, Cal Grant A awards pay up to \$12,192. To be eligible, applicants must be California residents and demonstrate financial need. Students must use the FAFSA and GPA Verification Form to apply for Cal Grant A. The filing deadline for new applicants is March 2 for the following year.

Cal Grant B is a state-funded grant program which provides awards up to a maximum of \$1,473 in 2013–14 during the student's first year and \$1,473 plus \$12,192 toward tuition and fees during subsequent years. To be eligible, applicants must be California residents, demonstrate financial need, and be entering college or not have completed more than one quarter of college work. Students must use the FAFSA and GPA Verification Form to apply for Cal Grant B. The filing deadline for new applicants is March 2 for the following year. *NOTE: Students may not receive both Cal Grant A and Cal Grant B.*

Federal Supplemental Educational Opportunity Grant (FSEOG) provides grant aid for U.S. citizens and eligible noncitizens who are undergraduate students and have demonstrated financial need. These federal grants range from \$100 to \$4,000 per year, depending upon financial need.

UCI Grant is funded by The Regents of the University of California and by the State of California and provides grant aid for full-time students who demonstrate financial need. The amount awarded depends upon financial need and funding levels.

Loans

Loans are often part of a financial aid award. They provide recipients with an opportunity to defer the cost of their education by borrowing when needed and paying later. However, loan recipients must pay interest on the amount borrowed. The deferment and cancellation provisions for the loans listed below are contained on the promissory note each recipient must sign and also may be obtained from the Office of Financial Aid and Scholarships.

A student's loan responsibility, prior to acceptance of the loan, is to understand the terms of the loan. After accepting the loan, the recipient must repay the loan in accordance with the repayment schedule, advise the Office of Financial Aid and Scholarships upon leaving UCI; participate

in an exit interview; and provide the Financial Services Office with a current address after leaving UCI. In case of death or total disability, outstanding loan obligations may be cancelled upon presentation of official confirming documents.

Federal Perkins Loan provides long-term federal loans for U.S. citizens and eligible noncitizens. The amounts awarded vary, depending on financial need, but cannot exceed \$5,500 annually for undergraduates and \$8,000 annually for graduate students. Cumulative totals for the full term of college attendance may not exceed \$27,500 as an undergraduate and \$60,000 as a graduate student. No interest is charged nor is repayment required while the borrower is enrolled in at least one half of the normal academic load. Interest of five percent a year begins nine months after the borrower ceases to be enrolled or is enrolled less than half-time, and repayment must be completed within a 10-year period.

University Loan, funded by The Regents of the University of California, provides long-term loans to full-time students who demonstrate financial need. The maximum amount for an academic year is \$3,000. Interest of five percent a year begins six months after the student ceases to be enrolled at least half-time, and repayment must be completed within ten years. Two cosigners are required.

William D. Ford Direct Loan Program

Subsidized William D. Ford Federal Direct Loan, processed through the U.S. Department of Education and UCI, is available to undergraduate and teaching credential students who are U.S. citizens or eligible noncitizens, and who demonstrate financial need. During an academic year, the maximum a student may borrow is \$3,500, freshmen; \$4,500, sophomores; \$5,500, juniors, seniors, and teaching credential students. Both a guarantee and origination fee will be deducted from the amount of the loan prior to issuing the check.

Interest rate: If a student receives a loan that is first disbursed between July 1, 2012, and July 1, 2014, the student will be responsible for paying any interest that accrues during the grace period. If a student chooses not to pay the interest that accrues during the grace period, the interest will be added to the principal balance.

If a student received a loan prior to July 1, 2012, the federal government pays the interest during the deferment period.

See <http://studentaid.ed.gov/types/loans/interest-rates> for current as well as historic loan rates and fees.

Unsubsidized Federal Direct Loans have the same terms and conditions as the Federal Direct Loan, including the aggregate loan limits, interest rate, and repayment. During an academic year the maximum a dependent student may borrow is \$5,500, freshmen; \$6,500, sophomores; \$7,500, juniors and seniors. Independent students may borrow an annual maximum of: \$9,500, freshmen; \$10,500, sophomores; \$12,500, juniors and seniors; \$20,500, graduate/professional; and \$32,000, medical students. These maximum amounts include any amount borrowed under the Subsidized William D. Ford Federal Direct Loan program. However, the loan is not based on need. Students may borrow an amount equal to the cost of attendance, less any estimated financial assistance up to the annual loan limits in effect at the time the loan is disbursed. Students must first apply for the Federal Direct Loan prior to consideration for the Unsubsidized Federal Direct Loan. There is no interest subsidy for this loan; students pay the interest charged while enrolled at UCI. Students may receive both subsidized and unsubsidized Federal Direct loans but

the total may not exceed the loan limits. Borrowers with both types of loans may have a single repayment schedule.

Interest rate: See <http://studentaid.ed.gov/types/loans/interest-rates> for current as well as historic loan rates and fees.

Cumulative maximum: Dependent, undergraduate, \$23,000; independent, undergraduate, \$57,500; graduate and professional students, \$138,500 (includes undergraduate loans); medical students, \$224,000 (includes undergraduate loans). Deferment period before repayment: six months after ceasing to be enrolled at least half-time. Interest accrues immediately and may be paid monthly or quarterly. Students also may request that the lender add the interest to the principal balance. Repayment of principal begins six months after ceasing to be enrolled at least half-time. Full repayment: Up to 10 years. Minimum payment: \$50 per month.

Graduate PLUS Loans are available to graduate and professional-level students. Students may borrow up to the cost of education for the academic year, less any estimated financial aid. The loan is limited to students who do not have adverse credit histories as defined by regulation.

Interest rate: See <http://studentaid.ed.gov/types/loans/interest-rates> for current as well as historic loan rates and fees.

Federal Direct Parent Loans for Undergraduate Students (PLUS) are designed to assist parents of dependent undergraduate students who are unable to demonstrate financial need for campus-based funds. Parents are eligible to borrow up to the cost of education for the academic year, less any estimated financial aid each academic year, on a student's behalf. The loan is limited to parents who do not have adverse credit histories as defined by regulation.

Interest rate: See <http://studentaid.ed.gov/types/loans/interest-rates> for current as well as historic loan rates and fees.

Cumulative maximum: None. Deferment period before repayment: 60 days from day of final check disbursement for loan period. Full repayment: Up to 10 years.

Loans for Disadvantaged Students and Primary Care Loans are available to medical students. For information, call the School of Medicine Financial Aid Office at (949) 824-6476 or visit <http://www.ofas.uci.edu/content/medical.aspx>.

Emergency loans are made from an emergency student loan fund made possible through various philanthropic individuals and organizations. Undergraduate, graduate, and medical students who have experienced unanticipated financial problems of a temporary nature may borrow up to \$300 without interest or service charge. Emergency loans must be repaid within 30 days after disbursement or by the end of the academic quarter, whichever occurs first. Applications are available in the Office of Financial Aid and Scholarships or at the School of Medicine Financial Aid Office. This loan is not based on demonstrated financial need.

Federal Work-Study

The Federal Work-Study Program offers eligible students who demonstrate need an opportunity to pay for their living and educational expenses as they occur. By participating in the Federal Work-Study Program, students can reduce the amount of the loan to be repaid after leaving school. Medical students must obtain the approval of the Associate Dean of Student and Resident Affairs prior to obtaining work-study employment. Students awarded work-study have the choice of obtaining a work-study job either on campus or off campus at an approved nonprofit

agency. A variety of work opportunities are available, and such part-time work experience can be a valuable asset when seeking employment after graduation. Students eligible for work-study will be notified as such via their UCI Financial Aid award notification. Specific information regarding the terms and conditions of work-study employment will be available with the award notification.

Veterans Work-Study Program is available only to U.S. military veterans and their eligible dependents, and members of the Selected Reserve and National Guard, while receiving Veteran Affairs Federal Educational Benefits, such as Ch. 30, Post 9/11 GI Bill, or Ch. 35 benefits. Positions are limited. For applications and detailed information, call the Veteran Services Office at (949) 824-3500 or visit <http://www.veteran.uci.edu/>.

Additional Aid for Graduate and Medical Students

Most graduate fellowship programs are administered by the Graduate Division, 120 Aldrich Hall, telephone (949) 824-4611. Medical students should contact the School of Medicine Financial Aid Office, 836 Medical Education Building, telephone (949) 824-6476.

Aid for Students with Disabilities

All forms of student financial aid are available to eligible students with disabilities. Interested students should follow the regular financial aid application procedures and should notify the Office of Financial Aid and Scholarships of any additional expenses they may incur because of a disability. Supporting documentation must be provided.

Student Employment

The UCI Career Center, located in the Student Services I building, assists UCI students in obtaining part- or full-time employment during the academic year as well as summer. Financial aid recipients who have been awarded work-study also may obtain on-campus or off-campus job referrals in the Center. Students may easily access all job listings using their student ID number via ZotLink on the Career Center's Web site at <http://www.career.uci.edu/>.

Undergraduate Admissions

The UCI Office of Admissions and Relations with Schools (OARS) is responsible for the admission of new undergraduate freshmen and transfer students. Inquiries may be addressed to:

UCI Office of Admissions and Relations with Schools
260 Aldrich Hall
University of California
Irvine, CA 92697-1075
<http://www.admissions.uci.edu>

OARS is open from 8 a.m. to 5 p.m., Monday through Friday; telephone (949) 824-6703.

The information on admission to UCI presented below is organized as follows:

Categories of Application
Admission as a Freshman Applicant
Nonresident Freshman Admission Requirements
Admission as a Transfer Applicant
Admission of International Students
Advanced Placement and International Baccalaureate Credit

Application Procedures

Categories of Application

An **undergraduate** applicant is a student who wishes to complete a program of study leading to a Bachelor of Arts, Bachelor of Fine Arts, Bachelor of Music, or Bachelor of Science degree.

A **freshman** applicant is a student who is currently in high school or has graduated from high school but has not enrolled in a regular session at a college or university after high school graduation. Summer sessions immediately following graduation are excluded in the determination of freshman status.

The University considers a **transfer** applicant as a student who has completed high school and who has been a registered student in a regular session at another college or university. Students who meet this definition cannot disregard their college record and apply as freshmen. A student can be considered as a **California Community College transfer** applicant to UCI if:

1. the student was enrolled at one or more California Community Colleges for at least two terms (excluding summer sessions);
2. the last college the student attended before admission to a UC campus was a California Community College (excluding summer sessions); and
3. the student has completed at least 30 semester (45 quarter) UC transferable units at one or more California Community Colleges.

A **nonresident** applicant is a student whose legal permanent residence (as determined by the University) is outside of the State of California. Nonresident applicants are generally required to pay Nonresident Supplemental Tuition and must also present a higher grade point average than is required of California residents. Refer to the Nonresident Admission Requirements section for further information.

An applicant for **readmission** is a student who was formerly registered and enrolled at UCI and who has interrupted the completion of consecutive quarters of enrollment. See Readmission: Undergraduate and Graduate Students.

A **second baccalaureate** applicant is a college graduate who, because of a change of objective, wishes to obtain a second bachelor's degree in a major different from that of the first degree.

An **international** applicant is a student who holds or expects to hold a student, exchange, visitor, or diplomatic visa and who wishes to attend school in the United States.

Admission as a Freshman Applicant

The undergraduate admissions policy of the University of California is guided by the University's commitment to serve the people of California and throughout the world, from every culture and ethnicity and from across the economic spectrum.

The University's admission requirements described in detail in the Minimum Admission Requirements for Freshmen section, are designed to ensure that students are adequately prepared for University-level work. Meeting admission requirements entitles an applicant to be considered for admission but does not constitute an offer of admission.

In recent years, the number of freshman applicants to UC Irvine has exceeded the number of spaces available. Since the campus cannot admit all eligible applicants, it must use standards that are more demanding than

the minimum UC requirements to select students. These standards, which the University calls selection criteria, are used to identify applicants who have demonstrated the highest academic achievement and who have a variety of other qualities that can contribute to the strength and diversity of the campus community.

In the case that UCI is unable to accommodate all qualified applicants in their first-choice major, those students who indicate a valid alternate major may be offered admission in that major. Students who wish to change their major after enrolling at UCI must submit an Undergraduate Petition for Change of Major to the academic counseling office in the school or program of their prospective major.

Admissions Selection

UCI seeks to select students who have a demonstrated record of academic and personal achievement. Academic achievement includes the number of college preparatory courses completed; the level of achievement in these courses, including honors, Advanced Placement, International Baccalaureate, and college courses completed; and the quality of the senior-year program as measured by the type and number of academic courses in progress or planned. Also considered are the high school grade point average (GPA) calculated on UC-specified subjects (UCI uses a maximum of eight honors grade points in determining the UC GPA) and the required standardized national examinations.

The level of performance needed to gain admission varies from year to year depending on the size and the academic quality of the applicant pool and the number of enrollment spaces.

Personal achievement outside the classroom is also considered in UCI's selection process. A range of pursuits is considered, including academic activities, the creative and performing arts, community service and leadership, athletics, participation in pre-collegiate programs that develop academic ability, and other extracurricular activities. Persistence counts more than scattered involvement, while initiative and curiosity are also important.

The admissions process at UCI is also sensitive to individual circumstances and the effect these may have had on the resources available to and the experiences of applicants. While all applications receive careful consideration, reviewers take note of any extenuating circumstances and/or a variety of cultural and economic situations, including students who are the first in their families to attend college, who have a low family income, or who have worked in support of their family during high school. The emphasis, however, is less on the personal circumstances of the applicant and instead is more focused on how the applicant has responded to challenges while achieving academic success.

Each application is read at least twice. Every attempt is made to become familiar with the unique accomplishments of each applicant.

Students interested in the majors below should be aware of the following provisions.

Dance and Music:

Dance applicants must audition in late January/early February in ballet, modern, and jazz, prior to the fall quarter when entrance is anticipated, and be selected by faculty.

All Music applicants must apply to the B.A. degree program and audition in late January/early February with an instrument or voice, prior to the fall

quarter when entrance is anticipated; admission to the B.Mus. degree program is by a second audition later after matriculation.

Engineering: Applicants to any of the Engineering majors must complete four years of high school mathematics through pre-calculus or math analysis and are advised to have completed one year each of physics and chemistry. Applicants are strongly encouraged to take and submit the Math Level 2 SAT Subject Test.

Computer Science and Engineering (offered jointly by the Donald Bren School of Information and Computer Sciences and The Henry Samueli School of Engineering): Applicants must complete four years of high school mathematics through pre-calculus or math analysis and are advised to have completed one year each of chemistry and physics. One semester of programming course work is also advised. (This requirement does not apply to other majors offered by the Donald Bren School of Information and Computer Sciences.) That preparation along with honors courses and advanced placement courses, is fundamental to success in the program. The Henry Samueli School of Engineering recommends that freshman applicants in Engineering majors take the Math Level 2 SAT Subject Test.

Nursing Science: Admission to the Nursing Science major is limited and selective. Applicants must complete two years of basic science providing fundamental knowledge in the core disciplines of biology and chemistry. Advanced laboratory science classes that have biology or chemistry as prerequisites and offer substantial additional material may be used to fulfill this requirement. Students must earn grades of C or higher in order to fulfill their subject requirements. Students with the highest combination of overall grade point average, grade point average in science courses, and scores on the SAT or ACT examinations will be given priority. Applicants to the Nursing Science major must submit a supplemental application.

Minimum Admission Requirements for Freshmen

The University defines a freshman applicant as a student who is currently in high school or has graduated from high school but has not enrolled in a regular session at a college or university after high school graduation. Summer sessions are excluded in the determination.

Freshman applicants who are not residents of California should refer to the Nonresident Admission Requirements section.

Applicants who do not meet the requirements for admission at the time of high school graduation may be considered for admission after they meet the requirements for admission as a transfer applicant (see Admission as a Transfer Applicant). Transfer credit will be granted for an acceptable course from an accredited college or university taken while still in high school if reported on a valid transcript issued by the college which conducted the course.

The requirements described below represent the minimum academic standards students must attain to be considered for admission to the University. Meeting minimum admission requirements does not guarantee admission. Admission to UCI and the program of choice often requires students to meet more demanding standards.

Subject Requirement

To satisfy the subject requirement, students must complete a minimum of 15 yearlong UC-approved college-preparatory courses with at least 11 finished prior to their senior year. These courses are also known as the “a–g” subjects/courses. (A one-year course is equal to one unit; a one-semester course is equal to one-half unit.) A grade point average (GPA) of

3.0 or better must be earned (3.4 if the student is a nonresident) in these courses with no grade lower than a C.

The 15 required “a–g” courses are:

a. History/Social Science: 2 years required. Two years of history/social science, including one year of world history, cultures, and geography (may be a single yearlong course or two one-semester courses); and one year of U.S. history or one-half year of U.S. history and one-half year of civics or American government.

b. English: 4 years required. Four years of college-preparatory English that include frequent writing, from brainstorming to final paper, as well as reading of classic and modern literature. No more than one year of ESL-type courses can be used to meet this requirement.

c. Mathematics: 3 years required; 4 years recommended. Three years of college-preparatory mathematics that include the topics covered in elementary and advanced algebra and two- and three-dimensional geometry. Approved integrated math courses may be used to fulfill part or all of this requirement, as may math courses taken in the seventh and eighth grades if the high school accepts them as equivalent to its own courses.

d. Laboratory Science: 2 years required; 3 years recommended. Two years of laboratory science providing fundamental knowledge in at least two of these three foundational subjects: biology, chemistry, and physics. The final two years of an approved three-year integrated science program that provides rigorous coverage of at least two of the three foundational subjects may be used to fulfill this requirement.

e. Language Other Than English: 2 years required; 3 recommended. Two years or equivalent to the second level of high school instruction of the same language other than English are required. (Three years/third level of high school instruction recommended). Courses should emphasize speaking and understanding, and include instruction in grammar, vocabulary, reading, composition and culture. American Sign Language and classical languages, such as Latin and Greek, are acceptable. Courses taken in the seventh and eighth grades may be used to fulfill part or all of this requirement if the high school accepts them as equivalent to its own courses. (Students are strongly encouraged to complete three or four years of one language in preparation for the UCI Language Other Than English and/or the International/Global Issues general education requirements.)

f. Visual and Performing Arts (VPA): 1 year required. One yearlong course of visual and performing arts chosen from the following: dance, drama/theatre, music, or visual art.

g. College Preparatory Elective: 1 year required. One year (two semesters), in addition to those required in “a–f” above, chosen from the following areas: visual and performing arts (non-introductory-level courses), history, social science, English, advanced mathematics, laboratory science, and language other than English (a third year in the language used for the “e” requirement or two years of another language).

Courses Satisfying the “g” Requirement

History: All history courses should require extensive reading and writing. Courses should enable students to establish a breadth of understanding of history (for example, world history, political history, or economic history) and should provide an understanding of the human past, including its relation to the present. Courses should develop a student’s critical

thinking, ability to evaluate historical data, and ability to analyze and synthesize evidence.

Social Science: Courses should be in one of the social sciences: anthropology, economics, geography, political science, psychology, or sociology, or, alternatively, courses should be interdisciplinary, drawing knowledge from two or more of these fields. Course objectives should include as many of the following as are applicable to the field: (1) to understand the development and basic features of major societies and cultures; (2) to examine the historic and contemporary ideas that have shaped the world; (3) to understand the fundamentals of how differing political and economic systems function; (4) to examine the nature and principles of individual and group behavior; and (5) to study social science methodologies.

In order to develop a student's critical thinking, ability to evaluate ideas and information, and ability to analyze and synthesize qualitative and quantitative evidence in the laboratory and in the field, a social science course must include a body of basic knowledge, extensive reading, and written and oral exposition.

Courses which are designed to meet state-mandated social studies graduation requirements are acceptable provided that they meet the above criteria. Courses of an applied, service, or vocational character are not acceptable social science electives.

English: All English courses should require substantial reading with frequent and extensive practice in writing which is carefully evaluated and criticized. A course in creative writing, journalism, speech, or debate is acceptable if it meets the general requirements in reading and writing stated above. An advanced-level course in English as a Second Language (ESL) or English Language Development (ELD) may be acceptable provided it meets the standards outlined under the "b" requirement.

Advanced Mathematics: Acceptable electives are courses in mathematics with second-year algebra as a prerequisite such as trigonometry, linear algebra, precalculus (analytic geometry and mathematical analysis), calculus, and probability and statistics.

A computer science course is an acceptable mathematics elective if it fulfills the following objectives. The course should enable each student to express algorithms in a standard computer language such as C++, Pascal, Java, BASIC, FORTRAN, or COBOL. By the end of the course, each student should complete substantial programming projects in the language used. The course should also involve the study and mastery of various aspects of computer science: how computers deal with data and instructions, the internal components of a computer, and the underlying computer logic.

Laboratory Science: Acceptable courses should cover topics from the biological or physical sciences in which students make their own observations and measurements and analyze these data to obtain further information.

An introductory science course normally offered in the ninth grade, (such as earth science or physical science) is an acceptable science elective provided it is designed to prepare students for laboratory science courses in the tenth grade and beyond. The course must provide an introduction to the fundamental principles of physical and/or biological science. Laboratory activities as defined above shall be included. (A terminal course designed only to meet graduation requirements is not an acceptable science elective.)

Language Other Than English: It is recommended that elective courses be in the same language used to satisfy the language other than English "e" subject requirement. Elective courses in this language must have at least two years of the language as a prerequisite. In order for a second language to qualify as an elective, at least two years of this language must be completed.

Visual and Performing Arts: Courses in this area consist of instruction in dance, drama/theater, music, and visual arts. Courses should enable students to understand and appreciate artistic expression and, where appropriate, to talk and write with discrimination about the artistic material studied.

Courses devoted to artistic performance and developing creative artistic ability should have prerequisites (either one year of introductory course work or experience approved by the instructor) and should assume proficiency beyond the introductory level.

Courses must require on average the equivalent of a five-period class per week. Work outside of class must be required; for example, portfolio/performance preparation, reading, writing, research projects, and/or critical listening/viewing.

Dance courses offered for physical education credit or under any other departmental arrangement are acceptable provided they include content satisfying the above criteria.

Courses which are primarily athletic or body conditioning are not acceptable visual and performing arts electives.

College Preparatory Elective: The general objectives of the "g" requirement are to improve students' analytical abilities, promote artistic development, and strengthen oral and written skills. The requirement is intended to encourage prospective University students to fill out their high school programs with courses that: (1) strengthen general study skills, particularly analytical reading, expository writing, and oral communication; (2) provide an opportunity to begin work that could lead directly into a major program of study at the University; (3) experience, at some depth, new areas of academic disciplines that might form the basis for future major or minor studies at the University.

Courses that fulfill the "g" requirement should allow students to prepare for college-level work in the subject area, so that the level attained at the end of such courses would be well beyond the introductory or survey level. Courses that have narrow objectives aimed at meeting specific societal or personal lifestyle goals are not acceptable.

California High School Students. Courses taken to fulfill the subject requirement must be certified by the University as meeting the requirement and must be included on the UC-certified course list of the school the student attended. The high school counselor or principal will have a copy of this list. In addition, the lists are available online at <http://www.ucop.edu/doorways>.

Out-of-State High School Students. The UCI Office of Admissions and Relations with Schools will review and accept courses that meet the requirements for applicants graduating from out-of-state schools.

Examination Requirement

All freshman applicants must submit examination scores as described below. *Students applying for admission for fall quarter should complete their examination requirements during May or June of their junior year or during their senior year, but no later than the December test date. (Typically, this means that students will take either the SAT Reasoning*

Test or the ACT Plus Writing Test in October or November.) Scores earned prior to March 2005 will not be accepted. All students applying for freshman admission must submit the following college admissions test scores:

- The SAT Reasoning Test or the ACT Plus Writing.
- Report ACT and/or SAT scores on the admission application, then request that an official copy of the scores be sent to UC Irvine from the testing agency. Applicants can have their official score report sent to one UC campus, and all campuses they apply to will receive it.
- In the College Board's Score Choice module, ensure that all scores are sent to UC. UC requires all scores and will use the highest scores from a single administration.
- For the ACT Plus Writing test, UC will focus on the highest combined score from the same test administration.
- For the SAT Reasoning Test, UC will focus on the highest total score from a single test date.
- UC does not require results of tests taken for the purpose of talent programs in middle or junior high school (e.g., Johns Hopkins Center for Talented Youth, the Duke University Talent Identification Program, etc.). Those test scores do not have to be sent to UC.
- UC does not accept test substitutions.
- SAT Subject Test scores are no longer required. However, submission of SAT Subject Test scores may add positively to the review of a student's application.

More information about these examinations is available online. For the SAT Reasoning and Subject Tests, see <http://www.collegeboard.org>. For the ACT Plus Writing, see <http://www.actstudent.org>.

Do not use the score choice option to withhold reporting of SAT Subject Test scores. IMPORTANT: Please note the SAT Subject Test recommendations below.

- The Claire Trevor School of the Arts recommends that freshmen applicants take any SAT Subject Tests that will demonstrate the student's strengths.
- The Henry Samueli School of Engineering recommends that freshmen applicants in Engineering majors (including the joint Computer Science and Engineering major) take the SAT Subject Test in Math Level 2.
- The Department of Pharmaceutical Sciences recommends that freshmen applicants take the following SAT Subject Tests: Biology M, Chemistry, and/or Math Level 2.
- The School of Physical Sciences recommends that freshmen applicants in Chemistry, Earth System Science, Mathematics, and Physics majors take the SAT Subject Test in Math Level 2.
- The Program in Public Health recommends that freshmen applicants take the following SAT Subject Tests: for the major in Public Health Sciences: Biology E, Biology M, and/or Chemistry; for the major in Public Health Policy: Biology E, Biology M, and/or World History.

California Students

State residents who have met the minimum requirements and are not admitted to any UC campus to which they apply will be offered a spot at another campus if space is available, provided:

- The applicant ranks in the top 9 percent of California high school students, according to the UC admissions index (see <http://admission.universityofcalifornia.edu/freshman/california-residents/admissions-index/index.html>); or

- The applicant ranks in the top 9 percent of his or her graduating class at a participating high school. UC refers to this as "Eligible in the Local Context" (ELC).

Eligibility in the Local Context (ELC)

An applicant who ranks in the top 9 percent of students in his or her California high school class—and whose high school participates in the ELC program—can qualify for admission to UC.

The top 9 percent of students will be identified on the basis of GPA in UC-approved course work completed in the tenth and eleventh grades. To be considered for ELC, an applicant must have a minimum GPA of 3.0 and complete the following a–g courses prior to their senior year:

- History/Social Science: 1 year
- English: 2 years
- Mathematics: 2 years
- Laboratory Science: 1 year
- Language Other Than English: 1 year
- College Preparatory Elective: 4 yearlong courses (chosen from the subjects listed above or another course approved by the University)

Eligibility By Examination Alone

Students are no longer guaranteed admission based solely on their examination scores. Nevertheless, students who excel in their examinations yet do not fulfill the admission requirements described in the Minimum Admission Requirements for Freshmen section will still receive a full review of their application. For more information, visit <http://www.universityofcalifornia.edu/admissions> and see Admission by Exam.

Nonresident Freshman Admission Requirements

Nonresident freshman applicants must meet the same admission requirements as those for residents, *except*, nonresident applicants must have a 3.4 GPA and do not qualify for ELC. Refer to the Expenses, Tuition, and Fees (p. 28) section of this *Catalogue* for information regarding residence classification for tuition purposes and the Nonresident Supplemental Tuition.

Admission of International Students

See the Admission of International Students section of this *Catalogue* for information regarding English proficiency and other details.

Admission as a Transfer Applicant

The University defines a transfer applicant as a student who has completed high school and who enrolled in a regular session at a college or university after high school. (Summer sessions do not count.) UCI considers a California Community College transfer applicant as a student who has completed at least 30 semester units/45 quarter UC-transferable units at one or more California Community Colleges (see full definition above). A competitive UCI transfer applicant should have a UC transferable GPA of 3.0 or above. A transfer applicant may not disregard the college record and apply for admission as a freshman. (Transfer applicants who are not residents of California should also refer to the section on Nonresident Admission Requirements.)

Transfer Admission Guarantee: UCI's Transfer Admission Guarantee (TAG) program offers provisional admission to well-qualified junior-level students from participating California Community Colleges. Although

admission to UCI is selective in most majors, through TAG, admission can be guaranteed for transfer students who meet the TAG Eligibility and major prerequisites requirements (see TAG Selection Guidelines later in this section).

Selection Criteria

UCI attempts to accommodate as many qualified transfer applicants as possible. Priority consideration for admission of transfer applicants is given to junior-level applicants (with a minimum of 60 semester/90 quarter units of UC-transferable credit) from California Community Colleges and is based upon:

1. GPA in transferable courses;
2. depth of preparation toward general education and major requirements; and
3. participation in the TAG (Transfer Admission Guarantee) program, which requires early completion of one transferable English composition course, and one transferable course in mathematical concepts and quantitative reasoning.

TAG Applicants for fall quarter 2014 admission must have completed the first English and one mathematics course by the end of summer 2013. The second English course must be completed by spring 2014. Transfer applicants with the strongest academic performance will be the most competitive for admission. Junior transfers from four-year colleges, including other UC campuses, and lower-division transfers will be considered as space permits.

In the case that UCI is unable to accommodate all qualified applicants in their first-choice major, those students who indicate a valid alternate major may be offered admission in that major. Students who wish to change their major after enrolling at UCI must submit an Undergraduate Petition for Change of Major to the academic counseling office in the school or program of their prospective major. This is of particular importance to those who apply in majors which are subject to additional course prerequisites and/or have a limit placed on the number of applicants admitted into the major. (See the following list.)

A secondary criterion in UCI's transfer selection process is based upon consideration of the academic criteria in conjunction with the following personal achievement criteria: an exceptionally challenging curriculum; outstanding accomplishments relevant to academic aims; hardships or unusual circumstances the applicant has faced, and the ways in which the student has responded to these challenges; a strong, thoughtful match between UCI's programs and the student's academic and career objectives, preparation, talents, and skills; and potential contributions to the campus. The level of performance needed to gain admission varies from year to year depending on the size and the academic quality of the applicant pool and the number of enrollment spaces.

Transfer applicants to the majors listed below must complete prerequisite courses for the major as specified.

Biological Sciences: Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Biological Sciences major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

Biology/Education: Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Biology/Education major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

Business Administration: Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0) and who satisfactorily complete lower-division courses equivalent to UCI's MATH 2A - MATH 2B, ECON 20A - ECON 20B, MGMT 7, MGMT 30A, and MGMT 30B will be given preference for admission. MGMT 1 may be completed at UCI. Admission to the major will be competitive due to limited space availability.

Business Information Management: Junior-level applicants who satisfactorily complete the following requirements will be given preference for admission:

1. one year of approved college-level math, preferably courses in calculus equivalent to UCI's MATH 2A - MATH 2B ; if not available, two semester courses equivalent to other major-related math courses are acceptable;
2. one year of transferable computer science courses¹ with at least one course involving concepts such as those found in Java, Python, Scheme, C++, or other object-oriented or high-level programming language;
3. one year of introductory accounting theory and practice equivalent to UCI's MGMT 30A - MGMT 30B; and
4. one year of micro- and macro-economics theory equivalent to UCI's ECON 20A - ECON 20B.

¹ Additional computer science courses beyond the two required are strongly recommended, particularly those that align with the major(s) of interest. Java is used extensively in the curriculum; therefore, transfer students should plan to learn it by studying on their own or by completing a Java-related programming course prior to their first quarter at UCI.

Additional courses beyond those required for admission must be taken to fulfill the lower-division degree requirements, as many are prerequisites for upper-division courses. For some transfer students, this may mean that it will take longer than two years to complete their degree.

The Business Information Management major is offered jointly by the Donald Bren School of Information and Computer Sciences and The Paul Merage School of Business. More information is available at <http://www.ics.uci.edu/ugrad> or at the Bren School of ICS Student Affairs Office; telephone (949) 824-5156; e-mail: ucounsel@uci.edu.

Chemistry: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one-year of general chemistry with laboratory and one year of approved calculus. Completion of one year of organic chemistry is strongly recommended.

Computer Game Science: Junior-level applicants who satisfactorily complete the following course requirements will be given preference for admission:

1. one year of approved college-level math, preferably courses in calculus equivalent to UCI's MATH 2A - MATH 2B; if not available, two semester courses equivalent to other major-related math courses are acceptable; and
2. one year of transferable computer science courses¹ with at least one course involving concepts such as those found in Java, Python, Scheme, C++, or other object-oriented or high-level programming language.

Applicants to the Computer Game Science major should be aware that several lower-division courses must be taken at UCI; therefore, the minimum time to degree completion will exceed two years.

- ¹ Additional computer science courses beyond the two required are strongly recommended, particularly those that align with the major(s) of interest. Java and C++ are used in the curriculum; therefore, transfer students should plan to learn these languages by studying on their own or by completing related programming courses prior to their first quarter at UCI.

Computer Science and Engineering: Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer, including one year of approved calculus; one year of calculus-based physics with laboratories (mechanics, electricity and magnetism); one year of transferable computer science courses¹ involving concepts such as those found in Java, Python, Scheme, C++, or other object-oriented or high-level programming language; and one additional approved transferable course for the major (an approved math, science, or CSE course).

- ¹ Additional computer science courses beyond the two required are strongly recommended, particularly those that align with the major of interest. Java and C++ are used in the curriculum; therefore, transfer students should plan to learn these languages by studying on their own or by completing related programming courses prior to their first quarter at UCI.

Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact the Donald Bren School of Information and Computer Sciences at (949) 824-5156 or The Henry Samueli School of Engineering at (949) 824-4334.

Dance: Applicants must audition in late January/early February in ballet, modern, and jazz, prior to the fall quarter when entrance is anticipated, and be selected by faculty.

Earth System Science: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and one year of *either* general chemistry with laboratory (preferred) or one year of calculus-based physics with laboratory.

Ecology and Evolutionary Biology: Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Ecology and Evolutionary Biology major. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

Economics: Transfer applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the majors in Economics, Business Economics, and Quantitative Economics. All applicants must complete one course in microeconomics, one course in macroeconomics, and two quarters/two semesters of approved first-year calculus.

Engineering: Applicants must select either Aerospace Engineering, Biomedical Engineering, Biomedical Engineering: Premedical, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Materials Science Engineering, Mechanical Engineering, or Engineering Undeclared (option for freshmen only) as their major on the application. Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete the following required courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), additional courses as specified by the major, and completion of lower-division writing. Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. See The Henry Samueli School of Engineering section of this *Catalogue* for information on courses required for each major.

See also the listing for **Computer Science and Engineering**, a major jointly administered by The Henry Samueli School of Engineering and the Donald Bren School of Information and Computer Sciences.

Environmental Science: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of *either* general chemistry with laboratory (preferred) or one year of biology with laboratory. One year of economics or sociology is recommended.

Humanities: Junior-level transfers for all majors within the School of Humanities must have completed the UC Entry Level Writing Requirement, and two semester or two quarter courses of approved English composition with grades of C or better.

Information and Computer Sciences: Students are strongly encouraged to follow the transfer preparation guidelines for any of the other Bren ICS majors. Applicants must select either Business Information Management¹, Computer Game Science, Computer Science, Computer Science and Engineering², Informatics, or Software Engineering as their major on the application. Junior-level applicants who satisfactorily complete course prerequisites will be given preference for admission. Transfers to all majors (except for Informatics) must complete one year of approved college-level math, preferably courses in calculus equivalent to UCI's MATH 2A -MATH 2B; if not available, two semester courses equivalent to other major-related math courses are acceptable. Informatics majors must complete one college-level mathematics course. All applicants must complete one year of transferable computer science courses³ with at least one course involving concepts such as those found in Java, Python, Scheme, C++, or other object-oriented or high-level programming language. See the Donald Bren School of Information and Computer Sciences section of this *Catalogue* for information on preferred courses and specific requirements for transfer applicants to each major.

Additional courses beyond those required for admission must be taken to fulfill the lower-division degree requirements, as many are prerequisites for upper-division courses. For some transfer students, this may mean that it will take longer than two years to complete their degree.

- ¹ See also the listing for Business Information Management, a collaborative major between the Donald Bren School of ICS and The Paul Merage School of Business in the Interdisciplinary section of the *Catalogue*.
- ² Apply at the Interdisciplinary section of the UC application. See also the listing for Computer Science and Engineering, a major jointly administered by the Donald Bren School of ICS and The Henry Samueli School of Engineering in the Interdisciplinary section of the *Catalogue*.
- ³ Additional computer science courses beyond the requirement for transfer eligibility are strongly recommended, particularly those that align with the major(s) of interest. Java and C++ are used in the curriculum; therefore, transfer students should plan to learn these languages by studying on their own or by completing related programming courses prior to their first quarter at UCI.

Mathematics: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the required course work of one year of approved calculus. Additional course work in multivariable calculus, linear algebra, and differential equations is strongly recommended.

Music: All Music applicants must apply to the B.A. degree program and audition in late January/early February with an instrument or voice, prior to the fall quarter when entrance is anticipated; admission to the B.Mus. degree program is by a second audition later after matriculation.

Nursing Science: Admission to the major is limited and selective. Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the Nursing Science major. The following list of prerequisites is required for transfer students applying for fall 2014 entry. Students wishing to enter before fall 2014 should review the Nursing Science Web site at <http://www.nursing.uci.edu> for those specific requirements. All applicants must complete the following with grades of B or better: one year of general chemistry equivalent to UCI's CHEM 1A-CHEM 1B-CHEM 1C; one quarter/semester of organic chemistry equivalent to UCI's CHEM 51A; one quarter/semester of genetics equivalent to UCI's BIO SCI 97; one quarter/semester of biochemistry equivalent to UCI's BIO SCI 98; one quarter/semester of human physiology with laboratory equivalent to UCI's BIO SCI E109 and BIO SCI E12L; one quarter/semester of microbiology with laboratory equivalent to UCI's BIO SCI M122 and either BIO SCI M118L or BIO SCI M122L; one quarter/semester of human anatomy with laboratory equivalent to UCI's NUR SCI 100, NUR SCI 100L; one quarter/semester of philosophy equivalent to UCI's PHILOS 4 or PHILOS 5; one quarter/semester of psychology equivalent to UCI's PSYCH 7A/PSY BEH 9; one quarter/semester of public health equivalent to UCI's PUBHLTH 1; one quarter/semester of sociology equivalent to UCI's SOCIOL 1; and one quarter/semester of statistics equivalent to UCI's STATS 7 or STATS 8. Applicants must have a cumulative GPA of 3.0 or higher to be considered.

Pharmaceutical Sciences: All applicants must have completed the following required courses with a grade of B- or better in all courses: one year of general chemistry courses with laboratory courses equivalent to UCI's CHEM 1A-CHEM 1B-CHEM 1C and CHEM 1LC-CHEM 1LD and one year of biology courses equivalent to UCI's BIO SCI 93 and BIO SCI 94. In addition, all applicants must have a cumulative GPA of 3.0 or better. Additional courses that are recommended, but not required: one year of calculus; one year of calculus-based physics with laboratory; one year of organic chemistry with laboratory; and additional articulated lower-division biology requirements.

Physics: Preference will be given to junior-level applicants with the highest grades overall and who have satisfactorily completed the following required courses: one year of approved calculus and one year of calculus-based physics with laboratory for engineering and physics majors.

Psychology and Social Behavior: Transfer applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission to the major.

Public Health: Junior-level applicants with the highest grades overall and who satisfactorily complete lower-division requirements will be given preference for admission to the Public Health majors. All applicants to the B.S. degree in Public Health Sciences must have a minimum overall GPA of 3.0 and a minimum GPA of 3.0 in required courses, one year of general chemistry with laboratory, and one year of courses equivalent to UCI's BIO SCI 93 and BIO SCI 94. All applicants to the B.A. degree in Public Health Policy must have a minimum overall GPA of 3.0 and a minimum GPA of 3.0 in required courses, and complete one year of social science courses in any combination of the following topics: anthropology, economics, sociology, and/or psychology.

Transfer Student Admission Requirements

The University of California requirements for admission as a transfer applicant vary according to the high school record. Transfer applicants who have completed a California Certificate of Proficiency or the equivalent must also meet regular University entrance requirements.

Transfer applicants should also refer to the section on Information for Transfer Students: Fulfilling Requirements for a Bachelor's Degree (p. 78).

The transcript submitted from the last college attended must show, as a minimum, that the student was in good standing and had earned a GPA of 2.4 (2.8 for nonresidents) or better in all transferable course work.

A transfer applicant must also meet **one** of the following conditions:

1. If a student was eligible for admission to the University when the student graduated from high school—meaning that the student satisfied the Subject, Scholarship, and Examination Requirements or was identified by the University as eligible under the Eligibility in the Local Context (ELC) program and completed the Subject and Examination Requirements in the senior year—the student is eligible to transfer if he or she has a C (2.0) average in transferable college course work and has met the prerequisites for his or her major.
2. If a student met the Scholarship Requirement in high school but did not satisfy the Subject Requirement, the student must take transferable college courses in the missing subjects, earn a grade of C or better in each of these required courses, and earn an overall C (2.0) average in all transferable college course work to be eligible to transfer.
3. Students who were not eligible for admission to the University when they graduated from high school because they did not meet the Scholarship Requirement must:
 - A. Complete 60 semester (90 quarter) units of UC-transferable college credit with a grade point average of at least 2.4 (2.8 for nonresidents). No more than 14 semester (21 quarter) units may be taken Pass/Not Pass; **and**
 - B. Complete the following course pattern requirement, earning a grade of C or better in each course:
 - i Two UC-transferable college courses (3 semester or 4–5 quarter units each) in English composition; **and**

- ii One UC-transferable college course (3 semester or 4–5 quarter units) in mathematical concepts and quantitative reasoning; **and**
- iii Four UC-transferable college courses (3 semester or 4–5 quarter units each) chosen from at least two of the following subject areas: the arts and humanities, the social and behavioral sciences, and the physical and biological sciences.

Each course must be worth at least 3 semester units.

NOTE: For UCI, in fulfilling items i and ii, applicants for fall should complete the courses in English and mathematics no later than the spring term.

Transfer Admission Guarantee (TAG) Requirements

Highest admission priority is extended only to California Community College applicants who will have completed 60 UC-transferable semester (90 quarter) units by the end of the spring quarter prior to the fall enrollment. A TAG community college applicant is defined as a student:

1. who was enrolled at one or more California Community Colleges for a least two terms, excluding summer sessions;
2. for whom the last college attended before admission to a UC campus was a California Community College, excluding summer sessions; and
3. who has completed at least 30 semester (45 quarter) UC-transferable units at one or more California Community Colleges, excluding Advanced Placement (AP) and International Baccalaureate (IB) credit.

Students may be eligible for admission to UCI through TAG if they will have met **all four** of the following requirements:

1. completion of 60 UC-transferable semester (90 quarter) units by the end of the quarter prior to enrolling at UCI (units must be completed by spring 2014 for fall 2014) and attainment of at least the minimum GPA specified by the major. TAG details are available online at <http://www.admissions.uci.edu>;
2. completion of the minimum UC transfer eligibility requirements in English (two courses) and transferable mathematics (one course). The first mathematics and English courses must be completed at the time of the TAG submission. The second English course must be completed by **spring 2014 for fall 2014**;
3. completion of additional requirements for the student's prospective major (s) at UCI, *prior to* enrolling at UCI (major requirements to be completed by spring 2014 for fall 2014); and;
4. maintained UC eligibility.

NOTE: The majors in Biochemistry and Molecular Biology, Business Administration, Dance, Developmental and Cell Biology, Genetics, Microbiology and Immunology, Music, Neurobiology, Nursing Science, and Plant Biology will not participate in the TAG program for fall 2014. For the most current information, visit <http://www.admissions.uci.edu>.

Nonresident Transfer Admission Requirements

Nonresident transfer applicants must meet the same minimum admission requirements as those for residents, *except*, nonresidents must have a grade point average of 2.8 or higher in all transferable college course work. Refer to the Expenses, Tuition, and Fees (p. 28) section of this *Catalogue* for information regarding residence classification for tuition purposes and the Nonresident Supplemental Tuition.

Admission of International Students

See the Admission of International Students section below on this page for information regarding English proficiency and other details.

Admission for a Second Bachelor's Degree

A student whose educational objective has changed substantially after receiving the bachelor's degree may be considered for admission to a program for a second degree. Admission as a candidate for a second bachelor's degree requires that the applicant be fully eligible for admission to the University and have strong promise of academic success in the new major. All such admissions are subject to the approval of the dean or director of the UCI school or program in which the second degree will be earned.

Students who have *not* attended UCI as undergraduates during a regular academic quarter should complete the undergraduate application for admission and scholarships, available online at <http://www.universityofcalifornia.edu/apply>. Students who have attended UCI as undergraduates during a regular academic quarter should contact the Academic Advising Office of the major of interest to initiate the electronic Second Baccalaureate/Readmission Process. For more information, see <http://www.reg.uci.edu/enrollment/readmission.html>.

Admission of International Students

The credentials of an international undergraduate applicant—a student who holds or expects to hold a student, exchange, visitor, or diplomatic visa and who wishes to attend school in the United States—are evaluated in accordance with the general regulations governing admission. The application should be submitted online at <http://www.universityofcalifornia.edu/apply> early in the appropriate application filing period. This will allow time for exchange of necessary correspondence and, if the applicant is admitted, will help the student in obtaining the necessary passport visa. Official certificates and detailed transcripts of records should be submitted directly to the UCI Office of Admissions and Relations with Schools only when requested.

International applicants whose native language is not English will be required to demonstrate their English proficiency. This is most often accomplished by achieving a minimum score of 550 (paper-based) or 80 (Internet-based) on the Test of English as a Foreign Language (TOEFL), or with a 7 or better band score (academic modules) on the International English Language Testing System (IELTS) examination. Information about these exams is available at most U.S. consulates and overseas U.S. educational advising offices, as well as by mail and online:

TOEFL Services

P.O. Box 6151
Princeton, NJ 08541-6151, USA
Web: <http://www.toefl.org/>

IELTS International

Web: <http://www.ielts.org>

Students must ask the TOEFL Services or IELTS to forward results of their tests to the UCI Office of Admissions and Relations with Schools. These scores must be received no later than January for students applying for the fall term. Completion of two *acceptable* English composition courses (as determined by the Office of Admissions and Relations with Schools) with a grade of C or better will also clear the English proficiency requirement for international applicants.

Students who wish to improve their English proficiency to meet the TOEFL or IELTS requirement may enroll in the intensive Program in English as a Second Language sponsored by UC Irvine Extension. Information is available from:

International Programs
UC Irvine Extension
P.O. Box 6050
Irvine, CA 92616-6050
(949) 824-5991
E-mail: uciesl@uci.edu

In addition to achieving a minimum TOEFL or IELTS score, all international students whose native language is other than English must take an Academic English/English as a Second Language Placement Test upon arrival and prior to registration. Based upon the results of this test, students may be required to improve certain language skills by enrolling in Academic English/English as a Second Language courses during their first year, with other major course work being adjusted accordingly.

Generally, financial assistance and scholarships from the University are not available to the non-immigrant-visa student. International students must provide proof that sufficient funds will be available to meet their educational commitments while studying in the United States. International undergraduate students are considered as nonresidents of California and are required to pay Nonresident Supplemental Tuition in addition to fees paid by legal residents of California.

Please direct all inquiries regarding the undergraduate admission of international students to the Office of Admissions and Relations with Schools.

English Language Proficiency of Permanent Resident, Refugee, and International (F-1 Visa) Students: Academic English/English as a Second Language

Any student (1) whose first or native language is not English, (2) whose verbal scores on the Writing section of the SAT Reasoning Test fall below a set level, (3) who has not satisfied the UC Entry Level Writing requirement, and (4) who has received a letter from the AE/ESL Program requiring them to take the AE placement test, or any such student without a verbal SAT Reasoning Test score, must take the AE placement test prior to the first quarter of enrollment, regardless of the student's TOEFL (Test of English as a Foreign Language) score, IELTS (International English Language Testing System) score, or TSWE (Test of Standard Written English) score. Also, any student who is identified as an ESL student through the UC Analytical Writing Placement Examination must take the AE placement test. The test is given prior to the beginning of each quarter, during Welcome Week prior to the beginning of fall quarter instruction, and on dates to be announced. Information is available from the Academic

Testing Center, telephone (949) 824-6207, and the Academic English/English as a Second Language Program, telephone (949) 824-6781.

Based upon the results of the test, students may be required to enroll in AE/ESL courses prior to enrolling in any other required writing courses. Students required to enroll in AE/ESL courses must begin satisfying their AE/ESL requirements within their first or second quarter at UCI. They must take these courses in consecutive quarters. The AE/ESL requirements are to be completed within the first six quarters at UCI. Students who have not satisfied the AE/ESL requirements by the end of their sixth quarter will be ineligible to enroll for a seventh quarter at UCI. The UC Entry Level Writing requirement must be satisfied during the quarter following the completion of AE/ESL requirements. If the AE/ESL requirements are completed during the first quarter of enrollment, the UC Entry Level Writing requirement must be satisfied before the beginning of the fourth quarter of enrollment.

AE/ESL courses, offered by the School of Humanities and listed in the School's section of this *Catalogue*, include classes in writing, speaking and listening, and reading and vocabulary development.

Credit for AE/ESL Course Work

Students whose first language is not English may receive up to 12 baccalaureate credits for AE/ESL course work. Students may receive workload credit for courses taken beyond this 12-unit limit but will not receive additional credits applicable to the bachelor's degree.

Credit for Native Language

Students whose first language is not English may receive credit for course work in their native language and literature, provided such courses were completed at the college level in the country of the vernacular, or at the upper-division or graduate level at UCI or another accredited English-speaking institution. Some restrictions apply; see the School of Humanities section for information.

Advanced Placement and International Baccalaureate Credit

Advanced Placement (AP). Students who earn scores of 3, 4, or 5 on the College Board AP examinations will receive credit toward graduation at UCI. The unit and subject credit allowed toward degree requirements assigned to each test are shown in the accompanying chart.

International Baccalaureate (IB). Students completing the IB diploma with a score of 30 or above will receive 30 quarter units (20 semester units) total toward their UC undergraduate degree. The University grants 8 quarter units (51/3 semester units) credit for certified IB Higher Level examinations on which a student scores 5, 6, or 7. The University does not grant credit for Standard Level examinations. Some higher-level examinations may be used to fulfill course requirements in lower-division major or general education requirements. For detailed information see the UCI Office of Admissions and Relations with Schools' Web site at http://www.admissions.uci.edu/resources/ib_exams.html.

The units granted for IB examinations are not counted toward the maximum number of credits required for formal declaration of an undergraduate major or the maximum number of units a student may accumulate prior to graduation from the University. Students who enter the University with IB credit do not have to declare a major earlier than other students nor are they required to graduate earlier.

Duplicate Credit. Students should be aware that AP examinations, IB examinations, and college courses taken prior to or after enrolling at the

University may be duplicative. In these cases, the University will award credit for only one of these. Students cannot earn units or grade points at UCI in courses from which they have been exempted on the basis of AP or IB credit. Students who elect to enroll in courses for which they have already received AP or IB credit will have those courses specially coded on their transcript without unit or grade credit. However, some examinations exempt the student from a greater number of UCI units than the number of AP or IB units earned. In such cases, the student may elect to take the final course in the series for credit.

College Board Advanced Placement

Advanced Placement Examination	AP Score	Unit Credit	Credit Allowed Toward Degree
Art			
- Art History	3	8	One course toward Art History major, minor, category IV of the UCI GE requirement from the Art History 40 or 42 series, and satisfaction of category VIII, plus 4 units of elective credit; may not replace School of Humanities requirements.
	4 or 5	8	Two courses toward Art History major, minor, category IV of the UCI GE requirement from the Art History 40 or 42 series, and satisfaction of category VIII; may not replace School of Humanities requirements.
- Studio Art¹			
- - Drawing	3, 4, or 5	8	Elective credit only.
- - 2-D Design Portfolio	3, 4, or 5	8	Elective credit only.
- - 3-D Design Portfolio	3, 4, or 5	8	Elective credit only.

Biology	3, 4, or 5	8	Non-Bio. Sci. Majors: one Biological Sciences course toward category II of the UCI GE requirement. Bio. Sci. Majors: elective credit only.
Chemistry	3	8	Elective credit only.
	4 or 5	8	Chemistry 1A plus 4 units of elective credit.
Chinese Language and Culture ²	3	8	Elective credit only.
	4 or 5	8	Chinese 1A-B-C, 2A. Satisfies categories VI and VIII of the UCI GE requirement. Additional course credit may be awarded following placement examination.
Computer Science ³			
- A Exam	3, 4, or 5	2	ICS/CSE 21 or Engineering MAE 10.
- AB Exam (AB Exam not offered after 5/09)	3	4	ICS/CSE 21 or Engineering MAE 10.
	4 or 5	4	ICS/CSE 21 and 22 or Engineering MAE 10.
-	4 unit maximum for both exams.		
Economics			
- Macroeconomics	3	4	Elective credit only.
	4 or 5	4	Economics 20B. May not replace School of Social Sciences requirements for the bachelor's degree.
- Microeconomics	3	4	Elective credit only.

	4 or 5	4	Economics 20A. May not replace School of Social Sciences requirements for the bachelor's degree.
English ¹	3 (on either or both exams)	8	Elective credit only. Fulfills UC Entry Level Writing requirement.
- Composition and Literature	4 or 5 (on either exam)	8	One course toward category IV of the UCI GE requirement from the English 28 series plus 4 units of elective credit; may not replace Literary Journalism major, English major, minor, or School of Humanities requirements.
- Language and Composition	4 or 5 (on either exam)	8	One course toward category IV of the UCI GE requirement from the English 28 series plus 4 units of elective credit; may not replace Literary Journalism major, English major, minor, or School of Humanities requirements.
	4 or 5 (on both exams)	8	Two courses toward category IV of the UCI GE requirement from the English 28 series; may not replace Literary Journalism major, English major, minor, or School of Humanities requirements.
Environmental Science	3	4	Elective credit only.
	4 or 5	4	Earth System Science 1 or Social Ecology E8.

French

- French Language (French Language and Culture as of 5/12)	3	8	French 1A-B-C. Satisfies category VI of the UCI GE requirement.
	4 or 5	8	French 2A-B-C. Satisfies categories VI and VIII of the UCI GE requirement.
- French Literature (Not offered after 5/09)	3	8	French 1A-B-C. Satisfies category VI of the UCI GE requirement.
	4 or 5	8	French 2A-B-C. Satisfies categories VI and VIII of the UCI GE requirement.
Geography			
- Human Geography	3, 4, or 5	4	Elective credit only.
German Language (German Language and Culture as of 5/12)	3	8	German 1A-B-C. Satisfies category VI of the UCI GE requirement.
	4 or 5	8	German 2A-B-C. Satisfies categories VI and VIII of the UCI GE requirement.
Government and Politics			
- American Government	3, 4, or 5	4	Elective credit only.
- Comparative Government	3, 4, or 5	4	Elective credit only.
History			
- European	3, 4, or 5	8	Elective credit only.
- United States	3, 4, or 5	8	Elective credit only.
- World	3, 4, or 5	8	Elective credit only.
Italian Language (Italian Language and Culture as of 5/12)	3	8	Italian 1A-B-C. Satisfies category VI of the UCI GE requirement.
	4 or 5	8	Italian 2A-B-C. Satisfies categories VI and VIII of the UCI GE requirement.

Japanese Language ² (Japanese Language and Culture as of 5/12)	3	8	Japanese 1A-B-C. Satisfies category VI of the UCI GE requirement.
	4 or 5	8	Japanese 2A-B-C. Satisfies categories VI and VIII of the UCI GE requirement.
Latin (Offered beginning 5/09)	3	4	Elective credit only.
-	4 or 5	4	Satisfies categories VI and VIII of the UCI GE requirement. Course credit toward the Classics major or School of Humanities language requirement awarded upon petition.
Latin/Vergil and/or Latin/Literature (Not offered after 5/09)	3 (on one exam)	4	Elective credit only.
-	4 or 5 (on one exam)	4	Satisfies categories VI and VIII of the UCI GE requirement. Course credit toward the Classics major, Latin major, or School of Humanities language requirement awarded upon petition.
-	3 (on both exams)	8	Latin 1A-B-C. Satisfies category VI of the UCI GE requirement.

	4 or 5 (on both exam)	8	Satisfies categories VI and VIII of the UCI GE requirement. Course credit toward the Classics major, Latin major, or School of Humanities language requirement awarded upon petition.
Mathematics ¹			
- AB Exam	3	4	Elective credit only.
	4 or 5	4	Mathematics 2A.
- BC Exam ⁴	3	8	Mathematics 2A.
	4 or 5	8	Mathematics 2A-B.
Music Theory	3	8	Elective credit only.
	4 or 5	8	Elective credit only.
Physics ¹			
- Exam B	3, 4, or 5	8	Elective credit only.
- Exam C, Part I or II	3	4	Elective credit only.
	4 or 5	4	Physics 2.
- Exam C, Part I (Mechanics)	5	4	Physics 3A
- Exam C, Part II (Electricity and Magnetism)	5	4	Physics 3B.
Psychology	3	4	Elective credit only.
	4 or 5	4	Psychology and Social Behavior 9 or Psychology 7A.
Spanish ²			
- Spanish Language	3	8	Spanish 1A-B-C. Satisfies category VI of the UCI GE requirement.
	4 or 5	8	Spanish 2A-B-C or Spanish 2. Satisfies categories VI and VIII of the UCI GE requirement.

- Spanish Literature (Spanish Literature and Culture as of 5/12)	3	8	Spanish 1A-B-C. Satisfies category VI of the UCI GE requirement.
	4 or 5	8	Spanish 2A-B-C or Spanish 2. Satisfies categories VI and VIII of the UCI GE requirement.
Statistics	3, 4, or 5	4	Statistics 7 or Management 7 or Social Ecology 13.

- ¹ Maximum credit 8 units.
 - ² Students who wish to enroll in any Chinese, Japanese, or Spanish course at UCI are still required to take the placement examination (and oral interview, if necessary). Students, however, cannot earn units or grade points in courses from which they have been exempted on the basis of Advanced Placement credit, even if placement results require enrollment in such a level.
 - ³ Maximum credit 4 units.
 - ⁴ Students who take the Calculus BC examination and earn a subscore of 3 or higher on the Calculus AB portion will receive credit for the Calculus AB examination, even if they do not receive a score of 3 or higher on the BC examination.
- * NOTE: All students should refer to the Duplicate Credit section that appears before the AP chart.

Application Procedures

Students may apply to the University of California using the online application at <http://www.universityofcalifornia.edu/apply>.

Applications must be submitted by the last day of the filing period. The nonrefundable application fee is \$70 (\$80 for international students) for each campus to which the student applies.

When to Apply for Admission

To ensure that applications will be considered for admission by both UCI (or other UC campuses) and the student's choice of major or program of study, the completed application and the application fee should be submitted during the priority filing period, November 1–30, 2013, for fall quarter 2014. Each campus accepts for consideration all applications it receives during this period. Additionally, students required to fulfill the examination requirements for freshman admission should make arrangements to take the standardized tests early. Completing the examination requirement (SAT Reasoning Test or ACT Plus Writing Test) no later than the December testing date of the senior year of high school is required for students applying for the fall quarter.

After the priority filing period has ended, campuses will accept applications only if they still have openings for new students. Most campuses are unable to accept applications after the formal filing period closes.

UC Irvine does not accept applications for the winter and spring terms.

Academic Record. On the application, students must report all high schools and colleges attended, regardless of credit earned or courses

completed. All courses taken must also be reported, regardless of grades earned. This includes reporting courses repeated with both the original and repeated grade.

Failure to submit an accurate academic record will result in any admissions offer being rescinded.

Transcripts

The UCI Office of Admissions and Relations with Schools (OARS) requires complete, accurate, and up-to-date information about a student's academic program and work in progress in order to process and respond to the application in a timely manner. The transcript and other documents submitted as part of the application become the property of the University; they cannot be returned or forwarded in any form to another college or university.

Freshman Applicants. Freshman applicants should not send transcripts unless requested to do so. *Applicants will be notified if a preliminary high school transcript is required.* Applicants are also responsible for asking testing agencies to report examination scores for either the SAT Reasoning Test or ACT Plus Writing Test to UC. Once students are admitted and decide to enroll at UCI, *an official final high school transcript showing an official graduation date must be forwarded to OARS even if a student attends summer session.* Official final transcripts are due in OARS by July 1 for those students admitted for fall quarter. [A California Certificate of Proficiency, the results from a proficiency test from any state, or a General Educational Development (GED) Certificate can be accepted in place of a high school diploma.] Delays in receiving official transcripts will disadvantage students in the academic advising process and can affect enrollment in appropriate courses.

Transfer Applicants. *Transfer applicants should not send transcripts unless requested to do so.* It is essential that applicants accurately complete the self-reported college credit information in the application because it will be used for initial admission screening. *Once students are admitted and decide to enroll at UCI, an official transcript from each college attended and the high school from which they graduated must be sent to OARS even if a student attends summer session.* Final official transcripts are due in OARS by July 1 for those students admitted for the fall quarter. Summer-session transcripts must be submitted by September 15. Delays in receiving official transcripts will disadvantage students in the academic advising process and can affect enrollment in appropriate courses.

Examination Arrangements

Students should make arrangements to take the SAT Reasoning Test with the College Board at <http://www.collegeboard.org>. For the ACT Plus Writing, students should contact ACT at <http://www.actstudent.org>. (Test fees should be paid to the testing services, not to the University.)

Freshmen applicants must also report ACT Plus Writing or SAT Reasoning Test scores on their original UC Application, then request that the testing agency send an official score report to UC. Applicants can have their official score report sent to one UC campus, and all campuses they apply to will receive it. Ensure that all scores are sent to UC. UC will use the highest scores from a single administration.

To prevent confusion or unnecessary delay, it is important to use precisely the same form of the student's name on both the application for admission and the test materials.

The 2013–14 SAT Reasoning Test and SAT Subject Tests schedule is available at <http://www.collegeboard.org>.

In 2013–14 the ACT Plus Writing Test is scheduled to be offered on the following dates: September 21, 2013; October 26, 2013; December 14, 2013; February 8, 2014 (no test centers are scheduled in New York for the February test date); April 12, 2014; and June 14, 2014. The ACT schedule is available at <http://www.actstudent.org/regist/dates.html>.

Detailed information, including confirmation of test dates, is available from the College Board, ACT, and from most high school counseling offices.

Notification of Admission

Most fall quarter freshmen applicants are notified of their status on a rolling basis between February 1 and March 31. Transfer applicants are usually notified by May 1. In some cases for transfer applicants, complete transcripts of course work and/or a mid-term progress report are required before a final decision can be made; such records will be requested by OARS. Note that these target dates apply only to those applicants who submitted their applications during the fall priority filing period (November 1–30). Those students who apply after the priority period will be notified as soon as possible after the other applicants.

Statement of Intent to Register

Students who wish to attend UCI must return a Statement of Intent to Register (SIR). The SIR serves to notify UCI of the student's decision to accept or not accept its offer of admission. Before completing and returning their SIR, students who have applied to more than one campus are advised to take as much time as is appropriate in considering their response to each campus. However, it is essential that students allow enough time to meet the stipulated deadline. Once they have decided which UC campus to attend, students should submit their positive SIR and nonrefundable \$100 deposit (if applicable) either electronically or by mail. (This deposit, known as the Undergraduate Acceptance of Admission Fee, is applied to the Student Services Fee when the student enrolls.)

Students must submit their SIR by the following deadline:

Freshmen entering fall 2014: May 1, 2014

Transfers entering fall 2014: June 1, 2014

Electronic Filing: Students are encouraged to return their SIR electronically. Log in to MyAdmissionsApplication@UCI, the UCI admissions portal, at <http://www.admissions.uci.edu>. Students submitting an SIR electronically are required to pay their \$100 Acceptance of Admission Fee by credit card. Fee waivers are also available online.

Filing by Mail: Students who are unable to submit their SIR online may download and print an SIR from the OARS Web site. Students must return the printed SIR along with the \$100 Acceptance of Admission Fee (if requested), made payable to:

UC Regents
Office of Admissions and Relations with Schools
260 Aldrich Hall
University of California
Irvine, CA 92697-1075

Students who are not able to either submit their SIR electronically or download an SIR from the OARS Web site should contact OARS at the address listed above and/or call (949) 824-6703.

Admission to UCI is not an assurance of receiving financial aid nor does it guarantee assignment to University housing. Separate applications are required of applicants desiring financial aid and/or University housing, and receipt of communications from the Office of Financial Aid and Scholarships, the Housing Office, or any office other than the OARS does not imply that eligibility for admission has been established.

Student Records Access and Disclosure

At UCI, an “applicant” becomes a “student” at the time of submission of the SIR. Information regarding access to student records and disclosure of student record information (both public and confidential) may be found in the Appendix (p. 1046).

Information for Admitted Students

Orientation

Undergraduate Students

Each May, information about UCI's orientation programs, sponsored by the Student Life & Leadership, is made available to admitted students who plan to enroll in the fall.

Summer Programs

Student Parent Orientation Program (SPOP). Freshmen are required to attend an orientation program (except for Summer Bridge and CAMP participants). SPOP provides the opportunity for freshmen and their parents or guardians to attend a comprehensive orientation program. Each program includes academic advising, program planning, and registration for fall classes. In addition, information on housing, financial aid, campus resources, student life, and more is included.

International Student Orientation (ISO) is a mandatory orientation program for all incoming international freshmen who cannot attend SPOP. ISO is a three-day, two-night program specifically designed to help orient new international freshmen to life at UCI and in the United States. A wealth of important resources for international students is shared, including language support service, getting around Irvine, academic and classroom culture, and student health and wellness.

Transfer Success is a unique one-day program geared to the needs of transfer students. Held in early summer, the program provides information on campus resources, student life, and tours.

For more information about all of the orientation programs, visit <http://www.students.uci.edu/orientation>; telephone (949) 824-5182; or send e-mail to orientation@uci.edu.

Welcome Week

Welcome Week is held each fall a few days prior to the beginning of classes. A variety of academic and social activities for new and returning students are held during this time. For more information, visit <http://studentlife.uci.edu/welcomeweek/>.

Graduate Students

Incoming graduate students are strongly encouraged to attend the Campuswide New Graduate Student Orientation, held during the third week of September each fall. This orientation covers all aspects of navigating graduate education at UC Irvine, including graduate student services. It augments school/department-based orientations, and students should attend both. Information about the Campuswide New Graduate Student Orientation is e-mailed to incoming graduate students the summer prior to the event. Inquiries may be directed to gradorientation@uci.edu, and details are available online at <http://www.grad.uci.edu/services/campuswide-orientation/grad-orientation.html>.

Division of Undergraduate Education

Overview

The core mission of the Division of Undergraduate Education is to support and enrich the academic experiences of undergraduate students so that they succeed and thrive. The Division provides campus leadership, programs, and services that enhance the quality of undergraduate education at UCI. An advocate and steward for educational excellence, the Division works with all academic units, programs, and members of the UCI community to foster a climate of learning, discovery, and engagement for every undergraduate student. Through its diverse and innovative programs and services, the Division provides support for student academic achievement, for a rich and coherent curriculum, and for outstanding teaching through the integration of teaching and research activities and the facilitation of effective pedagogy.

The Division of Undergraduate Education is responsible for the following programs and services: the Campuswide Honors Program; the Scholarship Opportunities Program; the Study Abroad Center, which includes the Education Abroad Program and the International Opportunities Program; the Peer Academic Advising Program; the Undecided/Undeclared Advising Program and advising for freshman Pharmaceutical Sciences students; the First-Year Integrated Program; the Undergraduate Research Opportunities Program; Student Support Services; the Academic Testing Center; the Learning and Academic Resource Center; the Teaching, Learning & Technology Center; Transfer Student Center; administration of the UCDC Academic Internship Program and the UC Sacramento Scholar Intern Program; the UCI Center for Excellence in Writing and Communication; and the organization of the campus's student orientation programs in cooperation with the Division of Student Affairs. The Division is also responsible for the Freshman and Transfer Seminar Program where students are introduced to the research university and encouraged to become active participants in intellectual interactions with their peers and professors. The Division's programs and services are described in detail below.

The Division is responsible for the administration of the Academic Honesty Policy (p. 1042) (approved by the UCI Academic Senate) as it relates to undergraduates, and for implementing the ASUCI UTeach program in which students propose, plan, practice and, finally, teach their own 1-unit seminar courses. For further information visit <http://www.asuci.uci.edu/uteach>.

The Division of Undergraduate Education also supports excellence in undergraduate education through assessment of student learning outcomes and a comprehensive program of research and evaluation conducted by its Assessment, Research and Evaluation Group. The Division coordinates the campus approach to educational assessment and provides data and information on undergraduate students, programs, and policies for use in decision-making by the Dean of the Division and other campus leaders. It also provides consultation and technical advice for faculty and staff on assessment of student learning, program evaluation, survey research, statistical analyses of student data, and development of new undergraduate majors and minors with a view to enhance undergraduate education at UCI. For further information visit <http://www.assessment.uci.edu/>.

Academic Advising

At the time of admission to UCI every undergraduate student is assigned to the school that offers the student's selected major. Students who have indicated "Undecided/Undeclared" as a major on their UC application for admission and scholarships receive assistance from the Undecided/Undeclared Advising Program until they select an academic major.

Jurisdiction over all questions of academic regulations and academic standing rests with the dean of the school to which a student is assigned or, in the case of undecided/undeclared majors, with the Dean of the Division of Undergraduate Education. Each academic unit provides academic advising for its students and processes requests to add or drop courses, waive or change graduation or other requirements, or change majors. Students are responsible for knowing the governing regulations of the school or program to which they are assigned.

While each academic unit is responsible for maintaining a system that provides academic advising, these systems differ from unit to unit. In some, all of the faculty serve as advisors; in others, only certain members of the faculty are designated as advisors. All advising offices include academic counselors, professionals who assist students in planning their program, selecting a major, and making progress toward a degree. Peer academic advisors (trained upper-division students) assist students in many of the same areas as academic counselors. In addition, they are able to answer questions relating to student life issues, providing a student perspective. Responsibility for informing students of the names of their advisors rests with the dean of the appropriate academic unit. This is normally done by letter; however, students may obtain information by telephone from the office of the appropriate dean. Telephone numbers for academic advising offices are listed in the academic unit sections of the *Catalogue*.

New students are required to plan their academic programs with an academic counselor shortly after being admitted. The optimum time to initiate contact with an academic counselor is before the student enrolls in classes. The academic counselor can help the student determine whether the classes the student wishes to take are appropriate to the student's level of preparation, whether the proposed classes fit within the student's educational goals, and whether the classes will help meet some of the requirements for graduation.

In some schools, consultation between students and their faculty advisors is mandatory. Regardless of whether or not consultation between student and advisor is required, students are responsible for initiating and maintaining periodic contact with their assigned faculty advisor. The actual frequency of these meetings will be determined by the desires of the student, the advisor, and the unit's governing regulations.

Each quarter, students are encouraged to go to the appropriate academic dean's office prior to registration for advice concerning class enrollment.

Undecided/Undeclared Students

Students who enter the University as freshmen or sophomores may be uncertain about which major they should choose and may not feel ready to declare their major or even to identify their interests with a particular school. Such students participate in the Undecided/Undeclared Advising Program, which is administered by the Division of Undergraduate Education. This program is located in 256 Aldrich Hall; telephone (949) 824-6987. The goal of the Undecided/Undeclared Advising Program is to help students make the best informed and most rational choice of a major

that is possible. All students at UCI are required to choose their major by the time they reach junior status.

To make a good decision about which major to declare, students should know the range of programs UCI offers and have some experience with them, have a good knowledge of their own abilities and interests, have clear educational goals, and have a sense of their vocational goals and of the academic programs at UCI that will provide appropriate preparation. Students in the Undecided/Undeclared Advising Program meet with faculty and receive quarterly individualized staff counseling that helps them explore the variety of course offerings on campus, become more aware of their own interests and abilities, formulate sound educational goals, and learn how to prepare for graduate education and/or possible careers.

To assist students in choosing a major, the program offers a course designed to expose undecided/undeclared students to a variety of opportunities and resources available to them and to introduce students to each of the schools and majors offered. In addition, students learn about research and career opportunities within different disciplines.

The Division of Undergraduate Education's Undecided/Undeclared Advising Program is coordinating the undergraduate affairs activities and providing student advising for the Department of Pharmaceutical Sciences. For further information call (949) 824-6987.

Courses in University Studies

UNI STU 1	Freshman Experience
UNI STU 2	UCI-Majors
UNI STU 3	Mini-Seminars
UNI STU 4	Transfer Student Seminars
UNI STU 6	University Studies International Village Seminar
UNI STU 7	UTeach: Student-Taught Seminar
UNI STU 40	Personal Success and Global Perspective
UNI STU 41	Global Village Seminar

UNI STU 197D	Study Abroad Experiential Learning

Placement Testing

UCI's Academic Testing Center administers placement tests to new and continuing students to ensure correct placement in selected introductory courses and to help students assess their readiness for University-level work. These tests are selected or developed by UCI faculty who also determine the grading criteria for each test. Results from placement tests are used by students and their academic counselors to formulate a plan of study which is best suited to the students' learning needs and career goals and to determine enrollment in introductory courses. Additional information, such as entrance examination scores, Advanced Placement (AP) scores, and high school work, also may be used to determine course placement.

Placement tests are given in the areas of physics, calculus, Arabic, Chinese, French, German, Japanese, Korean, Persian, Russian, Spanish, Vietnamese, and Academic English/English as a Second Language.

1. Physics Placement Test. Students who plan to enroll directly into Physics 7C are required to take this test; students who plan to enroll in Physics 2 do not need to take this placement test.
2. Calculus Placement Test. Students who score 600 or higher on the Mathematics section of the SAT Reasoning Test will be authorized automatically for Mathematics 2A. Students scoring below 600 may take the ALEKS Pre-Calculus Assessment to establish eligibility for Mathematics 2A.
3. Arabic Placement Test. Students who plan to enroll in Arabic language courses are required to complete a background survey and placement test. An oral interview may be required for final placement.
4. Chinese Placement Test. Students who plan to enroll in lower-division Chinese courses are required to take this test. The score from this test and completion of a faculty oral interview will place students in the appropriate course.
5. French Placement Test. Students who plan to enroll in French 1A, 1B, 1C, 2A, 2B, 2C, or 3A are recommended but not required to take this test unless otherwise exempt.
6. German Placement Test. Students who plan to enroll in German 1A, 1B, 1C, 2A, 2B, 2C, or the 100 series are recommended but not required to take this test unless otherwise exempt.
7. Japanese Placement Test. Students who plan to enroll in Japanese 1A, 1B, 1C, 2A, 2B, 2C, or 3A are required to take this test. The score from this test and completion of a faculty oral interview will place students in the appropriate course.
8. Korean Placement Test. Students who plan to enroll in lower-division Korean courses are required to take this test. The score from this test and completion of a faculty oral interview will place students in the appropriate course.

9. Persian Placement Test. Students who plan to enroll in Persian language courses are required to complete a background survey and placement test. An oral interview may be required for final placement.
10. Russian Placement Test. Students who plan to enroll in Russian language courses are required to complete a background survey and placement test. An oral interview may be required for final placement.
11. Spanish Placement Test. Students who plan to enroll in lower-division Spanish courses are required to take this test.
12. Vietnamese Placement Test. Students who plan to enroll in Vietnamese 1A, 1B, or 1C are required to take the Vietnamese 1 test, unless otherwise exempt, followed by an oral interview. Students who plan to enroll in 2A, 2B, or 2C are required to take the Vietnamese 2 test, unless otherwise exempt, followed by an oral interview.
13. Academic English (AE) Placement Test. This test is required of students
 - A. whose native language is not English,
 - B. whose scores on the Writing section of the SAT Reasoning Test fall below a set level,
 - C. who have not satisfied the UC Entry Level Writing requirement, or
 - D. who have received a letter from the AE/ESL Program requiring them to take the AE Placement Test. Scores from the Test of English as a Foreign Language (TOEFL) and the Test of Standard Written English (TSWE) are not considered. The AE Placement Test also is required of students referred to the AE/ESL Program on the basis of their score on the UC Analytical Writing Placement Examination. See the section on Admission of International Students for additional information.

All newly admitted freshmen will be directed to information about summer orientation, placement testing, and registering for courses. Participation in summer orientation and advising is required of new freshmen. Freshmen will register for their fall quarter courses at orientation. Students are strongly advised, therefore, to take any required placement tests *before* their orientation program. Students may consult the Academic Testing Center's Web site at <http://www.testingcenter.uci.edu> for further information on placement testing and summer testing dates.

The Academic Testing Center also administers other language tests for exemptions from general education categories VI and VIII, and is responsible for the campus-based administration of the UC Analytical Writing Placement Examination.

Further information on placement and language testing may be obtained by calling (949) 824-6207 or by visiting the Center's Web site at <http://www.testingcenter.uci.edu/>. The Center is a unit of the Division of Undergraduate Education.

UC Analytical Writing Placement Examination

Results from the UC Analytical Writing Placement Examination are used to place students in UCI writing courses. There is a nonrefundable administrative fee associated with the examination. The fee payment process and waiver information are explained in materials students receive in April from Vangent. Students who receive admission application fee waivers will automatically have this examination fee waived. Refer to the section on Requirements for a Bachelor's Degree for complete information

on the UC Analytical Writing Placement Examination and the UC Entry Level Writing requirement.

UCI Center for Excellence in Writing and Communication

Writing support services provided by the UCI Center for Excellence in Writing and Communication (through the office of the Campus Writing Coordinator) are available free of charge to all enrolled UCI students. Services include workshops about writing for different occasions and needs, individual conferences, online tutorials, peer tutoring, and assistance with developing research skills.

The Writing Center, in conjunction with the Campus Writing Coordinator and the Division of Undergraduate Education, also conducts research about best practices in the teaching of writing. The Writing Center, newly opened as of fall 2011, will become the central campus hub for developing a culture of writing and communication at UCI. For more information, see <http://www.writing.uci.edu/writingcenter.html>.

Learning and Academic Resource Center

The Learning and Academic Resource Center (LARC) provides academic support programs for undergraduate students. These include course-specific tutorials as well as workshops on specific study skills that can be applied to all courses. The tutorials fall under the Peer Assisted Learning (PAL) Program and the workshops are referred to as Academic Learning Skills (ALS) Workshops.

Student Support Services

Housed within the Division of Undergraduate Education, Student Support Services (SSS) is an academic support program dedicated to helping first-generation college, Pell eligible/low-income, and/or students from disadvantaged backgrounds/circumstances succeed and thrive at UCI. The goal of SSS is to help students successfully transition to UC Irvine and enhance their academic experience. SSS offers drop-in counseling and advising provided by professional staff, faculty, and student peers; organizes weekly workshops on academic and social opportunities at UCI; and coordinates summer academic programs for incoming students.

SSS supports the academic progress of its students and provides resources to help students achieve their academic potential. In an effort to best assist students, professional staff maintain liaison relationships with academic departments and provide referrals to other campus support services as needed. In addition to weekly workshops, SSS provides graduate school preparatory resources for those students interested in graduate study.

SSS administers and oversees the Summer Bridge Program at UCI for eligible students who are committed to starting their academic careers in the summer in order to achieve their full academic potential. Summer Bridge is designed to provide opportunities for students to earn academic credit, make a successful academic and social transition to the University, build relationships with peers, and engage with UCI faculty and staff.

Students are encouraged to make appointments with Student Support Services; telephone (949) 824-6234 or e-mail osss@uci.edu. Additional information is available at <http://www.due.uci.edu/ssss>.

Transfer Student Center

Housed within the Division of Undergraduate Education, the Transfer Student Center (TSC) works with new and returning transfer students to

facilitate their transition and overall success at UCI by directing them to appropriate campus programs and services, organizing weekly workshops, providing formal and informal mentoring, and offering a space for study. The Transfer Student Center strives to foster a sense of community among the transfer student population at UCI and advocate for transfer students in order to enhance their academic and social experience. The Transfer Student Center works closely with both Tau Sigma National Honor Society for transfer students and the Transfer Student Organization (TSO), providing guidance in these organizations' work to advocate and support transfer students at UCI.

Students are encouraged to visit TSC and meet with the staff; TSC is located in 2200 Student Services II; telephone (949) 824-1142 or e-mail transfer@uci.edu. Additional information is available at <http://www.transfercenter.uci.edu>

Scholarship Opportunities Program

UCI encourages high-achieving undergraduates to compete successfully for the most prestigious scholarships, grants, and graduate fellowships available, and to begin learning about the process as early as possible. The Scholarship Opportunities Program (SOP) organizes and disseminates information about 14 prestigious awards that are national and international in scope. They include opportunities for funded research and study at both the undergraduate and graduate levels. The SOP also facilitates UCI's processes for evaluating applications and endorsing candidates for awards requiring University nomination. Additionally, staff provide individual and group counseling, present workshops, assist students with curriculum vitae (CVs), and edit Statements of Purpose and research/project proposals.

Winner Tips. SOP staff help connect students with past UCI scholarship winners, who can share their experiences about the process and insider tips on becoming a successful candidate. The names and photos of students who have been awarded the prestigious national and regional scholarships and fellowships are featured on the Past Winners page of the SOP Web site at <http://www.scholars.uci.edu/winners.asp>.

Comprehensive Workshops. SOP's two-day annual Merit Scholarships seminars present practical information and tips on applying for prestigious scholarships as well as firsthand experience from past UCI student winners and faculty. Additionally, the staff presents workshops in response to requests from academic units, clubs, and other campus groups.

Individual Scholarship Counseling is available by appointment.

Resource Materials. The SOP office maintains a library of past scholarship winners' applications; descriptions and selection process information for merit scholarships; examples of successful CVs, recommendation letters, Statements of Purpose, research and project proposals; and books on interview preparation.

SOP Services. Additional information is available in the SOP office, Center for Excellence in Writing and Communication, Ayala Science Library, Building 520; (949) 824-0189; sklrship@uci.edu.

Undergraduate Research Opportunities Program

The Undergraduate Research Opportunities Program (UROP), in the Division of Undergraduate Education, encourages and facilitates research and creative activities by undergraduates. Research opportunities are available not only from every discipline, interdisciplinary program, and school, but also from many outside agencies, including national

laboratories, industrial partners, and other universities. UROP offers assistance to students and faculty through all phases of the research activity: proposal writing, developing research plans, resource support, conducting the research and analyzing data, and presenting results of the research at the annual spring UCI Undergraduate Research Symposium. Calls for proposals are issued in the fall and spring quarters. Projects supported by UROP may be done at any time during the academic year and/or summer, and the research performed must meet established academic standards and emphasize interaction between the student and the faculty supervisor. In addition, all students participating in faculty-guided research activities are welcome to submit their research papers for faculty review and possible publication in the annual *UCI Undergraduate Research Journal*.

UROP also sponsors the following programs.

The **Summer Undergraduate Research Program (SURP)** provides funding for UCI undergraduates from all disciplines who are conducting summer research projects or creative activities under the guidance of UCI faculty members. The program offers students the opportunity to become immersed in a research topic for a full-time 10-week period or the equivalent of 400 hours. SURP is open to all non-graduating UCI undergraduates who are in good academic standing and who have been involved in a faculty-mentored research project or creative activity for at least one quarter.

The **Edwards Lifesciences Summer Undergraduate Research Program (E-SURP)** provides the opportunity for UCI undergraduates to become immersed in cardiovascular-related research projects under the guidance of UCI faculty mentors who are associated with the Edwards Lifesciences Center for Advanced Cardiovascular Technology. Students work on their projects full-time for 10 weeks.

The **Inter-Disciplinary Summer Undergraduate Research Experience (ID-SURE)** provides funding for continuing UCI undergraduates from all disciplines who are conducting interdisciplinary summer research projects or creative activities related to health promotion and disease prevention under the guidance of UCI faculty members. Students work on their projects full-time for 10 weeks.

The **Integrated Micro/Nano Summer Undergraduate Research Experience (IM-SURE)** provides an opportunity for non-graduating science and engineering juniors and seniors to become immersed in biomedical, physical, and engineering micro/nanotechnology research projects under the guidance of UCI faculty members. Students work on their projects for 10 weeks.

The **Summer Undergraduate Research Fellowship in Information Technology (SURF-IT)** provides the opportunity for non-graduating UCI juniors and seniors to become involved in information technology-related research under the guidance of UCI faculty members. Students work on their projects full-time for 10 weeks.

The **Biophotonic Summer Undergraduate Research Program (B-SURP)** at the Beckman Laser Institute and Medical Clinic (BLIMC) provides undergraduate and high school students with a nine-week immersion experience in biophotonics, biomedical optics, and medical translation technology. Participants receive a stipend for their time and efforts.

The **Multidisciplinary Design Program (MDP)** engages UCI undergraduate students from all disciplines in design teams mentored by at least two faculty members from different schools. Participants will have the opportunity to choose from a variety of innovative and creative design

projects related to energy, environment, health care, and culture. Students work on their projects during the academic year.

For more information about UROP and complete details about any of the programs it sponsors, contact UROP, 2300 Student Services II; telephone (949) 824-4189; fax (949) 824-1607; urop@uci.edu; <http://www.urop.uci.edu/>.

UCDC Academic Internship Program

The UCDC Academic Internship Program supervises and supports students who pursue internships, elective courses, research, and creative activities in the nation's capital. This UC systemwide program, situated in the exciting environment of Washington DC, is open to students in all majors. Students may enroll for fall, winter, or spring quarter. While living in Washington DC, students are enrolled at UCI and earn 12–16 units of credit. Financial aid eligibility is maintained and is adjusted to cover the total cost of the program. Students live in the UC Washington Center building together with students from all of the participating UC campuses, which provides a social and intellectual community throughout the quarter. Internship opportunities are available in almost any setting including Capitol Hill, the White House, government agencies, nonprofit organizations, think tanks, art museums, educational institutions, media outlets, and scientific organizations, just to name a few.

Interested students with strong academic records are encouraged to apply; visit 1100 Student Services II; call (949) 824-5400; dccenter@uci.edu; <http://www.dccenter.uci.edu/>.

Courses

UCDC 170	Washington DC Internship
UCDC 180	Washington Themed Seminar
UCDC 190	Washington DC Elective

UC Center Sacramento Scholar Intern Program

The UC Center Sacramento (UCCS) Scholar Intern Program supervises and supports students who pursue internships, elective courses, research, and creative activities in the state capital. This UC systemwide program is open to students in all majors, and is currently available for the fall, winter, spring, or summer terms. While living in Sacramento, students are enrolled at UC and earn 12–16 units of credit. Financial aid eligibility is maintained. Internship opportunities are available for students in many different settings including the offices of Assembly Members, Senators, and the Governor, as well as with State agencies, nonprofit organizations, and lobbying organizations.

Interested students with strong academic records are encouraged to apply; visit 1100 Student Services II; telephone (949) 824-5400; dccenter@uci.edu; <http://uccs.ucdavis.edu/>.

Teaching, Learning & Technology Center

The Teaching, Learning & Technology Center (TLTC), a unit of the Division of Undergraduate Education, provides instructional support to the UCI teaching community through a variety of services and programs. This support includes teaching development, skills training, and instructional technology assistance.

Teaching development includes consultation with teaching professionals regarding instructional strategies, best practices, methods, and learning theory. Faculty members, lecturers, and Teaching Assistants (TAs) may

request consultations. *All services for regularly scheduled undergraduate courses are free and confidential.* Consultation can be further enhanced by being videotaped while teaching. Additionally, in order to obtain feedback from students before the end of the term, instructors can access a midterm feedback form through the Electronic Educational Environment's "Instructors' Toolbox" (<http://www.eee.uci.edu/>). To schedule an appointment for a consultation or other service, call the TLTC at (949) 824-6060.

Other programs and services include the Pedagogical Fellows Program; a multi-day TA Professional Development Program during Welcome Week; quarterly Teaching Colloquia; the New Faculty Teaching Academy; Faculty Institute for Online Learning; other workshops specifically for new faculty, experienced faculty, and graduate students; and workshops and individual assistance with the compilation of Teaching Portfolios. The TLTC also co-hosts the annual "Celebration of Teaching," which honors teaching excellence.

The TLTC offers University Studies 390A-B-C, Advanced Pedagogy and Academic Job Preparation, a three-quarter-long course for Pedagogical Fellows. Graduate Teaching Assistants who are not Pedagogical Fellows may petition to take University Studies 390A. Enrollment for non-Pedagogical Fellows, however, is subject to the instructor's approval.

The TLTC provides services related to computerized presentation technology, video-conferencing, distance learning, and video and multimedia production. An experienced instructional designer is also available to assist faculty in creating technologically enhanced, hybrid/blended, and fully online undergraduate courses. The Center hosts a video teleconference center for distance learning and a media center where instructors can produce multimedia resources for their courses. Technicians and instructional specialists are available to advise instructors. Additionally, the TLTC has an experimental training room called the Learning Studio (Anteater Instruction and Research Building, room 1030) that is equipped with both Mac and PC computers, four screens that can display four different images, and Wacom Boards. To book the rooms for courses and/or events that require additional media, call (949) 824-6060.

The TLTC is located in the Anteater Instruction and Research Building on the corner of East Peltason and Anteater Drives, third floor, room 3000. Hours are from 8 a.m. to 5 p.m., Monday through Friday. Staff is available after hours and on weekends by special appointment. For general information, call (949) 824-6060 or visit <http://www.tltc.uci.edu/>.

The TLTC offers the following courses.

UNI STU 175	Methods and Application in Small Group Instruction
UNI STU 390A	Advanced Pedagogy and Academic Job Preparation
UNI STU 390B	Advanced Pedagogy and Academic Job Preparation
UNI STU 390C	Advanced Pedagogy and Academic Job Preparation

First-Year Integrated Program (FIP)

University Studies 11–17 are three-quarter multidisciplinary sequences for freshmen or lower-division students only. These integrated courses are designed to introduce students to the ways different disciplines approach similar problems and to provide a freshman learning community

experience. Successful completion of all three quarters will satisfy several courses toward partial fulfillment of different general education (GE) requirement categories. These courses (with the exception of UNI STU 13A-B-C) are designed to have a capstone research writing component in the third quarter that will satisfy the second quarter of the lower-division writing requirement—one of the four courses toward partial fulfillment of GE categories. To satisfy the second quarter of the lower-division writing requirement with a FIP sequence, students must concurrently enroll in WRITING 39B either the fall or winter quarter and pass it with a grade of C or better, and also complete the FIP sequence with a grade of C (or Pass) or better in the third quarter of the sequence.

UNI STU 11A-B-C Persuasion and Social Change I, II, III (5-5-5) F, W, S. Introduces students to the history, theory, and practice of rhetoric: the art of persuasion. Rhetoric is the ability to create and analyze effective communication in any medium, including speech, writing, visual arts, and others. The emphasis of this course is rhetoric for direct social change. Students read historical and contemporary texts about rhetoric and read and view noteworthy examples of rhetorical practice in a variety of forms: confessions, speeches, manifestos, films, and electronic texts. Students from any discipline will become critical consumers of rhetoric, learning how to recognize the tools of persuasion in everyday life, and will use rhetoric themselves for interpretation and research. The issue of effective speech will be approached from several different disciplines of the Humanities. Prerequisites: for 11A: satisfaction of the UC Entry Level Writing requirement; for 11B: 11A and completion of Writing 39B with a minimum grade of C (or a Pass or Credit grade equivalent to C) or concurrent enrollment in Writing 39B; for 11C: 11B and completion of Writing 39B with a minimum grade of C (or a Pass or Credit grade equivalent to C). **(GE: One course toward category I—equivalent of Writing 39C, and three courses toward category IV.)**

UNI STU 12A-B-C Computer Games as Art, Culture, and Technology I, II, III (5-5-5) F, W, S. An introduction to the study of computer games as art objects, cultural artifacts, gateways to alternate realities, and complex software. Students learn vocabularies, perspectives, tools, and skills from multiple disciplines necessary to create and critique computer games. Exposure to contemporary art practices utilizing game metaphors, design principles, and technologies is emphasized. Students design and create games by programming and utilizing content creation software. Prerequisites: for 12A: satisfaction of the UC Entry Level Writing requirement; for 12B: 12A and completion of Writing 39B with a minimum grade of C (or a Pass or Credit grade equivalent to C) or concurrent enrollment in Writing 39B; for 12C: 12B and completion of Writing 39B with a minimum grade of C (or a Pass or Credit grade equivalent to C). University Studies 12A-B-C and ICS 60 may not both be taken for credit. **(GE: One course toward category I—equivalent of Writing 39C, one course toward category III, one course toward category IV, and one course toward category Vb.)**

UNI STU 13A-B-C Introduction to Global Sustainability I, II, III (4-4-4) F, W, S. Introduces Earth as a system and living planet. Examines physical and biological resources as well as energy, water, climate, and ecosystems. Introduces and applies analytic lens of environmental, social, and economic sustainability to examine human impacts and resource use. Prerequisites: for 13B: 13A; for 13C: 13B. **(GE: Two courses toward category II, one course toward category III, and one course toward category VII.)**

UNI STU 15A-B-C Consciousness I, II, III (5-5-5) F, W, S. Introduces students to the theory of consciousness in the disciplines of cognitive science, philosophy, literature, psychoanalysis, and fine arts as represented in the genres of poetry, fiction, and film. Students are

introduced to debates about the mind-body relationship and how it figures in discourse about the nature of consciousness. Students will become better skilled in analyzing scholarly works in the represented disciplines and genres, and in writing and revising analytic essays. Additionally, provides students with new concepts and vocabulary with which to understand their own experience of consciousness. Prerequisites: for 15A: satisfaction of the UC Entry Level Writing requirement; for 15B: 15A and completion of Writing 39B with a minimum grade of C (or a Pass or Credit grade equivalent to C) or concurrent enrollment in Writing 39B; for 15C: 15B and completion of Writing 39B with a minimum grade of C (or a Pass or Credit grade equivalent to C). **(GE: One course toward category I—equivalent of Writing 39C, one course toward category III, and two courses toward category IV.)**

UNI STU 16A-B-C How Race is Made I, II, III (5-5-5) F, W, S. Introduces students to an examination of how race is “made” in America and the consequences of this construction through a variety of lenses: historical, legal, anthropological, sociological, artistic, and pop culture. Prerequisites: for 16A: satisfaction of the UC Entry Level Writing requirement; for 16B: 16A and completion of Writing 39B with a minimum grade of C (or a Pass or Credit grade equivalent to C) or concurrent enrollment in Writing 39B; for 16C: 16B and completion of Writing 39B with a minimum grade of C (or Pass or Credit grade equivalent to C). **(GE: One course toward category I—equivalent of Writing 39C, one course toward category III, one course toward category IV, one course toward category VII, and one additional course toward either category III or IV.)**

UNI STU 17A-B-C Water I, II, III (5-5-5) F, W, S. The sequence begins in fall by addressing water from an scientific and engineering perspective (global issues, land-sea interactions and urban water), then moves in winter to an historical case study of the Himalayan watershed and its impact on Asia’s water, and culminates in spring quarter by exploring water policy with the overall theme of water as a contested resource across space, time, and peoples. Wherever possible, examples are drawn from the local environment. Prerequisites: for 17A: satisfaction of the UC Entry Level Writing requirement; for 17B: 17A and completion of Writing 39B or Humanities 1B with a minimum grade of C (or a Pass or Credit grade equivalent to C) or concurrent enrollment in Writing 39B or Humanities 1B; for 17C: 17B and completion of Writing 39B or Humanities 1B with a minimum grade of C (or Pass or Credit grade equivalent to C). **(GE: One course toward category I—equivalent of Writing 39C, one course toward category II, one course toward category III, and one course toward category IV.)**

Honors Recognition

Students who graduate during the academic year with academic honors, and those who receive special school awards, are honored in school-based ceremonies. Some honors societies may also hold special ceremonies for selected students. Of the graduating seniors, no more than 12 percent will receive academic honors: approximately 1 percent *summa cum laude*, 3 percent *magna cum laude*, and 8 percent *cum laude*. The criteria used in selecting candidates for these honors are available at the counseling office of each school. One general criterion is that students must have completed at least 72 quarter units in residence at a University of California campus. The student’s cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors. Students who have on file recorded acts of academic dishonesty, as defined in *University of California Policies Applying to Campus Activities, Organizations and Students*, may be excluded by the Associate Deans from consideration for academic honors at graduation.

For further information contact the academic counseling office of each school.

Honors Opportunities

UC Irvine offers many challenging and enriching honors opportunities to its most accomplished and motivated students. These include a comprehensive Campuswide Honors Program, which enrolls outstanding students of all majors from the freshman through senior years; a variety of major-specific honors programs at the upper-division level; the Humanities Honors Program, also offered at the upper-division level, but open to all majors on campus; and several Excellence in Research programs.

These programs offer some of the advantages usually associated with selective liberal arts colleges: rigorous, personalized classes and the intellectual exchange that creates a community of scholars. The difference, however, is that UCI’s programs are supported by and benefit from the resources of a major research university, including renowned faculty, research opportunities, and the 35-million-volume University of California Library system.

Honors students are also encouraged to participate in the UC Education Abroad Program, the International Opportunities Program, or the UCDC Internship Program during their junior or senior year. Qualified students are also encouraged to take advantage of resources available in the Scholarship Opportunities Program (SOP) and the Undergraduate Research Opportunities Program (UROP). These programs are described in other sections of this *Catalogue*.

Campuswide Honors Program

Founded in 1988, the Campuswide Honors Program (CHP) is available to selected high-achieving students in all academic majors and years of study. It maintains an active roster of approximately 700 students. Many CHP students continue their studies after graduation from UCI at the most prestigious graduate and professional schools in the country.

The CHP provides talented and successful UCI students with a special honors curriculum consisting of core courses designed especially for CHP students, close interaction with peers, mentorship by UCI’s top faculty, and the opportunity to participate in undergraduate research. Enhanced academic advising provides students with assistance in planning a path to success, including course selection and preparation for graduate and professional schools, prestigious scholarships, and study abroad. Completion of the Campuswide Honors Program is noted on the student’s transcript and baccalaureate diploma.

Admission. Admission to the program as an incoming UCI freshman is by invitation; all eligible candidates are reviewed and selected by faculty representatives from each academic unit. Transfer students may also apply prior to matriculation, and special admissions programs are offered through the Office of Admissions and Relations with Schools to students who have completed approved community college honors programs. Current UCI students are eligible to apply for admission to the CHP after completion of at least one quarter at UCI in 12 or more graded units with a grade point average of 3.5 or better. Applications are accepted until the end of the first quarter of the student’s junior year. The CHP seeks to admit students who have a demonstrated passion for learning, a willingness to explore and be challenged, and an interest in pursuing academic excellence in a range of disciplines outside of their major area.

Curriculum and Research. CHP students pursue three, year-long, interdisciplinary honors core courses (one course per quarter), satisfying various categories of the general education requirement. CHP core

courses must be taken for a letter grade. Many of these courses provide an interdisciplinary approach to major subjects and issues. Faculty from a variety of disciplines are chosen for their outstanding teaching ability and scholarship. Participants engage in original research under the direct supervision of faculty members, culminating in an honors thesis, creative project, or publication-quality paper. Many CHP students also participate in major-specific honors programs. The senior honors thesis that is developed and produced through these programs satisfies the CHP research and thesis requirement. Transfer students who join the CHP are generally required to take at least one core course sequence, unless they have successfully completed an approved honors program at a community college with a cumulative GPA of 3.5 or better. Transfer students must also complete the CHP research and honors thesis requirement.

The CHP curriculum is as follows:

1. Freshman CHP students begin their course of study by taking honors sections of the Humanities Core Course (Humanities H1A-B-C). Team-taught by professors from a wide range of disciplines in the Humanities, the Humanities Core Course explores the ways in which humanists approach issues from philosophical, historical, and cultural perspectives. In small honors discussion sections, students engage with these perspectives, while developing and improving writing and research skills. Honors students are also invited to attend special honors forums held by faculty, visiting writers, or other special guests.
2. The Critical Issues in the Social Sciences sequence (Social Sciences H1E-F-G or Social Ecology H20A-B-C), usually taken in the sophomore year, is team-taught by professors from the Schools of Social Sciences and Social Ecology. Topics have included human vision; authority (dis)obedience, and human society; decisions and compromises and their rewards and penalties; learning and memory; urban studies; and exotic societies (including our own).
3. The Idiom and Practice of Science interdisciplinary sequence (Biological Sciences H90, Chemistry H90, Earth System Science H90, or Physics H90) explores the role science plays in addressing socially significant problems. Students develop the ability to understand scientific models and to judge the content, merit, and limitations of many issues of science in the modern world. The development of analytical and writing skills is emphasized. Topics have included global warming, earthquakes, biodiversity and conservation, genetic plant engineering, evolution, aging, diseases, the history of science, and the physics of music.
4. Research and Thesis. CHP students engage in a research project with a faculty mentor and complete an honors thesis or creative project as the culmination of the CHP academic experience. Students work with primary materials, synthesize existing information and theory, and analyze the result of the experiment or study. The thesis should demonstrate the student's command of research techniques, conceptual frameworks, and intellectual skills appropriate to the field or fields within which the topic falls. A minimum of two quarters of research under the direction of an approved faculty advisor and successful completion of an honors thesis or creative project are required.

CHP students are eligible to participate in other lower-division Honors courses on the campus, along with other qualified students. These include Honors General Chemistry (H2A-B-C), which covers the similar material as Chemistry 1A-B-C but offers small class sizes, provides opportunities for increased interaction with faculty, and covers material in greater depth.

Honors General Chemistry Laboratory (H2LA-LB-LC) is also offered. The small class size enhances access to outstanding faculty and peers.

Extracurricular Activities. CHP students are invited to participate in many social and cultural activities geared toward their interests. These include special weekly programs and social events, beach bonfires, trips to museums, concerts and plays, a quarterly creative works journal, an annual trivia bowl, and a camping retreat. The CHP office also offers workshops on a variety of academic topics and enhanced opportunities to meet and interact with faculty.

On-Campus Housing. CHP students are guaranteed on-campus housing, as long as they meet Housing deadlines and remain in good standing with the Honors program. Freshmen may choose to live in Middle Earth in "The Shire," or in Mesa Court in "Loma" or "Arroyo." Sophomores and upper-division students who wish to live in honors housing may also select one of the honors houses in Arroyo Vista. Honors housing offers a valuable living/learning experience with other CHP students, a variety of activities designed especially for honors students, and the community spirit that is a special feature of the Campuswide Honors Program. CHP students are encouraged to live in honors housing, particularly in the freshman year, but are not required to do so.

Other benefits include extended library borrowing privileges, honors study rooms in Langson Library and the Ayala Science Library, leadership and service opportunities, and close interaction with faculty and peers.

Additional information is available on the Campuswide Honors Program Web site, <http://www.honors.uci.edu/>, or by contacting the CHP Office at honors@uci.edu or (949) 824-5461. The CHP office is located in 1200 Student Services II.

Major-Specific and School Honors Programs

Honors programs for qualified junior- and senior-level students also are available to Drama, Music, Music Theatre, and Studio Art majors in the Claire Trevor School of the Arts, and to all qualified junior- and senior-level majors in the following Schools: Biological Sciences, Humanities, Information and Computer Sciences, Physical Sciences, Social Ecology, and Social Sciences; and to qualified junior- and senior-level majors in the Program in Public Health. The focal point of each of these programs is the development of analytical and research skills through the pursuit of research under faculty supervision. An honors-level thesis or creative project is required by most of the programs. CHP students are encouraged to participate in these programs as well as the Campuswide Honors Program. The honors-level thesis or creative project that is developed through these programs also satisfies the CHP research and thesis requirement. Additional information is available in the specific academic unit sections of this *Catalogue*.

Excellence in Research Programs

The School of Biological Sciences and the Departments of Cognitive Sciences and of Psychology and Social Behavior offer students the opportunity to pursue research through their Excellence in Research Programs. Students work on their research projects under faculty supervision and have the opportunity to present their results to peers and faculty and, in certain instances, to have their research papers published. Additional information is available in the specific academic unit sections of this *Catalogue*.

Phi Beta Kappa

Founded in 1776, Phi Beta Kappa is the oldest and most respected undergraduate honors organization in the United States. It supports and

recognizes academic excellence and scholarly achievement in the liberal arts and sciences, and promotes the principles of freedom of inquiry and liberty of thought and expression. UC Irvine's Phi Beta Kappa Chapter (Mu of California) was founded in 1974. Phi Beta Kappa is UCI's most selective honorary society, with only 5 percent of graduating seniors and 1 percent of juniors invited to become members each year. An annual initiation ceremony for new members is held in June. For additional information, including selection criteria, visit <http://www.phibetakappa.uci.edu/>.

Study Abroad Center

The Study Abroad Center includes the University of California Education Abroad Program (UCEAP) and the International Opportunities Program (IOP). It is a comprehensive resource and counseling center that helps students take advantage of the many worldwide opportunities that exist for study, work, internship, volunteering, research, and non-credentialed teaching that relates to their degree programs at UCI.

Studying abroad is an important resource for achieving the skills, knowledge, and understanding that will make today's undergraduates effective citizens and leaders in local, national, and global affairs once they depart the University. In today's political and business environment, college graduates must be informed decision-makers with a capacity to reflect on their own values while understanding the complex identities, histories, and cultures of others. Studying abroad provides students with the language skills and cultural competence necessary to meet the current demands of business, government, and educational institutions.

Professional staff and peer advisors, who have returned from an IOP or UCEAP experience, are available to guide students in making appropriate choices of international programs for their educational goals. Group and individual advising is available when UCI is in session. All UCEAP and IOP participants are provided with pre-departure and reentry orientations.

Students are advised to plan early in their academic career in order to best match studying abroad with their major to graduate on time. Students are encouraged to study abroad as a sophomore or junior, allowing the opportunity to incorporate their international learning into their final year at UCI. Preliminary guidance is available at the Study Abroad Academic Planning Web site (<http://www.studyabroad.uci.edu/academics/academicplanning.html>).

The Study Abroad Center is located in 1100 Student Services II; (949) 824-6343; studyabroad@uci.edu; <http://www.studyabroad.uci.edu/>.

UC Education Abroad Program

The University of California Education Abroad Program (UCEAP) offers students the opportunity to experience a different culture while making progress toward degree objectives. UCEAP is an overseas study program which operates in cooperation with about 150 host universities in 35 countries throughout the world. Programs are available for students in every major. The wide variety of programs includes those offering general curriculum, intensive language study, and programs focusing on a specific academic subject area. Participation in UCEAP satisfies category VIII of the UCI general education requirement. Study in the following countries is available through UCEAP:

Argentina, Australia, Barbados, Botswana, Brazil, Chile, China, Costa Rica, Czech Republic, Denmark, Egypt, France, Germany, Ghana, Hong Kong, India, Ireland, Israel, Italy, Japan, Korea, Mexico, Morocco, Netherlands, New Zealand, Russia, Senegal, Singapore, South Africa,

Spain, Sweden, Taiwan, Tanzania, Thailand, Turkey, United Kingdom, Vietnam.

NOTE: Information is subject to change. Consult the Web site for the most current information.

The cost of studying abroad through UCEAP is often comparable to the cost of studying at UCI, while some options cost more and some cost less. The cost of each UCEAP option is listed online at <http://eap.ucop.edu/>. All UC financial aid (other than work-study), including grants, scholarships, and loans, is available to UCEAP participants who qualify. Both need-based and merit-based scholarships specifically for study abroad are also available. Information is available at <http://www.studyabroad.uci.edu/scholarships.html>.

On-site abroad, a UC professor, local faculty member, or administrative coordinator oversees local operations, including in-country orientation, student academic advising, and assistance with emergencies, large and small. Students interested in UCEAP should visit the Web site (<http://eap.ucop.edu/>) to review program options and visit the UCI Study Abroad Center Web site (<http://www.studyabroad.uci.edu/>), or come to the office for advising and to obtain an application. UCI EAP deadlines are available online at <http://www.studyabroad.uci.edu/prospective/deadlines.shtml>.

International Opportunities Program

UCI's International Opportunities Program (IOP) is the link between UCI students and any international educational experience that occurs outside the boundaries of the U.S. and is not a part of the UC Education Abroad Program (UCEAP). Any UCI student (undergraduate, graduating senior, or graduate) in good academic standing, regardless of major, class level, or foreign language ability, may participate in IOP.

Study Abroad Center staff provide information and counseling to assist students in finding an appropriate program to meet their needs and interests. Students may choose from academic study (with transferable credit), paid work, paid or unpaid internships, unpaid or compensated volunteer service, field research, and paid teaching opportunities in nearly every country in the world. This includes all academic programs sponsored by U.S. institutions that occur on foreign soil or water (as in the case of the Semester at Sea program), direct enrollment at foreign institutions, summer session abroad programs through other UC campuses, and study abroad programs offered by private providers.

With careful planning IOP students participating in study programs can make progress toward their UCI degree by fulfilling major, minor, or general education requirements. Students may apply for transfer credit and UCI financial aid by completing the IOP Credit Contract. Many scholarships are also available. Information is available at <http://www.studyabroad.uci.edu/scholarships.html>

To acquaint students with opportunities abroad, the Study Abroad Center sponsors the annual Go Abroad Fair and hosts periodic visits from IOP providers. The Study Abroad Center also maintains a listing of opportunities abroad on its Web site. Interested students should visit <http://www.studyabroad.uci.edu/> or come into the office for assistance.

Requirements for a Bachelor's Degree

- General Education (GE) Requirement

There are four groups of requirements that must be met to earn a baccalaureate degree from UCI: general UC requirements; UCI requirements, including the General Education (GE) requirement; school or program requirements; and degree-specific requirements.

UC and UCI requirements are described below. School or program and major-specific requirements are described in full in the academic unit sections.

Students with identified learning and/or physical disabilities, including language-acquisition problems, are eligible to receive support through the Disability Services Center; telephone (949) 824-7494 (voice), 824-6272 (TTY), e-mail: dsc@uci.edu. Staff can assist students from the time they are admitted to UCI until they graduate.

Catalogue Rights

Students enrolled at UCI from their freshman year may elect to meet as graduation requirements (UC, UCI, school, and major): (1) those in effect at the time of entrance, or (2) those subsequently established after entrance.

A readmitted student who has not been enrolled at UCI for three or more consecutive quarters (excluding summer sessions) must adhere to the graduation requirements: (1) in effect for the quarter in which the student is readmitted; or (2) those subsequently established.

Students transferring from other collegiate institutions may elect to meet as graduation requirements either: (1) those in effect at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at UCI when the student first entered a previous, accredited collegiate institution, provided that the student has been continuously enrolled in a collegiate institution and that entry was not more than four years prior to the time of enrollment at UCI.

A transfer student who has had a break of enrollment of two consecutive semesters or three consecutive quarters (excluding summer sessions) may follow the requirements in effect at UCI: (1) at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at the time of reentry into a previous, accredited collegiate institution, provided that reentry was not more than four years prior to enrollment at UCI.

A transfer student who has been continuously enrolled in college for more than four years prior to transfer may use: (1) the requirements in effect at the time of enrollment at UCI; (2) those subsequently established; or (3) those in effect at UCI four years prior to enrollment at UCI.

All students, whether enrolled at UCI from their freshman year, readmitted, or transfer, may elect to fulfill general education requirements as specified above, independent of how they choose to meet all other graduation requirements (UC, UCI [with the exception of general education], school, and major).

Students choosing to complete a minor, whether enrolled at UCI from their freshman year, readmitted, or transfer, may elect to fulfill minor requirements as specified above, independent of how they choose to meet all other graduation requirements (UC, UCI, school, and major).

Transfer students who complete one of the following options will be considered to have met the total UCI general education requirement except the upper-division writing requirement: (1) students who transfer from a four-year institution and who have completed the general education requirements of that college, upon approval of petition; (2) students who transfer from another UC campus and provide official documentation that they have met the general education requirements of that campus; (3)

students who transfer from another UC campus and are in the process of completing the general education requirements of that campus, upon approval of petition, and who subsequently complete the remaining requirements of that campus at UCI; or (4) California Community College transfer students who have completed the Intersegmental General Education Transfer Curriculum. Transfer students may also elect to complete the UCI general education requirement.

University Requirements

English (UC Entry Level Writing)

Every undergraduate must demonstrate a proficiency in writing. The Entry Level Writing Requirement may be satisfied *before admission* in any of the following ways:

1. Score 3 or higher on the College Board Advanced Placement (AP) Examination in English (Language or Literature); *or*
2. Score 5 or higher on the International Baccalaureate (IB) Higher Level Examination in English (Language A only), or score 6 or higher on the IB Standard Level Examination in English (Language A only); *or*
3. Score 680 or higher on the Writing section of the SAT Reasoning Test, or score 30 or higher on the ACT Combined English/Writing test.

The UC Entry Level Writing requirement may be met *after admission* by one of the following options:

1. Passing the UC Analytical Writing Placement Examination given in mid-May (and on subsequent dates) to all entering freshmen admitted for fall quarter (see Placement Testing). Freshmen admitted to UC will receive detailed information in April about the exam. Freshman students who are not California residents may take the exam in the fall after they enroll. Transfer students who have not satisfied the UC Entry Level Writing requirement should contact the UCI Composition Program Office, 420 Humanities Instructional Building; telephone (949) 824-6717.
2. Prior to enrolling in the University, complete with a grade of C or better a transferable college course in English composition worth four quarter or three semester units. (Once a student enrolls at a UC campus, courses from institutions other than UC may not be used to satisfy the Entry Level Writing Requirement.) Students who meet the University's basic requirements for minimal transfer eligibility, which include two transferable college courses in English composition, satisfy the Entry Level Writing Requirement.

NOTE: Those students who have not met the requirement before entrance must satisfy the requirement before the beginning of their fourth quarter at UCI. Students who have not satisfied the requirement by that time will be ineligible to enroll for a fourth quarter.

The UC Entry Level Writing requirement may be met *after enrollment* by one of the following options:

1. Enrolling in sections of the Humanities Core Course designated "S/A." (NOTE: Students held for UC Entry Level Writing and enrolled in the Humanities Core must enroll in an S/A section of the Core Course during their first quarter. Successful completion of the writing component of these sections of this course with a letter grade of C or better will satisfy the requirement. Students who do not receive a letter grade of C or better in HUMAN 1AS/A in the fall quarter and

who continue to be held for UC Entry Level Writing must enroll in HUMAN 1BS/A during the winter quarter and satisfy the requirement by earning a letter grade of C or better.)

2. Taking either WRITING 37 or WRITING 39A and receiving a letter grade of C or better in the course.

Students enrolled in Essentials of Academic Writing (Academic English 20A-B-C-D) must enroll in WRITING 39A Introduction to Writing and Rhetoric immediately after they are authorized to do so by the Academic English/English as a Second Language Program. Students with a score of 2, 3, or 4 from the UC Analytical Writing Placement Examination are also required to enroll in WRITING 39A; some students with these scores may be required to take the Academic English Placement Test before enrolling in WRITING 39A.

The Pass/Not Pass grade option may not be used to satisfy the UC Entry Level Writing requirement.

Students enrolled at UCI may take only UCI courses in satisfaction of the UC Entry Level Writing requirement. Continuing UCI students may not take summer courses at another institution to satisfy this requirement.

American History and Institutions

This requirement may be met by one of the following options:

1. Completion in an accredited high school of a one-year course in United States history with a grade of C or better, *or* a half-year course in United States history and a half-year course in American government with grades of C or better; *or*
2. Achieving a score of 3, 4, or 5 on the College Board Advanced Placement Examination in United States History; *or*
3. Achieving a score of 550 or better on the SAT Subject Test in United States history; *or*
4. Presentation of a certificate of completion of the requirement at another California institution; *or*
5. Completion at UCI or another U.S. institution of one year of college-level United States history with grades of C or better, *or* one course in United States history and one in United States government with grades of C or better. Acceptable UCI courses: United States history—HISTORY 40A, HISTORY 40B, HISTORY 40C; United States government—POL SCI 21A.

UCI Requirements

Unit Requirement

Credit for a minimum of 180 quarter units, earned by examination, by other evaluation, or course work is required. A course normally offers four quarter units of credit.

Grade Requirement

A minimum grade average of at least C (2.0) is required (1) overall, (2) in all of the courses required for the major program, and (3) in the upper-division courses required for the major program. Higher averages than this may be required only in honors programs. Students who fail to attain a C (2.0) average in courses required in the major program may, at the option of the major unit, be denied the privilege of pursuing a major program in that unit. In this context, “the courses required in the major program” are defined as the courses required for the major and offered by the program of the student’s major (or programs, in the case of an interdisciplinary or interdepartmental major). A major can include additional courses required for the major in this set, with the approval of the Council on Education

Policy. In this case, the list of additional courses is published in the *Catalogue* with the requirements for the major.

Residence Requirement

At least 36 of the final 45 units completed by a student for the bachelor’s degree must be earned in residence at the UCI campus. Exceptions to this rule may be allowed, with prior departmental approval, to students enrolled in the Education Abroad Program, the UCDC Academic Internship Program, the UC Center Sacramento Scholar Intern Program, or the International Opportunities Program with International Study Advance Contract.

General Education (GE) Requirement

UCI is committed to the values of a liberal education. One component of that commitment is the requirement that all undergraduates complete a set of general education (GE) requirements. General education courses introduce students to a range of ideas and intellectual activities that engage UCI scholars, providing both scope and balance to a University degree beyond the study of a specific major.

The general education requirements are intended to help undergraduates place the specialized study undertaken in the major within a broader context. They are designed to cultivate the skills, knowledge, and understanding that will make students effective contributors to society and the world. The general education requirements should enable UCI undergraduates to apply the abilities developed in their studies to identify significant issues, gather and evaluate available evidence, analyze alternatives, reach conclusions, communicate the results effectively, and take considered actions.

The general education requirement is a *graduation* requirement and, with the exception of the lower-division writing requirement, need *not* be satisfied during only the lower-division years. To satisfy the general education requirement, courses are required in each of the following categories:

I. Writing (two lower-division plus one upper-division course)

II. Science and Technology (three courses)

III. Social and Behavioral Sciences (three courses)

IV. Arts and Humanities (three courses)

V. Quantitative, Symbolic, and Computational Reasoning, with subcategories Va and Vb (three courses that may also satisfy another GE category)

VI. Language Other Than English (one course)

VII. Multicultural Studies (one course that may also satisfy another GE category)

VIII. International/Global Issues (one course that may also satisfy another GE category)

The specific courses in each area that students may use to satisfy the requirements are listed below. When a general education course is cross-listed with another course, that course also is available for fulfillment of the requirement. Students should refer to the *Catalogue* descriptions of the courses to determine which are cross-listed.

A course qualifies for a particular GE category based on its content rather than on the academic unit that offers it. However, to increase students’

exposure to a variety of disciplinary approaches, students are encouraged to choose GE courses from a wide range of schools and departments outside of the student's major.

NOTE: The following list of courses approved for GE is effective for the 2013–14 academic year only. Because changes occur each year, students should consult the GE list annually to ensure that the courses they enroll in are on the list. GE credit is awarded for a course only if it appears on the list during the academic year when it is taken. To check the GE course offerings in a particular quarter, consult the *Schedule of Classes* on the Registrar's Web site at <http://www.reg.uci.edu>.

General Education Categories

I. Writing

Because of the importance of visual, oral, electronic, and written communication in every academic discipline, in the professions, and in public life, the University is committed to developing a variety of communication abilities in students at all levels and in all areas. The Writing Requirement expresses this broad commitment, but the concern for and attention to rhetorically effective, accurate writing is expected in all courses.

The Writing Requirement consists of two courses at the lower-division level beyond the UC Entry Level Writing requirement and one upper-division course in a discipline.

Except where otherwise noted below, students must satisfy the UC Entry Level Writing requirement prior to fulfilling the UCI writing requirement.

Students who have not completed the lower-division writing requirement before the beginning of their seventh quarter at UCI will be subject to probation. Students transferring to UCI normally should have satisfied the lower-division writing requirement before entering UCI; if, however, they have not, they must complete it within their first three quarters of enrollment or they will be subject to probation. Academic English/English as a Second Language students must complete the lower-division writing requirement before the beginning of the seventh quarter following the completion of their AE/ESL courses or they will be subject to probation.

The third course must be an upper-division writing course, and it must be taken only after the successful completion of the lower-division requirement.

Students enrolled at UCI may take only UCI courses in satisfaction of the lower-division and upper-division writing requirements. Continuing UCI students may not take summer courses at another institution to satisfy lower-division or upper-division writing requirements.

After completing this GE requirement, successful students should be able to do the following:

Lower-division writing

- demonstrate rhetorically effective, accurate academic writing and communication across a variety of contexts, purposes, audiences, and media using appropriate stance, genre, style, and organization;
- develop flexible strategies for generating, revising, editing, and proofreading texts;
- develop abilities in critical reading across a variety of genres and media;
- and demonstrate information literacy skills by locating, evaluating, and integrating information gathered from multiple sources into a research project.

Upper-division writing

- demonstrate rhetorically effective, discipline-specific writing for appropriate academic, professional, and public audiences;
- demonstrate, at an advanced level of competence, use of discipline-specific research methods, genres, modes of development, and formal conventions;
- and demonstrate advanced information literacy skills by locating, evaluating, and integrating information gathered from multiple sources into discipline-specific writing.

Ia. Lower-Division Requirement

The two courses taken to fulfill the lower-division requirement must be completed with a minimum grade of C (or a Pass or Credit grade equivalent to C). Students may select from the courses specified below:

1. WRITING 39B (Critical Reading and Rhetoric) and WRITING 39C Argument and Research.
2. WRITING 37 Intensive Writing and WRITING 39C Argument and Research. Recommended students only.
3. Completion of the writing component of the Humanities Core Course (HUMAN 1A-HUMAN 1B-HUMAN 1C), with a grade of C or better in HUMAN 1A or HUMAN 1B, and in HUMAN 1C, or for students held for the UC Entry Level Writing Requirement, a C or better in HUMAN 1B and HUMAN 1C.
4. Students who complete WRITING 37 or WRITING 39B with a grade of B (3.0) or better may substitute as the second course of the lower-division writing requirement one of the following courses in creative writing: WRITING 30 or WRITING 31.
5. WRITING 39B and completion of a First-Year Integrated Program (FIP) sequence, with a grade of C (or Pass) or better in the third quarter of the sequence.

Ib. Upper-Division Requirement

The course taken to fulfill the upper-division requirement must be completed with a minimum grade of C (or a Pass or Credit grade equivalent to C). The requirement may be satisfied by completing one of the following options:

1. An upper-division course designated on a list of approved courses in the quarterly *Schedule of Classes* on the Registrar's Web site at <http://www.reg.uci.edu>. NOTE: All courses approved to fulfill the upper-division writing requirement should have a "W" suffix. Students are encouraged to consult the *Schedule of Classes* or their advisor to determine the current upper-division writing requirement course offerings. If a course on the approved list is offered without the "W" suffix, it does not satisfy the upper-division writing requirement.
2. Majors in the School of Biological Sciences, Physics majors, and Pharmaceutical Sciences majors satisfy the upper-division writing requirement in the manner specified in those academic unit sections of the *Catalogue*.

Students who fail to attain the required grades in the courses taken in fulfillment of the writing requirement should refer to the Academic Regulations and Procedures (p. 83) section for further information.

II. Science and Technology

Understanding the nature of scientific inquiry and the operation of the biological, physical, and technological world is essential for making personal and public policy decisions in a technological society.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate a broad understanding of the fundamental laws of science, the principles underlying the design and operation of technology, and the interrelations among science and technology disciplines;
- demonstrate a broad understanding of various natural phenomena that surround and influence our lives;
- describe how scientists approach and solve problems;
- solve problems and draw conclusions based on scientific information and models, using critical thinking and qualitative and quantitative analysis of data and concepts;
- and explain the scope and limitations of scientific inquiry and the scientific method.

Students must complete three courses from the following list:

Arts (ARTS)

ARTS 80	Art, Technology, and Science ¹
---------	---

Biological Sciences (BIO SCI)

BIO SCI 1A	Life Sciences
BIO SCI 5	Introduction to Molecular Biology
BIO SCI 6	Tropical Biology: Race to Save the Tropics
BIO SCI 9A	Nutrition Science
BIO SCI 9B	Biology and Chemistry of Food and Cooking
BIO SCI 9C	Biotech Basics
BIO SCI 9D	Diseases of the Twenty-First Century
BIO SCI 9E	Horticulture Science
BIO SCI 9G	Way Your Body Works
BIO SCI 9J	Biology of Oriental Medicine
BIO SCI 9K	Global-Change Biology
BIO SCI 9N	Introduction to Complementary and Alternative Medicine
BIO SCI 10	The Biology of Human Diseases
BIO SCI 11	Topics in Biological Sciences
BIO SCI 12B	Disease and Civilization
BIO SCI 12D	Molecular Basis of Human Disease
BIO SCI 16	Introduction to Darwinian Biology
BIO SCI 20	California Natural History
BIO SCI 25	Biology of Cancer
BIO SCI 35	The Brain and Behavior
BIO SCI 36	Drugs and the Brain
BIO SCI 37	Brain Dysfunction and Repair
BIO SCI 38	Mind, Memory, Amnesia, and the Brain
BIO SCI 41	Aspects of Mood Disorder
BIO SCI 42	Origin of Life
BIO SCI 43	Media on the Mind
BIO SCI 44	Stem Cells and Brain Repair
BIO SCI 45	AIDS Fundamentals

University Studies (UNI STU)

UNI STU 13A	Introduction to Global Sustainability I ⁷
UNI STU 13B	Introduction to Global Sustainability II ⁷
UNI STU 17A	Water I ⁷

¹ May be counted toward either category II or IV but not both.

² Counts toward both categories II and Va.

³ Counts toward both categories II and Vb.

⁴ Counts toward both categories II and either Va or Vb.

⁵ May be counted toward either category II or III but not both.

⁶ Counts toward both categories II and either Va or VIII.

⁷ Successful completion of all three quarters of an FIP sequence will satisfy several courses toward partial fulfillment of different GE categories. See First-Year Integrated Program (FIP) for details.

III. Social and Behavioral Sciences

Courses will focus on principles, sources, and interpretations of human behavior and on how people organize, govern, understand, and explain social life. This category includes the analysis of human behavior at all levels, from the individual to collective social, economic, and political life, and on the scientific methods used in the acquisition of knowledge and the testing of competing theories.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate knowledge and understanding of principles, sources, and interpretations of human behavior and how people organize, govern, understand, and explain social life;

- demonstrate an understanding of contemporary and historical perspectives on human behavior;
- understand and explain the scientific methods used in the acquisition of knowledge and the testing of competing theories in the social and behavioral sciences;
- and critically evaluate methods, findings, and conclusions in the research literature on human behavior.

Students must complete three courses from the following list:

African American Studies (AFAM)

AFAM 40A	African American Studies I ¹
AFAM 40B	African American Studies II ¹
AFAM 40C	African American Studies III ¹

Anthropology (ANTHRO)

ANTHRO 2A	Introduction to Sociocultural Anthropology

Women's Studies (WOMN ST)	
WOMN ST 60A	Gender and Science
WOMN ST 60B	Gender and Law
WOMN ST 60C	Gender and Religion

- May be counted toward either category III or IV but not both.
- May be counted toward either category II or III but not both.
- May be counted toward either category III or IV but not both; it also counts toward category Vb.
- Counts toward both categories III and Vb.
- Successful completion of all three quarters of an FIP sequence will satisfy several courses toward partial fulfillment of different GE categories. See First-Year Integrated Program (FIP) for details.
- Topics vary; three different topics may be taken to satisfy category III.

IV. Arts and Humanities

Study of the Arts and Humanities expands the student's sense of diverse forms of cultural expression, past and present. Students develop their critical capacity as they discover how meaning is created and experience variously interpreted.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate knowledge and understanding of how visual and verbal communication is used in literature and film, art and music, and philosophy and history;
- communicate an understanding and appreciation of diverse forms of cultural expression, past and present;
- understand and explain the research methods used in the acquisition of knowledge and the testing of competing theories in the arts and humanities;
- and think critically about how meaning is created and how experience is variously interpreted.

Students must complete three courses from the following list:

African American Studies (AFAM)	
AFAM 40A	African American Studies I ¹
AFAM 40B	African American Studies II ¹
AFAM 40C	African American Studies III ¹
Art (ART)	
ART 1A	Art in Context: History, Theory, and Practice

- ¹ May be counted toward either category III or IV but not both.
- ² May be counted toward either category II or IV but not both.
- ³ May be counted toward either category III or IV but not both; it also counts toward Vb.
- ⁴ Successful completion of all three quarters of an FIP sequence will satisfy several courses toward partial fulfillment of different GE categories. See First-Year Integrated Program (FIP) for details.
- ⁵ Topics vary; three different topics may be taken to satisfy category IV.

V. Quantitative, Symbolic, and Computational Reasoning

This category consists of two subcategories. Students are required to take one course in each of the subcategories and an additional course from either subcategory, for a total of three courses. A course approved for the GE requirement in category V and also approved for the GE requirement in a category other than V may be used to satisfy the requirements of both categories simultaneously. However, courses approved for both subcategories in category V may only be used once to satisfy one of the subcategories. The two subcategories are indicated as **Va** and **Vb**.

Va. Quantitative Literacy

Courses in this category focus on the quantitative description, evaluation, and assessment of events occurring in nature or in human social and political systems. This includes quantitative measurements made or data collected to study such events, analysis of the data, and implications of the analysis for our understanding of the events.

After taking a course in category Va, successful students will be able to do all of the following:

- identify appropriate tools for quantitative analysis of processes or events;
- have a basic familiarity with fundamental principles underlying quantitative descriptions of natural or social processes;
- and be able to do one or more of the following:
 - evaluate studies and reports that assess risk and probability in everyday life;
 - use models of natural phenomena to make quantitative predictions of future behavior or events;
 - use models of economic and social structures to make quantitative predictions of future behavior or events.

- ¹ Counts toward both categories II and Va.
- ² Counts toward both categories II and either Va or Vb.
- ³ Counts toward both categories II and either Va or VIII.

Vb. Formal Reasoning

Courses in this category focus on aspects of formal reasoning including symbolic logic, mathematical modeling, and algorithmic reasoning.

After taking a course in category Vb, successful students will be able to do all of the following:

- understand the concept and purpose of formal languages such as propositional and first-order logic, simple programming languages, mathematical models or linguistic formalisms;
- possess an elementary grasp of the power and limits of formal methods; and be able to do one or both of the following:
 - apply formal tools of logic or mathematics to the analysis and evaluation of everyday and/or scientific arguments, texts, and communicative situations;
 - apply basic algorithms for the generation of logical deductions, linguistic structures, or computational processes.

University Studies (UNI STU)

UNI STU 12C	Computer Games as Art, Culture, and Technology III ⁶
-------------	---

¹ Counts toward both categories II and Vb.² Counts toward both categories II and either Va or Vb.³ May be counted toward either category III or IV but not both; it also counts toward category Vb.⁴ Counts toward both categories II and Vb.⁵ Counts toward both categories III and Vb⁶ Successful completion of all three quarters of an FIP sequence will satisfy several courses toward partial fulfillment of different GE categories. See First-Year Integrated Program (FIP) for details.**VI. Language Other Than English**

Study of a language other than English expands students' horizons by encouraging understanding of another culture through its language and heightens awareness of one's own language through the investigation of another linguistic system.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate competency in reading, writing, speaking, and listening in a non-English language;
- demonstrate an understanding of another (non-English speaking) culture through its language;
- and demonstrate an understanding of one's own language through the investigation of another, non-English linguistic system.

Students must demonstrate competency in a language other than English (includes American Sign Language) by completing one of the following six options:

- College-level course work equivalent to UCI's third quarter of study in a language other than English. UCI courses approved to satisfy this requirement are:

ARABIC 1C	Fundamentals of Arabic
ARABIC S1BC	Introductory Arabic
CHINESE 1C	Fundamental Mandarin Chinese
CHINESE 1DC	Fundamentals of Mandarin Chinese - Dialect Background Track
CHINESE 1MC	Fundamentals of Mandarin Chinese - Mandarin Background Track
CHINESE S1BC	Fundamentals of Mandarin Chinese
FRENCH 1C	Fundamentals of French
FRENCH S1BC	Fundamentals of French

KOREAN 1KC	Fundamental Korean for Students with a Previous Background in Korean
KOREAN S1BC	Fundamentals of Korean
LATIN 1C	Fundamentals of Latin
LATIN S1BC	Fundamentals of Latin
PERSIAN 1C	Fundamentals in Persian
PERSIAN S1BC	Fundamentals of Persian
PORTUG 1C	Fundamentals of Portuguese

RUSSIAN 1C	Fundamentals of Russian
SPANISH 1C	Fundamentals of Spanish
SPANISH S1BC	Fundamentals of Spanish
VIETMSE 1C	Fundamentals of Vietnamese
VIETMSE S1BC	Fundamentals

For information on UCI's prerequisites, course placement policies, and the grade required to advance to the next level of instruction, consult the *School of Humanities* (p. 418) (*Language Other Than English Placement and Progression*) section in this Catalogue.

- Credit for three years of high school study or its equivalent in a single language other than English with a C average or better in the third year.
- A score of 3, 4, or 5 on a College Board Advanced Placement Examination in a language other than English. NOTE: Students who earn a 3, 4, or 5 on the AP Chinese Examination must take the UCI Chinese placement examination to determine course credit.
- A score of 570 or better on a College Board SAT Subject Test in a language other than English, with the exception of the test in Modern Hebrew for which a score of 500 or better is required.
- Completion of an approved course of study through the UC Education Abroad Program (EAP). Careful planning is required to ensure that this requirement is fulfilled. Check with an EAP counselor at the Study Abroad Center to determine the programs in countries that fulfill this requirement.
- The equivalent as determined by an appropriate and available means of evaluation. For information on availability of such examinations and testing schedules, consult the Academic Testing Center, (949) 824-6207. If an appropriate means of evaluating competence in a non-English language of instruction does not exist, satisfactory completion, with a C average or better, of one year of formal schooling at the sixth grade level or higher in an institution where the language of instruction is not English will meet the requirement. Appropriate documentation must be presented to substantiate that the course work was completed.

VII. Multicultural Studies

This requirement develops students' awareness and appreciation of the history, society, and/or culture of one or more underrepresented groups in California and the United States.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate knowledge of one or more historically underrepresented groups' culture, history, and development in California and the United States;
- demonstrate an awareness and appreciation of cultural differences and inequities;
- and demonstrate an understanding that cooperation and mutual understanding among all cultural groups is needed to interact successfully in a culturally diverse society.

Students must complete one course from the following list. In fulfilling category VII, students are encouraged to use courses that are also being used in fulfillment of other GE categories. For example, HUMAN 1C simultaneously satisfies category VII and a portion of category IV.

- ¹ Successful completion of all three quarters of an FIP sequence will satisfy several courses toward partial fulfillment of different GE categories. See First-Year Integrated Program (FIP) for details.

VIII. International/Global Issues

Courses in this category focus on significant cultural, economic, geographical, historical, political, and/or sociological aspects of one or more countries other than the United States.

After completing this GE requirement, successful students should be able to do the following:

- demonstrate specific knowledge of the cultural, historical, social, economic, scientific, and political aspects of one or more foreign countries, and the connections among these aspects;
- develop a broader understanding of the formation of different cultures and countries through the world;
- and be prepared to engage in positive interaction with peoples of different cultures and nationalities.

Students must complete one course from the following list. In fulfilling category VIII, students are encouraged to use courses that are also being used in fulfillment of other GE categories. In addition, category VIII may be satisfied by one quarter's participation in the UC Education Abroad Program (EAP) or one quarter's participation in an International Opportunities Program (IOP) with an approved IOP Credit Contract. Summer study abroad on an EAP or IOP (with approved IOP Credit Contract) satisfies this requirement when the program is at least five weeks long and the student completes at least one course worth at least four quarter units.

¹ Counts toward both categories II and either Va or VIII.

Or, students may complete one of the following fourth-quarter language options:

1. Credit for four years of high school study or its equivalent in a single language other than English with a C average or better in the fourth year.
2. A score of 4 or 5 on a College Board Advanced Placement Examination in a language other than English. NOTE: Students who earn a 3, 4, or 5 on the AP Chinese Examination must take the UCI Chinese placement examination to determine course credit.
3. A score of 620 or better on a College Board SAT Subject Test in a language other than English, with the exception of the test in Modern Hebrew for which a score of 540 or better is required.
4. The equivalent as determined by an appropriate and available means of evaluation. For information on availability of such examinations and testing schedules, consult the Academic Testing Center, (949) 824-6207. If an appropriate means of evaluating competence in a non-English language of instruction does not exist, satisfactory completion, with a C average or better, of two years of formal schooling at the sixth grade level or higher in an institution where the language of instruction is not English will meet the requirement. Appropriate documentation must be presented to substantiate that the course work was completed.

First-Year Integrated Program (FIP)

University Studies 11–17 are three-quarter multidisciplinary sequences for freshmen or lower-division students only. These integrated courses are designed to introduce students to the ways different disciplines approach similar problems and to provide a freshman learning community experience. Successful completion of all three quarters will satisfy several courses toward partial fulfillment of different GE requirement categories. These courses (with the exception of UNI STU 13A-B-C) are designed to have a capstone research writing component in the third quarter which will satisfy the second quarter of the lower-division writing requirement—one of the four courses toward partial fulfillment of GE categories. To satisfy the second quarter of the lower-division writing requirement with a FIP sequence, students must concurrently enroll in WRITING 39B either the fall or winter quarter and pass it with a grade of C or better, and also complete the FIP sequence with a grade of C (or Pass) or better in the third quarter of the sequence. For complete information about the FIP sequences, including course descriptions and prerequisites, see First-Year Integrated Program. (p. 57)

UNI STU 11A-11B-11C Persuasion and Social Change I, II, III

(GE: One course toward category I—equivalent of Writing 39C, and three courses toward category IV.)

UNI STU 12A-12B-12C Computer Games as Art, Culture, and Technology I, II, III

(GE: One course toward category I—equivalent of Writing 39C, one course toward category III, one course toward category IV, and one course toward category Vb.)

UNI STU 13A-13B-13C Introduction to Global Sustainability I, II, III

(GE: Two courses toward category II, one course toward category III, and one course toward category VII.)

UNI STU 15A-15B-15C Consciousness I, II, III

(GE: One course toward category I—equivalent of Writing 39C, one course toward category III, and two courses toward category IV.)

UNI STU 16A-16B-16C How Race is Made I, II, III

(GE: One course toward category I—equivalent of Writing 39C, one course toward category III, one course toward category IV, one course toward category VII, and one additional course toward either category III or IV.)

UNI STU 17A-17B-17C Water I, II, III

(GE: One course toward category I—equivalent of Writing 39C, one course toward category II, one course toward category III, and one course toward category IV.)

School, Departmental, and Major Requirements

In addition to the University and UCI requirements listed above, each undergraduate student must satisfy the degree requirements for the major and, if applicable, the minor or concentration selected. UCI, school, and departmental or major and minor requirements may overlap; courses taken to fulfill a school or departmental requirement may also help fulfill the UCI general education requirement. Students are urged to make sure that they understand how many courses are permitted to satisfy more than one requirement. Information on specific degree requirements and courses is available in the academic unit sections of this *Catalogue*.

Students must declare a major by the time they reach junior status (90 units excluding college work completed prior to high school graduation), and should make certain that the background and the preparation prerequisite to junior and senior work in the major have been accomplished. Transfer students should read the section on Information for Transfer Students: Fulfilling Requirements for a Bachelor's Degree.

Students should note that with the exception of courses designated Pass/Not Pass Only, courses taken Pass/Not Pass may *not* be used to satisfy specific course requirements of the student's school and major, unless authorized by the appropriate dean. Additional information on grading is located in the Academic Regulations and Procedures section.

Minor Programs

For certification in a minor, a student must obtain a minimum overall grade point average of at least C (2.0) in all courses required for the minor program. No more than two courses applied to a minor may be taken Pass/Not Pass. Completion of the minor is noted on a student's transcript. (Students are *not* required to minor in a program in order to graduate from UCI.)

Application for Graduation

In order to receive a degree, an undergraduate student must submit an online Application for Graduation via the Student Access link at <http://www.reg.uci.edu> no later than the published deadline. Specific deadline dates for filing are established quarterly so that candidates' academic records can be reviewed to verify that all graduation requirements have been met. These dates vary among academic units. Students should contact their academic counseling office for deadline and degree audit information.

Information for Transfer Students: Fulfilling Requirements for a Bachelor's Degree

This section provides a guide for transfer students in understanding how their course work from another collegiate institution applies to fulfilling UCI degree requirements. Transfer students should use this information

in conjunction with the previous section, Requirements for a Bachelor's Degree. Transfer students are required to meet University, general education, school, department, and major requirements described in the *Catalogue*. The courses and descriptions in this *Catalogue* may be used by prospective transfer students as a guide for selecting courses of similar content and purpose in their own institutions. No student who has taken a course which is accepted for credit by the Office of Admissions and Relations with Schools (OARS) and which has been mutually determined with a community college as being acceptable toward completion of the UCI general education requirement shall incur any loss of credit in satisfaction of the requirement.

Transfer students are *strongly* advised to check with the academic counselor in their prospective major or OARS about courses that may be used to satisfy UCI requirements.

Transfer Students: Completion of the UCI General Education Requirement

Students transferring to UCI must satisfy the UCI general education (GE) requirement by completing either:

1. the current UCI GE requirement;
2. one of the options listed in the Catalogue Rights section; or
3. the Intersegmental General Education Transfer Curriculum.

Transfer students should not feel that the UCI GE requirement must be completed prior to matriculating to UCI. The GE requirement, which must be completed prior to graduation, may be satisfied by college-level courses appropriate to UCI offerings and may be met *at any time* during the undergraduate years, *except* in the case of the lower-division writing requirement, which must be completed within the first three quarters of residency at UCI.

NOTE: Transfer students should be aware that UCI is on the quarter system. For the purpose of counting courses for the UCI GE requirement, one semester course is equivalent to one quarter course, and two semester courses are equivalent to three quarter courses.

Intersegmental General Education Transfer Curriculum

California Community College transfer students may receive credit for the UCI GE requirement by completing the Intersegmental General Education Transfer Curriculum (IGETC). The IGETC consists of a series of subject areas and types of courses which will satisfy the general education requirements at any campus of the University of California. Fulfillment of the IGETC does not satisfy the UCI upper-division writing requirement.

Students who do not complete IGETC prior to transfer may be eligible for partial certification from their community college. Partial certification is defined as completing all but two (2) courses on the IGETC pattern.

Warning: Students need to meet minimum UC transfer admission requirements. Therefore, partial certification that acknowledges a deficiency in Area 1 and/or Area 2 may also indicate a student does not meet minimum transfer requirements.

Please note:

1. IGETC must be completed in total or partial IGETC certification must be completed prior to enrolling at UCI;
2. students are responsible for requesting IGETC certification from their community college; and

- the IGETC certification should be submitted to the UCI Office of Admissions and Relations with Schools no later than the end of the first quarter of UCI enrollment.

Courses used to fulfill the IGETC must be completed with a grade of C or better. (Courses may also be taken on a Pass/No Pass basis provided Pass is equal to a letter grade of C or better.)

Lists of specific approved courses which may be taken in fulfillment of the IGETC are available from California Community Colleges and at <http://www.assist.org>.

Intersegmental General Education Transfer Curriculum

Area 1. English Communication: One course in English composition and one course in critical thinking/English composition.

Area 2. Mathematical Concepts and Quantitative Reasoning: One course in mathematics or mathematical statistics which has a prerequisite of intermediate algebra.

Area 3. Arts and Humanities: At least three courses with at least one from the arts and one from the humanities.

Area 4. Social and Behavioral Sciences: At least three courses from at least two different disciplines.

Area 5. Physical and Biological Sciences: At least two courses, with one from the physical sciences and one from the biological sciences; one course must include a laboratory.

Area 6. Language Other Than English: Proficiency equivalent to two years of high school courses in the same language.

Transferability of Credit

The University is committed to serve as fully as possible the educational needs of students who transfer from other California collegiate institutions. The principles covering transferability of unit credit and course credit are explained below and, unless otherwise indicated, are much the same whether transfer is from a two-year or a four-year institution.

Duplicate Credit Prohibited. Students may not receive unit credit or earn grade points for college courses in which the content duplicates material of a previously completed course or examination for which the student has been granted college credit. (Click here (p. 46) for exceptions related to Advanced Placement and International Baccalaureate credit. Click here (p. 85) for exceptions related to the repeat of deficient grades.)

Unit Credit for Work Taken Elsewhere

The University of California grants unit credit for courses completed at other accredited colleges and universities when such courses are consistent with the functions of the University as set forth in the Master Plan for Higher Education in California. Equivalent advanced standing credit from institutions on the semester calendar may be determined at a ratio of one semester unit to one and one-half quarter units. (To graduate from UCI a minimum of 180 quarter units, equivalent to approximately 45 UCI quarter courses, are needed.)

Community Colleges

A student may earn a maximum of 105 quarter units (70 semester units) at a community college toward a University degree. No further unit credit

may be transferred from a community college, although subject, major, or general education credit for courses taken will still be granted.

Students anticipating transfer to UCI are urged to consult with their community college counselors. The counselors, with the aid of that college's UC Transfer Course Agreement (UCTCA), can advise students about California Community College courses and units which will transfer to the University. In addition, staff in the UCI Office of Admissions and Relations with Schools can advise students about the transferability of courses. UCTCAs for all California Community Colleges are available at <http://www.assist.org>.

Four-Year Institutions

Unit credit is granted for courses consistent with the University of California's functions and which have been completed in colleges or universities accredited by the appropriate agencies. While limitations of credit may be imposed in certain subject areas, these are consonant with the curricula for all students in the University of California. No defined maximum number of units which can be earned toward the degree is set for students transferring from four-year institutions. However, see the Residence Requirement in the UCI Requirements (p. 60) section.

University of California Extension

Extension courses prefixed by XB, XD, XI, XR, XSB, and XSD are granted unit credit on the same basis as courses taken in residence at any accredited collegiate institution.

Students intending to transfer Extension course credit for a degree at another college or university should verify acceptance of the course with that institution. Resident students of the University of California must obtain the consent of the dean of their school or college prior to enrolling for credit in an Extension course. Extension courses are not accepted as part of the residence requirements of the University. Grades earned in University Extension are not used in calculating the University grade point average.

Decisions regarding the acceptability of extension courses taken in institutions other than the University of California rest with the UCI Office of Admissions and Relations with Schools. Decisions regarding the applicability of such courses toward specific degrees and majors rest with the student's academic dean.

Course Credit for Work Taken Elsewhere

The policies above refer only to the unit transferability of courses and are uniformly implemented on all UC campuses. Thus, courses which are determined by the University of California to be transferable are assured only of being granted elective course credit. The application of transfer work to specific course and major requirements is determined by the student's academic dean.

The Irvine campus makes every effort to eliminate all barriers to orderly progress from California Community Colleges into UCI's programs. To this end, courses from many California Community Colleges have been reviewed by UCI faculty and approved as acceptable toward meeting lower-division major or general education requirements. Although course equivalencies for the general education requirement may be liberally interpreted for purposes of transfer, courses to be applied toward school and departmental major requirements must be more precisely equated with UCI courses in unit value and in content.

All California Community Colleges have entered into articulation agreements with UCI so that the specific application of their courses to

UCI's general education, school, and/or departmental major requirements may be readily communicated to prospective transfer students. By careful selection of courses, it is possible for students to satisfy some or all of the lower-division requirements of their intended program or school prior to transfer. It is recommended that transfer students complete as much of the lower-division general education, school, and major requirements as possible prior to transferring to UCI. Articulation agreements are available at <http://www.assist.org>.

Students are urged to consult community college counselors or the UCI Office of Admissions and Relations with Schools for information on planning a program for transfer. Prospective transfer students with specific questions about course work in their major should contact the respective school or department at UCI.

Registration and Other Procedures

Except where noted, all information applies to both undergraduate and graduate students. Additional information concerning registration and academic policies applying only to graduate students is presented in the Graduate Division (p. 106) section later in this *Catalogue*.

Schedule of Classes and Registration Information

The *Schedule of Classes* contains current class offerings including time, room, instructor, capacity, number of enrolled students and number of students on the waitlist, Web links, status (open, waitlisted, full), and more. Access the *Schedule of Classes* on the Registrar's Web site at <http://www.reg.uci.edu>. The *Schedule of Classes* is available just prior to the beginning of each quarter's registration period (six weeks before the end of the current quarter).

The Registrar's Web site also includes registration and related information such as quarterly academic calendars, final examination schedules, and the Academic Honesty policy. The Registrar's Web site is the most timely source of information on new or changed policies, procedures, tuition and fees that could not be included in the *Catalogue* because of the latter's annual publication schedule.

Registration Procedures

To receive academic credit for regular courses and other supervised instruction or research, a student must be officially registered prior to undertaking such activities. **The registration process consists of two steps: payment of tuition and fees and enrollment in classes.**

A Quarterly Academic Calendar of dates for enrollment and payment of tuition and fees is available on the Registrar's Web site at <http://www.reg.uci.edu>.

The general procedures for registration are:

1. Consult the appropriate academic advisor to develop an approved program of study. Secure necessary authorizations for courses that require special approval.
New undergraduate students entering in the fall should attend one of the Student-Parent Orientation Program (SPOP) sessions during the summer for academic advising and enrollment.
2. Enroll in classes during the published registration period.

3. Pay required tuition and fees online or to the Central Cashier on or before the published deadline. Other outstanding obligations must be satisfied at this time also.

Enrolling in Classes

Using WebReg, students may add and drop classes, inquire about open sections, change their grading option or unit value for a variable unit course, put themselves on an official waiting list, and list their confirmed class schedule. Immediate feedback on the availability of a class and a student's eligibility to enroll is provided. This includes course restrictions that may be placed or removed at any time throughout the enrollment periods by the department offering the course. Complete information about WebReg is available on the Registrar's Web site at <http://www.reg.uci.edu>.

Students must enroll in classes before the end of the second week of instruction. Students enrolled in zero (0) units at the close of business at the end of the second week of instruction are assessed a \$50 late enrollment charge.

Payment of Tuition and Fees

Tuition and fees are assessed quarterly and appear on ZOT Account Online (<https://zotaccount.uci.edu>). Students who do not pay all required tuition and fees online or to the Central Cashier by the published fee payment deadline are subject to a \$50 late payment charge.

Late Registration

The student is subject to *both* late charges if tuition and fees are not paid online or to the Central Cashier and the student does not enroll in classes by the registration deadlines, published in the Quarterly Academic Calendar on the Registrar's Web site at <http://www.reg.uci.edu>.

Students who have not paid tuition and fees and/or have not enrolled in classes by 4 p.m. at the end of the third week of instruction will lose their student status. Visit the Registrar's Web site at <http://www.reg.uci.edu> for more information on the loss of student status.

To avoid the expense and inconvenience of late registration, students are urged to enroll and pay tuition and fees well before the published registration deadlines. Students with financial need should make advance arrangements with the Office of Financial Aid and Scholarships, or another source, to have funds available when tuition and fees are due.

Late registration (payment of tuition and fees and/or enrollment in classes) is permitted only in exceptional circumstances with the authorization of the student's dean. A student who is allowed to apply late and, as a result, must pay tuition and fees and enroll late, is required to pay both late charges.

Change of Class Enrollment

Once instruction begins, a student may add or drop classes, change the unit value of a variable unit course, or change the grading option via WebReg.

Generally, an undergraduate student may not enroll in more than 20 units or fewer than 12 units of course work during a given quarter without the permission of the student's academic dean or, for undecided/undeclared students, the Dean of the Division of Undergraduate Education. However, during initial enrollment, undergraduate enrollment will be limited to 18 units. The maximum returns to 20 units during Open Enrollment. Changes to Pass/Not Pass grading must not cause the student to exceed the

limitations to Pass/Not Pass enrollment. See the Pass/Not Pass (p. 84) section.

Graduate students may not enroll in more than 16 or fewer than eight units of graduate or upper-division credit without prior approval of the departmental graduate advisor.

Students may drop courses through the end of the second week of instruction via WebReg. After the second week of instruction through the end of the sixth week of instruction, an Enrollment Exception request is required.

Beginning the seventh week of instruction through the end of instruction, withdrawing from a course will result in the student receiving a W grade. W grades carry no grade points and are not calculated in the UC GPA.

Students may change the grading option and/or unit value of a course through the end of the second week of instruction via WebReg. After the second week of instruction through the end of the sixth week of instruction, an Enrollment Exception request is required.

Students may add courses through the third week of instruction via WebReg. After the third week of instruction, an Enrollment Exception request is required.

An Enrollment Exception request requires the authorization of the dean or equivalent of the school or academic unit offering the course and the dean or equivalent of the student's major. The authorization of the instructor may also be required when adding a course or changing the unit value of a variable unit course. Detailed information on Enrollment Exception requests is available on the Registrar's Web site at <http://www.reg.uci.edu>.

Individual courses may occasionally have unique deadlines due to course impaction or instructional needs. Students should refer to the *Schedule of Classes* for information on specific courses.

Students are responsible for their enrollments. They must officially drop or withdraw from classes they have ceased attending. Students cannot simply discontinue attendance in a class. Adds, withdrawals, and changes to class enrollment are not permitted after the last day of instruction.

Withdrawal from the University

Undergraduate students who pay tuition and fees for a regular academic quarter and then decide to withdraw from the University must submit a Withdrawal form to the Registrar's Office after obtaining the signatures of their academic dean (or the Dean of the Division of Undergraduate Education, for undecided/undeclared students). Medical students must submit the form to the Curricular Affairs Office in the School of Medicine. Law students must visit the School of Law Registrar's Office to obtain and submit the withdrawal form. This form serves two purposes: (1) a refund of tuition and fees, if applicable (see the Tuition and Fee Refund (p. 33) section); and (2) automatic withdrawal from classes.

The effective date of withdrawal is used in determining the percentage of tuition and fees to be refunded. This date is normally the date that the student submits the form to the appropriate dean for approval.

A W grade, indicating "withdrawal," will be recorded for each course in which enrollment is withdrawn if the student's effective date of withdrawal is after the end of the sixth week of classes. (See W grade in the Grading System section.)

A graduate student in good academic standing who wishes to withdraw and intends to return within one year should submit both the Withdrawal

form and an application for a Leave of Absence. Further information appears in the Graduate Division section.

New undergraduate students are encouraged to seek advice from their admissions or academic counselor to understand the consequences of withdrawal and their eligibility to return.

If an undergraduate student plans to leave the University after completing all academic work for the latest quarter of enrollment and has not paid tuition and fees for the next quarter, a formal notice of withdrawal is not necessary.

Lapse of Status

A student's status may lapse for the following reasons:

Failure to pay required tuition and fees by the prescribed deadline; failure to respond to official notices; failure to settle financial obligations when due or to make satisfactory arrangements with Campus Billing Services; failure to complete the admission health requirements; or failure to comply with admission conditions.

Each student who becomes subject to lapse of status is given advance notice and ample time to deal with the situation. However, if the student fails to respond to initial notices, action will be taken without further notice. A "hold" will be placed on all of the student's records and the student will be entitled to no further services of the University except assistance toward clearing the hold. A student must satisfy the conditions which caused the lapse of status before the hold can be cleared.

Enrollment at Other Institutions

Various programs exist that enable currently registered UCI students in good standing to take courses at other UC campuses, as well as at California State University and California Community College campuses. More information is available on the Registrar's Web site at <http://www.reg.uci.edu> and from the academic advising offices.

Enrollment in UC Irvine Extension (ACCESS UCI)

If a UCI student wishes to enroll in a UC Irvine Extension course concurrently with enrollment in regular courses, the entire program of study must be approved in advance by the dean of the student's school (the Dean of the Division of Undergraduate Education, for undecided/undeclared students; the Dean of the Graduate Division, for graduate students). Fee information is available from the UC Irvine Extension Registration Office.

Change of Major

Each school or program has its own standards for change of major. Once a student selects a major, or decides to change majors, the student should visit the academic advising office for their prospective major to obtain current information about prerequisites, program planning, and policies and procedures. For most majors, students may request a change of major by submitting an online application through StudentAccess. Further information and a list of excluded majors is available on the Registrar's Web site at <http://www.reg.uci.edu/request/changemajor.html>.

All schools with exceptional requirements have major-change criteria approved by the Academic Senate and published on the Division of Undergraduate Education Web site (<http://www.changeofmajor.uci.edu>). Students changing majors may meet the approved major-change criteria

of the unit they wish to enter that are in place at the time of their change of major or those in effect up to one year before.

Transcripts and Verifications

Retention of Student Records

The Registrar's Office maintains a permanent record of academic work completed by each student. Support documents for the academic record are kept for one year.

Students are strongly advised to carefully check their academic record quarterly. (Student copies of the academic record are available from the Registrar's Office shortly after the close of each quarter.) Discrepancies in the academic record should be reported to the Registrar immediately. After one year, it is assumed that the student accepts the accuracy of their academic record, and supporting source documents are destroyed.

Student academic records may not be changed after one year or, in some cases, in less than one year if Academic Senate regulations specify a shorter time limit. For example, the notation "NR," which means that no grade has been reported, must be removed within one quarter of subsequent enrollment or it will automatically be converted to the grade "F" (Fail), "NP" (Not Pass), or "U" (Unsatisfactory), whichever is appropriate. Similarly, an "I" grade (Incomplete) will convert to either an "F" (Fail), "NP" (Not Pass), or "U" (Unsatisfactory), whichever is appropriate, after remaining on the student's record for 12 months. Both policies are defined under Senate Regulation IR A345.

Transcript of Records

The official transcript of a student's academic record will be released only upon receipt of a signed request from the student authorizing the release. All outstanding debts to the University (with the exception of long-term financial aid loans not yet due and payable) must be paid in full before a transcript will be released. There is a \$13 fee for each official transcript. See the instructions on the Registrar's Web site at <http://www.reg.uci.edu>.

Requests for transcripts by anyone other than the student whose transcript is being sought can be honored only (1) if the request is accompanied by a written authorization signed by the student whose transcript is sought, and (2) upon approval of the Registrar.

Unofficial transcripts are available, free of charge, at the Registrar's Office, to students who present photo identification. Currently enrolled students can view their unofficial transcript in StudentAccess at <http://www.reg.uci.edu>.

Verification of Student Status

The Registrar's Office provides verifications of student status. Verifications may be needed for reference checks, bank loans, applications for good-student-driver insurance rates, and social security payments. There is a \$13 fee for each verification, however verifications for the purpose of student loan deferments are free of charge. (See the instructions on the Registrar's Web site at <http://www.reg.uci.edu>.) For verification purposes, enrollment in 12 units or more in regular sessions is considered full-time status; enrollment in 6.0–11.9 units is considered half-time status; enrollment in 5.9 units or less is considered less than half-time status. Enrollment in six units between all three summer sessions will be considered full-time.

Readmission

Undergraduate Student Readmission

Students are strongly urged to consider the readmission policy in formulating plans for leaving or returning to UCI. Every effort will be made to readmit UCI students who were in good academic standing at the time they ceased attending and who have filed readmission applications by the deadline.

Former UCI students seeking readmission must contact the academic advising office of the school or program which offers their intended major to initiate an electronic readmission application. A nonrefundable \$70 Application Fee will be applied to the student's ZOTBill.

Readmission is subject to dean's approval and campus deadlines (August 1 for fall quarter, November 1 for winter quarter, and February 1 for spring quarter).

New undergraduate students who cancel registration prior to the first day of the quarter must reapply to UCI; they are not eligible to file for readmission as described above.

If a student has been academically disqualified from the University or has left the University while on probation or is subject to disqualification, or has lost their student status, the student must apply for readmission.

Transcripts for courses taken at other institutions must be submitted to both the Office of Admissions and the academic advising office of the school or program which offers the intended major of the student applying for readmission.

Graduate Student Readmission

A graduate student who withdraws and has not been granted a leave of absence approved by the Dean of the Graduate Division is considered to have lapsed student status (i.e., no longer has student status). A student whose status has lapsed must re-apply to a graduate program and can resume graduate study only if readmitted. The online *Application for Graduate Study*, including the nonrefundable application fee, must be submitted by the published deadline for graduate admission applications. Refer to the statement on readmission which appears in the Graduate Division section for additional information.

Commencement

UCI Commencement ceremonies are held each June for all students who graduate any quarter of that academic year. The School of Law ceremony is held in May. The School of Medicine ceremony is held on the Saturday following Memorial Day. Additional information is available from the Commencement Office Web site at <http://www.commencement.uci.edu/>.

Application for Graduation. In order to receive a degree, an undergraduate student must submit an online Application for Graduation via the StudentAccess link at <http://www.reg.uci.edu> no later than the published deadline. Specific deadline dates for filing the application are established quarterly so that candidates' academic records can be reviewed to verify that all graduation requirements have been met. Students should contact their academic advising office for deadline and degree audit information.

Graduation *in Absentia*. Undergraduate students planning to graduate after a period of absence from the university must graduate *in absentia*. To graduate *in absentia*, the student must apply to graduate through StudentAccess. Upon degree certification, which takes place six weeks

after the end of the quarter, a Graduation *in Absentia* filing will be submitted on behalf of the student. The student will not be subject to tuition and fees. The student will be required to pay the readmission fee only if the period of absence was for more than one certifying term.

Graduate Hooding Ceremony. Students completing a Ph.D., Ed.D., or M.F.A. are eligible to walk in the Graduate Hooding Ceremony. Students are required to meet all filing deadlines (http://www.grad.uci.edu/academics/filing_deadlines/index.html) and satisfy degree requirements in order to participate in the ceremony. Registration for eligible students opens in March.

Diplomas. Students are advised by e-mail when their diplomas are available, which is typically three months after the quarter in which the student graduated ends. Students may pick up their diplomas at the Registrar's Office or authorize the Registrar to send their diplomas by USPS certified mail to domestic addresses, or USPS registered mail to addresses outside the United States. All outstanding debts due to the University, with the exception of long-term financial aid loans, must be paid in full before a student's diploma will be released.

Academic Regulations and Procedures

Except where noted, all information applies to both undergraduate and graduate students. Additional information concerning academic regulations applying only to graduate students is included in the Graduate Division (p. 106) section.

Grading System

Grade	Description
A ¹	Excellent (4.0 grade points per unit)
B ¹	Good (3.0 grade points per unit)
C ¹	Average (2.0 grade points per unit)
D ¹	Lowest passing grade (1.0 grade point per unit)
F	Not passing (no grade points)
I	Incomplete
P	Pass (equal to grade C or better)
NP	Not Pass (equal to grade C- or below)
S	Satisfactory (equal to grade B or better; graduate students only in courses designated by the Graduate Council)
U	Unsatisfactory (graduate students only in courses so designated by the Graduate Council)
IP	In Progress (restricted to certain sequential courses, so designated by the Subcommittee on Courses or Graduate Council, for which the final quarter grade of a multiquarter course is assigned to the previous quarter(s) of the sequence).

NR	No Report (given when an instructor does not submit final grades for a class or individual grades for students whose names appear on the official class roster; NR becomes an "F" (Fail), "NP" (Not Pass), or "U" (Unsatisfactory), whichever is appropriate, after one quarter of subsequent enrollment or at the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor may replace an NR with a grade within one quarter of subsequent enrollment or may authorize the student to drop the class, which would result in the NR becoming a W).
----	---

UR	Unauthorized Repeat. A UR notation is recorded for the grade when a student already has a passing grade for a nonrepeatable course and has taken it again.
----	--

W	Withdrawal. A W grade is recorded on a student's permanent record for each course a student drops after the end of the sixth week of instruction in a quarter. Courses in which a W has been entered on a student's record carry no grade points, are not calculated in the UC GPA, and will not be considered as courses attempted in assessing the student's satisfaction of the normal progress requirement.
---	---

¹ Plus and minus suffixes may be attached to the grades A, B, C, and D.

The academic record may not be altered except in those cases where a documented procedural or clerical error has occurred.

Grade Points and Grade Point Average

Grade points are assigned on a four point basis:

Grade	Grade Points
A	4 points per unit
B	3 points per unit
C	2 points per unit
D	1 point per unit
F and I	zero points per unit

Plus or minus suffixes modify the above by plus or minus 0.3 grade point per unit, with the exception of the A+ grade which is assigned 4 points per unit.

Requirements for a bachelor's degree include the accumulation of baccalaureate credit for a minimum of 180 quarter units with an average of at least C (grade point average of at least 2.0). A course at UCI normally offers four quarter units of credit, and, in the following text, the term "course" may be understood to carry four units. The grade point average is

the sum of all accumulated grade points (grade points earned in a course taken for a letter grade times the unit value of the course) divided by the sum of all units attempted. P, NP, S, U, NR, IP, and I grades, as well as workload credit, are excluded in computing grade point average.

Baccalaureate credit counts toward degree requirements and is used to compute the grade point average. Workload credit is used to determine full-time status for financial aid, housing, student loans, and other purposes. For most courses at UCI, baccalaureate credit and workload credit are identical. Courses differing in this credit or "workload credit only" courses are identified in the course description.

It should be noted that final grades as reported by instructors are normally permanent and final. An instructor may not change a final grade except to correct a clerical or procedural error. Clerical or procedural errors should be corrected within one regular academic quarter after the grade is assigned. No grade may be revised by reexamination or, with the exception of I and IP grades, by completing additional work. If a student is dissatisfied with a grade, the student should review their work with the instructor and receive an explanation of the grade assigned. A grade may be appealed on any reasonable grounds to the instructor, the chair of the department, and the dean of the school. If the matter is not resolved, the student may go for counsel to the Office of the University Ombudsman.

Under circumstances explained in *The Manual of the Irvine Division of the Academic Senate* (Appendix II: Student Academic Grievance Procedures Relating to Nondiscrimination), a grade may be changed if the Academic Grievance Panel has determined that the grade was assigned on the basis of discrimination.

Incomplete Grades

The grade Incomplete (I) is assigned when a student's work is of passing quality but is incomplete for good cause. The I grade may be replaced by a permanent grade, provided the student completes the course work in a way authorized by the instructor and within the time limits expressed. During the time allowed for replacing an I grade, the I grade will not be used in computation of a student's grade point average.

Beginning fall 2010, students assigned an I grade must complete the course work within the period set by the instructor, or within 12 months following the quarter in which the grade Incomplete was originally awarded, or prior to the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor is not obligated to allow the maximum time period. The student must consult with the instructor to determine how the Incomplete may be made up. It is strongly recommended that the student and the instructor prepare a written agreement specifying how the Incomplete can be made up and the deadline for doing so. Once the work is completed within the time agreed upon by the instructor, the student should ask the instructor to submit an Academic Record Change Request to the advising office of the school in which the course was offered. The student should not re-enroll in the course to make up the Incomplete. If the incomplete course work is not completed in the manner authorized by the instructor and within the time limits stated above, the I grade shall automatically be replaced with the permanent grade of F (Fail), NP (Not Pass), or U (Unsatisfactory), as appropriate in accordance to the grading option selected when the student enrolled in the course, and will be used in computation of the student's grade point average.

Students who have been assigned an I grade prior to fall 2010 have a maximum of 12 months following the quarter in which the grade Incomplete was originally assigned to complete the course work. However, in exceptional individual cases involving the student's prolonged inability to

pursue a course of study, extensions of up to two additional years may be granted by the instructor with the approval of the dean of the unit offering the course; students must petition for such an extension within 12 months following award of the I grade. The grade Incomplete assigned prior to fall 2010 will remain permanently on the student's record if the required course work is not completed in the manner authorized by the instructor and within the time limits stated above.

Pass/Not Pass

The Pass/Not Pass option is available to encourage students to enroll in courses outside their major field. Courses graded Pass or Not Pass are not included in computation of the grade point average which appears on a student's permanent record. However, if a student receives a Pass in a class, course and unit credit for the class is received, except as provided below. If a Not Pass is received, the student receives no credit for the class.

Some courses are designated by academic units as Pass/Not Pass Only. Students do not have the option of taking these courses for a letter grade.

The use of Pass/Not Pass is governed by all of the following provisions:

1. A student in good standing may take up to an average of four units per quarter on a Pass/Not Pass basis.
2. In addition, students may count a total of 12 units of courses designated Pass/Not Pass Only toward their graduation requirements.
3. A student who earns a grade of C (2.0) or better will have a Pass/Not Pass grade recorded as Pass. If the student earns a grade of C- or below, the grade will be recorded as a Not Pass, and no unit credit will be received for the course. In both cases, the student's grade will not be computed into the grade point average.
4. Courses taken under the Pass/Not Pass option may count toward the unit requirement for the bachelor's degree and toward the general education requirement. With the exception of courses designated Pass/Not Pass Only, courses taken Pass/Not Pass may not be used to satisfy specific course requirements of the student's school and major, unless authorized by the appropriate dean. No more than two courses applied to a minor may be taken Pass/Not Pass.

Graduate students may take one course (up to four units) per quarter on a Pass/Not Pass basis. However, such courses are not considered part of the student's graduate program, may not be applied to the requirements for an advanced degree, and do not count toward the minimum number of units for which a graduate student must enroll.

5. Changes to or from the Pass/Not Pass option can be made during the enrollment period. No changes can be made after the first two weeks of classes without the approval of the dean of the student's school. No changes in the Pass/Not Pass option can be made after the last day of instruction of the quarter.
6. A student on academic probation may not enroll in a course with the Pass/Not Pass option unless the course is offered on that basis only.

Satisfactory/Unsatisfactory Grades (Graduate Students Only)

Satisfactory/Unsatisfactory grading, unlike Pass/Not Pass, is not a student option. With the consent of the academic units involved, and upon approval of the Graduate Council, individual study and research or

other individual graduate work undertaken by a graduate student may be evaluated by means of the grades S or U. Also, with the approval of the Graduate Council, certain graduate courses are graded S/U Only. Additionally, the grade S or U may be assigned provisionally in each but the last quarter of a graduate course extending over more than one quarter. Upon completion of the last quarter, letter grades (A to F) replace such provisional grades. When a grade of S or U has been assigned on a provisional basis and the student does not complete all quarters of the course sequence, the instructor may assign a final letter grade or the grade of I to replace the S or U, or let the grade of S or U stand as a final grade. The grade S is defined as equivalent to a grade of B (3.0) or better. No credit will be allowed for work graded Unsatisfactory.

NOTE: When adding a course via WebReg, there is no option for S/U. In order to select S/U, students must first select the grade option and then, once the course has started, inform the professor of their preference for the S/U option, not a letter grade. (The Pass/Not Pass option does not correlate to the S/U option and should not be selected.)

Grades In Progress

IP is a transcript notation, restricted to sequential courses which extend over two or more quarters, indicating that the final grade for the individual quarters will not be assigned until the last quarter of the sequence is completed. The grade for the final quarter is then assigned for all of the previous quarters of the sequence. No credit is given until the student has completed the entire sequence. IP notations may be given only for courses designated by the Academic Senate Subcommittee on Courses or Graduate Council for use of this notation. IP notations are not included in computations of the student's grade point average and do not contribute to the number of quarter units completed.

Grades Not Reported

A No Report (NR) is assigned when the student's name was on the official class roster but the instructor did not submit a final grade. A student who receives an NR must immediately contact the instructor and arrange for the removal or replacement of the NR. An NR becomes an "F" (Fail), "NP" (Not Pass), or "U" (Unsatisfactory), whichever is appropriate, after one quarter of subsequent enrollment or at the end of the quarter immediately preceding award of the degree, whichever comes first. NR transcript notations are not included in computations of the grade point average and do not contribute to the number of quarter units completed.

Repetition of Courses

Undergraduate. Repetition of courses by undergraduate students not authorized by the Subcommittee on Courses to be taken more than once for credit is subject to the following provisions. Undergraduates may repeat courses only when grades of C-, D+, D, D-, F, or NP were received. (A C- earned before fall quarter, 1984, is not repeatable.) Unit credit for courses so repeated will be given only once, but the grade assigned at each enrollment shall be permanently recorded. In computing the grade point average of an undergraduate with repeated courses in which a C-, D+, D, D-, F, or NP (if repeated for a letter grade) was received, only the most recently received grades and grade points shall be used for the first 16 units repeated. In case of further repetitions, the grade point average shall be based on all additional grades assigned. Repetition of a course more than once requires approval in all instances of the School (or equivalent) in which the student is enrolled.

All courses which were originally taken for a letter grade must be repeated for a letter grade. Courses originally taken on a Pass/Not Pass basis may

be repeated for a Pass/Not Pass or for a letter grade if the course is so offered.

Information regarding the repetition of language other than English courses is available in the School of Humanities section.

Graduate. A graduate student may repeat only once a course in which a grade below B or a grade of U was received. Only the most recently earned grade shall be used in computing the student's grade point average for the first eight units of repeated work; thereafter both the earlier and the later grades will be used.

Duplicate Credit Prohibited. Other than the exceptions related to the repeat of deficient grades as noted above, and the exceptions related to Advanced Placement and International Baccalaureate Credit (p. 37), undergraduate and graduate students may not receive unit credit or earn grade points for college courses in which the content duplicates material of a previously completed course or examination for which the student has been granted college credit.

If a student repeats a course for which a passing grade has already been received and the course is not approved as repeatable for credit, the student will receive a UR and no credit will be given.

Satisfaction of the Writing Requirement

Students enrolled at UCI may take only UCI courses in satisfaction of the lower-division and upper-division writing requirements. Continuing UCI students may not take summer courses at another institution to satisfy lower-division or upper-division writing requirements. The two courses taken to fulfill the lower-division writing requirement must be completed with a grade of C or better (or a Pass or Credit grade equivalent to C).

1. Students who fail to attain a letter grade of C or better in WRITING 37 must repeat the course or enroll in the equivalent. It is recommended that these students enroll in WRITING 39A - WRITING 39B - WRITING 39C to assure completion of this requirement. Students who fail to attain a grade of C or better in WRITING 39C must repeat the course.
2. Students who fail to attain a grade of C or better in one or both courses of the WRITING 39B - WRITING 39C sequence must repeat the course or courses in question.
3. Students who fail to attain a grade of C or better in at least two quarters of the writing component of the Humanities Core Course after satisfying the UC Entry Level Writing requirement by attaining a grade of C or better in HUMAN 1AS/A, should substitute WRITING 39C if they need one quarter of additional work to complete the requirement, or WRITING 39B - WRITING 39C if they need two quarters to complete the requirement. Students who fail to attain a grade of C or better in HUMAN 1AS/A, enroll in HUMAN 1BS/A and attain a grade of C or better, but fail to attain a grade of C or better in the writing component of HUMAN 1C, should substitute WRITING 39C to complete the requirement.
4. Students who fail to attain a grade of C or better in either HUMAN 1AS/A or HUMAN 1BS/A, should substitute WRITING 39A - WRITING 39B - WRITING 39C to complete the requirement.
5. Students who fail to attain a grade of C (or Pass) or better in each quarter of a First-Year Integrated Program (FIP) sequence should see their academic counselor.

The course taken to fulfill the upper-division writing requirement must be completed with a grade of C or better (or a Pass or Credit grade equivalent to C). See the UCI Requirements section for further information. Majors

in the School of Biological Sciences, Physics majors, and Pharmaceutical Sciences majors who fail to attain a grade of C or better in each of the courses taken to satisfy upper-division writing should see their academic counselor.

Students who have not completed the lower-division writing requirement before the beginning of their seventh quarter at UCI will be subject to probation. Students transferring to UCI normally should have satisfied the lower-division writing requirement before entering UCI; if, however, they have not, they must complete it within their first three quarters of enrollment or they will be subject to probation. Academic English/English as a Second Language students must complete the lower-division writing requirement before the beginning of the seventh quarter following the completion of their AE/ESL courses or they will be subject to probation.

Credit by Examination

An enrolled student may obtain credit for course material previously mastered by taking a special examination administered by a faculty member who normally teaches that course. Detailed procedures for obtaining credit by examination may be obtained from the advising office of the school which offers the course. Approval of any petition for credit by examination must be obtained from the dean or designee of that school *before* the examination can be administered. After the dean has signed the petition, the student must have it validated by paying a \$5 Credit by Examination service charge at the Cashier's Office.

The instructor giving the examination retains the prerogative: (1) to decide whether the course can be taken by examination, (2) to determine the form such an examination may take, and (3) to stipulate whether the grade will be reported as Pass/Not Pass or as a letter grade (e.g., A, B, C, etc.).

A student may take the examination for a particular course only one time. After receiving the grade, the student may accept it or reject it. If the student is not satisfied with the grade received on the examination, the student may choose not to receive credit or a grade. If the student does choose to accept the results of the examination, grades and grade points (if applicable) will be entered on the record in the same manner as those for regular courses of instruction.

Independent Study: Undergraduates Only

A unique class option is available primarily to upper-division students at UCI. The independent-study option allows the student to plan with the instructor a course having a clear relationship to the student's academic program. The plan for the course will include a reading list, a group of assignments, examinations, papers, or similar evidence of intellectual achievement on which academic credit will be based. A description of the course and of its requirements must be approved by the instructor responsible for it and by the department chair or dean.

Final Examinations

Final examinations, or their equivalent, are obligatory in all undergraduate courses except laboratory and studio courses, as individually determined by the Subcommittee on Courses. Normally each such examination shall be conducted in writing and must be completed by all participants by the time scheduled by the Registrar for the quarter in question. These examinations may not exceed three hours duration. Special arrangements may be made for disabled students.

Examinations normally are not required in laboratory and studio courses. At its option, the department concerned may require a final examination subject to prior announcement in the *Schedule of Classes* for the term.

Final grades from professors are due in the Registrar's Office within 72 hours after the final examination.

Student Copies of Quarterly Grades

After each quarter, a complimentary copy of the student's permanent record is available from the Registrar's Office. On the copy, the student will find grades for all the quarters taken at UCI, a computation of grade point average at the University of California, and a list of the University requirements completed (UC Entry Level Writing, American History and Institutions).

Declaration of Major

All students are required to declare a major by the time they reach junior status (90 units excluding college work completed prior to high school graduation) or they will become subject to disqualification from further registration in the University.

Undergraduate Scholarship Requirements

Requirements for a bachelor's degree include the accumulation of credit for a minimum of 180 quarter units with an average of at least C (grade point average of at least 2.0).

Class Level

Undergraduate students are classified as freshman, sophomore, junior, or senior students, based on the total number of units completed, as follows:

Class	Units Completed
Freshman	0 - 44.9
Sophomore	45.0 - 89.9
Junior	90.0 - 134.9
Senior	135+

Course Load Limits

An undergraduate may enroll in as few as 12 units or as many as 20 units. To enroll for more than 20 units or fewer than 12 units, students must obtain the authorization of their dean or, for undecided/undeclared students, the Dean of the Division of Undergraduate Education. Information about the Reduced-Fee Part-Time Study Program is available in the Expenses, Tuition, and Fees (p. 28) section of the *Catalogue*.

Academic Standing

To remain in good academic standing a student must maintain a grade point average of at least 2.0 and make progress toward the degree at a satisfactory rate.

An undergraduate student normally is subject to academic probation if at the end of any quarter the grade point average for that quarter, or the cumulative grade point average, is less than 2.0.

A student whose grade point average falls below a 1.5 for any quarter, or who after two consecutive quarters on probation has not achieved a cumulative grade point average of 2.0 or a satisfactory rate of progress, is subject to disqualification.

Normal Progress Requirement

Regular undergraduate students will become subject to probation or to disqualification from further registration in the University if they fail to make normal progress toward the baccalaureate degree, if they fail to

declare a major by the time they reach junior status (90 units excluding college work completed prior to high school graduation), or after declaring a major, if they fail to follow the program of study required by the academic unit of their major. Students who have selected undeclared status within a school may be subject to probation or to disqualification if they fail to follow a program of study leading to completion of lower-division school requirements.

A. Normal progress for all regular undergraduate students is defined in the following table, in terms of quarter units completed at the end of quarters enrolled.

Quarter	Normal Progress	Subject to Probation	Subject to Disqualification
1	12-15	8-11	7
2	26-30	18-25	17
3	41-45	27-40	26
4	56-60	41-55	40
5	71-75	56-70	55
6	86-90	72-85	71
7	101-105	88-100	87
8	116-120	105-115	104
9	132-135	124-131	123
10	149-150	141-147	140
11	164-165	159-163	158
12	180	-----	-----

NOTE: This table is effective fall 2005. Students who began college prior to fall 2005 should consult their academic counselor.

B. Status Determination:

1. Undeclared students who have completed the number of units specified in the given quarter of their enrollment, as shown in the table above, and are following a course of study prescribed by their school are making "Normal Progress."

2. Students who have declared a major must follow the program of study required for their major, as well as complete the units specified in the given quarter of their enrollment, as shown in the table above, in order to make "Normal Progress." Students must declare a major by the time they reach junior status (90 units excluding college work completed prior to high school graduation).

3. Students who fail to make Normal Progress as defined in (1) or (2) above are subject to being placed on probation by the faculty of their academic unit or its designated agent, or for first-year undecided/undeclared students, by the Faculty Board for Undecided/Undeclared Students or its designated agent.

C. Students who have completed two consecutive quarters on academic probation without having achieved at the end of that period at least the normal rate of progress specified under (A) and (B) above are subject to disqualification.

D. For purposes of calculating "Normal Progress," "Subject to Probation," and "Subject to Disqualification," students admitted to the University with advanced standing will be classified with respect to quarter of enrollment at entrance in accordance with the following table:

Quarter at Entrance	Advanced Standing Quarter Units at Entrance
---------------------	---

1	0-14
2	15-29
3	30-44
4	45-59
5	60-74
6	75-89
7	90-104
8	105-119
9	120-134
10	135-149

E. Units earned under the following two circumstances are not to be counted toward determination of the quarter at entrance under (D) above: (1) Advanced Placement Examination; (2) concurrent enrollment in college courses while in high school.

F. UCI students will have the units and grade points of courses taken through Access UCI transferred to their record when they have been admitted or readmitted to regular student status. Units taken through Access UCI will not be counted toward determination of Advanced Standing Quarter Units at Entrance if they are taken under the circumstances cited in sub-section E.

G. The quarter of enrollment at entrance of students (including baccalaureate degree candidates who already hold a baccalaureate degree) seeking admission to the University with 150 or more advanced standing units will be determined by the faculty offering the curriculum in which such students seek to enroll. This determination will be made consistent with the program required for such students to obtain the desired degree and with University residence requirements.

H. For purposes of this regulation students will be understood to have declared a major when they have been formally accepted by the faculty of a degree-granting program or its designated agent to pursue a defined course of study leading to a baccalaureate degree.

I. All undergraduate students are expected to graduate when they have completed the baccalaureate requirements of their declared major or majors.

The Normal Progress requirement described above is not to be confused with the Normal Academic Progress requirement for Financial Aid. The former has to do with academic standing, the latter with receipt of financial aid.

Probation is not a necessary step before disqualification. If a student becomes subject to disqualification, the complete record of grades and other accomplishments will be carefully reviewed by the responsible faculty authorities of the student's school or, for undecided/undeclared students, by a faculty authority designated by the Faculty Board for Undecided/Undeclared Students. If the record indicates little probability that the student will be able to meet the academic standards of the University of California, the student will be disqualified from further enrollment. Faculties of undergraduate-degree-granting units and the Faculty Board for Undecided/Undeclared Students are obliged by Academic Senate regulations to maintain a procedure under which a student may contest disqualification actions.

In order to transfer from one campus to another in the University of California or from one UCI school to another, a student who has been disqualified or who is on academic probation must obtain the approval of

the appropriate faculty, or its designated agent, into whose jurisdiction the student seeks to transfer.

Credit Hour Unit Limit (Undergraduate)

A maximum of 216 units is permitted for all students in non-Engineering majors after their 12th quarter of study at UCI. For students in Engineering majors, the maximum number may not exceed 236 units after their 12th quarter of study at UCI. Students with Advanced Placement (AP) or International Baccalaureate (IB) credit may exceed the unit maximum by the amount of that credit.

After completing the maximum number of units, students may not normally continue their enrollment. Students wishing to exceed their unit or quarter maximums, including students pursuing multiple majors, may petition the associate deans of the impacted units (or their delegates) to continue work required to complete their degree.

Full-time transfer students admitted at the junior level are allowed no more than the equivalent of 9 quarters (10 quarters for Engineering majors), regardless of units.

Individual schools may impose additional requirements.

The maximum number of units or quarters does not include units completed at another institution prior to matriculation. After matriculation, work completed over the summer at any institution counts toward the specified unit limit but not the specified quarter count.

This regulation is effective for students who matriculate fall 2011.

Honors (Undergraduate)

Information about honors opportunities at UCI is found in the Division of Undergraduate Education section and the academic unit sections.

Quarterly Undergraduate Honors

Quarterly undergraduate honors are awarded in each school to students who achieve a quarterly grade point average of 3.5 or better in a minimum of 12 graded units.

Honors at Graduation

Of the graduating seniors, no more than 12 percent will receive academic honors: approximately 1 percent *summa cum laude*, 3 percent *magna cum laude*, and 8 percent *cum laude*. The criteria used by each school in selecting candidates for these honors are included in each school's section of the *Catalogue*. A general criterion is that students must have completed at least 72 units in residence at a University of California campus. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin Honors.

Graduate Scholarship Requirements

For a graduate student, only the grades A+, A, A-, B+, B, and S represent satisfactory scholarship and are accepted toward the graduate degree. Students are expected to maintain satisfactory academic progress at all times. Information concerning graduate student course load requirements and satisfactory academic progress is given in the Graduate Division section.

Credits From Other Institutions or University Extension: Undergraduate Students

UCI undergraduate students who plan to enroll in courses at another institution or University Extension in either a summer or regular session and to use such courses to satisfy any UCI requirements should first consult with and secure prior approval from the academic dean or chair of their major who will determine if the credits are applicable to major and general education requirements.

UCI undergraduate students *must* submit an official transcript of all course work earned at another institution or college to the Office of Admissions and Relations with Schools. If such courses are determined by the Office of Admissions and Relations with Schools to be transferable, do not duplicate other credit granted, and do not exceed limitations of credit, then the units earned may be applied toward the total required for graduation.

Beginning winter 2009, matriculated UCI undergraduate students can elect to have the full course record included on their academic transcript for all courses taken through UCI Extension. The full course record contains course title, academic department, course number, grade, and grade points earned. This option also pertains to Access UCI courses (Concurrent Enrollment) taken by students who are applying for readmission. The full course record can be transferred to their academic record when they have been admitted or readmitted to regular student status.

Credits From Other Institutions or University Extension: Graduate Students

In accordance with UC Academic Senate policy, graduate students may be granted unit credit (not grade credit) toward a master's degree for a limited number of acceptable graduate-level courses completed at another institution or through University Extension before enrollment in graduate study at UCI. To receive such credit, the student must submit a formal petition, including an original transcript, after enrollment in graduate study. Approval of the student's graduate advisor and the Dean of the Graduate Division is required. The petition may be downloaded from <http://www.grad.uci.edu/cascade/forms/index.html>.

While enrolled at UCI a graduate student may receive unit credit for graduate-level courses completed at another institution or through UCI Extension only with the prior approval of the student's graduate advisor and the Dean of the Graduate Division.

See the Graduate Division (p. 106) section for further information about graduate transfer credit and the University's Intercampus Exchange Program.

Supplementary Educational Programs

Summer Session and UC Irvine Extension

Gary W. Matkin, **Dean of Continuing Education, Distance Learning, and Summer Session**

Summer Session

Several summer sessions are held on the Irvine campus. The summer 2014 schedule is: Session I, June 23–July 30; Session II, August 4–

September 10; overlapping 10-week session, June 23–August 29. Summer Session offers over 800 courses and annually enrolls more than 11,000 students, most of whom are UCI matriculated students. Those who enroll in these sessions and take an academic program equivalent to a regular quarter may accelerate their progress toward a degree.

Courses offered include a wide variety from the regular session, supplemented by offerings available only during the summer, including an increasing number of online courses. Admission is open to all university students, high school graduates, qualified high school students who have completed their sophomore year by summer 2013, and community members. Admission to Summer Session does not constitute admission to a regular session of the University.

Freshman Summer Start Program

Incoming first-year students are invited to take part in the Freshman Summer Start Program. Students begin college during the summer when the campus is more accessible and relaxed. They will be part of a small, highly motivated group of incoming students and have an opportunity to become familiar with the academic rigor and social scene of UCI under ideal conditions of maximum opportunity and support. The program includes special workshops and sessions on various aspects of collegiate life, as well as the lecture series, *INSIDE UCI*, which provides an introduction to research projects and faculty. For more information, including Freshman Summer Start fees and schedules, contact the UCI Summer Session office at (949) 824-7649; e-mail: summer-freshman@uci.edu; <http://summer.uci.edu/fssp>.

Transfer Summer Start Program

Transfer students can begin their experience in the summer by taking part in the Transfer Summer Start Program, an innovative, experiential opportunity that provides a small community of transfer students with a rich academic, social, and personal foundation. Special workshops and sessions that help students adjust to the academic rigor and social scene of the University include getting to know faculty, career planning, leadership development, public speaking, and writing. The lecture series, *INSIDE UCI*, provides an introduction to research projects and faculty. For more information, including Transfer Summer Start fees and schedules, call (949) 824-7649; e-mail: transfer-summer@uci.edu; <http://summer.uci.edu/transfer>.

Visiting International Students

International students are welcomed to Summer Session, which is offered on an "open enrollment" basis. International students will need to demonstrate English proficiency with a TOEFL score of 213 computer-based, 550 paper-based, or 79 Internet-based (Summer Session also accepts the equivalent for the IELTS and TOEIC). Inexpensive on-campus housing is available to Summer Session students, as well as a full infrastructure dedicated to helping students succeed with their academic studies. Summer Session also offers students a full range of social activities to broaden and deepen their study abroad experience, and their awareness and understanding of the Orange County area and American culture. For more information, contact the UCI Summer Session Office at +1 (949) 824-4270; e-mail: internationalsummer@uci.edu; <http://summer.uci.edu/international>. (<http://summer.uci.edu/international.html>)

High School Students

Highly qualified high school students have two summer options to get an early start on college. Students who have completed their sophomore year of high school by summer 2013 and have an unweighted high school GPA of 3.0 or higher in college preparatory classes can apply

to the High School Summer Scholar Program. This program provides students with the opportunity to experience college-level course work and preview university life through a combination of academic course work and co-curricular activities. Alternatively, students meeting the same GPA requirements above can choose to enroll in any lower-division course (numbered 1–99) that does not have a special prerequisite. The grades and units earned in a Summer Session course will be calculated in the UC grade point average if the student should later be formally admitted to the University. For more information, contact the UCI Summer Session Office at (949) 824-6494; e-mail: summer-session@uci.edu; <http://www.summer.uci.edu/services/students/highschool/>.

UC Irvine Extension

UC Irvine Extension serves the continuing education needs of the community by providing more than 3,500 credit and noncredit courses, certificate programs, specialized studies, seminars, workshops, and lecture programs annually to more than 14,000 students. For a class list and schedule, visit <http://extension.uci.edu> or call (949) 824-5414 for a free quarterly catalogue.

Individual courses promote career advancement and lifelong learning, while certificate programs offer the opportunity for a distinctive achievement in a wide range of fields. Certificate programs are a sequence of courses designed to develop in-depth expertise to improve career opportunities. Extension offers more than 60 certificate and specialized studies programs in fields as diverse as information technologies, engineering, business, management, teacher education, medical product development, finance and investor relations, and paralegal. Classes are provided both online and on campus.

Customized Employee Education Programs

UC Irvine Extension's certificate and specialized studies programs are offered for the professional development needs of organizations and their employees. The Corporate Training unit of UC Irvine Extension engages with employers in Orange County, nationwide and globally, providing classes on site and online. Programs are developed following a free consultative intake process and needs assessment. For more information, visit <http://extension.uci.edu/corporate> or call (949) 824-1847.

Concurrent Enrollment: Access UCI

The general public also has an opportunity to take regular UCI courses without formal admission to the University, through Extension's Access UCI program (also known as concurrent enrollment). Courses are available on a space-available basis with the approval of the course instructor and/or academic department. Call (949) 824-5414 for more information.

Osher Lifelong Learning Institute

UC Irvine Extension supports programs of the Osher Lifelong Learning Institute, which offers a wide variety of educational and cultural programs for the retired or semi-retired intellectually active adult, all for one annual membership fee. Institute members are also eligible for a 30 percent discount on most Extension courses on a space-available basis. For more information, visit <http://extension.uci.edu/olli> or call (949) 451-1403.

Open Educational Initiatives

UC Irvine is a member of the OpenCourseWare Consortium (OCW), and was the first university on the west coast to join the group, committed to making higher education content freely available. UCI is one of a growing list of prestigious U.S. and international institutions supporting the open education movement, offering learning materials through a variety of

emerging channels including OpenCourseWare. UC Irvine's participation in these initiatives is consistent with its public and land-grant missions and its desire to play a significant role in contributing to the social welfare of the state, the nation, and the world. UCI's participation in open education showcases the University's top instructional efforts and makes course materials free for everyone in the world. Availability of the learning assets and course materials is significant for educators, students, and self-learners. For more information, visit <http://ocw.uci.edu>.

International Programs

International Programs offered through UC Irvine Extension prepare international students to pursue their educational objectives in U.S. colleges and universities, as well as provide opportunities for professional development. A full-time English program, offered four quarters per year, delivers courses in grammar, writing, reading, and vocabulary development. Topics in these speaking-and listening-focused courses include conversation and discussion strategies, note-taking, pronunciation, and public speaking. Elective courses such as TOEFL test preparation, business English, and idioms also are available. English language and business English courses are also delivered full-time in four-week sessions as well as part-time in the evenings.

To prepare international students intending to apply for admission to UCI's undergraduate or graduate programs, International Programs offers an International Undergraduate Preparation Program and International Graduate Studies Preparation Program.

Professional certificate programs for international students and professionals are offered in an accelerated full-time format. The fast-paced educational format helps individuals become more effective in their English communication skills and increases their career potential in today's competitive global business environment.

More information can be found at <http://extension.uci.edu/international> or by contacting International Programs, UC Irvine Extension, P.O. Box 6050, Irvine, CA 92616-6050; telephone (949) 824-5991; e-mail: uciesl@uci.edu.

An Academic English/ESL program is offered by the School of Humanities to students who are enrolled in degree programs at UCI. Refer to the section on Admission of International Students (p. 45) in this *Catalogue* for information.

ROTC

Qualified UCI students may participate in the Air Force Reserve Officers Training Corps (AFROTC) or the Army Reserve Officers Training Corps (Army ROTC). Additional information is available from the ROTC offices listed below, as well as from the UCI Office of Admissions and Relations with Schools and the UCI Division of Undergraduate Education.

Air Force Reserve Officers Training Corps (AFROTC)

Through arrangements with California State University, San Bernardino (CSUSB), Loyola Marymount University (LMU) in west Los Angeles, the University of California, Los Angeles (UCLA), and the University of Southern California (USC), students may participate in the Air Force Reserve Officers Training Corps (AFROTC) program. Aerospace Studies classes and Leadership Laboratories are conducted at various times during the week on the main campuses of CSUSB, LMU, UCLA, and USC.

AFROTC offers a variety of two-, three-, and four-year scholarships, many of which pay the full cost of tuition, books, and fees. Successful completion

of as little as four semesters of AFROTC academic classes and leadership laboratories can lead to a commission as a second lieutenant in the United States Air Force.

Classes consist of one hour of academics and two hours of laboratory for freshman and sophomores, and three hours of academics and two hours of laboratory for juniors and seniors. AFROTC cadets under scholarship and all juniors and seniors receive a monthly tax-free stipend and a textbook allowance. No military commitment is incurred until entering the last two years of the program (Professional Officer Course) or accepting an AFROTC scholarship.

For more information, contact the Department of Aerospace Studies (AFROTC) at one of the following universities: CSUSB at (909) 537-5440, LMU at (310) 338-2770, UCLA at (310) 825-1742, or USC at (213) 740-2670.

Army ROTC

The UCI Army ROTC program offices are located on the third floor of Natural Sciences I, room numbers 3122–3129; telephone (949) 824-8538 and -7581; Web site: <http://www.rotc.uci.edu>.

Army ROTC classes are taught at UCI. Physical training and field training are conducted at UCI and other local training areas. Two-, three-, and four-year Army ROTC programs are available to all qualified UCI students. Successful completion of the ROTC program leads to a commission as a Second Lieutenant in the U.S. Army (Active, Reserve, or National Guard). Two-, three-, and four-year competitive scholarships provide payment for tuition or room and board. Fee payments at UCI, payments for books, and stipends ranging from \$350–\$500 per month are also available. Qualified students currently serving in any Reserve or National Guard unit may transfer to the Army ROTC program to complete their commissioning requirements.

These courses provide workload credit only, not baccalaureate credit.

Courses

ROTC 10L. Military Science-Basic Leadership Laboratory. 0 Units.

Provides hands-on and practical military science material covered in the corresponding military science courses.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

ROTC 11. Military Science-Personal Development. 0 Units.

Focuses on life skills such as physical fitness, nutrition, and time management while providing an introduction to military knowledge, customs, and skills.

ROTC 12. Military Science-Leadership I. 0 Units.

Focuses on the fundamentals of leadership, Army leadership values, ethics, and counseling techniques.

ROTC 13. Military Science-Tactical Leadership I. 0 Units.

Focuses on leadership at the tactical level and includes instruction in fundamental military skills such as map reading, land navigation, squad and platoon operations, and resource planning techniques.

ROTC 21. Military Science-Team Leadership I. 0 Units.

Explores the dimensions of creative and innovative tactical leadership strategies and styles by examining team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

ROTC 22. Military Science-Team Leadership II. 0 Units.

Explores team dynamics and two historical leadership theories that form the basis of the Army leadership requirements model.

ROTC 23. Military Science-Tactical Leadership II. 0 Units.

Examines the challenges of leading tactical teams in the OE. Highlights dimensions of terrain analysis, patrolling, and operation orders.

ROTC 100L. Military Science-Advanced Leadership Laboratory. 0 Units.

Provides hands-on and practical exercises for the military science material covered in the corresponding military science courses as well as leader training through practical application of the Leadership Development Program.

Corequisite: ROTC 131 or ROTC 132 or ROTC 133 or ROTC 141 or ROTC 142 or ROTC 143 or ROTC 197.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

ROTC 131. Military Science-Leadership II. 0 Units.

Challenges cadets to study, practice, and evaluate adaptive leadership skills as they are presented with challenging scenarios related to squad tactical operations. Cadets receive systematic and specified feedback on their leadership attributes and core leader competencies.

Corequisite: ROTC 100L.

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.

ROTC 132. Military Science-Team Leadership III. 0 Units.

Provides cadets systematic and specific feedback on their leadership attributes and core leader competencies. Based on such feedback, as well as their own self-evaluations, cadets continue to develop their leadership and critical thinking abilities.

Corequisite: ROTC 100L.

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.

ROTC 133. Military Science-Tactical Leadership III. 0 Units.

Uses increasingly intense situational leadership challenges to build cadet awareness and skills in leading small units. Skills in decision-making, persuading, and motivating team members when "under fire" are explored, evaluated, and developed.

Corequisite: ROTC 100L.

Prerequisite: ROTC 11 and ROTC 12 and ROTC 13 and ROTC 21 and ROTC 22 and ROTC 23.

ROTC 141. Military Science-Leadership III. 0 Units.

Transitions the focus of student learning from being trained, mentored, and evaluated as a cadet to learning how to train, mentor, and evaluate cadets. Cadets begin to learn the duties and responsibilities of an Army staff officer.

Corequisite: ROTC 100L.

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133.

ROTC 142. Military Science-Leadership IV. 0 Units.

Requires students to continue to train, mentor, and evaluate underclass cadets. Cadets learn to safely conduct training by understanding and employing the Composite Risk Management Process and the Comprehensive Soldier Fitness (CSF) program.

Corequisite: ROTC 100L.

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141.

ROTC 143. Military Science-Officership. 0 Units.

Explores the dynamics of leading in the complex situations of current military operations in the OE. Cadets examine differences in customs and courtesies, military law, principles of war, and rules of engagement in the face of international terrorism.

Corequisite: ROTC 100L.

Prerequisite: ROTC 131 and ROTC 132 and ROTC 133 and ROTC 141 and ROTC 142.

ROTC 151. United States Military History-1607 to 1865. 0 Units.

Examines the creation of the American military establishment and traces its evolution in the context of the changing nature of warfare, the progression of military professionalism, and social, political, economic, and technological developments through the Civil War.

ROTC 152. United States Military History-1865 to 1945. 0 Units.

Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the end of the Civil War through World War II.

ROTC 153. United States Military History-1945 to 2001. 0 Units.

Examines the evolution of the American military establishment and the progression of military professionalism in terms of social, political, economic, military, and technological developments from the Cold War to the War on Terrorism.

ROTC 197. Military Science Independent Studies. 0 Units.

Provides intensive, individual study with scheduled meetings to be arranged between Cadre and student. Assigned reading and tangible evidence of mastery of subject matter required.

Repeatability: May be taken for credit for 12 units.

Life on Campus

Student-Produced Media

UCI students publish four Student Media products on campus, including the weekly campus newspaper entitled the *New University*, which is distributed every Tuesday in over 80 locations on campus, and may also be viewed online at <http://www.newuniversity.org>; operate a radio station, KUCI (88.9 FM), which is streamed online at <http://www.kuci.org>; produce *Anthology*, the award-winning UCI yearbook; and produce several Alternative Media newsletters and magazines.

The Hill

The Hill, bringing you “everything UCI and more,” is UCI’s bookstore, owned and operated by the University of California to serve the students, faculty, and staff of UCI. Located in the UCI Student Center, the Hill stocks all required and recommended textbooks (new, used, rental, and digital options), supplies, and examination materials. The Hill also houses general books of interest including UCI authors. To supplement the educational experience of the UCI community, the Hill produces an “Author Series.” This series attracts authors of local and national stature and supports the academic mission of the University by offering a venue for undergraduate and graduate students and faculty to read and discuss their works.

UCI Anteater clothing and gifts are featured in extensive varieties to boost school spirit and pride. The TechHub, the Hill’s computer store carries an extensive line of computers, software, and accessories. AntTech, the Hill’s technical services center, offers Apple Certified Mac Technicians who service Macs and PCs for our customers’ hardware and software support needs.

The Hill is open Monday through Friday from 9 a.m. to 9 p.m., and Saturday from noon to 5 p.m. The Web site is <http://www.thehill.uci.edu>; telephone: (949) UCI-Hill (824-4455); e-mail: thehill@uci.edu.

UCI Career Center

The UCI Career Center assists undergraduate and graduate students with internships, resume preparation, career knowledge, career decision-making, job search, interviewing, and the process of getting into graduate school. The Career Center staff is available to help students through individual counseling appointments and daily drop-in hours, to identify their skills and interests and learn how to apply them to future careers.

The Career Center provides opportunities for students to connect with employers, alumni, and professionals through workshops, career programs, and career and graduate fairs. UCI students can utilize ZotLink (the Career Center’s job listing service) to find internships, part-time or full-time jobs, and campus jobs. The On-Campus Interview (OCI) program provides an opportunity for students to interview for internship and full-time positions in the Career Center interview rooms. Students can access all job listings and OCI listings at <http://www.career.uci.edu>.

Students are encouraged to get career-related work experience in business, industry, nonprofit, and government fields. The Career Center sponsors the non-academic UCDC and Sacramento Internship Programs, where students can apply to be part of a summer internship experience in Washington, D.C. or Sacramento.

The Career Center is located on the Ring Mall across from the Student Center and is open daily from 8 a.m. to 5 p.m. Drop-in hours are 11 a.m. to 4 p.m. for career and graduate school questions or resume critiques; (949) 824-6881; <http://www.career.uci.edu>.

Child Care Services

Child Care Services includes six Centers offering programs for children from three months to 12 years of age. The programs are open to children of UCI students, faculty, and staff, with priority enrollment and tuition subsidy available to students at three of the Centers. For information contact (949) 824-2100; <http://www.childcare.uci.edu/>.

Counseling Center

The Counseling Center is the primary counseling and mental health agency for UC Irvine undergraduate and graduate students. Staff strive to assist students with academic success by developing dimensions of wellness. The Counseling Center provides short-term time-limited individual, couples, group, and family counseling, and also assists students with urgent care and some psychological testing. Psychiatric evaluation and intervention are available on a limited basis for students concurrently seen in therapy. A wide range of workshops related to interpersonal and developmental issues, including cross-cultural interaction, intimacy and friendships, interpersonal communication, and coping and resiliency are offered annually. In addition, the Counseling Center provides support to the University community through crisis intervention, training in mental health issues, and outreach and consultation services. The Center’s services are free of charge to currently enrolled students. Students with chronic and severe mental health issues needing long-term and extensive services are referred to other appropriate community providers. The Counseling Center is located on the second floor of Student Services I; (949) 824-6457; <http://www.counseling.uci.edu/>.

Campus Assault Resources and Education

Campus Assault Resources and Education (CARE) provides direct services and campus education for issues related to sexual assault, intimate partner violence, relationship health, stalking, and personal safety. The office provides consultation, individual and group counseling, and advocacy through legal and medical processes. CARE staff also provide awareness and prevention education through workshops and trainings, peer education programs, campus-wide events, and passive educational campaigns. Annual events include Take Back the Night, Denim Day California, Learning the Ropes, Yoga for Healing, and the Clothesline Project.

CARE is located at G320 Student Center. All services are confidential and free of charge. For more information call (949) 824-7273 or visit <http://www.care.uci.edu>.

Campus Recreation

UCI’s Campus Recreation provides programs and facilities for students, faculty, and staff to maintain an active, healthy lifestyle, and learn fun new skills. Campus Recreation offers seven program areas: Facilities, Fitness and Wellness, Intramural Sports, Club Sports, Recreation Instruction, Team Challenge, and Outdoor Adventure and Boating.

The Anteater Recreation Center (ARC) is a complete state-of-the-art sports and fitness facility featuring 20,000 square feet of strength and cardio space with 282 cardiovascular and weight machines, and more than 30 tons of free weights. In addition, there is a three-court gym, a rounded corner multi-use gym, an elevated running track, three racquetball courts, a rock climbing wall, lap and leisure pool, exercise testing, five multipurpose rooms, and a demonstration kitchen and classroom. The ARC Sports Field Complex includes 21 acres of lighted field and court surfaces. The lighted fields include space for four softball fields and six soccer/flag football fields. There are six lighted tennis courts and a recreational-size roller rink that are available for Campus Recreation programs and drop-in use. The two lighted basketball courts add to the basketball opportunities on campus. Registered students have access to

the facility with current UCI identification, and are not required to pay any additional membership fee.

Fitness and Wellness provides an assortment of opportunities for participants to begin or improve their fitness program including group exercise classes such as yoga and aerobics, as well as comprehensive health services such as personal training, fitness testing, and nutrition consulting. Campus Recreation staff will provide assistance with equipment orientation and various program goals in the strength and cardio rooms.

Intramural Sports are structured leagues which are designed for the "everyday athlete." All activities feature skill and competitiveness. Sports leagues include basketball, bowling, dodgeball, flag football, floor hockey, indoor and outdoor soccer, softball, volleyball, and many more. Special events and tournaments range from badminton, racquetball, and swimming, to table tennis, tennis, track, and wrestling. Registration begins on the first day of each quarter.

UCI Club Sports program presents a wide variety of student-initiated and student-managed sports. Students are able to learn a new sport, or participate in one they have been involved with in the past. Many clubs travel to compete against other universities across the southland area, and some travel nationally. Current UCI Clubs Sports teams include the following: Archery, Badminton, Biking, Crew, Equestrian, Fencing, Lacrosse, Brazilian Jiu Jitsu, Japanese Karate, Kendo, Taekwondo, Wushu, Roller Hockey, Rugby, Running, Sailing, Soccer, Table Tennis, Tennis, Triathlon, Ultimate Frisbee, Volleyball, Water Polo, Wrestling.

Recreation Instruction classes offer a variety of non-credit activity classes to students and ARC members. These classes range from the classic sports of golf, tennis, fencing, and swimming, to the more unique styles of martial arts like Jiu Jitsu and Muay Thai. An array of dance classes such as hip hop, salsa, and ballroom are also available. For UCI's culinary community there is an assortment of cooking classes held at the ARC Kitchen classroom every quarter. Students and ARC members can also earn their CPR or SCUBA certification through recreation instruction.

Team Challenge is UCI's official team building program. Teams can enjoy an exhilarating program on the Odyssey, a high-ropes challenge course located at the ARC fields. Customized and facilitated team programs are available on a reservation basis. Team Up! Programs, led by trained facilitators, teach communication, trust, and team work while providing participants with the chance to be outside, test their limits, and have fun as a unit. Team Up! is open to the campus and outside community.

The Outdoor Adventure and Boating program provides the UCI community with a mixture of outdoor recreational prospects which include sailing, rock climbing, kayaking, stand-up paddleboard, and seasonal outdoor adventure trips. The sailing program includes both sailing classes and the sailing club, UCISA. Classes range from beginning to advanced, and are offered quarterly. The sailing club is available for individuals who are interested in sailing on their own, as well as participating in various social activities with other sailors. The rock climbing programs take place on the 35-foot indoor rock climbing wall at the ARC and include classes and climbing memberships. Kayaking and Stand-Up Paddleboard lessons and trips are available throughout every quarter and take place at UCI's Crew Base in the Newport Back Bay. Popular outdoor adventure trips include the annual summer Yosemite backpacking trip and the Spring Break Service trip.

All UCI students and ARC members may register and participate in the preceding activities (Intramural Sports and Club Sports do have eligibility requirements). Up-to-date information including hours of operation,

membership, and fitness class schedules are available on the Campus Recreation Web site at <http://www.campusrec.uci.edu/>. Equipment such as basketballs, volleyballs, racquets, gloves, towels, and other items may be rented or purchased from the ARC's Gear Up, (949) 824-6401.

Additional information is available from Campus Recreation Services (second floor, ARC), 680 California Avenue; (949) 824-3738.

Student Life & Leadership

Student Life & Leadership offers diverse programs and services to students which complement and enrich the educational and out-of-class life of UCI students. This is achieved through a comprehensive range of cultural, social, and intellectual opportunities which promote student learning and development. For additional information contact (949) 824-5181; sl@uci.edu; <http://www.studentlife.uci.edu/>.

Central Offices

The central office of Student Life & Leadership houses a number of services. More than 600 campus organizations with a combined membership exceeding 16,000 students serve a wide range of interests including academic, environmental, faculty/staff, international, multicultural, political, recreational, religious, service, social, and sports. Web site: <http://www.campusorgs.uci.edu>.

The **Greek community** at UC Irvine is a diverse population comprised of over 45 fraternities and sororities that strive to uphold the oaths, values, and principles that they were founded upon. Over 2,200 undergraduate students, 10.75 percent of the undergraduate enrollment, make up the Greek population on campus and are active members in the UC Irvine and Greek communities. Three governing councils, Interfraternity Council (IFC), Panhellenic Association (PHA), and Multicultural Greek Council (MGC), represent the fraternities and sororities to the UCI campus and surrounding community. Fraternity and sorority members strive for high academic achievement and are honored by one of three Greek honor societies, Gamma Sigma Alpha, Rho Lambda, and Order of Omega. Throughout the year fraternity and sorority members raise money for philanthropic organizations and volunteer their time for service organizations. For over 30 years, the largest philanthropic event is **Greek Songfest**. It is a yearlong fundraising effort that culminates into fraternities and sororities paired together to perform 12-minute renditions of a Broadway musical, complete with sets, costumes, complex choreography, and lighting design. Recent benefactors of Greek Songfest have been the OC Food Bank, UCI Medical Center, and The Africa Project. Greek life is a great way to be involved and engaged on campus, and membership in the fraternity or sorority lasts a lifetime. Web site: <http://www.greeklife.uci.edu/>.

To assist students in becoming more effective leaders, Student Life & Leadership offers a variety of **leadership programs** and opportunities. The **All-University Leadership Conference** is the cornerstone of UCI's leadership offerings. This annual weekend program involves more than 220 emerging and established student leaders representing the full diversity of campus interest groups. The **Student Regent Recruitment Luncheon** is held during the winter quarter, prior to the application deadline. The current Student Regent informs interested candidates of the issues of the day and is available for questions and answers. The application for the Student Regent position is available online at <http://universityofcalifornia.edu/regents>. Information about leadership development programs is available from the Office of the Dean and online at <http://www.studentlife.uci.edu/leadership/>.

The **Administrative Intern Program** provides participating students with administrative and leadership experience designed to develop

personal and professional skills as well as to increase their knowledge of complex organizational structures. Approximately 25 students annually are assigned to campus administrative departments where they develop programs and projects. Academic credit is earned through participation in a weekly seminar entitled Administrative Internship (Management 198A-B-C; 4 units per quarter for a maximum of 12 units). Information is available online at <http://www.studentlife.uci.edu/leadership>; telephone (949) 824-5182.

The **Passport to Leadership Program** serves the entire student body with one of the most comprehensive leadership experiences on campus. The Passport program is geared toward giving students the one-stop shop for leadership education and experience. The Passport program includes Leadership certificates which are awarded by the Student Life & Leadership to participants who attend seven workshops. For additional information: <http://www.studentlife.uci.edu/train>.

The **University Affairs for Credit Course** (UNI AFF 1A-B-C) offers students an opportunity to work on campus projects with a University department to enrich their academic growth and development as well as the academic growth and development of UCI. Each student spends a minimum of 30 hours per quarter working on a proposed project under the supervision of a designated faculty or staff member. Students are required to write a three–five page paper at the end of the course addressing the following: (1) description of the experience or project; (2) the impact of the experience or project upon the campus; and (3) the effectiveness (personally and externally) of the experience or project. Students may enroll in University Affairs for Credit for a maximum of three times (or 3.9 units), and the course is graded Pass/Not Pass only.

New Student Programs provides assistance and information to students who are in the process of transitioning to UCI from high school or transferring from another college, and coordinates a variety of orientation programs. The *New Student Handbook*, a handy resource guide to UCI, is available at <http://www.newstudents.uci.edu/>. New Student Programs is located in Student Life & Leadership Office, (949) 824-5182.

The Office of the Dean of Students also is responsible for the campuswide administration of **student conduct** for both graduate and undergraduate students. Information is provided in the *University of California Policies Applying to Campus Activities, Organizations, and Students*, which is available from the Office of the Dean of Students at http://www.dos.uci.edu/conduct/uci_policy.php; (949) 824-5590; conduct@uci.edu.

A variety of other programs including the Welcome Week Anteater Involvement Fair and the Student Organization Recognition Night are coordinated through the Office. Additional information is available from Student Life & Leadership; (949) 824-5181; <http://www.studentlife.uci.edu/>.

Resource Centers

Student Life & Leadership provides support for a number of campus resource centers.

The **Cross-Cultural Center (CCC)**, established at UCI in 1974, was the first multicultural center instituted at any of the UC campuses. The CCC offers a friendly atmosphere and supportive environment for UCI's diverse student body. It provides meeting space and serves as a "home" for over 40 registered student organizations. Center facilities include two conference rooms and an executive boardroom for group meetings, lounges for socializing, a study room, and a computer lab. The annual Martin Luther King Jr. Symposium, the Rainbow Festival and Conference, and Deconstruction Week, all three-day programs that recognize and

reinforce UCI's commitment to ethnic diversity and social justice, are major programs administered by CCC. The Center also supports a variety of annual special events such as African Consciousness Quarter, Asian/Pacific American Heritage Month, Mez de la Raza, Native American Heritage Month, and Pilipino American History Month. In addition, CCC sponsors Alternative Break programs designed to engage students in service-related opportunities, as well as Volunteer Fairs that enable students to find unique opportunities in the community for service and volunteer projects. Involvement opportunities include the Reaffirming Ethnic Awareness and Community Harmony (R.E.A.C.H.) Program, the Intern Program, the Volunteer Program, Umbrella Council, and various multicultural leadership classes. For additional information contact (949) 824-7215 or visit <http://www.ccc.uci.edu/>.

The **International Center** contributes to the development of campus diversity and internationalization by providing services and programs to the UCI international population and the campus community. Core functions of the International Center include the following: provide expert immigration services, including visa documentation, interpreting immigration regulations and related advising, and SEVIS and immigration compliance; advising services to academic departments on issues related to the enrollment and visa selection for the employment of international students and scholars; serve as advocates for international students and scholars and as their liaison with institutional, local, state, and federal agencies; and provide pre-arrival advising, orientation, and adjustment assistance for international students and scholars and their families.

International Center programs include welcome and orientation sessions to provide an overview of immigration requirements and UCI resources to international students, scholars, and spouses. In addition, numerous programs, workshops, and information sessions are held throughout the year to assist international students and scholars and bring together internationals with domestic students.

International students and scholars at UCI on F-1 and J-1 visas and UCI-sponsored employment visas are required to report to the International Center upon arrival at UCI. All international students and scholars must be aware of their responsibility of maintaining their non-immigrant visa status as valid. Immigration regulations require that students and scholars maintain updated records at the International Center. These include submitting copies of visa documents to the International Center; maintaining valid I-20 or DS-2019, passport, and I-94 at all times while in the U.S.; reporting changes in name, address, and major to the International Center; and reporting early completion of the program or when the student is planning to withdraw or otherwise no longer will be enrolled at UCI.

For additional information contact the International Center, G302 Student Center, (949) 824-7249 or <http://www.ic.uci.edu>.

The **Lesbian Gay Bisexual Transgender Resource Center (LGBTRC)** promotes an open, safe, and inclusive campus environment for UCI's diverse lesbian, gay, bisexual, transgender, queer, questioning, intersex, and ally communities. LGBTRC provides programs, resources, and support services to raise awareness about lesbian, gay, bisexual, transgender lives and topics; to eliminate heterosexism, homophobia, and gender identity oppression; and to support the academic mission of the University. LGBTRC sponsors campuswide events, student activities, student volunteer and leadership opportunities, ally development programs, workshops and seminars for campus courses and organizations, and consultation regarding matters of policy related to sexual orientation and gender identity.

The Center is open Monday through Friday, 9 a.m. to 5 p.m., and is located in G301 UCI Student Center; (949) 824-3277; e-mail: lgbtrc@uci.edu; <http://www.lgbtrc.uci.edu/>.

The **Veteran Services Center** provides support services to veteran students, reservists, active duty service members, and eligible dependents of veterans. Assistance includes benefit certification, work-study, orientation, transition assistance, and outreach programs. Specialized services for veterans, reservists (including National Guard), and active duty service members include priority registration and guaranteed/priority housing. Students seeking these benefits must provide appropriate documentation, such as a DD214, contract, or military orders.

The Center is open Monday through Friday, 9 a.m. to 5 p.m., and is located in G304 UCI Student Center; (949) 824-3500; e-mail: veteran@uci.edu; <http://www.veteran.uci.edu/>.

Readmission due to military orders. If a student is called on military orders, the readmission fee will be waived. When readmitting, students should meet with their academic counselor to initiate the process and submit proof of their orders.

- **Procedures and Policies Pertaining to Students Receiving the California Veteran College Fee Waiver for Dependent of Veterans.** Dependents of veterans eligible for the California Veteran Fee Waiver may submit their eligibility letter from a County Veteran Service Office to the UCI Veteran Services Center. Once the letter is submitted, the student's tuition (including professional school fees) and registration fees will be waived; all remaining UCI fees are the responsibility of the student. Eligibility must be re-established for each subsequent academic year. The student must meet California residency requirements of UCI in order to receive these benefits.
- **Procedures and Policies Pertaining to Students Receiving Federal Education Benefits from the Department of Veterans Affairs.** Students eligible for Federal Education Benefits from the Department of Veteran Affairs are required to register with the Veteran Services Center which includes providing their Certificate of Eligibility in order to initiate the process to receive those benefits through UCI. All veterans, reservists, active duty service members, and dependents of veterans who receive these education benefits must be aware of their responsibility to register with this Center and submit a Veteran Intake Form and Quarterly Certification Form. Additionally, these students must communicate any changes of unit, enrollment status, or the receipt of non-punitive grades to the Veteran Services Center in order to be in compliance with VA regulations.
- **Veterans Affairs Academic Standing Requirement.** All students receiving U.S. Department of Veterans Affairs educational benefits must be in good academic standing. An undergraduate student with a cumulative GPA below 2.0 or a graduate student with a cumulative GPA below 3.0 for two consecutive academic quarters will have their VA benefits terminated. Benefits will be reinstated if and when the undergraduate student's cumulative GPA is 2.0 or above or the graduate student's cumulative GPA is 3.0 or above. (*This policy is separate and distinct from the UCI Normal Progress Requirement and the UCI Academic Standing Requirement. The Veterans Affairs Academic Standing Requirement has to do with the receipt of VA benefits.*)
- **Readmission for Disqualified Graduate Students.** Graduate students who are academically disqualified may be readmitted to the University with a recommendation from their academic unit and the Dean of the Graduate Division. See "Academic Disqualification" in the Graduate Division section of this *Catalogue* for more information.

- **Procedures and Policies Specific to Students Receiving the Post 9/11 GI Bill.** Students must submit the Quarterly Certification Form prior to the first of the month that tuition and fees are due. Failure to do so may not allow enough time for UCI to place a Financial Aid award for the student's percent (%) entitlement of benefits while waiting for the VA payment. This is currently a courtesy award and is subject to change at any time. If at any time the VA fails to pay any portion of the estimated amount placed into the student's account, the student will be held liable for the unpaid portion.

Disability Services Center

The Disability Services Center (DSC) provides and coordinates accommodations and services that enable UCI students with disabilities to maximize their educational potential. Students with varying disabilities, including those with mobility, visual, hearing, learning disabilities, and chronic health problems, may be eligible for reasonable disability-related accommodations through this resource center. Staff assists students from the point of their admission to UCI through graduation. Specialized services may include testing accommodations, priority registration, document conversion, adaptive equipment, assistive technology, note takers, interpreters, captionists, liaisons with faculty and campus departments, and information regarding disability advocacy in the university setting. The DSC provides adaptive computer technology and training. There is no cost to the student for the support services or accommodations provided by the Disability Services Center. Students are responsible for fully acquainting themselves with the detailed procedures for use of accommodations. These procedures are available on the Center's Web site at <http://www.disability.uci.edu>.

Students with disabilities may qualify for reasonable accommodations based on disability-related needs. Students must provide appropriate documentation about their disabilities to the Center. Documentation provided to the Center is confidential. It is the responsibility of the applicant or student to provide this documentation and, if necessary, to cover the cost for such documentation. This includes the cost for professional assessments for such disabilities as learning disabilities, attention deficit disorder, and psychiatric disabilities. Contact the Center or visit the Web site for more information about disability documentation requirements. In some cases there is need for recent or detailed documentation about the disability and/or periodic documentation updates. UCI reserves the right to determine the most effective and timely accommodations after consultation with the student about the disability and previous use of accommodations. The provision or use of a disability accommodation does not guarantee or ensure a certain level of achievement for the student. Students with disabilities must meet the same academic standards as all other students. Some academic accommodations may require approval of the chair or dean of the student's academic unit.

Students with disabilities who need accommodations (in particular, reading assistance, textbook conversion including e-text and Braille, American Sign Language interpreting services, real-time captioning services, and adaptive computing technology in campus laboratories) that must be planned or arranged in advance of the start of classes should contact the Disability Services Center as quickly as possible after admission to UCI. Failure to do so may delay or in some cases preclude the Center's ability to provide certain accommodations. This advance notice also allows the Center to document needs, discuss service procedures and student responsibilities, and determine the appropriate accommodations.

Additional information is available from the Disability Services Center; (949) 824-7494 (voice), (949) 824-6272 (TTY); e-mail: dsc@uci.edu; <http://www.disability.uci.edu/>.

Health Education Center

The UCI Health Education Center (HEC) strives to set the standard in collegiate health education by focusing on the unique and relevant health needs and concerns of UCI students. HEC staff educate students to make informed decisions that support their individual health, as well as a healthy campus environment, in order to uphold the academic mission of the University.

HEC staff promote healthy choices and behaviors by identifying the specific health needs of the campus; utilizing evidence-based education strategies; disseminating current and accurate health information; facilitating student development and leadership; and offering innovative campus programming. The HEC employs student staff and has trained peer educators, students involved in HEC's four student organizations, and other students participating in field study/practicum hours.

HEC staff and students present workshops, conduct trainings and classes, and consult with students on their health needs and concerns. Services also include anonymous HIV testing, a lactation station for nursing mothers, a gender-neutral restroom, and a wellness lounge. Visit <http://www.HealthEducation.uci.edu/> for more information.

Housing

On-Campus Housing

Housing Administrative Services coordinates application procedures and contracts for on-campus housing. Approximately 47 percent of UCI's student body is housed on campus. For more information, including housing rates for the 2013–14 academic year, visit <http://www.housing.uci.edu/>.

Undergraduate Housing

Residence Halls. Approximately 3,700 undergraduates live in UCI's two residence hall communities—**Mesa Court and Middle Earth**—which are within walking distance from the center of campus. Each community houses single undergraduates who are primarily freshmen between 17 and 20 years of age. The communities are composed of clusters of small, mostly coed buildings housing 48–75 residents in suite-style layouts. Student rooms feature cable television and Internet connections. Each hall has group study rooms, a living room for meetings or informal gatherings, a small kitchen, and card-operated laundry facilities. Both communities offer recreation rooms with video games, TV, and game tables; volleyball and basketball courts; and staffed computer labs.

Mesa Court and Middle Earth have complete food service and dining commons. Students who live in the residence halls participate in a prepaid meal plan. Meals are served three times daily on weekdays (with limited late night hours) and twice daily (brunch and dinner) on weekends. Menus offer a wide selection of foods, served cafeteria style, at self-serve cereal, deli, and salad bars, and at cook-to-order serving stations featuring cuisines from all over the world. For more information about meal plan options, visit <http://www.ucidining.com>. The halls close during the winter recess, and although they remain open during the Thanksgiving holiday and the spring recess, no meals are served.

Both Mesa Court and Middle Earth maintain a comprehensive residence life program, designed to help freshmen transition to college. Each hall has a live-in Resident Advisor who provides resources and support to

freshmen residents. In each community, special interest halls or hall clusters provide educational programs and informal opportunities to get together with other students who hold similar interests. Community-wide social programs are also offered.

Rates for the 2012–13 academic year (late September through mid-June) were \$13,550–\$13,910 for a single room, \$11,840–\$12,200 for a double room, and \$10,310–\$10,670 for a triple room. (Rates include room and board and vary by the meal plan selected.) Charges are paid in quarterly payments. Rates for 2013–14 will reflect an increase.

Campus Village is an apartment community located in the campus core, next to the Ayala Science Library. Campus Village serves both undergraduate and graduate students, in separate sections of the community. Undergraduate residents must be single, under the age of 25, and graduate student residents (including medical and law students, and excluding medical residents and interns) must also be single (and without children). Each two-bedroom apartment is shared by either four undergraduate students or two graduate students. Most units are furnished; all include a bathroom, carpeting, draperies, a stove, and a refrigerator. All apartments provide cable television and Internet connections. The Campus Village Community Center offers a variety of facilities and programs including a fitness center, recreation rooms, study rooms, and a computer lab with Internet access. Rates for the 2012–13 year-round contract (June–June), including utilities, were \$6,998 per student for a furnished apartment and \$6,254 per student for an unfurnished apartment. In 2013–14, Campus Village will offer academic year contracts (September–June) to newly enrolling students. The total contract rate for this option has not yet been established, but will be less than the 12-month contract. Graduate student housing rates for 2012–13 were \$700 per month per student (or \$8,400 for a 12-month contract). Rates for 2013–14 have not yet been established and may reflect an increase.

No meal plan is included in the housing contract, however students may purchase a voluntary meal plan through UCI Dining (<http://www.ucidining.com>). These rates also include utilities and reservation fees.

Arroyo Vista is a community of 42 academic theme, fraternity, and sorority chapter houses for single undergraduates under the age of 25. Each house contains 8, 12, or 16 furnished, double-occupancy rooms (bed, desk, and wardrobe closet for each resident). Residents share bathroom facilities on each floor, a spacious living room with fireplace, a study room, a fully equipped kitchen with dishwasher and microwaves, and laundry facilities. Some houses also offer a two-person suite with a private bathroom. All bedrooms in Arroyo Vista feature cable television and Internet connections. No meal plan is included in the housing contract. Students make their own meal arrangements, choosing to cook for themselves or to purchase a voluntary meal plan through UCI Dining (<http://www.ucidining.com>).

More than two-thirds of the houses are designated Academic Theme Houses, some of which are sponsored by academic programs. Theme houses offer educational programs that advance both a student's academic interests and overall University experience. The remaining houses are available to fraternity and sorority chapter organizations; consult individual Greek chapters for information. The rate for the 2012–13 academic year was \$5,543 for a double-occupancy room and \$6,920 for the two-person suite. Rates for 2013–14 will reflect an increase.

Graduate/Family Housing

Two on-campus apartment communities serve full-time graduate and medical students, and students with families (married, in a domestic partnership, and/or with custody of minor children). Both of those communities also serve undergraduates with families or who are single and 25 years of age or older. Single graduate students without children may also live in Campus Village apartments. Rental rates in all three communities tend to be lower than for comparable units in the local rental market.

Verano Place offers 852 one-, two-, and three-bedroom apartments. In 2012, Verano Place. All have carpeting, draperies, a stove, and a refrigerator and provide cable television and Internet connections. They are attractive and considerably lower in rent than comparable units in the local communities. Monthly rents for 2012–13 ranged from \$353–\$715 for single students sharing an apartment and from \$905–\$1,430 for families. Rates for 2013–14 will reflect an increase.

Palo Verde offers 652 apartments for full-time graduate students (single students, students who are married or in a domestic partnership, and those with families). All apartments have carpeting, draperies, a stove, and a refrigerator and provide cable television and Internet connections. Monthly rents for 2012–13 ranged from \$552–\$1,016 for single students sharing an apartment and from \$771–\$1,656 for families. Rates for 2013–14 will reflect an increase.

Campus Village is a mixed community, serving both graduate and undergraduate students who are single (and without children). Refer to the Campus Village section above for more details. The 2012–13 monthly rental rate for graduate students living in Campus Village was \$700. Rates for 2013–14 will reflect an increase.

To Apply

Housing information and application instructions are available online at <http://www.housing.uci.edu>. Undergraduates apply for housing online via the Admissions Web site after receiving admissions notification and submitting their *Statement of Intent to Register* (SIR). Graduate applicants can also find housing information and a link to the online application on the Housing Web site. A \$20 nonrefundable processing fee must accompany the housing application when it is submitted.

Two years of on-campus housing are guaranteed to all freshmen, and one year of on-campus housing is guaranteed to transfer undergraduate students who are single, under the age of 25, enrolling for fall quarter, and who meet the housing application and contract deadlines. To qualify for this guarantee, students must apply for housing and submit their *Statement of Intent to Register* (SIR) by the stated deadlines: May 1, 2013 for freshmen, and June 1, 2013 for transfer students. Applications received after these dates will be handled in the order received, as space becomes available.

The University of California, Irvine guarantees an offer of on-campus housing to newly admitted fall 2013 Ph.D., M.F.A., and J.D. students. Housing offers will be for one of six graduate housing communities and must be accepted prior to the first day of classes. Guaranteed housing extends until a student's normative time to degree for their academic program. Newly admitted students apply for housing online beginning March 1, 2013. Guaranteed students must apply by 4:30 p.m., May 1, 2013, and will be notified of their housing community assignment by mid-May. Non-guaranteed students can apply at any time to get on the housing wait-list.

Students who are eligible service members, reservists, and veterans are guaranteed an offer of on-campus housing. Contact the UCI Veteran Services Center for information, (949) 824-3500 or <http://www.veteran.uci.edu>.

Alternative Housing on the UCI Campus

Vista del Campo, Vista del Campo Norte, Camino del Sol, and Puerta del Sol Apartments—four on-campus privately owned complexes managed by American Campus Communities—offer furnished apartments with individual leases for UCI students who are single or married/domestic partners without children. Vista del Campo, Vista del Campo Norte, and Puerta del Sol house both undergraduate and graduate students. Camino del Sol is an undergraduate community. Find links to each community Web site at <http://www.vistadelcampo.com> or call for information: Vista del Campo, (949) 854-0900; Vista del Campo Norte, (949) 856-4600; Camino del Sol, (949) 737-7000; or Puerta del Sol, (949) 737-7017.

Housing Administrative Services

Services are available to assist students during the application and contracting process, as well as those looking for off-campus housing. The Anteater Housing Network, an online housing and roommate finder, provides easy access to listings of local rental properties, as well as message boards to find roommates, sublets, buy/sell furniture, and more. Students must log in with their UCI NetID and password to view listings. The *Living Around UCI Guide* contains a wealth of information for first-time renters and those new to the area, including a local directory for shopping, banking, utility companies, and other services. For more information, contact a Housing Advisor at (949) 824-6811, send e-mail to housing@uci.edu, or visit <http://www.housing.uci.edu/och/>.

UCI Hospitality & Dining

From a quick bite to eat to an elegantly served catered meal, UCI Hospitality & Dining Services is here to serve the campus community's dining needs, offering a variety of locations to fit one's palette.

Locations are conveniently situated throughout the campus to serve your dining needs. At the Student Center dining options include Subway, Wendy's, Panda Express, Jamba Juice, Bene Pasta, Topio's Pizza, Organic Greens-to-Go, and Wahoo's Fish Tacos. Starbucks and Zotn' Go convenience store are located just outside the Student Center, and the C3 convenience store is located by Social Sciences Lecture Hall. BC's Cavern Food Court and Subway are located at Biological Sciences, adjacent to Aldrich Park. Cyber A Café can be found in the Claire Trevor School of the Arts neighborhood, and Café Med and Med Ed Café are located by the School of Medicine. Java City is located at Engineering Quad, and Espresso Yourself coffee cart is located in the Berkeley Place courtyard.

Residential Dining commons include Pippin, Mesa, and Brandywine. All three locations have theme nights, award-winning chefs, made-to-order meals, and vegetarian and vegan options. Mesa and Brandywine offer a late night menu Monday through Thursday until 11 p.m. In addition, Pippin and Mesa Commons feature Provisions-On-Demand mini markets inside to accommodate students' last minute needs or cravings.

UCI Catering provides a comprehensive list of menu items to choose from or the option to design your own menu; both can be designed to fit your budget or needs. To view the menus, visit <http://ucicatering.catertrax.com> or call (949) 824-1423.

For more information visit UCI Hospitality & Dining Services in G318 Student Center, at <http://www.food.uci.edu>, or call (949) 824-4182.

UCI Student Center & Event Services

The UCI Student Center serves as a hub for campus life and for community engagement. With over 340,000 square feet of space, the Center is home to two food courts, a pub, a games room, a computer lab, a convenience store, study space, The Global Viewpoint Lounge, the Hill (UCI's bookstore), a blood donor center, banking institutions, and a Conference Center with a wide variety of flexible venue spaces. In addition, the Center houses campus offices and services including Associated Students, Student Life & Leadership, Housing, the Lesbian Gay Bisexual Transgender Resource Center, the International Center, and the Veteran Services Center.

The Event Services team, which consists of Certified Meeting Professionals and an experienced operations crew, coordinates approximately 70,000 events each year that are attended by members of the campus and surrounding community. An ACCED-I certified One-Stop-Shop, Event Services assists internal and external clients in coordinating all event production services while having one contract, one contact, and one bill.

For more information about UCI Student Center & Event Services, visit <http://www.studentcenter.uci.edu/>.

Student Government

Associated Students

All UCI undergraduate students are members of the Associated Students, UC Irvine (ASUCI). ASUCI is the student representative body that advocates to and is liaison between the UCI administration, faculty, and staff.

ASUCI is comprised of three branches of government: the Executive Branch (five elected members and over 60 appointed officer positions), Legislative Council (21 elected members), and the Judicial Board (seven appointed members). Guided by their constitution and by-laws, these student representatives manage the \$18 per student quarterly fee that supports student life activities, advocacy programs, academic programs, publications/communication, and professional support staff as well as essential campus services. For more information contact the Student Government & Student Media offices at (949) 824-2400; asuci@uci.edu; <http://www.asuci.uci.edu/>.

ASUCI Student Life Activities include annual events such as Shocktoberfest, Homecoming, Wayzgoose, Soulstice, and Reggaeifest. On-going events include such programs as "Noon Tunes," major concerts, comedy nights, "Rally Alley" spirit events before athletic games, spirit days, and weekly movie screenings. This organization also sponsors student educational programs such as the Visions Leadership class (1.3 units), Speakers & Debate series, UTeach, and the Anteater Mentorship Program.

ASUCI Advocacy programs include Elections (campus and local), Undergraduate Senate, External Affairs, College Legal Clinic, and the Lobby core seminar course (1.3 units), where students travel to Sacramento to represent student issues. The ASUCI Legislative Council nominates undergraduate students for positions on UCI administrative, Academic Senate, and ad hoc committees and ensures graduate students have a voice in policy and decision-making on the UCI campus.

ASUCI Services include the following:

Club and Organization Accounting: The ASUCI Business Office provides banking and accounting services to registered campus organizations.

Anteater Express: The Anteater Express shuttle program provides alternative transportation service to all students, staff, and affiliated members of the UCI community, with fixed shuttle routes to 60 designated stops on and off campus. The Express Shuttle carried more than two million passengers last year and facilitates campuswide efforts to reduce traffic and improve air quality while helping the UCI community access the services available on campus. For detailed information regarding services, routes, and schedules, see <http://www.shuttle.uci.edu>.

Vendor Fair: The Vendor Fair program is a student-run and managed program where students select local vendors and invite them to the UCI campus for one week approximately five times each year.

The Green Initiative Fund (T.G.I.F.): ASUCI manages The Green Initiative Fund (T.G.I.F.), which is a funding board that allocates money toward sustainable projects and educational programs on campus. Students voted to enact a \$3.50 per quarter T.G.I.F. fee to support this program in spring 2009.

The Student Programming Funding Board (S.P.F.B): The goal of this Board is to provide funding to campuswide programs coordinated by registered undergraduate organizations that enhance the quality of life, encourage school spirit, and promote social, cultural, and educational development.

Discount Ticket Program: ASUCI offers discount tickets to local attractions which include AMC theaters, Edwards/Regal cinema, Disneyland, Universal Studios, Magic Mountain, Sea World, Knott's Berry Farm, and more. Items is also the place where the official UCI Photo ID cards are issued. The program is located in the Student Government & Student Media offices near the Zot Zone and is open Monday through Friday from 8 a.m. to 5 p.m.; telephone (949) 824-7555.

Associated Graduate Students

All graduate and professional school students are members of the Associated Graduate Students (AGS). AGS works to improve the graduate student quality of life and functions as a liaison between graduate students and the UCI administration, faculty, and staff by addressing concerns and working to resolve grievances.

AGS also provides graduate students with numerous social and cultural events of benefit to the graduate community. In addition to hosting quarterly social events designed to create a sense of community, the organization allocates funds toward graduate student development and special projects.

The AGS Council nominates graduate students for positions on UCI administrative, Academic Senate, and ad hoc committees and ensures graduate students have a voice in policy and decision-making on the UCI campus. AGS also works on systemwide issues affecting graduate and professional students by membership in the UC Student Association (UCSA).

For more information, visit <http://www.ags.uci.edu/>.

Associated Medical Students

The Associated Medical Students (AMS) Council, along with the AGS Council, represents the medical student body in all matters relating to the UCI campus, the UC Office of the President, and the community.

Medical students are members of AGS and have access to those services. In addition, AMS utilizes a portion of the quarterly AGS fee to provide funding for medical student activities that benefit the School of Medicine community.

The Paul Merage School of Business Student Association

The School's Council, along with the AGS Council, represents the graduate Business student body in all matters relating to the UCI campus, the UC Office of the President, and the community. Graduate Business students are members of AGS and have access to those services. In addition, the School's Council uses a portion of the quarterly AGS fee to provide funding for student activities that benefit The Paul Merage School of Business community.

The Student Bar Association

All UCI Law students are members of the Student Bar Association at the University of California, Irvine School of Law. The Student Bar Association serves as a primary conduit for students to deliver concerns and contribute ideas to the administration. The Student Bar Association distributes funds to student groups to help members pursue their passions within the study of law. As the students, faculty, and administration work to build the law school of the twenty-first century, the Student Bar Association works to ensure that all students have the support and resources they need to excel.

Student Health Center

All students registered in a degree program are eligible to access services at the Student Health Center (SHC), located at the corner of East Peltason and Pereira Drive. The SHC is accredited by the Accreditation Association for Ambulatory Health Care (AAAHC).

Facilities and services at the Student Health Center include outpatient clinics staffed by certified, licensed medical, nursing, and dental professionals; a clinical laboratory; radiology; pharmacy; and insurance office. The SHC is open from 8 a.m. to 5 p.m., Monday through Friday.

General medical services offered at the SHC include primary care, women's health, and men's health, and can be accessed by appointment. Urgent matters and walk-ins are triaged immediately and care is provided as appropriate. Specialty services, available by appointment, include psychiatry, dermatology, gynecology, orthopaedics, sports medicine, ear/nose/throat, and minor surgery. The Nurse Clinic provides immunizations, health screening, and basic health education. The Dental Clinic offers basic dental examination, routine dental cleaning, restorative procedures (fillings and crowns), and selected specialty services.

Full health care services are available beginning on the first day of Welcome Week in the fall and continuing through the last day of finals week in June. Basic services continue in the summer as well. At the Student Health Center, service fees are generally lower than those of comparable services in the community. Students not enrolled in the University of California Student Health Insurance Plan (UC SHIP) will pay fees for services and may submit a claim to their insurance plans for reimbursement.

All undergraduate, graduate, law, and medical students are required to carry adequate health insurance. Those students who have private insurance which is equal or superior to the benefits provided through the University may be eligible to have the enrollment in UC SHIP waived. Additional information is available in the Expenses, Tuition,

and Fees section of this *Catalogue* and on the SHC Web site, <http://www.shc.uci.edu>. Admission health requirement packets are mailed to new and readmitted students as their names become available to the Student Health Center. All new students are required to file proof of tuberculosis screening, if requested, and proof of required immunizations with the SHC.

Although not required, all students are encouraged to have an updated physical examination to screen for health problems. The examination may be performed by the student's own physician or performed at the Student Health Center for a fee. Students transferring from another UC campus where their medical records are on file should have the records transferred to the UCI Student Health Center.

For the most up-to-date information about the Student Health Center, visit <http://www.shs.uci.edu/>.

Intercollegiate Athletics

UCI's Intercollegiate Athletic Program features 18 sports, with nine men's teams and nine women's teams. Men's sports include baseball, basketball, cross country, golf, soccer, tennis, track and field, volleyball, and water polo. UCI's men's teams compete in the National Collegiate Athletic Association (NCAA) Division I, and the University is a member of the Big West Conference. UCI also competes in the Mountain Pacific Sports Federation (MPSF) in men's volleyball and water polo. The UCI women's teams also are members of NCAA Division I and the Big West Conference, competing in basketball, cross country, golf, soccer, tennis, outdoor track and field, volleyball, and water polo. Women's indoor track and field competes in the MPSF.

UCI has captured 27 national team championships in nine different sports since opening in 1965, with 64 individuals winning national titles and 450 earning All-American honors. UCI has won 73 conference championships since 1977. Each spring, the University presents the Big West Scholar-Athlete Award to those student-athletes who maintained a 3.0 GPA over the previous three quarters. In the last 30 years, 3,616 UCI student-athletes have earned the award, including 113 in 2011–12.

In the past six years, UCI has finished in the nation's top five of the Division I-AAA All-Sports Trophy competition (recognizing athletic achievement among the nation's 95 Division I non-football schools). UCI has finished second the past two years and was first in 2007.

The mission of UCI Intercollegiate Athletics is to facilitate and enrich the education and personal growth of its students through their participation in competitive NCAA Division I athletics. Intercollegiate Athletics is committed to the welfare of student-athletes and staff, and advocates an environment that promotes excellence in athletic and academic performance, sportsmanship, diversity, and gender equity. Intercollegiate Athletics also supports the University of California's mission of public service and serves to generate a unifying spirit among students, faculty, staff, and alumni that transcends communities, cultures, and generations.

The Intercollegiate Athletic offices are located in the Intercollegiate Athletics Building (IAB); <http://www.ucirvinesports.com>; telephone (949) 824-6931.

Athletic Facilities

On-campus facilities include the Bren Events Center, which seats 5,000 for intercollegiate basketball and volleyball. The Crawford Hall complex also includes sports medicine, strength and conditioning, and student-athlete academic support services. Crawford Court gymnasium has 760

chair-back seats for volleyball. Outdoor facilities include Anteater Stadium, a 2,500-seat facility for soccer and track; the 500-seat Anteater Tennis Stadium; Anteater Ballpark, home to the baseball program; and a five-acre multipurpose field complex.

UCI's Anteater Aquatic Complex houses the intercollegiate water polo teams. This 64-meter aquatics facility is designed with a movable bulkhead and is large enough to accommodate multiple activities simultaneously.

Office of Research

John C. Hemminger, **Vice Chancellor for Research**

The mission of the Office of Research (OR) is to support, facilitate, and promote world-class research at the University of California, Irvine.

As its primary activity, OR works with other campus units to foster an environment for research and artistic activity that facilitates the discovery and dissemination of knowledge in many forms to all levels of society.

OR provides central campus administrative support for UCI's research programs. It includes Research Administration, the Office of Technology Alliances (OTA), University Laboratory Animal Resources (ULAR), Research Development, Administrative Operations and Information Technology, and the Office of the Vice Chancellor. Each of these units contributes to the overall objective of facilitating campus research activities. More information about the Office of Research and its mission may be found at <http://www.research.uci.edu>.

Below is a comprehensive list of research units that report (directly or indirectly) to the Vice Chancellor for Research.

Special Research Programs

Special Research Programs (SRPs) exist at UC Irvine to provide a structure for collaborative research activities that do not fit the definition and purpose of an Organized Research Unit, a Campus Center, or a School Center.

Beckman Laser Institute

The Beckman Laser Institute (BLI) was established in 1982 by Dr. Arnold O. Beckman and Dr. Michael W. Berns as an interdisciplinary center for the development and application of optical technologies in biology and medicine. Since the opening in 1986, Beckman Laser Institute has grown to include 18 faculty and their 130 affiliated students, postdoctoral fellows, technical staff, and administrative support. BLI is one of five national Beckman Institutes supported by the Arnold and Mabel Beckman Foundation. BLI is dedicated to cutting-edge interdisciplinary research and the interface of physical science, engineering, and biology. Because BLI also houses a medical clinic, it is unique in its capacity for conducting translational research that moves basic technologies rapidly from "benchtop to bedside." For more information visit <http://www.bli.uci.edu>.

California Institute for Telecommunications and Information Technology (Calit2)

Calit2 is a two-campus multidisciplinary research institute established by the State of California in 2000. One of four University of California Institutes for Science and Innovation, Calit2 is a partnership between academia and the business community. The Institute's unique research approach integrates academic intellectual capital across a wide range of disciplines with industry expertise. In collaboration with its sister division at UC San Diego, Calit2@UCI seeks innovative IT approaches that will benefit society and ignite economic development in the state and throughout the country.

More than 150 UCI faculty, 250 students, and 100 industry partners are actively engaged in Calit2 research areas that include the environment, transportation, emergency management, health care, education, and entertainment.

Calit2 also strives to prepare students for successful careers after graduation; the Institute's programs include SURF-IT, a summer undergraduate opportunity that immerses students in hands-on research, as well as a graduate fellows program that helps fund a select group of students doing multidisciplinary, IT-focused graduate work. For more information visit <http://www.calit2.net/>.

Institute for Clinical and Translational Science

The Institute for Clinical and Translational Science (ICTS) in the Office of Research is a uniquely transformative, novel, and integrative academic home for clinical and translational science with the resources to train and advance a cadre of well-trained multi- and interdisciplinary investigators and research teams. The Institute facilitates access to innovative research tools and information technologies to promote the application of new knowledge and techniques to patient care. ICTS assists basic, translational, and clinical investigators, community clinicians, clinical practices, networks, professional societies, and industry to develop new professional interactions, programs, and research projects. ICTS fosters a new discipline of clinical and translational science that is much broader and deeper than their separate components. The faculty members associated with ICTS are instrumental in supporting students in related advanced degree programs via their grants and other sources of financial support. ICTS consists of several units: Pilot and Collaborative Translational and Clinical Studies; Translational Technologies and Resources; Development of Novel Clinical and Translational Methodologies; Biomedical Informatics (including the Center for Medical Informatics); Design, Biostatistics, and Clinical Research Ethics; Regulatory Knowledge and Support; Participant and Clinical Interactions Resources; Community Engagement; and Research Education, Training, and Career Development. More information is available at <http://www.icts.uci.edu/>.

The Intel Science and Technology Center (ISTC) for Social Computing

Launched in June 2012, the Intel Center for Social Computing was established to conduct foundational research into the relationship between information technology and society. Centered at UCI, it brings together an interdisciplinary group of researchers from leading universities across the United States, including experts in social media, digital culture, user interfaces, cultural computing, and participatory design. Learn more at <http://socialcomputing.uci.edu/>.

Sue and Bill Gross Stem Cell Research Center

The vision of UCI's Sue and Bill Gross Stem Cell Research Center (SCRC) is to progress the understanding and therapeutic potential of stem cell science toward the improvement and relief of human disease. Development of SCRC is built upon the campus's long-standing strengths in neuroscience, developmental biology, and pharmacology, and benefits from faculty collaborations with other UCI Organized Research Units and Centers. Sue and Bill Gross Hall: A CIRM Institute was dedicated in May 2010 and is one of twelve buildings in the state funded by taxpayer support through the California Institute for Regenerative Medicine. "Gross Hall" is home to UCI's world-class faculty, clinicians, and training fellows in stem cell research, and will include a "federal-free" core lab facility outfitted with state-of-the-art equipment critical to human embryonic stem cell research. Visit <http://stemcell.uci.edu/> for more information.

Thesaurus Linguae Graecae®

The Thesaurus Linguae Graecae (TLG)® is a research project that was established at UCI in 1972, thanks to a gift by UCI alumna Marianne

McDonald. Its goals are to create a comprehensive digital library of Greek literature from antiquity to the present era; to conduct literary research using collected texts; and to apply technological innovation in these endeavors. The TLG® corpus currently contains more than 105 million words of Greek text from Homer (8 c. B.C) to the fall of Byzantium in A.D. 1453 and beyond.

TLG® research activities combine the traditional concerns and methodologies of philological and literary study with the most advanced features of computer technology. Included among current research foci are the identification of ancient Greek literary and documentary materials from various literary-historical periods; the conversion of these materials into digital form using modern methods of text encoding; the enhancement of automated text-correction routines; and the formulation of criteria for the lexical analysis and categorization of the texts in the corpus. The full corpus is available to more than 2,000 subscribing institutions and thousands of individuals in 58 countries worldwide.

TLG®'s library holdings enhance those of the UCI Langson Library, and TLG® conferences and scholarly visits afford faculty and students contact with eminent scholars in related fields. The Thesaurus Linguae Graecae® has made UCI a major source of Classics research activity. Visit <http://www.tlg.uci.edu/> for more information.

University of California Humanities Research Institute

The University of California Humanities Research Institute (UCHRI) is a multicampus research program of the University of California, serving all ten campuses in the UC system. Founded in 1987 and headquartered at the UC Irvine campus, the Institute promotes collaborative work representing different fields and institutions both within and beyond the University of California. UCHRI addresses topics in traditional humanities disciplines, as well as in new areas intersecting with social and natural sciences, technology, art, medicine, and the professions. Stressing interdisciplinary collaborative research, UCHRI bridges gaps between disciplines across the humanities and human sciences and seeks to overcome the intellectual and institutional barriers that can separate the humanities from other fields.

The Institute is also an integral part of the newly funded system-wide UC Humanities Networking Initiative. In this role, UCHRI provides support for the Society of Fellows in the Humanities and the Consortium of Humanities Centers. UCHRI is a founding member of HASTAC, the Humanities, Arts, Science and Technology Advanced Collaboratory, a consortium of humanists, artists, social scientists, scientists, and engineers committed to new forms of collaboration across communities and disciplines fostered by creative uses of technology.

UCHRI also administers the UC Consortium in California Studies; the Andrew Vincent White and Florence Wales White Graduate Student Scholarship supporting dissertation research in the humanities or theoretical social sciences and medicine; the UC-University Utrecht faculty collaborative research grants; and the annual summer Seminar in Experimental Critical Theory.

UCHRI, in partnership with Duke University, administers the Digital Media and Learning Competition, a \$2-million annual program funded by the MacArthur Foundation to award emerging leaders who use digital technologies to envision the future of learning.

For additional information, contact the University of California Humanities Research Institute, 4000 Humanities Gateway, Irvine, CA 92697-3350; (949) 824-8180; uchri@uci.edu; <http://www.uchri.org>.

Organized Research Units

Organized Research Units (ORUs) normally consist of an interdisciplinary group of faculty, students, and other researchers engaged in a continuing program of multidisciplinary or interdisciplinary research, supported by both University and extramural funding. The work of some ORUs is directed toward the solution of complex contemporary problems, while others conduct basic research essential to the understanding of natural or social phenomena or of humanistic ideas and expressions. The following ORUs have been established on the Irvine campus.

AIRUCI

AirUCI is a research team based at UCI focused on probing a new type of chemistry that occurs in the atmosphere at the interface between air and water. Funded by the National Science Foundation (Divisions of Chemistry and Atmospheric Sciences), AirUCI began in August 2002 as a Collaborative Research in Chemistry (CRC) group and was accepted as an ORU in July 2008.

Chemical reactions that play key roles in the formation of smog, acid rain, and in global climate change are known to occur between gases, as well as inside liquid droplets that are present in the atmosphere in the form of airborne particles, fogs, and clouds. Only recently has it been apparent that chemical reactions also occur right at the interface between air and these atmospheric droplets. Both the speed with which these interface reactions occur and the manner in which they take place may be quite different from reactions in either the gas or liquid. AirUCI's scientific team combines theory, experiments, and computer modeling of air quality to provide new insights into how this chemistry at interfaces impacts the atmosphere. More information is available at <http://www.chem.uci.edu/airuci/>.

Cancer Research Institute

The UCI Cancer Research Institute (CRI) is an Organized Research Unit dedicated to basic cancer research. The CRI has 55 faculty affiliates from departments in the Schools of Biological Sciences, Engineering, Medicine, and Physical Sciences. The CRI supports faculty research, organizes cancer-related training, and functions as the basic sciences arm of the UCI Chao Family Comprehensive Cancer Center. The CRI offices are located in Sprague Hall on the UCI main campus; Sprague Hall is a facility dedicated to research in cancer and genetics. Additional information is available online at <http://www.cri.bio.uci.edu/>.

Center for Embedded Computer Systems

The Center for Embedded Computer Systems, established as an informal center in 1998, was recognized as an ORU in 2001. The Center provides the organizational and administrative structure for researchers at UCI, UCR, and UCSD to conduct leading-edge interdisciplinary research in embedded systems, develop innovative design methodologies, and promote technology and knowledge transfer for the benefit of the individual and society. The research program focuses on three application domains: (1) Communications, including infotainment, information appliances, multimedia, personal imaging, and wireless; (2) Automotive, including collision avoidance, control/sensors, entertainment, and emergency services; and (3) Medical, including diagnosis, drug delivery, imaging, implanted devices, and monitoring. Additional information is available on the CECS Web site at <http://www.cecs.uci.edu/>.

Center for the Neurobiology of Learning and Memory

The CNLM was founded by faculty at Irvine including James L. McGaugh and Norman M. Weinberger. The 39 current Fellows include faculty from several departments at UCI, as well as from UC San Diego, UCLA, USC, Scripps, and Caltech. These faculty neuroscientists, together with professional and postgraduate researchers, graduate and undergraduate students, and visiting scientists from all over the world, form the research teams of the CNLM.

Center researchers have backgrounds and credentials in a variety of research disciplines (psychology, chemistry, anatomy, pharmacology, molecular biology, for example) that influence their approaches to the study of learning and memory. Using state-of-the-art neuroscience techniques, they investigate the formation, maintenance, and retrieval of memory at several levels of analysis, from studies of molecular and cellular processes in the brain to studies of memory in animal and human subjects.

In its 25-year history, the CNLM has educated a large number of graduate students and postdoctoral researchers, as well as many hundreds of undergraduates. Their research education prepares them to make their own contributions to this field of knowledge and to teach future generations of scientists. Former graduate students and postdoctoral researchers in the CNLM hold positions of leadership in neuroscience in many parts of the world. For more information visit <http://www.cnlm.uci.edu/>.

Center for Research on Immigration, Population, and Public Policy

The purpose of the UCI Center for Research on Immigration, Population, and Public Policy is to foster and conduct basic and policy-relevant research on international migration and other population processes, with a main focus on U.S. immigration. In order to encourage multi-investigator, multi-disciplinary, and interdisciplinary research projects, the Center organizes informal discussions of ideas for future research projects, "brainstorming" sessions about research funding opportunities, "brown-bag" presentations of research findings, and workshops and conferences. Much of the Center's research focuses on the multi-generational incorporation experiences of immigrant groups in the United States, especially those occurring in diverse contexts such as Southern California. More information is available at <http://www.cri.uci.edu>.

Center for the Study of Democracy

The Center for the Study of Democracy (CSD) fosters academic research and education to provide a better understanding of the democratic process, and the steps that may strengthen democracy at home and abroad. The faculty and students of the Center study both democratizing nations and the expansion of the democratic process in the United States and other Western democracies. The Center hosts research conferences, sponsors faculty research, publishes a research paper series, and facilitates research and teaching on democratic themes.

In 1995 the National Science Foundation selected UCI to establish a Graduate Research Traineeship on Democratization and Democratic Politics. University, foundation, and philanthropic support has continued this graduate education through the Democracy Fellows program. The formal course work and faculty mentorship of the training program draw upon faculty of the Center and build upon its present research and educational activities. In addition, graduate fellows in the training

program participate in the research activities of the Center. Visit <http://www.democ.uci.edu/> for more information.

Center for Virus Research

The Center for Virus Research (CVR) seeks to foster interdisciplinary scholarship, training, and research among virologists and other faculty. Research on viruses provides a biological and technological foundation from which much has been discovered concerning the basic molecular processes of organisms. Viruses supply some of the most useful experimental models for disease, cancer, immunity, and genetic systems of gene control. In addition, viral-based technology is being vigorously pursued and developed in the context of gene therapy and is teaching us much about the control of cellular processes. With the growing worldwide threat of emerging viral diseases, interest in virus research at all levels has intensified and has taken on a new global perspective. Previously separate disciplines such as molecular biology, pathogenesis, evolutionary biology, neurology, and radiological sciences can now be readily linked by virus research.

The CVR is also committed to advanced post-graduate training. In addition to shared facilities and the seminar and symposia series, the CVR oversees two training grants. Since graduate training in virology encompasses six departments in three schools, the CVR has also become the focus and administrative point for the organization of graduate virology courses and the virology track of the interdisciplinary graduate program in Cellular and Molecular Biosciences (CMB). Visit <http://cvr.bio.uci.edu/> for more information.

Genetic Epidemiology Research Institute

The Genetic Epidemiology Research Institute (GERI) was established in 2004 and brings together scientists from epidemiology, developmental and cell biology, molecular biology and biochemistry, evolutionary biology, genetics, immunology, statistics, bioinformatics, and environmental and behavioral sciences to answer complex questions that can best be explored through an interdisciplinary approach. GERI (1) combines epidemiologic approaches with basic science methods to test hypotheses related to genetic bases of the etiology and progression of disease; (2) facilitates research to apply newly discovered molecular biological processes and genetic characteristics in health and disease in well-characterized human populations; (3) provides epidemiological information that will influence the understanding of the basic processes leading to disease, such as environmental and lifestyle factors, and to test their effect as modifiers of genetic predisposition, thus providing the foundation for disease prevention; and (4) uses advances in information sciences and communication technology to allow for efficient data mining and pattern recognition for genetic epidemiological data. Visit <http://www.geri.uci.edu> for information.

Health Policy Research Institute

The Health Policy Research Institute (HPRI) is an interdisciplinary faculty research organization dedicated to improving the quality of care and reducing the disparities in health care. Through research, its faculty and associates translate scientific findings into practice by uniting clinical sciences with the social and behavioral science fields of economics, psychology, anthropology, sociology, and business. This unique platform provides the basis for HPRI's research results to directly effect health policy and the health of the local community and the public.

HPRI is committed to building the center into a nationally recognized focal point for health care research. HPRI has four principal functions: (1) to produce high-level health policy research in the areas of quality

of chronic disease care (i.e., diabetes, cancer, nursing home care) and reduce health disparities and improve quality of care for ethnic minorities; (2) to disseminate research findings to UCI's faculty and students through seminar series, meetings, and publications; (3) to serve as the research center for UCI graduate and undergraduate students who have health interests; and (4) to support improvements in patient health and safety and organizational improvements in the UCI health care system.

HPRI's achievement of these goals begins with its faculty—an interdisciplinary group of national leaders representing health services research, health economics, clinical epidemiology, psychometrics, and behavioral sciences in medicine. The current research led by HPRI's members and its campuswide collaborators enhance UCI as one of the best research universities in the country. Visit <http://www.healthpolicy.uci.edu/index.asp> for more information.

Institute for Genomics and Bioinformatics

The Institute for Genomics and Bioinformatics (IGB) provides an organizational structure for interdisciplinary research and training in genomics, proteomics, bioinformatics, chemoinformatics, and computational biology—emerging scientific disciplines that are revolutionizing biology, medicine, and society. IGB computational and life scientists are working together to pioneer fundamental processes for reverse engineering gene and protein networks to understand complex biological systems. Through these interdisciplinary collaborations, IGB scientists are creating new theoretical, algorithmic, and software advances in storing, retrieving, networking, processing, modeling, analyzing, navigating, and visualizing biological information. In turn, their computational and computer science accomplishments are providing methods, predictions, and new hypotheses that are driving biological research in previously unanticipated ways. This scientific cross-fertilization is enriching both fields and will continue to do so in the coming decades. More complete descriptions of the Institute's research and training programs are available at <http://www.igb.uci.edu/>.

Institute for Immunology

The UCI Institute for Immunology currently comprises 33 faculty members from the School of Biological Sciences and the School of Medicine, whose research and instructional efforts are in immunology. It integrates the immunological research and educational activities of multiple departments, including Molecular Biology and Biochemistry, Microbiology and Molecular Genetics, Physiology and Biophysics, Pathology, Medicine, and Neurology. The activities of the Institute extend to synergize with allied areas of research including biomedical engineering, public health, and physical rehabilitation. The major mandate of the Institute for Immunology is to consolidate and further the research and training/instructional efforts in immunology at UCI, thereby promoting the rapid development of world-class research and outstanding graduate and medical training programs in immunology. Visit <http://www.immunology.uci.edu/> for more information.

Institute for Mathematical Behavioral Sciences

The Institute for Mathematical Behavioral Sciences fosters research in the application of mathematical models and methods to describe and to better understand human behavior, both individual and social. Mimicking the successful interaction between mathematics and the physical sciences, a goal of the Institute is to generate successful interactions between mathematics and the behavioral and social sciences. The Institute sponsors specialized seminars and colloquia, a visiting scholars program, workshops, and focused research groups of faculty, students, and visitors, and it maintains a Technical Report Series. Participants include faculty

from the Departments of Anthropology, Cognitive Sciences, Economics, Logic and Philosophy of Science, Political Science, and Sociology in the School of Social Sciences; the Department of Mathematics in the School of Physical Sciences; the Department of Electrical Engineering and Computer Science in The Henry Samueli School of Engineering; the Donald Bren School of Information and Computer Sciences; and The Paul Merage School of Business. Additional information is available at <http://www.imbs.uci.edu>.

Institute for Memory Impairments and Neurological Disorders (UCI MIND)

The Institute is an Organized Research Unit dedicated to investigating the causes of Alzheimer's disease and related dementias and to improving the quality of life and promoting successful aging. The vision for The Institute for Memory Impairments and Neurological Disorders is to develop approaches for lessening the impact of memory-related disorders. Tackling these complex issues requires a multidisciplinary approach, which is reflected in the diversity of the Institute's faculty, who have primary appointments in the Schools of Biological Sciences, Information and Computer Sciences, Engineering, Medicine, and Social Sciences, and the Program in Nursing Science.

The Institute is one of 29 Alzheimer's Disease Research Centers (ADRC) supported by the National Institute for Aging, a branch of the National Institutes of Health, and is one of 10 Alzheimer's Disease clinical centers (ADC) funded by the California Department of Public Health. The mission of the ADC is to diagnose the needs of Orange County. Visit <http://www.mind.uci.edu/> for more information.

Institute for Software Research

The mission of the Institute for Software Research (ISR) is to advance software and information technology through research partnerships. ISR is dedicated to fostering innovative basic and applied research in software and information technologies. To achieve this goal, ISR works with established companies, start-ups, government agencies, and standards bodies to develop and transition technologies to widespread and practical application. The Institute also focuses on educating the next generation of software researchers and practitioners in advanced software technologies. It supports the public service mission of the University of California in developing the economic basis of the State of California.

Technical emphases of the Institute include software architecture, decentralized development and applications, event-based systems, open-source software development, game culture and technology, software processes, computer-supported cooperative work, human-computer interaction, user interface software, information visualization, privacy and security, ubiquitous computing, software understanding, requirements engineering, analysis and testing, extensible systems, configuration management, configurable distributed systems, Internet protocols and standards, and software engineering education.

Faculty members are drawn from throughout the University of California. Graduate research assistants, professional research staff, and visiting researchers complete the Institute's research body.

ISR supports research projects, sponsors professional meetings, and develops technology. To further its research agenda, the Institute sponsors a distinguished speaker series, technical roundtables, workshops, symposia, and special events. Effective partnerships with industry are essential for ISR to achieve its goals of technology development and transition. Corporate and institutional sponsorships

support ISR's research, activities, and professional meetings. Additional information is available at <http://www.isr.uci.edu/>.

Institute of Transportation Studies

The Institute of Transportation Studies (ITS), a University of California Organized Research Unit with branches at Irvine, Davis, and Berkeley, was established to foster research, education, and training in the field of transportation.

ITS research at the University of California, Irvine (UCI) involves faculty and students from The Henry Samueli School of Engineering, the School of Social Sciences, the School of Social Ecology, The Paul Merage School of Business, and the Bren School of Information and Computer Sciences. The Institute also hosts visiting scholars from the U.S. and abroad to facilitate cooperative research and information exchange, and sponsors conferences and colloquia to disseminate research results. ITS has a long and rich history of providing both direct and indirect support to the UCI transportation graduate programs. It provides office and research space to virtually all of the students enrolled in UCI's four graduate transportation programs—the interdisciplinary Program in Transportation Science; the graduate concentration in Transportation Economics; the Transportation Planning option in the Department of Planning, Policy, and Design; and the Transportation Systems Engineering graduate focus in the Department of Civil and Environmental Engineering. ITS provides extensive computing resources to all of these students, together with state-of-the-art simulation and laboratory facilities. ITS subscribes to the major transportation research journals and offers a variety of computer-based information retrieval services. More information about ITS can be found at <http://www.its.uci.edu/>.

Reeve-Irvine Research Center

The Reeve-Irvine Research Center (RIRC) is devoted to studying cellular and molecular mechanisms that underlie the response of the nervous system to injury, exploring innate and therapeutic regenerative capabilities, and developing treatments for spinal cord injury. RIRC has four principal investigators whose laboratories are located in the Center and whose research focuses on the use of rodent models (rats and mice) and related cell culture systems to study how the spinal cord responds to injury. A major focus is on enhancing the regeneration of damaged nerve fibers (axon regeneration) and on the use of stem cells for cellular replacement therapy. There are also 23 associate investigators whose laboratories are located elsewhere in the University who study the response to injury, neural repair, regeneration, and stem cell biology. Some of the associate investigators also carry out human-subjects research focusing on advanced functional imaging techniques, novel rehabilitative strategies including the use of robotics, advanced prosthetics, and associated devices that are capable of recording signals from the nervous system.

There are a number of potential targets for therapy for spinal cord injury, and RIRC scientists address many of these. Importantly, some of the most promising strategies, and the ones that are closest to clinical application, involve interventions during the acute post-injury period (days to weeks after the injury). However promising these strategies are, the Center is committed to the long-term goal of developing treatments to promote nerve regeneration and repair for individuals with chronic injuries, and this is reflected in the research programs of each investigator. More information is available at <http://www.reeve.uci.edu/>.

Campus Centers

A Campus Center provides a group of researchers with use of the "Center" title and a structure for its collaborative activities. The rationale for

establishing a Campus Center may include attracting greater recognition and extramural support for a research program at UCI and/or providing an infrastructure that promotes synergistic interactions between a group of researchers within a school or across schools. Directors of campus centers typically report to the Dean of their respective schools. More information about the following Campus Centers may be found by clicking on the "Research Centers and Institutes" link at <http://www.research.uci.edu/>.

Center for Asian Studies
Center for Demographic and Social Analysis
Center for Ethnography
Center for Global Peace and Conflict Studies
Center for Learning in the Arts, Sciences and Sustainability
Center for Organizational Research
Center for Pervasive Communications and Computing
Center for Unconventional Security Affairs
Center in Law, Society and Culture
Dr. Samuel M. Jordan Center for Persian Studies and Culture
Epilepsy Research Center
Newkirk Center for Science and Society
UCI Interdisciplinary Center for the Scientific Study of Ethics and Morality
Urban Water Research Center

Other Research Centers and Institutes at UCI

"Other" research units do not fit the definition of an Organized Research Unit (ORU), Special Research Program (SRP), or Campus Center, but are similarly interdisciplinary. These units may have been designated as Centers by a sponsoring agency such as the National Science Foundation (NSF) or the National Institutes of Health (NIH), or they may be part of an intercampus-consortium, such as Centers funded by the UC Multicampus Research Programs and Initiatives (MRPI) competition. More information about the following centers may be found by clicking on the "Research Centers and Institutes" link at <http://www.research.uci.edu/>.

California Center for Antiviral Drug Discovery
California Institute for Hazards Research
Center for Complex Biological Systems (CCBS)
Chao Family Comprehensive Cancer Center
Chemistry at the Space-Time Limit (CaSTL)
Digital Media and Learning Research Hub
Emerging Infectious Diseases
Institute for Complex Adaptive Matter (ICAM)
National Fuel Cell Research Center
Network for Experimental Research on Evolution (NERE)
Research Imaging Center (RIC)
Southern California Center for Galaxy Evolution
Susan Samueli Center for Integrative Medicine
Sustainable Transport: Technology, Mobility, Infrastructure
Sustainable Transportation Consortium
UC Center for Hydrologic Modeling
UC-Cuba Academic Initiative
UC Humanities Network: A New Humanities Initiative

Graduate Division

Frances M. Leslie, **Dean of the Graduate Division**

Overview

With the exception of programs conducted by the School of Medicine for the training of physicians, and the J.D. program in the School of Law, the Dean of the Graduate Division administers graduate education in accordance with academic policies established by the University of California, the Irvine Division of the Academic Senate, and the UCI Graduate Council, a standing committee of the Irvine Division of the Academic Senate. Graduate education includes those students engaged in the pursuit of a master's degree, a doctoral degree, or a teaching credential, as well as individuals engaged in postdoctoral training at UCI. There is no separate graduate faculty at UCI; all graduate work is supervised by academic units and faculty members who have concurrent responsibility for undergraduate education.

Information about graduate education at UCI is published here in the *UCI General Catalogue*, on the Graduate Division Web site, and in individual graduate program publications. The staff of the Graduate Division and departmental academic advisors are prepared to answer questions about admission, academic policies and procedures, graduate programs and degrees, financial assistance, student services, and other matters of concern to applicants or graduate students. The Graduate Division is located in 120 Aldrich Hall; (949) 824-4611; <http://www.grad.uci.edu/>.

The University of California believes that a diverse student and faculty population is integral to the advancement of academic excellence and is critical to promoting the lively intellectual exchange and the variety of ideas and perspectives that are essential to advanced scholarly research and debate. The University is committed to expand student outreach, recruitment, and retention efforts. Through the Graduate Division's diversity programs, steps are taken to increase the participation of diverse groups of U.S. citizens and permanent residents who have been educationally or socioeconomically disadvantaged.

It is the goal of UCI's Graduate Division to award fellowships to many admitted students based upon merit or financial need. In addition, diversity fellowships for new and continuing Ph.D. and M.F.A. students are based on demonstrated scholastic achievement, full-time status, U.S. citizenship or permanent residency, and socioeconomic and educational limitations. Each academic department identifies those students whose scholarship, background, and life experiences can best enhance the level of diversity within a department or discipline.

Admission to Graduate Standing

Applicants for admission to graduate study at UCI must apply for acceptance into a specific graduate program to work toward a specific advanced degree. A general requirement for admission is that the applicant hold the degree of Bachelor of Arts, Letters, Philosophy, or Science (or an acceptable equivalent) from an accredited academic institution with degree standards equivalent to those of the University of California. A minimum undergraduate grade point average of at least B (3.0 on a 4.0 scale) is required.

Each applicant's file is comprehensively evaluated by the faculty admissions committee of the applicant's specific graduate program on the basis of such factors as academic subject preparation, scholarship, letters

of recommendation, test scores, and examples of previous work. One critical evaluative question is whether the applicant's academic objectives can reasonably be satisfied by a particular graduate program on this campus. Please note that the University of California does not have the capacity to accommodate/admit all applicants who meet the minimum admission requirements.

Application Procedures

How to Apply

Prospective students should apply online using the *Application for Graduate Study* available at <http://www.grad.uci.edu/>. Detailed instructions are included in the electronic application. For additional information, send e-mail to grad@uci.edu or call (949) 824-4611.

The mandatory application fee is \$80 (\$100 for international students) and is not refundable under any circumstances. (Please note, however, that the application fee for M.B.A. programs offered by The Paul Merage School of Business is \$150.) Payment instructions are provided in the electronic application as well as on the Graduate Division Web site. Diversity program and/or financial-need-based application fee waivers may be available for a few domestic (U.S. Citizen or U.S. Permanent Resident) applicants.

When to Apply

For all graduate programs, applications should be completed and submitted by the respective program's stated deadline. Some programs have deadlines as early as December 1; others have deadlines of January 15, and still others may accept applications until March or thereafter. Some academic units may accept applications for winter or spring quarter admission for which deadlines are generally October 15 and January 15, respectively. In order to process applications in time for the applicant to receive full consideration, letters of recommendation, official transcripts, and official test scores must be received before the published deadlines. Some schools and departments have earlier or later deadlines for filing the application. Applicants should consult their prospective department or school for more detailed information. Contact information for the schools and departments may be obtained by visiting their individual Web sites or via the list of department and school contacts on the Graduate Division Web site at <http://www.grad.uci.edu/academics/degree-programs/index.html>.

Required Supporting Documents

Letters of Recommendation

Applicants should arrange to have three letters of recommendation forwarded directly to their prospective academic department or program. Recommendation forms are available for downloading at <http://www.grad.uci.edu/forms/index.html>. Only one set of three recommendation letters needs to be submitted in support of an application for admission and fellowship or assistantship consideration. It is important that letters of recommendation be completed primarily by professors or instructors in disciplines related to the proposed course of study who are in a position to analyze an applicant's abilities and academic promise.

Graduate Record Examination (GRE) Scores

All applicants are required to take the Graduate Record Examination (GRE) General Test, with the following exception: The Paul Merage School of Business requires that M.B.A. applicants take either the Graduate Management Admission Test (GMAT) or the GRE. Executive M.B.A. and Health Care Executive M.B.A. applicants are exempt from the

test requirement. Several programs also require, or strongly recommend, that an applicant report the score of a GRE Subject Test. There is no minimum GRE score. Applicants should register for either the October or December test dates to ensure the timely receipt of their score results for admission consideration. The GRE is administered by Educational Testing Services (ETS), <http://www.ets.org>. GRE scores that are more than five years old are not acceptable.

Domestic Academic Records

Domestic applicants should request that the official transcript be forwarded *directly* to their prospective academic department or program. One complete set of official records covering all postsecondary academic work attempted, regardless of length of attendance, is required. One official set of transcripts must also be submitted by applicants who attended or graduated from any University of California campus, including UC Irvine. Applicants with academic work in progress must expect to complete their undergraduate degree programs before the intended date of enrollment at UCI and must submit evidence of degree conferral before officially enrolling.

Foreign Academic Records

Official records from overseas institutions should be sent *directly* to the prospective academic department or program at UCI. Records of academic study from foreign institutions must be official, bearing the original signature of the registrar and the seal of the issuing institution. Applicants should not send the original of an academic record which cannot be replaced; they should obtain instead properly certified copies. Unless academic records and diplomas are issued in English by the institution, the official records in their original language must be submitted with an authorized, complete, and exact English translation. Foreign academic records must be in duplicate and include all subjects or courses taken on a yearly basis, together with the units of credit or time allotted to each subject each term or year and the marks or ratings in each subject or examination passed. In all cases the institutional grading scale or other standard of evaluation, including maximal passing and failing marks and definition of grades between them, should appear on official records or as an official attachment. Official evidence of degree conferral must also be supplied, together with evidence of rank in class if available.

Demonstration of English Language Proficiency for Admission

Applicants whose primary language is not English are required to demonstrate proficiency in English for admission consideration. A student may receive a waiver to the Test of English as a Foreign Language (TOEFL or TOEFL iBT) requirement for purposes of admission to a UCI graduate program if the student completed all of the requirements for their high school diploma, bachelor's degree, or an advanced degree in a country where the primary and/or dominant language is English, **and** where English was the language of instruction of the school where the requirements were completed. The TOEFL/TOEFL iBT requirement may be waived for **admissions purposes only**. In addition, this policy pertains to the minimum UCI campus admission policy for English Language proficiency. Individual departments may have stricter requirements than the minimum campus standard. Applicants should always consult the department in which they are interested for specific requirements.

Proficiency in English may be demonstrated by passing one of two standardized, internationally administered tests: TOEFL (the Test of English as a Foreign Language), or IELTS (International English Language Testing System). The applicant should take one of these tests at the earliest available date to ensure that the scores are reported in time to

meet application deadlines. Applicants will not be admitted provisionally if they lack an acceptable proficiency score or have not yet taken an acceptable proficiency examination.

The TOEFL is administered by Educational Testing Service (ETS), <http://www.ets.org>. The minimum score required for admissions consideration is 550 for the paper-based test; for the TOEFL iBT, the minimum required overall score for admissions consideration is 80. TOEFL and TOEFL iBT scores that are two years old or older are not acceptable. Results of institutional (non-ETS) administrations of the TOEFL or TOEFL iBT are not acceptable.

English language proficiency may also be demonstrated by passing the Academic Modules of the International English Language Testing System (IELTS) examination (<http://www.ielts.org>). The minimum requirements for admissions consideration are an overall score of 7, with a score of no less than 6 on any individual module. IELTS test scores that are two years old or older are not acceptable.

Demonstration of Oral English Proficiency for International Teaching Assistant/Associate Employment

Many UCI degree programs require students to serve as a Teaching Assistant for training purposes and as a graduation requirement. UCI encourages (and some individual graduate programs require) prospective students to take and pass one of the accepted oral English proficiency examinations prior to application/admission. International and U.S. Permanent Resident graduate students who are not citizens of countries where English is either the primary or dominant language as approved by the UCI Graduate Council, who wish to be considered for appointment as a Teaching Assistant/Associate, must pass one of the following English proficiency examinations: Test of Spoken English (TSE), Test of English as a Foreign Language Internet-based Test (TOEFL iBT), International English Language Testing System (IELTS), or UCI campus Speaking Proficiency English Assessment Kit (SPEAK) test. TOEFL iBT is administered by the Educational Testing Service (ETS). IELTS, on the other hand, is administered through the partnership of the British Council, IDP: IELTS Australia and the University of Cambridge ESOL Examinations. Once a student is admitted to UCI, the SPEAK test, which is administered by the UCI Humanities Instructional Resource Center (HIRC), is an option to satisfy this requirement. Achieving a minimum score of 26 on the speaking portion of the TOEFL iBT, a score of 8 on the speaking module of the IELTS, or a score of 50 on the SPEAK test satisfies the oral proficiency requirement and *may* establish eligibility for a Teaching Assistant/Associate appointment. Graduate students are responsible for ensuring that the UCI Graduate Division is notified directly of their scores by the testing centers. There is no exception to this requirement.

A full discussion of English proficiency options and links to the agency sites offering these examinations are available at <http://www.grad.uci.edu/admissions/applying-to-uci/english-proficiency.html>.

Students who are citizens of the United States (regardless of country of origin) and citizens of countries where English is either the primary or dominant language as approved by the UCI Graduate Council are exempt from the requirement of taking and passing the English language proficiency examinations. Non-U.S. citizens who are U.S. Permanent Residents or hold other non-citizen status and are residing in the United States, who have completed their undergraduate education in the United States, or have attended American schools abroad are *still* required to pass one of the English language proficiency examinations noted above in

order to be eligible for an appointment as a Teaching Assistant/Associate. International and U.S. Permanent Resident graduate students whose native language is not English, who have completed *all years of their high school education* in the United States, are eligible to request an exemption by submitting a request and official high school transcripts to the Graduate Student Employment Analyst in the Graduate Division. No student is permitted to begin an appointment as a Teaching Assistant/Associate until the exemption has been approved in writing.

Special Note to Foreign Applicants

If admitted, foreign applicants will be required to certify that they possess sufficient funds to cover all tuition, fees, transportation, and living expenses for the first year of their studies at UCI. A Confidential International Applicant Questionnaire for the purpose of verifying the amount and source of funds available for graduate study will be forwarded to foreign applicants upon admission to graduate study. The required financial verification must be provided before a visa can be issued.

Admission and Registration

A formal notice of the admission decision is sent to each applicant as soon as possible after the application and complete records are received, and after the department has made a recommendation. The official notification will be mailed well in advance of the beginning of the quarter for which application has been made.

Admission to graduate standing does not constitute registration for classes. A student is not officially registered for classes until the entire registration procedure is completed each quarter, including payment of Tuition, Student Services Fee, and other University fees, and enrollment in courses. Information on registration dates and procedures will be mailed to newly admitted students prior to the registration cycle. Extensive information for newly admitted students is available online at <http://www.grad.uci.edu/new-students/index.html>.

If an applicant wishes to defer admission to a later academic quarter (up to a maximum of three quarters after the original quarter of admission), the Graduate Division must be notified of the request in writing. After formal admission has been offered, the request for deferral must also be approved by the academic program to which the applicant was admitted.

Campuswide New Graduate Student Orientation

Incoming graduate students are strongly encouraged to attend the Campuswide New Graduate Student Orientation, held during the third week of September each fall. The Campuswide New Graduate Student Orientation covers all aspects of navigating graduate education at UC Irvine, including graduate student services. It augments school/department-based orientations, and students should attend both. Information about the Campuswide New Graduate Student Orientation is e-mailed to incoming graduate students the summer prior to the event. Inquiries may be directed to gradorientation@uci.edu, and details are available online at <http://www.grad.uci.edu/services/campus-wide-orientation/grad-orientation.html>.

Academic Advising

In each academic unit with an advanced degree program, there is at least one formally appointed faculty graduate advisor or director of graduate studies. The graduate program advisor is a regular faculty member responsible for supervising graduate study in that unit, for

monitoring the academic progress of graduate students, and for seeing that each graduate student is assigned a faculty advisor. The graduate student's research advisor is responsible for mentoring the student, which includes meeting with the student at least once during each quarter of enrollment and providing an annual assessment of each student's timely academic progress. The graduate program advisor plays a key role in the academic lives of graduate students, advising students and other faculty members about program requirements and the academic policies pertaining to graduate students, approving study lists, and evaluating academic petitions. In many academic units the graduate program advisor is instrumental in the nomination of students for fellowship support, the selection of students for assistantship and fellowship appointments, and in the supervision of graduate student teachers. In most schools there also is an associate dean for graduate studies who coordinates many of the functions which affect graduate students within that school. Both graduate advisors as well as deans are important links between the student and the Dean of the Graduate Division.

Most graduate students also will have an individual faculty advisor or advising committee after the first year of graduate study. When a student is advanced to candidacy for the Ph.D., the doctoral committee becomes the primary source of academic guidance; however, student academic petitions still must be approved by the faculty graduate program advisor.

Academic Policies

The academic policies described here apply to students enrolled in study leading to graduate degrees and California education credentials. Other regulations and procedures are covered in the Academic Regulations and Procedures (p. 83) sections, and in the description of each graduate program.

Academic Honesty

It is essential that all members of the academic community subscribe to the ideal of academic honesty and integrity and accept individual responsibility for their work. Students are urged to become familiar with the UCI Academic Senate Policies on Academic Honesty, available online at http://www.senate.uci.edu/senatweb/default2.asp?active_page_id=754, and in the *Catalogue's* Appendix. The policies apply equally to electronic media and print, and involve text, images, and ideas.

Scholastic Requirements

A graduate student is expected to make satisfactory progress toward an approved academic objective, as defined by the faculty of the program in accordance with policies of the Graduate Council, to maintain a satisfactory grade point average for all work undertaken while enrolled in graduate study, and to maintain academic progress within the required time to degree as established by the respective academic program. Satisfactory progress is determined on the basis of both the recent academic record and overall performance. A graduate student normally is expected to complete satisfactorily at least eight units of academic credit applicable to the graduate program in each regular academic session (unless on an approved leave of absence), and satisfy all requirements of the academic program according to an approved schedule. For a graduate student, only the grades A+, A, A-, B+, B, and S represent satisfactory scholarship and may be applied toward advanced degree requirements. However, a UCI course in which a grade of B- is earned may be accepted, via a formal petition process, in partial satisfaction of the degree requirements if the student has a grade point average of at least 3.0 in all courses applicable to the degree. Graduate students may not apply courses graded Pass/Not Pass toward any degree or satisfactory

progress requirements. A grade point average below the B level (3.0 on a 4.0 scale) is not satisfactory, and a student whose grade point average is below that level is subject to academic disqualification.

A student's academic progress ordinarily is evaluated on the basis of the academic record, time-to-degree, and the professional judgment of the faculty. A few weeks after the end of a quarter, an updated copy of each enrolled student's permanent academic record is available from the Registrar. This record lists all UCI courses for which a graduate student was enrolled (including courses taken through the Intercampus Exchange Program), the grades assigned, and the cumulative grade point average. This record also includes formal candidacy for an advanced degree, degrees conferred, certain examinations passed, unit credit accepted from other institutions, and other important academic information.

A graduate student who has not demonstrated satisfactory academic progress is not eligible for any academic appointment such as Reader, Tutor, Graduate Student Researcher, Teaching Associate, or Teaching Assistant, and may not hold a fellowship or other award which is based upon academic merit.

Satisfaction of Degree Requirements

To graduate, students must satisfy the degree requirements outlined in the *Catalogue* that is in effect for the quarter in which they are registering for a graduate program. If the degree requirements are subsequently revised, the academic unit may, where appropriate, give students the option to meet the new requirements instead. If degree requirements are revised between the time a student is admitted and the time a student registers, the unit should notify the student of the modifications in writing. A student who withdraws from a program, or loses student status for other reasons for one or more quarters, will be bound by the degree requirements in effect at the time of readmission unless otherwise stipulated and agreed to in writing by the academic unit and approved by the Dean of the Graduate Division. A student who defers admission or who changes to another program will be held to the requirements in effect at the time of first registration.

Grading

With the consent of the academic units involved, and upon approval by the Graduate Council, individual study and research courses at the graduate level may be graded Satisfactory or Unsatisfactory (S/U). Also, with the approval of the Graduate Council certain graduate courses are graded S/ U only. A grade of S is assumed equivalent to a grade of B (3.0) or better. No course credit is given to a student for a course in which a grade of U is received.

Graduate students may take one undergraduate course (up to four units) per quarter on a Pass/Not Pass basis. However, such courses are not considered part of the student's graduate program and are not applied toward the requirements for an advanced degree.

The grade Incomplete (I) is assigned when a student's work is of passing quality but is incomplete for good cause. The I grade may be replaced by a permanent grade, provided the student completes the course work in a way authorized by the instructor and within the time limits expressed. The student must complete the course work within the period set by the instructor, or within 12 months following the quarter in which the grade Incomplete was originally awarded, or prior to the end of the quarter immediately preceding award of the degree, whichever comes first. The instructor is not obligated to allow the maximum time period. When the course work is completed within the time allowed, the student must ask the instructor of the course to submit an Academic Record

Change Request to the Dean of the School in which the course is taught. During the time allowed for replacing an I grade, the I grade will not be used in computation of a student's grade point average. However, if the incomplete course work is not completed in the manner authorized by the instructor and within the time limits stated above, the I grade shall automatically be replaced with the permanent grade of F, NP, or U, as appropriate in accordance to the grading option selected when the student enrolled in the course, and will be used in computation of the student's grade point average. Graduate students who have not been continuously enrolled should contact their graduate advisor for information about completion of incomplete grades.

IP (In Progress) is a transcript notation restricted to sequential courses extending over two or more quarters for which use of the IP notation has been approved. When the last quarter of the sequence is completed, the grade for the final quarter is assigned for all quarters of the sequence. No credit is given until the student has completed the entire sequence.

A student who received an NR (No Report) transcript notation must immediately contact the instructor and arrange for the removal or replacement of the NR. If no action is taken by the end of the first quarter following the quarter in which the NR was assigned, or by the end of the quarter immediately preceding award of the degree, whichever comes first, the NR becomes an F, U, or NP and will remain permanently on the student's record.

A graduate student may repeat once a course in which a grade below B (3.0) or a grade of U was received. Only the most recently earned grade is used in computing the student's grade point average for the first eight units of repeated work; thereafter both the earlier and the later grades are used. Additional information about grading may be found in the Academic Regulations (p. 83) section.

Language Policy for Examinations and Theses/Dissertations

English is the language of instruction and examination for graduate courses at UCI, unless the subject matter includes foreign language content. Similarly, examinations that satisfy specific degree requirements, such as preliminary, comprehensive, qualifying/candidacy examinations and thesis/dissertation defenses shall be conducted in English, except for the portions of the examination where the subject matter makes a different language specifically appropriate. (Examples include foreign language literature, linguistics, and others.)

Students must seek permission to write their thesis/dissertation in a language other than English. To do so, immediately after advancement to candidacy, the candidate must submit to the Dean of the Graduate Division a letter approved by the thesis/dissertation chair, committee, and department chair. All members of the candidate's thesis/dissertation committee must have a reading knowledge of the language presented in the thesis/dissertation. There must be legitimate reasons for substituting English with a foreign language such as subject matter, special primary audience, publication arrangements, academic position in a foreign country, historical or literary value, or principal language(s) used in the documents to be analyzed and interpreted. **Inability to write in English is not a valid reason.** If the thesis or dissertation is approved to be written in a foreign language, the candidate must submit two abstracts. One must be in English. The other must be written in the language of the thesis or dissertation. Moreover, the thesis/dissertation defense will be conducted in English, except as determined by subject matter. See the *UCI Thesis and*

Dissertation Manual (http://special.lib.uci.edu/dissertations/uci_td.html) for information about the preparation of manuscripts.

Academic Disqualification

After consultation with the student's academic unit, the Dean of the Graduate Division may disqualify a student for academic reasons, including, but not limited to, having a grade point average in graduate and upper-division courses below 3.0 for two or more successive quarters; or failing to pass (or not taking) a required examination or course within the time specified for that graduate program; or not maintaining satisfactory academic progress toward completion of an approved program of study. Beginning with students entering in fall 2010, the Graduate Dean will not permit students to enroll past their programs' maximum time to degree (MTTD). Any exception request must be made in writing directly to the Graduate Dean and will be considered in cases involving extenuating circumstances beyond the student's control. The exception request must include a plan and timeline for completion of the degree, must be signed by the student's program advisor and Associate Dean, and must be submitted at least one quarter in advance of maximum time to degree. Note that leaves of absence of up to three quarters and time allotted for parental leave are not counted toward a student's normative or maximum time to degree.

Unsatisfactory academic progress may be determined on the basis of explicit requirements (as described above), but the professional judgment of the faculty upon review of all graduate work undertaken by the student is paramount. Ordinarily, a student whose work does not meet academic standards may be given written notice and a reasonable period of time in which to make up all deficiencies.

Prior to taking final action to disqualify, the Dean of the Graduate Division ordinarily will notify a student who is subject to academic disqualification and will provide reasonable opportunity for the student to correct erroneous or outdated academic records, to submit other information or comments in writing, or to request a second review of his or her academic performance.

Upon final written notice of academic disqualification by the Dean of the Graduate Division, disqualification will be noted on the formal academic record of that student.

Academic Residence

A graduate student is considered to be in residence during an academic quarter if at least four units of academic credit are earned in regular upper-division or graduate courses. Credit for one academic quarter of residence may also be earned by completing at least two units of credit in approved courses in each of two six-week summer sessions, or four units of credit in an eight- or ten-week summer session. In the case of Ph.D. students, these must be consecutive sessions.

Enrollment Policy

Full-time academic enrollment is expected of graduate students at the University of California. Study for the Ph.D. requires a full-time commitment from the doctoral student. Full-time study is defined as enrollment in at least 12 units of upper-division or graduate academic credit per quarter, including credit for supervised research or teaching. Graduate students may enroll in lower-division courses with the approval of their academic advisors, but such courses are not considered to be part of any graduate program.

Graduate students ordinarily may not receive credit for more than 12 units per quarter in graduate courses, or 16 units in upper-division courses, or a

proportionate number in combination. Course loads in excess of 16 units must be approved in advance by the student's Graduate Advisor.

Although in most instances completion of an advanced degree at UCI requires full-time study, the University recognizes the legitimate need for part-time study opportunities and is committed to providing those opportunities wherever possible. Graduate degree programs may be opened to part-time students wherever good educational reasons exist for so doing. In general, part-time status is available in master's and credential programs where part-time study has been judged academically feasible by faculty and approved by the Graduate Council. However, on the recommendation of the academic unit, students admitted to a Ph.D. program *may* be approved by the Dean of the Graduate Division for part-time status on an *ad hoc* basis. Under this policy, part-time enrollment at the graduate level is defined as enrollment for eight units or less. Within the guidelines and limitations noted on the application form available on the Graduate Division Web site, graduate students may petition for part-time status for a maximum of three consecutive quarters and, if the petition is approved, shall pay the full Student Services Fee and student activities fees, one-half the Tuition, and if applicable, one-half the Nonresident Supplemental Tuition and one-half the Professional Degree Supplemental Tuition.

Continuous Registration

A graduate student is expected to register for each regular academic session (fall, winter, and spring quarters) until all requirements for an advanced degree or credential have been completed, including final examinations and the submission of an approved thesis or dissertation. Registration is not official or complete until all required tuition and fees have been paid and the student has enrolled in classes. Students are responsible for ensuring that their course enrollment is correct and that their fees and tuition have been paid by the applicable deadlines.

A student engaged in study or research outside the state of California for an entire quarter ordinarily will be required to register *in absentia*. Unless an official leave of absence has been granted, or a petition to pay the Filing Fee in lieu of registration has been approved by the Dean of the Graduate Division, a student who does not register by the final deadline for any regular quarter will lose graduate standing (i.e., the individual's status as a graduate student will lapse), and candidacy for any advanced degree will lapse. Prior to resuming graduate study in the University, a former student must successfully apply for readmission. If readmitted, the student must satisfy the academic requirements in effect at the time of readmission and may be required to satisfy certain requirements a second time, including those for formal advancement to candidacy. A readmitted student must register and then be advanced to candidacy at least one quarter before receiving an advanced degree. A degree cannot be conferred earlier than the second quarter following readmission. Students must be registered or on approved Filing Fee status for the academic term in which the degree is conferred.

A graduate student who decides to leave the University after enrolling and paying tuition and fees for a quarter must file an official Withdrawal form with the Dean of the Graduate Division. A graduate student in good academic standing who wishes to withdraw temporarily from graduate study and intends to return within one year may submit an application for a leave of absence. A graduate student who wishes to apply for a leave of absence after enrolling and paying tuition and fees for a quarter must file both a Withdrawal form and an application for a leave of absence. If the leave is approved, the student remains in good standing and need not apply for readmission in order to enroll at the expiration of the leave period. Students who file a withdrawal for any reason, including leave

of absence, after enrolling and paying tuition and fees are subject to the Registrar's Schedule of Refunds, available at <http://www.reg.uci.edu/enrollment/withdrawals/#refunds>.

In Absentia

In absentia status is a form of registration available to academic and professional degree graduate students undertaking necessary course work or research related to their degree programs outside of California. The Fee Policy for Graduate Student *in Absentia* Registration promotes continuous enrollment of graduate and professional degree students by providing an appropriate enrollment incentive. Research leaves for work outside of the state of California have been eliminated. Students registered *in absentia* are assessed 15 percent of the Student Services Fee and Tuition, the full health insurance fees, and the Associated Graduate Students fee. If applicable, students are also assessed nonresident supplemental tuition and/or professional degree supplemental tuition. All students pursuing doctoral or master's degrees in academic disciplines as well as those pursuing professional master's or doctoral degrees are eligible for the fee reduction. Students must be enrolled full-time in regular University of California units to be eligible for the reduced *in absentia* fee. Students in self-supporting graduate programs, exchange programs, or programs paying only a program fee are not covered by this policy and are not eligible for *in absentia* registration.

The research or course work must be directly related to the student's degree program as evidenced by UC faculty approval; must be of a nature that makes it necessary to be completed outside of California for at least one full academic term; must involve only indirect supervision appropriate to evaluating the student's academic progress and performance by UC faculty during the *in absentia* period; must involve no significant studying or in-person collaboration with UC faculty during the *in absentia* period.

Students who will be engaged in necessary degree-related course work or research off campus but within the state of California may be eligible for a leave of absence.

Leave of Absence

A graduate student who withdraws from the University with the intention of returning within one year and wishes to avoid a lapse of student status should request a leave of absence. A leave of absence of up to one year's duration may be granted by the Dean of the Graduate Division upon the recommendation of the student's academic unit, subject to the following guidelines:

1. The student must have **completed** satisfactorily at least one quarter in residence and be in good academic standing. The leave must be consistent with the student's academic objectives.
2. Leave ordinarily is approved in cases of serious illness or other temporary disability, or temporary interruption of the student's academic program for other appropriate reasons.
3. A student on leave is not eligible for assistance from a University fellowship, research grant, or financial aid program, and may not hold an academic appointment or be employed by the University in any capacity. During a period of leave, a student may not take comprehensive or qualifying examinations or earn academic credit (except by a transfer of credit from another institution approved in advance by the Dean of the Graduate Division). University resources and facilities, including housing, are ordinarily unavailable to students on leave.

4. A student failing to register for the next regular academic session following the expiration of leave will lose graduate standing and will be subject to the following readmission policy.

Readmission

A student who previously withdrew from the University, or whose student status has lapsed, may request readmission to graduate study by submitting online a new *Application for Graduate Study* with the nonrefundable \$80 fee (\$100 for international students). The Dean of the Graduate Division may grant readmission when recommended by the academic unit. If readmitted, a student's previous academic work will be applied toward the requirements for an advanced degree only with the approval of the graduate advisor and the Dean of the Graduate Division. A readmitted student must satisfy the academic requirements in effect at the time of readmission and may be required to satisfy certain requirements a second time, including those for formal advancement to candidacy. A readmitted student must register and then be advanced or reinstated to candidacy at least one quarter before receiving an advanced degree, which will be conferred no earlier than the second quarter following readmission. In exceptional circumstances, a student who has not registered by the end of the third week of classes may file a Readmission Petition with the Graduate Division during that academic term upon approval of the student's department chair and the respective school's associate dean, and payment of a \$80 readmission fee.

Intercampus Exchange Program

A graduate student in good standing who wishes to take advantage of educational opportunities available only at another campus of the University of California may do so through the Intercampus Exchange Program. Ordinarily, an exchange student will have demonstrated a high level of scholarship during at least one quarter of graduate study at the home campus and will have well-defined academic objectives. Approval of the faculty advisor, the host department(s), and the respective Deans of Graduate Studies is required. Direct arrangements between faculty members on the two campuses are encouraged so as to ensure that courses, seminars, or facilities will be available to meet the participating student's needs. Students may take courses on more than one campus of the University in the same academic session.

The exchange student enrolls and pays tuition and fees on the home campus and then enrolls at the host campus, following the procedures of that Registrar's Office. A report of academic work completed will be transferred to the student's academic record on the home campus after the term has ended. Although eligible for all normal student services, the exchange student is a visitor and is not formally admitted to graduate study at the host campus. Application forms for the Intercampus Exchange Program may be downloaded from the Graduate Division Web site at <http://www.grad.uci.edu/forms/index.html> and should be filed with the Office at least four weeks before the beginning of the quarter in order to avoid penalties.

Transfers of Credit

At least one-half of the course requirement for a master's degree must be completed while in residence as a graduate student at UCI. Credit for up to one-fifth of the minimum number of units required for a master's degree may be allowed for graduate-level work completed at another institution or through University Extension prior to first graduate enrollment at UCI. Such courses do not count toward the required number of units in 200-series courses. Up to one-half the units required may be accepted from another graduate division of the University of California. After enrollment, the student must initiate a formal petition for such credit and submit

an original transcript. The acceptance of unit credit earned in another program must be recommended by the academic unit to which the student has been admitted and be approved by the Dean of the Graduate Division. No units of transfer credit will be given for any course in which a grade below B (3.0) or equivalent was assigned. Under no circumstances will grade credit be transferred.

A student currently enrolled in a master's degree program or on a leave of absence may receive unit credit (not grade credit) for graduate-level work completed at another institution or through University Extension only with the prior approval of the departmental graduate advisor and the Dean of the Graduate Division. No transfer credit will be given for any course in which a grade below B or equivalent is received.

A student who begins graduate study at UCI in the fall quarter will receive appropriate credit for courses taken in preceding UCI summer sessions, provided that the formal date of admission precedes summer session enrollment. Continuing graduate students will receive credit for courses taken in intervening UCI summer sessions.

Graduate Degrees

Master's Degrees

The master's degree is conferred at the end of the academic quarter in which all requirements have been satisfied, subject to the final approval of the Graduate Council. The student must be advanced to candidacy for the degree prior to the beginning of the final quarter of enrollment. Therefore, an application for advancement to candidacy, initiated by the student and approved by the academic unit, should be submitted to the Dean of the Graduate Division at least 30 days before the opening of the quarter in which the degree is expected.

The Master of Arts (M.A.) or Master of Science (M.S.) degree normally is attained by one of two routes: Plan I, the thesis option; or Plan II, the comprehensive examination option. Both require a minimum of one year in residence, satisfactory completion of prescribed course work, and an appropriate demonstration of achievement. Plan I includes a minimum of seven courses (28 units), 20 units or more of which must be at the graduate level; a thesis; and a general examination. Plan II requires at least nine courses (36 units), including 24 units or more at the graduate level, and a comprehensive examination covering a broad range of subject matter in the discipline. Only approved 200-series courses completed while in residence at the University satisfy the minimum graduate course requirement. Some programs will have course requirements exceeding the minimums cited above and may have additional or alternative degree requirements. Please refer to the description of the specific program for more information.

Master of Fine Arts (M.F.A.) degrees are awarded by the Claire Trevor School of the Arts (M.F.A. in Dance, Drama, Fine Arts, Music, or Studio Art) and by the Program in Creative Writing (M.F.A. in English) upon successful completion of the equivalent of two years or more of full-time study with an emphasis upon creative expression and professional development. Special thesis or comprehensive examination requirements are established for these programs.

Master of Arts in Teaching (M.A.T.) degrees are awarded upon successful completion of programs designed for the professional development of elementary and secondary school teachers. A minimum of one year in residence is required, usually including summer session course work. A

thesis project or other comparable evidence of professional attainment is part of each M.A.T. program.

Master of Business Administration (M.B.A.) degrees are awarded by The Paul Merage School of Business upon successful completion of the equivalent of two years of full-time study in the development of professional managerial skills.

Master of Advanced Study (M.A.S.) degrees are awarded by the School of Social Ecology in Criminology, Law and Society upon successful completion of 52 units of course work in the broad areas of criminal justice, including corrections, probation, criminal prosecution, defense, and civil law. The program is fully online with the exception of a required one-week in-residence course during the first fall quarter.

Master of Professional Accountancy (M.P.Ac.) degrees are awarded by The Paul Merage School of Business upon successful completion of 44 units of course work including core courses and electives.

Master of Public Health (M.P.H.) degrees are awarded by the Program in Public Health upon successful completion of 60 units of course work including core courses, electives, and courses in the student's emphasis.

Master of Public Policy (M.P.P.) degrees are awarded by the School of Social Ecology upon successful completion of 72 units of course work including core courses and electives. Students also participate in a policy-relevant internship in an appropriate government, business, or nonprofit setting.

Master of Science (M.S.) in Nursing Science degrees are awarded by the Program in Nursing Science upon successful completion of 68–71 units of course work, depending on the student's chosen area of specialization, as well as 720 hours of clinical practice in the student's area of emphasis to be eligible for certification.

Master of Urban and Regional Planning (M.U.R.P.) degrees are awarded by the School of Social Ecology upon successful completion of the equivalent of two years of full-time study in contemporary methods of planning and policy analysis.

Doctor of Philosophy Degree

The Doctor of Philosophy (Ph.D.) degree is awarded on the basis of evidence that the recipient possesses knowledge of a broad field of learning and expert mastery of a particular area of concentration within it. The research dissertation is expected to demonstrate critical judgment, intellectual synthesis, creativity, and skill in written communication.

Students are required to advance to candidacy for the doctorate, and to complete all requirements for the doctoral degree, within the normative time specified by the individual graduate program. Students who fail to complete the degree within the normative time limit for their program shall be deemed as not making satisfactory academic progress, and will not be qualified to continue to receive non-instructional University resources (e.g., financial aid, teaching assistantships, student housing). Normative time-to-degree parameters for each doctoral program are indicated in the academic unit sections of this *Catalogue*. Students who fail to complete the degree within the maximum time-to-degree limit for their program shall not be permitted to enroll. For details see the section on Academic Disqualification.

The candidate for the Ph.D. is expected to be in full-time residence for at least six regular academic quarters. Four to six years of full-time academic work beyond the bachelor's degree typically is required to complete the degree. At the end of the first year or so of full-time study, many

programs administer a preliminary examination on the student's mastery of fundamental knowledge in the discipline. Upon successfully demonstrating a high level of scholarship on this examination and after further study, the student will continue to a series of qualifying examinations which lead to formal advancement to candidacy for the Ph.D.

Graduate students ordinarily attain candidacy status for the Ph.D. degree when all preparatory work has been completed, when qualifying examinations have been passed, and when they are ready for the dissertation phase. Students are recommended for advancement to candidacy by unanimous vote of the candidacy committee nominated by the academic unit and appointed by the Dean of the Graduate Division on behalf of the Graduate Council. The Report of the Ph.D. Candidacy Committee (Form I) must be signed by the committee at the time the candidacy examination is concluded and submitted to the Dean of the Graduate Division. Following a unanimous favorable vote of the committee, the student will be advanced to candidacy upon payment of the \$90 Candidacy Fee. Candidacy for the Ph.D. will lapse automatically if the student loses graduate standing by academic disqualification or failure to comply with the University policy on continuous registration. A readmitted student who was a candidate for the Ph.D. must again advance to candidacy and thereafter enroll as a candidate for at least one academic quarter before the Ph.D. may be conferred.

Following advancement to candidacy for the Ph.D., a doctoral committee nominated by the academic unit chair and appointed by the Dean of the Graduate Division on behalf of the Graduate Council, supervises the student's program, approves the dissertation, and conducts the final oral examination if required. The chair of the doctoral committee is the member of the faculty responsible for providing primary guidance of the student's dissertation. Ordinarily, the final examination will be given just prior to completion of the dissertation and while the student is in residence during a regular academic session. The final examination, or defense, is open to all members of the academic community. All student committees must conform to policy approved by the Graduate Council in effect at the time of examination. Ph.D. degrees are conferred, subject to the final approval of the Graduate Council, as of the last day of the regular academic quarter in which all requirements have been satisfied.

Theses and Dissertations

Candidates for the Ph.D., Ed.D., and certain master's degrees must conduct an extensive research project and submit a dissertation or thesis in order to fulfill degree requirements. Research expenses are not supported by the University, and the cost of preparing the dissertation or thesis ordinarily ranges from \$200 to \$1,000, but may be considerably more.

After approval by the doctoral or thesis committee appointed for each candidate by the Dean of the Graduate Division, on behalf of the Graduate Council, doctoral and master's students must file their dissertation or thesis with the UC Irvine Library Special Collections and Archives, via the electronic dissertation or thesis submission process (a paper process is also available). Generally, dissertations and theses are made available for public access unless an embargo has been requested for a specific period of time. The final copy must meet the University's requirements for style, format, and appearance before the degree can be conferred. A thesis and dissertation manuscript preparation manual is available online at http://special.lib.uci.edu/dissertations/uci_td.html. All doctoral students are required to submit an Exit Survey and a Survey of Earned Doctorates prior to the awarding of their degree.

Dissertations and theses must be filed by the deadline published on the Graduate Division Web site <http://www.grad.uci.edu/academics/filing%20deadlines/index.html> in order for them to be reviewed and accepted in time for the degree to be conferred in that quarter.

Those students who complete requirements and submit theses/dissertations after the end of the tenth week of classes and prior to the start of the subsequent quarter will earn a degree for the following quarter, but *will not* be required to pay tuition and fees for that quarter. Please note that in order to avoid payment of tuition and fees, manuscripts, all forms, and degree paperwork must be submitted prior to the first day of the quarter in which the degree is to be earned. Students should note that this does not apply if the thesis/dissertation is submitted after the deadline for spring quarter degrees. Students who submit after the spring deadline are required to either enroll in Summer Session or pay the Filing Fee if they have not done so previously.

The Filing Fee

Under certain circumstances, a student who has advanced to candidacy for a graduate degree may be eligible to pay a Filing Fee equal to half of the Student Services Fee in lieu of registration for any academic term including summer, subject to the approval of the Dean of the Graduate Division. International students who wish to go on Filing Fee status must, in addition, secure approval to do so from UCI's International Center. In general, all requirements for a degree must have been satisfied prior to the start of the quarter, except for the submission of the final version of the dissertation or thesis, or the completion of a final oral or comprehensive examination. A student on Filing Fee status may not make use of any University resource, hold any academic appointment, or receive any student service for which official registration and payment of regular tuition and fees is a requirement. A Filing Fee will not be accepted immediately following readmission nor immediately following a leave of absence except under exceptional circumstances. The date for payment of the Filing Fee is the same as that for the payment of other student fees. If all degree requirements are not completed during the academic term in which the Filing Fee is paid, the student must subsequently register and pay all applicable tuition and fees. Students may only utilize the filing fee option for one academic quarter during their graduate studies. Additional quarters are not allowed regardless of whether the student changes academic programs.

Nonresident Supplemental Tuition

Nonresident doctoral students who have advanced to candidacy are eligible for a 100 percent reduction in the annual Nonresident Supplemental Tuition for a maximum of three consecutive calendar years including time on leave of absence. Reduced Nonresident Supplemental Tuition begins with the first academic term following advancement to candidacy. Any nonresident student who continues to be enrolled, or who re-enrolls following the three-year maximum allowance, will be charged the full Nonresident Supplemental Tuition rate that is in effect at that time of enrollment.

Conferral of Graduate Degrees

Prior to the beginning of the quarter in which an advanced degree is to be conferred, the student must have advanced to candidacy for that degree and should have received formal notice confirming candidacy from the Dean of the Graduate Division. The student should consult the departmental faculty graduate advisor to determine which degree requirements, if any, have not yet been satisfied.

Students are advised by mail when their diplomas are available, which is approximately six months after the quarter in which the degrees are awarded.

Graduate Hooding Ceremony. Students completing a Ph.D., Ed.D., or M.F.A. are eligible to walk in the Graduate Hooding Ceremony. Students are required to meet all filing deadlines (<http://www.grad.uci.edu/academics/filing%20deadlines/index.html>) and satisfy degree requirements (<http://www.grad.uci.edu/academics/degree-completion/index.html>) in order to participate in the ceremony. Registration for eligible students opens in February. Inquiries about the Graduate Hooding Ceremony may be directed to gradcomm@uci.edu, and details are available at <http://www.grad.uci.edu/cascade/academics/commencement>.

Financial Assistance for Graduate Students

Several types of financial assistance are available to graduate students at UCI. These include fellowships, teaching and research assistantships, tuition fellowships for nonresident students, grants-in-aid, and student loans.

All domestic graduate students are encouraged to submit the *Free Application for Federal Student Aid* (FAFSA) each year to access state and federal grants and loans. It is available online at <http://www.fafsa.ed.gov> or in the Office of Financial Aid and Scholarships after January 1, with a submission deadline of March 2 each year. The Financial Aid (p. 34) section in this *Catalogue* and the Financial Aid Web site (<http://www.ofas.uci.edu/content/>) contain information about assistance based upon financial need that is administered by the Office of Financial Aid and Scholarships.

Applicants interested in assistantships or fellowships should so indicate on their application when applying for admission. Many graduate programs have a deadline for completed graduate applications of January 15; however, many graduate programs have earlier, or later, deadlines. Students should contact the academic program to which they are applying for accurate deadlines, particularly to receive full consideration for fellowship and assistantship awards. Continuing students interested in an assistantship or fellowship should contact the graduate advisor for their academic program. The awarding of fellowships to incoming students for the following academic year begins in the winter quarter.

UCI subscribes to the agreement of the Council of Graduate Schools of the United States, under which successful applicants for awards of financial support are given until April 15 to accept or decline such awards. An award accepted from one of the member universities may be resigned at any time through April 15. However, an acceptance given or left in force after that date commits the student to not accepting another appointment without first obtaining formal release for that purpose from the awarding institution.

Regents', UCI Chancellor's Fellowships, and other merit-based fellowships are awarded by some schools to a number of promising students entering graduate study at UCI leading to the Doctor of Philosophy or Master of Fine Arts degree. Awards may include a stipend, all required tuition and student fees, and, if applicable, Nonresident Supplemental Tuition. Other fellowships are offered, including tuition awards for outstanding applicants who are not residents of California. In many cases, fellowship stipends may be supplemented by partial assistantship appointments. Fellowship awards are typically made by the student's academic unit.

Entering or continuing graduate students may be awarded research or teaching assistantships for all or part of the academic year. The types of assistantships, number available, and required duties vary according to the activities of the academic unit. A graduate assistant who is not a California resident also may receive a tuition fellowship. While enrolled as a graduate student at UCI, students are limited in their employment with the University to no more than 50 percent time during each academic quarter. Fellowship support as well as research or teaching assistantships all require students to maintain satisfactory academic progress as defined by UC and UCI policy as well as by their academic units.

Through the Graduate Division's diversity programs, a number of diversity fellowships are awarded to entering and continuing domestic graduate students who may have been disadvantaged in higher education. Departments nominate candidates on the basis of their merit and contribution to the diversity of the department or discipline, as well as demonstrated scholastic achievement, full-time status, and U.S. citizenship or permanent residency. Individuals from diverse cultural, geographic, and socioeconomic backgrounds are especially encouraged to apply to UCI's graduate programs. In conformance with State law, applicants may not be given preferential treatment on the basis of race, ethnicity, gender, religion, or national origin.

Claire Trevor School of the Arts

Joseph S. Lewis III, **Dean**

Arts Student Affairs
101 Mesa Arts Building; (949) 824-6646
<http://www.arts.uci.edu/>

The Claire Trevor School of the Arts is one of the nation's most acclaimed and innovative centers for the creation, performance, and study of the arts within the context of their history and theory. The School consists of four departments, including Art, Dance, Drama, and Music, offering undergraduate B.A., B.F.A., and B.M. degrees, and M.F.A. degrees in all four disciplines. The Drama Department offers a doctorate in Drama and Theatre, jointly with UC San Diego. The School also offers a minor in Digital Arts.

The School's departments are located near each other in the Arts Plaza, providing possibilities for daily interaction among students and faculty in all Arts disciplines. Facilities in the School include studios and technologically enhanced classrooms, four theatres, a theatre/concert hall, the University Art Gallery, the Donald R. and Joan F. Beall Center for Art and Technology, the Gassman Electronic Music Studio, the Motion Capture Studio, the Arts Media Center, the Arts Computing Laboratory, the Digital Arts Teaching and Research Laboratories, a television studio, professionally managed and staffed production shops, and publicity and box offices supporting the School's extensive production, performance, and exhibition schedule.

The Steven Ehrlich-designed Contemporary Arts Center, the latest major expansion of the School, provides 59,000 new square feet of technology-driven instructional and research spaces, as well as a new 4,000-square-foot gallery and a "black-box" performance space. Along with its new motion-capture studio, these facilities enhance the School's and UCI's place at the forefront of these fields.

Arts students regularly participate in dance and drama productions, choirs, instrumental ensembles, and art exhibitions. Students from other academic areas are also eligible to participate in many of these activities and are encouraged to do so. Some of the School's productions take place in the Irvine Barclay Theatre located on the UCI campus.

The artists, performers, and scholars of the Arts faculty are regularly augmented by distinguished artist/teachers featured in numerous School activities.

Students receive assistance with program planning and a variety of other services from the professional and student-support staff in the School's Office of Student Affairs; the staff also assist the faculty in providing academic counseling to Arts students.

Degrees

Art	B.A., M.F.A.
Dance	B.A., B.F.A., M.F.A.
Drama	B.A., M.F.A.
Drama and Theatre	Ph.D. ¹

Music	B.A., B. Mus., M.F.A.
Music Theatre	B.F.A.

¹ UCI and UCSD joint program.

Change of Major

Students who wish to change their major to one offered in the School should contact the Arts Student Affairs Office for information about change-of-major requirements, procedures, and policies. Additionally, students should refer to the information available at <http://www.changeofmajor.uci.edu>.

Special Programs of Study

Minor in Digital Arts

The minor in Digital Arts provides opportunities to explore creativity through digital media arts for students who want to acquire a working knowledge of how digital content is conceived, constructed, and performed.

Minor in Religious Studies

The interdisciplinary minor in Religious Studies focuses on the comparative study of religions in various cultural settings around the world. The curriculum seeks to provide a wide-ranging academic understanding and knowledge of the religious experience in society through study in the Schools of Humanities, Social Science, Social Ecology, and the Arts. See the School of Humanities (p. 546) section for additional information.

Campuswide Honors Program

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campus-wide Honors Program, 1200 Student Services II; (949) 824-5461; honors@uci.edu; <http://www.honors.uci.edu/>.

UC Education Abroad Program

Upper-division and, in some cases, graduate students have the opportunity to experience a different culture while making progress toward degree objectives through the University's Education Abroad Program (UCEAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. See <http://www.studyabroad.uci.edu> for additional information.

Honors

Students who have distinguished themselves academically will be considered for honors at graduation. General criteria are that students must have completed at least 72 units in residence at a University of California campus and must have a cumulative grade point average of 3.5 or better, including the grades from the final quarter. In keeping with the Academic Senate Resolution, no more than 12 percent of the graduating seniors may receive such academic honors. Other important factors are considered (see Honors Recognition (p. 58)). Individual departments may offer other special honors to students who have excelled in their major subject.

Creative Connections Opportunities

Arts Outreach at the Claire Trevor School of the Arts partners with local school districts, arts organizations, and community centers to share the School's talents and knowledge beyond the UCI campus. One such

outreach program is Creative Connections, which provides exceptional opportunities for School of the Arts students to earn valuable practical experience in K–12 classrooms and in community settings. Projects range from integrating arts into core curriculum in K–8, to workshops in the arts for middle and high schools, to college application mentorship for high school juniors and seniors interested in arts majors. One to four units of independent study are available, and in some cases stipends are offered. All Claire Trevor School of the Arts students who hold a minimum 3.0 GPA have the opportunity to apply for these programs.

Scholarships

The Claire Trevor School of the Arts has some scholarship monies available to incoming and to continuing students on both the undergraduate and graduate levels.

Edna Helen Beach Scholarship: Provides \$1,000 per year for two years for an incoming freshman student, and \$1,000 for one year for an incoming transfer student. Recipient must be gifted and talented, and will be selected from eligible students with special emphasis on those from underprivileged backgrounds who would not otherwise be able to attend a major research institution.

Kris and Linda Elftmann Scholarship: Up to \$3,000 awarded to an outstanding student.

Leo Freedman Graduate Fellowship: For outstanding applicants from Orange County, California, preferably from Anaheim; two fellowships of approximately \$7,000 each for the academic year.

Ann and Gordon Getty Foundation Music Scholarship: Up to \$500 awarded to a music student in any instrument or voice.

William J. Gillespie Foundation Scholarships: Several scholarships in varying amounts, awarded to outstanding Dance majors.

Alice Lowell Memorial Scholarship: For students majoring in Music.

Steve Lyle Memorial Scholarship: \$2,000 awarded to continuing students in Drama; selected by application and recommendation.

Margie McDade Memorial Scholarship: For students majoring in Music and studying piano.

Shiela K. and James J. Peterson Community Spirit Scholarships: \$1,500–\$3,000 awarded to students with financial need and who have contributed to community services.

Marjorie and Robert Rawlins Scholarship: For full-time students majoring in Music and studying piano, violin, viola, or cello.

Frederick Reines Music Scholarship: For students majoring in Music and studying voice.

Harry and Marjorie Ann Slim Memorial Scholarship: For students majoring in Music.

Winifred W. Smith Scholarship: For students majoring in Music and studying cello, violin, or piano (preferably cello).

Elizabeth and Thomas Tierney Scholarship: Up to \$3,000 awarded annually to an outstanding student.

UCI Town and Gown Music Scholarships: For students majoring in Music.

Phyllis Kovach Vacca Memorial Scholarship: For students majoring in Music and studying cello, piano, or violin.

Bette and Steven Warner Scholarship: For outstanding students in the Music Department's voice program and the Drama Department.

H.B. and Isabelle Yolen Memorial Scholarship: Four \$2,000 awards to students in Art or Drama with financial need.

Undergraduate Programs

Refer to the Departments of Art, Dance, Drama, and Music for detailed information about the undergraduate programs.

Requirements for the Bachelor's Degree

All students must meet the University Requirements (p. 60).

School Requirements: None.

Departmental Requirements: Refer to individual departments.

Minor in Digital Arts

John Crawford, **Director**

The minor in Digital Arts provides opportunities to explore creativity through digital media arts. This program is open to students from all areas of UCI who want to acquire a working knowledge of how digital media content is conceived, constructed, and performed. In the studio, students receive hands-on experience with current software tools, creating and sharing digital media art projects, developing an appreciation of digital media aesthetics and conceptual design, and learning the fundamentals of desktop video, audio, and Web authoring software applications. Lectures and discussions examine how today's pervasive digital culture evolves through interdisciplinary collaborations among artists, engineers, scientists, and scholars. Course work considers relationships between digital media practices, touching on such areas as social networking, video/audio podcasting, interface design, digital music, telematic performance, intelligent agents, virtual realities, artificial life, and ubiquitous computing. The program investigates critical issues related to emerging technologies and the arts, and surveys recent works by leading digital media artists.

Prospective students should have basic proficiency with Web, e-mail, word processing, and presentation software. It is highly recommended that students have their own computer. Further information is available at <http://digital.arts.uci.edu>.

Requirements for the Minor

The Minor in Digital Arts consists of a minimum of eight courses which fall into two categories: I. Required and II. Elective.

I. Required

ARTS 1	ArtsCore
ARTS 11	Digital Media: History and Foundations
ARTS 12	Digital Media: Current Directions
ARTS 50	Digital Media: Experience and Content
ARTS 60	Digital Media: Video and Audio for the Web
ARTS 70	Digital Media: Interaction Design

II. Elective

Select two of the following:

ARTS 75	Digital Media: Exhibition
DANCE 163	Dance and Video Technology
DANCE 164	Screendance
MUSIC 51	Music Technology and Computers
MUSIC 147	Studies in Music Technology
MUSIC 151	Computer Music Composition
MUSIC 152	Interactive Arts Programming
ART 65A	Foundations in Media Design
ART 65B	Foundations in Internet Art and Design
ART 81A	Video Production
ART 81B	Video Stage Production
ART 100	Special Topics in Art
ART 106A	Programming for Artists
ART 106B	Game Studies
ART 106C	Design for Print
ART 130A	Projects in New Technologies
ART 143	Projects in Computer Painting

Each of these courses may be taken one time only for credit toward the minor (with the exception of topic-varies courses, e.g., ART 100). No course in the requirements for the minor may be taken Pass/Not Pass.

Graduate Program

The primary endeavor of the Claire Trevor School of the Arts is the creative act. Research activities are pursued both as an end in themselves and as a source that can inform both performance and the studio experience. The intellectual activity of theoretical, literary, and historical courses complements the practical work in studio workshops and performance. The aim of the M.F.A. programs in Art, Dance, Drama, and Music is, thus, to produce artists literate in both traditional and digital media who are disciplined, responsive to intellectual stimuli, and capable of integrating existing knowledge into creative projects. The UCI-UCSD joint doctoral program in Drama and Theatre provides opportunity for significant crossover research and teaching between the two campuses in a wide range of areas in drama and the theatre. It is the strong belief of the UCI Claire Trevor School of the Arts that intellectual integrity and creative excellence cannot exist without each other.

Refer to the Departments of Art, Dance, Drama, and Music for detailed information about the graduate programs.

Admission to the Program

Applications are accepted for fall quarter admission only, and ordinarily must be completed by January 15 for the Ph.D. in Drama and Theatre, the M.F.A. in Art, the M.F.A. in Dance, and the M.F.A. in Music, and by February 15 for the M.F.A. in Art with a concentration in Critical and Curatorial Studies. The number of graduate students that can be admitted to the Claire Trevor School of the Arts is limited. Applicants are advised to arrange for auditions, interviews, and the submission of portfolios, compositions, and dossiers by the appropriate deadlines. Students applying for scholarships and fellowships should do so by January 15, and are also encouraged to apply for financial assistance through the Office of Financial Aid and Scholarships. The Claire Trevor School of the Arts has a modest number of teaching assistantships available in all areas,

and all candidates are automatically reviewed for teaching assistantship positions; the School informs successful candidates by June 1 for the following academic year.

Upon admission to the program the student is assigned an advisor. Students should discuss with their advisor the scope of undergraduate preparation to determine any areas which may need strengthening if full benefit from graduate study is to be derived.

Courses

ARTS 1. ArtsCore. 4 Units.

An introduction to the arts in general, and to the arts at UCI. Concentration on (1) the interdisciplinary nature of the arts, and (2) the content of particular arts disciplines.

(IV)

ARTS 11. Digital Media: History and Foundations. 4 Units.

Introduction to historical and theoretical foundations of digital media art, tracing how information technologies seeded growth of new expressive medium. Considers how today's pervasive digital culture evolved through interdisciplinary collaborations between artists, engineers, scientists, scholars. Course may be offered online.

(IV)

ARTS 12. Digital Media: Current Directions. 4 Units.

An overview of current practice and research in digital media art. Examines the effects of recent technological, scientific, cultural, and political developments. Addresses the increasing overlap of artistic and scientific practices and issues related to new and emerging technologies.

(IV)

ARTS 50. Digital Media: Experience and Content. 4 Units.

A project-based introduction to tools and approaches for creating and sharing digital media content within Internet-mediated social environments, with a particular emphasis on art-making and personal expression. Includes an overview of basic user experience and interaction design principles.

Prerequisite: ARTS 11 and ARTS 12.

ARTS 60. Digital Media: Video and Audio for the Web. 4 Units.

An overview of digital video and audio production for the Web, emphasizing art-making and personal expression. Includes digital media aesthetics and conceptual design, basic audio and video recording, and fundamentals of desktop video, audio, and Web authoring software applications.

Prerequisite: ARTS 11 and ARTS 12 and ARTS 50.

ARTS 70. Digital Media: Interaction Design. 4 Units.

Principles and practices of interaction design for interactive digital media systems that provide for active involvement of the participant. Students gain experience with interaction design issues through a series of media art projects, emphasizing art-making and personal expression.

Prerequisite: ARTS 11 and ARTS 12 and ARTS 50 and ARTS 60.

ARTS 75. Digital Media: Exhibition. 4 Units.

A discussion and critique course in all media arts. Includes a review of key media arts concepts and the preparation of an end-of-quarter exhibition.

Prerequisite: (ARTS 11 and ARTS 12 and ARTS 50 and ARTS 60) and proposal submission.

ARTS 80. Art, Technology, and Science. 4 Units.

Explores development and impact of art and computer technology on society and culture from nineteenth century to present. Covers history of moving images, time-based and experimental media arts viewed in conjunction with progression of science and digital technologies.

(II or IV)

ARTS 100A. The Senior Thesis. 4 Units.

Planning, drafting, writing, and presentation of an academic thesis. Open to students who will interrelate two or more artistic disciplines, and to Campuswide Honors Program students who will focus their thesis on one or more major areas in the Arts.

Restriction: School of the Arts majors only.

ARTS 100B. The Senior Thesis. 4 Units.

Planning, drafting, writing, and presentation of an academic thesis. Open to students who will interrelate two or more artistic disciplines, and to Campuswide Honors Program students who will focus their thesis on one or more major areas in the Arts.

Prerequisite: ARTS 100A.

Restriction: School of the Arts majors only.

ARTS 100C. The Senior Thesis. 4 Units.

Planning, drafting, writing, and presentation of an academic thesis. Open to students who will interrelate two or more artistic disciplines, and to Campuswide Honors Program students who will focus their thesis on one or more major areas in the Arts.

Prerequisite: ARTS 100B. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: School of the Arts majors only.

ARTS 199. Independent Study. 1-4 Units.

Individual study or directed projects as arranged with faculty member.

Repeatability: May be repeated for credit unlimited times.

Department of Art

3229 Art, Culture and Technology Building; (949) 824-6648

<http://www.arts.uci.edu/>

David Trend, **Department Chair**

The Department of Art takes a wide-ranging, interdisciplinary view of contemporary art practice. The Department emphasizes a demanding, conceptual approach to work in process in addition to traditional notions of product. Students are encouraged to develop an individual, disciplined direction through an experimental approach to media, materials, and techniques. To further this end, the curriculum provides studio experiences in drawing, painting, sculpture, ceramics, photography, digital imaging, and video, in addition to emphasizing cultural studies in relation to contemporary practice. Visiting artists and theorists who teach on a

quarterly basis, or who make shorter guest appearances, are an integral part of the program.

The University's Education Abroad Program offers students the opportunity to study abroad. Graduate-level study also is available.

Careers for the Art Major

Departmental faculty and the range of artists whose work is represented in the University Art Gallery exhibitions provide diverse career models. Some graduates go on to careers as exhibiting artists or teachers; others work in arts-related activities in museums, galleries, and artists' organizations. A bachelor's degree in Art is usually required as preparation for graduate-level study in Art.

Requirements for the B.A. Degree in Art

All students must meet the University Requirements (p. 60).

School Requirements: None.

Departmental Requirements for the Major

ART 1A	Art in Context: History, Theory, and Practice
ART 1B	Art in Context: History, Theory, and Practice
ART 1C	Art in Context: History, Theory, and Practice (ART 1A, ART 1B, and ART 1C all taken the first year in residence.)
ART 9A	Visual Culture: Media, Art, and Technology
ART 11A	History of Contemporary Art
Select one of the following:	
ART HIS 40A	History of Western Art: Ancient
ART HIS 40B	History of Western Art: Medieval and Renaissance
ART HIS 40C	History of Western Art: Baroque and Modern
ART HIS 42A	History of Asian Art: Arts of India
ART HIS 42B	History of Asian Art: Arts of China
ART HIS 42C	History of Asian Art: Arts of Japan
ART HIS 42D	History of Asian Art: Arts of Islam
Select four of the following:	
Lower-division ART 20–99	
Select six of the following:	
Upper-division ART 100–115 (no more than three in this category),	
Upper-division ART 130–195 (minimum of three in this category);	
Select two of the following:	
Issues courses from ART 116–129	

Sample Program for Freshmen

Freshman

ART 1A	ART 1B	ART 1C
Art History	Lower-Div. Art	Lower-Div. Art
WRITING 39B	General Education	General Education
Lower-Div. Art	WRITING 39C	General Education

Honors in Art

The Honors in Art program gives qualifying students a more rigorous course of study in contemporary art practices, thus challenging superior students beyond the scholarly requirements demanded of the Art major. This program is designed to further develop students' critical, analytical, research, and technical skills. It is particularly suited to those wishing to go on to graduate school and/or exhibition careers.

Eligibility Requirements

1. One year in good standing as an Art major;
2. Completion of:
3. ART 1A Art in Context: History, Theory, and Practice
- ART 1B Art in Context: History, Theory, and Practice
- ART 1C Art in Context: History, Theory, and Practice
- Four lower-division courses selected from ART 20–99
- One Art History course from either the ART HIS 40 or 42 series.
4. An overall GPA of 3.2 or higher with a GPA of at least 3.4 in ART courses.

Application Deadline

The annual application deadline is May 15. Late applications will not be accepted.

Application Requirements

All applications must include

1. A disc containing 10 jpegs of recent work (jpeg files only, scaled to 8" x 10" and no larger than 5MB each) and/or a DVD of 2–3 minute clips of video or temporal work (mov files only);
2. A printed sheet listing titles and descriptions of work submitted;
3. A brief statement (250 words maximum) of research and career goals; and
4. UCI transcript (downloadable from StudentAccess).

Applicants must test their discs prior to submission to ensure that they work properly; discs that are not viewable will be disqualified. The applicant's name, UCI student ID number, and e-mail address must be printed legibly on all submitted materials. Materials must be placed in a large envelope and submitted to the Department of Art Administrative Office (ACT 3229) by the deadline.

Admission to the honors program is competitive. Students may be admitted as early as the spring quarter of their sophomore year but no later than the spring quarter of their junior year. Application finalists will be asked to schedule a portfolio review with the Art Undergraduate Committee before the end of spring quarter instruction. All applicants will be notified of their status no later than the end of spring quarter finals week.

Students accepted into the Honors Program will be given access to studio space to use during the academic year. Honors students must abide by the Space Use and Safety Policy and sign the Agreement for Use of Studio Space before occupying the studio space. GPAs of

Honors students will be reviewed each quarter to ensure programmatic requirements.

Beyond fulfilling regular courses for the Art major, honors students must take the following:

Select two additional courses from the following: ART 100–191, 199;

Select one ART HIST course of the student's choosing; and

Complete ART 198.

This latter course is to prepare students for a mandatory, group interdisciplinary honors gallery exhibition to take place during either the winter or spring quarter of the student's matriculating year, at which time students will defend their thesis work to faculty on the Undergraduate Committee.

NOTE: Students may be assessed a course materials fee for certain courses. Consult the online *Schedule of Classes* on the Registrar's Web site at <http://www.reg.uci.edu> for the most up-to-date information about which courses require a materials fee and the amount of the fee.

Master of Fine Arts Program

Degree offered: M.F.A. in Art

A concentration in Critical and Curatorial Studies is available.

Graduate emphases in Feminist Studies and in Asian American Studies are also available. (Refer to the Program in Women's Studies (p. 565) section or the Department of Asian American Studies (p. 434) section of the *Catalogue* for information.)

General Information and General Degree Requirements

The program is designed to provide intensive professional training for independently motivated students wishing to pursue careers in the field of contemporary art. Rather than traditional ideas of subject and technique, experimental and interdisciplinary approaches to art making are emphasized. Students undergo a rigorous course of study combining seminar classes, intensive critique courses, and independent study. The seminars cover a range of critical issues dealing with the relationship of culture to contemporary art and are designed for students interested in theoretically positioning their art practices within an interdisciplinary framework. All incoming students must take the First-Year Graduate Seminar in preparation for further course work. As students progress in the program, they are required to take a series of additional seminars aimed at training them to develop research skills and a written component augmenting their culminating thesis exhibitions. Various approaches to developing text and word are considered, and students are encouraged to approach developing the thesis textual component following a path best suited to their postgraduate interests (e.g., critical writing, spoken word/performance, critical memoir, digital narrative structures).

The overall emphasis in the program, however, is on studio production. Throughout their three years, students must take a series of critique seminars. Work-in-progress, produced for the given quarter's critique class, is intensively discussed within a group context. Students must also, throughout their graduate careers, work each quarter on an independent basis with faculty of their choice and are encouraged to work with a range of faculty members. During the second year, students must select a thesis committee with whom they will work closely on the development of both thesis studio production and research interests. However, even after

selecting their committee, students are still encouraged to work with a range of faculty on an independent basis in order to continue to respond to and reflect on a diversity of ideas and differing approaches to both studio production and art distribution systems. Throughout the first two years, students must also undergo a series of progress checks including open studio reviews and a second-year exhibition. Students are evaluated by faculty committees during their first and second years. Satisfactory opinion by these committees coupled with both satisfactory independent study evaluations and grades of at least a B or above will allow the student to progress to candidacy for the degree. During the third year, candidates must mount a thesis exhibition. In tandem with the final thesis exhibition, students are required to do a public presentation on their work as part of their final defense before their thesis committee.

During the first two years, students are required to take courses from a structured curriculum totaling 12 units each quarter. Beyond that, students can select additional course work from any sector of the Department or University including approved upper-division undergraduate courses. The third year is structured so that students can individualize their course of study through a wide selection of classes. For example, students wishing to focus primarily on studio production can do so through a combination of independent studies and critique classes, or students could design their third year to focus both on studio production and acquiring additional course work in a given research area or graduate emphasis.

The normative time to degree for students in the M.F.A. program is three years. Residence is required. The maximum time to degree is four years. Students who do not complete the degree in four years will be dropped from the program.

M.F.A. candidates are each provided with an individual studio space. Facilities include photography laboratories (analog and digital), video production studios, data laboratories, and sculpture laboratories for work in wood and metal. There are also facilities to support work in digital media, painting, performance, drawing, and ceramics. Students also have regular opportunities to exhibit in two galleries.

Various programs of visiting artists and lecturers are an integral part of the student experience. There is a public lecture series for which solicited graduate student input is considered an important component. Visiting artists, curators, critics, and gallerists are invited to give lectures and conduct studio visits with graduate students. The ART 220 seminar (required both first and second year) incorporates visiting lecturers into a colloquium setting where students are asked to lead in-depth discussions with a given visitor. In addition to artists and curators, ART 220 visiting lecturers include faculty from the UCI campus as well as other UC campuses whose work and research may be of interest to graduate students. Some Art faculty, in addition to their departmental appointment, are affiliated with other UCI and UC programs, e.g., Asian American Studies, African American Studies, Women's Studies, Engineering, Information and Computer Science, Critical Studies, Art History, the Calit2 Gaming Studies Initiative, and the UC Institute for Research in the Arts (UCIRA).

Admission

Applicants for admission to the M.F.A. program must meet the general requirements for admission to graduate study, hold a B.A. or B.F.A. in Art, have completed one year of twentieth-century art history (students who have not completed this will be required to do so as part of their graduate studies), and submit by January 15 a portfolio of their most recent creative work of a maximum of 20 images, to fit within an overall image size of 1,024 pixels wide by 768 pixels high, white or black borders. Files should be submitted as a single PDF document. A short incisive statement about

the work is required. Normally, anyone who has earned an M.F.A. degree in Studio Art will not be considered for admission into the program.

Specific Degree Requirements

One hundred and eight units over a three-year course of study are required. Residency is required. Students must take a minimum of 12 units per quarter.

First Year:

ART 210	First-Year Graduate Seminar
ART 211	Methods and Materials Workshop
ART 215	Graduate Seminar: Interdisciplinary Studies in Art and Culture
ART 220	Graduate Seminar: Issues in Contemporary Art
ART 230	Graduate Group Critique (all three quarters)
ART 240	Interdisciplinary Projects (all three quarters)

Second Year:

ART 215 or ART 236	Graduate Seminar: Interdisciplinary Studies in Art and Culture Graduate Topics in Studio Production
ART 220	Graduate Seminar: Issues in Contemporary Art
ART 230	Graduate Group Critique (two quarters)
ART 240	Interdisciplinary Projects (two quarters)
ART 262	Graduate Thesis Independent Study

Third Year:

ART 230	Graduate Group Critique
ART 261	Graduate Thesis Writing Seminar
ART 262	Graduate Thesis Independent Study (all three quarters)
ART 263	Graduate Thesis, Exhibition Critique

Two courses selected from the following:

ART 215	Graduate Seminar: Interdisciplinary Studies in Art and Culture
ART 220	Graduate Seminar: Issues in Contemporary Art
ART 236	Graduate Topics in Studio Production
ART 250	Directed Reading and Research
ART 251	Directed Group Study
ART 255	Graduate Interdisciplinary and Collaborative Projects
ART 257	Curatorial Projects
ART 399	University Teaching

Two courses selected from ART 240, ART 399, or outside seminar (over two quarters).

Concentration in Critical and Curatorial Studies

The M.F.A. in Art with a concentration in Critical and Curatorial Studies trains the student to enter the interdisciplinary field of contemporary art. Upon graduating, the student will be well versed in debates that define art and visual culture from modernism to the present, capable of conceiving new models of contemporary exhibition and criticism, and expertly trained to execute professional, innovative projects in the field. The University Art Gallery plays a prominent role in the curriculum, serving as a "laboratory" for cultural research conducted by the Critical and Curatorial students. This concentration has a core faculty in the Departments of Art, Art History, Film and Media Studies, Comparative Literature, and the program in Visual Studies, who advise the student in the research and production of their final M.F.A. exhibition and accompanying publication. A written Master's thesis is also required.

Admission

The criteria for admission is the same as the M.F.A. in Art admission criteria. In addition to the official application to the M.F.A. program, Critical and Curatorial applicants must include (in lieu of a portfolio): a letter of intent, a writing sample (in the form of an exhibition proposal or review), and a proposed project. The application deadline for this concentration is February 15.

Specific Degree Requirements

First Year:

ART 210	First-Year Graduate Seminar
ART 215	Graduate Seminar: Interdisciplinary Studies in Art and Culture
ART 220	Graduate Seminar: Issues in Contemporary Art
ART 230	Graduate Group Critique
ART 240	Interdisciplinary Projects
ART 250	Directed Reading and Research
ART 280A	Introduction to Exhibition Systems

and select two Art or Visual Studies electives

Second Year:

ART 215	Graduate Seminar: Interdisciplinary Studies in Art and Culture (two quarters)
ART 230	Graduate Group Critique
ART 240	Interdisciplinary Projects
ART 250	Directed Reading and Research
ART 280	Contemporary Exhibition Systems

and select three Art or Visual Studies electives

Third Year:

ART 230	Graduate Group Critique
ART 261	Graduate Thesis Writing Seminar
ART 264	Critical and Curatorial Thesis Exhibition
ART 262	Graduate Thesis Independent Study (all three quarters)
ART 280	Contemporary Exhibition Systems

and select one Art or Visual Studies electives

NOTE: Students may be assessed a course materials fee for certain courses. Consult the online *Schedule of Classes* on the Registrar's Web site at <http://www.reg.uci.edu> for the most up-to-date information about which courses require a materials fee and the amount of the fee.

Faculty

Kevin Appel, M.F.A. University of California, Los Angeles, *Professor of Art* (painting)

Ed Bereal, Chouinard Art Institute, *Senior Lecturer with Security of Employment Emeritus, Art*

Juli Carson, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Art and Director of the University Art Gallery* (contemporary art history, critical and curatorial studies)

Miles Coolidge, M.F.A. California Institute of the Arts, *Professor of Art* (photography)

Tony DeLap, Claremont Graduate School, *Professor Emeritus of Art*

Martha Gever, Ph.D. City University of New York, *Professor Emerita of Art* (video/cultural/critical studies)

Bryan Jackson, M.F.A. University of California, Los Angeles, *Lecturer in Art* (video, digital multimedia)

Ulysses Jenkins, Jr., M.F.A. Otis Parsons Art Institute, *Professor of Art* (video)

Antoinette LaFarge, M.F.A. School of Visual Arts, *Professor of Art* (digital media)

Simon Leung, B.A. University of California, Los Angeles, *Professor of Art* (new genres, critical theory, contemporary art history)

Joseph S. Lewis III, M.F.A. Maryland Institute, College of Art, *Dean of the Claire Trevor School of the Arts, Professor of Art, and Claire Trevor Dean's Endowed Chair* (post studio non-media specific)

Mara Lonner, M.F.A. California Institute of the Arts, *Lecturer in Art* (drawing, sculpture)

Catherine Lord, M.F.A. State University of New York, Buffalo (Visual Studies Workshop), *Professor Emerita of Art* (critical and queer theory, feminism, photography)

Monica Majoli, M.F.A. University of California, Los Angeles, *Associate Professor of Art* (painting, drawing)

Daniel Joseph Martinez, B.F.A. California Institute of the Arts, *Professor of Art* (new genres, photography, sculpture, post-tactical media, text installation, public intervention, performance)

Yong Soon Min, M.F.A. University of California, Berkeley, *Professor of Art* (sculpture, cultural studies)

Gifford C. Myers, M.F.A. University of California, Irvine, *Professor of Art* (sculpture, ceramic sculpture)

Robert Nideffer, M.F.A., Ph.D. University of California, Santa Barbara, *Professor of Art* (electronic intermedia, interface theory and design, contemporary social theory, game culture and technology)

Deborah Oliver, M.F.A. California Institute of the Arts, *Lecturer in Art* (performance)

Simon Penny, Graduate Diploma in Sculpture, Sydney College of the Arts, New South Wales, *Professor of Art* (robotic sculpture, interactive environments, electronic media, art practice history, and critical theory)

Yvonne Rainer, *UCI Distinguished Professor Emerita and Claire Trevor Professor Emerita of Art* (performance, film history)

Shelby Roberts, M.F.A. California Institute of the Arts, *Lecturer in Art* (photography)

Connie Samaras, M.F.A. Eastern Michigan University, *Professor of Art* (photography, media and film criticism, gender studies, culture and technology)

David Trend, M.F.A. State University of New York, Buffalo (Visual Studies Workshop); Ph.D. School of Education, Miami University, *Department Chair and Professor of Art* (video, photography, visual studies, curriculum)

Bruce Yonemoto, M.F.A. Otis Art Institute, *Professor of Art* (video, multimedia, film theory)

Courses

ART 1A. Art in Context: History, Theory, and Practice. 4 Units.

First in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practices in relation to their twentieth-century cultural and historical antecedents. ART 1A deals specifically with contemporary painting and photography.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 1B. Art in Context: History, Theory, and Practice. 4 Units.

Deals with film/video/performance. Concerned with the development of modern/contemporary film, video, and performance, with a focus on experimental and avant-garde production from the early twentieth-century to today.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 1C. Art in Context: History, Theory, and Practice. 4 Units.

Third in a three-quarter foundation sequence introducing students to a broad range of contemporary art, media, and practice in relation to their twentieth-century cultural and historical antecedents. Deals specifically with space and cyberspace.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9A. Visual Culture: Media, Art, and Technology. 4 Units.

Examines creative activities in all spheres of life, including the "artistic" impulses that dwell in the individual. Culture is addressed in broad terms of the many institutions and cultural forces that shape everyday activities of listening, seeing, doing.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9B. Visual Culture: A Culture Divided. 4 Units.

Throughout the 1980s and 1990s controversies flourished in the mainstream media over purportedly obscene art, anti-American writing, and moral decay, among other issues. Examines these new conflicts as they manifest themselves in public life and everyday experience.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 9C. Visual Culture: Thematic Investigations. 4 Units.

Considers a broad range of concerns and questions raised by various acts of appropriation in contemporary art and visual culture, such as originality, authenticity, authorship, translation, audience and aesthetics, temporal dimensions of a work, and context.

Restriction: Art majors have first consideration for enrollment.

(IV)

ART 11A. History of Contemporary Art. 4 Units.

Surveys critical thought that has influenced twentieth-century art production, preparing the student to engage contemporary art with a critical eye, specifically addressing aesthetic and political debates of the historical avant-garde, the neo-avant garde, and postmodern culture.

Prerequisite: ART 9A.

Restriction: Art majors only.

ART 11B. Media Art and Design History. 4 Units.

Survey of the roots of modern techno-media arts in both the history of visual arts and the history of devices such as automata, animatronics, robots, miniature theatres, optical machines, communications technologies, calculators, and computers.

Restriction: Art majors only.

ART 20A. Basic Drawing I. 4 Units.

Encourages an investigation of the premises and limits of drawing, primarily, but not inevitably, as a two-dimensional medium. Includes slide presentations and discussions of the historical uses of a wide range of drawing.

Restriction: Art majors have first consideration for enrollment.

ART 20B. Basic Drawing II. 4 Units.

Continuation of the investigation initiated in ART 20A, with an emphasis on experimentation, personal investigation, and development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized.

Prerequisite: ART 20A or ART 20.

Restriction: Art majors have first consideration for enrollment.

ART 30A. Basic Painting I. 4 Units.

Examination of the fundamental components of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work.

Restriction: Art majors have first consideration for enrollment.

ART 30B. Basic Painting II. 4 Units.

Further examinations of the essential qualities of painting: color, form, space, surface, scale, and content. Studio work, slide presentations, and critiques of student work.

Prerequisite: ART 30A.

Restriction: Art majors have first consideration for enrollment.

ART 40. Basic Sculpture. 4 Units.

The practice of sculpture in the contemporary arts; inclusion of spatial interventions, site-specific and environmental design, appropriation of found materials; techniques in cutting joining, and assembly of wood, metals, and plastics. May include casting, welding, and ceramics. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 51. Basic Ceramic Sculpture. 4 Units.

Exploration of use of clay as sculptural basis with an emphasis on development of an idea and its relation to contemporary and experimental art practice. Hand-building, glazing, finishing processes, and use of other structural materials. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 65A. Foundations in Media Design. 4 Units.

Provides an overview of media design in the digital age, covering principles of design for different media (2D, time-based, interactive); history of relationship between art and design; and practice in working with different design approaches. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 65B. Foundations in Internet Art and Design. 4 Units.

Introduction to creating art for the Internet, covering history and structure of networks; key types of net-based interactivity; basics of Web design and scripting. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Restriction: Art majors have first consideration for enrollment.

ART 71A. Introduction to Photography. 4 Units.

Introduction to technical underpinnings emphasizing photography as a contemporary art practice. Topics include 35mm non-automatic camera operation, exposure and lighting, black and white printing, introduction to digital photography, discussion of critical and historical issues. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 71B. Introduction to Photography II. 4 Units.

Techniques covered include medium and large format cameras, digital photography, studio lighting, digital and analog color printing, mural room. Conceptual direction is developed through critiques, critical readings, discussions, slide lectures. Materials fee.

Prerequisite: ART 71A.

Restriction: Art majors have first consideration for enrollment.

ART 81A. Video Production. 4 Units.

Introduction to three production stages of video making. Study of the narrative structure of cinema and acquisition of video production skills in camera, lighting, sound, and editing. Production work, readings, and screenings outside of class are assigned. Materials fee.

Restriction: Art majors have first consideration for enrollment.

ART 81B. Video Stage Production. 4 Units.

Focuses on video stage production, technical skills including camera operation, stage lighting, sound recording, and construction of basic scenic elements. Emphasis is placed on the function and responsibilities of the production crew and proper working and safety procedures. Materials fee.

Prerequisite: ART 81A.

Restriction: Art majors have first consideration for enrollment.

ART 91. Basic Performance Art. 4 Units.

Exploration of objects, gesture, action, text, image, and media to create narrative or non-narrative works. Elements of theory and history of performance art are discussed to illustrate techniques and styles to understand, identify, and articulate artistic vision and voice.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors have first consideration for enrollment.

ART 95. SPECIAL TOPICS IN BASIC MEDIA. 4 Units.

Basic instruction in media or disciplines not otherwise represented in the regular curriculum. Topics vary according to the instructor.

Repeatability: Unlimited as topics vary.

Restriction: Art majors have first consideration for enrollment.

ART 100. Special Topics in Art. 4 Units.

Materials fee, topic dependent.

Prerequisite: ART 9A. Lower-division writing strongly recommended.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Art majors only.

ART 101W. Artists as Writers. 4 Units.

Contemporary art practice involves text, as final form or an integral element. Many contemporary artists consider writing as essential to their practice. Covers historical and contemporary uses of text and image as well as artists' writing.

Prerequisite: ART 9A and ART 11A. Satisfactory completion of the lower-division writing requirement.

Restriction: Art majors only.

(Ib)

ART 103. Intermediate Painting. 4 Units.

Continuation of the investigation initiated in basic painting, with an emphasis on experimentation, personal investigation, development of conceptual working premises, as well as the acquisition of necessary skills. Group discussion and critique are emphasized.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 30A and ART 30B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 104. Intermediate Sculpture. 4 Units.

Investigation of three-dimensional space, including the construction of objects and the manipulation of the environment. Students define personal projects and translate personal, social, and political experience into visual meaning. Range of artists' works introduced. Group discussion and critiques. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 40.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 105. Intermediate Ceramic Sculpture. 4 Units.

Further investigation of the use of clay as a medium, with an emphasis on experimental practice and the relationship to contemporary visual art. Emphasizes discussion of ideas, and provides information on clay body, fabrication, glazing, and firing. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 51.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 106A. Programming for Artists. 4 Units.

Programming as a means to create interactive artworks with an emphasis on the integration of video, sound, text, and stills. Topics include basic concepts in programming, understanding the limits of code, working with video and audio files, interface design.

Prerequisite: ART 65B. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 106B. Game Studies. 4 Units.

Critical analysis of various genres of computer games and gaming theory and practice through playing, writing, and discussion. The focus is on creating a Design Document for the student's own gaming environment using gaming metaphors, design principles, and technologies.

Prerequisite: ART 65A. Recommended: ART 11B.

Restriction: Art majors only.

Concurrent with

ART 106C. Design for Print. 4 Units.

Investigates the use of print for communication as an artist. Covers the fundamentals of print design and output using digital media. Materials fee.

Prerequisite: ART 65A. Recommended: ART 11B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 107. Intermediate Projects in Photography. 4 Units.

Students begin learning how to develop photographic projects of their own making. Focuses on employing and expanding upon previously learned technical and critical skills specific to students' individual interests and ideas. Critiques, readings, lectures, labs. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 108. Intermediate Video Projects. 5 Units.

Students learn to conceive, develop, and produce original video works building directly upon previously learned skills. Use of video stage and post-production editing facilities. Lectures on video/film subjects, production strategies, readings, screening, field trips, and group critiques. Materials fee.

Prerequisite: ART 81A AND ART 81B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 109. Performance and the Camera. 4 Units.

Surveys the development of contemporary artists who use performance strategies in the making of videos and films. Students analyze the artist's conceptual approach to performative gestures, actions, and landscapes created for their video or film art.

Prerequisite: ART 1B and (ART 81A or ART 91).

Restriction: Art majors only.

ART 110A. Mechatronic Art I. 4 Units.

Introduces the practice and theory of analog electronics, emphasizing the design and development of simple interactive systems and the integration of such systems into real-world contexts of performance, installation, sculpture, and automated artifacts.

ART 110B. Mechatronic Art II. 4 Units.

Introduces the practice and theory of embedded microcontrollers, digital electronics, coding, sensor interfacing, motor control and output stages along with mechanical and electromechanical design and construction, emphasizing the integration of such systems into real-world contexts of performance, installation, and art-making.

Prerequisite: ART 110A.

ART 110C. Mechatronic Art III. 4 Units.

As the capstone to the Mechatronic Art series, this course permits students to develop major projects utilizing electronics, microcontrollers, sensors, and electromechanical devices, in a methodical and supervised context, with technical, design, and aesthetic advice and critique.

Prerequisite: ART 110A and ART 110B.

ART 111. 3D Methods and Materials. 4 Units.

Presents a wide variety of concepts, materials, tools, and fabrication techniques vital to art production. Wood tools, clay, castable rubber, urethane foam, fiberglass, plaster, steel, and welding are introduced. Projects are based on conceptual problems incorporating these materials. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 116. Feminist Issues in Art. 4 Units.

Feminist perspectives and topics in relation to cultural production. Feminist debates on sexuality, perspectives on women of color, on race and gender, feminist film criticism, histories of the first and second waves of feminism, histories of feminist art.

Prerequisite: ART 9A. Recommended: Satisfactory completion of the Upper-Division Writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 117. Issues in Popular Culture. 4 Units.

In-depth investigation of the relationship between visual art practices and popular culture.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 119. Issues in Contemporary Painting. 4 Units.

Investigation of issues in modern and contemporary art work and criticism, wherein an assessment of Modernist influences is followed by the examination of contemporary painting as a cross-disciplinary practice employing popular culture, "high art," theory, and new technology.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 120. Issues in Narrative. 4 Units.

Emphasizes the construction of narratives in different media--painting, photography, sculpture, video. Particular attention paid to the development of personal and community histories as a working base.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 121. Issues in Race and Representation. 4 Units.

Emphasizes the construction of racial difference and stereotyping in the visual and performing arts, and on the histories of cultures and artists who functioned outside the contemporary mainstream. Readings assigned.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 121A. Afro-Futurism I. 4 Units.

First of a two-part course on the futuristic artistic vision of Black film, video, and cyberspace. Deals with critical analyses of the Black image in Western Art history, and its association to contemporary Hip Hop culture, art, and music.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art majors only.

ART 121B. Afro-Futurism II. 4 Units.

Second of a two-part course on the futuristic artistic visions of Black film, video, and cyberspace. Deals with modern techno-culture, digital activism, and designing technology based on African aesthetic principles of contemporary Hip Hop International Culture.

Prerequisite: ART 9A. Satisfactory completion of upper-division writing strongly recommended.

Restriction: Art majors only.

ART 123A. Issues in the New Culture Wars. 4 Units.

"Culture wars" originally described Reagan/Bush era political efforts launched over matters like abortion, religion, gay rights, school curricula. Such controversies provided motivation and content for many artists. Addresses new culture wars emerging since 9/11 over privacy, technology globalization, terrorism.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Restriction: Art majors only.

ART 123B. Issues in Media, Violence, and Fear. 4 Units.

Violence has been instrumental in story-telling throughout history in art, literature, religion, and entertainment. Continuing presence of media violence provoked debates among parents, politicians, media producers, and academics. Examines history, theory, aesthetics, economics, and politics of violent representation.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Restriction: Art majors only.

ART 125. Issues in Photography. 4 Units.

Rigorous investigation of photographic practices and critical writings, the relationship of photography to the construction and maintenance of cultural institutions, the circulation of photographic ideas in society, and photography and technology.

Prerequisite: ART 1A and (ART 71A or ART 71B or ART 152A or ART 152B or ART 152C or ART 152D or ART 152E or ART 190B). Recommended: Satisfactory completion of the Upper-Division Writing requirement.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 126. Issues in Media and Migration: Asia. 4 Units.

Media and migration are profound, twinned influences on contemporary globalized experience. A discourse on Asian cultural production and of its transnational dimensions. Students will explore migration in its multiple facets to include migrations of people, ideas, and technologies.

Prerequisite: ART 9A.

ART 126A. Tactical Media and the Politics of Information. 4 Units.

Overview of tactical media as a practice and its theoretical influences. Emerged in post-Cold War Europe in early 1990s. Tactical use of media and activism are point of reference for tactical media groups worldwide.

Restriction: Art majors only.

ART 126B. Issues in Techno-Arts. 4 Units.

Addresses issues related to artmaking practices that emerge in tandem with new technologies. Topics include sociopolitical contexts of techno-art; utopic/dystopic framings; key moments in the history of techno-arts.

Prerequisite: ART 9A. Recommended: ART 11B.

Restriction: Art majors only.

ART 127A. Issues in Video History and Criticism. 4 Units.

Investigation of historical development of video as artistic practice. Topics include relationships between art and video technology, critiques of television, experimentation with image processing/synthesis, performances designed for video, experiments in documentary representation, video installation. Readings and screenings assigned. Materials fee.

Prerequisite: ART 9A.

Restriction: Art majors only.

ART 127B. Issues in Experimental Film History. 4 Units.

A critical study of experimental film/video art genres and production techniques considering their narrative, structural, iconographic, and cultural aspects. Hollywood narrative, Nouvelle Vague, American Independent, and Video Art compared in terms of production innovation, design, and conceptual content. Materials fee.

Prerequisite: ART 9A.

Restriction: Art majors only.

ART 128. Issues in New Genres. 4 Units.

Investigates issues in post-studio practices, including concepts of time, relational aesthetics, site-specificity, institutional critique, and the post-medium condition.

Prerequisite: ART 9A. Recommended: satisfactory completion of the upper-division writing requirement strongly recommended.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 130A. Projects in New Technologies. 4 Units.

Working with media such as electronic still cameras, desktop publishing, faxes, satellites, virtual reality, digitized imaging. Cultural issues pertinent to the emergence of new technology (e.g., ethical concerns, social impact, copyright laws, nontraditional approaches to distribution, cyberpunk, global markets).

Prerequisite: ART 65A. Recommended: ART 11B. Recommended: ART 106A strongly recommended.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 130B. Topics in Game Design. 4 Units.

Investigates interaction paradigms, game mechanics, game development processes, and methods for analysis and critique of games; and provides opportunities for experimental game design.

Prerequisite: ART 106B.

Restriction: Art majors only.

ART 130C. World Building. 4 Units.

Interdisciplinary approaches to working across the digital/nondigital boundary to create an alternate universe. Emphasis is on critical thinking, comprehensive planning, integration of multiple media, and narrative development.

Prerequisite: ART 65A. Recommended: ART 11B. Recommended: ART 106A strongly recommended.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 131. Projects in Installation. 4 Units.

Investigates interior installation in particular spaces. Working in teams, students install, discuss, and remove projects. Technical information and hands-on experience with various media is provided. Materials fee.

Prerequisite: Two intermediate ART courses.

Repeatability: Unlimited as topics vary.

ART 132A. Projects in Video Pre-Production. 4 Units.

Examines the preparatory and planning stages of video production, including script writing, story boarding, location scouting, script breakdown, and budgeting. Projects may encompass one or more of these stages which will be explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 132B. Projects in Video Post-Production. 4 Units.

Examines procedures and techniques utilized in video production after principal shooting is completed, including effects processing, composting, sound design, and DVD authoring. Projects focus on these processes, and explored through readings, discussions, and demonstrations. Materials fee.

Prerequisite: ART 81A and ART 81B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 141. Projects in Video Installation. 4 Units.

Incorporating narrative structures in a multi-screen context. Students design and produce an active space in which activities will move from one screen to another. Materials fee.

Prerequisite: ART 81A and ART 81B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 143. Projects in Computer Painting. 4 Units.

Study and utilization of the computer as a digital sketchbook and design tool for the creation of paintings. Discussion of the issues related to benefits and limitations of new technology in the art-making process.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 30A and ART 30B.

Restriction: Art majors only.

ART 146. The Artist in the Archive. 4 Units.

Considers data storage, retrieval systems, technology, secrets, disparate collections and forgetting. Focuses on artists who prefer their information in quantity and who use or construct databases to structure and/or generate their work.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 9A and ART 11A.

Restriction: Art majors only.

ART 150. Advanced Studio Topics--Painting. 4 Units.

Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored.

Prerequisite: ART 30B.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 150C. Advanced Drawing . 4 Units.

Advanced studio problems in visual exploration. Students pursue individual solutions to self-defined and presubscribed projects. Techniques/materials are individual choice. Continual analysis of the personal process.

Prerequisite: ART 20B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art majors only.

ART 150F. Advanced Figure Drawing. 4 Units.

Students develop technical skills in rendering the figure. Live model sessions and an introduction to anatomy. Investigates use of the figure in contemporary art. Materials fee.

Prerequisite: ART 20B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 151. Advanced Studio Topics--Sculpture. 4 Units.

Provides an intensive and specialized working environment. Thematic issues and material strategies will be explored. Materials fee.

Prerequisite: ART 40.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 152A. Advanced Studio Topics--Photography. 4 Units.

Focused investigation of a range of issues in photographic practice, with an emphasis on developing individual student projects, refining critical thinking, and conceptual framing. Technical topics covered as required. Readings, lectures, critiques, labs. Materials fee.

Prerequisite: ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art majors only.

ART 152B. Documentary Photography. 4 Units.

Documentary practice is examined through the realization of photo-based projects. Thematic focus of student's choosing will be refined through lectures, discussion, technical demonstrations, field trips, labs, and individual meetings. Materials fee.

Prerequisite: ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art majors only.

ART 152C. The Public Image. 4 Units.

Strategies for artistic intervention in the public circulation of images are examined alongside the role images play in constructing public identity. Individual or collaborative student projects will be directed around course themes. Materials fee.

Prerequisite: ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art majors only.

ART 152D. The Photographic Tableau. 4 Units.

Examines and develops photographic projects intended for traditional artistic venues (i.e., galleries and museums). In addition to exploring appropriate techniques and presentation strategies, students consider the interdependency between construction of images and semantic shaping of traditional art venues. Materials fee.

Prerequisite: ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art majors only.

ART 152E. The Constructed Image. 4 Units.

A studio investigation of theoretical ideas, critical possibilities, historical precedents, and various techniques involving the production of fabricated images. Techniques may include montage, digital, chemical and in-camera manipulations, studio constructions, appropriations, performance, and projected images. Material fees.

Prerequisite: ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art majors only.

ART 152F. Seminar Production Component. 4 Units.

Photographic and/or inter-media production course tied to a specific Issues course (for example, Issues in Photography, Issues in Feminism, Issues in New Genres). Critiques, labs, field trips, discussion, demonstrations. Materials fee.

Prerequisite: ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Art majors only.

ART 153. Advanced Studio Topics--Video. 4 Units.

Directed to the production of individual or collaborative videotapes, using studio, portable camera, and editing facilities and sound and computer elements. Emphasis will be on individually initiated projects. Readings and screenings are assigned. Materials fee.

Prerequisite: ART 81A and ART 81B.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 154. Advanced Studio Topics--Performance. 4 Units.

An intensive investigation of the practice of performance art, with an emphasis on the development of individual projects, and the refinement of various technical skills, as well as audiences, spaces, and cultural connections.

Prerequisite: ART 91 or ART 109.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 156. Advanced Studio Topics--Ceramic Sculpture. 4 Units.

Discussion of ideas, techniques, and personal control of form. Clay body, fabrication, glazing, and firing. Emphasis on development of personal direction. Materials fee.

Prerequisite: ART 51.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 166A. Advanced Collaborative Projects in Video. 4 Units.

Original video projects produced in collaborative teams combining advanced video students with students from other areas, including Dance, Drama, and Music. Shoots may be carried out on the video stage as well as field locations. Materials fee.

Prerequisite: ART 81A and ART 81B.

Repeatability: May be taken for credit 2 times.

Restriction: Art majors only.

ART 190. Senior Project and Critique. 4 Units.

Directed-study critique class in preparation for final project and life after graduation; documentation and portfolio preparation for graduate school. Investigation of exhibition spaces and funding opportunities, participation in artists' communities outside the university, and artists' rights issues.

Repeatability: Unlimited as topics vary.

Restriction: Seniors only. Art majors only.

ART 190B. Senior Projects and Critique in Photography. 4 Units.

Directed group study focused on production of photographic projects of significant scope and ambition. Emphasis on preparation for continued study and/or practice in photography in advanced settings beyond the undergraduate university experience. Materials fee.

Prerequisite: ART 1A and ART 1B and ART 1C and ART 71A and ART 71B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Seniors only. Art majors only.

ART 190C. Senior Projects and Critique in Video. 4 Units.

Directed group study focused on production and exhibition of individual video projects of significant scope and ambition. Emphasis is placed on critical evaluation. Assignments include work documentation, graduate school preparation, and investigation for future opportunities outside the University. Materials fee.

Prerequisite: ART 81A and ART 81B.

Repeatability: May be taken for credit 2 times.

Restriction: Seniors only. Art majors only.

ART 191. Studio Problems: Methods and Materials. 4 Units.

An open media discussion and critique course emphasizing the development of working ideas and the execution of projects in all media. Readings assigned as required; field trips, slide and film/video presentations are integral.

Prerequisite: Two intermediate ART courses.

Repeatability: Unlimited as topics vary.

Restriction: Art majors only.

ART 197. Art Internship. 1-4 Units.

Under faculty supervision, students participate directly in a variety of art institution settings, including museums, galleries, and nonprofit organizations.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Juniors only.

ART 198. Honors Exhibition. 4 Units.

Preparation, installation, and participation in the annual honors exhibition.

Grading Option: Pass/no pass only.

Restriction: Juniors or seniors only. Art Honors students only.

ART 199. Independent Study. 1-4 Units.

Individual study or directed creative projects as arranged with faculty member. Materials fee.

Repeatability: May be repeated for credit unlimited times.

ART 210. First-Year Graduate Seminar. 4 Units.

Introductory theory class to contemporary art: intellectual history, theoretical antecedents, and current critical concerns.

Restriction: Graduate students only.

ART 211. Methods and Materials Workshop. 4 Units.

Comprised of a series of workshops introducing graduates to production and facilities in photography, video, digital media, and sculpture.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

ART 215. Graduate Seminar: Interdisciplinary Studies in Art and Culture. 4 Units.

In-depth discussion of contemporary art production in relation to a variety of theoretical, cultural, and historical topics. Material is determined by the given instructor's current research interests.

Prerequisite: ART 210.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ART 220. Graduate Seminar: Issues in Contemporary Art. 4 Units.

Classroom interaction with artists, curators, critics, lecturers from fields outside of the arts or from cross-disciplines. Includes recommended readings, discussions, panel participation, writing assignments.

Prerequisite: ART 210.

Repeatability: May be taken for credit 3 times.

Restriction: Graduate students only.

ART 230. Graduate Group Critique. 4 Units.

Focus on studio production. Students are expected to help foster and develop an environment in which serious and sophisticated peer critique can take place.

Repeatability: May be taken for credit 9 times.

Restriction: Graduate students only.

ART 236. Graduate Topics in Studio Production. 4 Units.

Graduate group study of a specific medium or art practice (e.g., painting; video, installation, photography, sculpture/3D, performance, digital media, public art, sound art; film). Includes consideration of technical, theoretical, historical, and/or formal issues.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 240. Interdisciplinary Projects. 4 Units.

Intensive faculty-led discussion of in-progress graduate studio projects—can be discipline driven or working across fields in a rigorous interdisciplinary studio environment where students meet with the professor both individually and in small groups.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ART 250. Directed Reading and Research. 4 Units.

Independent study with a supervising faculty member to direct academic research, develop bibliographies, and discuss assigned readings.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 251. Directed Group Study. 4 Units.

Directed reading and/or study group on a given research topic. Agreed-upon meeting structure may be flexible in order to accommodate off-campus field trips and travel.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 255. Graduate Interdisciplinary and Collaborative Projects. 4 Units.

For graduate students working collaboratively across the School of the Arts or cross-university. May be team taught with one of the faculty members based in the Department of Art.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ART 257. Curatorial Projects. 2-8 Units.

Independent or group study for graduates working on or developing curatorial projects.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ART 261. Graduate Thesis Writing Seminar. 4 Units.

Seminar for writing as a component of the thesis. Different models of writing, text, and spoken word will be discussed. Required second year.

Corequisite: ART 262.

Prerequisite: ART 210 and ART 215 and ART 220.

Restriction: Graduate students only.

ART 262. Graduate Thesis Independent Study. 1-4 Units.

Tutorials and directed study in thesis writing, research and/or studio production with thesis committee chair and/or thesis committee members to be taken during final quarters of study.

Corequisite: ART 261.

Prerequisite: ART 210 and ART 215 and ART 220.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ART 263. Graduate Thesis, Exhibition Critique. 4 Units.

Group critique required for matriculating M.F.A. students during the quarter in which their thesis exhibitions are scheduled. Public presentation/lecture on student's work required.

Prerequisite: ART 210 and ART 215 and ART 220 and ART 230 and ART 240 and ART 261 and ART 262.

Restriction: Graduate students only.

ART 264. Critical and Curatorial Thesis Exhibition. 8 Units.

Intensive tutorial geared toward execution of professional gallery exhibition, which is one half of the degree requirement for the M.F.A. concentration in Critical and Curatorial Studies. Must be taken under direction of Committee Chair.

ART 280. Contemporary Exhibition Systems. 4 Units.

Investigates contemporary case studies of curatorial practice. Sometimes taught in collaboration with a host institution. The history, theory and criticism or curatorial practice are tested through the explication of real exhibitions.

Prerequisite: ART 280A.

Repeatability: May be taken for credit 4 times.

ART 280A. Introduction to Exhibition Systems. 4 Units.

Introduces the basics of curating, covering the fundamentals of collection, research, fundraising, publicity, and installation. Also introduces the related categories of public programming and art criticism.

Restriction: M.F.A. students only.

ART 399. University Teaching. 4 Units.

Limited to Teaching Associates working under the active guidance and supervision of a regular rank faculty member responsible for curriculum and instruction at the University.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

Department of Dance

301 Mesa Arts Building; (949) 824-7283

<http://dance.arts.uci.edu/>

Lisa Naugle, **Department Chair**

The Department of Dance fosters an educational environment in which performance opportunities, creative projects, and theoretical studies complement and reinforce each other, providing a foundation for careers in dance. The program focuses on the dance techniques of ballet, modern, jazz, tap, world dance, and dance and technology. theoretical studies include dance history and theory; dance writing; Laban studies; dance pedagogy; dance ethnography; dance science; and aesthetics of digital media. Creative opportunities bridge the studio and theoretical work through performance and choreography for multiple contexts; creative applications of animation, motion capture, audio and video technologies; lecture demonstration; and critical, historical, ethnographical, and scientific writing.

The objective of studio work is to develop kinesthetic resources, precision, flexibility, creativity, and freedom in a coordinated and intelligently responsive dancer. The techniques of classical ballet, modern dance, and jazz constitute crafts and styles for the dancer that serve not only as a basis for the training of the body, but also as a basic language of movement for the choreographer.

The theoretical, historical, and scientific courses are designed both to broaden the perspective of those students whose first interest is performance or choreography, and to provide a foundation for those students who plan to pursue careers in the academic, scientific, technological, or administrative fields of dance.

The dance archives in the UCI Langson Library Special Collections offer a rich source of research materials which enhance the Dance program. Among other special holdings, the archives include the extensive Ruth Clark Lert collection of dance books, journals, photographs, original

costume sketches, and memorabilia of dance in Europe and the United States from pre-World War I to the present.

Careers for the Dance Major

Careers in dance require excellent training and extraordinary discipline, tenacity, and dedication. Graduates of the Department have an excellent record of placement in the many fields of dance. Some have become professional dancers in ballet companies (including the Metropolitan Opera Ballet, San Francisco Ballet, Nashville Ballet, and Joffrey); in modern dance companies (including Hubbard Street Dance Company, MOMIX, and Martha Graham Dance Ensemble); in touring companies (including The Lion King, Fame: The Musical, Carousel, and Cirque du Soleil); and in films, television, and theatre.

In addition to training for professional dance performance and choreography, the major in dance serves as a basis for graduate study or job opportunities in fields such as dance history, dance science, dance pedagogy, dance reconstruction, dance criticism, dance video, and technology. Related fields, such as arts administration, law in relation to the arts, arts therapies, design and production, and music also offer positions for graduates. Students who are interested in a career in athletic training, physical therapy, or dance science will find a major in Dance, with related course work in chemistry, physics, biology, and mathematics, to be excellent preparation for further study.

The Undergraduate Program

The Bachelor of Arts (B.A.) is designed for those who wish to obtain a broad undergraduate background as preparation for careers or graduate work and related fields. It offers students a dance education that stresses performance and choreography, and, at the same time, intellectual depth and scope. In addition to the core, 12 units of elective Dance courses are required. The remaining elective units required for graduation may be chosen from Dance or other disciplines in relation to a student's individual interest. While the program of study in Dance stresses technical proficiency and academic understanding in dance, the B.A. degree program also enables students to pursue elective subjects in their special areas of interest in other academic disciplines.

The Bachelor of Fine Arts (B.F.A.) degree program with specializations in Performance and Choreography, is designed for students who wish to prepare intensively for careers in those areas. The courses required in addition to the core are primarily in Dance. The B.F.A. program allows for a few free electives in other areas. Admission to the B.F.A. program with a specialization in Choreography is by faculty approval only.

The B.F.A. program with a specialization in Performance does not require additional faculty approval beyond the required audition for admission to the Dance major; students should declare their intention to pursue this specialization during spring quarter of their sophomore year.

Proficiency Levels

In addition to meeting the general requirements for admission to UCI, applicants must demonstrate technical/creative promise. The Department holds annual entrance auditions for potential freshmen and transfer students during winter quarter prior to the fall quarter when entrance is anticipated. First-year students wishing to major in Dance must be at technique level II in at least one of the three major genres (ballet, modern, jazz).

Placement auditions for admitted students are held during Welcome Week to determine levels of technical ability for placement in courses. It is suggested that transfer students wishing to pursue a B.A. degree in Dance complete, in addition to their general education requirements, one course in choreography, two courses in dance technique, and one course in music for dancers prior to transfer to UCI.

Previously admitted majors who wish to obtain a B.F.A. degree should contact the School of the Arts Student Affairs Office to obtain information about change of major requirements, procedures, and policies.

Transfer students wishing to pursue the B.F.A. degree must declare their intention in writing at the time of their entrance audition and demonstrate technique and/or choreography levels appropriate to their year. It is suggested that transfer students complete, in addition to their general education requirements, one course in choreography, two courses in dance technique, one course in music for dancers, and one course in dance performance prior to transfer to UCI.

Students deficient in level of performance or academic preparation should be prepared to extend their studies beyond the normal four-year program in order to meet the requirements for graduation.

Requirements for the B.A. Degree in Dance

All students must meet the University Requirements (p. 60).

School Requirements: None.

Departmental Requirements for the Major

DANCE 2	Dance Health and Injury Prevention
DANCE 21A	Music for Dancers
DANCE 60A	Choreography
DANCE 90A	Dance History 1A
DANCE 90B	Dance History 1B
DANCE 90C	Dance History 1C
DANCE 100	Kinesiology for Dance

Select one of the following sequences:

DANCE 180A- 180B	Laban Studies and Laban Studies
DANCE 180A- 180C	Laban Studies and Laban Studies
DANCE 185	Critical Issues in Dance

Technique: Students must complete at least one Dance technique course (ballet, modern dance, jazz, Spanish, world dance, pointe, social dance, tap, or repertory) each quarter in residence. At a minimum, students must complete level II in Ballet, Modern, and Jazz (Dance 132A-B-C, Dance 142A-B-C, and Dance 152A-B-C) and level III in either Ballet or Modern (Dance 133A-B-C or Dance 143A-B-C). Students who place above level II in any technique must take a year of that technique at the level in which they are placed. All students must also complete one course chosen from Dance 12A, 12B, 12C (Spanish Dance), 14 (Social Dance), 52A, 52B, 52C (Tap I), 110 (World Dance), or 150A, 150B, 150C (Tap II). **NOTE:** Units earned in ballet, jazz, and modern technique courses beyond the required amount do not count toward departmental elective requirements but may count toward University requirements.

Performance:

Select two of the following:

DANCE 170	Dance Performance
-----------	-------------------

DANCE 171	Dance Workshop
DANCE 172	Master of Fine Arts Concert

Four units of DRAMA 101 (Theater Production) must be taken during the first year in residence.

Electives: 12 units of electives must be completed within the major.

Requirements for the B.F.A. Degree in Dance

All students must meet the University Requirements (p. 60).

School Requirements: None.

Departmental Requirements for the Major

Students must complete the departmental requirements as listed for the B.A. degree in Dance. In addition, B.F.A. students must complete the requirements for either the specialization in Choreography or Performance.

Choreography Specialization:

DANCE 60B	Choreography
DANCE 60C	Choreography
DANCE 127A	Costume Design for Dance
DRAMA 30A	Acting
DRAMA 50C	Introduction to Lighting Design

Any three quarters of courses chosen from the following:

Dance 162A-B-C (Choreography II)
DANCE 164

Select two courses in DANCE 165¹

Four units (one or two courses) in Art History, Music, Studio Art, or Drama (in addition to DRAMA 30A, DRAMA 50C, and DRAMA 101 requirements).

Performance Specialization:

Technique:

Select one of the following sequences:

DANCE 134A-B-C (Ballet IV) or
DANCE 135A-B-C (Ballet V) or
DANCE 144A-B-C (Modern IV)
DANCE 153A-B-C (Jazz III)

DANCE 139	Partnering
-----------	------------

Performance:	
DANCE 137	Repertory
or DANCE 179	UCI Etude Ensemble
DANCE 170	Dance Performance (series) ²

Select one of the following:

DRAMA 30A	Acting
-----------	--------

or a fourth additional performance in the DANCE 170 series.

¹ Choreographic Projects—one original choreographic work, approved by the faculty, must be presented in both the junior and senior years.

² DANCE 170 series: must be in three additional performances beyond the B.A. requirements, one of which must be DANCE 170, DANCE 171, DANCE 172, or DANCE 174. DANCE 171 and DANCE 172 may be repeated for credit. Students must demonstrate proficiency in at least two dance genres in these performances.

Sample Program for Freshmen (B.A. and B.F.A. Programs)

Fall	Winter	Spring
WRITING 39B	WRITING 39C	DANCE 2
DANCE 21A	General Education	General Education
Technique	General Education	General Education
General Education	Technique	Technique
	Drama 101 (2 units)	Drama 101 (2 units)

Master of Fine Arts Program

Degree Offered

M.F.A. in Dance.

General Information

The M.F.A. program is an intensive program requiring a core of courses in studio and academic areas. The student's individual area of interest is explored through the thesis project in the second year. Projects or written theses may be pursued in choreography, video choreography, dance training, dance history and theory, ethnography, dance science, dance reconstruction, and dance and digital technology.

Admission

Applicants for admission to the degree program must meet the general requirements for admission to graduate study and hold a B.A. or B.F.A. in Dance or the equivalent. Candidates must meet the minimum requirements for the B.A. degree in Dance at UCI. Proposals for three choreographic works that could be completed in the graduate program must be submitted. An audition in ballet and modern technique is required for admission and is held in winter quarter. At this audition, applicants must also present a prepared five-minute choreographed piece, which may be a solo performed by the applicant, or a videotape of the applicant's choreography. Interviews with faculty are conducted following the audition, and applicants are given a short writing exercise.

Teaching Assistantships

Graduate students are encouraged to apply for teaching assistantships in areas such as notation, dance science, history, music for dancers, choreography, world dance, dance video, critical issues, and all technique classes. Students with expertise in any of these areas are given special consideration.

General Degree Requirements

Normally two years of residence are required. Each candidate must enroll for three courses each quarter for six quarters, exclusive of summer sessions.

In the second year, satisfactory attainment must be demonstrated by a major thesis; in choreography this consists of the composition and production of a choreographic work; in other areas, such as dance history, dance training, or dance science, this consists of a written thesis or a comprehensive project in a chosen area of study. All theses must be defended in a one-hour oral examination which may also test the candidate's general knowledge in the area.

The normative time to degree for students in the M.F.A. program is two years. Residence is required. The normative time to degree can be extended to three years only when a student requests extra time for more involved thesis research through a petition to the Chair of the

Department. The maximum time to degree is three years. Students who do not complete the degree in three years will be dropped from the program.

Specific Degree Requirements

Seventy-two quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course. No more than 20 units in upper-division courses may count toward the degree. Fulfillment of the technique course requirements must be approved by the faculty advisor.

Required Courses

Six courses chosen from any graduate or upper-division dance technique course, and completion of the following:

DANCE 201	Seminar in Kinesiology for Dance
DANCE 222	Musical Resources
DANCE 225	Seminar in the Teaching of Dance Techniques
DANCE 261A- 261B	Graduate Studio in Choreography and Graduate Studio in Choreography
DANCE 281	Dance and Video Technology
DANCE 282	Seminar in Movement Analysis
DANCE 283	Critical Issues in Dance
DANCE 284	Bibliography and Research
DANCE 286	Thesis
DANCE 296	Proseminar in Dance History

By the end of their first year, students will choose their area of study for their thesis. Students who wish to produce a choreographic thesis must apply to the graduate choreography advisor during winter of their first year. The faculty will review the applications and will consider the quality of the student's work in Dance 261, as well as the choreographic proposal, in making their selection.

Faculty

David Allan, Choreographer/Former Soloist, National Ballet of Canada; Choreographer, ballet companies, operas, film, and television, *Professor Emeritus of Dance* (ballet, pas de deux, choreography)

Mary Corey, M.A. University of California, Riverside, Certified Professional Labanotator, *Professor of Dance* (dance history, modern dance, notation and reconstruction, dance and digital technology)

John Crawford, Media Artist and Software Designer, *Director of the Digital Arts Minor and Associate Professor of Dance* (dance film, interactive media, telematic performance, motion capture, digital arts)

Diane Diefenderfer, Former Soloist, Los Angeles Ballet, Eglevsky Ballet Company, Frankfurt Ballet Company, Director of Pilates Program for Dance Wellness; *Lecturer with Potential Security of Employment, Dance* (ballet, pointe, repertory)

Jennifer Fisher, Ph.D. University of California, Riverside, Decade diversity mentor, founder and editor of Dance Major Journal; *Graduate Advisor and Associate Professor of Dance* (dance history and theory)

Israel "El" Gabriel, Former Assistant Artistic Director, Bat Dor Dance Company of Israel, *Lecturer with Security of Employment Emeritus* (ballet, modern, pas de deux, repertory)

Jodie Gates, Choreographer; former Principal Dancer with The Joffrey Ballet, The Pennsylvania Ballet and Ballet Frankfurt; Director of the Laguna Dance Festival; *Associate Professor of Dance* (ballet, choreography, pointe)

Chad Hall, M.F.A. The Ohio State University. Member of the international touring ensemble Diavolo Dance Theater. Pilates Mat Certified. *Assistant Professor of Dance* (modern dance, choreography, improvisation)

Loretta Livingston, B.F.A. California Institute of the Arts; Certified Laban Movement Analyst; former principal with Bella Lewitzky Dance Company, *Associate Professor of Dance* (modern dance, choreography, improvisation, Laban movement analysis, teaching of dance)

Molly Lynch, M.F.A. University of California, Irvine; Pilates Certified; Choreographer/Artistic Director of the National Choreographers Initiative; *Associate Professor of Dance* (ballet, pointe, repertory, partnering, arts management)

Donald McKayle, Choreographer/Director, *Professor Emeritus of Dance* (choreography, modern dance)

Lisa Marie Naugle, Ph.D., New York University, *Department Chair and Professor of Dance* (modern dance, choreography, dance and digital technology, improvisation, teaching of dance)

James Penrod, M.F.A. University of California, Irvine; C.M.A. Laban Institute of Movement Studies, *Professor Emeritus of Dance* (ballet, modern, dance notation, choreography, movement analysis)

Janice Gudde Plastino, Ph.D. University of Southern California, *Professor Emerita of Dance* (kinesiology/anatomy, research methods, choreography, dance science/medicine)

Nancy Lee Ruyter, Ph.D. Claremont Graduate School, *Professor of Dance* (dance history, Spanish dance, bibliography and research)

Alan Terricciano, M.A. Eastman School of Music, *Professor of Dance* (musical resources, music for dancers, dance accompaniment, composition, multimedia arts)

Tong Wang, M.F.A. University of Utah, Principal dancer with the Shanghai Ballet, Tulsa Ballet Theatre, Dayton Ballet, and Ballet West. *Assistant Professor of Dance* (ballet, choreography, men's ballet)

Sharon Wray, M.A. Middlesex University, *Assistant Professor of Dance* (jazz, choreography and improvisation)

Courses

DANCE 2. Dance Health and Injury Prevention. 4 Units.

An overview of factors that affect the health of dancers. Includes evaluation of general health measures and prevention and management of common dance injuries.

Restriction: Dance majors only.

DANCE 3. Scientific Concepts of Health. 4 Units.

Introduction to the scientific foundations of health, emphasizing those pertaining to success in college and lifetime wellness. Includes principles of cardiorespiratory, musculoskeletal, flexibility, and nutritional fitness. A variety of learning experiences will be offered to apply science to real life.

(II)

DANCE 4. Introduction to Quantitative Research in Exercise Science. 4 Units.

Introduction to quantitative scientific inquiry as it pertains to exercise science and related fields. Includes evaluation of primary scientific research literature, research design, data collection and analysis, and research communication.

(II)

DANCE 12A. Studio Workshop in Spanish Dance. 2 Units.

Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.

Repeatability: May be taken for credit 3 times.

DANCE 12B. Studio Workshop in Spanish Dance. 2 Units.

Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.

Prerequisite: DANCE 12A.

Repeatability: May be taken for credit 3 times.

DANCE 12C. Studio Workshop in Spanish Dance. 2 Units.

Principles of Spanish dance with focus on basic movement techniques, castanet work, and introduction to flamenco and other Spanish dance genres.

Prerequisite: DANCE 12B.

Repeatability: May be taken for credit 3 times.

DANCE 14. Social Dance. 2 Units.

Contemporary and historical forms. Current ballroom, disco, and Western square dance forms; Latin ballroom dances; dances from the 20s, 30s, and 40s.

Grading Option: Pass/no pass only.

DANCE 21A. Music for Dancers. 4 Units.

Emphasis on the development of musical skills most pertinent to the dancer: vocabulary, notational literacy, rhythmic and melodic acuity, score reading, and fundamental analysis; working with live accompaniment.

Restriction: Dance majors only.

DANCE 30A. Studio Workshop in Ballet I. 2 Units.

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 30B. Studio Workshop in Ballet I. 2 Units.

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 30A.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 30C. Studio Workshop in Ballet I. 2 Units.

Beginning ballet: fundamentals and principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 30A and DANCE 30B.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 34. Men's Studio Workshop in Ballet. 2 Units.

Emphasis on men's traditional ballet, techniques, and movements.

Prerequisite: DANCE 30A and DANCE 30B and DANCE 30C.

Repeatability: May be repeated for credit unlimited times.

DANCE 40A. Studio Workshop in Modern I. 2 Units.

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 40B. Studio Workshop in Modern I. 2 Units.

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 40C. Studio Workshop in Modern I. 2 Units.

Fundamentals of modern dance: principles of modern tradition developed from Graham, Humphrey, and Wigman.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50A. Studio Workshop on Jazz I. 2 Units.

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50B. Studio Workshop on Jazz I. 2 Units.

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50A.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 50C. Studio Workshop on Jazz I. 2 Units.

Fundamentals of jazz: principles of jazz dance and contemporary forms incorporating the personal point of view of the instructor.

Prerequisite: DANCE 50B.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

DANCE 52A. Workshop in Tap I. 2 Units.

Beginning tap: principles of rhythm and basic tap steps.

Repeatability: May be taken for credit 2 times.

DANCE 52B. Workshop in Tap I. 2 Units.

Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52A.

Repeatability: May be taken for credit 2 times.

DANCE 52C. Workshop in Tap I. 2 Units.

Beginning tap: principles of rhythm and basic tap steps.

Prerequisite: DANCE 52B.

Repeatability: May be taken for credit 2 times.

DANCE 60A. Choreography. 4 Units.

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Restriction: Dance Majors only.

DANCE 60B. Choreography. 4 Units.

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A.

Restriction: Dance majors only.

DANCE 60C. Choreography. 4 Units.

Beginning-to-intermediate study of principles of dance composition. May include composition assignments for stage and video. By audition, works may be shown quarterly in public studio performances.

Prerequisite: DANCE 60A and DANCE 60B.

Restriction: Dance majors only.

DANCE 80. Introduction to Ballet and Modern Dance. 4 Units.

Survey of nineteenth and twentieth-century ballet, modern dance, and theatre dance.

Overlaps with DANCE 90B, DANCE 90C, DANCE 90A.

Restriction: Non-major only.

(IV, VIII)

DANCE 81. American Ballet and Modern Dance since 1900. 4 Units.

A survey of American ballet and modern dance in the twentieth and twenty-first centuries. Lectures are supplemented by video.

Overlaps with DANCE 90C.

Restriction: Non-major only. Dance 81 and Dance 90C may not both be taken for credit.

(IV)

DANCE 82. Topics in World Dance. 4 Units.

Various topics in world dance studies focusing on historical, social, and cultural contexts.

Repeatability: May be repeated for credit unlimited times.

(VIII)

DANCE 85. Gender, Meaning, and Culture in Ballet. 4 Units.

Explores the way ballet as an art form and as a practice reflects culture, as well as embodying new ideas that read counter to conventional narratives.

(IV)

DANCE 90A. Dance History 1A. 4 Units.

Global perspectives. Topics and histories of dance and movement practices from various parts of the world.

Overlaps with DANCE 80.

Restriction: Dance majors have first consideration for enrollment. Dance 90A and Dance 80 may not both be taken for credit.

(IV, VIII)

DANCE 90B. Dance History 1B. 4 Units.

The history of dance in the western tradition from the Renaissance through the nineteenth century.

Prerequisite: DANCE 90A

Overlaps with DANCE 80.

Restriction: Dance majors have first consideration for enrollment. Dance 90B and Dance 80 may not both be taken for credit.

(IV, VIII)

DANCE 90C. Dance History 1C. 4 Units.

The history of dance in the western tradition: the twentieth and twenty-first centuries.

Prerequisite: DANCE 90B

Overlaps with DANCE 80, DANCE 81.

Restriction: Dance majors have first consideration for enrollment. Dance 90C and Dance 80 may not both be taken for credit. Dance 90C and Dance 81 may not both be taken for credit.

(IV, VIII)

DANCE 100. Kinesiology for Dance. 4 Units.

The study of the production of dance movement by the musculoskeletal system. Anatomical and dynamic analysis of dance movement.

Restriction: Dance majors only.

DANCE 103. Pilates. 2 Units.

Basics of technique emphasizing alignment, breath control, correction of muscular imbalances.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 104. Pilates Reformer. 2 Units.

Utilizes the Universal Reformer apparatus, aiding the student in core stabilization, correcting muscular imbalances, increasing flexibility, and improving strength.

Prerequisite: DANCE 103.

Restriction: Dance majors only.

DANCE 110. World Dance . 2 Units.

Studio workshop of dances and movement sources of specified countries or areas.

Repeatability: May be taken for credit 6 times as topics vary.

DANCE 125A. Teaching of Dance. 4 Units.

Pedagogy. The methods and theory of teaching dance forms.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C.

Restriction: Dance majors only. Upper-division students only.

DANCE 127A. Costume Design for Dance. 4 Units.

Costume design and construction specific to the body in motion. Theoretical study and practical execution.

Restriction: Dance majors only.

DANCE 130A. Pointe Class. 2 Units.

Beginning and intermediate pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B and DANCE 132C.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 130B. Pointe Class. 2 Units.

Beginning and intermediate pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 130A.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 130C. Pointe Class. 2 Units.

Beginning and intermediate pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 130A and DANCE 130B.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 132A. Studio Workshop in Ballet II. 2 Units.

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: (DANCE 30A and DANCE 30B and DANCE 30C) or audition. Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 132B. Studio Workshop in Ballet II. 2 Units.

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 132C. Studio Workshop in Ballet II. 2 Units.

Intermediate ballet and beginning pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 132A and DANCE 132B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 133A. Advanced Studio Workshop in Ballet III. 2 Units.

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: (DANCE 132A and DANCE 132B and DANCE 132C) or audition.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 133B. Advanced Studio Workshop in Ballet III. 2 Units.

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 133C. Advanced Studio Workshop in Ballet III. 2 Units.

Advanced intermediate ballet and pointe work; principles of classical ballet with an emphasis on technique.

Prerequisite: DANCE 133A and DANCE 133B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 134A. Advanced Studio Workshop in Ballet IV. 4 Units.

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or audition. DANCE 133C with a grade of B+ or better.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 134B. Advanced Studio Workshop in Ballet IV. 4 Units.

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 134C. Advanced Studio Workshop in Ballet IV. 4 Units.

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 134A and DANCE 134B.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 135A. Advanced Studio Workshop in Ballet V. 4 Units.

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: (DANCE 134A and DANCE 134B and DANCE 134C) or audition. DANCE 134C with a grade of B+ or better.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 135B. Advanced Studio Workshop in Ballet V. 4 Units.

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 135C. Advanced Studio Workshop in Ballet V. 4 Units.

Advanced ballet, pointe work, and performance styles: principles of classical ballet.

Prerequisite: DANCE 135A and DANCE 135B.

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 137. Repertory . 2 Units.

Rehearsal and performance of repertoire from established ballet, modern, or jazz choreographers.

Prerequisite: (DANCE 133A and DANCE 133B and DANCE 133C) or (DANCE 143A and DANCE 143B and DANCE 143C).

Repeatability: May be taken for credit 3 times.

Restriction: Dance majors only.

DANCE 139. Partnering. 2 Units.

Principles of partnering techniques in various dance performance styles.

Prerequisite: DANCE 133A and DANCE 133B and DANCE 133C and DANCE 143A and DANCE 143B and DANCE 143C.

Repeatability: May be taken for credit 4 times.

Restriction: Dance majors only.

DANCE 142A. Studio Workshop in Modern II. 2 Units.

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 40A and DANCE 40B and DANCE 40C.

Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 142B. Studio Workshop in Modern II. 2 Units.

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 142A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 142C. Studio Workshop in Modern II. 2 Units.

Introduction to the principles of motion, including the use of breath, gravity, spatial awareness, and time values.

Prerequisite: DANCE 142A and DANCE 142B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 143A. Advanced Studio Workshop in Modern III. 2 Units.

Builds on fundamentals of Dance 142A-B-C and introduces performance techniques.

Prerequisite: DANCE 142A and DANCE 142B and DANCE 142C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 143B. Advanced Studio Workshop in Modern III. 2 Units.

Builds on the fundamentals of 142A-B-C and introduces performance techniques.

Prerequisite: DANCE 143A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 143C. Advanced Studio Workshop in Modern III. 2 Units.

Builds on fundamentals of Dance 142A-B-C and introduces performance techniques.

Prerequisite: DANCE 143A and DANCE 143B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 144A. Advanced Studio Workshop in Modern IV. 2 Units.

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 143A and DANCE 143B and DANCE 143C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 144B. Advanced Studio Workshop in Modern IV. 2 Units.

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 144C. Advanced Studio Workshop in Modern IV. 2 Units.

Synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 144A and DANCE 144B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 150A. Studio Workshop in Tap II. 2 Units.

Intermediate tap: principles of beginning tap continued and developed.

Prerequisite: DANCE 52A and DANCE 52B and DANCE 52C.

Repeatability: May be taken for credit 2 times.

DANCE 150B. Studio Workshop in Tap II. 2 Units.

Intermediate tap: principles of beginning tap continued and developed.

Prerequisite: DANCE 150A.

Repeatability: May be taken for credit 2 times.

DANCE 150C. Studio Workshop in Tap II. 2 Units.

Intermediate tap: principles of beginning tap continued and developed.

Prerequisite: DANCE 150A and DANCE 150B.

Repeatability: May be taken for credit 2 times.

DANCE 152A. Intermediate Studio Workshop in Jazz II. 2 Units.

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 50A and DANCE 50B and DANCE 50C.

Prerequisites are for non-Dance majors only.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 152B. Intermediate Studio Workshop in Jazz II. 2 Units.

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 152C. Intermediate Studio Workshop in Jazz II. 2 Units.

Intermediate jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DANCE 153A. Advanced Studio Workshop in Jazz III. 2 Units.

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 153B. Advanced Studio Workshop in Jazz III. 2 Units.

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 153C. Advanced Studio Workshop in Jazz III. 2 Units.

Advanced jazz: principles of jazz dance and contemporary forms incorporating the personal views of the instructor.

Prerequisite: DANCE 153A and DANCE 153B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 154A. Advanced Jazz: Performance Techniques IV. 2 Units.

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 153A and DANCE 153B and DANCE 153C.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 154B. Advanced Jazz: Performance Techniques IV. 2 Units.

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 154C. Advanced Jazz: Performance Techniques IV. 2 Units.

Advanced jazz emphasizing performance techniques.

Prerequisite: DANCE 154A and DANCE 154B.

Repeatability: May be taken for credit 2 times.

Restriction: Prerequisite required and Dance majors only

DANCE 160. Improvisation. 2 Units.

Structured and experiential improvisation to heighten the personal intuitive processes, the kinesthetic sense, spatial and temporal awareness, and to encourage insights into the potential movement resources of the individual for performance and choreography. Course encourages freedom of exploration.

Repeatability: May be taken for credit 2 times.

DANCE 162A. Choreography II. 4 Units.

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 60A and DANCE 60B and DANCE 60C. Audition required.

Restriction: Dance majors only.

DANCE 162B. Choreography II. 4 Units.

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A. Audition required.

Restriction: Dance majors only.

DANCE 162C. Choreography II. 4 Units.

Directed choreographic projects for stage or video integrating the elements of stagecraft. In process or completed works may be shown quarterly in public studio or stage performances.

Prerequisite: DANCE 162A and DANCE 162B. Audition required.

Restriction: Dance majors only.

DANCE 163. Dance and Video Technology. 4 Units.

Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

Prerequisite: DANCE 60A.

Restriction: Dance majors only.

DANCE 164. Screendance. 4 Units.

Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 163.

Restriction: Dance majors only.

DANCE 165. Choreographic Projects. 1-4 Units.

Supervised choreographic projects for workshop productions.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors only.

DANCE 170. Dance Performance. 1-4 Units.

Rehearsal and performance in a faculty-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

DANCE 171. Dance Workshop. 1-4 Units.

Rehearsal and performance in a student-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

DANCE 172. Master of Fine Arts Concert. 1-4 Units.

Rehearsal and performance in a graduate student-choreographed production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

DANCE 174. UCI Dance Ensemble Performance. 1-4 Units.

Performance with the UCI Dance Ensemble.

Repeatability: May be taken for credit 6 times.

Restriction: Sophomores, juniors, and seniors only.

DANCE 176. UCI Jazz Dance Ensemble. 2-4 Units.

Rehearsal and performance in theatrical jazz dance, designed to provide an experience in assimilating various styles of jazz dance and in refining dance performance techniques. Students will master aspects of dance company promotion.

Prerequisite: DANCE 152A and DANCE 152B and DANCE 152C.

Repeatability: May be taken for credit 6 times.

Restriction: Sophomores, juniors, and seniors only.

DANCE 177. UCI Spanish Dance Ensemble. 1-4 Units.

Rehearsal and performance with the UCI Spanish Dance Ensemble. Flamenco and other Spanish dance genres are presented throughout the year for campus and off-campus events.

Repeatability: May be taken for credit 12 times.

DANCE 179. UCI Etude Ensemble. 4 Units.

Repertory and performances by undergraduate Dance majors. Concert presentations on and off campus. Faculty directed, student/faculty choreographed.

Prerequisite: Audition required.

Repeatability: May be taken for credit 9 times.

Restriction: Sophomores, juniors, and seniors only.

DANCE 180A. Laban Studies. 4 Units.

Elementary Labanotation and motif writing.

Prerequisite: DANCE 21A and DANCE 180C.

Restriction: Dance majors only.

DANCE 180B. Laban Studies. 4 Units.

Intermediate Labanotation and work with Laban Writer software.

Prerequisite: DANCE 180A.

Restriction: Dance majors only.

DANCE 180C. Laban Studies. 4 Units.

Laban movement analysis.

Prerequisite: DANCE 21A.

Restriction: Dance majors only.

DANCE 185. Critical Issues in Dance. 4 Units.

Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world. Course may be offered online.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance majors only.

DANCE 185W. Critical Issues in Dance. 4 Units.

Critical thinking and writing about dance, with a section on dance criticism and a major emphasis on persuasive writing about significant issues in the dance world. Course may be offered online.

Prerequisite: DANCE 90A and DANCE 90B and DANCE 90C. Satisfactory completion of the lower-division writing requirement.

Restriction: Dance majors only.

(Ib)
DANCE 193. ACTING FOR DANCERS. 1-4 Units.

Directed group studies of topics in dance.

Repeatability: May be taken for credit 3 times as topics vary.

DANCE 195. Arts Management. 4 Units.

Designed for students interested in the developmental and management of nonprofit arts organizations. Examines the organizational structure and areas of operation such as marketing, fundraising, budgeting, production, and administration.

Repeatability: May be taken for credit 2 times.

DANCE 197. Independent Study. 1-4 Units.

Individual independent projects in experimental laboratory, library, field, performance, under instructor's direction. Students can receive conceptual, creative, and theoretical instruction in the successful completion of a written report or performance.

Repeatability: May be repeated for credit unlimited times.

DANCE 199. Senior Thesis. 4 Units.

Directed research or creative activity for senior Dance majors. Research consists of a substantial essay on dance history, research in dance science, or the creation of original or reconstructed choreography.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Dance majors only.

DANCE 201. Seminar in Kinesiology for Dance. 4 Units.

Introduction to the anatomical, biomechanical, and physiological principles of dance movement.

Prerequisite: DANCE 100.

DANCE 210. Graduate Studio: World Dance. 2 Units.

Principles, techniques, and styles of selected genres of world dance such as those of Mexico, Spain, Japan, or other cultures.

Repeatability: May be taken for credit 6 times.

Restriction: Dance grad students only and consent of instructor to enroll.

DANCE 222. Musical Resources. 4 Units.

Detailed study of music as it relates to dance. Historical overview of musical form, style, and other elements. Analysis of various affinities between music and dance. Practical applications.

Prerequisite: DANCE 221.

DANCE 225. Seminar in the Teaching of Dance Techniques. 4 Units.

Principles and theories of teaching dance techniques. Supervised presentation and teaching of technique class.

DANCE 231A. Graduate Studio: Ballet. 2 Units.

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 231B. Graduate Studio: Ballet. 2 Units.

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 231C. Graduate Studio: Ballet. 2 Units.

Advanced ballet, pointe work, and performance style: principles of the classical ballet with an emphasis on technique.

Prerequisite: DANCE 231B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 241A. Graduate Studio: Modern. 2 Units.

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 241B. Graduate Studio: Modern. 2 Units.

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 241C. Graduate Studio: Modern. 2 Units.

Advanced modern dance: synthesis of fundamentals and performance technique. Aims to bring students to the preprofessional level.

Prerequisite: DANCE 241B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 251A. Graduate Studio: Jazz. 2 Units.

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 251B. Graduate Studio: Jazz. 2 Units.

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251A.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 251C. Graduate Studio: Jazz. 2 Units.

Principles of jazz dance and contemporary forms, incorporating the personal views of the instructor.

Prerequisite: DANCE 251B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Audition required.

DANCE 252A. Graduate Studio: Tap. 2 Units.

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Repeatability: May be taken for credit 4 times.

DANCE 252B. Graduate Studio: Tap. 2 Units.

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252A.

Repeatability: May be taken for credit 4 times.

DANCE 252C. Graduate Studio: Tap. 2 Units.

An overview of tap concentrating on the development of various technique forms using basic and intermediate principles.

Prerequisite: DANCE 252B.

Repeatability: May be taken for credit 4 times.

DANCE 261A. Graduate Studio in Choreography. 4 Units.

Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Repeatability: May be repeated for credit unlimited times.

DANCE 261B. Graduate Studio in Choreography. 4 Units.

Graduate work in dance composition emphasizing the individual aesthetic. Assignments in movement discovery, solo and group forms, with the main emphasis on independent work.

Prerequisite: DANCE 261A.

Repeatability: May be repeated for credit unlimited times.

DANCE 264. Screendance. 4 Units.

Overview of dance for film and choreography for the camera. Aesthetics of creating dance for the screen. Approaches for delivery of dance films to an audience, including projection, DVD, Web, and mobile devices. A final dance film project is required.

Prerequisite: DANCE 281.

DANCE 265. Performance Capture. 4 Units.

Projects in performance capture, motion capture, motion tracking, and computer animation. Introduction to techniques for sensing and recording human movement and transforming the result into digital representations using computer technology. Discussion of aesthetic issues related to movement representation. Choreographic projects.

Prerequisite: DANCE 264 and DANCE 281.

DANCE 281. Dance and Video Technology. 4 Units.

Introduction to video and audio documentation of dance performance. Integrating dance performance within the film aesthetic. Techniques and technologies of video cameras, formats, editing, and projection. Overview of video compression and DVD authoring.

DANCE 282. Seminar in Movement Analysis. 4 Units.

Theories of movement analysis and nonverbal communication applied to dance.

DANCE 283. Critical Issues in Dance. 4 Units.

Reading, writing, discussing, and presenting key issues that relate to dance studies. Basics of dance analysis and criticism. Special emphasis on effective ways of defining, clarifying, and arguing for points of view.

Prerequisite: DANCE 284.

DANCE 284. Bibliography and Research. 4 Units.

Understanding the field of dance studies, available resources, research methods, and academic formats in preparation for thesis writing.

DANCE 285. Graduate Projects. 4 Units.

Projects may be educational, choreographic, scientific, historical, or philosophical in scope and must have faculty advisor approval.

Repeatability: May be taken for credit 6 times.

DANCE 286. Thesis. 4 Units.

Substantial research in a topic approved by the student's graduate committee. Results of the research must be written in approved thesis style.

Repeatability: May be taken for credit 6 times.

DANCE 287. Graduate Lectures in Dance. 1-4 Units.

A series of lectures and discussions of announced topics in dance. Content may be from history, ethnology, notation, medicine, music, or other areas in the field.

Repeatability: Unlimited as topics vary.

DANCE 296. Proseminar in Dance History. 4 Units.

Discussion seminar with emphasis on reading and thinking about problems in dance history; presentation of oral and written reports.

Repeatability: May be taken for credit 2 times as topics vary.

DANCE 297. Directed Reading. 1-4 Units.

Topic to be approved by instructor. Paper required.

Repeatability: May be repeated for credit unlimited times.

Overlaps with DANCE 297.

DANCE 399. University Teaching. 4 Units.

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Dance graduate students only.

Department of Drama

249 Drama Building; (949) 824-6614

<http://drama.arts.uci.edu/>

Daniel Gary Busby, **Department Chair**

The Bachelor of Arts program in Drama combines broad liberal study and comprehensive training in several subdisciplines of drama. Each Drama major studies and practices in each of several mutually related areas of the theatre: performance, literature, history, criticism, design, stage management, and production. The curriculum is structured to relate studio practices, technical resources, and production techniques to the development of dramatic literature and current critical theory.

Students should especially note the division of upper-level literature courses into the following clusters—Theory and Criticism (103–109), Periods and Genre (110–119), and Performance and Culture (121–129). These clusters describe differing approaches to the material being presented, whether, for example, analysis and discussion is weighted toward a more strictly defined theoretical and philosophical context, a more traditional historical approach, or an approach that more emphasizes cultural frameworks and issues.

The program is designed for students who, while not necessarily planning to make the theatre their vocation, have a serious interest in the literature, theory, and practice of drama, as well as for students preparing to work professionally in the theatre, often after more specialized training at the graduate level.

The Drama Department also offers a specialized degree for students showing professional aptitude for a career as a musical theatre performer. The Bachelor of Fine Arts (B.F.A.) in Music Theatre offers the Department's most talented and motivated students the opportunity to train in acting, singing, and dancing for the stage. Students who begin their tenure at UCI as a freshman Drama major may audition for the program upon acceptance into the Music Theatre Workshop, Level III (DRAMA 143A). Transfer students may audition after completing one quarter of Music Theatre Workshop, Level II (DRAMA 142). B.F.A. students are given priority when enrolling in all music theatre courses. B.F.A. auditions are held three times per year: during Welcome Week and finals week of fall and winter quarters. A grade point average of 3.0 in musical theatre courses completed prior to the B.F.A. audition is required.

The Department of Drama is a member of the University/Resident Theatre Association (U/RTA).

Careers for the Drama Major

A degree in Drama may or may not lead to professional employment in theatre or film.

Graduates in Drama at UCI have performed in Broadway plays, regional and summer theatres, and in films and television. They serve as artistic directors, designers, art directors, business managers, and performers

at more than 100 theatre companies, and as faculty at more than 75 institutions of higher learning.

Not all Drama students become professional theatre artists. Many embark upon careers in law, business, arts management, advertising, and teaching; others pursue further study at UCI or elsewhere.

Requirements for the B.A. Degree in Drama

All students must meet the University Requirements (p. 60).

School Requirements: None.

Departmental Requirements for the Major

DRAMA 10 Introduction to Production Theory

Select one of the following:

DRAMA 15	Performance Now
DRAMA 20A	Culture in Performance
DRAMA 20B	Culture in Performance
DRAMA 20C	Culture in Performance

One year in acting:

DRAMA 30A	Acting
DRAMA 30B	Acting
DRAMA 30C	Acting

One year survey in the development of drama: ¹

DRAMA 40A- 40B- 40C	Development of Drama and Development of Drama and Development of Drama
---------------------	--

Select three of the following: ²

DRAMA 50A	Introduction to Costume Design
DRAMA 50B	Introduction to Scenic Design
DRAMA 50C	Introduction to Lighting Design
DRAMA 50D	Introduction to Sound Design
DRAMA 50E	Introduction to Stage Management
DRAMA 50F	History and Theories of Scenography

Select seven upper-division courses, which must include three dramatic literature courses from DRAMA 103–129, or 180 (excluding DRAMA 101, 198, and 199).

Theatre Production (DRAMA 101) requirements:

Freshmen—eight units, of which four units must be completed during the first year of residency at UCI;

Transfer Students: Sophomores—six units, of which four units must be completed during the first year of residency at UCI; Juniors and Seniors—four units, which must be completed during the first year of residency at UCI.

¹ Students are required to take DRAMA 40A, DRAMA 40B, DRAMA 40C in their sophomore year, after completion of the lower-division writing requirement.

² Students entering the Department as freshman must complete the requirement of three courses chosen from DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D, DRAMA 50E, DRAMA 50F by the end of their junior year. All other students must complete these courses within one year of entering the major.

Sample Program for Freshmen

Fall	Winter	Spring
DRAMA 30A	DRAMA 30B	DRAMA 30C
DRAMA 10	DRAMA 15	Drama 50
Drama 101 (2 units)	Drama 101 (2 units)	General Education
WRITING 39B	WRITING 39C	General Education

Requirements for the B.F.A. Degree in Music Theatre

All students must meet the University Requirements (p. 60).

School Requirements: None.

Department Requirements for the Major

DRAMA 10 Introduction to Production Theory

Select one of the following:

DRAMA 15	Performance Now
DRAMA 20A	Culture in Performance
DRAMA 20B	Culture in Performance
DRAMA 20C	Culture in Performance

DRAMA 30A- 30B- 30C Acting and Acting and Acting

DRAMA 40A- 40B- 40C Development of Drama and Development of Drama and Development of Drama

Select one of the following design courses:

DRAMA 50A	Introduction to Costume Design
DRAMA 50B	Introduction to Scenic Design
DRAMA 50C	Introduction to Lighting Design
DRAMA 50D	Introduction to Sound Design
DRAMA 50E	Introduction to Stage Management
DRAMA 50F	History and Theories of Scenography

DRAMA 100 University Theatre

Theatre Production (DRAMA 101) requirements:

Freshmen—eight units, of which four units must be completed during the first year of residency at UCI

Transfer Students: Sophomores—six units, of which four units must be completed during the first year of residency at UCI; Juniors and Seniors—four units, which must be completed during the first year of residency at UCI

Select one Dramatic Literature course from the following: DRAMA 103–109, or 180.

DRAMA 136	Music Theatre Acting
DRAMA 142	Music Theatre Workshop II
DRAMA 143A- 143B- 143C	Music Theatre Workshop III and Music Theatre Workshop III and Music Theatre Workshop III
DRAMA 144	Music Theatre Workshop IV
DRAMA 145	Music Theatre Singing (taken three times)
DRAMA 146	NYSP-Preparation

DRAMA 148A- 148B- 148C	History of American Musical Theatre and History of American Musical Theatre
DRAMA 149	Music Proficiency for Actors
DRAMA 176	Script and Score
DRAMA 177	Song Repertoire
Complete A, B, and C in any combination from the following:	
DRAMA 182A- 182B- 182C	Music Theatre Movement and Music Theatre Movement and Music Theatre Movement
DRAMA 183A- 183B- 183C	Music Theatre Dance and Music Theatre Dance and Music Theatre Dance
Plus each of the following courses when in residence in the New York Satellite Program:	
DRAMA 190	NYSP-Acting
DRAMA 191	NYSP - Dance
DRAMA 192	NYSP - Singing
DRAMA 193	NYSP - Performance
DRAMA 194	NYSP-UCI Residency
Also complete two ballet classes, one tap class, and one jazz class in Dance.	

Application Process to Declare the Major

Students who begin their tenure at UCI as a freshman Drama major may audition for the program upon acceptance into the Music Theatre Workshop, Level III (DRAMA 143A). Transfer students may audition after completing one quarter of Music Theatre Workshop, Level II (DRAMA 142).

Departmental Honors Programs

Honors in Acting Program

Admission to the Honors in Acting Program requires both eligibility and a special audition. The eligibility requirements for sophomore-level transfer students and native UCI students are (1) at least one year in good standing as a UCI Drama major; (2) completion of DRAMA 130 or DRAMA 136 and at least one section of either DRAMA 135 or DRAMA 142, all at UCI; (3) honors students must possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all acting courses; (4) performance in at least three official UCI Drama productions; (5) completion of six units of Drama 101 (Production/Crew); and (6) completion of the eligibility form.

The eligibility requirements for junior-level transfer students are (1) one year in good standing as a UCI Drama major; (2) completion of DRAMA 130 or DRAMA 136 at UCI; (3) honors students must possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all acting courses; (4) completed performance in at least one official UCI Drama production; (5) completion of four units of Drama 101; and (6) completion of eligibility form.

A student's audition will determine final admission to the Honors in Acting program. Only truly exceptional students, no more than 10 to 20 percent of those eligible, will be admitted. The Honors auditions, for eligible candidates only, are held at the end of fall quarter and by special arrangement. Auditions will consist of a standard presentation:

one classical and one modern monologue, totaling no more than three minutes.

Honors in Acting Program students receive (1) the "Honors in Acting" notation on their official transcript at graduation; and (2) nomination and recommendation for national University/Resident Theatre Association (U/RTA) auditions. Honors in Acting students may also be eligible to join M.F.A. Acting students in on-campus auditions for professional theatres and attend M.F.A. Actors' "Dynamics" classes.

Honors in Design/Technology Program

The Honors in Design/Technology Program provides the opportunity for Drama majors to concentrate on the study and practice of scenery, costume, lighting, sound design, or technology. Honors in Design/Technology students study basic and advanced design and production techniques, participate in classes with graduate design students, and may serve as an assistant to a graduate student or faculty designer, or design a production at UCI.

Eligibility requirements are (1) at least one year in good standing at UCI as a Drama major; (2) completion of DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D for Scenic or Costume designers; or completion of DRAMA 50C, DRAMA 50D and two of DRAMA 50A, DRAMA 50B, or DRAMA 50F for Sound and Lighting designers (3) completion of at least two courses selected from DRAMA 50E, upper-division studio courses (Drama 150–162, 167–169, 171, or 179), or graduate-level design courses, including at least one from the design area in which the student is applying for honors; (4) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all design and production technique courses; (5) completion of four out of eight units of Drama 101 (Theatre Production); and (6) completion of the eligibility form.

Admission to the Honors in Design/Technology Program is competitive. Students may be admitted as early as the winter quarter of their sophomore year. Upon completion of eligibility requirements, the student will schedule an informal portfolio review with a member of the design faculty appropriate to the student's specialty area(s). The selected faculty mentor may recommend that (1) the student is ready to proceed with a formal portfolio review and presentation to the Design faculty, (2) the student rework the content and/or presentation of the material for reconsideration by the faculty mentor, or (3) the student is not ready or able to proceed with Honors in Design/Technology.

Only truly exceptional students will be admitted to Honors in Design/Technology as determined by the Design faculty.

Honors in Design/Technology students receive (1) the "Honors in Design/Technology" notation on their official transcript at graduation; (2) nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews; and (3) advanced production assignments, which may include an assistant design with a graduate student or faculty designer, a design for a budgeted and technically supported production, or an advanced crafts project for production.

Honors in Design/Technology students are expected to maintain a high level of performance and commitment to their work and the Drama Department. Honors students meet with their faculty mentor at the beginning of every quarter to evaluate their progress and check that all grade, course, and production requirements are being satisfied.

Once admitted into the Honors in Design/Technology Program, students are expected to:

1. Maintain an overall GPA of at least 3.2, with a GPA of at least 3.4 in all design and production technique courses.
2. Remain in good standing as a Drama major.
3. Satisfy any provisional conditions for acceptance into the Honors in Design/Technology program.
4. Complete production assignments as assigned by the faculty mentor.
5. Continue to take at least two courses (as enumerated in the eligibility section) or independent studies per year, at least half of which must come from the area of design in which the student is applying for honors.
6. Maintain the Drama Department's CORE values (download the document at <http://drama.arts.uci.edu/docs/CodeOfConduct.doc>).

Failure to maintain these expectations, as determined by the Drama faculty, will result in being dismissed from the Honors in Design/Technology program.

For more information contact the Head of Design in Drama.

Honors in Directing Program

The Honors in Directing Program provides the opportunity for Drama majors to concentrate on the study and practice of stage direction. Honors in Directing students study basic and advanced directing techniques, participate in the directing studio classes with graduate Directing students, and direct two full plays in the Director Class Projects series. Honors students also have the opportunity to receive credit as the assistant director to a Drama Department main season show, or as a production internship with a professional theatre company.

Admission to the Honors in Directing Program is competitive. Candidates must first complete DRAMA 184 (Directing) and receive instructor approval to enroll in DRAMA 185 (Advanced Directing). Candidates must apply, as a director, for DRAMA 198 (Director Class Project) by submitting a proposal to direct a play in the Director Class Project. If the proposal is accepted, the candidate must declare to the Head of Directing that the production is to be counted as an audition for admission to the Honors in Directing Program. A committee of three Drama faculty members, including the Head of Directing, will then see and evaluate the production for clarity of interpretation, unity of style, strength of acting, and ensemble performance, and will examine the candidate's self-evaluation and the evaluations of the director by members of the cast. The Head of Directing will inform the candidate of the committee's decision as to whether or not the candidate is admitted to the Honors Program.

Undergraduate Drama majors can be admitted into the program as early as the winter quarter of their freshman year but no later than the spring quarter of their junior year. Students may be admitted to the program retroactively if all the requirements for Directing Honors have been met by their final year, but only if a faculty committee of three has seen their workshops and agrees to admit the candidate.

To achieve the Honors in Directing distinction, students must fulfill all the courses required of the regular Drama major, with an overall GPA of 3.2 or higher. In addition, students must complete the following courses with a GPA of 3.4 or higher:

1. DRAMA 184 (Directing).
2. Two courses in DRAMA 185 (Advanced Directing). In this course, undergraduate Directing students present work in the Directing Laboratory along with graduate Directing students.

3. Two Director Class projects, one of which must be taken as DRAMA 198 (Director Class Project) with the candidate serving as director. The candidate must stage a second Director Class Project as DRAMA H198 (Honors Director Class Project), for which a letter grade is earned.
4. Four additional units to be satisfied by any of the following: DRAMA 199 (as a summer internship, approved by the Head of Directing, with the candidate serving a professional theatre company as director, assistant director, or production assistant); DRAMA 199 (as a production/directing project for Playwright's Workshop); DRAMA 100 (as assistant director to a faculty director); or DRAMA 199 (as assistant director to a graduate director's thesis production).

Honors candidates meet with the Head of Directing at the beginning of every quarter to evaluate their progress and to check that all grade and course requirements are being satisfied. Successful graduating seniors will receive the "Honors in Directing" notation on their official transcript and will receive a nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews.

NOTE: All of the above courses are open to all students even though they may not qualify for the Honors Program.

Honors in Dramatic Literature, History, and Theory Program

The Honors in Dramatic Literature, History, and Theory Program is designed to challenge superior students beyond the scholarly requirements of the Drama major. It provides them with the opportunity to advance their knowledge of dramatic literature, history, and theory and to further develop their writing, analytical, and research skills. An additional purpose of the program is to better prepare students for graduate study in not only dramatic literature, history, and theory, but in all fields in the humanities and social sciences, as well as in law.

Eligibility requirements are (1) completion of DRAMA 40A, DRAMA 40B, DRAMA 40C and two courses selected from Drama 103–129 (for upper-division writing credit), or equivalents to these courses from other institutions; (2) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all dramatic literature, history, and theory courses; and (3) completion of the eligibility form.

Admission to the Honors in Dramatic Literature, History, and Theory Program is competitive. Students must apply to the program prior to the spring quarter of their junior year. Upon completion of eligibility requirements, applicants must submit at least two critical essays, most likely written previously for courses, totaling no more than 30 pages. These essays will be used by the Honors Committee (comprised of the Head of Dramatic Literature, History, and Theory and two additional members of the Drama faculty) to determine admission. Only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted.

Beyond fulfilling the regular requirements of the Drama major, honors students must take three additional upper-division courses in dramatic literature, history, and/or theory, one of which must be focused on theory. Upper-division courses in other departments may be used to fulfill these requirements, as long as the Honors Committee approves them.

Honors students must also write an honors thesis, a 30–40 page research paper written under the supervision of a faculty member on a topic chosen by the student. In consultation with the student, the adviser for this project is selected before the end of the fall quarter of the student's senior year. Students develop their projects until the spring quarter when they enter

the writing phase. It is only during the spring quarter that students achieve full course credit for their work on the thesis, in the form of an independent study course with their advisor. This independent study is the final course of the program.

Successful graduating seniors will receive the "Honors in Dramatic Literature, History, and Theory" notation on their official transcript.

Honors in Music Theatre

Successful graduating seniors in both the B.A. in Drama and the B.F.A. in Music Theatre can achieve Honors in Music Theatre. An overall GPA of 3.2 or higher is required along with an overall GPA of 3.4 in all music theatre courses. B.F.A. students need to complete all course work listed under "Departmental Requirements for the B.F.A. Major" while B.A. students need to complete the following additional music theatre courses:

DRAMA 142	Music Theatre Workshop II
DRAMA 143A- 143B- 143C	Music Theatre Workshop III and Music Theatre Workshop III and Music Theatre Workshop III
DRAMA 145	Music Theatre Singing (taken three times)
DRAMA 146	NYSP-Preparation
DRAMA 148A- 148B- 148C	History of American Musical Theatre and History of American Musical Theatre and History of American Musical Theatre
DRAMA 149	Music Proficiency for Actors
DRAMA 176	Script and Score
Select one of the following in any combination:	
DRAMA 182A- 182B- 182C	Music Theatre Movement and Music Theatre Movement and Music Theatre Movement
DRAMA 183A- 183B- 183C	Music Theatre Dance and Music Theatre Dance and Music Theatre Dance
DRAMA 190	NYSP-Acting
DRAMA 191	NYSP - Dance
DRAMA 192	NYSP - Singing
DRAMA 193	NYSP - Performance
DRAMA 194	NYSP-UCI Residency
Two ballet classes in Dance.	
One tap class in Dance.	
One jazz class in Dance.	

At graduation, successful Honors students receive the "Honors in Music Theatre" notation on their transcripts.

Honors in Stage Management Program

The Honors in Stage Management Program provides the opportunity for Drama majors to concentrate on the study and practice of stage management. Honors students study basic and advanced stage management techniques, participate in classes with graduate stage managers, work as assistant stage managers with the graduate stage managers on graduate student-directed and faculty-directed productions, and stage manage a graduate student-directed or faculty-directed production at UCI.

Eligibility requirements are (1) minimum one year in good standing at UCI as a Drama major; (2) completion of three of the following: DRAMA 50A, DRAMA 50B, DRAMA 50C, DRAMA 50D, DRAMA 50F or equivalent courses; (3) completion of DRAMA 50E; (4) possess and maintain an overall GPA of at least 3.2, with a GPA of 3.4 or higher in all stage management and production courses; (5) completion of eight units of Drama 101 (Theatre Production); and (6) completion of the eligibility form.

Admission to the Honors in Stage Management Program is competitive. Students may be admitted as early as the winter quarter of their sophomore year but no later than the spring quarter of their junior year. Only truly exceptional students (no more than 10 to 20 percent of those eligible) will be admitted to the program as determined by the Honors Committee. Upon completion of eligibility requirements, the student will submit to the Honors Committee: (1) two prompt books; (2) a resume including all stage management and production experience; (3) letters of reference from two directors with whom the student has worked; and (4) a written paper on the subject of stage management.

Students receive the "Honors in Stage Management" notation on their final transcript; nomination and recommendation for national University/Resident Theatre Association (U/RTA) interviews; assistant stage manager assignments working with graduate stage managers; and a stage management assignment on a graduate student-directed or faculty-directed production.

Honors candidates meet with the Head of Stage Management at the beginning of every quarter to evaluate their progress.

Master of Fine Arts Program

Degree Offered

M.F.A. in Drama, with emphasis in Acting, Directing, Design, or Stage Management.

A graduate emphasis in Feminist Studies also is available. Refer to the Department of Women's Studies (p. 565) section of the *Catalogue* for information.

Admission

Applicants for admission to the degree program must meet the general requirements for admission to graduate study and hold a B.A., B.F.A., or higher degree.

Applicants must submit dossiers of biographical information and theatrical experience, together with photographs, essays, reviews, production books, and portfolios, as appropriate.

Normally an audition is required for all applicants who intend to follow the curriculum in Acting. UCI coordinates its auditions with the University/Resident Theatre Association (U/RTA), and conducts auditions, both for U/RTA finalists and UCI applicants, in New York, Chicago, San Francisco, and Irvine during January and February. Other U/RTA audition sites may be considered. Interviews for applicants in Directing, in Design, and in Stage Management also are required.

General Degree Requirements

Normally three years of residence is required. Each candidate must enroll for three courses each quarter for nine quarters, exclusive of summer sessions.

The normative time to degree for students in the M.F.A. program is three years. Residence is required. The maximum time to degree can be extended to four years only through petition to the Head of the Program for extenuating circumstances. Students who do not complete the degree in four years will be dropped from the program.

During the first year of residence each candidate will prepare, for credit, two graduate projects, in acting, directing, design, stage management, theatrical research, or a combination of two of these. Satisfactory completion of these projects, as determined by the faculty, is prerequisite to entering the second year of the program.

The required thesis normally consists of directing, designing, stage managing, or playing a principal role in a major production, and collecting in essay form the evidences of research, analysis, and judgments which formed a part of the production experience.

Each graduate student is expected to participate in productions throughout residence at UCI.

Specific course requirements must be satisfied in one of the following four areas:

Acting

Select nine graduate studios in acting:

DRAMA 200	Graduate Studio: Acting
Select, in tandem, nine graduate studios in:	
DRAMA 201	Graduate Studio: Voice
DRAMA 202	Graduate Studio: Speech
DRAMA 203	Graduate Studio: Movement
DRAMA 206	Graduate Studio: Voice/Movement Dynamics

Select three master classes in acting from various topics offered in Drama 219.

Complete:

DRAMA 235	Script Analysis and Research
-----------	------------------------------

Select one seminar in dramatic literature, performance theory, criticism, history of theatre, or contemporary theatre from the following:

DRAMA 220–225

Select six graduate projects, of which two may be the following professional internships:

DRAMA 240	Graduate Projects
or DRAMA 295	Professional Internship

A total of 110 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

Design

Select seven graduate studios in design seminars:

DRAMA 255	Graduate Design Seminar
-----------	-------------------------

Select six courses in graduate projects (one of which may be a professional internship: DRAMA 295):

DRAMA 240	Graduate Projects
-----------	-------------------

Select two elective courses from course numbered 100 and above.

Course numbered 100 and above.

Select four courses in dramatic literature, performance theory, criticism, or history of theater from the following:

DRAMA 220	Seminar in Dramatic Literature
DRAMA 221	Seminar in Criticism
DRAMA 248A- 248B- 248C	History of American Music Theatre and History of American Musical Theatre

DRAMA 164A	History of Costume
DRAMA 164B	History of Costume

or other substitutions as approved by mentor.

Select three courses in design techniques from the following:

Drama 258–282

Complete three foundation courses taken during the first year of study:

DRAMA 251A- 251B- 251C	Foundations of Theatre and Foundations of Theatre and Foundations of Theatre
------------------------	--

Select eight Colloquium courses:

DRAMA 259	Theatre Colloquium
-----------	--------------------

Complete one Survival and Professional Practice in Design:

DRAMA 256	Survival and Professional Practice in Design
-----------	--

A total of 112 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

Directing

Select nine graduate studios in directing:

DRAMA 211	Graduate Studio: Directing (one of which is the creation of a thesis portfolio and resume)
-----------	--

Complete two courses in Foundations:

DRAMA 251A- 251C	Foundations of Theatre and Foundations of Theatre
------------------	---

Select one course in Multiculturalism:

DRAMA 220	Seminar in Dramatic Literature
-----------	--------------------------------

Select two courses as professional internships:

DRAMA 295	Professional Internship
-----------	-------------------------

Select two courses in acting:

DRAMA 200	Graduate Studio: Acting (may include movement, voice classes approved by the faculty program head)
-----------	--

Select two seminars in dramatic literature, performance theory, criticism, theatre history

DRAMA 199	Project in Theatre
DRAMA 221	Seminar in Criticism

DRAMA 248A- 248B- 248C	History of American Music Theatre and History of American Musical Theatre and History of American Musical Theatre
------------------------	---

Select six projects:

DRAMA 240	Graduate Projects (of which one is the thesis and one is an off-site production)
-----------	--

Select two design or stage management courses (approved by the faculty program head)

DRAMA 157	Lighting Composition
DRAMA 159	Proseminar in Theatre Design
DRAMA 199	Project in Theatre
DRAMA 254	Graduate Stage Management
DRAMA 255	Graduate Design Seminar

And a minimum of three electives.

A total of 116 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

Stage Management

Select seven graduate studios in stage management:

DRAMA 254	Graduate Stage Management
-----------	---------------------------

Complete one thesis project course:

DRAMA 257E	Thesis Writing Project-Stage Management
------------	---

Select seven courses in graduate projects:

DRAMA 240	Graduate Projects
-----------	-------------------

Complete one professional internship course:

DRAMA 295	Professional Internship
-----------	-------------------------

Select three electives as approved by the faculty advisor from the following:

graduate-level (Drama 200+)
upper-division (Drama 100–199)

Complete three courses in foundations in theatre:

DRAMA 251A- 251B- 251C	Foundations of Theatre and Foundations of Theatre and Foundations of Theatre
------------------------	--

Select two courses in production techniques from the following:

Drama 150–159, 162–164, 167–168, 170–171, 260A, B–262, 265–266
--

Complete one seminar in script analysis and research:

DRAMA 235	Script Analysis and Research
-----------	------------------------------

Select one course in dramatic literature, criticism, contemporary theatre, or history of music theatre from the following:

DRAMA 220	Seminar in Dramatic Literature
DRAMA 221	Seminar in Criticism
DRAMA 248A- 248B- 248C	History of American Music Theatre and History of American Musical Theatre and History of American Musical Theatre

A total of 112 quarter units in graduate or approved upper-division undergraduate courses must be completed with a grade of at least B in each course.

Doctoral Degree Program

Degree Offered

Ph.D. in Drama and Theatre.

This is a joint program offered by the UCI Department of Drama and the UCSD Department of Theatre and Dance.

Preparation

Students with a B.A. (minimum GPA of 3.5), M.A., or M.F.A. degree in Drama and Theatre are eligible for admission to the doctoral program. Students with training in literature (or another area in the humanities) will also be considered, provided they can demonstrate a background in drama or theatre. Experience in one of the creative activities of theatre (acting, directing, playwriting, design, dramaturgy) enhances a student's chances of admission.

All applicants are required to take the Graduate Record Examination and to submit samples of their critical writing.

While not required for admission, a working knowledge of a second language is highly desirable (see Language Requirement).

Course of Study

Students are required to take a minimum of 144 units, which is equivalent to four years of full-time study (full-time students must enroll for a minimum of 12 units each quarter). Forty of these units are taken in required seminars; the balance is made up of elective seminars, independent study and research projects (including preparing the three qualifying papers), and dissertation research. Students must take a minimum of one seminar per year in the UCSD Department of Theatre and Dance. The program of study makes it possible for students to take a significant number of elective courses and independent studies both with faculty in Drama and Theatre and in other departments.

Required Courses

Students must take a minimum of 12 units (three seminars) each of DRAMA 290 (Dramatic Literature and Theatre History Prior to 1900) and DRAMA 291 (Dramatic Literature and Theatre History, 1900 to Present), and 16 units (four seminars) of DRAMA 292 (Cultural and Critical Theory).

All graduate courses may be repeated when the topic varies. Descriptions of the topics to be treated in a given academic year are published by the Department in the fall. Enrollment in each course requires the consent of the instructor. The courses are limited to registered doctoral students.

These 10 required seminars must be completed by all students, including those who have an M.A. or an M.F.A. degree, before the end of the third year. In addition, students must pass comprehensive examinations at the end of their first and second years.

DRAMA 293 (Directed Studies) and DRAMA 294 (Dissertation Research) are also required.

Comprehensive Examinations

In the first year, students prepare for the Written Comprehensive Examination, which is based on a reading list of approximately 150 titles ranging from the Ancient Greeks to the present. Students take this examination at the beginning of the fall quarter of their second year. (Comprehensive examinations are scheduled at the beginning of fall quarter in order to allow students the summer to prepare.) Students who fail the Written Comprehensive may retake it no later than the first week of winter quarter of their second year. Students who fail the Written Comprehensive for a second time are dismissed from the program.

In their second year, students prepare for the Oral Comprehensive Examination. The reading list for this examination is designed to permit students to acquire a knowledge of their dissertation subject area, broadly conceived. The reading list is compiled by the student and the dissertation

advisor, in consultation with other members of the faculty, as appropriate; the reading list must be established by the end of winter quarter of the second year. Students take the Oral Comprehensive at the beginning of the fall quarter of their third year. Students also submit a dissertation prospectus (approximately five pages) when they take this examination. Students who fail the Oral Comprehensive may retake it no later than the first week of winter quarter of their third year. Students who fail the Oral Comprehensive for a second time are dismissed from the program.

Advancement to Candidacy: Three Qualifying Papers

Students normally select a dissertation advisor during their second year and must do so before the end of spring quarter of that year. In consultation with the dissertation advisor and other faculty members, students develop topics for three qualifying papers, which are written during their third year. The three qualifying papers—one long (approximately 50 pages) and two short (approximately 30 pages each)—must be completed by the end of the third year; these completed papers provide the basis for the Oral Qualifying Examination. Students write the long paper under the direction of their dissertation advisor; it is understood that the long paper is preparatory to the dissertation. The short papers deal with other related topics, subject to the approval of the student's advisors; the two short papers are understood as engaging in exploring the larger contexts of the dissertation. The normative time for students to pass the Qualifying Examination and advance to candidacy is at the end of their third year; students must advance to candidacy no later than the end of fall quarter of their fourth year. Once advanced to candidacy, students write their dissertation which, upon completion, is defended in a final oral examination.

Students may select a dissertation advisor from either the UCI Department of Drama or the UCSD Department of Theatre and Dance. All UCI doctoral dissertation committees must include at least one faculty member from UCSD.

Language Requirement

Students are required to complete an advanced research project using primary and secondary material in a second language (materials may include live and/or recorded performance; interviews with artists, critics, and scholars; and other non-documentary sources, as well as more conventional textual sources). This requirement may be satisfied by writing a seminar paper or a qualifying paper (see Advancement to Candidacy above) that makes extensive use of materials in a second language. The second-language requirement must be satisfied before the end of the third year. This requirement will not be waived for students who are bi- or multilingual; all students are required to do research-level work in more than one language.

It is assumed that students will have acquired a second language before entering the doctoral program, although second-language proficiency is not a requirement for admission. While students may study one or more second languages while at UCI or UCSD, language courses may not be counted toward doctoral program requirements.

Teaching

Students are required to teach a minimum of four quarters. No more than eight units of apprentice teaching may be counted toward the required 144 units.

Departmental Ph.D. Time-Limit Policies

Students must advance to candidacy by the end of the fall quarter of their fourth year. Departmental normative time for completion of the degree is five years; total registered time in the Ph.D. program at UCI or UCSD cannot exceed seven years.

Financial Support

Ph.D. students entering the program with a B.A. may be supported (either by teaching assignments or fellowships) for five years. Students who have an M.A. and have been given transfer credit may be supported for four years. Such support depends upon the funds available, the number of students eligible, and the student's rate of progress.

Faculty

Lonnie Alcaraz, M.F.A. University of California, Irvine, *Professor of Drama* (lighting design, digital imaging)

Stephen Barker, Ph.D. University of Arizona, *Associate Dean of the Claire Trevor School of the Arts and Professor of Drama* (post-modern theatre, Beckett, critical theory)

Cynthia Bassham, M.F.A. American Conservatory Theatre, *Lecturer with Security of Employment, Drama* (voice, speech for actors, acting)

Richard Brestoff, M.F.A. New York University, *Professor of Drama* (film and television acting)

Daniel Gary Busby, D.M.A. University of California, Los Angeles, *Department Chair and Associate Professor of Drama* (music theatre, singing, conducting)

Dennis Castellano, M.F.A. University of California, Irvine, *Senior Lecturer with Security of Employment and Head of Music Theatre* (music theatre)

Robert Cohen, D.F.A. Yale University, *Claire Trevor Professor of Drama* (acting theory, acting, directing)

Myrona DeLaney, Ed.D. University of California, Irvine, *Lecturer with Security of Employment, Drama* (music theatre, singing, acting)

Holly Poe Durbin, M.F.A. University of California, Los Angeles, *Associate Professor of Drama* (costume design)

Clifford Faulkner, M.A. California State University, Long Beach, *Senior Lecturer with Security of Employment, Drama* (scenery design, history of design, gay theatre)

Keith Fowler, D.F.A. Yale University, *Professor of Drama* (directing, acting)

Clayton Garrison, Ph.D. Stanford University, *Professor Emeritus of Drama* (opera, musical theatre, movement, dramatic literature)

Douglas-Scott Goheen, Ph.D. University of Denver; M.F.A. Yale University, *Professor Emeritus of Drama* (scenery design, digital imaging)

Cameron Harvey, M.F.A. University of California, Irvine, *Professor Emeritus of Drama* (artistic direction, producing, lighting design)

Don Hill, M.F.A. University of Southern California, *Senior Lecturer with Security of Employment, Associate Producer, and Head of Stage Management* (stage management, directing, acting)

Michael Hooker, M.F.A. California Institute of the Arts, *Professor of Drama* (sound design)

Ketu Katrak, Ph.D. Bryn Mawr College, *Professor of Drama, Comparative Literature, and English* (drama and performance, African drama and Ancient Sanskrit drama [from India], postcolonial literature and theory, women writers and feminist theory)

Dudley Knight, M.F.A. Yale University, *Professor Emeritus of Drama* (voice, speech for actors, acting)

Madeline Ann Kozlowski, M.F.A. Brandeis University, *Professor Emerita of Drama* (costume design)

Anthony Kubiak, Ph.D. University of Wisconsin, Milwaukee, *Professor of Drama and Head of Doctoral Studies* (American and modern drama, modern poetry, critical theory, philosophy)

Daphne Pi-Wei Lei, Ph.D. Tufts University, *Professor of Drama* (Asian theatre, Asian American theatre, intercultural theatre, gender theory, performance theory)

Annie Loui, *Professor of Drama* (movement, directing, acting)

Mihai Maniutiu, Ph.D. National University of Theatrical and Cinematographic Art, Romania, *UCI Distinguished Professor of Drama* (directing)

David McDonald, Ph.D. Stanford University, *Professor Emeritus of Drama* (dramatic theory, Irish drama, theatre history, playwriting)

Ian Munro, Ph.D. Harvard University, *Associate Professor of Drama* (European drama and performance, early modern popular culture, theatrical performance of wit)

Vincent Olivieri, M.F.A. Yale University, *Associate Professor of Drama* (sound design)

Jane Page, M.F.A. Indiana University, *Assistant Professor of Drama and Head of Directing* (directing, acting)

Andrew Palermo, B.F.A. University of Cincinnati, College-Conservatory of Music, *Assistant Professor of Drama* (music theatre choreography)

Janelle Reinelt, Ph.D. Stanford University, *Professor Emerita of Drama* (British theatre, political theory, performance)

Bryan Reynolds, Ph.D. Harvard University, *UCI Chancellor's Professor of Drama* (Shakespeare, Renaissance drama, critical theory, feminist theory, performance theory, cultural studies)

Eli Simon, M.F.A. Brandeis University, *Professor of Drama* (acting, directing)

Jaymi Lee Smith, B.F.A. DePaul University, *Associate Professor of Drama and Head of Design* (lighting design)

Phil Thompson, M.F.A. University of California, Irvine, *Associate Professor of Drama and Head of Acting* (voice, speech for actors, acting)

Richard Triplett, Otis Art Institute, *Professor Emeritus of Drama* (scenery and costume design, history of design)

Joel Veenstra, M.F.A. University of California, Irvine, *Lecturer with Potential Security of Employment* (stage management, acting)

Robert Weimann, Ph.D. Humboldt University, *Professor Emeritus of Drama* (theory, criticism, literature)

Frank B. Wilderson III, Ph.D. University of California, Berkeley, *Associate Professor of African American Studies and Drama* (film theory, Marxism, dramaturgy, black political theory)

Shigeru Yaji, M.F.A. California State University, Long Beach, *Lecturer in Drama* (costume design)

Courses

DRAMA 10. Introduction to Production Theory. 4 Units.

An introduction to modern production techniques as practiced in realizing scenic designs. Equipment, theories, techniques, and history of production practices in the technical theatre; class instruction integrated with practical applications.

DRAMA 11. The Rock and Roll Spectacle Show. 4 Units.

A thorough overview to the development and cultural significance of the Rock 'n' Roll Spectacle show. Focus on historical and recent developments of the spectacle show, trends in the aesthetics of the field, and various sub-genres.

(IV)

DRAMA 14. Performing Rock 'N' Roll. 4 Units.

Explores major movements in the history of rock 'n' roll in terms of performance, not virtuosity necessarily of the performers as musicians, rather as performances of aesthetics in modes of embodied ideology, iconoclastic spectacle, mixed media fashion, and subcultural formation.

DRAMA 15. Performance Now. 4 Units.

Exposes students to what is most current in the world of performance and theatre. Begins with a series of lectures on the idea of performance, and the various theories that frame it.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV)

DRAMA 16. Performing Culture. 4 Units.

Culture, aesthetics, and ideology (combined in the concept "subculture") work to fashion social identities. Using theories and methodologies of performance studies, with an emphasis on American culture, this course explores why and how culture is reinforced through performance.

(IV)

DRAMA 20A. Culture in Performance. 4 Units.

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

DRAMA 20B. Culture in Performance. 4 Units.

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

DRAMA 20C. Culture in Performance. 4 Units.

A three-quarter foundation series exploring the rich depth of theatre, drama, and other genres of performance across a wide variety of worldwide forms, for performer and audience.

(IV)

DRAMA 30A. Acting. 4 Units.

A one-year course in basic acting technique and discipline. Stage technique and stage discipline. Freeing vocal and physical movement and liberating emotional power. Elementary stage movement and voice. Elimination of regionalisms in speech. Overcoming stage fright. Readings in acting theory.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

DRAMA 30B. Acting. 4 Units.

A one-year course in basic acting technique and discipline. Improvisations and scenes. Rehearsal and presentation of at least two scenes with different partners. Developing stage contact with tactics in a "play" situation.

Prerequisite: DRAMA 30A.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

DRAMA 30C. Acting. 4 Units.

A one-year course in basic acting technique and discipline. Characterization, scenes and auditioning. Development of character in at least three rehearsed scenes from different plays. Script analysis and performance technique. Preparation of audition pieces. The profession of acting.

Prerequisite: DRAMA 30A and DRAMA 30B.

Repeatability: May be taken for credit 2 times.

Restriction: Dance majors have first consideration for enrollment.

DRAMA 34. Movement for Actors. 4 Units.

A studio course in fundamentals of stretch, strength, and alignment; exploring spatial awareness and physical control through mime isolations, techniques, and related improvisation.

Repeatability: May be taken for credit 3 times.

DRAMA 35. Speech for the Theatre. 4 Units.

A course aimed at (1) improving natural, clear, unaffected speech and (2) eliminating negative habits and regional accents: exercises for physical tension, vocal support, tone production, vocal quality, and articulation.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 40A. Development of Drama. 4 Units.

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Greek Drama through Shakespeare.

Same as COM LIT 40A.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)

DRAMA 40B. Development of Drama. 4 Units.

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary critical material are read each quarter. Restoration Drama through Ibsen.

Same as COM LIT 40B.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)

DRAMA 40C. Development of Drama. 4 Units.

The development of Western Drama, concentrating on the drama's intellectual, social, and artistic foundations. About 10 plays and supplementary material are read each quarter. Contemporary Drama. Post Naturalistic theatre.

Same as COM LIT 40C.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

(IV, VIII)

DRAMA 50A. Introduction to Costume Design. 4 Units.

Introduction to the process and procedures employed by the costume designer for the theatre. The elements of design are discussed in the context of character development, historical period, and style. Exercises extend to drawing, rendering, and investigation of human proportions.

Restriction: Drama and Music Theatre majors only.

DRAMA 50B. Introduction to Scenic Design. 4 Units.

Introduction to the principles and practice of scenic design. Weekly problems include research into various periods and styles of production with an emphasis on the conceptual idea. Perspective drawing, rendering, and model building are covered in studio exercises and assignments.

Prerequisite: DRAMA 10.

Restriction: Drama and Music Theatre majors only.

DRAMA 50C. Introduction to Lighting Design. 4 Units.

Introduction to the principles, theories, and equipment employed by the lighting designer for the stage. Areas of investigation include history, technology, and script analysis. Detailed studio attention is given to the theory and practice of design.

Restriction: Drama and Music Theatre majors only.

DRAMA 50D. Introduction to Sound Design. 4 Units.

Principles, theories, equipment use, and terminology employed by the sound designer for the stage. Areas of study include history, technology, and script analysis. Focuses on the theory and practice of design.

Restriction: Drama and Music Theatre majors only.

DRAMA 50E. Introduction to Stage Management. 4 Units.

A basic study of theatrical, dance, and opera stage management practices, forms, and methods, from first script reading to closing night. Opportunity to observe professionals at work in regional and touring situations as available.

Restriction: Drama and Music Theatre majors only.

DRAMA 50F. History and Theories of Scenography. 4 Units.

Explores the aesthetics of the stage and the evolution of scenery and costume in live performance as inspiration for today's theatre analysts. Topics include shared vocabulary, historical trends, shifts in approaches, and focus briefs on leaders in the field.

Restriction: Drama and Music Theatre majors have first consideration for enrollment.

DRAMA 60. Careers in Stage Management. 4 Units.

Nurtures a greater appreciation for the stage manager and his or her process, and supports students who are interested in pursuing a career in professional stage management.

DRAMA 65. Music Theatre Workshop I. 2 Units.

Basic vocal technique and characterization of musical theatre repertoire explored.

Prerequisite: Audition required.

Repeatability: May be taken for credit 2 times.

DRAMA 83. Directing I . 4 Units.

Exercises introduce students to standard practices for shaping a play, such as table work, blocking, business, and actor coaching. Students take charge of sample rehearsals, guiding casts through exercises, followed by peer review, and instructor critique.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C.

Repeatability: May be repeated for credit unlimited times.

DRAMA 100. University Theatre . 4 Units.

Rehearsal and performance in a faculty-directed, production.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

DRAMA 101A. Theatre Production: Costume. 1-6 Units.

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101B. Theatre Production: Scenic. 1-6 Units.

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101C. Theatre Production: Lighting. 1-6 Units.

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101D. Theatre Production: Stage Management. 1-8 Units.

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit 24 times.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101E. Theatre Production: Audio. 1-6 Units.

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 101S. Theatre Production: Theatre Management. 1-6 Units.

The production courses are offered to give students the opportunity to participate in departmental productions. Students engage in the production and construction of designed work as well as its applied execution during performance.

Repeatability: May be taken for credit for 24 units.

Restriction: May be taken for credit for a maximum of 24 units provided productions change.

DRAMA 103. Lectures in Dramatic Literature. 4 Units.

Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 103W. Lectures in Dramatic Literature. 4 Units.

Courses include Medieval and Tudor Drama, Elizabethan and Jacobean Drama, Shakespeare, Restoration and Eighteenth-Century Drama, Modern British Drama, Modern American Drama, Tragedy, and Comedy.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 109. Special Topics in Theory and Criticism. 4 Units.

Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 109W. Theater and Dreams . 4 Units.

Discussion of recent major trends and ideas in critical theory, concentrating on in-depth readings and lectures in particular facets of theory and criticism: Derrida, Butler, Lacan, Deleuze, and others.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 110. Special Topics in Classical Dramas . 4 Units.

Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.
Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 110W. Special Topics in Classical Dramas. 4 Units.

Designed to introduce students to various classical traditions-early Greek and Roman theatres, to be sure, but also, by way of comparison, the classical traditions of non-European cultures.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.
Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 112. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.

Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 112W. Special Topics in Early Modern and Neoclassical Theatre. 4 Units.

Investigates aspects of European theatre and culture in the sixteenth, seventeenth, and eighteenth centuries; individual courses may focus on specific topics within this broad expanse.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 116. Special Topics in Nineteenth-Century Dramas. 4 Units.

Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.
Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 116W. Special Topics in Nineteenth-Century Dramas. 4 Units.

Looks at the various trends and conventions of theatres in the nineteenth century, both Euro-American and beyond, paying special attention to the culture and political milieu within which these various traditions appeared.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.
Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 118. Special Topics in Modern and Contemporary Drama. 4 Units.

An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.
Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 118W. Special Topics in Modern and Contemporary Drama . 4 Units.

An investigation into the many forms and permutations of modern (1880-1945), and contemporary (since 1945) drama, paying special attention to the historical and philosophical interpretations of text and performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.
Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 121. Introduction to Asian Theatre. 4 Units.

An introduction to some of the major traditional theatrical forms and dramatic texts from India, China, and Japan. Other than dramatic texts (in English translation), attention is also paid to theory, history, and performance styles of traditional Asian theatre.

Restriction: Drama and Music Theatre majors only.

DRAMA 122. Asian American Theatre. 4 Units.

An introduction to the history and development of Asian American theatre and drama. Besides play analysis, special attention is also paid to the history and politics of Asian American identity and experience, as well as to aspects of theatrical performance.

Prerequisite: DRAMA 40A and DRAMA 40B and DRAMA 40C.

Restriction: Drama and Music Theatre majors only.

DRAMA 123. Multicultural Theatres. 4 Units.

A study of the history, culture, aesthetics, and literature of various traditional performing arts and their connections to the contemporary multicultural society.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 126. African American Film and Drama. 4 Units.

A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Drama and Music Theatre majors only.

DRAMA 126W. African American Film and Drama. 4 Units.

A critical investigation of films and plays written by African Americans, with emphasis on dramaturgical and cinematic strategies, individual and collective representation, and the legacy of African American political struggle.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 129. Advanced Topics in Performance. 4 Units.

Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 129W. Advanced Topics in Performance. 4 Units.

Addresses particular issues in theatre and performance that typically lie outside of regular course offerings. May address such issues as the theatre of the Avant Garde, performing gender, transversality and performance, body art, installation and performance art, among other topics.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

(Ib)

DRAMA 130. Intermediate Acting. 4 Units.

Rehearsal and presentation of scenes from contemporary material. Focus on connection with scene partner, playing actions, and text analysis. Introduction to the credibility and theatricality of characterization and style.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C with an average grade of B or better. For transfer students: one year of beginning acting with an average grade of B or better.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 132A. Writing for Performance. 4 Units.

Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 132AW. Writing for Performance. 4 Units.

Completion of a full-length play or its equivalent; discussion of student writing and of relevant literary texts.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 132B. Writing for Performance. 4 Units.

Development of student work beyond what is normally produced in Drama 132A. The goal is to produce a polished, high-quality, stage-ready work through workshop exercises, revision, and rewriting.

Prerequisite: DRAMA 132A.

Restriction: Drama and Music Theatre majors only.

DRAMA 132C. Writing for Performance. 4 Units.

The goal is to produce work previously written in Drama 132A-B, under the supervision of instructor. Students, working under "real-life" conditions, may not rely on departmental resources to produce their work.

Prerequisite: DRAMA 132B.

Restriction: Drama and Music Theatre majors only.

DRAMA 135. Master Classes in Acting. 1-4 Units.

Advanced acting in specialized areas including acting for the camera: situation comedy, commercials; auditioning and industry preparation; Shakespeare; Molière; Chekov; improvisation; advanced movement and voice and speech for the actor; self-starting; stage combat; repertory acting, singing; comedy; clowning; and masks.

Prerequisite: DRAMA 130 or DRAMA 130A. DRAMA 130 with a grade of B or better. DRAMA 130A with a grade of B or better.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 136. Music Theatre Acting. 4 Units.

An acting class exclusive to the students in the B.F.A. in Music Theatre program.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C.

Restriction: Music Theatre majors only.

DRAMA 142. Music Theatre Workshop II. 4 Units.

A workshop in audition technique and song interpretation.

Prerequisite: Audition required.

Repeatability: May be taken for credit 4 times.

DRAMA 143A. Music Theatre Workshop III. 4 Units.

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1800's-1940.

Prerequisite: DRAMA 142. Audition required.

DRAMA 143B. Music Theatre Workshop III. 4 Units.

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1940's-1970's.

Prerequisite: DRAMA 142. Audition required.

DRAMA 143C. Music Theatre Workshop III. 4 Units.

Scene study and song repertoire examined by era for the advanced Music Theatre student. 1970's-present.

Prerequisite: DRAMA 142. Audition required.

DRAMA 144. Music Theatre Workshop IV. 4 Units.

A performance class concentrating on role building. Work culminates with in-class performances of abbreviated versions of musicals.

Prerequisite: For B.F.A. students: DRAMA 143A, DRAMA 143B, DRAMA 143C, and audition. For Drama graduate students: audition required.

Repeatability: May be taken for credit 4 times.

Restriction: Music Theatre majors and Drama graduate students only.

DRAMA 145. Music Theatre Singing. 1 Unit.

Private weekly voice lessons for the advanced Music Theatre student.

Corequisite: DRAMA 143A or DRAMA 144.

Repeatability: May be taken for credit 9 times.

Restriction: Music Theatre majors only.

DRAMA 146. NYSP-Preparation. 4 Units.

Class preparation for the New York Satellite Program (NYSP) - an immersion experience in New York City for the musical theatre performer.

Prerequisite: Admission is by audition and the following prerequisites: Drama 30C and two quarters of Drama 148A, B, or C (if the 148 prerequisite is not complete at the time of auditions, student must enroll during the fall and winter quarters in the same year as the trip to New York); senior Drama majors must have successfully completed Drama 40C and 120C; non-Drama majors must have sophomore standing or higher and must carefully plan their course schedule as many spring quarter classes cannot be taken while part of the NYSP.

Repeatability: May be taken for credit 2 times.

DRAMA 148A. History of American Musical Theatre. 4 Units.

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Drama and Music Theatre majors only.

Concurrent with DRAMA 248A.

DRAMA 148B. History of American Musical Theatre. 4 Units.

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Drama and Music Theatre majors only.

Concurrent with DRAMA 248B.

DRAMA 148C. History of American Musical Theatre. 4 Units.

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1970s to present day.

Restriction: Drama and Music Theatre majors only.

Concurrent with DRAMA 248C.

DRAMA 149. Music Proficiency for Actors. 2 Units.

A musicianship class introducing basic musical terminology, theory, and sight singing skills.

Prerequisite: Candidates in the Honors in Music Theatre Program.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 150. Costume Production Techniques. 4 Units.

Studio instruction in pattern making, draping, millinery, and construction techniques.

Prerequisite: DRAMA 50A.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 157. Lighting Composition. 4 Units.

Provides an opportunity for students to pursue stage lighting composition in a studio atmosphere. Laboratory practice includes weekly exercises in style and genre. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: Drama 50C.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 158. Topics in Theatre Design. 4 Units.

Examines the various functions of scenery and costume: locale, historical period, mood, and atmosphere, with special assignments in each area. Discussion of problems in scenic metaphors and visualization, emphasizing techniques of planning and presentation (e.g., floor plans, models, and rendering).

Prerequisite: DRAMA 50A OR DRAMA 50B.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama or Music Theatre majors only.

DRAMA 159. Proseminar in Theatre Design. 4 Units.

Topics in theatre design.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 160. Light Plotting Techniques. 4 Units.

A study of the development of theatrical lighting plots from initial conceptualization through final documentation. Areas of emphasis include script analysis, visual approaches, equipment selection, and compositional qualities of light.

Prerequisite: DRAMA 50C and DRAMA 157.

Restriction: Drama and Music Theatre majors only.

DRAMA 164A. History of Costume. 4 Units.

A study of the development of dress and the influence of cultural factors on clothing from the time of Egyptians to Early Baroque.

Restriction: Drama and Music Theatre majors only.

DRAMA 164B. History of Costume. 4 Units.

A study of the development of dress and the influence of cultural factors on clothing from late Baroque to World War I.

Prerequisite: DRAMA 164A.

Restriction: Drama and Music Theatre majors only.

DRAMA 167. Fabric Modification Techniques. 4 Units.

Exploration of various dying, printing, painting, and texture modification techniques.

Prerequisite: DRAMA 50A.

Restriction: Drama and Music Theatre majors only.

DRAMA 168. Theatrical Mask Techniques. 4 Units.

Design and construction of theatrical masks including paper mache, leather, plastics, and latex. Projects employ traditional and contemporary techniques.

Prerequisite: DRAMA 50A.

Restriction: Drama and Music Theatre majors only.

DRAMA 169. Costume Rendering Techniques. 4 Units.

Development of costume rendering skills and techniques. Explores collage, pastel, and ink and emphasizes watercolor.

Prerequisite: DRAMA 50A.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 175. Staging Shakespeare. 4 Units.

Seminar in Shakespearean staging practice, both Elizabethan and contemporary. Students prepare a hypothetical production book for an assigned play as it could have been produced at the Globe Theatre in 1610, and propose a contemporary production of the same play.

Prerequisite: DRAMA 184.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 176. Script and Score. 4 Units.

A form and analysis seminar discussing the libretto and score of landmark musicals.

Prerequisite: Two courses from DRAMA 148A or DRAMA 148B or DRAMA 148C.

Restriction: Drama and Music Theatre majors only.

DRAMA 177. Song Repertoire. 2 Units.

A song coaching class culminating in a song recital or showcase. Each quarter will feature a different composer, lyricist, or musical style.

Repeatability: May be taken for credit 6 times.

Restriction: Music Theatre majors only.

DRAMA 179. Intermediate Sound Design. 4 Units.

A project-based analysis of the principles of sound design for the theatre. Projects are executed in the sound design studio and may include sound manipulation and recording. Emphasis is placed on the realization of conceptual ideas.

Prerequisite: DRAMA 50D.

Restriction: Drama and Music Theatre majors only.

DRAMA 180. Contemporary Dramatic Criticism and Theory. 4 Units.

Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 180W. Contemporary Dramatic Criticism and Theory. 4 Units.

Reading and analysis of theories and critical approaches to contemporary theatre: Brecht, Artaud, and others who have contributed to the form and idea of the modern theatre. Writing of assigned exercises in dramatic criticism.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

(Ib)

DRAMA 181. Acting Theory. 4 Units.

A study of the theory of acting, with readings in Plato, Aristotle, Quintilian, Shakespeare, Diderot, Stanislavsky, Brecht, Strasberg, Meisner, Grotowski, and other theorists, ancient to contemporary.

Prerequisite: DRAMA 130.

Restriction: Drama and Music Theatre majors only. Juniors only.

Concurrent with DRAMA 224.

DRAMA 182A. Music Theatre Movement. 4 Units.

An exploration of various dance styles from different eras of the musical theatre stage for the actor/singer. Explores 1800s-1940s.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 182B. Music Theatre Movement. 4 Units.

An exploration of various dance styles from different eras of the musical theatre stage for the actor/singer. Explores 1940s-1970s.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 182C. Music Theatre Movement. 4 Units.

An exploration of various dance styles from different eras of the musical theatre stage for the actor/singer. Explores 1970s-present day.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 183A. Music Theatre Dance. 4 Units.

An exploration of various dance styles from different eras of the musical theatre stage for the advanced dancer. Explores 1800s-1940s.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 183B. Music Theatre Dance. 4 Units.

An exploration of various dance styles from different eras of the musical theatre stage for the advanced dancer. Explores 1940s-1970s.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 183C. Music Theatre Dance. 4 Units.

An exploration of various dance styles from different eras of the musical theatre stage for the advanced dancer. Explores 1970s–present day.

Prerequisite: DRAMA 65 or DRAMA 142. Audition required.

Repeatability: May be taken for credit 2 times.

Restriction: Drama and Music Theatre majors only.

DRAMA 184. Directing II. 4 Units.

The principles of stage directing, covering the director's functions in the areas of interpretation, composition, coaching, and styling a theatrical production. Directing exercises and projects; the final project is the preparation of a hypothetical proposal for a play production.

Prerequisite: DRAMA 30A and DRAMA 30B and DRAMA 30C and DRAMA 40A and DRAMA 40B and DRAMA 40C.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theater majors only.

DRAMA 185. Advanced Directing. 4 Units.

A seminar in directorial organization and research. Student prepares a textual and dramaturgical analysis, a production timetable, and a hypothetical production book of an assigned play.

Prerequisite: DRAMA 184.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama and Music Theatre majors only.

DRAMA 190. NYSP-Acting. 1-4 Units.

New York Satellite Program acting classes taught by guest faculty in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 191. NYSP - Dance. 4 Units.

New York Satellite Program dance classes in ballet, tap, jazz, and musical theatre styles taught by guest faculty in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 192. NYSP - Singing. 4 Units.

New York Satellite Program private and group lessons in musical theatre singing taught by guest faculty in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 193. NYSP - Performance. 4 Units.

New York Satellite Program rehearsals and public, staged readings of original musicals in New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 194. NYSP-UCI Residency. 4 Units.

New York Satellite Program follow-up classes and performances back on Irvine campus upon the return from New York.

Prerequisite: DRAMA 146.

Repeatability: May be taken for credit 2 times.

DRAMA 195. Music Theatre Dance - Special Topics. 1-4 Units.

Advanced dance classes in specialized areas including the dance styles of a choreographer (de Mille, Fosse, Robbins, Tune, Stroman), genre (tap, ballroom, jazz, swing, hip-hop), or in musical theatre choreography.

Prerequisite: DRAMA 182A or DRAMA 182B or DRAMA 182C or DRAMA 183A or DRAMA 183B or DRAMA 183C. Audition required.

Repeatability: Unlimited as topics vary.

Restriction: Drama and Music Theatre majors only.

DRAMA 198. Director Class Project. 1-8 Units.

For students who are involved in the Director Class Projects at UCI as actors, directors, designers, stage managers and their assistants. M.F.A. Directors and the Head of Directing (HoD) supervise the projects.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

DRAMA H198. Honors Director Class Project. 1-4 Units.

For graduate student actors and undergraduate directors who are candidates for Honors in Directing and involved in the Director Class Projects. The Head of Directing (HoD) supervises these students.

Repeatability: Unlimited as topics vary.

DRAMA 199. Project in Theatre . 1-4 Units.

Independent theatre projects with Drama faculty.

Repeatability: Unlimited as topics vary.

DRAMA 200. Graduate Studio: Acting. 4 Units.

Work in graduate studio taken in tandem with graduate studios in stage voice (Drama 201), stage speech (Drama 202), and stage movement (Drama 203).

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 201. Graduate Studio: Voice. 1 Unit.

Graduate studio in vocal production for actors.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 202. Graduate Studio: Speech. 1 Unit.

Graduate studio in speech for actors.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 203. Graduate Studio: Movement. 2 Units.

Work in graduate studio: stage movement taken in tandem with nine graduate studios in acting (Drama 200), voice (Drama 201), speech (Drama 202), and voice/movement dynamics (Drama 206).

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 206. Graduate Studio: Voice/Movement Dynamics. 2 Units.

Daily conditioning exercises.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 211. Graduate Studio: Directing. 4 Units.

Graduate studio in directing.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students only.

DRAMA 212. Graduate Studio: Playwriting. 4 Units.

Completion of a full-length play or its equivalent and production of a staged reading of the play at the end of the spring quarter. Discussion of relevant literary texts and student writings.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 219. Graduate Master Class. 1-4 Units.

Various topics such as Shakespeare, comedy, Molière, improvisation, Kabuki, television acting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 220. Seminar in Dramatic Literature. 4 Units.

Topics in Dramatic Literature.

Repeatability: Unlimited as topics vary.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 221. Seminar in Criticism. 4 Units.

Topics in criticism.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

DRAMA 224. Acting Theory. 4 Units.

A study of the theory of acting, with readings in Plato, Aristotle, Quintilian, Shakespeare, Diderot, Stanislavsky, Brecht, Strasberg, Meisner, Grotowski, and other theorists, ancient to contemporary.

Prerequisite: DRAMA 130.

Restriction: Graduate students only.

Concurrent with DRAMA 181.

DRAMA 225. Seminar on Theatre Pedagogy. 4 Units.

A seminar on the major teaching systems in the dramatic arts with particular attention to professional arts training. Required prior to applying for Teaching Assistantships in studio areas.

Restriction: Drama graduate students only.

DRAMA 227. Communication Skills for Graduate Students. 2 Units.

Teaches basic public speaking techniques to graduate students, aids students in presenting persuasively for audiences large and small.

Grading Option: Satisfactory/unsatisfactory only.

DRAMA 235. Script Analysis and Research. 4 Units.

Analysis of dramatic scripts. Examination of dramaturgic structure, character intentions and interactions, historical and literary milieu, and potentials for theatrical realization.

Restriction: Graduate students only.

DRAMA 240. Graduate Projects . 1-4 Units.

Various projects depending on student's concentration (acting, design, musical theatre, directing).

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 244. Dramaturgy: Theory and Methods. 4 Units.

Examines the practice, place, and theory of dramaturgy. Explores plays in terms of how they work: dramatic form and structure, historical context, and more. Study includes dramaturgy as a theatrical practice.

Restriction: Drama M.F.A. and Ph.D. students only.

DRAMA 248A. History of American Music Theatre. 4 Units.

A survey of the influential artists who produce, write, direct, and perform on America's musical stages. Surveys 1700s-1940s.

Restriction: Graduate only.

Concurrent with DRAMA 148A.

DRAMA 248B. History of American Musical Theatre. 4 Units.

A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1940s-1970s.

Restriction: Graduate only.

Concurrent with DRAMA 148B.

DRAMA 248C. History of American Musical Theatre. 4 Units.

A survey of the influential artists who produce, write, direct and perform on America's musical stages. Surveys 1970s to present day.

Concurrent with Drama 148C.

DRAMA 251A. Foundations of Theatre. 4 Units.

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

DRAMA 251B. Foundations of Theatre. 4 Units.

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

DRAMA 251C. Foundations of Theatre. 4 Units.

Seeks to create greater understanding in the roots and theories of theatrical models, aesthetics, action vs. reaction of differing thoughts in theatrical doctrine, and art, architecture, music, and fashion that contributed to the style and practice of theatre.

Restriction: Drama graduate students only.

DRAMA 254. Graduate Stage Management. 4 Units.

Studio exercises and projects in stage management.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Stage Management emphasis.

DRAMA 255. Graduate Design Seminar. 4 Units.

Projects, lectures, and critical discussion in costume, scenery, lighting, and sound design.

Restriction: Open only to Drama graduate students pursuing Design emphasis.

DRAMA 256. Survival and Professional Practice in Design. 4 Units.

Provides an in-depth examination of business skills needed to survive as a theatrical designer. Required 'Bridge' course in the Design MFA programs, relevant to all disciplines.

Restriction: Drama graduate students only.

DRAMA 257E. Thesis Writing Project-Stage Management. 4 Units.

Development of thesis topic with focus on organization, research, timeline, and execution.

Prerequisite: 12 units of DRAMA 254.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Drama graduate students only.

DRAMA 258. Drawing for Designers. 2 Units.

A multi-skill level course in drawing technique focusing on skills essential to stage designers including line, proportion, perspective and creating dynamic compositions. Focus will primarily be in figure drawing but may include still-life, landscape, and architectural drawings.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 9 times.

DRAMA 259. Theatre Colloquium. 1 Unit.

Exposes students to a wider range of theatrical practitioners, theories, and topics through guest lecturers, special projects, and cross-disciplinary dialogue.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 260A. Digital Costume Rendering. 4 Units.

A studio course in costume rendering for the theatre using computer image manipulation. Instruction in compositing and painting techniques and performance design conventions.

DRAMA 260B. Digital Textile Design and Printing. 4 Units.

A studio course in textile design using digital printing and embossing techniques. Instruction in state-of-the-art software and output manipulation for artistic expression.

DRAMA 261. Digital Design: Drawing/Painting/Rendering. 4 Units.

A studio course in scenic or costume rendering for the theatre using the computer for drawing/painting through the use of the digital pen/tablet.

Repeatability: May be taken for credit 2 times.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 262. Digital Design: 2D/3D Modeling. 4 Units.

A studio course in CAD's 2D drafting and 3D modeling capabilities for theatrical design. Instruction in state-of-the-art software for 2D and 3D object creation and theatrical presentation conventions.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 263. Digital Design: 3D Rendering. 4 Units.

A studio course in theatrical design through 3d modeling on computer and use of state-of-the-art rendering software. Instruction emphasizes collaborative design process through the use of scenic designer/lighting designer teams for all projects.

Prerequisite: DRAMA 262.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 264. Lighting Graphics. 4 Units.

A studio course in the various graphic methods employed by lighting designers in the theatre. Projects include manual and CAD techniques for Light Plot and Paperwork creation.

Prerequisite: DRAMA 262.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 265. Digital Design: 2D CAD. 4 Units.

A studio course in theatrical design and architectural lighting design on the computer. Instruction in state-of-the-art software for 2D object creation. Theatrical and architectural standards implemented in performance design.

Prerequisite: DRAMA 262.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 266. Digital Design: Digital Audio Systems. 4 Units.

Comprehensive tutorial on digital audio including hard disk recording, editing, data compression, and ethernet audio distribution. Focus is on recording, editing, and delivery of audio as used by the sound designer in the digital domain.

Restriction: Drama graduate students only.

DRAMA 267. Digital Design: Creating Sounds from Scratch. 4 Units.

The process of analyzing sounds for their core timbral components and using that data to create new sounds - from realistic to fantastic - by means of digital manipulation.

Prerequisite: DRAMA 266.

Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 271. Conceptual Sound Design. 4 Units.

An intensive, project-based seminar for exploring relationships between sound and sight. Synesthesia, creative intent vs. audience perception, and sound/movement are typical of the many topics to be explored. A series of creative projects are assigned and critiqued in peer review.

Prerequisite: DRAMA 266.

Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 272. Musical Theatre Sound/Concert Sound. 4 Units.

A concept-to-opening study of the process of designing sound systems for musicals and live/touring sound. Special attention given to the paperwork and documentation required to package, build, and mix these shows.

Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 277. Critical Listening. 4 Units.

Exploration of the many variables that affect (and effect) the audio chain. Perceiving and understanding these parameters unlocks the art of controlling sound and stylizing cues. Also includes the process of equalizing/aligning sound systems and the art of audio mastering.

Prerequisite: DRAMA 266.

Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 279. Advanced Sound Design. 4 Units.

An in-depth investigation into sound design for the theatre. Special emphasis is placed on text analysis, design conception, content creation, content delivery, and design organization. Class projects include creating paper designs and paperwork for different texts.

DRAMA 280A. Techniques in Costume Design. 4 Units.

Student exercises in the techniques and implementation of costume design.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Costume Design emphasis.

DRAMA 280B. Techniques in Scenery Design. 4 Units.

Student exercises in the techniques and implementation of scenic design.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Scenic Design emphasis.

DRAMA 280C. Techniques in Lighting Design. 4 Units.

Student exercises in the techniques and implementation of lighting design.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Lighting Design emphasis.

DRAMA 280D. Techniques in Sound Design. 4 Units.

Student exercises in the techniques and implementation of sound design.

Repeatability: Unlimited as topics vary.

Restriction: Open only to Drama graduate students pursuing Sound Design emphasis.

DRAMA 282. Stage Electronics/Introduction to Show Control. 4 Units.

Using computers and dedicated hardware to cue, control or automate sound, scenery, and lighting for live performance and themed entertainment applications.

Restriction: Drama graduate students and Drama and Theatre graduate students only.

DRAMA 290. Dramatic Literature and Theatre History Prior to 1900. 4 Units.

Studies in selected areas of dramatic literature and theatre history prior to 1900. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 291. Dramatic Literature and Theatre History, 1900 to Present. 4 Units.

Studies in selected areas of dramatic literature and theatre history, 1900 to present. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 292. Cultural and Critical Theory. 4 Units.

Studies in selected areas of cultural and critical theory. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

DRAMA 293. Directed Studies. 4-12 Units.

Directed study with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

DRAMA 294. Dissertation Research. 4-12 Units.

Dissertation research with Drama faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DRAMA 295. Professional Internship. 1-12 Units.

An arranged internship at the South Coast Repertory Theatre, or other equity theatre company, for qualifying M.F.A. students. A stipend and equity points are provided by the theatre company.

Repeatability: May be repeated for credit unlimited times.

Restriction: Drama graduate students only.

DRAMA 296. Seminar in Drama Pedagogy. 4 Units.

Seminar in preparation for and required prior to receiving a Teaching Assistantship in Drama/Comparative Literature 40 (Development of Drama) course; particular attention on course preparation and pedagogical techniques.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: First-year Drama and Theatre graduate students only.

DRAMA 297. Dramaturgy Practicum. 4 Units.

Requires doctoral students to identify two plays from the Drama Department's season to work as dramaturges. Students write a Dramaturgy Booklet recording their research and interactions with director, actors, and the design team. Students will work with doctoral faculty.

Restriction: Drama doctoral students only.

DRAMA 399. University Teaching. 4 Units.

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

Department of Music

303 Music and Media Building; (949) 824-6615

<http://music.arts.uci.edu/>

David Brodbeck, **Department Chair**

Undergraduate Program

The Department of Music offers the degrees of Bachelor of Arts in Music and Bachelor of Music. Both provide a secure foundation in the academic and applied study of music. This does not necessarily mean, however, that all undergraduates will go on to become professional musicians or musicologists. A good number do indeed continue to further study at the graduate level. However, many also use their degrees in Music as a more general educational qualification. Music is perhaps unique among the arts and humanities in terms of the wide range of transferable skills developed in the undergraduate curriculum. Musicians learn how to think, to write, to present themselves in public, and to work collaboratively in different kinds of teams. They have intellectual, technical, and social skills that tend to be widely admired by employers in many fields. They have also demonstrated over the long term a determination and commitment, and a desire to succeed, often beyond the norm. With a degree in Music, students will find that many career paths lie before them.

The **Bachelor of Arts (B.A.)** degree program enables students to study music history, music theory, composition, or performance within a curriculum that is flexible enough to allow for a second major, study abroad, and other curricular options. A senior thesis or project is required.

The **Bachelor of Music (B.Mus.)** degree program offers students the opportunity in their junior and senior years to specialize in piano performance, vocal performance, instrumental performance (flute, oboe, clarinet, bassoon, horn, trumpet, trombone, tuba, percussion, violin, viola, violoncello, and double bass), jazz studies (piano, saxophone, trumpet, trombone, bass, and percussion), and guitar and lute performance. Students in this program receive weekly private instrumental or vocal instruction, and present a public solo recital during their senior year. For details on admission to this program, click on the "Majors" tab above and scroll down to **"Entrance to the Bachelor of Music Program."**

Undergraduate Admissions. All applicants, regardless of their degree objective, apply to the B.A. program and must demonstrate appropriate vocal or instrumental proficiency, as determined by the results of the Department's required entrance audition (typically scheduled on campus in late January or early February). *For the most up-to-date information, see the Department's Web site at <http://music.arts.uci.edu>.* NOTE: Transfer applicants who perform at a sufficiently high level in the entrance audition, have the requisite background in music theory and musicianship, and wish to earn the B.Mus. rather than B.A. degree, will be offered the opportunity to change their degree objective from B.A. to B.Mus. upon matriculation at the University.

Study Abroad

The Department actively encourages this option for eligible students and makes every effort to accommodate the student's work abroad within departmental requirements. Interested students should consult with the undergraduate faculty advisor at the earliest possible date for advice on this matter. For further information, see <http://www.cie.uci.edu/academics/music.html>.

Requirements for the Bachelor's Degree in Music

All students must meet University Requirements (p. 60).

School Requirements: None.

Departmental Requirements—Common Curriculum: All courses must be completed with a grade of C- or higher.

MUSIC 15A- 15B- 15C	Musicianship I and Musicianship II and Musicianship III
MUSIC 16A- 16B- 16C	Music Theory and Music Theory and Music Theory
MUSIC 16D	Theory/Musicianship
MUSIC 40B- 40C	History of European Music: Josquin to Wagner and History of European Music: Josquin to Wagner
MUSIC 40D	Twentieth-Century Music
Select six quarters of instrumental or vocal instruction for Music majors from the following:	
MUSIC 65–70	

Additional Requirements for the Bachelor of Arts Degree

In addition to completing the common curriculum, students in the B.A. program must pass the departmental piano proficiency examination or take three quarters of MUSIC 10 (Piano for Majors) with a grade of C or better and complete the following course requirements:

1. Select three courses in Theory, Composition, and Technology from the following:

MUSIC 51	Music Technology and Computers
MUSIC 131	Post-Tonal Theory
MUSIC 132	Jazz Theory
MUSIC 136	Instrumentation
MUSIC 147	Studies in Music Technology

MUSIC 150	Composition
MUSIC 151	Computer Music Composition
MUSIC 152	Interactive Arts Programming
MUSIC 155	ANALYSIS
MUSIC 157	Advanced Study in Composition
MUSIC 183A	Jazz Composition
MUSIC 183B	Jazz Composition
MUSIC 183C	Jazz Composition
MUSIC 189	Accompanying for Plucked Strings: Continuo and Changes

2. Select three courses in Music and Culture (including at least two upper-division courses) from the following:

MUSIC 4	Introduction to Opera
MUSIC 8	The Beatles and the Sixties
MUSIC 9	Rock: The Early Years
MUSIC 14A	European and American Music 1700 - Twentieth Century
MUSIC 14B	European and American Music 1700 - Twentieth Century
MUSIC 14C	European and American Music 1700 - Twentieth Century
MUSIC 41	Major Composer
MUSIC 42	Music and Gender
MUSIC 44	Classical Music in Society
MUSIC 78	History of Jazz
MUSIC 82A	Pish Radif: Introduction to Classical Persian Music
MUSIC 82B	Pish Radif: Introduction to Classical Persian Music
MUSIC 82C	Pish Radif: Introduction to Classical Persian Music
MUSIC 140	Studies in Medieval Music
MUSIC 141	Studies in Renaissance Music
MUSIC 142	Studies in Baroque Music
MUSIC 143	Studies in Classical Music
MUSIC 144	Studies in Romantic Music
MUSIC 145	Studies in Twentieth-Century Music
MUSIC 146	Studies in Jazz Music
MUSIC 148	Studies in Ethnomusicology
MUSIC 149	Studies in Music History
MUSIC 156A	Song Literature
MUSIC 156B	Song Literature
MUSIC 156C	Song Literature
MUSIC 180	Music Criticism
MUSIC 181	Improvisation
ANTHRO 138M	Music as Expressive Culture
ANTHRO 138T	Africa and Afro-American Music
CHC/LAT 115A	Latino Music: A View of Its Diversity and Strength
CHC/LAT 115C	Afro-Latin American Music
AFAM 143	Topics in African American Music
AFAM 144	Topics in Expressive Forms

3. Select six courses in Performance and Practice from the following:

MUSIC 21A	Keyboard Skills
-----------	-----------------

MUSIC 21B	Keyboard Skills
MUSIC 21C	Keyboard Skills
MUSIC 158A	Diction
MUSIC 158B	Diction
MUSIC 158C	Diction
MUSIC 160	University Orchestra
MUSIC 161	Wind Ensemble
MUSIC 162	UNIVERSITY CHORUS
MUSIC 164	Opera Workshop
MUSIC 171	Chamber Singers
MUSIC 172	Men in Blaque
MUSIC 176	Chamber Ensembles
MUSIC 178	Jazz Orchestra
MUSIC 182	Advanced Jazz Combo
MUSIC 193	Conducting
MUSIC 197	Word and Music

4. Depending upon the student's area of emphasis, one of the following senior projects (which may develop work originally completed in meeting the requirements of another course) must be completed:

- (1) a formal lecture or lecture/performance lasting a minimum of 20 minutes
- (2) a composition or portfolio of compositions of appropriate length growing out of work done in MUSIC 157
- (3) a thesis of at least 20 double-spaced pages on an appropriate musical subject

Proposed projects, along with the name of the Senate faculty member who has agreed to supervise it, must be submitted to the undergraduate faculty advisor by November 1 of the academic year in which graduation is expected. Upon approval of the project proposal the student may register for up to two quarters of independent study (Music 199) in which to complete the project.

Departmental Honors Program in Music and Culture

The Honors Program in Music and Culture is designed to challenge superior students in the B.A. or B.Mus. program beyond the academic requirements of the Music major. It provides them with the opportunity to advance their knowledge in the scholarly fields of music while developing their writing, analytical, and research skills. The honors program is ideally suited for students who wish to study music at the graduate level, but not in performance, and who may be preparing for graduate work in arts criticism, the humanities, the social sciences, and the law.

Eligibility requirements are (1) completion of the core requirements for the major; (2) an overall GPA of 3.5 or higher; and (3) completion of the eligibility form (available for download through the Departmental Web site).

Admission to the Honors Program in Music and Culture is competitive. Students must apply no later than the spring quarter of their junior year. The application should be accompanied by two substantial writing samples. These may represent work done for courses at UCI. Only truly exceptional students may undertake Honors projects.

Students who are admitted to the Honors Program, regardless of whether they are in the B.A. or B.Mus. program, are required to complete three additional courses in categories 1 and 2 under Additional Requirements for the Bachelor of Arts Degree beyond those taken in fulfillment of the core requirement; all three must be upper-division courses (numbered

100 or higher). Relevant upper-division courses in other departments may be taken to fulfill this requirement by approval of the Department Honors Committee.

The capstone project is a senior thesis, an extended original research project prepared under the supervision of the faculty advisor on a topic chosen by the student in consultation with that advisor. The thesis topic must be approved by the Departmental Honors Committee prior to the end of the fall quarter of the senior year. Students develop their topic during an ensuing two-quarter sequence of Senior Thesis (MUSIC 195A-MUSIC 195B). Upon successful completion of the thesis, a single grade is applied for both quarters and 4 units (total) are posted to the student's record (2 units each for MUSIC 195B).

Entrance to the Bachelor of Music Degree Program

Admission to the B.Mus. degree program is by a second audition (the B.Mus. audition), typically taken in the spring quarter of the second year (for most students) or, in certain circumstances, in the first year (for third-year transfers only). The B.Mus. audition is evaluated by at least two members of the faculty. No student will be allowed to begin the B.Mus. program before having completed MUSIC 15A, MUSIC 15B, MUSIC 15C and MUSIC 16A, MUSIC 16B, MUSIC 16C (or their equivalents at another institution).

Additional Requirements for the Bachelor of Music Degree

In addition to completing the common curriculum, students in the B.Mus. program must pass the departmental piano proficiency examination, perform a senior recital (and, for voice students only, a junior recital), and complete the following course requirements:

1. Select three courses in Theory, Composition, and Technology from the following:

MUSIC 155	ANALYSIS
and select two others from the following:	
MUSIC 51	Music Technology and Computers
MUSIC 131	Post-Tonal Theory
MUSIC 132	Jazz Theory
MUSIC 136	Instrumentation
MUSIC 147	Studies in Music Technology
MUSIC 150	Composition
MUSIC 151	Computer Music Composition
MUSIC 152	Interactive Arts Programming
MUSIC 157	Advanced Study in Composition
MUSIC 183A	Jazz Composition
MUSIC 183B	Jazz Composition
MUSIC 183C	Jazz Composition
MUSIC 189	Accompanying for Plucked Strings: Continuo and Changes

2. Select three courses in Music and Culture from the following:

MUSIC 41	Major Composer
MUSIC 42	Music and Gender
MUSIC 44	Classical Music in Society
MUSIC 140	Studies in Medieval Music
MUSIC 141	Studies in Renaissance Music
MUSIC 142	Studies in Baroque Music

MUSIC 143	Studies in Classical Music
MUSIC 144	Studies in Romantic Music
MUSIC 145	Studies in Twentieth-Century Music
MUSIC 146	Studies in Jazz Music
MUSIC 148	Studies in Ethnomusicology
MUSIC 149	Studies in Music History
MUSIC 180	Music Criticism
MUSIC 181	Improvisation
ANTHRO 138M	Music as Expressive Culture
ANTHRO 138T	Africa and Afro-American Music
CHC/LAT 115A	Latino Music: A View of Its Diversity and Strength
CHC/LAT 115C	Afro-Latin American Music
AFAM 143	Topics in African American Music
AFAM 144	Topics in Expressive Forms

3. Select six quarters of instrumental or vocal instruction for Music Performance majors from the following:

MUSIC 165–170	
4. Completion of the following courses according to the approved Bachelor of Music specialization:	
Guitar and Lute:	
MUSIC 176	Chamber Ensembles (every quarter in residence)
Jazz Studies:	
MUSIC 78	History of Jazz
MUSIC 132	Jazz Theory
MUSIC 160	University Orchestra (or MUSIC 161 Wind Ensemble or MUSIC 178 Jazz Orchestra, every quarter in residence)
MUSIC 176	Chamber Ensembles (or MUSIC 182 Advanced Jazz Combo, every quarter in residence)

Piano:

MUSIC 21A	Keyboard Skills
MUSIC 21B	Keyboard Skills
MUSIC 21C	Keyboard Skills
MUSIC 122A	Piano Literature
MUSIC 122B	Piano Literature
MUSIC 122C	Piano Literature
MUSIC 126	Piano Pedagogy
MUSIC 176	Chamber Ensembles (six quarters, as assigned by the Department)

Select three quarters of the following as assigned by the Department:

MUSIC 162P	University Chorus: Accompanying
or MUSIC 164P	Opera Workshop: Accompanying
or MUSIC 166P	String Accompaniment
or MUSIC 197	Word and Music
Transfer students must complete six quarters of chamber ensembles and/or accompanying in residence.	

Voice:

MUSIC 156A	Song Literature
MUSIC 156B	Song Literature
MUSIC 158A	Diction

MUSIC 158B	Diction
MUSIC 158C	Diction
MUSIC 164	Opera Workshop (two quarters)
Select nine quarters of choral ensembles (minimum of three quarters for junior transfers; minimum of six quarters for sophomore transfers) from the following:	
MUSIC 162	UNIVERSITY CHORUS
MUSIC 171	Chamber Singers
MUSIC 172	Men in Blaque
Woodwinds, Brass, Percussion, and Strings:	
MUSIC 160	University Orchestra (or MUSIC 161 Wind Ensemble, every quarter in residence)
MUSIC 176	Chamber Ensembles (every quarter in residence)

Master of Fine Arts Program

Degree Offered

M.F.A. in Music, with emphasis in Choral Conducting, Collaborative Piano, Guitar/Lute Performance, Instrumental Performance, Integrated Composition, Improvisation, and Technology (ICIT), Piano Performance, and Vocal Arts.

Admission

In addition to meeting all general requirements for admission to graduate study, applicants should hold a B.A. in Music, a B.Mus., or the equivalent.

The online application must be submitted and all supporting materials must be received by January 15. Late applications cannot be considered. Supporting materials must include at least one substantial writing sample, preferably on a musical subject. This requirement may be fulfilled by the submission of an undergraduate paper of appropriate scope, preferably on a musical topic.

Applicants must audition for members of the Music faculty by February 1. In exceptional cases (as approved in advance by the departmental graduate advisor), a recently recorded performance may be accepted in lieu of a live audition. Applicants in composition must, in addition, submit a representative sample of scores and recordings of their works.

Applicants are expected to have good general knowledge of music history and music theory, competence in basic musicianship skills, including sight-singing, written and keyboard harmony, dictation, and basic keyboard facility (including sight-reading). Entering students will be given diagnostic tests in these areas prior to the beginning of classes and will be required to remedy any evident deficiencies during the first year in residence by registering for the appropriate undergraduate courses. Credit earned in such courses cannot be counted toward fulfillment of any degree requirement.

General Degree Requirements

Course requirements may be fulfilled only by graduate courses (numbered 200 and higher) and upper-division undergraduate courses (numbered 100 and higher), and only by those courses in which a grade of B or higher has been earned.

All students except those in the ICIT emphasis must complete the graduate core curriculum in bibliography (MUSIC 200) and music analysis

(MUSIC 201A-MUSIC 201B). All students must register for tutorial study in the major field (MUSIC 210, MUSIC 211, or MUSIC 212) during every quarter in residence. Students in the emphasis in Instrumental Performance must enroll in an approved large ensemble during every quarter in residence.

Students enrolled in the emphasis in Choral Conducting, Collaborative Piano, Piano Performance, and Vocal Arts must fulfill a foreign language requirement, as described in the individual emphasis descriptions below. This requirement may be met either by attaining a passing score in the departmental examination or by earning a grade of B or higher in level 2A of an approved undergraduate language course.

All students must pass the Comprehensive Examination (normally taken during the fifth quarter in residence) and perform one or more public recitals. Details are found in the individual emphasis descriptions below.

The normative time to degree for students in the M.F.A. program is two years. Residence is required. The normative time to degree can be extended to three years only through a petition to the Chair of the Department. The maximum time to degree is three years. Students who do not complete the degree in three years will be dropped from the program.

Individual Emphasis Requirements

Choral Conducting

Languages: Reading knowledge of French, German, or Italian.

Course Work:

MUSIC 200	Bibliography and Research
MUSIC 201A-201B Analysis	
MUSIC 210	Choral Conducting (every quarter in residence, maximum 24 units)
MUSIC 158A- 158B- 158C	Diction and Diction and Diction ¹
Select three seminars from the following:	
MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Seminar in Integrated Composition, Improvisation, and Technology
Twelve units of electives, selected with advisor.	
MUSIC 214	Graduate Recital

¹ Note: This requirement is waived for students who demonstrate competence in this area by passing a diagnostic exam, in which case these 6 units are taken as electives

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

Collaborative Piano

Languages: Reading knowledge of French, German, Italian, or Spanish.

Course Work:

MUSIC 200	Bibliography and Research
MUSIC 201A-201B Analysis	
MUSIC 211	Performance (every quarter in residence, maximum 24 units)
Select one seminar from the following:	
MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Seminar in Integrated Composition, Improvisation, and Technology
MUSIC 158A- 158B- 158C	Diction and Diction ¹
MUSIC 156A- 156B- 156C	Song Literature and Song Literature and Song Literature
MUSIC 176	Chamber Ensembles (6 units)
Two Graduate Recitals:	
MUSIC 214	Graduate Recital (one instrumental and one vocal)

¹ Note: This requirement is waived for students who demonstrate competence in this area by passing a diagnostic exam, in which case these 6 units are taken as electives.

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recitals. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

Guitar/Lute Performance

Course Work:

MUSIC 200	Bibliography and Research
MUSIC 201A-201B Analysis	
MUSIC 211	Performance (every quarter in residence, maximum of 24 units)
Select two seminars from the following:	
MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Seminar in Integrated Composition, Improvisation, and Technology
MUSIC 176	Chamber Ensembles (6 units)
MUSIC 189	Accompanying for Plucked Strings: Continuo and Changes (taken three times)
MUSIC 240	Graduate Projects
MUSIC 214	Graduate Recital ¹

¹ Note: The recital is supported by a written essay, presented in advance of the Comprehensive Examination.

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the

exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

Instrumental Performance

Course Work:

MUSIC 200	Bibliography and Research
MUSIC 201A-201B Analysis	
MUSIC 211	Performance (every quarter in residence, maximum of 24 units)
Select two seminars from the following:	
MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Seminar in Integrated Composition, Improvisation, and Technology
MUSIC 176	Chamber Ensembles (6 units)
MUSIC 160	University Orchestra (taken every quarter in residence, maximum of 12 units)
or	
MUSIC 161	Wind Ensemble (taken every quarter in residence, maximum of 12 units)
MUSIC 214	Graduate Recital

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

Integrated Composition, Improvisation, and Technology (ICIT)

Course Work:

MUSIC 209	Seminar in Creative Practices (every quarter of the first year in residence)
MUSIC 212	Composition (every quarter in residence after the first year, maximum of 12 units)
MUSIC 215	Music Technology (taken twice)
MUSIC 231	Improvisation
MUSIC 235	Critical Studies in Music
Select three graduate-level seminars from the following, with the third one selected chosen with the approval of the faculty advisor:	
MUSIC 230	Seminar in Contemporary Music
MUSIC 236	Seminar in Integrated Composition, Improvisation, and Technology
MUSIC 239	Thesis Colloquium (1 unit in the first year, 2 units in the second year, for a total of 3 units.)

Comprehensive Examination: Preparation and public presentation of a capstone project of original music (concert of original works or comparable body of original recorded music), including full documentation (scores and recordings as applicable) and a supporting written essay. Successful

oral defense of the capstone project (music and essay) before the faculty committee.

Piano Performance

Languages: Reading knowledge of French, German, Italian, or Spanish.

Course Work:

MUSIC 200	Bibliography and Research
MUSIC 201A-201B Analysis	
MUSIC 211	Performance (every quarter in residence, maximum of 24 units)
Select two seminars from the following:	
MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Seminar in Integrated Composition, Improvisation, and Technology
MUSIC 176	Chamber Ensembles (6 units)
Four units of electives, selected with advisor (upper-division or graduate, Music or non-Music).	
MUSIC 214	Graduate Recital (twice)

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recitals. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

Vocal Arts

Languages: Reading knowledge of French, German, Italian, or Spanish.

Course Work:

MUSIC 200	Bibliography and Research
MUSIC 201A-201B Analysis	
MUSIC 211	Performance (every quarter in residence, maximum of 24 units)
Select two seminars from the following:	
MUSIC 220	Seminar in Music History
MUSIC 230	Seminar in Contemporary Music
MUSIC 235	Critical Studies in Music
MUSIC 236	Seminar in Integrated Composition, Improvisation, and Technology
MUSIC 164	Opera Workshop (4 units)
Ten units of electives, selected with advisor (upper-division or graduate, Music or non-Music).	
MUSIC 214	Graduate Recital

Comprehensive Examination: This is a special field exam, related to (but not limited to) repertoire selected for the Graduate Recital. It is taken no later than March of the second year. The graduate committee sets the exam 24 hours in advance; the student makes an oral presentation and then fields the committee's questions.

Faculty

Kei Akagi, B.A. International Christian University, Tokyo, *UCI Chancellor's Professor of Music* (Integrated Composition, Improvisation, and Technology)

Amy Bauer, Ph.D. Yale University, *Associate Professor of Music* (music theory)

Haroutune Bedelian, Associate of the Royal Academy of Music, London, *Professor of Music* (violin)

Anna Bosler, D.M.A. University of Southern California, *Lecturer in Music* (French horn)

David Brodbeck, Ph.D. University of Pennsylvania, *Department Chair and Professor of Music, and The Robert and Marjorie Rawlins Chair of Music* (music history)

Rae Linda Brown, Ph.D. Yale University, *Professor Emerita of Music*

Robin Buck, M.M. University of Southern California, *Professor of Music and Director of the UCI Opera* (vocal arts)

Patricia Cloud, M.M. University of Southern California, *Lecturer in Music* (flute)

Jonathan Davis, D.M.A. Juilliard School of Music, *Lecturer in Music* (oboe)

Michael Dessen, Ph.D. University of California, San Diego, *Associate Professor of Music* (Integrated Composition, Improvisation, and Technology)

Theresa Dimond, D.M.A. University of Southern California, *Lecturer in Music* (percussion)

Christopher Dobrian, Ph.D. University of California, San Diego, *Professor of Music* (Integrated Composition, Improvisation, and Technology)

Nohema Fernández, D.M.A. Stanford University, *Professor Emerita of Music*

Frederick Greene, M.Mus. Ed. University of Southern California, *Lecturer in Music* (tuba)

Lorna Griffitt, D.M. Indiana University, *Senior Lecturer with Security of Employment, Music* (piano)

Matthew Hare, D.M.A. University of Iowa, *Lecturer in Music* (double bass)

Jason Harnell, *Lecturer in Music* (jazz percussion)

Robert Hickok, B.Mus. Yale University, *Professor Emeritus of Music*

Joseph B. Huszti, M.Mus. Northwestern University, *Professor of Music and Director of the UCI Choirs* (vocal arts)

Jerzy Kosmala, D.M. Indiana University, *Lecturer in Music* (viola)

Kevin McKeown, M.M. University of California, Los Angeles, *Lecturer in Music* (wind ensemble)

Nicole Mitchell, M.M. Northern Illinois University, *Assistant Professor of Music* (Integrated Composition, Improvisation, and Technology)

Elliott Moreau, M.M. University of Southern California, *Lecturer in Music* (bassoon)

Margaret Murata, Ph.D. University of Chicago, *Professor of Music* (music history)

Darek Oles, B.A. California Institute of the Arts, *Lecturer in Music* (jazz bass)

Hossein Omoumi, Ph.D. University of Florence, *Professor of Music and Maseeh Professor in Persian Performing Arts* (Persian music)

Margaret Parkins, D.M.A. State University of New York at Stony Brook, *Lecturer in Music* (cello)

Gerald Pinter, B.M. University of North Texas, *Lecturer in Music* (jazz saxophone)

Colleen Reardon, Ph.D. University of California, Los Angeles, *Professor of Music* (music history)

Bobby Rodriguez, D.M.A. University of California, Los Angeles, *Lecturer in Music* (jazz trumpet)

John Schneiderman, B.Mus. University of California, Irvine, *Lecturer with Security of Employment, Music* (guitar and lute)

Nina Scolnik, B.Mus. Oberlin Conservatory; Performance Diploma, Juilliard School, *Lecturer with Security of Employment, Music* (piano)

H. Colin Slim, Ph.D. Harvard University, *Professor Emeritus of Music*

David Stetson, B.M. University of Southern California, *Lecturer in Music* (trombone)

Cecilia Sun, Ph.D. University of California, Los Angeles; D.M.A. Eastman School of Music, *Assistant Professor of Music* (music history)

Darryl Taylor, D.M.A. University of Michigan, *Associate Professor of Music* (vocal arts)

Stephen Tucker, D.M.A. University of California, Los Angeles, *Associate Professor of Music and Director of the UCI Symphony*

Kojiro Umezaki, M.A. Dartmouth College, *Assistant Professor of Music* (Integrated Composition, Improvisation, and Technology)

Amanda Walker, M.F.A. University of California, Los Angeles, *Lecturer in Music* (clarinet)

David Washburn, M.M. New England Conservatory of Music, *Lecturer in Music* (trumpet)

Courses

MUSIC 3. Introduction to Music. 4 Units.

Introduction to musical concepts and active listening skills. Students develop musical understanding through critical readings, selected repertoire, fundamental concepts related to rhythm, pitch, and genre. Students apply those concepts to music from a wide range of historical and cultural origins. Course may be offered online.

(IV)

MUSIC 4. Introduction to Opera. 4 Units.

Introduces students with no musical background to the dramatic and performance conventions of opera, and suggests ways of developing a critical stance vis-a-vis the social, political, gender-related and moral conflicts that are presented by composers and librettists.

(IV)

MUSIC 8. The Beatles and the Sixties. 4 Units.

Through a study of the music of the Beatles, students are introduced to selected broader historical and cultural themes (e.g., race and music, gender and music, music and the counterculture) while developing an understanding of the basic elements of music.

(IV)

MUSIC 9. Rock: The Early Years. 4 Units.

Surveys the social and cultural fabric of the post-World War II United States (from the late 1940s through the early 1970s) as seen through the prism of music - rock and roll music.

(IV)

MUSIC 10. Piano for Majors. 1 Unit.

For Music majors with little or no piano experience. Provides the necessary background for realizing keyboard exercises required in the theory and harmony courses, and develops skills to play and sight-read simple music from different periods.

Repeatability: May be taken for credit 3 times.

Restriction: Music and Music Performance majors only.

MUSIC 14A. European and American Music 1700 - Twentieth Century. 4 Units.

Survey of European and American music from the Baroque period through the twentieth century. Baroque and Classical music with adequate attention given to the Medieval and Renaissance periods. May be taken in any order.

(IV)

MUSIC 14B. European and American Music 1700 - Twentieth Century. 4 Units.

Survey of European and American music from the Baroque period through the 20th century. The nineteenth and twentieth centuries. May be taken in any order.

(IV)

MUSIC 14C. European and American Music 1700 - Twentieth Century. 4 Units.

Survey of European and American music from the Baroque period through the twentieth century. Selected topics in American music. May be taken in any order.

(IV)

MUSIC 15A. Musicianship I. 2 Units.

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16A.

Restriction: Music and Music Performance majors only.

MUSIC 15B. Musicianship II. 2 Units.

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16B.

Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 15C. Musicianship III. 2 Units.

Interval and chord quality identification, melodic and harmonic dictation, tonal and chromatic sight-singing, and rhythmic reading and dictation.

Corequisite: MUSIC 16C.

Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better.

Restriction: Prerequisite required and Music and Music Performance majors only.

MUSIC 16A. Music Theory. 4 Units.

Review of music fundamentals. Triad and seventh chords, musical texture, chord spacing, embellishing tones, and introduction to diatonic harmony. Part-writing and model composition with tonic, dominant seventh, and subdominant harmonies.

Corequisite: MUSIC 15A.

Restriction: Music and Music Performance majors only.

MUSIC 16B. Music Theory. 4 Units.

Introduction to phrase structure. Part-writing and harmonization with predominants, linear dominants, 6/4 embellishing chords, leading-tone and other diatonic seventh chords. Advanced meters and rhythmic-metric dissonance. Diatonic sequence. Introduction to tonicization and modulation through motion to V and III.

Corequisite: MUSIC 15B.

Prerequisite: MUSIC 15A and MUSIC 16A. MUSIC 15A with a grade of C- or better. MUSIC 16A with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 16C. Music Theory. 4 Units.

Tonicization and modulation to closely related keys. Simple binary and ternary forms. Voice-leading reductions and simple forms. Diatonic sequence with seventh chords. Introduction to chromatic harmony I: modal exchange and mixture chords, the Neapolitan and augmented sixth chords.

Corequisite: MUSIC 15C.

Prerequisite: MUSIC 15B and MUSIC 16B. MUSIC 15B with a grade of C- or better. MUSIC 16B with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 16D. Theory/Musicianship. 4 Units.

Extended homophonic and contrapuntal formal designs (continuous variations, rondo form, sonata form, invention, fugue). Embellishing chromatic chords, dominant prolongation, modulations to foreign keys, extended harmonies, chromatic sequence, chromatic voice-leading and symmetrical divisions of the octave.

Prerequisite: MUSIC 15C and MUSIC 16C. MUSIC 15C with a grade of C- or better. MUSIC 16C with a grade of C- or better.

Restriction: Music and Music Performance majors only.

MUSIC 21A. Keyboard Skills. 1 Unit.

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 21B. Keyboard Skills. 1 Unit.

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 21C. Keyboard Skills. 1 Unit.

Designed to develop the foundational skills of sight-reading, harmonization, transposition, improvisation, figured bass realization, and score reading.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Lower-division students only.

MUSIC 25. Music Fundamentals. 4 Units.

Basic concepts and materials. Major and minor scales, intervals between pitches, key signatures, elements of rhythm, diatonic chords in root position and inversion. Simple and compound meters. Formerly Music 25A.

MUSIC 40B. History of European Music: Josquin to Wagner. 4 Units.

An introduction to the analysis of musical styles and forms, and to the sources for constructing music history and reconstructing historical music, to J.S. Bach.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better.

Restriction: Music and Music Performance majors have first consideration for enrollment.

(IV, VIII)

MUSIC 40C. History of European Music: Josquin to Wagner. 4 Units.

An introduction to the analysis of musical styles and forms, and to the sources for constructing music history and reconstructing historical music, to Richard Wagner.

Prerequisite: MUSIC 40B. MUSIC 40B with a grade of C- or better. MUSIC 16D recommended.

Restriction: Music and Music Performance majors have first consideration for enrollment.

(IV, VIII)

MUSIC 40D. Twentieth-Century Music. 4 Units.

Survey of principal composers, movements, and compositional techniques of Western art music of the modern era.

Prerequisite: MUSIC 16C. MUSIC 16C with a grade of C- or better.

Restriction: Music and Music Performance majors have first consideration for enrollment.

(IV, VIII)

MUSIC 41. Major Composer. 4 Units.

Study of the works of an important composer with emphasis on their significance in historical and social contexts. Composers selected represent a wide variety of historical periods, nationalities, and stylistic orientations.

Repeatability: May be taken for credit 2 times as topics vary.

MUSIC 42. Music and Gender. 4 Units.

Explores various intersections between music and gender. Examines ways in which gender and sexuality have played a vital role in the creation, dissemination, and consumption of music ranging from medieval Christian mysticism to contemporary hip-hop artists.

(IV, VIII)

MUSIC 44. Classical Music in Society. 4 Units.

Examines some ways in which classical music has played an integral role in aspects of society. Studies pieces from different cultural, political, and historical contexts in order to understand how musical meaning is created and interpreted.

(IV, VIII)

MUSIC 49A. Asian in Western Music. 4 Units.

Traces and critiques western musical representations of Far East culture and figures, reviewing the reception and significance of these works by present-day Asian consumers of western culture.

Prerequisite: Satisfactory completion of the lower-division writing requirement recommended.

(VIII)

MUSIC 51. Music Technology and Computers. 4 Units.

A study of the influence of technology on the musical culture and aesthetics from the twentieth century to the present, with particular emphasis on the role of the computer. Work includes lectures, readings, listenings, discussions, demonstrations, writing, and experimentation.

(IV)

MUSIC 65. Piano for Music Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music majors only.

MUSIC 66. Strings for Music Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music majors only.

MUSIC 67. Winds for Music Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music majors only.

MUSIC 68. Voice for Music Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times.

Restriction: Music majors only.

MUSIC 69. Percussion for Music Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times as topics vary.

Restriction: Music majors only.

MUSIC 70. Guitar, Lute, and Other Plucked Instruments for Music Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times.

Restriction: Music majors only.

MUSIC 78. History of Jazz. 4 Units.

Development of jazz from African and African American folk origins through blues, early jazz, swing, bebop, "cool" jazz, fusion, free jazz, and contemporary trends.

Overlaps with MUSIC 78A, MUSIC 78B.

Restriction: Students may not receive credit for both MUSIC 78 and MUSIC 78A-78B.

(IV, VII)

MUSIC 82A. Pish Radif: Introduction to Classical Persian Music. 4 Units.

Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Mahur.

Repeatability: May be repeated for credit unlimited times.

MUSIC 82B. Pish Radif: Introduction to Classical Persian Music. 4 Units.

Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Homayun.

Repeatability: May be repeated for credit unlimited times.

MUSIC 82C. Pish Radif: Introduction to Classical Persian Music. 4 Units.

Survey of art music in Iran and the basic structures of classical Persian music. Students learn through vocal exercises how Persian music evolved and how it was influenced by Persian poetry. An interest in vocal music is strongly recommended. Shur.

Repeatability: May be repeated for credit unlimited times.

MUSIC 122A. Piano Literature. 2 Units.

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.

Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 122B. Piano Literature. 2 Units.

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.

Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 122C. Piano Literature. 2 Units.

Survey of stringed keyboard literature from the English Virginalists through twentieth-century composers. Historical, formal, and stylistic considerations of music presented. Performances by class participants and occasional outside guests.

Prerequisite: MUSIC 16A and MUSIC 16B and MUSIC 16C.

Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 126. Piano Pedagogy. 2 Units.

The materials and methods of piano instruction are examined and evaluated.

Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 131. Post-Tonal Theory. 4 Units.

Significant harmonic, rhythmic, and structural practices since 1900. Analysis and written work exploring free atonality and serialism; neo-tonal practices such as use of extended tertian harmonies, modalism, pandiatonicism, and non-tertian harmonies; structural principles such as aleatory, metric modulation and minimalism.

Prerequisite: MUSIC 16D.

Restriction: Music and Music Performance majors only.

MUSIC 132. Jazz Theory. 4 Units.

Study of jazz harmony and melody construction in improvisation. Covered topics include terminology, chord symbols, notation, voicings, and scales as commonly used in jazz and popular music. Issues regarding tonality and ramifications of the blue scale are also examined.

Prerequisite: MUSIC 16D.

Restriction: Music and Music Performance majors only.

MUSIC 136. Instrumentation. 4 Units.

Ranges and capabilities of modern orchestral instruments. Exercise in writing for various combinations of wind, string, and percussion instruments and for full orchestra.

Prerequisite: MUSIC 16C.

Restriction: Music and Music Performance majors only.

MUSIC 140. Studies in Medieval Music. 4 Units.

Topics in Medieval Music.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 141. Studies in Renaissance Music. 4 Units.

Topics in Renaissance Music.

Prerequisite: MUSIC 40B.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 142. Studies in Baroque Music. 4 Units.

Topics in Baroque Music.

Prerequisite: MUSIC 40B.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 142W. Studies in Baroque Music . 4 Units.

Topics in Baroque Music.

Prerequisite: MUSIC 40B or equivalent.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music and Music Performance majors only.

(Ib)

MUSIC 143. Studies in Classical Music. 4 Units.

Topics in Classical Music.

Prerequisite: MUSIC 40C. Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 143W. Studies in Classical Music. 4 Units.

Topics in Classical Music.

Prerequisite: MUSIC 40C or equivalent. Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music and Music Performance majors only.

(Ib)

MUSIC 144. Studies in Romantic Music. 4 Units.

Topics in Romantic Music.

Prerequisite: MUSIC 40C.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 144W. Studies in Romantic Music. 4 Units.

Topics in Romantic Music.

Prerequisite: MUSIC 40C or equivalent.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music and Music Performance majors only.

(Ib)

MUSIC 145. Studies in Twentieth-Century Music. 4 Units.

Topics in Twentieth-Century Music.

Prerequisite: Satisfactory completion of the Lower-Division writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only. Upper-division majors only.

MUSIC 145W. Studies in Twentieth-Century Music. 4 Units.

Topics in Twentieth-Century Music.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music and Music Performance majors only. Upper-division only.

(Ib)

MUSIC 146. Studies in Jazz Music. 4 Units.

Topics in Jazz Music.

Repeatability: May be taken for credit 2 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 147. Studies in Music Technology. 4 Units.

Specialized topics in electronic music, computer-aided music, and other aspects of music technology.

Repeatability: May be taken for credit 2 times as topics vary.

MUSIC 148. Studies in Ethnomusicology. 4 Units.

Topics in Ethnomusicology.

Repeatability: May be taken for credit 2 times.

Restriction: Music majors and Music Performance majors only.

MUSIC 149. Studies in Music History. 4 Units.

Specialized topics in musical genres; culture and social issues; performance practices; and interrelated arts.

Prerequisite: MUSIC 40B and MUSIC 40C and MUSIC 40D. Satisfactory completion of the lower-division writing requirement.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: Music majors and Music Performance majors only.

MUSIC 150. Composition. 4 Units.

Exercises and projects for diverse instrumental-vocal combinations; contemporary techniques and problems. Participation in the improvisation ensemble and working with electronic media.

Prerequisite: MUSIC 16C.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 151. Computer Music Composition. 4 Units.

Exercises in the composition of music uniquely possible by computer, including digital signal processing, computer control of synthesizers and processors, and algorithmic composition. Demonstrations and musical analyses in class; considerable studio work outside class.

Prerequisite: MUSIC 51.

MUSIC 152. Interactive Arts Programming. 4 Units.

Study of artistic issues and programming techniques involved in the development of interactive computer art and music. Theoretical background, basic tenets of programming, and practical exercises in programming interactive computer multimedia art.

Prerequisite: MUSIC 151 or ART STU 106.

MUSIC 155. ANALYSIS. 4 Units.

Methods of formal analysis applicable to all Western musical styles: additive, continuous, transformational, and hierarchic forms; rhythm, texture, and sonority as form and process.

Prerequisite: MUSIC 16D and MUSIC 40B and MUSIC 40C.

Repeatability: Unlimited as topics vary.

Restriction: Music and Music Performance majors only.

MUSIC 156A. Song Literature. 2 Units.

A survey of song literature. Designed as an overview of the song repertoire, German Lieder.

Restriction: Music and Music Performance majors only.

MUSIC 156B. Song Literature. 2 Units.

A survey of song literature. Designed as an overview of the song repertoire, French mélodie.

Restriction: Music and Music Performance majors only.

MUSIC 156C. Song Literature. 2 Units.

A survey of song literature. Designed as an overview of the song repertoire, National Schools.

Restriction: Music and Music Performance majors only.

MUSIC 157. Advanced Study in Composition. 4 Units.

Individual weekly lessons in composition.

Prerequisite: MUSIC 150.

Repeatability: May be taken for credit 6 times.

Restriction: Music and Music Performance majors only. Upper-division students only.

MUSIC 158A. Diction. 2 Units.

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. Introduction to IPA and Italian Diction.

Restriction: Music and Music Performance majors only.

MUSIC 158B. Diction. 2 Units.

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. German Diction.

Prerequisite: MUSIC 158A.

Restriction: Music and Music Performance majors only.

MUSIC 158C. Diction. 2 Units.

In-depth study of the International Phonetic Alphabet (IPA), including its transcription and pronunciation, and its application for singers. French Diction.

Prerequisite: MUSIC 158A and MUSIC 158B.

Restriction: Music and Music Performance majors only.

MUSIC 159. Vocal Pedagogy. 2 Units.

Survey about the physical structure of the singing mechanism, science and philosophy of studio instruction.

Restriction: Music and Music Performance majors only.

MUSIC 160. University Orchestra. 2 Units.

Study and performance of standard orchestral repertoire and works by contemporary composers. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

MUSIC 161. Wind Ensemble. 2 Units.

Study and performance of works written for varying combinations of wind and percussion instruments. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

MUSIC 162. UNIVERSITY CHORUS. 2 Units.

Make-up of the ensembles varies and may include University Chorus, Chamber Choir, Madrigal Singers, Women's Chorus, and Reading Choir. Membership is open to all qualified students by audition only.

Prerequisite: Audition required.

Repeatability: May be repeated for credit unlimited times.

MUSIC 162L. Basic Voice Lab. 1 Unit.

Vocal technique and musicianship for selected singers in UCI's choral organizations.

Corequisite: MUSIC 162.

Repeatability: May be repeated for credit unlimited times.

Restriction: Not open to Music majors.

MUSIC 162P. University Chorus: Accompanying. 2 Units.

Keyboard accompanying for one of the UCI choral organizations, with individual coaching in sight reading, score reading, and other accompanying skills.

Repeatability: May be taken for credit 12 times.

MUSIC 164. Opera Workshop. 2-4 Units.

Preparation and performance of operatic repertoire, including arias, scenes, and fully staged operas, and/or stage training and role analysis.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 164P. Opera Workshop: Accompanying. 2-4 Units.

Training in techniques and operatic repertoire for keyboard players.

Repeatability: May be repeated for credit unlimited times.

MUSIC 165. Piano for Music Performance Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 166. Strings for Music Performance Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 166P. String Accompaniment. 2 Units.

Chamber ensemble experience with the solo string repertory for keyboard, participation in the weekly string master class, performance in public recitals.

Repeatability: May be taken for credit 3 times.

MUSIC 167. Winds for Music Performance Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 168. Voice for Music Performance Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 169. Percussion for Music Performance Majors. 4 Units.

Private weekly lessons.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 170. Guitar, Lute, and Other Plucked Instruments for Music Performance Majors. 4 Units.

Private weekly lessons and a weekly master class/workshop for the discussion of solo repertory and performance practice, including special topics such as historical notational systems, traditional American guitar styles, and demonstrations of period plucked instruments.

Repeatability: May be taken for credit 6 times.

Restriction: Music Performance majors only.

MUSIC 171. Chamber Singers. 2 Units.

A select ensemble specializing in vocal chamber music from all periods. Frequent performances on and off campus. Membership is open to all singers by audition.

Repeatability: May be repeated for credit unlimited times.

MUSIC 172. Men in Blaque. 2 Units.

Men's chamber choir studying and performing music in original SATB and TTBB voicing. Gregorian chant, Renaissance motets and masses, part-songs from the Romantic era by Schubert and Schumann, folksongs, spirituals, jazz and contemporary literature comprises majority of repertoire.

Repeatability: May be taken for credit 12 times.

MUSIC 176. Chamber Ensembles . 2 Units.

Make-up of the ensembles varies and may include various Classical ensembles, Latin Jazz Ensemble, Small Jazz Combos, Percussion Ensemble, and Guitar Ensemble. Membership is open to all qualified students by audition only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors have first consideration for enrollment.

MUSIC 178. Jazz Orchestra. 2 Units.

Rehearsal and performance of literature written for large jazz ensemble with emphasis on methods and materials. Laboratory setting for new arrangers and/or composers of modern jazz pieces.

Repeatability: May be repeated for credit unlimited times.

MUSIC 180. Music Criticism . 4 Units.

Topics in Music Criticism.

Repeatability: Unlimited as topics vary.

Restriction: Music and Music Performance majors only.

MUSIC 180A. Music and Material Culture. 4 Units.

Examines the cultural value of secular music objects such as scores, musical instruments, and cassette tapes beyond the period of their use. "Biographies" of not-sounding musical objects trace the changing social contexts in which they survived.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

MUSIC 180AW. Music and Material Culture. 4 Units.

Examines the cultural value of secular music objects such as scores, musical instruments, and cassette tapes beyond the period of their use. "Biographies" of not-sounding musical objects trace the changing social contexts in which they survived.

Prerequisite: Satisfactory completion of the lower-division writing requirement.

(Ib)

MUSIC 180W. Music Criticism . 4 Units.

Topics in Music Criticism.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Repeatability: Unlimited as topics vary.

Restriction: Music and Music Performance majors only.

(Ib)

MUSIC 181. Improvisation. 4 Units.

Improvisation has been central to all music traditions. Course explores real-time music-making in a variety of non-notated contexts. Different improvisational styles are presented, including jazz, Asian improvisation, and experimental modern music. Emphasis on actual classroom performance.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 182. Advanced Jazz Combo. 2 Units.

Small-group jazz ensemble and improvisational workshop. Range of music covered encompasses the full traditional jazz from improvised ragtime up through the most current avant-garde musical techniques.

Repeatability: May be repeated for credit unlimited times.

MUSIC 183A. Jazz Composition. 4 Units.

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Cyclical forms, modal compositions, blues-oriented compositions, ballad writing.

Prerequisite: MUSIC 78A and MUSIC 132.

Restriction: Music and Music Performance majors only.

MUSIC 183B. Jazz Composition. 4 Units.

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Non-functional harmony, contemporary forms, free-bop, and current trends.

Prerequisite: MUSIC 78A and MUSIC 132 and MUSIC 183A.

Restriction: Music and Music Performance majors only.

MUSIC 183C. Jazz Composition. 4 Units.

Performance and lecture course for writing and performing original jazz compositions. Emphasis is placed on composing as a way to create new improvisational frameworks. Study of modern tonal-center compositions, intervallic compositions, and alternate rhythms.

Prerequisite: MUSIC 78A and MUSIC 132 and MUSIC 183A and MUSIC 183B.

Restriction: Music and Music Performance majors only.

MUSIC 189. Accompanying for Plucked Strings: Continuo and Changes. 2 Units.

Students apply theory to their instruments as they learn the basics of pre-1800 continuo playing and post-1900 jazz charts. Includes discussions of appropriate repertory, treatment of harmonic progressions, and finer points of style and technique.

Prerequisite: MUSIC 16C.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 191. Tutorial in Music. 1-4 Units.

Independent supplemental instruction related to student's area of study.

Repeatability: May be repeated for credit unlimited times.

MUSIC 193. Conducting. 4 Units.

Introduces students to the basic techniques employed in the practice of conducting and includes score study and development of leadership skills.

Prerequisite: MUSIC 16D and MUSIC 40B and MUSIC 40C.

Restriction: Music and Music Performance majors only.

MUSIC 195A. Senior Thesis. 2 Units.

With consultation in regularly scheduled meetings, students identify and study relevant texts and materials and prepare a prospectus for an original thesis.

Prerequisite: Senior standing in the Honors Program in Music and Culture.

Grading Option: In progress only.

Restriction: Music and Music Performance majors only.

MUSIC 195B. Senior Thesis. 2 Units.

Students submit an outline and preliminary drafts of section of their thesis to the instructor, on a schedule supervised by the instructor. The final version will address the instructor's comments and criticisms.

Prerequisite: MUSIC 195A.

Restriction: Music and Music Performance majors only.

MUSIC 197. Word and Music. 2 Units.

Performance class for advanced singers and pianists with emphasis on collaborative approach to vocal literature.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music and Music Performance majors only.

MUSIC 199. Independent Study. 2 Units.

Research, writing, or composition work, under the guidance of a faculty member.

Repeatability: May be taken for credit 2 times.

Restriction: Music and Music Performance majors only.

MUSIC 200. Bibliography and Research. 4 Units.

Required of all entering students. A systematic introduction to the bibliographical tools both in the general field of music and in the student's areas of specialization.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 201. Topics in Analysis. 4 Units.

Seminar focusing on different analytical methods, modal, tonal and post-tonal, and their applications to repertoires drawn from various historical periods through to the present day.

Prerequisite: Placement into MUSIC 201.

Repeatability: Unlimited as topics vary.

Restriction: M.F.A. students only.

MUSIC 203. Music Thesis . 4 Units.

Intensive work dedicated to researching and writing a Master's thesis under the supervision of a faculty advisor.

Prerequisite: MUSIC 200.

Repeatability: May be repeated for credit unlimited times.

Restriction: M.F.A. students in Musicology only.

MUSIC 209. Seminar in Creative Practices. 4 Units.

Core first-year seminar required for graduate students in the Integrated Composition, Improvisation, and Technology emphasis of the M.F.A. in Music. Composition and presentation of original student works, lecture, and discussion.

Repeatability: May be taken for credit 3 times.

Restriction: Music graduate students only.

MUSIC 210. Choral Conducting . 4 Units.

Intensive private instruction and study of the various choral literatures.

Repeatability: May be taken for credit 6 times.

Restriction: Music graduate students only.

MUSIC 211. Performance . 4 Units.

Contents vary according to the student's major instrument. Intensive private instruction and study of the various literatures.

Repeatability: May be taken for credit 6 times.

Restriction: Music graduate students only.

MUSIC 212. Composition. 4 Units.

Intensive work in composition geared to each student's level of competence.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 213. Orchestral Conducting. 4 Units.

Intensive private instruction in instrumental conducting.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 214. Graduate Recital. 0 Units.

Performance of public recital.

Repeatability: May be taken for credit 2 times.

Restriction: Music graduate students only.

MUSIC 215. Music Technology. 4 Units.

Studies in the history, literature, composition, and performance of electronic and computer music, including instruction in the theory and usage of prevalent music technology.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 220. Seminar in Music History. 4 Units.

Topics in Music History.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 230. Seminar in Contemporary Music. 4 Units.

Special seminar projects dealing with contemporary music with emphasis on analytical techniques and style criticism.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 231. Improvisation. 4 Units.

Introduces the practice and history of improvisation in diverse fields of Western music since 1950. Performance projects and group critiques; weekly reading and listening assignments; participation in a class concert; and a research paper.

Restriction: Music graduate students only.

MUSIC 235. Critical Studies in Music. 4 Units.

A critical examination of Western music traditions, institutions, and aesthetics, employing new scholarship in music and new critical studies in other disciplines.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 236. Seminar in Integrated Composition, Improvisation, and Technology. 4 Units.

Seminar studying new genres and topics that integrate composition, improvisation, new technologies, and non-classical cultures.

Repeatability: May be repeated for credit unlimited times.

Restriction: Music graduate students only.

MUSIC 239. Thesis Colloquim. 1-2 Units.

Second-year ICIT students present their thesis work-in-progress for discussion and criticism. Faculty and visiting artists/scholars also present their current work.

Repeatability: May be taken for credit 2 times.

Restriction: Music graduate students only.

MUSIC 240. Graduate Projects . 4 Units.

Substantial projects in performance, conducting, or composition (other than those specifically required for the degree), accompanied by a summary paper.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 250. Directed Reading. 4 Units.

Individual research projects, resulting in the writing of a substantial paper pertaining to the principal area of concentration.

Repeatability: Unlimited as topics vary.

Restriction: Music graduate students only.

MUSIC 399. University Teaching. 1-4 Units.

Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

School of Biological Sciences

Albert F. Bennett, **Hana and Francisco J. Ayala Dean**

5120 Natural Sciences II
<http://www.bio.uci.edu/>

Undergraduate Counseling: (949) 824-5318
 Graduate Programs:

- Department of Ecology and Evolutionary Biology: (949) 824-4743
- Combined Graduate Program in Cellular and Molecular Biosciences (CMB): (949) 824-8145
- Department of Neurobiology and Behavior: (949) 824-8519

Overview

This is the ideal time to be studying biology. We are solving problems today whose solutions were unimaginable even a few years ago, and implications for our society, our health, and our environment are profound. The School of Biological Sciences is dedicated to providing students with a unique course of study that fosters a deep appreciation for the exciting facts and concepts in the field, an education that allows graduates to excel in their chosen careers.

The School has recently redesigned the curriculum to remain on the cutting edge of biological education. All first-year students are introduced to basic concepts in ecology and evolutionary biology, as well as cellular and molecular biology. The core set of courses in biology continues into the second year, featuring genetics, biochemistry, and molecular biology, followed in the third and fourth year by a choice of advanced courses in biology. Since biology is a laboratory discipline, students complete a series of laboratory courses in which they learn both the techniques and approaches needed to solve problems in biology.

Finally, the faculty expect that most students will engage in cutting-edge research in one of more than 250 laboratories and medical clinics in the School of Biological Sciences and the UCI School of Medicine. It is in these situations that faculty train students to think in a sophisticated way about real-world problems. There is also no feeling of excitement greater than finding out something about the world that no one has ever known before, a feeling afforded in biology only by participation in research. The Excellence in Research Program allows students to present their work and be recognized for their performance with a series of awards and publication of their reports in the School's online *Journal of Undergraduate Research*. The set of core classes that instructs students in the concepts of biology, the advanced classes that allow a deep understanding of specialized aspects of biology, the laboratory courses that convey the practical aspects of problem-solving in biology, and the research experiences that engage students in the real excitement in revealing new information about biology, come together to provide an extraordinary experience for students. The Honors Program in the School of Biological Sciences further enhances the educational experience for the best students.

Biology students have the option of specializing in areas of biology that best fit their interests, completing courses for degree programs in Biochemistry and Molecular Biology, Biology/Education, Developmental

and Cell Biology, Ecology and Evolutionary Biology, Genetics, Microbiology and Immunology, or Neurobiology.

Those students who wish to receive a broader education in the area can opt to complete a major in Biological Sciences. Completion of any of these majors forms an excellent basis for application to either graduate or professional studies such as medical school, and graduates of the School of Biological Sciences are routinely accepted to the most prestigious programs in the country.

The quality of the faculty in the School of Biological Sciences has remained high while increasing steadily in number over the past few years, giving students a remarkable range of expertise in biology and with it, a large number of different advanced courses and research opportunities. In addition, their efforts have brought several high-impact research units to the campus, such as the Center for the Neurobiology of Learning and Memory, the Center for Virus Research, the Beckman Laser Institute, the Cancer Research Institute, the Developmental Biology Center, the Center for Immunology, the Institute for Memory Impairments and Neurological Disorders, the Macromolecular Structure Research Unit, the Organized Research Unit in Molecular and Mitochondrial Medicine and Genetics, the Institute for Genomics and Bioinformatics, and the Reeve-Irvine Research Center, all of which are accessible to undergraduates. The School of Biological Sciences also has close research and teaching collaborations with faculty in the Schools of Medicine, Physical Sciences, Social Ecology, and Social Sciences; the Donald Bren School of Information and Computer Sciences; and The Henry Samueli School of Engineering.

In addition to the regular University requirements for admission, students interested in the biological sciences should include in their high school curriculum, in addition to a course in biology, four years of mathematics, as well as courses in chemistry and physics, which are now an integral part of most contemporary biological work.

The School's professional counseling staff is always available for consultation to students regarding the many decisions in their academic program. They also are trained to provide guidance in the application process to both professional and graduate schools, a real advantage to the high proportion of students in the School of Biological Sciences who go on to pursue advanced degrees.

Opportunities are available at the graduate level to specialize in Developmental and Cell Biology, Ecology and Evolutionary Biology, Molecular Biology and Biochemistry, and Neurobiology and Behavior.

Degrees

Biochemistry and Molecular Biology	B.S.
Biological Sciences	B.S., M.S., Ph.D.
Biological Sciences and Educational Media Design	M.S.
Biology/Education	B.S.
Biotechnology Management*	M.S.
Developmental and Cell Biology	B.S.
Ecology and Evolutionary Biology	B.S.
Genetics	B.S.
Microbiology and Immunology	B.S.
Neurobiology	B.S.

* Offered jointly with the The Henry Samueli School of Engineering and The Paul Merage School of Business.

Honors

Honors Program in the School of Biological Sciences

The Honors Program in the School of Biological Sciences provides an opportunity for outstanding majors in the School to pursue advanced work in independent research via participation in the Excellence in Biological Sciences Research Program and earn Honors in Biological Sciences upon graduation. Admission to the program is based on an application to participate in the Excellence in Biological Sciences Research program filed during the middle part of the fall quarter of the year of the student's participation. Additionally, students must have a minimum overall 3.5 grade point average and a minimum 3.5 grade point average in all required Biological Sciences courses. The Program requires enrollment in research (BIO SCI 199) including successful completion of BIO SCI H195 and the Excellence in Biological Sciences Research program.

Graduation with Honors

Of the graduating seniors, no more than 12 percent will receive Latin honors: approximately 1 percent *summa cum laude*, 3 percent *magna cum laude*, and 8 percent *cum laude*. The selection for these awards is based on spring quarter rank-ordered grade point averages. To be eligible for honors at graduation, the student must, by the end of spring quarter of the senior year, be officially declared a Biological Sciences major; submit an Application to Graduate by the end of winter quarter of the senior year; have completed at least 72 units in residence at a UC campus by the end of the spring quarter of the academic year in which they graduate; have all corrections to the academic record processed by the Registrar's Office by the end of spring quarter; if completing the Language Other Than English general education requirement with a language exemption test, pass the test by the end of spring quarter; and be able to verify completion of all course work by the end of the spring quarter of the senior year. Other important factors are considered (see Honors Recognition) (p. 58).

Excellence in Research Program

The School of Biological Sciences believes that successful participation in creative research is one of the highest academic goals its undergraduates can attain. Students enrolled in Undergraduate Research (BIO SCI 199) and who meet the eligibility requirements have an opportunity to present the results of their research endeavors to peers and faculty. Those students awarded with "Excellence in Research" will then have their papers published in the School's online *Journal of Undergraduate Research in the Biological Sciences*.

The program begins each fall with a mandatory instructional workshop and continues through spring with students completing a scientific paper, poster presentation, and scientific talk. Contact the Biological Sciences Student Affairs Office, room 1011 Biological Sciences III, or visit the Web site at <http://www.bio.uci.edu/students/undergraduates/research/> for additional information.

Campuswide Honors Program

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campus-wide Honors Program, 1200 Student Services II; (949) 824-5461; honors@uci.edu; <http://www.honors.uci.edu/>.

Dean's Honor List. The quarterly Dean's Honor List is composed of students who have received a 3.5 grade point average while carrying a minimum of 12 graded units.

Biological Sciences Honors, Scholarships, Prizes, and Awards

The following honors, scholarships, prizes, and awards are presented at the annual Biological Sciences Honors Convocation held in June.

Excellence in Research Award. Undergraduates who have successfully completed the requirements for this program are presented with Excellence in Research certificates.

Atwood Family Scholarship. The Atwood Family Scholarship is awarded to sophomore Biological Sciences majors who demonstrate outstanding achievement in both scholarship and service to the UCI community.

Robert H. Avnet Memorial Scholarship. The Robert H. Avnet Memorial Scholarship has been established to assist a student interested in becoming a physician. The student must be a Biological Sciences major and demonstrate financial need.

Carol Becker McGaugh Award. This award is given to a junior with outstanding research in the area of neurobiology of learning and memory.

Robert Ernst Prize for Excellence in Research in the Biological Sciences. This prize is awarded to a student for meritorious research conducted in the field of biology.

Robert Ernst Prize for Excellence in Student Research in Plant Biology. This prize is awarded to a student for meritorious research conducted in plant biology.

M. Marlene Godoy Award. This award is given to support a graduating senior in the Biological Sciences who is pre-medical or pre-dental. The recipient is one who is *actively* involved with philanthropic community service, University service, and in undergraduate research.

Dr. William F. Holcomb Scholarship. The intent of the Dr. William F. Holcomb Scholarship is to support biomedical or marine biological studies. The Scholarship is to be used to support continuing academic work over a specific period.

Leadership Scholars Program. This program was established by the Dean's Leadership Council for the School of Biological Sciences. The scholarship will support Biological Sciences majors who demonstrate academic and personal commitment to the School, University, and their local community.

Laurence J. Mehlman Prize. The Laurence J. Mehlman Prize is awarded to an undergraduate student in the School of Biological Sciences who has demonstrated outstanding achievement in both scholarship and service to the School.

Edward Mittelman Memorial Fund Scholarship. The Edward Mittelman Memorial Fund Scholarship is presented to an outstanding Biological Sciences student who will pursue a career in the medical field.

Edward A. Steinhaus Memorial Award. The Edward A. Steinhaus Memorial Award is given to outstanding Biological Sciences graduate student teaching assistants who demonstrate promise as future educators.

Joseph H. Stephens Award for Outstanding Research in Ecology and Conservation. This award is granted to a graduate student who has demonstrated outstanding research in ecology and conservation.

Joseph H. Stephens Award for Outstanding Research in Biochemistry and Molecular Biology. This award is granted to a graduate student who has demonstrated outstanding research in biochemistry and molecular biology.

Jayne Unzelman Scholarship. The Jayne Unzelman Scholarship is presented to an undergraduate student who has shown academic excellence and been of service to the School of Biological Sciences and/or the University, and to the community.

Special Programs and Courses

Biological Sciences 199

The (BIO SCI 199) Undergraduate Research Training Program provides students the opportunity to pursue independent research. Students conduct experimental laboratory, field, or clinical research as an apprentice scientist under the supervision of a professor in the School of Biological Sciences or the School of Medicine. (BIO SCI 199) research students experience the challenge and excitement of the world of science. Students develop new scientific skills and knowledge while training with professors who are on the cutting edge of research and discovery in the biological and medical sciences. The research training may commence as early as the sophomore year or, in the case of exceptional students, in the freshman year.

To participate in this unique research training program, students must be in good academic standing, and completion of both BIO SCI 94 From Organisms to Ecosystems and BIO SCI 194S Safety and Ethics for Research are mandatory prior to enrollment. Students are encouraged to investigate the possibilities for research early to assure that all requirements and deadlines are met. It is recommended that students contact a faculty sponsor at least one quarter in advance for (BIO SCI 199) enrollment. Once a faculty sponsor is acquired, the student must submit the enrollment packet to the Biological Sciences Student Affairs Office, 1011 Biological Sciences III. At the end of each quarter a Summary Report is required.

Students cannot participate in research involving human blood, body fluids, or tissue, unless special approval is granted. The faculty sponsor must submit a request for exception to the Biological Sciences Student Affairs Office.

Students conducting research directly with patients or other human subjects must comply with special enrollment procedures and the additional safety training required at the clinical site. The (BIO SCI 199) Undergraduate Research Training Program standards, procedures, enrollment packets, and announcements are available at <http://www.bio.uci.edu/students/undergraduates/research/>.

The (BIO SCI 199) Undergraduate Research Training Program can provide experience that is beneficial for the future pursuit of graduate school. Information regarding research careers in the biological sciences is best obtained from a faculty research mentor.

Students should be aware that for any one quarter, a maximum of five units of independent study courses may be taken within the School of Biological Sciences.

Minority Sciences Programs in Biological Sciences

The Minority Sciences Programs (MSP) in Biological Sciences is a UCI umbrella program that provides infrastructure and orchestration for the operation of minority research training grants supported by the National Institutes of Health (NIH) and other agencies. MSP seeks to increase the number of U.S. underrepresented groups in biomedical research careers. MSP participants benefit from early exposure, continuous research training, and faculty mentoring. Support is also provided through paid summer and year-round research internships, early research exposure, tutoring, academic advising, scientific writing, and participation at national conferences. Furthermore, MSP has established a campuswide, regional, national, and international network of committed faculty and resource programs to facilitate the transition from high school through community college, baccalaureate, and master's degrees to Ph.D. careers in biomedical research and related fields. Additional information is available from the MSP office, 1104 Biological Sciences III; (949) 824-2589; <http://port.bio.uci.edu>.

Biological Sciences Tutoring Program

The Tutoring Program provides free tutoring for most Biological Sciences courses and is available to all students in any major. Weekly small group tutoring sessions, reviews for midterms and finals, and a growing online database of worksheets and review materials are provided. In the Tutoring Program, UCI students tutor other UCI students. For the student tutor, this program provides opportunities to develop their teaching abilities, to meet and interact with faculty, and to perform a worthwhile and necessary service. Tutors also receive academic credit. For more information, contact the Biological Sciences Student Affairs Office in 1011 Biological Sciences III or visit the tutoring program Web site at <http://www.eee.uci.edu/programs/biotutor>.

UC Education Abroad Program

Upper-division students have the opportunity to experience a different culture while making progress toward degree objectives through the University's Education Abroad Program (UCEAP). UCEAP is an overseas study program which operates in cooperation with host universities and colleges throughout the world. Specifically, Biology majors should consider the UCEAP programs in the United Kingdom, Canada, Sweden, Australia, Denmark, and Costa Rica. See <http://www.studyabroad.uci.edu> for additional information.

Students may wish to participate in the UCEAP Tropical Biology Quarter which is for undergraduates with at least one year of introductory biology, one quarter of upper-division biology, and a serious interest in biological studies. The program includes lectures, field laboratories, and independent research, with an emphasis on direct field experience. Students also take a course in Spanish language and Latin American culture.

Master of Science with a Concentration in Biotechnology

The School of Biological Sciences offers a master's program with a concentration in Biotechnology designed to train students to enter the field of biotechnology as skilled laboratory practitioners. The upper-division course requirements for admission into the program are extensive. Students interested in applying for admission to the Biotechnology program should plan to complete the necessary courses during their junior and senior years. Click on the Graduate tab above for more information.

Special Research Resources

Special research resources include the Beckman Laser Institute and Medical Clinic, a research, training, and service facility in the area of laser microbeam technology; the School of Biological Sciences Biohazard (P-3) Facility, which provides laboratory facilities for working with biological agents or biological molecules such as recombinant DNA which would be hazardous when used in open laboratories; the Developmental Biology Center, devoted to analyzing the cellular and genetic mechanisms underlying growth, development, and regeneration; the Center for the Neurobiology of Learning and Memory, a research center for studies of the brain mechanisms underlying learning and memory; the Institute for Memory Impairments and Neurological Disorders; the Center for Virus Research, which includes the Viral Vector Design research group; the Conservation Biology Project; the Cancer Research Institute; the Center for Immunology; the Macromolecular Structure Research Unit; the UCI Arboretum, a botanical garden facility; the San Joaquin Marsh Reserve, which supports controlled marsh biota; the Burns Piñon Ridge Reserve, a high-desert habitat in San Bernardino County; and the UCI Ecological Preserve, which includes coastal hills on the campus, once under heavy grazing, but now returning to a more natural state. It is important to note that the School of Biological Sciences collaborates with the School of Medicine, thereby providing an opportunity for the sharing of both teaching and research activities. These collaborative efforts include the Institute for Genomics and Bioinformatics; the Reeve-Irvine Research Center; and the Bio-Imaging Interest Group.

Advising: Academic, Career, Health Sciences

1011 Biological Sciences III

<http://www.bio.uci.edu/students/undergraduates/contact-us/>

Academic Advising

The Biological Sciences Student Affairs Office coordinates the advising program and provides academic counseling as well as special services particularly in the area of preprofessional career counseling. Undergraduate Biological Sciences students should consult the Biological Sciences Student Affairs Office for information on academic requirements for the degree, career opportunities, the BIO SCI 199 Research Program, available tutoring for Biological Sciences courses, Biological Sciences student organizations, and scholarship information. Students can also come to the Biological Sciences Student Affairs Office to change their major, apply for graduation, or for any other help they might need related to their academic career at UCI.

All freshmen will enroll in small-group freshman seminars (BIO SCI 2A) and all other new students will enroll in special sections of BIO SCI 190.

Peer Academic Advisors. The Peer Academic Advisors are upper-division Biological Sciences majors who bring with them valuable academic and social experiences. Their functions include counseling students in matters of major selection, program planning, petitioning, tutoring, learning skills problems, and participation in cocurricular and extracurricular activities.

The Peer Advisors are located in the Biological Sciences Student Affairs Office. Office hours are posted at the beginning of each quarter.

Career Advising

Information on graduate and professional schools in the health sciences can be obtained from the Biological Sciences Student Affairs Office. The

UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Career Center section for additional information.

Areas of opportunity open to those with a Bachelor of Science degree include laboratory technology, publishing, technical editing, pharmaceutical sales, and training programs in county, state, and federal agencies. The bachelor's degree is necessary to pursue studies leading to the M.S. and Ph.D. degrees.

The B.S. degree, plus short training periods, may prepare students for employment in education, medical technology (usually one year), allied health positions, and various other areas.

Education (community colleges, state colleges, or private schools), medical illustration, and public health (which includes hospital administration, biostatistics, epidemiology, environmental health sciences, social work, public health education, maternal and child health, and infectious and tropical diseases) are fields in which opportunities are available upon completion of a master's program.

The Ph.D. degree may lead to research in many areas, among them biochemistry, biometeorology, botany, cytology, ecology, fishery biology, genetics, home economics, microbiology, molecular biology, pathology, physiology, psychobiology, public health, range management, soil conservation, and zoology.

Other areas where advanced degrees are necessary include medicine, dentistry, law, optometry, podiatry, osteopathy, physical therapy, and veterinary medicine.

Health Sciences Advising

Advising for careers in the health sciences is a specialty of the Biological Sciences Student Affairs Office. Students desiring to enter the health sciences should have their programs checked in the Office and should plan to enroll in BIO SCI 3A. Admissions tests for medical, dental, pharmacy, and graduate schools should be taken in the spring, a year and one-half before the student plans to enter.

Leaders in nearly all health professional schools recommend that students preparing to seek admission to their schools plan to obtain a bachelor's degree. Students who plan to enter a school of dentistry, medicine, or other areas of the health sciences may receive the required preprofessional training at UCI. This preprofessional training may be accomplished by (1) completing the major in Biological Sciences or (2) majoring in any school or department *and* fulfilling concurrently the specific course requirements of the dental, medical, or other professional school the student expects to attend.

Students interested in the health sciences should choose electives in the social sciences, possibly a foreign language, physical chemistry, or other specific courses required or recommended by graduate schools.

The Biological Sciences Student Affairs Office offers specialized services, for a fee, to all students applying to postgraduate professional schools in the health sciences, including a personal file containing the student's letters of recommendation, and a service of sending all recommendations for a student to professional and graduate schools.

Student Participation

A wide variety of student associations, clubs, and groups provide opportunities for School of Biological Sciences students to participate

in different types of activities and events. The groups are wide ranging and include nationally recognized honors societies such as Alpha Epsilon Delta, volunteer service organizations such as the Flying Sams, specialized groups such as the UCI Sports Medicine Club, and more. Detailed information about the numerous options is available at <http://www.bio.uci.edu/students/undergraduates/student-resources/>.

Undergraduate Programs

The following majors are offered:

- Biological Sciences
- Biology/Education
- Biochemistry and Molecular Biology
- Developmental and Cell Biology
- Ecology and Evolutionary Biology
- Genetics
- Microbiology and Immunology
- Neurobiology

Admission to the Major in Biological Sciences

In the event that the number of students who elect Biological Sciences as a major exceeds the number of positions available, applicants may be subject to screening beyond minimum University of California admissions requirements.

Freshmen: Preference will be given to those who rank the highest using the selection criteria as stated in the Undergraduate Admissions (p. 37) section of this *Catalogue*.

Transfer students: Junior-level applicants with the highest grades overall and who satisfactorily complete course prerequisites will be given preference for admission. All applicants must complete one year of general chemistry with laboratory with grades of C or better; one year of organic chemistry with grades of C or better; one year of biology courses equivalent to BIO SCI 93, BIO SCI 94 at UCI with a grade of C or better in each course; and have a cumulative GPA of 3.0 or higher.

No student may enter as a double major, but Biological Sciences students interested in other areas may apply to become double majors after the first quarter, if the second school or program approves. A strong academic performance in the second area is requisite for acceptance as a double major.

Change of Major

Students who wish to declare any major within the School of Biological Sciences should contact the Biological Sciences Student Affairs Office in 1011 Biological Sciences III for information about change-of-major requirements, procedures, and policies. Information can also be found at <http://www.changeofmajor.uci.edu>. Change of Major requests are accepted and reviewed by the School throughout the year.

Requirements for the Bachelor's Degree

All School of Biological Sciences students must complete the following requirements.

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements, as shown below:

Complete:

BIO SCI 2A	Freshman Seminar
BIO SCI 194S	Safety and Ethics for Research
Biological Sciences Core:	
BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
BIO SCI 97	Genetics
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology
BIO SCI 100	Scientific Writing

Select one of the following General Chemistry sequences:

CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
-----------------	---

and accompanying labs:

CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
---------------	---

or

CHEM H2A- H2B- H2C	Honors General Chemistry and Honors General Chemistry and Honors General Chemistry
--------------------	--

and accompanying labs:

CHEM H2LA- H2LB- H2LC	Honors General Chemistry Laboratory and Honors General Chemistry Laboratory and Honors General Chemistry Laboratory
-----------------------	---

Select one of the following Organic Chemistry sequences:

CHEM 51A- 51B- 51C	Organic Chemistry and Organic Chemistry and Organic Chemistry
--------------------	---

and accompanying labs:

CHEM 51LB- 51LC	Organic Chemistry Laboratory and Organic Chemistry Laboratory
-----------------	---

or

CHEM H52A- H52B- H52C	Honors Organic Chemistry and Honors Organic Chemistry and Honors Organic Chemistry
-----------------------	--

and accompanying labs:

CHEM H52LA- H52LB	Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory
-------------------	---

Complete:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
-------------	---

Select one of the following:

STATS 7	Basic Statistics
STATS 8	Introduction to Biological Statistics
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra

Select one of the following Physics Series:

Series A

PHYSICS 3A- 3B- 3C	Basic Physics and Basic Physics and Basic Physics
PHYSICS 3LB- 3LC	Basic Physics Laboratory and Basic Physics Laboratory

Series B

PHYSICS 7C- 7D- 7E	Classical Physics and Classical Physics and Classical Physics
PHYSICS 7LC- 7LD	Classical Physics Laboratory and Classical Physics Laboratory

Prerequisites for all Biological Sciences Core courses are rigorously enforced. Students must have a 2.0 cumulative grade point average in the Biological Sciences Core Curriculum, four upper-division elective courses, and three upper-division laboratories.

Upper-Division Writing Requirement

Students in the School of Biological Sciences have the option to satisfy the upper-division writing requirement by completing BIO SCI 100 with a grade of Pass, followed by the completion of three upper-division laboratories selected from the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
---------------	---

BIO SCI E106L	Habitats and Organisms
---------------	------------------------

BIO SCI E112L	Physiology Laboratory
---------------	-----------------------

BIO SCI E115L	Evolution Laboratory
---------------	----------------------

BIO SCI E131L	Image Analysis in Biological Research
---------------	---------------------------------------

BIO SCI E161L	Biology of Birds Lab
---------------	----------------------

BIO SCI E172L	Plant Systematics Laboratory
---------------	------------------------------

BIO SCI E179L	Field Freshwater Ecology
---------------	--------------------------

BIO SCI M114L	Biochemistry Laboratory
---------------	-------------------------

BIO SCI M116L	Molecular Biology Laboratory
---------------	------------------------------

BIO SCI M118L	Experimental Microbiology Laboratory
---------------	--------------------------------------

BIO SCI M121L	Advanced Immunology Laboratory
---------------	--------------------------------

BIO SCI M122L	Advanced Microbiology Laboratory
---------------	----------------------------------

BIO SCI M124L	Virus Engineering Laboratory
---------------	------------------------------

BIO SCI M127L	Virology and Immunology Laboratory
---------------	------------------------------------

BIO SCI M130L	Advanced Molecular Lab Techniques
---------------	-----------------------------------

BIO SCI N113L	Neurobiology Laboratory
---------------	-------------------------

Students must earn a grade of C or better in each of the three laboratories selected. Completion of the Excellence in Research in Biological Sciences program may count as one of the three-upper division labs.

School Residence Requirement

After matriculation, all courses required for the major must be successfully completed at UCI. The School of Biological Sciences strictly enforces the UCI residence requirement. At least 36 of the final 45 units completed by a student for the bachelor's degree must be earned in residence at the UCI campus. (The School considers courses taken in the UC Education Abroad Program to be in-residence courses.)

Undergraduate Major in Biological Sciences

The Biological Sciences major presents a unified, in-depth study of modern biology. The Biological Sciences Core is a five-quarter series of courses ranging from ecology and evolutionary biology, to genetics, biochemistry, and molecular biology. Important laboratory techniques and methodology are presented in upper-division laboratories. Advanced elective courses provide an opportunity to continue to diversify students' exposure to the biological sciences or to gain a much more in-depth study of a particular area of the biological sciences.

NOTE: Biological Sciences majors who successfully complete their second year of study may elect to apply for a change of major to one of the following: Biochemistry and Molecular Biology, Developmental and Cell Biology, Genetics, Microbiology and Immunology, or Neurobiology. Students may apply directly to the Biology/Education major or the Ecology and Evolutionary Biology major when they apply for admission to UCI. Contact the Biological Sciences Student Affairs Office for more information.

Requirements for the B.S. Degree in Biological Sciences

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Major Requirements

A. Required Major Courses:

Select three of the following:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI D105	Cell, Developmental, and Molecular Biology of Plants
BIO SCI E106	Processes in Ecology and Evolution
BIO SCI E109	Human Physiology
BIO SCI N110	Neurobiology and Behavior

B. Upper-Division Laboratories:

Select three of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E115L	Evolution Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E161L	Biology of Birds Lab
BIO SCI E166W	Field Methods in Ecology
BIO SCI E172L	Plant Systematics Laboratory
BIO SCI E179L	Field Freshwater Ecology
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M122L	Advanced Microbiology Laboratory
BIO SCI M124L	Virus Engineering Laboratory

BIO SCI M127L	Virology and Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques
BIO SCI N113L	Neurobiology Laboratory
One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.	

C. Upper-Division Biology Electives:

Select four upper-division, four-unit courses from the following:

BIO SCI D103–D190, E106–E190, M114–M190, N110–N190 ¹	
PHRMSCI 170A	Molecular Pharmacology I
PHRMSCI 170B	Molecular Pharmacology II
PHRMSCI 171	Physical Biochemistry
PHRMSCI 173	Pharmacotherapy
PHRMSCI 174	Biopharmaceutics & Nanomedicine
PHRMSCI 177	Medicinal Chemistry

The following courses can be used to partially satisfy the Upper-Division Biology Elective Requirement:

CHEM 130A- 130B- 130C	Chemical Thermodynamics and Quantum Chemistry, Spectroscopy and Bonding and Structure, Statistical Mechanics, and Chemical Dynamics
-----------------------	---

or

CHEM 131A- 131B- 131C	Quantum Principles and Molecular Structure and Elementary Statistical Mechanics and Thermodynamics and Chemical Dynamics
-----------------------	--

or

PHYSICS 147A- 147B	Principles of Imaging and Techniques in Medical Imaging I:X-ray, Nuclear, and NMR Imaging
--------------------	---

Additionally, Psychology/Biological Sciences double majors may also use Psychology 112A-B-C to partially satisfy the Upper-Division Biology Elective Requirement.

NOTE: Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

¹ BIO SCI D103, BIO SCI D104, BIO SCI D105, BIO SCI E106, BIO SCI E109, BIO SCI N110 may not be used to satisfy more than one requirement.

Concentration in Biological Sciences Education

The optional concentration in Biological Sciences Education requires eight courses:

BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching
BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
BIO SCI 102	California Teach 3: High School Science and Mathematics Teaching
PHYSICS 20A	Introduction to Astronomy
PHYSICS 20B	Cosmology: Man's Place in the Universe

EARTHSS 1	Introduction to Earth System Science
EARTHSS 7	Physical Geology
Select one of the following:	
EDUC 108	Adolescent Development and Education
EDUC 124	Multicultural Education in K-12 Schools
EDUC 128	Exceptional Learners
EDUC 131	Educational Technology
EDUC 136	Teaching and Learning Secondary Science
EDUC 173	Cognition and Learning in Educational Settings

The requirements for a general Biological Sciences B.S. degree for students in this concentration will be reduced by one upper-division laboratory course (major requirement B) and two upper-division biology electives (major requirement C). Students pursuing other majors within the School of Biological Sciences will need specific departmental approval for the reduction of degree requirements when completing this concentration.

Planning a Program of Study

Since biological sciences courses are built upon a base of the physical sciences, it is very important for students to take their required physical sciences early, particularly general and organic chemistry. Students who have not completed high school chemistry are well advised to complete a preparatory chemistry course before entering UCI. The academic program shown below is only a suggested program. Students should consult the Biological Sciences Student Affairs Office for individual academic planning.

Freshmen will normally take HUMAN 1A or lower-division writing courses, CHEM 1A, BIO SCI 93, and a freshman seminar (BIO SCI 2A) during the fall quarter. Students will then continue with BIO SCI 94, complete their general chemistry requirement, and continue with Humanities or lower-division writing during the remaining winter and spring quarters.

Sophomores begin organic chemistry (CHEM 51A or CHEM H52A) and continue the Biological Sciences Core with BIO SCI 97, BIO SCI 93, BIO SCI 94. Sophomores often begin taking courses in other disciplines to meet the UCI general education requirement and fulfill their mathematics requirement if they have not done so as freshmen.

During their junior year, most majors continue with the Biological Sciences electives and take physics. Students who intend to double major in Chemistry will be required to take PHYSICS 7C-PHYSICS 7D-PHYSICS 7E in place of PHYSICS 3A-PHYSICS 3B-PHYSICS 3C. Juniors may complete their general education requirements and usually start their research and their upper-division biology laboratory courses.

Finally, during their senior year, students continue their research and complete their remaining major requirements.

Students in the Biological Sciences major are required to make progress toward their degree, and their progress will be monitored. If normal academic progress toward the degree in Biological Sciences is not being met, students will be subject to probation.

Sample Program — Biological Sciences

Freshman		
Fall	Winter	Spring
BIO SCI 93	BIO SCI 94	CHEM 1C- 1LC
CHEM 1A	CHEM 1B	HUMAN 1C
HUMAN 1A ¹	HUMAN 1B	MATH 2A
BIO SCI 2A		
Sophomore		
Fall	Winter	Spring
BIO SCI 97	BIO SCI 98	BIO SCI 99
CHEM 51A ²	CHEM 51B- 51LB	CHEM 51C- 51LC
CHEM 1LD	Gen. Ed.	STATS 7, 8, MATH 2D, or MATH 3A
MATH 2B		
BIO SCI 194S		
Junior		
Fall	Winter	Spring
Required Major course	Required Major course	Required Major course
Physics	Physics	Physics
Elective/Research	Elective/Research	Bio. Sci. elective
BIO SCI 100		Elective/Research
Senior		
Fall	Winter	Spring
Bio. Sci. elective	Bio. Sci. elective	Bio. Sci. elective
Bio. Sci. U-D Lab	Bio. Sci. U-D Lab	Bio. Sci. U-D Lab
Elective	Research	Research
	Electives	Electives

- ¹ Students have the option of taking HUMAN 1A or lower-division writing courses.
- ² CHEM H52A-CHEM H52B-CHEM H52C, CHEM H52LA-CHEM H52LB may be taken instead of CHEM 51A-CHEM 51B-CHEM 51C, CHEM 51LB-CHEM 51LC.

Undergraduate Major in Biology/Education Earning a Bachelor's Degree in Biology with a Teaching Credential

Biological Sciences students who are interested in pursuing a teaching career should consider the UCI Cal Teach Science and Mathematics Program. This program offers Biology/Education majors the opportunity to earn their bachelor's degree concurrently with a California Preliminary Single Subject Teaching Credential. Individuals who hold this credential are authorized to teach biology and general science in a middle school or high school.

Students complete the degree requirements for this major, which include:

BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching
BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
BIO SCI 108	Research Methods
LPS 60	The Making of Modern Science
EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Secondary Mathematics and Science Classrooms
EDUC 143AW	Classroom Interactions I

EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)

Beyond course work, some additional requirements for teacher certification are described below. With careful, early planning, it is possible for students to complete their bachelor's degree and teacher certification in four years. This is a more time-efficient and cost-effective route than the traditional five-year teacher preparation model, which usually involves a full academic year of teacher education courses and clinical teaching experience after completion of a bachelor's degree.

After the School of Biological Sciences verifies the completion of all requirements for the bachelor's degree, students are awarded their degree from UC Irvine. By contrast, the Preliminary Single Subject Teaching Credential is awarded by the California Commission on Teacher Credentialing (CTC) upon completion of a bachelor's degree and the state-approved UCI teacher education program, which combines course work, student teaching, and a teaching performance assessment. The UCI School of Education must verify completion of all requirements for the teaching credential and then recommend that the credential be awarded to a candidate by the CTC.

Additional Requirements for Teacher Certification. In addition to the required course work for a California Preliminary Single Subject Teaching Credential, some additional requirements must be satisfied:

- The School of Biological Sciences requires a *cumulative* GPA of 2.0 (C) to graduate with the bachelor's degree.
 - However, students must earn a grade of *C or better* in the following courses in order to be recommended for the Preliminary Single Subject Credential:

B. BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Secondary Mathematics and Science Classrooms
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School
 - In the final phase of teaching preparation, students enrolled in EDUC 158 gain teaching experience as a "student teacher" at a local middle school or high school, while also attending a weekly student teaching seminar at UCI. Each student teacher is paired with a highly qualified science teacher who acts as a mentor while the student teacher gradually takes on full responsibility for daily lesson planning, instruction, and assessment. Cal Teach program instructors select the mentor teachers and match them with student teachers. During the winter and spring quarters when students are enrolled in EDUC

158, they should expect to spend a minimum of four hours per day (typically mornings), five days per week, in their student teaching assignment at a middle school or high school.

2. The following must be completed and verified prior to the start of student teaching in EDUC 158:

- A. Pass the California Basic Education Skills Test (CBEST), a basic mathematics and literacy skills test. For more information, see <http://www.cbest.nesinc.com/>.
- B. Pass the California Subject Exam for Teachers (CSET) in science: biology/life science. Although secondary teachers are only required to pass the CSET exam in one discipline, those who pass the CSET exam in more than one disciplinary field (e.g. biology/life science and chemistry) can be authorized to teach classes in each of those disciplines. For more information about the CSET exam, see <http://www.cset.neinc.com/>.
- C. Secondary school science teachers in California are expected to have a broad range of general science knowledge in addition to their discipline of specialization, because their Single Subject Teaching Credential in one of the sciences also authorizes them to teach classes in general or integrated science. The general science subtests of the CSET exam cover foundational topics in astronomy, geodynamics, Earth resources, ecology, genetics and evolution, molecular biology and biochemistry, cellular and organismal biology, waves, forces and motion, electricity and magnetism, heat transfer and thermodynamics, and structure and properties of matter. Although students can prepare for the CSET exam's general science subtests through independent study, Biological Sciences students can also prepare by taking lower-division courses that cover the content. Here are some suggested courses for Biology/Education majors:

D. EARTHSS 1	Introduction to Earth System Science
EARTHSS 7	Physical Geology
PHYSICS 20A	Introduction to Astronomy
E. Obtain a Certificate of Clearance from the State of California.	
F. Obtain a TB test with negative results.	
G. Demonstrate readiness for student teaching responsibilities as evidenced in course work and satisfactory observations of a candidate during field experiences in:	
H. BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
EDUC 143AW	Classroom Interactions I
EDUC 148	Complex Pedagogical Design

3. The following must be completed and verified before the School of Education is able to recommend an individual for the Preliminary Single Subject Credential:

- A. Pass a state-approved teacher performance assessment, which is completed concurrently with student teaching in EDUC 158.

- B. Complete a college-level course or pass an examination on the U.S. Constitution. POL SCI 21A satisfies this requirement. Contact the UCI School of Education Student Affairs Office for information about the exam.

- C. Obtain a CPR certificate in adult, child, or infant training.

Declaring Intention to Complete the Biology/Education Major and Teacher Certification.

Prospective teachers who want to complete their degree and a teaching credential in four years are encouraged to start planning early by reviewing the sample program for the Biology/Education major, and consulting with an academic counselor. Interested students are encouraged to get started on the suggested first- and second-year credentialing course work, including BIO SCI 14 and BIO SCI 101, and can do so without officially declaring their intention to complete the credential. However, students must declare their intention to complete requirements for the Biology/Education major and requirements for the Preliminary Single Subject Teaching Credential prior to enrolling in EDUC 55, which they would typically take in fall of their third year. Forms for declaring an intention to complete the teaching credential are available in the Biological Sciences Student Affairs Office or in the Cal Teach Science and Mathematics Resource and Advising Center (137 Biological Sciences Administration).

Requirements for the B.S. Degree in Biology/Education

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Major Requirements

- A. Required Major Courses:

Select three of the following:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI D105	Cell, Developmental, and Molecular Biology of Plants
BIO SCI E106	Processes in Ecology and Evolution
BIO SCI E109	Human Physiology
BIO SCI N110	Neurobiology and Behavior

- B. Upper-Division Laboratories:

Select two of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E115L	Evolution Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E161L	Biology of Birds Lab
BIO SCI E166W	Field Methods in Ecology
BIO SCI E172L	Plant Systematics Laboratory
BIO SCI E179L	Field Freshwater Ecology
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M122L	Advanced Microbiology Laboratory

BIO SCI M124L	Virus Engineering Laboratory
BIO SCI M127L	Virology and Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques

BIO SCI N113L	Neurobiology Laboratory
One laboratory can be satisfied with completion of Excellence in Research in the Biological Sciences.	

C. Upper-Division Biology Electives:

Select two upper-division, four-unit courses from the following:

BIO SCI D103–D190, E106–E190, M114–M190, N110–N190 ¹	
PHRMSCI 170A	Molecular Pharmacology I
PHRMSCI 170B	Molecular Pharmacology II
PHRMSCI 171	Physical Biochemistry
PHRMSCI 173	Pharmacotherapy
PHRMSCI 174	Biopharmaceutics & Nanomedicine
CHEM 177	Medicinal Chemistry

The following courses can be used to partially satisfy the Upper-Division Biology Elective Requirement:

CHEM 130A- 130B- 130C	Chemical Thermodynamics and Quantum Chemistry, Spectroscopy and Bonding and Structure, Statistical Mechanics, and Chemical Dynamics
-----------------------	---

or

CHEM 131A- 131B- 131C	Quantum Principles and Molecular Structure and Elementary Statistical Mechanics and Thermodynamics and Chemical Dynamics
-----------------------	--

or

PHYSICS 147A- 147B	Principles of Imaging and Techniques in Medical Imaging I:X-ray, Nuclear, and NMR Imaging
--------------------	---

Additionally, Psychology/Biological Sciences double majors may also use Psychology 112A-B-C to partially satisfy the Upper-Division Biology Elective Requirement.

D. Science Teaching Courses:

BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching
BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
BIO SCI 108	Research Methods
LPS/HISTORY 60	The Making of Modern Science
EDUC 55	Knowing and Learning in Mathematics and Science
EDUC 109	Reading and Writing in Secondary Mathematics and Science Classrooms
EDUC 143AW	Classroom Interactions I
EDUC 148	Complex Pedagogical Design
EDUC 158	Student Teaching Mathematics and Science in Middle/High School (two quarters)

¹ BIO SCI D103, BIO SCI D104, BIO SCI D105, BIO SCI E106, BIO SCI E109, BIO SCI N110 may not be used to satisfy more than one requirement.

Undergraduate Major in Biochemistry and Molecular Biology

Few areas of Biological Sciences remain that are not impacted by studies at the chemical and molecular level. The major in Biochemistry and Molecular Biology is designed to provide a comprehensive background in this modern, conceptual understanding of biology. Students who wish to begin in-depth study of the molecular basis in any of a variety of fields, including development, gene expression, immunology, pathogenesis, disease, virology, and evolution, can do so through this major. This program will be especially attractive to those students who intend to pursue an advanced degree in biological or medical sciences.

The Biochemistry and Molecular Biology major is based upon required courses in Advanced Biochemistry and Advanced Molecular Biology (BIO SCI M114 and BIO SCI M116). These courses, together with a wide variety of elective course offerings, provide majors the choice to either explore the breadth of the field or follow a more in-depth study of any of its subdisciplines. For students interested in the interface between biology and chemistry, this program articulates well with a second major in Chemistry.

The program of study emphasizes laboratory experience and its integration with basic theory. This is accomplished in three ways: first, through coordination between the advanced courses in Biochemistry (BIO SCI M114) and Molecular Biology (BIO SCI M116), and laboratory courses in Biochemistry (BIO SCI M114L) and Molecular Biology (BIO SCI M114L) which provide students with the basic laboratory skills and an appreciation for the experimental foundations of the field; second, through advanced laboratories in Immunology (BIO SCI M121L) and Virology (BIO SCI M127L) which provide students with the opportunity to develop cutting edge research skills; and third, by emphasizing independent research

sponsored by a participating faculty member. The program encourages the research interests of students in subdisciplines other than immunology or virology by offering the opportunity to substitute one year of independent research for the advanced laboratory.

The major in Biochemistry and Molecular Biology is designed to provide students with the appropriate tools and training to successfully pursue graduate degrees that emphasize basic scientific research, including Ph.D. and M.S. training as well as combined M.D./Ph.D. programs. In addition, and particularly with the explosive growth in biotechnology and its significant influence in everyday life, graduates could use their backgrounds very effectively to pursue careers in business, education, law, and public affairs.

Requirements for the B.S. Degree in Biochemistry and Molecular Biology

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Major Requirements

A. Required Major Courses:

BIO SCI M114	Advanced Biochemistry
BIO SCI M116	Advanced Molecular Biology

B. Upper-Division Laboratories:

BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory

Select one of the following:

BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M124L	Virus Engineering Laboratory
BIO SCI M127L	Virology and Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques

BIO SCI 199 Study in Biological Science Research (Approved by the Biochemistry and Molecular Biology Faculty Board.)

C. Upper-Division Biology Electives:

Select three of the following:

BIO SCI M120–M189

Select one of the following:

BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI D145	Genomics, Development, and Medicine
BIO SCI M120–M190	
PHRMSCI 170A	Molecular Pharmacology I
PHRMSCI 171	Physical Biochemistry
CHEM 128	Introduction to Chemical Biology
CHEM 130A	Chemical Thermodynamics
CHEM 130B	Quantum Chemistry, Spectroscopy and Bonding
CHEM 130C	Structure, Statistical Mechanics, and Chemical Dynamics
CHEM 131A	Quantum Principles
CHEM 131B	Molecular Structure and Elementary Statistical Mechanics
CHEM 131C	Thermodynamics and Chemical Dynamics

Select two of the following:

BIO SCI D103–D189, E106–E189, M120–M190, N110–N189	
PHRMSCI 170A	Molecular Pharmacology I
PHRMSCI 171	Physical Biochemistry
CHEM 128	Introduction to Chemical Biology
CHEM 130A	Chemical Thermodynamics
CHEM 130B	Quantum Chemistry, Spectroscopy and Bonding
CHEM 130C	Structure, Statistical Mechanics, and Chemical Dynamics
CHEM 131A	Quantum Principles
CHEM 131B	Molecular Structure and Elementary Statistical Mechanics
CHEM 131C	Thermodynamics and Chemical Dynamics

No course may be used to satisfy more than one requirement.

Application Process to Declare the Major: The major in Biochemistry and Molecular Biology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Biochemistry and Molecular Biology Faculty Board is completed during the summer. Information can also be found at <http://www.changeofmajor.uci.edu>. Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

- ² CHEM H52A-CHEM H52B-CHEM H52C, CHEM H52LA-CHEM H52LB may be taken instead of CHEM 51A-CHEM 51B-CHEM 51C, CHEM 51LB-CHEM 51LC.

Undergraduate Major in Developmental and Cell Biology

The Developmental and Cell Biology major is intended to provide students with intensive training in cutting edge approaches to understanding the structure and function of cells and how they interact to produce a complex organism, starting with a fertilized egg. The focus of the B.S. in Developmental and Cell Biology is to provide students with intensive training aimed at preparing them for graduate programs in modern Developmental and Cell Biology or other biomedical sciences. In-depth training in the molecular basis of cell and developmental biology will be coupled with integrating knowledge obtained from the recent explosive advances in genomic technology to provide a strong working understanding of how to approach problems in basic research.

The major has distinctive features. The first is a reduction in the number of required courses, allowing students the opportunity to focus more deeply on training in Developmental and Cell Biology. The second is the implementation of a new course in Genomic and Proteomic analysis that is closely tied to problems in genetics, developmental, and cell biology. Understanding the connections among these disciplines and how to apply the appropriate tools for defining and answering fundamental questions in biomedical research is a critical tool for success in research. Another distinctive feature of the major is the opportunity to replace two upper-division laboratory courses with mentored BIO SCI 199 individual research in faculty laboratories. This offers students the opportunity to apply the tools they have acquired during formal course work to current problems at the frontiers of research. Lastly, students majoring in Developmental and Cell Biology have faculty advisors with whom they meet at least quarterly. The faculty advisors help students plan their curriculum, select appropriate 199 projects and sponsoring labs, and as a group grant petitions and certify the degree. The combination of new upper-division courses, more flexibility in the curriculum, the option for mentored research, and close interaction with faculty advisors will help the Developmental and Cell Biology majors to develop an appreciation of the nature of research and establish a strong foundation for future success in graduate or professional schools.

Requirements for the B.S. Degree in Developmental and Cell Biology

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Major Requirements

A. Required Major Courses:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI D114	Developmental and Cell Biology Majors Seminar
BIO SCI D145	Genomics, Development, and Medicine

B. Upper-Division Laboratories:

BIO SCI D111L	Developmental and Cell Biology Laboratory
---------------	---

and select two of the following: ¹

BIO SCI E106L	Habitats and Organisms

Undergraduate Major in Ecology and Evolutionary Biology

In the twenty-first century, biologists in fields ranging from medicine to global change biology increasingly incorporate ecological and evolutionary ideas in their research. The major in Ecology and Evolutionary Biology encourages students to understand and appreciate important linkages between biological disciplines. The major is very broad, including components of evolutionary biology, ecology, and physiology. Faculty

interests are also broad and include the evolution of aging, conservation biology, restoration ecology, biogeography, plant and animal population and community ecology, the evolution of infectious disease, evolutionary physiology, behavioral ecology, host-disease interactions, evolutionary genetics, genetics of invasive species, and plant population biology. Following graduation, students will be especially well prepared to enter graduate programs in either ecology or evolution for advanced study. The major also provides the foundation to pursue careers in governmental and non-governmental environmental organizations, as well as professional schools. The Department considers undergraduate experience in research an integral component of a scientific education, and majors are encouraged to participate in BIO SCI 199, in which they will be mentored by an individual faculty member within the Department.

Requirements for the B.S. Degree in Ecology and Evolutionary Biology

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Major Requirements

A. Required Major Courses:

STATS 8	Introduction to Biological Statistics
BIO SCI E106	Processes in Ecology and Evolution
BIO SCI E107	Seminar in Ecology and Evolutionary Biology

B. Upper-Division Laboratories:

BIO SCI E115L	Evolution Laboratory
BIO SCI E166W	Field Methods in Ecology

and select one of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E161L	Biology of Birds Lab
BIO SCI E172L	Plant Systematics Laboratory
BIO SCI E179L	Field Freshwater Ecology

¹ Students have the option of taking HUMAN 1A or lower-division writing courses.

² BIO SCI E106 is offered in all three quarters, is a prerequisite for many upper-division courses and may be taken at any time after completion of BIO SCI 94.

³ CHEM H52A-CHEM H52B-CHEM H52C, CHEM H52LA-CHEM H52LB may be taken instead of CHEM 51A-CHEM 51B-CHEM 51C, CHEM 51LB-CHEM 51LC.

Undergraduate Major in Genetics

Genetics pervades every aspect of modern society, from newspaper articles to talk shows, from discussions on health care to discussions on cloning. With the sequencing of the human genome, it is more important than ever for biology students to have a broad background in the study of heredity and evolution. The Genetics major is designed to benefit motivated undergraduates who have a particular interest in learning about developmental genetics, evolutionary genetics, and molecular genetics and to allow them to explore how our knowledge of genetic mechanisms contributes to our understanding of human development and disease. The Genetics major will accommodate students interested in the study of

inheritance either as a basic discipline or in terms of its applied aspects in biotechnology, medicine, and agriculture, but will be especially attractive to those students desiring focused study and preparation for graduate training.

Genetics majors begin their study in the junior year with two Genetics courses (BIO SCI M137 and BIO SCI D137) and a Genomics and Proteomics course (BIO SCI D145). This series of courses is designed to give students an understanding of genetic mechanisms and teach them how to define and answer fundamental questions in biomedical research. Additionally, students choose at least two electives that deal with topics such as the molecular biology of cancer, human genetic diseases, developmental genetics, and the genetics of aging. Finally, Genetics majors are encouraged to explore laboratory research by enrolling in BIO SCI 199. Laboratory research not only expands a student's technical skills, but is also designed to allow faculty members to mentor Genetics majors. All students majoring in Genetics have a faculty advisor with whom they meet at least quarterly. The faculty advisor helps students plan their curriculum and select appropriate Biological Sciences 199 research projects. Genetics majors also have an opportunity to meet with other Genetics majors on a regular basis and participate in research talks.

The Genetics major provides graduates with advanced training in the skills necessary to pursue graduate degrees in biomedical research. These include Ph.D. graduate programs, teacher-training programs, medical school, and veterinary school. Genetics graduates may also use their backgrounds effectively in planning careers in law, business, education, and public affairs.

Requirements for the B.S. Degree in Genetics

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Undergraduate Major in Microbiology and Immunology

Microbiology and immunology are well-established disciplines within the life sciences. Microbiology addresses the biology of bacteria, viruses, and unicellular eukaryotes such as fungi and protozoa. Studies of microorganisms reveal basic information about processes in evolution, genetics, biochemistry, molecular biology, cell biology, structural biology, and ecology. Many bacteria, viruses, and protozoa cause disease in plants and animals. Hence, major areas of medicine and public health focus on these microorganisms.

Immunology encompasses efforts to understand how multicellular organisms have evolved to survive a variety of challenges to health and survival, including threats by pathogens and cancer cells. Basic questions of how immunity functions are entwined with a fundamental understanding of the consequences of microbial infection. Immunology also refers to the study of autoimmunity, the attack of the host by its own immune system.

The study of viruses (virology) is an important branch of microbiology that has contributed to our understanding of most of the fundamental processes in eukaryotic molecular biology, including the discovery of oncogenes. Viruses provide an excellent tool for the study of disease, cancer, and mechanisms of gene control. With the growing threat of emerging diseases and the potential for viral-based biological weapons, the study of virology was recently intensified and gained new perspectives.

The major has been designed to span the interconnected disciplines of Microbiology and Immunology, and because the scope of the disciplines is considerable, students have the opportunity to specialize within the major in one of three areas: microbiology, immunology, or virology. The curricula overlap considerably, but there are unique courses for each specialty.

Students opting for the microbiology specialization can select from courses focused on prokaryotes (bacteria) or eukaryotes (parasites).

The major is designed primarily for students who are serious about pursuing careers in microbiology and immunology and is intended to provide its graduates with the appropriate tools and training to successfully pursue professional and graduate degrees emphasizing these disciplines. These include Ph.D., M.D., and combined M.D./Ph.D. programs. Majoring in Microbiology and Immunology will also provide resources for serious students wishing to use a solid background in these disciplines for career goals in business, law, public and environmental policy, education, and other pursuits.

Requirements for the B.S. Degree in Microbiology and Immunology

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Major Requirements for the General Track in Microbiology and Immunology

Major Requirements for the General Track in Microbiology and Immunology

A. Required Major Courses:

BIO SCI M121	Immunology with Hematology
BIO SCI M122	General Microbiology
BIO SCI M124A	Virology

B. Upper-Division Laboratories:

BIO SCI M116L	Molecular Biology Laboratory
---------------	------------------------------

and either

BIO SCI M118L	Experimental Microbiology Laboratory
or BIO SCI M127L	Virology and Immunology Laboratory

C. Upper-Division Biology Electives:

Select six of the following:

Recommended:

BIO SCI E124	Infectious Disease Dynamics
BIO SCI E176	Evolution of Infectious Disease
BIO SCI M119	Advanced Topics in Immunology
BIO SCI M120	Signal Transduction in Mammalian Cells
BIO SCI M124B	Viral Pathogenesis and Immunity
BIO SCI M125	Molecular Biology of Cancer
BIO SCI M137	Microbial Genetics
BIO SCI M143	Human Parasitology
MOL BIO 205	Molecular Virology

or from Alternatives:

BIO SCI D103	Cell Biology
BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI M114	Advanced Biochemistry
BIO SCI M116	Advanced Molecular Biology
BIO SCI M144	Cell Organelles and Membranes

Requirements for the Specialization in Immunology

A. Required Major Courses:

BIO SCI M121	Immunology with Hematology
--------------	----------------------------

BIO SCI M122	General Microbiology
--------------	----------------------

BIO SCI M124A	Virology
---------------	----------

B. Upper-Division Laboratories:

BIO SCI M116L- M127L	Molecular Biology Laboratory and Virology and Immunology Laboratory
----------------------	---

C. Upper-Division Biology Electives:

Select six of the following:

Recommended:

BIO SCI M119	Advanced Topics in Immunology
BIO SCI M120	Signal Transduction in Mammalian Cells
BIO SCI M124B	Viral Pathogenesis and Immunity
BIO SCI M125	Molecular Biology of Cancer
or from Alternatives:	
BIO SCI D103	Cell Biology
BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI M114	Advanced Biochemistry
BIO SCI M116	Advanced Molecular Biology
BIO SCI M137	Microbial Genetics
BIO SCI M144	Cell Organelles and Membranes

Requirements for the Specialization in Microbiology

A. Required Major Courses:

BIO SCI M121	Immunology with Hematology
BIO SCI M122	General Microbiology
BIO SCI M124A	Virology

B. Upper-Division Laboratories:

BIO SCI M116L- M118L	Molecular Biology Laboratory and Experimental Microbiology Laboratory
----------------------	---

C. Upper-Division Biology Electives:

Select six of the following:

Recommended:

BIO SCI E124	Infectious Disease Dynamics
BIO SCI E176	Evolution of Infectious Disease
BIO SCI M137	Microbial Genetics
BIO SCI M143	Human Parasitology

or from Alternatives:

BIO SCI D103	Cell Biology
BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI M114	Advanced Biochemistry
BIO SCI M116	Advanced Molecular Biology
BIO SCI M144	Cell Organelles and Membranes

Requirements for the Specialization in Virology

A. Required Major Courses:

BIO SCI M121	Immunology with Hematology
BIO SCI M122	General Microbiology
BIO SCI M124A	Virology

B. Upper-Division Laboratories:

BIO SCI M116L- M127L	Molecular Biology Laboratory and Virology and Immunology Laboratory
----------------------	---

C. Upper-Division Biology Electives:

Select six of the following:

Recommended:	
BIO SCI E124	Infectious Disease Dynamics
BIO SCI M120	Signal Transduction in Mammalian Cells
BIO SCI M124B	Viral Pathogenesis and Immunity
BIO SCI M125 or MOL BIO 205	Molecular Biology of Cancer Molecular Virology
or from Alternatives:	
BIO SCI D103	Cell Biology
BIO SCI D137	Eukaryotic and Human Genetics
BIO SCI M114	Advanced Biochemistry
BIO SCI M116	Advanced Molecular Biology
BIO SCI M137	Microbial Genetics
BIO SCI M144	Cell Organelles and Membranes

NOTE: Within the Microbiology and Immunology major, only one specialization can be awarded.

Application Process to Declare the Major: The major in Microbiology and Immunology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Microbiology and Immunology Faculty Board is completed during the summer. Information can also be found at <http://www.changeofmajor.uci.edu>. Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

Honors Program

The Microbiology and Immunology Honors Program is available to high-achieving majors. The honors designation can be achieved by exceptional performance in research (Excellence in Research) and exceptional scholarship in the required and elective courses (3.5 GPA), and is noted on the transcript. The specific details of this achievement are to be submitted and approved by the major coordinator and the faculty oversight committee. The honors selection process occurs after winter quarter each year. Microbiology and Immunology students must enroll in BIO SCI H195 to complete the requirements for the Excellence in Research Honors program.

Sample Program — Microbiology and Immunology

¹ CHEM H52A-CHEM H52B-CHEM H52C, CHEM H52LA-CHEM H52LB may be taken instead of CHEM 51A-CHEM 51B-CHEM 51C, CHEM 51LB-CHEM 51LC.

Undergraduate Major in Neurobiology

The Neurobiology major is designed to teach students how neurobiologists apply cellular, molecular, systems, and behavioral analyses in understanding how the nervous system works. The hallmark of the major is a year-long, in-depth exploration of the intellectual tools used to create, advance, and disseminate knowledge about the nervous system. Through neurobiology satellite courses, students acquire advanced factual knowledge about neurobiology. In addition, Neurobiology majors may choose to participate in research through BIO SCI 199, where they will learn technical skills and receive mentoring from faculty members.

Students completing the Neurobiology major will be well qualified for admission to graduate or professional schools in preparation for careers in biological research, medicine, dentistry, veterinary medicine, nursing, and other related fields. Even without additional education, they will be competitive for positions in the pharmaceutical industry, the health care delivery industry, or in medically or biologically related technologies. The major also provides valuable preparation for students interested in entering other disciplines that increasingly interface with biology and biotechnology, such as law, business administration, and government policy. Additionally, the major provides excellent preparation for students who wish to become high school science teachers.

Requirements for the B.S. Degree in Neurobiology

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Major Requirements

A. Upper-Division Core:

BIO SCI N110	Neurobiology and Behavior
--------------	---------------------------

and select two of the following:

BIO SCI D103	Cell Biology
BIO SCI D104	Developmental Biology
BIO SCI E106	Processes in Ecology and Evolution
BIO SCI E109	Human Physiology

B. Required Major Courses:

BIO SCI N112A- N112B- N112C Neuroscience: Fundamental Concepts and Current Applications and Neuroscience: Fundamental Concepts and Current Applications and Neuroscience: Fundamental Concepts and Current Applications

C. Upper-Division Laboratories:

BIO SCI N113L Neurobiology Laboratory

and select two of the following:

BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E106L	Habitats and Organisms
BIO SCI E112L	Physiology Laboratory
BIO SCI E115L	Evolution Laboratory
BIO SCI E131L	Image Analysis in Biological Research
BIO SCI E161L	Biology of Birds Lab
BIO SCI E166W	Field Methods in Ecology
BIO SCI E172L	Plant Systematics Laboratory
BIO SCI E179L	Field Freshwater Ecology
BIO SCI M114L	Biochemistry Laboratory
BIO SCI M116L	Molecular Biology Laboratory
BIO SCI M118L	Experimental Microbiology Laboratory
BIO SCI M121L	Advanced Immunology Laboratory
BIO SCI M122L	Advanced Microbiology Laboratory
BIO SCI M124L	Virus Engineering Laboratory
BIO SCI M127L	Virology and Immunology Laboratory
BIO SCI M130L	Advanced Molecular Lab Techniques

One of these two laboratories can be satisfied by completion of Excellence in Research in the Biological Sciences.

D. Upper-Division Biology Electives:

Select two of the following:

BIO SCI N119–N190

and select one four-unit course from the following:

BIO SCI D103–D190, E106–E190, M114–M190, N110–N190	
CHEM 130A	Chemical Thermodynamics
CHEM 130B	Quantum Chemistry, Spectroscopy and Bonding
CHEM 130C	Structure, Statistical Mechanics, and Chemical Dynamics
CHEM 131A	Quantum Principles
CHEM 131B	Molecular Structure and Elementary Statistical Mechanics
CHEM 131C	Thermodynamics and Chemical Dynamics
PHYSICS 147A	Principles of Imaging

No course may be used to satisfy more than one requirement.

Application Process to Declare the Major: The major in Neurobiology is open to junior- and senior-level students only. Applications to declare the major can be made at any time, but typically in the spring of the sophomore year. Review of applications submitted at that time and selection to the major by the Neurobiology Faculty Board is

completed during the summer. Information can also be found at <http://www.changeofmajor.uci.edu>. Double majors within the School of Biological Sciences or with Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences are not permitted.

¹ Students have the option of taking HUMAN 1A or lower-division writing courses.

² CHEM H52A-CHEM H52B-CHEM H52C, CHEM H52LA-CHEM H52LB may be taken instead of CHEM 51A-CHEM 51B-CHEM 51C, CHEM 51LB-CHEM 51LC.

Requirements for the Minor in Biological Sciences

Nine courses are required, no more than two of which may be taken on a Pass/Not Pass basis:

A. Select three of the following: ¹

BIO SCI 93	From DNA to Organisms
BIO SCI 94	From Organisms to Ecosystems
BIO SCI 97	Genetics
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology

B. Select six of the following: ²

Three- or four-unit courses selected from BIO SCI 5–H90 (excluding 14 and 46), 93–99, and D103–D190, E106–E190, M114–M190, N110–N190.

- ¹ Prerequisites are strictly enforced. Exceptions may be made for some majors that accept the above courses for degree requirements. Consult with the Biological Sciences Student Affairs Office or the academic counseling office of the major.
- ² Three courses must be upper-division. Prerequisites are strictly enforced. (Courses used to satisfy group A may not also be used to satisfy group B.)

Residence requirement for the minor: A minimum of six courses required for the minor must be completed at UCI. Approved courses taken in the Education Abroad Program are considered to be in-residence courses.

NOTE: Students in any of the majors within the School of Biological Sciences or students majoring in Public Health Sciences, Biomedical Engineering: Premedical, Nursing Science, or Pharmaceutical Sciences may not minor in Biological Sciences.

Graduate Study in Biological Sciences

The School of Biological Sciences offers graduate study in a wide variety of fields ranging across the spectrum of the biological sciences. The four Departments of the School of Biological Sciences (Developmental and Cell Biology (p. 221), Ecology and Evolutionary Biology (p. 225), Molecular Biology and Biochemistry (p. 228), and Neurobiology and Behavior (p. 233)) offer concentrations of study under the Ph.D. degree administered by the School of Biological Sciences. Most graduate students are admitted to the Doctor of Philosophy (Ph.D.) degree program. Additionally, the master's program in Biotechnology (M.S. degree in Biological Sciences), the M.S. degree in Biological Sciences and Educational Media Design, the M.S. degree in Biotechnology Management, and the master's program in any of the four departments (M.S. degree in Biological Sciences) are offered. Each department has a graduate advisor whom students may consult for additional details of the individual programs. Several interdisciplinary graduate programs are also available: Graduate Program in Cellular and Molecular Biosciences, Graduate Program in Mathematical and Computational Biology, and Interdepartmental Neuroscience Program.

The department or program evaluates applications for admission to graduate study based on letters of recommendation, Graduate Record Examination scores, grades, research experience, and other relevant qualifications of the applicant. Candidates for graduate admission are urged to consult the particular department or program whose faculty and expertise best fit their interests and background.

Master of Science and Doctor of Philosophy in the Biological Sciences

The School of Biological Sciences offers both the Master of Science and Doctor of Philosophy, although emphasis at the graduate level is placed on the Ph.D. programs. Most training takes place within one of the departments, although full facilities and curricular offerings are available to all graduate students in all departments of the Biological Sciences. Interdisciplinary study and research are encouraged.

Students are expected to maintain a B average at all times. The normative time to degree is two years for the master's degree and five years for the doctoral degree. A master's degree is not a prerequisite for the Ph.D. degree.

Students plan their academic program in consultation with the graduate advisor or a faculty committee. Faculty advisors may be changed to

meet the needs and interests of the student. In addition, it is possible for students to transfer to another program in the School, subject to the approval of the Dean of Graduate Studies, and acceptance into that program. Students are encouraged to consult with faculty members with regard to their research and academic interests.

During their graduate training all doctoral students are required to serve at least two quarters as a 50-percent teaching assistant under the direction of laboratory coordinators or faculty. Advanced graduate students may work closely with faculty in the planning and execution of the teaching program. The amount and nature of the teaching experience varies with the department.

Master of Science

The Master of Science degree may be completed by submission of a research thesis (plan I) or by course work and a comprehensive examination (plan II).

Plan I: Thesis Plan. The student is required to complete at least four didactic graduate courses (16 units) offered by the department, and elective course work with an additional eight units of graduate or upper-division undergraduate course work. In addition, the student will typically take additional seminar courses during the graduate study. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The student engages in thesis research with a faculty thesis advisor, and will prepare and submit a thesis to the thesis committee. The final examination is an oral presentation of the thesis to the committee. The normative time to degree is two years for the thesis M.S. degree.

Plan II: Comprehensive Examination Plan. The plan II M.S. degree is awarded based on completion of at least 36 units of course work and satisfactory completion of a comprehensive examination. The student is required to complete at least 16 units (four courses) of didactic graduate course work offered by the department. In addition, the student will take up to 12 units of research. An additional eight units or more of elective course work will be completed from other graduate courses offered by the department. A maximum of four units of upper-division undergraduate courses may be included in the program with the approval of the Associate Dean for Graduate Studies. Students in the M.S. program may be employed as teaching assistants, but units earned through enrollment in University Teaching (399) may not be counted toward degree completion. The comprehensive exam will be administered by a committee of at least three departmental faculty, and may include written and oral sections. The comprehensive examination format will include a research presentation and may include additional portions such as a research proposal, presentation of a project, or other components. The normative time to degree is one year for the M.S. degree by comprehensive examination.

Doctor of Philosophy

Comprehensive Examination-First Year. The student must pass comprehensive oral or written examinations at the discretion of the department. The examination is generally taken at the end of the first year of graduate study.

Advancement to Candidacy. The advancement to candidacy examination is taken in the third year of graduate study. The student is expected to have identified an important and tractable dissertation research topic. A faculty committee for the advancement to candidacy examination is appointed by the School, on behalf of the Dean of the Graduate Division and the Graduate Council.

Once this examination is completed, the student is advanced to candidacy for the doctoral degree and is expected to complete the degree within three years. The student must submit a dissertation on this research and defend the thesis in an oral examination during the final year of graduate study. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Graduate student status or consent of instructor is a prerequisite for all 200–299 courses.

Master of Science with a Concentration in Biotechnology

Department of Molecular Biology and Biochemistry
3205 McGaugh Hall; (949) 824-6034
morgano@uci.edu; <http://www.bio.uci.edu/>
Michael G. Cumsky, **Director**

The field of biotechnology has developed explosively since the discovery of gene cloning and sequencing methods in the mid-1970s. The field is now represented by many active and successful companies who share an intense demand for well-trained people with up-to-date research skills in the manipulation of nucleic acids, proteins, immunological reagents, and pathogenic organisms. The program in Biotechnology features two tracks leading to an M.S. degree in Biological Sciences. The first is the traditional program, and the second, which takes advantage of a defined area of campus research strength, provides an emphasis in stem cell biology. Both tracks incorporate extensive training from both teaching laboratories and actual research settings (individual faculty laboratories). Focus is placed on techniques relevant to industry and seminar exposure to the nature of industry. It is designed to train students to enter the field of biotechnology as skilled laboratory practitioners. Emphasis is placed on learning state-of-the-art technology in protein isolation and characterization, animal and microbial cell culture, virology, immunology, and/or stem cell biology. Students are trained in experimental rationales for solving actual research problems and are encouraged to take summer internships in industry between the first and second year of their studies.

The Department of Molecular Biology and Biochemistry evaluates applicants to the program on the basis of grades, letters of recommendation, GRE scores, and other relevant qualifications. Applicants should have successfully completed a B.S. degree or equivalent. Courses should include general chemistry with laboratory, calculus, physics, organic chemistry, genetics, biochemistry, molecular biology, microbiology, immunology, and virology, as well as laboratory courses in biochemistry, molecular biology, microbiology, and either animal virology or immunology. Enrollment in the stem cell biology emphasis is limited to eight continuing students per year. Biotechnology graduate students interested in this track apply for admission during the winter quarter of their first year in the program.

The traditional program emphasizes training in laboratory and research environments. First-year students are required to enroll in a series of laboratory courses:

MOL BIO 250L	Biotechnology Laboratory - Nucleic Acids
MOL BIO 251L	Biotechnology Laboratory - Protein Purification and Characterization
MOL BIO 221L	Advanced Immunology Laboratory (if offered)
MOL BIO 224	Virus Engineering Laboratory (if offered)

MOL BIO 227L

Virology and Immunology Laboratory (if 221L or 224 are not offered)

These courses are designed to teach techniques in recombinant DNA methodology, protein isolation and characterization, proteomics, animal and microbial cell culture, immunology, and virology. In addition, students are trained rigorously in data recording and presentation as the laboratory notebooks are reviewed and graded by laboratory course instructors. Students are taught formal course work in nucleic acids, proteins, genetic engineering, and molecular/cellular biology. Emphasis during the second year is devoted exclusively to research projects in faculty laboratories, with the exception of one required elective course each quarter (e.g., DEV BIO 210, DEV BIO 231B). The program concludes with a presentation of the student's research at the end of the second year.

Students enrolled in the stem cell biology emphasis take the same number of laboratory and lecture courses as those in the traditional track. However, in the spring quarter of their first year they must enroll in the stem cell laboratory (, taught at the Stem Cell Research Core Facility), and their electives must include the following courses, if offered: Stem Cell Policy (M&MG 230), Stem Cell Biology (DEV BIO 245), and Clinical Aspects of Stem Cells (DEV BIO 203B, when offered). In addition, their individual research must be conducted in the laboratory of a faculty member utilizing stem cells.

While the Biotechnology program is designed to produce skilled laboratory practitioners for industrial positions, some students may wish to continue in a Ph.D. degree program. The Department of Molecular Biology and Biochemistry is a member of the interdisciplinary graduate program in Cellular and Molecular Biosciences, a program which offers the Ph.D. degree in Biological Sciences. Biotechnology program students who wish to enter the interdisciplinary graduate program upon completion of the M.S. degree should apply for admission during their second year.

Master of Science in Biotechnology Management (MSBTM)

Department of Molecular Biology and Biochemistry
3205 McGaugh Hall; (949) 824-6034
morgano@uci.edu; <http://www.bio.uci.edu/>
Michael G. Cumsky, **Director**

The M.S. in Biotechnology Management is a joint graduate degree that will prepare scientists for leadership roles in biotechnology, science, and engineering-based companies through a curriculum comprised of courses from the Department of Molecular Biology and Biochemistry (MB&B) in the School of Biological Sciences, the Department of Biomedical Engineering in The Henry Samueli School of Engineering, and The Paul Merage School of Business. Students will receive advanced training in biotechnology through course work, a teaching laboratory, and two quarters of independent research in a faculty laboratory of their choosing. They will also learn to think as a business manager by solving product development challenges through consulting projects, creating business plans, and by exposure to current issues within the biotechnology sector. Students will develop quantitative and qualitative skills along with business communication skills. Students will learn about business from the biotechnology perspective and biotechnology from the business perspective, and will be taught to think about their work through the lens of innovation, a crucial view for their careers.

Some of the distinctive features of the MSBTM program include the following:

- Advanced training in biotechnology through course work and an eight-unit teaching laboratory;
- A research component whereby students will engage in research with a faculty member in either the School of Biological Sciences or the Department of Biomedical Engineering (requests to perform research in labs outside of Biological Sciences or Biomedical Engineering will be considered on a case-by-case basis). This research component is considered to be important for careers in the biotechnology industry and makes this program unique worldwide;
- An Intensive course, MGMTMBA 200 (Management of Innovative Organizations), which presents fundamental concepts, tools, and solutions from management to initiate students into the concrete challenges that managers in high-performing organizations typically confront. Students will be introduced to the pedagogical methods of case analysis, group problem solving, and group presentations as a means of developing the skills and strategies associated with effective managerial action. The course is structured as a full-time, in-residence intensive;
- An experiential learning component wherein student teams, under the guidance of The Paul Merage School of Business and Department of Molecular Biology and Biochemistry professors, act as a consulting team which works with managers of biotechnology or biological science-based companies on innovative solutions to current problems faced by the companies;
- A business plan component wherein students from biosciences and management prepare a formal business plan for an Entrepreneurship or New Venture Management course;
- A new capstone course taught in the spring quarter of the second year by faculty in both Biological Sciences and The Paul Merage School of Business. The cross-listed course, MOL BIO 253/MGMTMBA 293 (Biotech Management), will integrate the program's two-year curriculum and provide a format for the required comprehensive exam. The curriculum will address a number of management issues in the biotech industry including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics. Guest lecturers from the biotech industry will also be invited to talk about both the scientific and management sides of their companies;
- "Proseminar" courses in the first year that provides students with information and practical skills for success in the program and career planning.

Admissions

Applicants will apply directly to the Graduate Division for the MSBTM program beginning each fall. The application deadline is March 1 for the following fall. Prerequisite requirements will be the same as those for the Graduate Program in Biotechnology, which include a B.A. or B.S. degree in biological sciences or related discipline and several specific elective and laboratory courses. Admission to graduate standing in MB&B is generally accorded to those possessing a B.S. degree in biological sciences or an allied field obtained with an acceptable level of scholarship from an institution of recognized standing. Those seeking admission without the prerequisite scholarship record may, in some cases, undertake remedial work; if such work is completed at the stipulated academic level, the applicant will be considered for admission. Those admitted from an allied field may be required to take supplementary upper-division courses in basic engineering subjects. The Graduate Record Examination (GRE) General Test is required of all applicants.

Foreign students will be required to submit a TOEFL score and occasionally a TSE score. Applicants from India must submit one of the following in order to be eligible for graduate studies consideration:

a continuous four-year degree from an accredited university, college, or institution, or a completed three-year bachelor's accompanied with a completed two-year master's degree. The combination of 3+2 would be the equivalent of the U.S. bachelor's degree. The MSBTM program does not accept a straight three-year bachelor's degree, nor does it accept a one-year completion of the two-year master's degree in the 3+2 combination.

Applicants will be evaluated on their prior academic record and their potential for management and leadership as demonstrated in the submitted application materials (university's transcripts, GRE test scores, letters of recommendation, applicable work experience, a Statement of Purpose, and an essay). In addition, there will be an interview by admissions counselors from The Paul Merage School of Business.

Course Work and Examination Requirements

M.S. Plan II: Seventeen required courses, a minimum of 77 units, a zero-unit Proseminar sequence in the first year (defined below), and a comprehensive examination which will be administered during the jointly taught capstone course in the spring quarter of the second year.

Required and Recommended Courses, Business: A total of nine courses adding up to 36 units. These include the Intensive MGMTMBA 200 (Management of Innovative Organizations), MGMTMBA 298 (Experiential Learning), Business Plan MGMTMBA 213 (New Venture Management) or MGMTMBA 214 (Entrepreneurship), and at least six courses from the Paul Merage School of Business, of which:

Three courses must be selected from the following five courses: MGMTMBA 201B (Management Science), MGMTMBA 202 (Organizational Analysis for Management), MGMTMBA 203A (Financial Accounting for Management), MGMTMBA 205 (Marketing Management), MGMTMBA 209A (Managerial Finance), and categorized as required courses;

Two courses must be selected from the following four courses: MGMTMBA 264 (U.S. Health Policy), MGMTMBA 285 (Supply Chain Management), MGMTMBA 287 (Project Management), MGMTMBA 292 (Business Law), and categorized as restricted elective courses; and

One additional elective course of the student's choosing.

Required and Recommended Courses, Biotechnology: A total of seven courses adding up to 36 units. These include:

Two core biological science courses, MOL BIO 203 (Nucleic Acid Structure and Function) and MOL BIO 204 (Protein Structure and Function);

Two additional graduate-level elective courses in biological sciences or biomedical engineering;

One teaching laboratory course focusing on essential methods in biotechnology, MOL BIO 252L Biotech Lab; and

Two quarters of research (four units in winter quarter of the second year and eight units in spring quarter of the second year) whereby students will engage in independent research with a faculty member of their choosing in the School of Biological Sciences or Department of Biomedical Engineering (requests to perform research in labs outside of Biological Sciences or Biomedical Engineering will be considered on a case by case basis).

Proseminar Course (Year One)

This three-quarter course, MGMTMBA 211, provides students with information and practical skills for success in the program and for career planning. The goal is to help clarify goals and develop skills and techniques to successfully manage the job search process for employment upon graduation and throughout one's career. This will be accomplished through workshops, presentations, webinars, and meetings with career counselors. Topics include resume writing, job interview coaching, company hiring practices, and career advice and counseling.

Capstone Course (Year Two)

"Biotech Management" (MOL BIO 253/MGMTMBA 293, five units), jointly taught by Biological Sciences and Business School faculty, is designed to integrate the program's two-year curriculum and provide a format for the required comprehensive exam. The curriculum will address a number of management issues in the biotech industry including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics. Guest lecturers from the biotech industry will also be invited to talk about both the scientific and management sides of their companies.

Master of Science in Biological Sciences and Educational Media Design

301 Steinhaus Hall; (949) 824-2359

bhughes@uci.edu

Brad Hughes, **Director**

Program Objectives and Student Eligibility

To meet the increasingly complex challenges facing science and education, highly trained professionals with advanced scientific knowledge and pedagogical techniques coupled with state-of-the-art media design skills will be the science education leaders of the future. The Master of Science in Biological Sciences and Educational Media Design establishes an intensive pathway for training those innovative leaders. The program can be completed flexibly within one or two years of study, in as little as nine months of full-time study, or over two years of part-time study. In order to make the program accessible to working professionals, courses will be available during the academic year in the early evening and during the regular summer session. With the convenience of evening and summer course schedules, the program is tailored to suit working science educators.

Program candidates will typically possess the qualifications of a teaching credential and a B.S. in Biological Sciences or comparable degree, and have obtained a 3.0 or better GPA. Students with degrees in other areas will be considered if they have substantial course work in biology, chemistry, mathematics, and physics that is comparable to the degree requirements for a B.S. in Biological Sciences from UCI. Applicants possessing different prerequisite qualifications may potentially be considered for admission by approval of the program director with consideration of experience and/or additional course work, on an individual case basis.

Curriculum Description

The program offers an integrative interdisciplinary structure with a curriculum that includes advanced academic biological sciences course work electives, individually selected from upper-division and graduate-level schoolwide offerings. Students also choose from external field experience, research lab experience, or a graduate course in the School of Education. A special graduate-level integrative biological science course, Experimental Evolution in Biology and Education, is part of the required core courses. The four additional core courses comprise a blend of

advanced training in the field of science education and leadership, media production technologies, and educational media design. The biological and educational course work are integrated through the productive synthesis of pedagogical methods, science content, and media design, culminating in a capstone project of biological science educational media that is presented and defended in the final quarter of study. Students are encouraged to serve as teaching assistants during their program; however, course units earned for University Teaching (399) will not count as units for degree completion.

Required and Elective Course Work

The M.S. program requires a minimum of 36 quarter units in approved courses, at least 24 of which must be from graduate-level courses in the 200 series or higher. Four graduate-level core courses (16 units) in science education media design are required for the M.S. degree including the following:

1. Advanced Pedagogical Design and Educational Science Media Production (four units, fall, lecture);
2. Directed Research Specialization and Project Development (four units, fall, lab);
3. Directed Educational Media Project Production (four units, winter, lab); and
4. Project Presentations and Science Education Leadership (four units, spring, lecture/seminar).

Three academic courses (12 units) in biological sciences are also required, including the required core graduate course Experimental Evolution in Biology and Education (four units, winter, lecture/seminar). The remaining eight academic course units may include graduate-level courses offered by the School of Biological Sciences (lecture or lab, approval of the departmental instructor and the program director are required), or upper-division undergraduate courses offered by the School of Biological Sciences (lecture or lab, approval of the program director is required).

Another eight units of electives from any of the following options must also be completed (approval of the program director is required), including:

1. Independent laboratory research (up to eight units, e.g., DEV BIO 200A);
2. Independent field research (up to eight units, e.g., ECO EVO 200A);
3. Graduate course work in the School of Education (maximum of four units);
4. Upper-division courses offered by the School of Biological Sciences (maximum of four units, lecture or lab); and
5. Graduate-level courses offered by the School of Biological Sciences (up to eight units, lecture or lab).

Capstone Project for Degree Completion

The written documentation, multimedia product, and oral presentation of the educational media capstone project will serve as the comprehensive examination for completion of the M.S. degree in Biological Sciences and Educational Media Design. The centerpiece of the capstone project is the educational media product, which uses modern multimedia tools to provide compelling educational content that links conceptually to the biological science course work content. The methodological design of

the educational media demonstrates the student's pedagogical skills, as well as technical facility with media development tools. The scope of the project is set to a reasonable size and challenge range, both worthy of the master's degree and also realistically attainable. Projects may be developed using a modular production design in consultation with the program director, so that various elements are functional, while others are descriptively simulated, to efficiently showcase the educational media product design effectively without unreasonably high production efforts.

The educational media products are accompanied by a well-written documentation package. A requirement list and format for the project documentation package is provided early in the program, and includes such elements as pedagogical rationale for product design referenced to pedagogical course work, California State content standards addressed, lesson plans, bibliographic references, background content information referenced to biological science course work, user manual instructions, assessment tools, media overview linked to media design and production course work, and advertisement of product features. All projects will be required to address National or State standards, except by approval of the program director, for projects that deal with higher education or public educational foci.

Presentations of the projects occur during class sessions via multimedia colloquia style talks for instructor and peer review. Presentations emulate in-service training for end users, including comprehensive integrated descriptions of the project's educational media features and documentation package. This constructive process includes extensive peer evaluation, revisionary responses, and discussion participation. Exemplary capstone projects may be exhibited/presented at the annual UCI Media Arts in Science Symposia (MASS), currently in development.

Courses in Biological Sciences and Educational Media Design

BSEMD 200	Individual Research
BSEMD 211	Advanced Pedagogical Design and Educational Science Media Production
BSEMD 212	Directed Research Specialization and Project Development
BSEMD 213	Directed Educational Media Project Production
BSEMD 214	Project Presentations and Science Education Leadership
BSEMD 220	Experimental Evolution in Biology and Education
BSEMD 299	Independent Study

Interdisciplinary Graduate Programs

The School is structured in a manner that encourages an interdisciplinary approach to scientific problems. Interaction and cooperative efforts across traditional institutional boundaries are especially evident in the School's participation in various organized research units (described in the Office of Research (p. 101) section) and in the interdepartmental/interschool graduate programs described below.

Graduate Program in Cellular and Molecular Biosciences

4141 Natural Sciences II; (949) 824-8145
<http://cmb.uci.edu>

David A. Fruman, **Director**

The combined graduate program in Cellular and Molecular Biosciences (CMB) provides the first year of instruction for graduate students entering Ph.D. programs in six departments within the School of Biological Sciences and the School of Medicine. Applicants should have significant laboratory experience and be well prepared in biochemistry, molecular biology, cell biology, and genetics with appropriate course work in organic chemistry, calculus, and physics.

Students in the CMB program will select three didactic courses, one each quarter, from a menu of approved course options. Students will select one course from each key biological category of "Molecules of Life," "Cells and Signaling," and "Integrated Systems and Genetics." The diversity of curriculum options offers students, in cooperation with a faculty advisor, the opportunity to customize the curriculum to the student's research goals and interests. During the first year, the students also undertake introductory research in at least two laboratories. Students can select a laboratory rotation from over 100 faculty laboratories in the departments of Biological Chemistry, Developmental and Cell Biology, Microbiology and Molecular Genetics, Molecular Biology and Biochemistry, Pathology and Laboratory Medicine, and Physiology and Biophysics. Each faculty member's area of research is described on the department Web sites. Faculty also are associated with research areas that span departments, as shown on the CMB Web site. The year culminates in a comprehensive preliminary examination and evaluation.

At the end of the first academic year, students will select a thesis advisor in one of the departments. Students who select a thesis advisor in the School of Biological Sciences (Department of Developmental and Cell Biology or Molecular Biology and Biochemistry) will complete the doctoral degree in Biological Sciences. Students who select a thesis advisor in the School of Medicine (Departments of Biological Chemistry, Microbiology and Molecular Genetics, Pathology and Laboratory Medicine, and Physiology and Biophysics) will complete the doctoral degree in Biomedical Sciences.

During the second year and beyond, students participate in the departmental doctoral program. Students are required to meet all doctoral degree requirements associated with the thesis advisor's department or program, and may be required to take additional course work, and participate in journal club and seminar series. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. Further information is available in the *Catalogue* sections of the participating departments and through the CMB program office.

Graduate Program in Mathematical and Computational Biology

Center for Complex Biological Systems
 2624 Biological Sciences III; (949) 824-4120
mcsb@uci.edu; <http://mcsb.bio.uci.edu/>
 Qing Nie, **Acting Director**

The graduate program in Mathematical and Computational Biology (MCB) is a one-year program designed to function in concert with existing departmental programs. Students who successfully complete the MCB program select a thesis advisor from among the participating faculty and then automatically join a departmental program for the remainder of their Ph.D. training. In this way, the MCB serves not as a degree-granting program, but as a "gateway" toward a Ph.D. degree in an existing degree program.

The MCB program provides students with an opportunity for a broad introductory training in mathematical and computational biology, individualized faculty counseling on curricular needs, and exposure to a large and diverse group of faculty and research projects in participating departments of the program. Member departments include Biomedical Engineering, Computer Science, Developmental and Cell Biology, Ecology and Evolutionary Biology, Mathematics, Microbiology and Molecular Genetics, and Molecular Biology and Biochemistry. (Other actively participating departments are Chemistry and Physics; admission to these departments via MCB is currently under review.)

The MCB curriculum is designed to teach students at the beginning of their graduate studies the necessary mathematical, computational, and biological knowledge for successful research at the interface between these disciplines. The needs of students with a variety of backgrounds can be met provided that they have had mathematical training comparable to a standard one-year university-level calculus course and a lower-division university course in elementary differential equations and linear algebra. Exceptional students not meeting these prerequisites may be admitted to the program on the condition that they fulfill these requirements during the first fall quarter of their graduate study or the summer preceding, and pass with a grade of B or better.

All first-year students normally take six four-unit MCB core courses, three quarters in mathematical and computational methods for biology and three in biological sciences. Research laboratory rotations constitute an important component of the first-year training program, providing students with intensive introductions to experimental design and quantitative data analysis as well as familiarizing them with available research opportunities. Students are expected to conduct three rotations in different labs prior to choosing a thesis advisor. Because of the interdisciplinary nature of the MCB program and the diversity of the enrolled students, MCB students are expected to become familiar with both "wet" experimental biology labs as well as with mathematical/computational laboratories.

At the end of the first year, each student will choose a primary thesis advisor from among the participating faculty of the member departments, and will enroll in a departmental Ph.D. program with which the thesis advisor is affiliated. To ensure interdisciplinarity of the thesis project, students who complete the MCB program choose a secondary thesis advisor from a department complementary to the primary thesis advisor's department. Although completion of the Ph.D. will be subject to the degree requirements of the departmental Ph.D. program in which the student enrolls, participating departments have agreed to accept both the course work and research conducted during the MCB gateway year in partial fulfillment of such requirements. The degree to which this is applicable varies. Students must consult with the department of choice for more specific information.

Interdepartmental Neuroscience Program

4145 Natural Sciences II; (949) 824-6226
gp-inp@uci.edu; <http://www.inp.uci.edu>
Marcelo A. Wood, **Director**

The Interdepartmental Neuroscience Program (INP) is a first-year graduate program that brings together more than 90 faculty from the School of Biological Sciences and the School of Medicine, including participation from the Departments of Anatomy and Neurobiology, Developmental and Cell Biology, Molecular Biology and Biochemistry, Neurobiology and Behavior, Pharmacology, and Physiology and Biophysics. INP faculty have broad research interests in behavioral neuroscience, brain aging, developmental neurobiology, genetics,

learning and memory, molecular neurobiology, cellular neurobiology, neural injury/disorders/repair, neuropharmacology, plasticity, and sensory neuroscience. Neuroscience as a discipline requires scientists to have a detailed understanding of at least one field, and a broad understanding of many other fields. INP provides breadth early on, followed by specialization in years two through five of predoctoral training.

INP organizes and coordinates a core curriculum that provides a foundation in Neuroscience; this forms the basis of future specialized instruction in a participating departmental degree-granting program. This curriculum includes course work and laboratory rotations. Each trainee is individually mentored/assisted in tailoring an appropriate course of study based on academic background, interests, and research foci. After successfully completing the academic requirements of the program, students identify a thesis advisor who is willing to accept them into their laboratory, and the student will transfer to the doctoral program in their advisor's home department. In this way, INP serves not as a degree-granting program, but as a "gateway" to further graduate training. Students are required to meet all doctoral degree requirements associated with the thesis advisor's department or program.

In particular, the program provides trainees with an opportunity: (1) to begin training in Neuroscience with a broad academic introduction, (2) to receive individualized attention to curricular needs, (3) to conduct initial research projects with a large and diverse group of faculty in a wide variety of departments, and (4) to conduct dissertation research in any of a large and diverse group of laboratories in a wide variety of departments.

In the first year of study, students must successfully complete one course from each of the molecular, systems, and cellular neuroscience categories. All trainees also participate every quarter in a two-unit course called Foundations of Neuroscience. This mandatory course meets in the fall and winter quarters and is intended to expose students to critical reading and analysis of the primary literature. Students are encouraged to carry out three laboratory rotations of 10 weeks each. With permission from the Director and the Dean, students may carry out fewer rotations. Rotations are graded on a Satisfactory/Unsatisfactory only scale. Trainees are judged as having successfully completed the program provided that they have: (1) achieved at least a B+ (3.3) average in the core courses, (2) achieved a satisfactory grade in each quarter of Foundations of Neuroscience, (3) achieved satisfactory grades in all rotations, and (4) identified a participating faculty member who has agreed to serve as their thesis advisor.

The ideal INP candidate will have had a substantial subset of the following courses: biology, chemistry, physics, calculus, neuroscience, psychology, biochemistry, and genetics. Preference will be given to applicants who have had laboratory research experience.

Following completion of the INP and selection of a thesis mentor, students will become members of the faculty member's participating department. In addition to the INP course work requirements, each department has specific requirements to be fulfilled, indicated below. Students who select a thesis advisor in the School of Biological Sciences (Department of Developmental and Cell Biology, Molecular Biology and Biochemistry, or Neurobiology and Behavior) will complete the doctoral degree in Biological Sciences. Students who select an advisor in the School of Medicine (Department of Anatomy and Neurobiology, Pharmacology, or Physiology and Biophysics) will complete the doctoral degree in Biomedical Sciences.

Developmental and Cell Biology (School of Biological Sciences):

Students entering the Developmental and Cell Biology program are required to enroll in and attend the weekly department seminar series

(DEV BIO 290A-DEV BIO 290B-DEV BIO 290C) and Advanced Topics in Cell Biology journal club (DEV BIO 206). Two quarters of teaching under the supervision of departmental faculty are required. Student training will also be individually assessed for possible courses with an emphasis in molecular, developmental biology, or genetics as deemed necessary for successful completion of the thesis research project.

Molecular Biology and Biochemistry (School of Biological Sciences):

Students entering the Molecular Biology and Biochemistry program are required to enroll in and attend the weekly department seminar series (MOL BIO 201A-MOL BIO 201B-MOL BIO 201C) and the Research in Progress Seminar (MOL BIO 229) where they will present their own work annually. Students will enroll in University Teaching (399) and teach (TA) beginning in their second year for at least two quarters. Student training will also be individually assessed to include at least one formal graduate course in each of the second through fifth years with an emphasis in molecular biology or biochemistry as deemed necessary for successful completion of the thesis research project. Necessary courses will include at least two out of the three core classes (MOL BIO 203-MOL BIO 204, and MOL BIO 206).

Neurobiology and Behavior (School of Biological Sciences):

Neurobiology and Behavior accepts any of the INP core courses toward the requirement of one each from Cellular, Molecular, Systems, and Behavioral categories. INP students who enter Neurobiology and Behavior in their second year must complete the fourth category if they only fulfilled three as INP students. In addition, they will fulfill the requirements met by all continuing students including teaching (TA) beginning in their second year for at least two quarters, advancing to candidacy in their third year, annual meetings with an advisory committee, and completing four advanced courses prior to defending their dissertation in their fifth year. They must also participate in the regular department colloquia. Students also present their research annually in the graduate student NeuroBlitz colloquium series.

Anatomy and Neurobiology (School of Medicine): Students entering the Anatomy and Neurobiology program are required to participate in the Current Topics in Neuroscience journal club (ANATOMY 227A-ANATOMY 227B-ANATOMY 227C) and attend all department sponsored seminars. They are also required to meet once each year with an advisory committee to monitor their progress and present their research at the annual "Grad Day" meeting. Individual advisors may require students to take other courses depending on their interests and research program.

Pharmacology (School of Medicine): Students entering the Pharmacology program through the INP are required to complete Statistics (PHARM 256) and Ethics (PHARM 257) during the summer. They will also fulfill requirements met by all continuing students including the seminar series (PHARM 298), research (PHARM 299), and advance to candidacy in their third year.

Physiology and Biophysics (School of Medicine): Students entering the Physiology program through the INP are required to enroll each quarter in Topics in Physiology (PHYSIO 290) and to attend all meetings of the Physiology and Biophysics journal club, all Physiology and Biophysics Departmental seminars and lunch meetings with the Seminar speaker, and the Research in Progress seminars. All students are required to present their research once a year at the Research in Progress program. Students are encouraged, but not required, to enroll in Physiology of Ion Channels (PHYSIO 232) and Proteomics (PHYSIO 252). All students are required to hold meetings with their thesis committee annually, beginning in their second year. The Department has no formal teaching requirements, but students who wish to gain experience as

Teaching Assistants (TA) can make arrangements to do so in coordination with the Graduate Advisor.

Faculty

Dritan Agalliu, Ph.D. Columbia University, *Assistant Professor of Developmental and Cell Biology*

Nancy Aguilar-Roca, Ph.D. University of California, San Diego, *Lecturer with Potential Security of Employment, Ecology and Evolutionary Biology*

Steven D. Allison, Ph.D. Stanford University, *Assistant Professor of Ecology and Evolutionary Biology and of Earth System Science*

Joseph Arditti, Ph.D. University of Southern California, *Professor Emeritus of Developmental and Cell Biology*

Kavita Arora, Ph.D. Bombay University, *Professor of Developmental and Cell Biology*

Dana Aswad, Ph.D. University of California, Berkeley, *Professor of Molecular Biology and Biochemistry*

Peter R. Atsatt, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

John C. Avise, Ph.D. University of California, Davis, *UCI Distinguished Professor of Ecology and Evolutionary Biology*

Francisco J. Ayala, Ph.D. Columbia University, *University Professor and Donald Bren Professor of Biological Sciences*

Manny Azizi, Ph.D. University of Massachusetts, *Assistant Professor of Ecology and Evolutionary Biology*

Alan G. Barbour, M.D. Tufts University School of Medicine, *Professor of Microbiology and Molecular Genetics, Medicine (Infectious Diseases), and Ecology and Evolutionary Biology*

Lee Bardwell, Ph.D. Stanford University, *Professor of Developmental and Cell Biology*

Albert F. Bennett, Ph.D. University of Michigan, *Hana and Francisco J. Ayala Dean of the School of Biological Sciences and Professor of Ecology and Evolutionary Biology*

Rudi C. Berkelhamer, Ph.D. University of California, Berkeley, *Associate Dean, Division of Undergraduate Education, and Senior Lecturer with Security of Employment, Ecology and Evolutionary Biology*

Hans-Ulrich Bernard, Ph.D. University Göttingen, *Professor of Molecular Biology and Biochemistry and of Public Health*

Bruce Blumberg, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology, Biomedical Engineering, and Pharmaceutical Sciences*

Matthew Blurton-Jones, Ph.D. University of California, *Assistant Professor of Neurobiology and Behavior*

Hans R. Bode, Ph.D. Yale University, *Research Professor of Developmental and Cell Biology*

Peter A. Bowler, Ph.D. University of California, Irvine, *Director of the UCI Arboretum and Herbarium, Faculty Manager of the UC Natural Reserve*

System Burns Piñon Ridge and San Joaquin Marsh Reserves, and Senior Lecturer with Security of Employment, Ecology and Evolutionary Biology

Timothy J. Bradley, Ph.D. University of British Columbia, *Professor of Ecology and Evolutionary Biology*

Adriana D. Briscoe, Ph.D. Harvard University, *Professor of Ecology and Evolutionary Biology*

Peter J. Bryant, Ph.D. University of Sussex, *Professor Emeritus of Developmental and Cell Biology*

Susan V. Bryant, Ph.D. University of London, *Professor Emerita of Developmental and Cell Biology*

Michael J. Buchmeier, Ph.D. McMaster University, *Professor of Medicine (Infectious Disease) and of Molecular Biology and Biochemistry*

Nancy Burley, Ph.D. University of Texas, Austin, *Professor of Ecology and Evolutionary Biology*

Jorge Busciglio, Ph.D. National University of Cordoba, *Professor of Neurobiology and Behavior*

Robin M. Bush, Ph.D. University of Michigan, Ann Arbor, *Associate Professor of Ecology and Evolutionary Biology*

Lawrence F. Cahill, Ph.D. University of California, Irvine, *Professor of Neurobiology and Behavior and of Cognitive Sciences*

Diane R. Campbell, Ph.D. Duke University, *Professor of Ecology and Evolutionary Biology*

Richard D. Campbell, Ph.D. The Rockefeller Institute, *Professor Emeritus of Developmental and Cell Biology*

Thomas J. Carew, Ph.D. University of California, Riverside, *Research Professor of Neurobiology and Behavior*

F. Lynn Carpenter, Ph.D. University of California, Berkeley, *Professor Emerita of Ecology and Evolutionary Biology*

Paolo Casali, M.D. University of Milan, *School of Medicine Senior Associate Dean for Research and Graduate Studies, Director of the Center for Immunology, and Donald Bren Professor, Departments of Medicine (Immunology) and of Molecular Biology and Biochemistry*

Ken W.-Y. Cho, Ph.D. University of Pennsylvania, *Professor of Developmental and Cell Biology*

Olivier Cinquin, Ph.D. University College London, *Assistant Professor of Developmental and Cell Biology*

Michael T. Clegg, Ph.D. University of California, Davis, *Donald Bren Professor of Biological Sciences and of Ecology and Evolutionary Biology*

Melanie Cocco, Ph.D. Pennsylvania State University, *Associate Professor of Molecular Biology and Biochemistry*

Susana Cohen-Cory, Ph.D. Rockefeller University, *Professor of Neurobiology and Behavior*

Carl Cotman, Ph.D. Indiana University, *Professor of Neurology, Neurobiology and Behavior, and Biomedical Engineering*

Karina S. Cramer, Ph.D. California Institute of Technology, *Associate Professor of Neurobiology and Behavior*

Michael G. Cumsy, Ph.D. University of California, Berkeley, *Director, Master of Science Program in Biotechnology Management; Director, Graduate Program in Biotechnology; and Senior Lecturer with Security of Employment, Molecular Biology and Biochemistry*

Rowland H. Davis, Ph.D. Harvard University, *Professor Emeritus of Molecular Biology and Biochemistry*

Peter J. Donovan, Ph.D. University College London, *Professor of Developmental and Cell Biology and of Biological Chemistry*

Aimee L. Edinger, V.M.D., Ph.D. University of Pennsylvania, *Associate Professor of Developmental and Cell Biology*

James Jordan Emerson, Ph.D. University of Chicago, *Assistant Professor of Ecology and Evolutionary Biology*

Hung Fan, Ph.D. Massachusetts Institute of Technology, *Director of the Cancer Research Institute, Associate Director of the Chao Family Comprehensive Cancer Center, and Professor of Molecular Biology and Biochemistry*

Norbert Fortin, Ph.D. Boston University, *Assistant Professor of Neurobiology and Behavior*

Donald E. Fosket, Ph.D. University of Idaho, *Professor Emeritus of Developmental and Cell Biology*

Steven A. Frank, Ph.D. University of Michigan, *Professor of Ecology and Evolutionary Biology*

Ron D. Frostig, Ph.D. University of California, Los Angeles, *Professor of Neurobiology and Behavior and of Biomedical Engineering*

David A. Fruman, Ph.D. Harvard University, *Director, Combined Graduate Program in Cellular and Molecular Biosciences and Professor of Molecular Biology and Biochemistry*

Christine M. Gall, Ph.D. University of California, Irvine, *Professor of Anatomy and Neurobiology and of Neurobiology and Behavior*

Sunil Gandhi, Ph.D. University of California, San Diego, *Assistant Professor of Neurobiology and Behavior*

David Gardiner, Ph.D. Scripps Institution of Oceanography, University of California, San Diego, *Professor of Developmental and Cell Biology*

Brandon S. Gaut, Ph.D. University of California, Riverside, *Professor of Ecology and Evolutionary Biology*

Donovan German, Ph.D. University of Florida, *Assistant Professor of Ecology and Evolutionary Biology*

Paul Gershon, Ph.D. Liverpool School of Tropical Medicine, University of Liverpool, *Professor of Molecular Biology and Biochemistry*

Charles Glabe, Ph.D. University of California, Davis, *Professor of Molecular Biology and Biochemistry*

Michael L. Goulden, Ph.D. Stanford University, *Professor of Earth System Science and of Ecology and Evolutionary Biology*

Celia Goulding, Ph.D. King's College London, *Associate Professor of Molecular Biology and Biochemistry and of Pharmaceutical Sciences*

Gale A. Granger, Ph.D. University of Washington, *Professor Emeritus of Molecular Biology and Biochemistry*

Kim Green, Ph.D. University of Leeds, *Assistant Professor of Neurobiology and Behavior*

Steven Gross, Ph.D. University of Texas, Austin, *Professor of Developmental and Cell Biology, Biomedical Engineering, and Physics*

John F. Guzowski, Ph.D. University of California, Irvine, *Associate Professor of Neurobiology and Behavior and James L. McGaugh Chair in the Neurobiology of Learning and Memory*

Barbara A. Hamkalo, Ph.D. University of Massachusetts, *Professor Emerita of Molecular Biology and Biochemistry*

Bradford A. Hawkins, Ph.D. University of California, Riverside, *Professor of Ecology and Evolutionary Biology*

Patrick L. Healey, Ph.D. University of California, Berkeley, *Professor Emeritus of Developmental and Cell Biology*

James W. Hicks, Ph.D. University of New Mexico, *Associate Vice Chancellor for Research and Professor of Ecology and Evolutionary Biology*

Franz Hoffmann, Ph.D. University of Hohenheim, *Senior Lecturer with Security of Employment, Developmental and Cell Biology*

Bradley Hughes, Ph.D. University of California, Irvine, *Director, Biological Sciences and Educational Media Design Program, and Lecturer with Security of Employment, Ecology and Evolutionary Biology*

Christopher C. W. Hughes, Ph.D. University of London, *Department Chair and Professor of Molecular Biology and Biochemistry and Professor of Biomedical Engineering*

George L. Hunt, Jr., Ph.D. Harvard University, *Professor Emeritus of Ecology and Evolutionary Biology*

Travis Huxman, Ph.D. University of Nevada, Las Vegas, *Director of the UCI Center for Environmental Biology and Professor of Ecology and Evolutionary Biology*

Mahtab Jafari, Pharm.D. University of California, San Francisco, *Associate Professor of Pharmaceutical Sciences, Ecology and Evolutionary Biology, and Pharmacology*

Anthony A. James, Ph.D. University of California, Irvine, *UCI Distinguished Professor of Microbiology and Molecular Genetics and of Molecular Biology and Biochemistry*

C. Sunny Jiang, Ph.D. University of South Florida, *Professor of Civil and Environmental Engineering, Ecology and Evolutionary Biology, and Social Ecology*

Robert K. Josephson, Ph.D. University of California, Los Angeles, *Professor Emeritus of Neurobiology and Behavior*

Keith Justice, Ph.D. University of Arizona, *Professor Emeritus of Biological Sciences*

Pavan Kadandale, Ph.D. Rutgers, University of New Jersey, *Lecturer with Potential Security of Employment, Molecular Biology and Biochemistry*

Claudia H. Kawas, M.D. University of Louisville, *Professor of Neurology and of Neurobiology and Behavior, and Nichols Clinical Neuroscience Chair*

Herbert P. Killackey, Ph.D. Duke University, *Vice Provost for Academic Personnel and Professor of Neurobiology and Behavior and of Anatomy and Neurobiology*

Daniel J. Knauer, Ph.D. University of Nebraska, *Professor Emeritus of Developmental and Cell Biology*

Natalia L. Komarova, Ph.D. University of Arizona, *Professor of Mathematics and of Ecology and Evolutionary Biology*

Harold Koopowitz, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Stuart M. Krassner, Sc.D. The Johns Hopkins University, *Professor Emeritus of Developmental and Cell Biology*

Frank LaFerla, Ph.D. University of Minnesota, *Director of the Institute for Memory Impairments and Neurological Disorders, and Department Chair and UCI Chancellor's Professor of Neurobiology and Behavior*

Arthur D. Lander, M.D., Ph.D. University of California, San Francisco, *Director, Center for Complex Biological Systems and Donald Bren Professor of Developmental and Cell Biology, Biomedical Engineering, and Pharmacology*

Thomas E. Lane, Ph.D. University of California, Los Angeles, *Director, Multiple Sclerosis Research Center and Professor of Molecular Biology and Biochemistry*

Michael Leon, Ph.D. University of Chicago, *Associate Dean of Undergraduate Affairs of the School of Biological Sciences and Professor of Neurobiology and Behavior*

Shin Lin, Ph.D. University of California, Los Angeles, *Professor of Developmental and Cell Biology and of Biomedical Engineering*

Leslie Lock, Ph.D. University of California, San Francisco, *Assistant Professor of Developmental and Cell Biology and of Biological Chemistry*

Melissa Lodoen, Ph.D. University of California, San Francisco, *Assistant Professor of Molecular Biology and Biochemistry*

Anthony D. Long, Ph.D. McMaster University, *Professor of Ecology and Evolutionary Biology*

Catherine Loudon, Ph.D. Duke University, *Senior Lecturer with Security of Employment, Ecology and Evolutionary Biology*

Hartmut Luecke, Ph.D. Rice University, *Director, Center for Biomembrane Systems and Professor of Molecular Biology and Biochemistry and of Physiology and Biophysics*

Rui (Ray) Luo, Ph.D. University of Maryland, College Park, *Associate Professor of Molecular Biology and Biochemistry and of Biomedical Engineering*

Andrej Luptak, Ph.D. Yale University, *Vice Chair of the Graduate Program in Pharmaceutical Sciences and Associate Professor of Pharmaceutical Sciences, Chemistry, and Molecular Biology and Biochemistry*

Grant MacGregor, Ph.D. University of Sussex, *Associate Professor of Developmental and Cell Biology*

Richard E. MacMillen, Ph.D. University of California, Los Angeles, *Professor Emeritus of Ecology and Evolutionary Biology*

Jerry E. Manning, Ph.D. University of Utah, *Professor Emeritus of Molecular Biology and Biochemistry*

J. Lawrence Marsh, Ph.D. University of Washington, *Director of the Developmental Biology Center and Professor of Developmental and Cell Biology*

John F. Marshall, Ph.D. University of Pennsylvania, *Professor of Neurobiology and Behavior*

Rachel W. Martin, Ph.D. Yale University, *Associate Professor of Chemistry and of Molecular Biology and Biochemistry*

Adam C. Martiny, Ph.D. Technical University of Denmark, *Associate Professor of Ecology and Evolutionary Biology and of Earth System Science*

Jennifer Martiny, Ph.D. Stanford University, *Professor of Ecology and Evolutionary Biology*

Debra Mauzy-Melitz, Ph.D. Marquette University, *Lecturer with Potential Security of Employment, Developmental and Cell Biology*

James L. McGaugh, Ph.D. University of California, Berkeley, *Research Professor of Neurobiology and Behavior and of Cognitive Sciences*

Matthew J. McHenry, Ph.D. University of California, Berkeley, *Associate Professor of Ecology and Evolutionary Biology*

Alexander McPherson, Ph.D. Purdue University, *Professor of Molecular Biology and Biochemistry*

Raju S. Metherate, Ph.D. McGill University, *Department Vice Chair and Professor of Neurobiology and Behavior*

Ronald L. Meyer, Ph.D. California Institute of Technology, *Professor of Developmental and Cell Biology*

John C. Middlebrooks, Ph.D. University of California, San Francisco, *Professor of Otolaryngology - Head and Neck Surgery, Neurobiology and Behavior, and Cognitive Sciences*

Ricardo Miledi, M.D. Universidad Nacional Autónoma de México, *UCI Distinguished Research Professor of Neurobiology and Behavior*

Kailen A. Mooney, Ph.D. University of Colorado, *Assistant Professor of Ecology and Evolutionary Biology*

Naomi Morrisette, Ph.D. University of Pennsylvania, *Associate Professor of Molecular Biology and Biochemistry*

Ali Mortazavi, Ph.D. California Institute of Technology, *Assistant Professor of Developmental and Cell Biology*

Laurence D. Mueller, Ph.D. University of California, Davis, *Department Chair and Professor of Ecology and Evolutionary Biology*

R. Michael Mulligan, Ph.D. Michigan State University, *Associate Dean of Graduate Studies of the School of Biological Sciences and Professor of Developmental and Cell Biology and of Ecology and Evolutionary Biology*

Edward Nelson, M.D. Oregon Health Sciences University, *Associate Professor of Medicine (Hematology/Oncology) and of Molecular Biology and Biochemistry*

Diane K. O'Dowd, Ph.D. University of California, San Diego, *Department Chair and Professor of Developmental and Cell Biology and Professor of Anatomy and Neurobiology*

Ian Parker, Ph.D. University College, London, *Professor of Neurobiology and Behavior and of Physiology and Biophysics*

Irene Munk Pedersen, Ph.D. University of Copenhagen, *Assistant Professor of Molecular Biology and Biochemistry*

Maksim Plikus, Ph.D. University of Southern California, *Assistant Professor of Developmental and Cell Biology*

Thomas L. Poulos, Ph.D. University of California, San Diego, *UCI Chancellor's Professor of Molecular Biology and Biochemistry, Pharmaceutical Sciences, Physiology and Biophysics, and Chemistry*

Susanne Rafelski, Ph.D. Stanford University, *Assistant Professor of Developmental and Cell Biology*

James T. Randerson, Ph.D. Stanford University, *UCI Chancellor's Professor of Earth System Science and of Ecology and Evolutionary Biology*

Jose M. Ranz, Ph.D. Universidad Autònoma de Barcelona, *Assistant Professor of Ecology and Evolutionary Biology*

Sergio Rasmann, Ph.D. University of Neuchâtel, *Assistant Professor of Ecology and Evolutionary Biology*

Rainer K. Reinscheid, Ph.D. Center for Molecular Neurobiology, *Associate Professor of Pharmaceutical Sciences, Pharmacology, and Molecular Biology and Biochemistry*

Markus W. Ribbe, Ph.D. University of Bayreuth, *Professor of Molecular Biology and Biochemistry and of Chemistry*

Michael R. Rose, Ph.D. University of Sussex, *Professor of Ecology and Evolutionary Biology*

Michael D. Rugg, Ph.D. University of Leicester, *Professor Emeritus of Neurobiology and Behavior*

Ann K. Sakai, Ph.D. University of Michigan, *Professor of Ecology and Evolutionary Biology*

Brian Sato, Ph.D. University of California, San Diego, *Lecturer with Potential Security of Employment, Molecular Biology and Biochemistry*

Thomas F. Schilling, Ph.D. University of Oregon, *Professor of Developmental and Cell Biology*

Donald F. Seneear, Ph.D. University of Washington, *Department Vice Chair and Professor of Molecular Biology and Biochemistry*

Steven L. Small, Ph.D. University of Maryland, M.D. University of Rochester, *Department Chair of Neurology and Professor, Departments of Neurology, Neurobiology and Behavior, and Cognitive Sciences*

Ivan Soltesz, Ph.D. L. Eötvös University, *Department Chair of Anatomy and Neurobiology and UCI Chancellor's Professor, Departments of*

Anatomy and Neurobiology, Physiology and Biophysics, and Neurobiology and Behavior

George Sperling, Ph.D. Harvard University, *UCI Distinguished Professor of Cognitive Sciences and of Neurobiology and Behavior*

Craig Stark, Ph.D. Carnegie Mellon University, *Director of the Center for the Neurobiology of Learning and Memory and Professor of Neurobiology and Behavior*

Arnold Starr, M.D. New York University, *Research Professor of Neurology and of Neurobiology and Behavior*

Oswald Steward, Ph.D. University of California, Irvine, *Director, Reeve-Irvine Research Center; Senior Associate Dean for Research, School of Medicine; Professor, Departments of Anatomy and Neurobiology, Neurobiology and Behavior, and Neurosurgery; and Reeve-Irvine Chair in Spinal Cord Injury Research*

Georg Striedter, Ph.D. University of California, San Diego, *Professor of Neurobiology and Behavior*

Christine Suetterlin, Ph.D. University of Basel, *Associate Professor of Developmental and Cell Biology*

Katumi Sumikawa, Ph.D. Imperial College, London, *Associate Professor of Neurobiology and Behavior*

Richard Symanski, Ph.D. Syracuse University, *Senior Lecturer with Security of Employment, Ecology and Evolutionary Biology*

Andrea J. Tenner, Ph.D. University of California, San Diego, *Professor of Molecular Biology and Biochemistry, Pathology, and Neurobiology and Behavior*

Krishna K. Tewari, Ph.D. Lucknow University, *Professor Emeritus of Molecular Biology and Biochemistry*

Leslie M. Thompson, Ph.D. University of California, Irvine, *Professor of Psychiatry and Human Behavior, Biological Chemistry, and Neurobiology and Behavior*

Kevin R. Thornton, Ph.D. University of Chicago, *Associate Professor of Ecology and Evolutionary Biology*

Kathleen K. Treseder, Ph.D. Stanford University, *UCI Chancellor's Fellow, Vice Chair and Professor of Ecology and Evolutionary Biology, and Professor of Earth System Science*

Shiou-Chuan (Sheryl) Tsai, Ph.D. University of California, Berkeley, *UCI Chancellor's Fellow and Professor of Molecular Biology and Biochemistry, Chemistry, and Pharmaceutical Sciences*

Luis P. Villarreal, Ph.D. University of California, San Diego, *Professor of Molecular Biology and Biochemistry*

Craig M. Walsh, Ph.D. University of California, Los Angeles, *Associate Professor of Molecular Biology and Biochemistry*

Rahul Warrior, Ph.D. Yale University, *Associate Professor of Developmental and Cell Biology*

Norman M. Weinberger, Ph.D. Case Western Reserve University, *Research Professor of Neurobiology and Behavior*

Arthur E. Weis, Ph.D. University of Illinois, *Professor Emeritus of Ecology and Evolutionary Biology*

Gregory Alan Weiss, Ph.D. Harvard University, *Professor of Chemistry and of Molecular Biology and Biochemistry*

Stephen G. Weller, Ph.D. University of California, Berkeley, *Professor of Ecology and Evolutionary Biology*

Dominik Wodarz, Ph.D. Oxford University, *Professor of Ecology and Evolutionary Biology and of Mathematics*

Marcelo A. Wood, Ph.D. Princeton University, *Director, Interdepartmental Neuroscience Program and Associate Professor of Neurobiology and Behavior*

Clifford A. Woolfolk, Ph.D. University of Washington, *Professor Emeritus of Molecular Biology and Biochemistry*

Pauline Yahr, Ph.D. University of Texas, *Professor Emerita of Neurobiology and Behavior*

Guiyun Yan, Ph.D. University of Vermont, *Professor of Public Health and of Ecology and Evolutionary Biology*

Courses

BIO SCI 1A. Life Sciences. 4 Units.

Designed to introduce nonmajors to the basic concepts of modern biology. Discussion of evolutionary biology, ecology, molecular biology, and genetics.

Restriction: Non-School of Biological Sciences majors only.

(II)

BIO SCI 2A. Freshman Seminar. 2 Units.

Weekly meetings consisting of presentations by faculty, professional staff, and Peer Academic Advisors provide information about the School of Biological Sciences, campus resources, learning skills, and special programs/opportunities.

Grading Option: Pass/no pass only.

Restriction: Freshmen only. Biological Sciences majors only.

BIO SCI 2B. Freshman Seminar . 1 Unit.

Faculty presentations and readings focused on the structure, function, opportunities, and current issues in the biological sciences.

Grading Option: Pass/no pass only.

Restriction: Biological Sciences majors only. Freshman only.

BIO SCI 3A. Career Decision Making. 0 Units.

An introductory course designed to facilitate the career decision-making process. Decision-making processes, values, and standardized tests of aptitudes, interests, and values are utilized with non-test data in appraising biological sciences career options.

Grading Option: Pass/no pass only.

Restriction: Biological Sciences majors only.

BIO SCI 3B. Non-Health Sciences Career Exploration. 0 Units.

A survey course designed to assist students in exploring non-health science career options. Lectures by professionals in various fields.

Grading Option: Pass/no pass only.

BIO SCI 5. Introduction to Molecular Biology. 4 Units.

Molecules of life, with emphasis on medical applications.

Restriction: Non-Biological Sciences majors only. BIO SCI 5 may not be taken for credit if taken after BIO SCI 99.

(II)

BIO SCI 6. Tropical Biology: Race to Save the Tropics. 4 Units.

Population growth combines with tropical resource consumption by industrialized nations to cause high rates of deforestation, pollution, habitat fragmentation, and extinction of species. Discusses tropical biomes, their population, community, and ecosystem processes, and possible means of conservation of biodiversity.

(II)

BIO SCI 9A. Nutrition Science. 4 Units.

An introduction to nutrition science, integrating concepts from biology, biochemistry, microbiology, physiology, and psychology to explain the interaction between nutrients and the human body. Biological basis of nutrient standards is analyzed. Effects of nutrition, behavior, exercises on health/disease.

(II)

BIO SCI 9B. Biology and Chemistry of Food and Cooking . 4 Units.

The kitchen is used as a laboratory to introduce fundamental principles of biology, chemistry, and physics. A molecular/cellular analysis of cooking, including concepts such as protein structure, browning reactions, colloids, emulsions, carbohydrate metabolism, and development of flavor/texture through biochemical transformations.

(II)

BIO SCI 9C. Biotech Basics. 4 Units.

An overview of current biotechnology. Discusses the biological/molecular basis of novel therapies for diseases, modification of human genes, human genome project, cloning, DNA fingerprinting, and genetically modified food. Targeted for students interested in modern breakthroughs in biology.

(II)

BIO SCI 9D. Diseases of the Twenty-First Century . 4 Units.

Why do we get sick? An introduction to the biological basis of human disease, including diseases of the cardiovascular, respiratory, nervous, and reproductive systems. Case studies present diagnosis, treatment, and prevention protocols. Inheritable and infectious diseases also discussed.

Overlaps with BIO SCI 10, BIO SCI 12D.

(II)

BIO SCI 9E. Horticulture Science . 4 Units.

Scientific principles of horticulture at the UCI Arboretum. Taxonomy, plant life history strategies; experiments with seed dormancy; morphological adaptations for specialized sexual and clonal reproduction; basics of plant propagation and ecological restoration. Laboratory fee.

(II)

BIO SCI 9G. Way Your Body Works. 4 Units.

An introduction to the basic mechanisms that control the organ systems of the human body, including the nervous, cardiovascular, immune, and reproductive systems. Emphasis is on how the body works normally, but includes how these processes fail in disease.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 9J. Biology of Oriental Medicine. 4 Units.

With lectures, demonstrations, and hands-on learning, the theory and practice of herbal medicine, acupuncture, qigong, and manipulative therapies are explained in Western biomedical terms. The latest basic and clinical research advances in each area are also described.

Overlaps with BIO SCI 9N, BIO SCI D124.

(II)

BIO SCI 9K. Global-Change Biology. 4 Units.

Addresses ways in which humans are altering the global environment, with consequences for the ecology of animals, plants, and microbes. Discussion on how these biologically oriented questions relate to human society, politics, and the economy.

Same as EARTHSS 13.

(II)

BIO SCI 9N. Introduction to Complementary and Alternative Medicine . 4 Units.

Basic and clinical research on complementary and alternative therapies (e.g., herbal medicine, mind-body practices, energy medicine, acupuncture, homeopathy, chiropractic, Ayurveda), and how such practices are integrated into Western medicine are discussed. Includes lectures, demonstrations, and hands-on learning.

Overlaps with BIO SCI 9J, BIO SCI 9D, BIO SCI 10, BIO SCI D124.

Restriction: Non-Biological Science majors only.

(II)

BIO SCI 10. The Biology of Human Diseases. 4 Units.

Introduction to concepts of diagnosis, treatment, and prevention of major human infectious diseases. Covers some aspects of epidemiology. Scope and impact of infectious diseases in the present and past experiences in controlling infectious disease. Reviews biology of human organ systems.

Overlaps with BIO SCI 9D, BIO SCI 12D.

(II)

BIO SCI 11. Topics in Biological Sciences. 4 Units.

Studies in selected areas of biological sciences.

Repeatability: May be taken for credit 3 times.

(II)

BIO SCI 12B. Disease and Civilization. 4 Units.

Demonstrates the role played by infectious diseases on the development of human civilization. The psychological impact of major epidemic diseases upon society and culture. Starting with early hunting and gathering cultures through the effect of AIDS in the modern world.

(II)

BIO SCI 12D. Molecular Basis of Human Disease. 4 Units.

Introduction to the concepts of the molecular basis, treatment, and diagnosis of human disease. Diseases resulting from infectious agents such as virus, bacteria, protozoan and metazoan animals, and diseases resulting from genetic disorders discussed in context of molecular mechanisms.

Overlaps with BIO SCI 9D, BIO SCI 10.

(II)

BIO SCI 14. California Teach 1: Introduction to Science and Mathematics Teaching. 3 Units.

First in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies. Includes supervised field experience in a K-12 classroom.

Same as PHY SCI 5.

Restriction: School of Physical Sciences, School of Biological Sciences, School of Information and Computer Sciences, and School of Engineering majors have first consideration for enrollment.

BIO SCI 16. Introduction to Darwinian Biology. 4 Units.

An introduction to the basic concepts of ecology, evolution, and functional biology suitable for non-scientists.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 20. California Natural History. 4 Units.

Introduction to ecological relationships within a variety of California habitats. Explores aspects of the physical environments and the adaptations of organisms to their physical and biological surroundings in habitats such as the coastal zone, mountains, and deserts.

(II)

BIO SCI 25. Biology of Cancer. 4 Units.

Biological, clinical, and psychosocial nature of cancer through the perspectives of medical researchers, biologists, physicians, and health educators. For students of all majors, designed so that each can increase personal awareness of the biology of cancer.

Restriction: BIO SCI 25 may not be taken for credit if taken after BIO SCI M125.

(II)

BIO SCI 30. Biomedical Ethics. 4 Units.

Ethical issues inherent in twenty-first-century biological and medical advances. Introduction to the basic biology underlying these issues and an analysis of the ethical implications to society. Topics such as cloning, stem cell research, genetic engineering are discussed by guest speakers.

BIO SCI 35. The Brain and Behavior. 4 Units.

Introduction to how the brain works. Biological processes underlying perception, movement, sleep-wake cycles, motivation, language, learning, and memory. Changes in the brain associated with sex differences, drug use, aging, seasons, and time of day. Fundamental properties of the nervous system.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 36. Drugs and the Brain. 4 Units.

Introduction to the actions of drugs on the brain. How studying drug action helps reveal normal functions of neurons. How drugs can correct neural disorders or disrupt neural function. Biological issues related to drug abuse, drug addiction, and drug seeking.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 37. Brain Dysfunction and Repair . 4 Units.

Introduction to the disruptions in brain function that underlie disorders such as Alzheimer's disease, Parkinsonism, schizophrenia, and depression, and the basis for drug therapies. The brain's ability to repair itself after damage and the pros and cons of that repair.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 38. Mind, Memory, Amnesia, and the Brain. 4 Units.

Introduction to neural mechanisms underlying learning and memory. Emphasis on molecular changes that mediate memory as well as structures involved in different forms of memory. Additionally, examines the biology of memory phenomena, from extraordinary memory to false memory to amnesia.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 40. Neurobiology of Communication. 4 Units.

Explores various modes of communication focusing on neurobiological and sensory bases that support these modes. Topics include: communication codes for a specific signal, such as alarm, social hierarchy, mating readiness, emotions, and the purpose, accuracy, and honesty of these signals.

Restriction: Non-school majors only

BIO SCI 41. Aspects of Mood Disorder. 4 Units.

There are significant differences in response to psychiatric illness across cultures. Delves into the neuroscience underlying mood disorder, investigating current pharmacological treatments and sociocultural influences on treatment outcomes.

Restriction: Non-School of Biological Sciences majors only.

(II)

BIO SCI 42. Origin of Life. 4 Units.

Biochemical explanations for the origin of life are presented. Topics include definitions of life, the first replicating molecules, the first catalyzed biosynthesis and metabolism, the origin of cells (compartmentalization) and the origins of information and the genetic code.

(II)

BIO SCI 43. Media on the Mind. 4 Units.

Surveys an ever-increasing collection of research, suggesting modern technology and social media are changing in the way our brains function.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 44. Stem Cells and Brain Repair. 4 Units.

Students introduced to the field of regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders examined. Discussion of opportunities, challenges, and implications of this research.

Overlaps with BIO SCI N172.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 45. AIDS Fundamentals. 4 Units.

Considers the biological and sociological bases of the AIDS epidemic. Topics include the history of AIDS, current medical knowledge, transmission, risk reduction, and how the community can respond.

Same as PUBHLTH 80.

(II)

BIO SCI 46. Discussion and Literature Research in AIDS. 2-4 Units.

Students carry out two activities: (1) leading discussions about HIV/AIDS (predominantly regarding sociological and personal reactions) among students taking the AIDS Fundamentals course and (2) literature research about biomedical aspects of AIDS.

Prerequisite: BIO SCI 45 or PUBHLTH 80.

BIO SCI 47. Stress. 4 Units.

Investigates stress at a psychological, physiological, and molecular level, and provides a current overview of the field of stress research.

Restriction: Non-Biological Sciences majors only.

(II)

BIO SCI 55. Introduction to Ecology. 4 Units.

Principles of ecology; application to populations, communities, ecosystems, and humans.

Restriction: Non-Biological Sciences majors only. BIO SCI 55 may not be taken for credit if taken after BIO SCI 96 or BIO SCI E106.

(II)

BIO SCI 65. Biodiversity & Conservation. 4 Units.

A biological perspective on the current environmental crisis. The origin, evolution, and value of biological diversity. Extinction and depletion caused by overexploitation, habitat loss, and pollution. Conservation through habitat preservation and restoration, captive breeding, cryopreservation.

(II)

BIO SCI 75. Human Development: Conception to Birth. 4 Units.

Processes leading to the birth of a healthy child and the avoidance of birth defects. Male and female reproductive systems, hormonal control of egg-sperm formations, sexual intercourse, contraception, venereal diseases, fertilization, cell division, embryonic development, fetal physiology.

Restriction: Non-Biological Science majors only.

(II)

BIO SCI H90. The Idiom and Practice of Science. 4 Units.

The importance of biological sciences in our world is discussed. Topics may include brain and behavior, health and disease, genetics and society, and conservation biology. Primary goal is to encourage students to understand better the world in which they live.

Restriction: Campuswide Honors Program students only.

(II)

BIO SCI 92. Curriculum. 1-4 Units.

Initiation, planning, and coordination of student-run courses.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 12 times.

Restriction: Biological Sciences majors only.

BIO SCI 93. From DNA to Organisms. 4 Units.

Cell biology, biochemistry, genetics, and the biology of organ systems. Covers concepts of building blocks (nucleotides, amino acids, and cells) and of information flow (DNA to proteins, receptors to nuclei, the blood to distant organs, and DNA to offspring). Course may be offered online.

Restriction: BIO SCI 93 may not be taken for credit if taken after BIO SCI 97 or BIO SCI 98.

(II)

BIO SCI 94. From Organisms to Ecosystems. 4 Units.

Patterns of diversity, ecology, and evolutionary biology. Emphasis is on the Tree of Life and how its members are distributed and interact.

Corequisite: No credit for Bio 1A if taken after Bio 94

Prerequisite: BIO SCI 93. BIO SCI 93 with a grade of C- or better.

Restriction: BIO SCI 1A may not be taken for credit if taken after BIO SCI 94.

(II)

BIO SCI 97. Genetics. 4 Units.

Introduction to genetics. Basic features of replication and expression of DNA, cell division, and gene transmission. Recombination and mutation in diploid organisms.

Prerequisite: BIO SCI 94. BIO SCI 94 with a grade of C- or better.

Restriction: Biological Sciences, Pharmaceutical Sciences, Public Health Sciences, Biomedical Engineering: Premedical, and Nursing Science majors have first consideration for enrollment.

BIO SCI 98. Biochemistry. 4 Units.

Structure and properties of proteins; major biochemical pathways and mechanisms for their control.

Prerequisite: BIO SCI 97. BIO SCI 97 with a grade of C- or better.

Prerequisite or corequisite: CHEM 51B or CHEM 52B.

Restriction: Biological Sciences, Pharmaceutical Sciences, Public Health Sciences, Biomedical Engineering: Premedical, and Nursing Science majors have first consideration for enrollment.

BIO SCI 99. Molecular Biology. 4 Units.

Biochemistry and replication of nucleic acids; molecular genetics; protein biosynthesis; genetic code; regulation of expression of genetic information; biochemical evolution.

Prerequisite: BIO SCI 98.

Restriction: Biological Sciences, Pharmaceutical Sciences, Public Health Sciences, Biomedical Engineering: Premedical, and Nursing Science majors have first consideration for enrollment.

BIO SCI 100. Scientific Writing. 3 Units.

Designed to give an overview of the basic aspects of scientific writing relevant to reporting research in the Biological Sciences.

Prerequisite: BIO SCI 99. Prerequisite or corequisite: BIO SCI 194S.

Grading Option: Pass/no pass only.

Restriction: Biological Sciences, Pharmaceutical Sciences, and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BIO SCI 101. California Teach 2: Middle School Science and Mathematics Teaching. 3 Units.

Second in a series for students interested in becoming middle or high school teachers of mathematics or science. Students gain an understanding of effective, research-based teaching strategies for grades 6-8. Includes supervised field experience in a middle school classroom.

Prerequisite: PHY SCI 5.

Same as PHY SCI 105.

Restriction: School of Physical Sciences, School of Biological Sciences, School of Information and Computer Sciences, and School of Engineering majors have first consideration for enrollment.

BIO SCI 102. California Teach 3: High School Science and Mathematics Teaching. 2 Units.

Capstone of a series of three seminars for students interested in becoming secondary mathematics or science teachers. Meets six times for students to understand effective, research-based teaching strategies. Includes an opportunity to experience teaching in a high school.

Prerequisite: (PHY SCI 5 or BIO SCI 14) and (PHY SCI 105 or BIO SCI 101).

Same as PHY SCI 106.

Restriction: School of Physical Sciences, School of Biological Sciences, School of Information and Computer Sciences, and School of Engineering majors have first consideration for enrollment.

BIO SCI D103. Cell Biology. 4 Units.

Analysis of the basic structure and function of animal cells, with an emphasis on the regulation of cellular processes. The basic features of membranes, cellular compartmentalization, protein trafficking, vesicular transport, cytoskeleton, adhesion, signal transduction, and cell cycle are covered.

Prerequisite: BIO SCI 99.

Overlaps with BIO SCI 107.

BIO SCI D104. Developmental Biology. 4 Units.

Cellular and molecular analysis of how a fertilized egg develops into an organism consisting of complex structures such as the eye, arms, and brain. Emphasis is on the key concepts of developmental processes underlying pattern formation, growth, and regeneration.

Prerequisite: Prerequisite or corequisite: BIO SCI D103.

Overlaps with BIO SCI 108.

BIO SCI D105. Cell, Developmental, and Molecular Biology of Plants . 4 Units.

Emphasizes the special features of plant cells and plant development as compared to animals. Two central topics: Plants' ability to fuel our planet through photosynthesis, and the interactions of plants with microorganisms in making nitrogen available to other life forms.

Prerequisite: BIO SCI 99.

BIO SCI E106. Processes in Ecology and Evolution. 4 Units.

An in-depth study of the mechanisms that drive evolution and ecology including: natural selection, mutation, genetic drift, speciation, extinction, life history patterns, population dynamics, ecosystem and community structure, predator-prey and host pathogen interactions, and social behavior.

Prerequisite: BIO SCI 94.

Overlaps with BIO SCI 96.

Restriction: May be used as a course repeat of BIO SCI 96.

BIO SCI E106L. Habitats and Organisms. 4 Units.

Introduces students to local habitats and organisms through required field trips and applies ecological and evolutionary principles from BIO SCI E106. Students also explore related literature.

Corequisite: BIO SCI 100 and BIO SCI E106.

Prerequisite: BIO SCI 100 and BIO SCI E106 and BIO SCI 194S.

Restriction: BIO SCI E106L may not be taken for credit concurrently with or after taking BIO SCI E166L. Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI E107. Seminar in Ecology and Evolutionary Biology. 2-12 Units.

Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.

Grading Option: Pass/no pass only.

Restriction: Ecology and Evolutionary Biology majors only. Upper-division students only.

Concurrent with ECO EVO 201.

BIO SCI 108. Research Methods. 4 Units.

Explores tools of inquiry for developing and implementing science research projects. Students undertake independent projects requiring data collection, analysis, and modeling, and the organization and presentation of results. Additional topics include ethical issues and role of scientific literature.

Prerequisite: BIO SCI 14 or PHY SCI 5.

Same as PHYSICS 193, CHEM 193.

BIO SCI E109. Human Physiology. 4 Units.

Functional features of the major organ systems in the human body. Emphasis on homeostasis and the interactions of organ systems in health and disease. (Discussion of behavior and brain function deferred to Biological Sciences N110.).

Prerequisite: BIO SCI 99.

Overlaps with PHRMSCI 120.

BIO SCI N110. Neurobiology and Behavior. 4 Units.

Consideration of the evolution of behavior, including ethological and psychological aspects and analysis of neuroanatomical, neurochemical, neurophysiological, and neuroendocrine systems underlying basic behavioral processes.

Prerequisite: Prerequisite or corequisite: BIO SCI 99.

BIO SCI D111L. Developmental and Cell Biology Laboratory. 4 Units.

Students study the division of cells, isolate cellular organelles (chloroplasts, mitochondria, nuclei), and follow changes in cells undergoing programmed cell death. Development is demonstrated in experiments showing cooperation of individual cells in forming a multicellular organism.

Corequisite: BIO SCI D103 or BIO SCI D104 or BIO SCI D105

Prerequisite: BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100 and (BIO SCI D103 or BIO SCI D104 or BIO SCI D105).

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI E112L. Physiology Laboratory. 3 Units.

Laboratory with a focus on the whole organism and its organ systems. Examples of structure-function relationships will be drawn from both animal and human physiology. Cellular and molecular aspects will be introduced as required.

Prerequisite: BIO SCI 194S and (BIO SCI E109 or (BME 120 and BME 121)). Prerequisite or corequisite: BIO SCI 100.

Overlaps with PHRMSCI 120L.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI N112A. Neuroscience: Fundamental Concepts and Current Applications. 3 Units.

In-depth exploration of the intellectual tools used to create, advance, and disseminate knowledge about the nervous system. Develops analytical, reasoning, and communication skills by exploring fundamental issues of data interpretation in cellular, molecular, systems, and behavioral analyses of brain function.

Prerequisite: BIO SCI N110.

BIO SCI N112B. Neuroscience: Fundamental Concepts and Current Applications. 3 Units.

In-depth exploration of the intellectual tools used to create, advance, and disseminate knowledge about the nervous system. Develops analytical, reasoning, and communication skills by exploring fundamental issues of data interpretation in cellular, molecular, systems, and behavioral analyses of brain function.

Prerequisite: BIO SCI N112A.

BIO SCI N112C. Neuroscience: Fundamental Concepts and Current Applications. 3 Units.

In-depth exploration of the intellectual tools used to create, advance, and disseminate knowledge about the nervous system. Develops analytical, reasoning, and communication skills by exploring fundamental issues of data interpretation in cellular, molecular, systems, and behavioral analyses of brain function.

Prerequisite: BIO SCI N112B.

BIO SCI D113. Genetics Majors Seminar. 1 Unit.

Genetics majors attend a weekly seminar to discuss current research techniques and career opportunities in the field. Students have the opportunity to present their own independent research.

Repeatability: May be taken for credit 2 times.

Restriction: Genetics majors only.

BIO SCI N113L. Neurobiology Laboratory. 3 Units.

Nature and actions of genes/gene products that regulate the functioning of the nervous system and its interaction with muscles. Topics include: neural control of gene expression; genetics and molecular biology of neural and neuromuscular diseases; gene therapies for neural disorders.

Prerequisite: BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100 and BIO SCI N110.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI D114. Developmental and Cell Biology Majors Seminar. 1 Unit.

Developmental and Cell Biology majors attend a weekly seminar to discuss current research techniques and career opportunities in the field. Students have the opportunity to present their own independent research.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 2 times.

Restriction: Developmental and Cell Biology majors only.

BIO SCI M114. Advanced Biochemistry. 4 Units.

Physical-chemical properties of macromolecules. Structure-function relationships in nucleic acids, protein, carbohydrates, and lipids. Integration and regulation of metabolism. Biochemistry of organs and biochemistry of diseases.

Prerequisite: BIO SCI 99.

BIO SCI M114L. Biochemistry Laboratory. 4 Units.

Properties of enzymes and the culture and isolation of mutants of microorganisms.

Prerequisite: BIO SCI 99 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI E115L. Evolution Laboratory. 4 Units.

Students perform experiments which illustrate important concepts in evolutionary biology such as natural selection, random genetic drift, inbreeding, age-specific selection, sexual selection, and phylogenetic reconstruction.

Corequisite: BIO SCI 100.

Prerequisite: BIO SCI 100 and BIO SCI 194S and BIO SCI E106.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI D116. Human Reproduction and Development PBL Course. 4 Units.

Focuses on human reproductive biology and in utero human development. Taught in a problem-based learning (PBL) format focused on the biological, social, economic, and ethical implications of specific clinical cases.

Prerequisite: BIO SCI 93 and BIO SCI 94 and BIO SCI 97 and BIO SCI 98 and BIO SCI 99.

BIO SCI M116. Advanced Molecular Biology. 4 Units.

Mechanisms of gene expression; special emphasis on regulatory events that occur in Eukaryotic organisms other than initiation of transcription. Chromatin structure and rearrangement, RNA polymerases, cis- and trans-acting elements, RNA processing, transport and stability, protein synthesis, trafficking, and turnover.

Prerequisite: BIO SCI 99 and (BIO SCI M114L or BIO SCI M116L).

BIO SCI M116L. Molecular Biology Laboratory. 4 Units.

Students perform experiments which illustrate the chemical and biological properties of nucleic acids. Emphasis is placed on recent techniques in recombinant DNA technology including gene isolation and characterization.

Prerequisite: BIO SCI 99 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI D117. Movement and Health. 4 Units.

Mechanisms of movements of molecules within and across cell membranes, cytoskeleton and cell motility, muscle contraction, and physical exercises and mind-body practices. Chemical, electromagnetic, and vital energy, and regulatory pathways in such processes. Relevance to health, diseases, and integrative medicine.

Prerequisite: BIO SCI 99.

BIO SCI E117A. Exercise Sciences Seminar. 3 Units.

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183.

BIO SCI E117B. Exercise Sciences Seminar. 3 Units.

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183.

BIO SCI E117C. Exercise Sciences Seminar. 3 Units.

Students are introduced to fundamental concepts and topics in exercise science with an emphasis on developing innovative approaches for exploring the biological response to physical activity/inactivity. Interactive course with robust discussion amongst faculty and students.

Prerequisite: BIO SCI E109 and BIO SCI E112L and BIO SCI E183.

BIO SCI E118. Ecosystem Ecology. 4 Units.

A mechanistic perspective on ecosystem processes. Covers ecosystem development, element cycling, and interactions with plants and microbes. The role of ecosystems in environmental change is also addressed.

Prerequisite: CHEM 51C.

Same as EARTHSS 164.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 264.

BIO SCI M118L. Experimental Microbiology Laboratory. 4 Units.

Introductory general microbiology designed for preprofessional biology majors. Includes microscopy, cultivation of bacteria, morphological and biochemical characterization of bacteria, microbial metabolism, growth and genetics, microorganisms and human disease, and interactions of microorganisms with the environment.

Prerequisite: BIO SCI 99 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100.

Overlaps with BIO SCI M122L.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI M119. Advanced Topics in Immunology. 4 Units.

Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.

Prerequisite: BIO SCI M121.

Restriction: Microbiology and Immunology majors have first consideration for enrollment.

BIO SCI N119. History of Neuroscience. 4 Units.

An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.

Prerequisite: BIO SCI 35 or BIO SCI N110 or PSY BEH P115D or (PSYCH 9A and PSYCH 9B and PSYCH 9C).

Restriction: Upper-division students only.

Concurrent with NEURBIO 255.

BIO SCI E120. Marine Biology . 4 Units.

Examines how the physical environment influences biology of marine life, the relationship between structure and function in adaptation to marine environments, and anthropogenic impacts on marine life. A field trip is required.

Prerequisite: BIO SCI 94.

BIO SCI M120. Signal Transduction in Mammalian Cells. 4 Units.

Introduction to major biochemical pathways that transmit information from extracellular cues into changes in cell behavior. Focuses on kinases, phosphatases, G proteins, second messengers, and protein-protein interactions. Includes discussion of primary research articles and experimental techniques.

Prerequisite: BIO SCI D103.

BIO SCI N120. Human Biology. 4 Units.

Human Biology provides an in-depth look at cutting edge topics in physiology and epidemiology as they relate to global issues of ethics, anthropology, and socioeconomics, providing the student an understanding of human health beyond basic biological function.

Prerequisite: BIO SCI 99.

BIO SCI D121. Stem Cell Biology. 4 Units.

Introduces upper-level undergraduate students to stem cell biology. Include the basic biology of stem cells, potential applications of stem cells, and the ethical, legal, and moral issues associated with human stem cell research.

Prerequisite: BIO SCI D103 and BIO SCI D104.

BIO SCI M121. Immunology with Hematology. 4 Units.

Antibodies, antigens, antigen-antibody reactions, cells and tissues of lymphoreticular and hematopoietic systems, and individual and collective components of cell-mediated and humoral immune response.

Prerequisite: BIO SCI 98.

BIO SCI M121L. Advanced Immunology Laboratory. 4 Units.

Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, immunofluorescent staining assays.

Prerequisite: BIO SCI M116L and BIO SCI M121 and BIO SCI 194S.
Prerequisite or corequisite: BIO SCI 100.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

Concurrent with MOL BIO 221L.

(Ib)

BIO SCI M122. General Microbiology. 4 Units.

Comparative metabolism of small molecules and cell structure and relationship to microbial classification. Macromolecule synthesis and regulation, sporulation, cell division, growth, and effect of antibiotics.

Prerequisite: BIO SCI 98.

BIO SCI M122L. Advanced Microbiology Laboratory. 4 Units.

Advanced course featuring selective isolation of a wide variety of microbial types. Identification and characterization of organisms by morphological, nutritional, and biochemical approaches. Medical, industrial, and research applications.

Prerequisite: BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100 and (BIO SCI M122 or BIO SCI M132).

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI M123. Introduction to Computational Biology. 4 Units.

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Prerequisite: MATH 2D or MATH 2J or MATH 7 or STATS 7 or STATS 8.

Same as COMPSCI 183.

Concurrent with MOL BIO 223.

BIO SCI D124. Biology of Integrative Medicine. 4 Units.

Presentation of biological principles and the latest clinical and basic research on complementary and alternative therapies (e.g., mind-body medicine, energy medicine, herbal medicine, acupuncture, manipulative therapies) and their integration with Western medicine. Lectures supplemented by demonstrations and hands-on learning sessions.

Overlaps with BIO SCI 9J, BIO SCI 9N.

BIO SCI E124. Infectious Disease Dynamics. 4 Units.

Discusses how the dynamical interactions between pathogens and the immune system can give rise to a variety of outcomes which include clearance of infection, persistent infection, escape from immune responses, and pathology.

Prerequisite: BIO SCI 96 or BIO SCI 97 or BIO SCI E106.

BIO SCI M124A. Virology. 4 Units.

Replication of viruses in populations, animals, and the host cell. The effects of viral infection on populations, individuals, and specific molecular effects on the target cell. Role of viral infections in cancer and degenerative diseases.

Prerequisite: BIO SCI 99.

Restriction: Biological Sciences majors only.

BIO SCI M124B. Viral Pathogenesis and Immunity. 4 Units.

The mechanisms of viral pathogenesis and of host resistance to viruses are explored in detail. HIV-1 and Influenza-A are used as examples. In each case, viral replication, cytopathic effects, immune response, and viral evasion are discussed.

Prerequisite: BIO SCI M121 or BIO SCI M124A. Recommended: BIO SCI M122.

BIO SCI M124L. Virus Engineering Laboratory. 4 Units.

An advanced laboratory for undergraduates who have completed a virology lecture class. Students learn to engineer recombinant viruses and express genes in mouse tissue.

Prerequisite: BIO SCI 194S and BIO SCI M116L and (BIO SCI M124A or BIO SCI M124B). Prerequisite or corequisite: BIO SCI 100.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI D125. The Biology and Genetics of Cancer. 4 Units.

Cancer is a major field in modern biology. Topics discussed include genetics, cellular oncogenes, tumor suppressor genes, and molecular targets for diagnosis and therapy.

Prerequisite: BIO SCI 99.

BIO SCI M125. Molecular Biology of Cancer. 4 Units.

Molecular mechanisms of carcinogenesis. Consideration of transformation by DNA tumor viruses, RNA tumor viruses, and chemical carcinogens.

Prerequisite: BIO SCI 99.

BIO SCI M126. Learning to Read Primary Literature in Biochemistry and Molecular Biology. 4 Units.

An introduction to primary literature focusing on methods to approach, understand, and analyze scientific papers.

Prerequisite: BIO SCI 99.

BIO SCI E127. Physiological Plant Ecology. 4 Units.

An examination of the interactions between plants and their environment. Emphasis on the underlying physiological mechanisms of plant function, adaptations and responses to stress, and the basis of the distribution of plants and plant assemblages across the landscape.

Prerequisite: (EARTHSS 51 or EARTHSS 60A) and (EARTHSS 60C or BIO SCI E106).

Same as EARTHSS 168.

Restriction: Earth System Science and Environmental Science majors have first consideration for enrollment.

Concurrent with EARTHSS 268.

BIO SCI M127L. Virology and Immunology Laboratory. 5 Units.

Introductory laboratory course in virology and immunology designed for biology majors. Curriculum includes plasmid preparation, plasmid characterization, microscopy, cell culture, transfection and infection of cells, cell counting, plaque assays, ELISA, Western blot, mixed lymphocyte reactions.

Corequisite: BIO SCI M121 or BIO SCI M124A.

Prerequisite: BIO SCI 99 and BIO SCI 194S and BIO SCI M116L.

Prerequisite or corequisite: BIO SCI 100.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI D129. Biotechnology and Plant Breeding. 4 Units.

Conventional plant breeding techniques, their limitations, and supplementations through modern biotechnology. Includes cloning, cell transformation (genetic engineering), and cell fusion. Crop improvement, state of the art in animal and human systems, and the impact of gene technology of society.

Prerequisite: BIO SCI 94.

BIO SCI M129. Discovery of the New RNA World. 4 Units.

Focus is on RNAs role in catalysis and regulation. Topics include non-coding RNAs function in normal cells (regulation of cell homeostasis, development, and differentiation) and in disease (cancer, viral infection).

Prerequisite: BIO SCI 99 and (BIO SCI D103 or BIO SCI D104).

BIO SCI D130. Photomedicine. 4 Units.

Studies the use of optical and engineering-based systems (laser-based) for diagnosis, treating diseases, manipulation of cells and cell function. Physical, optical, and electro-optical principles are explored regarding molecular, cellular, organ, and organism applications.

(Design units: 0)

Prerequisite: PHYSICS 3C or PHYSICS 7D.

Same as BME 135.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

BIO SCI E130. Forensic Genetics. 4 Units.

Covers techniques currently used for forensic identification and paternity testing. Topics include STR, Y-STR and mitochondrial DNA tests, database searches, mixtures, allelic drop out, likelihood ratios, laboratory errors and the interaction of science and the legal system.

Prerequisite: BIO SCI 93 and BIO SCI 94.

BIO SCI M130L. Advanced Molecular Lab Techniques. 6 Units.

Discovery-driven experimentation in the fields of molecular biology, biochemistry, and cell biology. Also involves other aspects of the lab experience including group discussion of results, scientific paper analysis, and student presentations.

Prerequisite: BIO SCI 100 and BIO SCI 194S and (BIO SCI D111L or BIO SCI M114L or BIO SCI M116L or BIO SCI M118L).

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI E131L. Image Analysis in Biological Research. 4 Units.

Introduction to scientific image analysis including techniques such as high-speed, time-lapse, thermal imaging, and flow visualization. Students will make movies using cameras, edit and analyze images using computers, and do a writing project.

Prerequisite: (BIO SCI E106 or BIO SCI E109) and BIO SCI 194S.

Prerequisite or corequisite: BIO SCI 100.

(Ib)

BIO SCI D132. Introduction to Personalized Medicine. 4 Units.

Introduction to the use of genomic techniques for the study of individual genomes and transcriptomes in healthy and diseased samples. Covers GWAS, current sequencing techniques, cancer genomics, and biomarker discovery.

Prerequisite: BIO SCI 99.

BIO SCI D133. Advances in Regenerative Medicine. 4 Units.

Introduces the rapidly growing field of regenerative medicine. New developments in stem cell research are discussed. Cellular, molecular, and engineering aspects of stem cell-based organ replacement strategies are examined, with emphasis on specific regenerative therapies.

Prerequisite: BIO SCI D103.

Overlaps with BIO SCI N172.

BIO SCI M133. High-Resolution Structures: NMR and X-ray. 4 Units.

Basic principles of magnetic resonance and x-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B.

Restriction: Upper-division students only.

Concurrent with MOL BIO 211.

BIO SCI D135. Cell Biology of Human Disease. 4 Units.

Builds on prior biology courses about the underlying cell biological mechanisms and recent treatment advances of several model diseases. Emphasizes literature searches, reading primary literature, and student group work.

Prerequisite: BIO SCI D103.

BIO SCI E135. Molecular Evolution. 4 Units.

Introduction to the study of evolutionary change in genes and DNA sequences. Combines study of molecular biology with the study of evolution. Molecular evolution has application to many disciplines, including molecular biology, virology, systematics, and the origin of life.

Prerequisite: BIO SCI E106.

BIO SCI D136. Human Anatomy. 4 Units.

Presents a systems approach to the analysis of human structure. Molecular, cellular, tissue, organ, and organ system levels of structure and organization are integrated throughout.

Prerequisite: BIO SCI 99.

BIO SCI E136. The Physiology of Human Nutrition . 4 Units.

Examines the biochemical basis of energy metabolism, physiological processes in digestion and uptake, and the biochemical transformation of carbohydrates, fats, and proteins in the human body. The emphasis is on expanding the students' understanding of physiology.

Prerequisite: BIO SCI 98 and BIO SCI E109.

BIO SCI D137. Eukaryotic and Human Genetics. 4 Units.

Structure and function of genes in eukaryotes with emphasis on special problems of genetic studies in humans. Molecular methods of genetic analysis and gene transfer are discussed. Practical applications and ethical and social issues raised by genetic studies are addressed.

Prerequisite: BIO SCI 97. Recommended: BIO SCI 99.

BIO SCI E137. Genetics of Complex Traits. 4 Units.

Many ecologically important traits (e.g., size, age at sexual maturity) and clinical conditions are rooted in the interaction of multiple genetic loci with the environment. Theoretical and practical approaches to dissecting the genetic architecture of complex traits are explored.

Prerequisite: BIO SCI 97.

BIO SCI M137. Microbial Genetics. 4 Units.

Basic principles of microbial genetics are presented as lectures for the first half of the course. The second half is devoted to applications of these principles and requires reading review and original research papers and interactions with guest lecturers.

Corequisite: Recommended: BIO SCI 99.

Prerequisite: BIO SCI 97 and BIO SCI 98.

BIO SCI E138. Comparative Animal Physiology. 4 Units.

Maintenance aspects of physiology: water balance; feeding and digestion; metabolism; respiration and circulation.

Prerequisite: BIO SCI E109.

BIO SCI E139. Animal Sensing and Motion. 4 Units.

Explores how animals sense and respond to their environment. Includes a consideration of sensory systems, muscle physiology, and biomechanics to understand the mechanistic basis of animal behavior.

Prerequisite: BIO SCI E109.

BIO SCI E140. Evolution and the Environment. 4 Units.

Explores basic topics in ecology and evolutionary biology and applications to agriculture, conservation, environmental issues, and public health. Format involves discussion of scientific journal articles and other readings, with focus on learning to evaluate scientific evidence.

Prerequisite: Prerequisite or corequisite: BIO SCI E106.

BIO SCI E142W. Writing/Philosophy of Biology. 4 Units.

Philosophy of biology, e.g., scientific method in biology, the structure of evolutionary theory, teleology, ethics, and evolution. Course work includes one 4,000-word and four 1,000-word papers.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as LPS 142W, PHILOS 142W.

Restriction: Juniors only.

(Ib)**BIO SCI M143. Human Parasitology. 4 Units.**

Introduction to human animal-parasitic diseases including worms and protozoan infections.

Prerequisite: BIO SCI 99.

BIO SCI M144. Cell Organelles and Membranes. 4 Units.

Structure, function, and biogenesis of biological membranes and membrane-bound organelles; protein trafficking and transmembrane signaling.

Prerequisite: BIO SCI D103.

BIO SCI D145. Genomics, Development, and Medicine. 4 Units.

Focuses on the applications of genomics and proteomics to problems in genetics, cell, and developmental biology. Students will gain a comprehensive understanding of the techniques currently used for genomics analysis and how best to apply these tools to solve problems.

Prerequisite: BIO SCI 99.

BIO SCI E145. Animal Coloration and Vision. 4 Units.

Physiological and behavioral mechanisms of color production and vision including crypsis, mimicry, aposematism, masquerade, sexual dimorphism, and predator-prey interactions through the lens of signals, receivers, and receptors; color and polarization vision in mate choice and visual adaptations to aquatic environments.

Prerequisite: Prerequisite or corequisite: BIO SCI E106.

BIO SCI N147. Hearing and the Brain. 4 Units.

An overview of brain mechanisms of hearing, including perception of simple sounds, speech, and music. Begins with sound itself, and looks at processing by the ear, auditory pathways, auditory cortex, and beyond. Also auditory development, learning, and clinical issues.

Prerequisite: PSYCH 160A or BIO SCI N110.

Same as PSYCH 161H.

Restriction: Psychology majors have first consideration for enrollment.

BIO SCI D148. Development and Disease. 4 Units.

Development of animal embryos from a fertilized egg to a functioning organism. Topics include reproduction, body-axis formation, growth and differentiation of embryonic cells, and organogenesis, with an emphasis on congenital birth defects and diseases that disrupt these processes.

Prerequisite: BIO SCI D103.

BIO SCI E150. Conservation Biology. 4 Units.

Genetic and ecological issues in conservation biology, including effects of human population growth, the value of biodiversity, conservation genetics, demography, metapopulation dynamics, community and ecosystem processes, species invasions, global climate change, and reserve design and management.

Prerequisite: BIO SCI E106.

BIO SCI N150. Brain Dysfunction and Repair. 4 Units.

Introduction to the disruptions in brain function that underlie disorders such as Alzheimer's disease, Parkinsonism, schizophrenia, and depression, and the basis for drug therapies. The brain's ability to repair itself after damage and the pros and cons of that repair.

Prerequisite: BIO SCI N110.

Restriction: Neurobiology majors only.

BIO SCI E151. Population Dynamics in Ecology, Epidemiology, and Medicine. 4 Units.

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Prerequisite: BIO SCI 94 or BIO SCI E106.

Concurrent with ECO EVO 251.

BIO SCI N151. Neurobiology of Aging. 4 Units.

Multidisciplinary overview of the functional capacity of the aging brain, its structural changes and the mechanisms underlying function and structure. Emphasis will be on successful brain aging and those mechanisms which lead to the development of Alzheimer's disease.

Prerequisite: BIO SCI N110.

BIO SCI N152. Developmental Neurobiology. 4 Units.

The development of the nervous system is discussed with emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Topics include neural induction, specification, migration and death; axon growth, and neural circuit formation.

Prerequisite: BIO SCI 93.

BIO SCI D153. Molecular and Cellular Basis of Disease. 4 Units.

Provides students with examples of how human disease is usually manifested at the cellular level. The roles of specific molecules and organelles are discussed where their roles in the disease process are understood.

Prerequisite: BIO SCI D103.

BIO SCI E153. Functional and Structural Evolutionary Genomics. 4 Units.

Function and organization of genomes analyzed from an evolutionary perspective. Review of some of the most recent experimental approaches in genome analysis and comparative genomics. Relevant software to analyze DNA and expression data is used.

Prerequisite: BIO SCI 97. Recommended: BIO SCI E135 or BIO SCI E168 and (BIO SCI 7 or STATS 7 or MATH 7).

Concurrent with ECO EVO 253.

BIO SCI N153. Neuropharmacology. 4 Units.

Survey of neurotransmitter systems, focusing on how transmitters are made, how they interact with their receptors, and how drugs can influence these processes to alter neural function and behavior.

Prerequisite: BIO SCI N110.

BIO SCI D154. Cell Biology. 4 Units.

An advanced, integrated view of cell biology. Topics include the cell cycle, the cytoskeleton, the extracellular matrix, signal transduction, the cellular basis of development, and the cell biology of cancer.

Prerequisite: BIO SCI D103 or BIO SCI 107.

Concurrent with DEV BIO 231B.

BIO SCI E154. Genetics and Human History. 4 Units.

Explores topics in human health/history from an evolutionary perspective, with emphasis on genetics. Topics include the relationship between genetics and human disease as an evolutionary question, and how modern genetic techniques are used to study the history of human populations.

Prerequisite: Prerequisite or corequisite: BIO SCI E106.

BIO SCI N154. Molecular Neurobiology. 4 Units.

Nature and actions of genes/gene products that regulate the functioning of the nervous system and its interaction with muscles. Topics include: neural control of gene expression; genetics and molecular biology of neural and neuromuscular diseases; gene therapies for neural disorders.

Prerequisite: BIO SCI N110.

BIO SCI E155. Physiology in Extreme Environments. 4 Units.

An in-depth look at the physiological mechanisms that allow animals, including humans, to be physically active and survive in extreme environments. Physiological responses to high altitude, diving, microgravity, deserts, and extreme cold are examined.

Prerequisite: BIO SCI E109 and PHYSICS 3A.

BIO SCI N155. Wiring the Developing Brain. 4 Units.

The development of the nervous system is discussed with particular emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Basic neurodevelopmental processes are discussed and correlated with normal brain function/dysfunction.

Prerequisite: BIO SCI N110 or BIO SCI N152.

BIO SCI N156. Molecular Mechanisms of Memory. 4 Units.

Current topics focused on understanding the molecular mechanisms that contribute to synaptic plasticity, learning, and memory. Primary literature is used to explore the variety of molecular mechanisms underlying these processes.

Prerequisite: BIO SCI N110.

BIO SCI E157. Comparative Vertebrate Anatomy. 4 Units.

Structure and evolution of the major organ systems in vertebrates, from fish to mammals.

Prerequisite: BIO SCI 94.

BIO SCI N158. Neurobiology of Learning and Memory. 4 Units.

How the brain and behavior change as a result of experience, with an emphasis on identifying the neurochemical processes through which memory is stored and the parts of the brain that are involved.

Prerequisite: BIO SCI 35 or BIO SCI N110.

Same as PSYCH 162A.

Restriction: Psychology majors have first consideration for enrollment.

BIO SCI N159. Animal Behavior. 4 Units.

Explores why animals behave the way they do from evolutionary/mechanistic perspectives. Considers selective pressures and evolutionary constraints that shape animal behavior and the underlying neural and hormonal mechanisms by using examples such as why dogs bark, why some birds migrate.

Prerequisite: BIO SCI N110.

BIO SCI E160. Biology of Birds. 4 Units.

A thorough introduction to the biology of birds, covering topics ranging from avian anatomy and physiology to behavior, natural history, ecology, genetics, evolution, systematics, and conservation. Examples from both local and global avifauna.

Corequisite: BIO SCI E161L.

Prerequisite: BIO SCI 94.

BIO SCI M160. Structure-Function Relationships of Integral Membrane Proteins. 4 Units.

Integral membrane proteins such as voltage and ligand-gated ion channels, water channels, pumps, cotransporters, and receptors (e.g., GPCRs). The emphasis is on the relationship between atomic structure and the functional properties of these proteins.

Prerequisite: BIO SCI 98 and BIO SCI 99. BIO SCI 98 with a grade of B or better. BIO SCI 99 with a grade of B or better.

Concurrent with MOL BIO 255.

BIO SCI N160. Language and the Brain . 4 Units.

Research analysis on biological bases of human linguistic capacity. Development, focusing on hemispheric specialization, plasticity; localization of specific linguistic functions in adults, with emphasis on study of aphasia; relation of linguistic capacity to general cognitive capacity, considering research on retardation.

Prerequisite: BIO SCI 35 or BIO SCI N110.

Same as PSYCH 161, LINGUIS 158.

Restriction: Psychology and Biology majors have first consideration for enrollment.

BIO SCI E161L. Biology of Birds Lab. 4 Units.

The companion to Biology of Birds (E160). Consists primarily of field trips to identify local birds and study avian natural history. Students must provide their own transportation to field sites, some with entrance fees. Students must have field binoculars.

Corequisite: BIO SCI E160.

Prerequisite: BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)**BIO SCI E163. Environmental Microbiology. 4 Units.**

Establishes a fundamental understanding of microbes living in the environment, including their distribution, diversity, and biochemistry, and discusses how they attribute to global biogeochemical cycles.

Prerequisite: (EARTHSS 53 or EARTHSS 60A) and (EARTHSS 60C or BIO SCI E106).

Same as EARTHSS 170.

Concurrent with EARTHSS 270.

BIO SCI N164. Functional Neuroanatomy. 4 Units.

How neuroscience uses tools of many disciplines, from imaging to behavior, to develop and test hypotheses about functions of specific parts of the brain. Basic organization of nerve cells/vertebrate nervous system; methods of visualizing nerve cells; neural connections/activity patterns.

Prerequisite: BIO SCI N110.

BIO SCI N165. Brain Disorders and Behavior. 4 Units.

Examines the localization of human brain functions and the effects of neurological disorders on psychological functions such as perception, motor control, language, memory and decision-making.

Prerequisite: PSYCH 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or BIO SCI 35 or BIO SCI N110.

Same as PSYCH 160D.

Restriction: Psychology majors have first consideration for enrollment.

BIO SCI E166W. Field Methods in Ecology. 6 Units.

Field studies of major concepts in plant and animal ecology, with emphasis on experimental design, field sampling methods, statistical analysis, and scientific writing. An independent project and two field trips are required.

Prerequisite: BIO SCI 194S and BIO SCI E106. Prerequisite or corequisite: BIO SCI 100. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

BIO SCI N166. Introduction to Cognitive Neuroscience. 4 Units.

Introduction to the neural basis of human perceptual, motor, and cognitive abilities. Topics include sensory perception, motor control, memory, language, attention, emotion, frontal lobe function, functional brain imaging, and neuropsychological disorders.

Prerequisite: Psych 7A or (PSYCH 9A and PSYCH 9B) or PSY BEH 9 or (PSY BEH 11A and PSY BEH 11B) or Bio Sci 35 or Bio Sci N110.

Same as PSY BEH 192L, PSYCH 160A.

Restriction: Psychology majors have first consideration for enrollment.

BIO SCI E168. Evolution. 4 Units.

An integrative treatment of evolutionary biology that covers evolutionary processes, basic research methods, and the history of life.

Prerequisite: BIO SCI E106.

BIO SCI E170. Mechanical Physiology. 4 Units.

Explores the mechanics of animal physiology. Basic biomechanical principles are introduced and illustrated in a variety of physiological systems. Topics include the fluid and structural mechanics of muscles, skeletons, circulation, insect flight, biomaterials, and fish swimming.

Prerequisite: BIO SCI E109.

BIO SCI E172. Plant Diversity in a Changing World. 4 Units.

Investigation of plant diversity in California and throughout the world, including basic systematic concepts, an introduction to major groups of flowering plants, and the effects of global biological change on plant diversity.

Prerequisite: BIO SCI E106.

Concurrent with ECO EVO 272.

BIO SCI E172L. Plant Systematics Laboratory. 4 Units.

Diversity of flowering plants is investigated in the laboratory and field. Familiarity with flowering plant families, particularly those prominent in the California flora, is emphasized.

Prerequisite: BIO SCI E106 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100 and BIO SCI E172.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

Concurrent with ECO EVO 273.

(Ib)

BIO SCI N172. Regenerative Neurobiology. 4 Units.

Explores the field of regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders examined. Opportunities, challenges, and implications of this research also discussed.

Prerequisite: BIO SCI N110.

Overlaps with BIO SCI 144.

(II)

BIO SCI E174. Behavioral Ecology. 4 Units.

Animal behavior as an evolutionary solution to problems encountered during an animal's life cycle. Includes a broad comparative approach to communication, social behavior, habitat selection, and food finding.

Prerequisite: BIO SCI E106.

BIO SCI E175. Restoration Ecology. 4 Units.

Theoretical and practical aspects of habitat restoration and mitigation. Design, implementation, and monitoring of restoration projects in local habitats. Collection of seed and cuttings, planting and maintenance presented. Control of exotics in natural areas discussed. Environmental ethics of restoration emphasized.

Prerequisite: Prerequisite or corequisite: BIO SCI E106.

BIO SCI E176. Evolution of Infectious Disease. 4 Units.

Introduction to the major human pathogens, and the ecological and evolutionary processes affecting their impact on public health. Topics include the evolution of drug resistance, problems in vaccine development, diseases emerging from animals, and bioterrorism.

Prerequisite: BIO SCI 94.

BIO SCI E178. Ocean Ecology. 4 Units.

Examines the relationships between physical processes in the ocean, biological productivity, and the exploitation of ocean resources by high-trophic-level predators, including humans. Discusses open ocean ecosystems, intertidal and benthic regions of the world ocean.

Prerequisite: BIO SCI 94.

BIO SCI E179. Limnology and Freshwater Biology. 4 Units.

Biology of freshwater environments: lakes, ponds, rivers, their biota, and the factors which influence distribution of organisms.

Prerequisite: BIO SCI 94.

BIO SCI E179L. Field Freshwater Ecology. 4 Units.

Analytical techniques for common water-quality variables of lakes, streams, rivers. Benthic fauna, vertebrates and invertebrates, algae, and aquatic plants. Emphasis on field methods with an experimental approach; laboratory exercises. Field trips to marshes, vernal pools, rivers and streams.

Prerequisite: BIO SCI E179 and BIO SCI 194S. Prerequisite or corequisite: BIO SCI 100.

Restriction: Students who require this lab for completion of their degree have first consideration for enrollment.

(Ib)

BIO SCI E181. Conservation in the American West. 4 Units.

Critical examination of contemporary conservation issues in the American West, with particular attention to water in California, grazing on public lands, and species decline and extinctions.

Prerequisite: BIO SCI E106.

BIO SCI E182. Mediterranean Ecosystems: Biodiversity and Conservation. 4 Units.

Biodiversity, history of human impacts, and conservation efforts are examined in the five Mediterranean-type ecosystems. Remaining natural habitat, approaches to ecological habitat restoration, control of exotic species, and predicted consequences of global climate change are described. Field trip required.

Prerequisite: BIO SCI 94.

BIO SCI N182. Vision. 4 Units.

Visual perception and the anatomy and physiology of the visual system. Topics include: the retina and the visual pathway; visual sensitivity; color vision; spatial vision; motion perception; and the development of the visual system.

Same as PSYCH 131A.
Overlaps with PSYCH 130A.

Restriction: Upper-division students only. Psychology majors have first consideration for enrollment.

BIO SCI E183. Exercise Physiology. 4 Units.

Focus upon critical topics in the area of exercise biology using the comparative physiological approach. Specifically examine the physiological factors that limit the capacity of an organism to sustain high levels of aerobic metabolism.

Prerequisite: BIO SCI 98 and BIO SCI E109.

BIO SCI E184. Ecology and Diversity of Insects. 4 Units.

Insects—representing two-thirds of all species—play fundamental roles in human health, agriculture, and natural ecosystems. Topics include insect morphology, development, physiology, taxonomy, ecology, and insects in human affairs. Lecture includes interactive demonstrations and an optional weekend trip.

Prerequisite: BIO SCI E106.

BIO SCI E186. Population and Community Ecology. 4 Units.

Population structure, function, development, and evolution. Topics include population structure, population growth and regulation, metapopulations, predation, competition, species diversity, ecosystem function, macroecology, and island biogeography. Offered every other Winter.

Prerequisite: BIO SCI E106.

BIO SCI E188. Introduction to Insect Physiology. 4 Units.

Physiology of insects. Insect respiration, digestion, excretion, and neurobiology, including sensory systems and effectors.

Prerequisite: BIO SCI E109.

BIO SCI E189. Environmental Ethics. 4 Units.

History of evolution of environmental ethics in America. Management problems in national parks, wilderness areas, wild and scenic rivers, national forests. Contemporary and historical aspects/contributors to the field. Mitigation, endangered species, habitat restoration, biodiversity, and environmental activism. Field trips required.

Restriction: Upper-division students only.

BIO SCI 190. Transfer Student Seminar. 1 Unit.

Weekly meetings consisting of presentations by faculty, professional staff, and New Student Peer Academic Advisors provide information about the School of Biological Sciences, campus resources, and special programs/opportunities.

Grading Option: Pass/no pass only.

Restriction: New transfer students only.

BIO SCI D190. Topics in Developmental and Cell Biology. 2-4 Units.

Studies in selected areas of developmental and cell biology.

Prerequisite: BIO SCI D103.

Repeatability: May be taken for credit 3 times as topics vary.

Restriction: School of Biological Sciences majors only. Upper-division students only.

BIO SCI E190. Topics in Ecology and Evolutionary Biology. 2-4 Units.

Studies in selected areas of ecology and evolutionary biology.

Prerequisite: BIO SCI E106.

Repeatability: May be taken for credit 3 times as topics vary.

BIO SCI M190. Topics in Molecular Biology and Biochemistry. 2-4 Units.

Studies in selected areas of Molecular Biology and Biochemistry.

Prerequisite: BIO SCI 98.

Repeatability: May be taken for credit 3 times as topics vary.

BIO SCI N190. Topics in Neurobiology and Behavior. 2-4 Units.

Studies in selected areas of neurobiology and behavior.

Prerequisite: BIO SCI N110.

Repeatability: May be taken for credit 3 times as topics vary.

BIO SCI 191A. Senior Seminar on Global Sustainability I. 2 Units.

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations. Prepare bibliography.

Prerequisite: BIO SCI 65 and ENVIRON E20 and EARTHSS 10.

Grading Option: In progress only.

Same as SOCECOL 186A, EARTHSS 190A.

Restriction: Seniors only.

BIO SCI 191B. Senior Seminar on Global Sustainability II. 2 Units.

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations. Prepare research proposal.

Prerequisite: BIO SCI 191A or SOCECOL 186A or EARTHSS 190A.

Grading Option: In progress only.

Same as SOCECOL 186B, EARTHSS 190B.

Restriction: Seniors only.

BIO SCI 191C. Senior Seminar on Global Sustainability III. 4 Units.

Weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze forum presentations and to prepare senior research paper. Prepare/write research paper under the direction of a faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B.

Same as EARTHSS 190C, SOCECOL 186C.

Restriction: Seniors only.

BIO SCI 191CW. Writing/Senior Seminar on Global Sustainability III. 4 Units.

Students attend weekly seminar to discuss current issues in global sustainability. Weekly attendance at Global Sustainability Forum also is required. Seminar utilized to analyze Forum presentations and to prepare senior research paper. Prepare/write research paper under direction of faculty member.

Prerequisite: BIO SCI 191B or EARTHSS 190B or SOCECOL 186B.
Satisfactory completion of the Lower-Division Writing requirement.

Same as EARTHSS 190CW, SOCECOL 186CW.

Restriction: Seniors only.

(Ib)**BIO SCI 192. Tutoring in Biology. 2 Units.**

Tutoring program with Biological Sciences student peers.

Repeatability: May be taken for credit 6 times.

Restriction: Biological Sciences Peer Tutoring Program students only.

BIO SCI 194. Current Topics in Biology. 1 Unit.

A seminar designed to discuss recent research findings and experimental issues in biology.

Corequisite: BIO SCI 199.

Grading Option: Pass/no pass only.

Repeatability: Unlimited as topics vary.

BIO SCI 194S. Safety and Ethics for Research. 1 Unit.

Introduces students to the concepts, techniques, and ethics involved in biological sciences laboratory work.

Grading Option: Pass/no pass only.

BIO SCI H195A. Honors Writing for Biological Research. 4 Units.

Science writing and critical reasoning. Work, research, and writing exercises are conducted in a computer laboratory. Preliminary writing exercises and further development of Excellence in Research to a full scientific senior thesis. This forms the basis for an oral defense.

Prerequisite: BIO SCI 199. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Excellence in Research Program students only.

BIO SCI H195B. Honors Physiology. 4 Units.

Contemporary research problems in physiology using insects as model systems. Topics include digestion, osmoregulation, development, and neurobiology, including sensory systems and behavior. Participating students present papers in a journal club-style format and write short essays summarizing research findings.

Restriction: Biological Sciences Honors Program students only. Graduate students only.

BIO SCI H195C. Honors Virus Evolution. 4 Units.

Viruses infect all domains of life and have had profound consequences on the development and survival of life. Examines virus emergence and evolution in a broad context. Weekly overview is followed by student presentations and essays based on contemporary literature.

Prerequisite: BIO SCI M124A.

BIO SCI 197. Special Study in Biological Sciences. 1-5 Units.

Individualized instruction dealing with conceptual or theoretical problems in the biological sciences, rather than technical problems.

Prerequisite: BIO SCI 94 and BIO SCI 194S.

Repeatability: May be repeated for credit unlimited times.

Restriction: Maximum of 5 units (per quarter) between BIO SCI 197, BIO SCI 198, and BIO SCI 199.

BIO SCI 198. Directed Group Studies. 1-5 Units.

Small group experimental laboratory or field work performed under the direction of a faculty member.

Prerequisite: BIO SCI 94 and BIO SCI 194S.

Repeatability: May be repeated for credit unlimited times.

BIO SCI 199. Independent Study in Biological Sciences Research. 1-5 Units.

Individual experimental laboratory or field research under a professor's direction. Required for participation in the Excellence in Research Program. Further information and a booklet describing many prospective projects are available in the Biological Sciences Student Affairs Office.

Prerequisite: BIO SCI 194S.

Repeatability: Unlimited as topics vary.

Department of Developmental and Cell Biology

2212 Biological Sciences III; (949) 824-2458

<http://devcell.bio.uci.edu/>

Diane K. O'Dowd, **Department Chair**

Kavita Arora, **Department Vice Chair**

Faculty

Dritan Agalliu: Molecular, cellular, and genetic analysis of mammalian blood-brain barrier development and the role of the barrier in disease pathogenesis

Joseph Arditti (*Emeritus*): Developmental physiology of orchids

Kavita Arora: *Drosophila* development; TGF- β signal transduction; cell signaling

Pierre Baldi: Bioinformatics; computational biology

Lee Bardwell: Intracellular signaling in development and disease

Michael W. Berns: Laser microsurgery

Bruce Blumberg: Gene regulation by nuclear hormone receptors in vertebrate development physiology, and endocrine disruption

Hans R. Bode: Molecular basis of pattern formation in *Hydra*

Peter J. Bryant: Tumor-suppressor genes of *Drosophila* and humans

Susan V. Bryant: Molecular basis of limb development and regeneration

Anne Calof: Neurogenesis and neuronal differentiation

Richard D. Campbell: Morphogenesis; biology of *Hydra*; fractal geometry of biological forms

Ken W.-Y. Cho: TGF- β signaling and gene regulatory networks in development

Olivier Cinquin: Mathematical modeling of networks, systems biology

Olivier Civelli: Novel neuroactive molecules

Peter J. Donovan: Stem cell biology

Aimee L. Edinger: Cancer biology and metabolism, growth control, protein trafficking

Donald E. Fosket (*Emeritus*): Regulation of cytoskeleton formation and function

David Gardiner: Limb development and regeneration

Enrico Gratton: Live cell imaging, fluorescence spectroscopy and microscopy

Steven Gross: Force generation by molecular motors in living cells

Patrick L. Healey (*Emeritus*): Plant cellular differentiation and morphogenesis; ultrastructure and histochemistry of secretory systems; early reproductive development

Franz Hoffmann: Regeneration of cultured plant cells; somatic cell genetics

Daniel J. Knauer (*Emeritus*): Human antithrombins and related serine protease inhibitors

Stuart M. Krassner: Developmental transitions of hemoflagellates

Arthur D. Lander: Systems biology of development, pattern formation, growth control

Shin Lin: The combined use of biochemistry, cell biology, molecular biology, and molecular biophysics to study the structure and function of proteins involved in cytoskeletal/contractile functions and signal transduction in muscle and nonmuscle cells

Leslie Lock: Stem cell biology

Ulrike Luderer: Reproductive toxicology, developmental toxicology, developmental basis of ovarian toxicity and ovarian cancer

Grant MacGregor: Mouse reproduction, development and homeostasis

J. Lawrence Marsh: Mechanisms of neurodegeneration and molecular genetics of development

Debra Mauzy-Melitz: The role of writing in scientific teaching

Ronald L. Meyer: Development of nerve connections, nerve injury and regeneration

Edwin Monuki: Cerebral cortex and choroid plexus development and translation

Ali Mortazavi: Functional genomics to study transcriptional regulation in development

R. Michael Mulligan: RNA editing in plant mitochondria and chloroplasts

Diane K. O'Dowd: Regulation of activity in developing and adult nervous systems

Maksim Plikus: Mechanisms of regeneration and stem cell control

Susanne Rafelski: Control of mitochondrial network size, topology and function in budding yeast cells

Thomas F. Schilling: Zebrafish development, vertebrate genetics, and craniofacial development

Christine Suetterlin: Centrosome and cilia regulation, Golgi, host-pathogen interaction

Rahul Warrior: Developmental genetics of transcription and proteoglycan synthesis

Xiaohui Xie: Computational biology, bioinformatics, genomics, neural computation, and machine learning

Research programs of the Department of Developmental and Cell Biology focus on molecular aspects of the development of eukaryotic organisms, on the molecular interaction of cells in tissue differentiation, and expression and function of genes related to the biogenesis of organelles and cellular constituents. The main emphasis of research training is in the molecular aspects of cells and development, and the utilization of biotechnology. The Department maintains facilities for research that include genetic, molecular, and biochemical techniques and also has facilities in advanced electron optics, microsurgery, microinjection, and neurophysiology.

The Department offers graduate study in conjunction with the program in Cellular and Molecular Biosciences (CMB), the Interdepartmental Neuroscience Program (INP), and the program in Mathematical and Computational Biology (MCB), which are described in a previous section. Students admitted into the combined program who select a research

advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year. Students participate in the Developmental or Cell Biology Journal Club and the departmental seminar series, which meet weekly during the academic year. Students must complete the advancement-to-candidacy examination by the end of the third year of graduate study by presenting and defending a proposal for specific dissertation research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Courses

DEV BIO 200A. Research in Developmental and Cell Biology. 2-12 Units.

Independent research with Developmental and Cell Biology faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

DEV BIO 200B. Research in Developmental and Cell Biology. 2-12 Units.

Independent research with Developmental and Cell Biology faculty.

Prerequisite: DEV BIO 200A.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

DEV BIO 200C. Research in Developmental and Cell Biology . 2-12 Units.

Independent research with Developmental and Cell Biology faculty.

Prerequisite: DEV BIO 200B.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

DEV BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.

Independent research within the laboratories of graduate training faculty in the Department of Developmental and Cell Biology for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

DEV BIO 201A. Advanced Topics in Developmental Biology. 2 Units.

Advanced study in various fields of organismic biology.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

DEV BIO 203A. Graduate Tutorial in Developmental and Cell Biology. 4 Units.

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

DEV BIO 203B. Graduate Tutorial in Developmental and Cell Biology. 4 Units.

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Prerequisite: DEV BIO 203A.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

DEV BIO 203C. Graduate Tutorial in Developmental and Cell Biology. 4 Units.

Advanced study in areas not represented by formal courses. May involve individual or small group study through discussion, reading, and composition. Time and subject matter arranged individually.

Prerequisite: DEV BIO 203B.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

DEV BIO 206A. Advanced Topics in Cell Biology. 2 Units.

Advanced study of various topics in cell biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Consent of instructor to enroll

DEV BIO 206C. Advanced Topics in Cell Biology. 2 Units.

Advanced study of various topics in cell biology.

Prerequisite: DEV BIO 206B

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Prerequisite required and Consent of instructor to enroll

DEV BIO 207. Mouse Developmental Genetics. 4 Units.

Introduction to using the mouse in contemporary biomedical research. The biology and development of the laboratory mouse, methods for manipulation of the mouse genome and embryos, and examples of application of these methods to understand mammalian development and homeostasis.

Same as BIOCHEM 215.

Restriction: Graduate students only.

DEV BIO 208. Balancing the Academic Workload. 2 Units.

Students receive formal training in pedagogy and balancing graduate-level biology research with concurrent teaching commitment. Recommended for graduate students who have an active research program and are teaching in the same quarter.

DEV BIO 209. Molecular Genetics Journal Club. 2 Units.

Advanced topics of current interest in molecular and developmental genetics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

DEV BIO 210. Advanced Developmental Genetics. 4 Units.

Focuses on discussion of critical concepts in developmental biology and regeneration, with emphasis on model organisms such as *Drosophila*, Zebrafish, and murine systems. Molecular mechanisms underlying key developmental decisions also discussed.

Repeatability: May be taken for credit 2 times.

Restriction: Graduate students only.

DEV BIO 212. Topics in Systems Biology. 2 Units.

Studies in selected areas of Systems Biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

DEV BIO 231B. Cell Biology. 4 Units.

A broadly based course including topics in extracellular matrix, cytoskeleton, organelle biogenesis, receptor-mediated endocytosis, signal transduction, cell cycle, and developmental biology.

Concurrent with BIO SCI D154.

DEV BIO 232. Systems Cell and Developmental Biology. 4 Units.

Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as BME 213.

Restriction: Graduate students only.

DEV BIO 245. Stem Cell Biology. 4 Units.

The basic characteristics and development roles of embryonic, adult, and cancer stem cells in the human body and in model systems and the use of experimental and genetic methods to analyze and manipulate their properties.

Restriction: Graduate students only.

DEV BIO 252L. Stem Cell Laboratory. 4 Units.

Designed to prepare M.S. Biotechnology program students for a career in stem cell research. Laboratory training utilizes tissue culture, mouse and human embryonic stem cells, and is enhanced with didactic material and discussion.

Prerequisite: MOL BIO 250L and MOL BIO 251L.

Restriction: Biotechnology majors only.

DEV BIO 290A. Colloquium in Developmental and Cell Biology. 2 Units.

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Restriction: Graduate students only.

DEV BIO 290B. Colloquium in Developmental and Cell Biology. 2 Units.

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290A.

Restriction: Graduate students only.

DEV BIO 290C. Colloquium in Developmental and Cell Biology. 2 Units.

Contemporary research problems. Research students, faculty, and other invited speakers introduce research and review topics.

Prerequisite: DEV BIO 290B.

Restriction: Graduate students only.

DEV BIO 292A. Scientific Communication. 2 Units.

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DEV BIO 292B. Scientific Communication. 2 Units.

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292A.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DEV BIO 292C. Scientific Communication. 2 Units.

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Prerequisite: DEV BIO 292B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

DEV BIO 293. Seminar in Interactive Teaching in Biology. 2 Units.

Students receive formal training in use and assessment of interactive teaching strategies in university-level biology classes. Additional aspects of course design and implementation are covered. Recommended for graduate students who have or will be teaching discussion sections.

Repeatability: May be taken for credit 2 times.

DEV BIO 399. University Teaching. 4 Units.
Limited to Teaching Assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Department of Ecology and Evolutionary Biology

321 Steinhaus Hall; (949) 824-6006

<http://ecoevo.bio.uci.edu/>

Laurence D. Mueller, **Department Chair**

Faculty

Nancy Aguilar-Roca: Biology education research, comparative physiology (adaptation to hypoxia, evolution of air-breathing)

Steven D. Allison: Microbial enzymes, theoretical ecology, and biochemistry

John C. Avise: Molecular evolution and population genetics

Francisco J. Ayala: Evolutionary genetics

Manny Azizi: Muscle physiology and biomechanics

Alan Barbour: Molecular pathogenesis and immunology of vector-borne infections

Albert F. Bennett: Environmental and evolutionary physiology of animals

Rudi C. Berkelhamer: Insect ecology and evolutionary biology; teaching methods

Peter A. Bowler: Conservation and restoration biology

Timothy J. Bradley: Comparative physiology of ion transport epithelia

Adriana D. Briscoe: Evolution of sensory systems

Nancy Burley: Behavioral ecology, sexual selection, social organization and communication

Robin M. Bush: Evolution of infectious disease

Diane R. Campbell: Plant-pollinator interactions; evolution of plant reproductive systems

Michael T. Clegg: Plant genetics; population genetics; molecular evolution

James J. Emerson: Evolutionary genetics, genomic novelty, expression variation, copy number variation

Steven A. Frank: Evolutionary genetics, host-parasite interactions

Branden S. Gaut: Phylogenetic analysis; molecular evolution

Donovan German: Ecological and nutritional physiology

Michael L. Goulden: Ecosystem ecology, plant physiological ecology, micrometeorology

Bradford A. Hawkins: Insect population and community ecology

James W. Hicks: Comparative physiology of circulation and gas exchange; activity physiology

Bradley S. Hughes: Experimental evolution, coastal ecology, and science education

Travis Huxman: Plant physiological ecology, global change biology, ecohydrology, ecosystem ecology

Mahtab Jafari: Anti-aging effects of botanicals and pharmaceutical compounds; the impact of botanical extracts on mitochondrial bioenergetics, oxidative stress, and other pathways of aging using cell culture and *Drosophila*

C. Sunny Jiang: Water pollution microbiology, environmental biotechnology, aquatic microbial ecology

Natalia L. Komarova: Mathematical biology, biophysics, evolution of language, models of cancer and viruses

Anthony D. Long: Quantitative and population genetics

Catherine Loudon: Biomechanics and insect physiology

Adam C. Martiny: Microbial ecology, genomics, and physiology

Jennifer Martiny: Microbial ecology and biodiversity

Matthew J. McHenry: Hydrodynamics and mechanoreception of aquatic animals

Kailen A. Mooney: Community ecology, evolutionary ecology, plant-insect interactions

Laurence D. Mueller: Theoretical and empirical studies of density-dependent natural selection

R. Michael Mulligan: RNA editing in plant mitochondria and chloroplasts

James T. Randerson: Global carbon and nutrient cycles, fires, atmospheric trace gases, and biosphere-atmosphere interactions

Jose M. Ranz: Comparative genomics and evolution of the expression network

Sergio Rasman: Ecology and evolution of plant-insect interaction, community ecology

Michael R. Rose: Evolution of life histories and genetic systems

Ann K. Sakai: Plant population biology; evolution of plant reproductive systems

Richard Symanski: Conservation biology

Kevin Thornton: Comparative genomics and population genetics

Kathleen K. Treseder: Ecosystem ecology, global change biology, and microbial biogeochemistry

Stephen G. Weller: Plant population biology; evolutionary genetics of plant reproductive systems

Dominik Wodarz: Theoretical biology of cancer, infectious diseases, and immunology

Guiyan Yan: Ecology and genetics of malaria

Ecology and evolutionary biology deals with the establishment of adaptations over evolutionary time and with the organismal function in ecological time. Faculty in the Department of Ecology and Evolutionary Biology study questions pertinent at a variety of levels of biological organization, from molecular aspects of evolution, to organismal structure and performance, to the ecology of ocean ecosystems. Research is conducted in both the laboratory and field and includes work on a variety of organisms from phage and bacteria, to higher plants and animals. Primary attention is given to evolutionary, ecological, and functional questions rather than to particular habitats or taxa. Faculty and graduate student research is often collaborative and interdisciplinary in approach. Departmental research activities include physiological ecology energetics, plant-herbivore and plant-pollinator interactions, microbial ecology and coevolution, quantitative genetics, life history evolution, population and reproductive ecology, and community ecology. These research endeavors provide a balance between empirical and theoretical approaches to evolutionary, organismal, and ecological problems.

The graduate program offers both the Plan I M.S. and the Ph.D. in Biological Sciences.

Students are required to complete a minimum of five core courses during their first six academic quarters. Two of those courses are required graduate-level courses that all students must take:

ECO EVO 207	Quantitative Methods in Ecology and Evolutionary Biology (typically in the first year)
ECO EVO 204	Writing Grant Proposals (typically in the second year)

In addition students must take one course each in the areas of Physiology (P), Ecology (Ec), and Evolution (Ev). Although all three courses can be taken at the graduate level (G), one of the three courses may be taken as an upper-division undergraduate course (U). The list of acceptable courses is currently limited to:

ECO EVO 208	Organismal Biology (GP)
PHYSIO 206A	Introduction to Medical Physiology (GP)
PHYSIO 206B	Introduction to Medical Physiology (GP)
ANATOMY 201	Human Gross Anatomy (GP)
BIO SCI E109	Human Physiology (UP)
BIO SCI E127	Physiological Plant Ecology (UP)
BIO SCI E138	Comparative Animal Physiology (UP)
BIO SCI E145	Animal Coloration and Vision (UP)
BIO SCI E170	Mechanical Physiology (UP)
ECO EVO 205	Special Topics in Ecology (GEc)
ECO EVO 251	Population Dynamics in Ecology, Epidemiology, and Medicine (GEc)
BIO SCI E118	Ecosystem Ecology (UEc)
BIO SCI E151	Population Dynamics in Ecology, Epidemiology, and Medicine (UEc)
BIO SCI E166W	Field Methods in Ecology
BIO SCI E186	Population and Community Ecology (UEc)
ECO EVO 206	Special Topics in Evolution (GEv)
BIO SCI E135	Molecular Evolution (UEv)
BIO SCI E137	Genetics of Complex Traits (UEv)

BIO SCI E153	Functional and Structural Evolutionary Genomics (UEv)
BIO SCI E154	Genetics and Human History (UEv)
BIO SCI E168	Evolution (UEv)

If a student wishes to request an exception (an exemption or a substitution), the student must submit a written request justifying the reason to the graduate advisor. The graduate advisor and the student's Advisory Committee (or prior to the formation of the Advisory Committee, the Prescription Committee) will decide whether to grant the request.

Students are required to maintain a grade point average of B or greater in the five core courses required for that student. The grade of B- is not considered a passing grade for a graduate student. Students must pass the five core courses by the end of their second academic year. Students failing to meet this requirement may be asked to leave the program. In the event a student receives an Incomplete in any of the core courses, the deficiency must be cleared by the deadline specified by the Graduate Advisor. Any extensions of this deadline require approval by the Graduate Advisor.

Each entering graduate student chooses a faculty advisor and a three-person advisory committee for guidance, with whom the student meets at least twice each year. A comprehensive proposal is required before the end of the first year for M.S. students and before advancement to candidacy for Ph.D. students. The progress of each student is reviewed by the student's advisory committee, together with the graduate advisor, twice each academic year.

The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. All requirements for the M.S. degree should be completed within two years, with a maximum of three years allowed for completion of the program. Advancement to doctoral candidacy by an oral examination is expected during the third year for students entering with a B.A. or B.S. or during the second year for those entering with an M.A. or M.S.

Applicants for this program should have a solid undergraduate program in biology and ecology, emphasizing both research and fieldwork. In addition, course work in statistics, mathematics, and physical and chemical sciences is expected. All applicants are required to submit GRE scores. The deadline for application is January 1.

Courses

ECO EVO 200A. Research in Ecology and Evolutionary Biology. 2-12 Units.

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ECO EVO 200B. Research in Ecology and Evolutionary Biology. 2-12 Units.

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ECO EVO 200C. Research in Ecology and Evolutionary Biology. 2-12 Units.

Individual research with Ecology and Evolutionary Biological faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ECO EVO 201. Seminar in Ecology and Evolutionary Biology. 2-12 Units.

Invited speakers, graduate students, and faculty present current research in ecology and evolutionary biology.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Concurrent with BIO SCI E107.

ECO EVO 203A. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ECO EVO 203B. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ECO EVO 203C. Graduate Tutorial in Ecology and Evolutionary Biology. 2-12 Units.

Advanced study in areas not represented by formal courses. May involve individual or small group study through reading, discussion, and composition.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ECO EVO 204. Writing Grant Proposals. 4 Units.

Provides students with hands-on experience writing proposals in the research areas of ecology, evolution, or physiology.

Restriction: Graduate students only.

ECO EVO 205. Special Topics in Ecology. 4 Units.

Survey of special topics in Ecology.

Restriction: Graduate students only.

ECO EVO 206. Special Topics in Evolution. 4 Units.

Extensive introduction to the primary literature of evolutionary biology.

Topics include population genetics, quantitative genetics, neutralism, molecular evolution, evolution of genetic systems, genetic architecture of fitness, speciation, and macroevolution.

Restriction: Graduate students only.

ECO EVO 207. Quantitative Methods in Ecology and Evolutionary Biology. 4 Units.

Statistics for ecologists and evolutionary biologists. Emphasis on specific applications and underlying assumptions rather than on methods of calculation. Topics include experimental design, parametric and nonparametric methods, analysis of variance and covariance, and multiple regression.

Prerequisite: Completion of at least one quarter of statistics including regression and analysis of variance.

Restriction: Graduate students only.

ECO EVO 208. Organismal Biology. 4 Units.

A summary of information in organismal biology, comparative and ecological physiology, and the biophysical basis of organismal function. Course offered every other fall.

Restriction: Graduate students only.

ECO EVO 210. Foundations of Physiology. 4 Units.

Physical and functional principles common to many living forms. Course forms a basis for subsequent specialization in any of the subdisciplines of physiology. Course offered in even years.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ECO EVO 218. Advanced Topics in Evolutionary Biology. 4 Units.

Content and instructor will vary from quarter to quarter. Possible topics include quantitative genetics, experimental methods of evolutionary studies, mathematical modeling in evolutionary studies, and the evolution of genetic systems.

Repeatability: May be repeated for credit unlimited times.

ECO EVO 219. Advanced Topics in Ecological Genetics. 4 Units.

Content and instructor will vary from year to year. Possible topics include coevolution, sex-ratio evolution, evolution senescence, plant population biology, and density-dependent selection.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ECO EVO 221. Advanced Topics in Ecology. 2-4 Units.

Weekly discussion of current topics in ecology at the graduate level.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

ECO EVO 228. Seminar in Conservation Biology. 2 Units.

Devoted to the application of basic ecological principles to the understanding and resolution of environmental problems of both local and global natures. Current problems approached through a combination of readings, group discussions, and visiting speakers.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ECO EVO 230. Topics in Microbial Ecology. 2-4 Units.

Weekly discussion of current topics in ecology, biogeochemistry, evolution, and physiology of microbial organisms.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

ECO EVO 235. Experimental Evolution. 2 Units.

Explores experimental evolution, which is now a well-established part of evolutionary biology. With the advent of genomics, it is now one of the most powerful tools for studying the genetic foundations of biology.

Prerequisite: BIO SCI E106.

Repeatability: May be repeated for credit unlimited times.

Restriction: Biological Sciences graduate students only.

ECO EVO 251. Population Dynamics in Ecology, Epidemiology, and Medicine. 4 Units.

Explore the dynamics of populations on an ecological, epidemiological, and medical level. Considers the dynamics of competition, predation, and parasitism; the spread and control of infectious diseases; and the in vivo dynamics of viral infections and the immune system.

Restriction: Graduate students only.

Concurrent with BIO SCI E151.

ECO EVO 253. Functional and Structural Evolutionary Genomics. 4 Units.

Function and organization of genomes analyzed from an evolutionary perspective. Review of some of the most recent experimental approaches in genome analysis and comparative genomics. Relevant software to analyze DNA and expression data is used.

Concurrent with BIO SCI E153.

ECO EVO 272. Plant Diversity in a Changing World. 4 Units.

Investigation of plant diversity in California and throughout the world, including basic systematic concepts, introduction to major groups of flowering plants, and the effects of global biological change on plant diversity. Students carry out a phylogenetic analysis using appropriate software.

Concurrent with BIO SCI E172.

ECO EVO 273. Plant Systematics Laboratory. 4 Units.

Diversity of flowering plants is investigated in the laboratory and field. Familiarity with flowering plant families, particularly those prominent in the California flora, is emphasized.

Concurrent with BIO SCI E172L.

ECO EVO 285. Topics in Evolutionary Genetics. 2 Units.

Weekly discussion of recent research on evolutionary genetics.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ECO EVO 299. Independent Study. 1-4 Units.

Course description.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: S/U only

ECO EVO 323. Curriculum and Methods for Elementary School Science. 4 Units.

Prospective elementary teachers learn how to teach science in grades K-8. Covers States science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EDUC 323.

ECO EVO 341. Teaching Science in Secondary School. 4 Units.

Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as EDUC 341.

Restriction: Teacher Credential Program students only.

ECO EVO 344. Applied Instructional Strategies in Secondary School Sciences. 4 Units.

Application of pedagogy and research to practice science teaching experiences in the secondary schools. A continuation of the Education 340 series with an emphasis on the needs of students with culturally diverse backgrounds.

Repeatability: May be taken for credit 2 times.

Same as EDUC 344.

Restriction: Teacher Credential Program students only.

ECO EVO 398. Teaching Assistant Seminar. 2 Units.

Readings, lectures, workshops, and student presentations designed to help develop teaching skills of graduate students teaching university-level biology classes. Topics vary and may include: course organization, presentation styles, exam design, grading, motivating students, and commonly encountered problems.

Repeatability: May be repeated for credit unlimited times.

ECO EVO 399. University Teaching. 4 Units.

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Department of Molecular Biology and Biochemistry

3205 McGaugh Hall; (949) 824-4915

<http://mbb.bio.uci.edu/>

Christopher C.W. Hughes, **Department Chair**

Donald F. Senear, **Department Vice Chair**

Faculty

Dana W. Aswad: Regulation of protein function by covalent modification; biochemical and genetic basis of neurological diseases

Hans-Ulrich Bernard: Papillomavirus/cancer

Michael J. Buchmeier: Molecular biology and pathogenesis of emerging viruses

Paolo Casali (*Joint*): Human immune response to cancer and viral diseases

Melanie Cocco: Structural studies of proteins and DNA using NMR spectroscopy

Hung Fan: Molecular biology and pathogenesis of mouse and human retroviruses

David A. Fruman: Signal transduction, immunology, cancer, leukemia, kinase

Paul Gershon: mRNA transcription and modification

Charles G. Glabe: Amyloid Ab peptide in Alzheimer's pathogenesis; gamete recognition

Celia Goulding: Utilizing proteomic and crystallographic techniques to elucidate and characterize novel systems of protein complexes in *Mycobacterium tuberculosis*

Barbara A. Hamkalo (*Emerita*): Molecular basis of differential chromatin condensation

Christopher C.W. Hughes: Molecular mechanisms of blood vessel growth; tissue engineering

Anthony A. James: Genetic manipulation of the insect vectors of dengue viruses and malaria parasites

Thomas E. Lane: Molecular/immuno-pathogenic mechanisms of virus-induced demyelinating disease

Melissa Lodoen: Host-pathogen interaction, immune evasion, and parasite immunology

Hartmut Luecke: Structure-function studies of membrane-associated proteins

Rui (Ray) Luo: Protein structure and noncovalent associations involving proteins

Andrej Luptak (*Joint*): RNA biology and chemistry

Rachel W. Martin (*Joint*): Solid-state NMR methods development, protein structure determination, biophysical chemistry, physical chemistry

Alexander McPherson: X-ray and atomic force microscopy analysis of protein, nucleic acid, and virus crystals; structural immunology, structural virology; microgravity research on macromolecular crystal growth

Naomi Morrisette: Genetic, cell biological, and structure-function studies of tubulin and microtubules in *Apicomplexan* parasites

Edward Nelson (*Joint*): Tumor immunology

Irene Munk Pedersen: Regulation of microRNAs (miRs) and their role in human disease (cancer), Induced Pluripotent Stem Cells (iPSCs) development and viral defense

Thomas L. Poulos: Protein engineering and crystallography

Rainer K. Reinscheid (*Joint*): Molecular pharmacology, G Protein-coupled receptors, GPCRs

Markus Ribbe: Fundamental biochemical processes in microbial systems

Donald F. Senear: Interactions of proteins and DNA in transcriptional regulation

Andrea J. Tenner: Complement in innate immunity, autoimmunity and Alzheimer's disease

Shiou-Chuan (Sheryl) Tsai: Structural and chemical biology of multisubunit enzyme complexes that make pharmaceutically important natural products

Luis P. Villarreal: Tissue-specific viral and cellular gene expression; viral vectors

Craig M. Walsh: T cell function, development, and homeostasis

Gregory A. Weiss (*Joint*): Bioorganic chemistry, chemical biology, protein engineering, molecular biology and biochemistry

The research interests of faculty in the Department of Molecular Biology and Biochemistry include structure and synthesis of nucleic acids and proteins, regulation, virology, biochemical genetics, gene organization, nucleic acids and proteins, cell and developmental biology, molecular genetics, biomedical genetics, and immunology.

The Department offers graduate study in conjunction with the program in Cellular and Molecular Biosciences (CMB) and the Interdepartmental Neuroscience Program (INP), which are described in a previous section. Students admitted into a combined program who select a research advisor in the Department begin following the departmental requirements for the Ph.D. at the beginning of their second year. Participation in an advanced topics seminar series and completion of at least one course per year for three years are expected of all students. Students must advance to candidacy in their third year. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Graduate Gateway Program in Medicinal Chemistry and Pharmacology (MCP).

The one-year MCP graduate gateway program is designed to function in concert with selected graduate programs, including the Ph.D. in Biological Sciences. Detailed information is available at <http://www.cohs.uci.edu/pharm.shtml>.

Courses

MOL BIO 200A. Research in Molecular Biology and Biochemistry. 2-12 Units.

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

MOL BIO 200B. Research in Molecular Biology and Biochemistry. 2-12 Units.

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

MOL BIO 200C. Research in Molecular Biology and Biochemistry. 2-12 Units.

Individual research with Molecular Biology and Biochemistry faculty.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

MOL BIO 200R. Research in Developmental & Cell Biology for First-year Students. 2-12 Units.

Independent research within the laboratories of graduate training faculty in the Department of Molecular Biology and Biochemistry for first-year Ph.D. students.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 3 times.

MOL BIO 201A. Seminars in Molecular Biology & Biochemistry. 2 Units.

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 201B. Seminars in Molecular Biology & Biochemistry. 2 Units.

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 201C. Seminars in Molecular Biology & Biochemistry. 2 Units.

Presentation of research from department laboratories or, when pertinent, of other recent developments.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 202A. Tutorial in Molecular Biology and Biochemistry. 2 Units.

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

MOL BIO 202B. Tutorial in Molecular Biology and Biochemistry. 2 Units.

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

MOL BIO 202C. Tutorial in Molecular Biology and Biochemistry. 2 Units.

Tutorials in the area of research of a particular professor which relate current research to the literature. May be conducted as journal clubs.

Repeatability: Unlimited as topics vary.

MOL BIO 203. Nucleic Acid Structure and Function. 4 Units.

Structure and chemistry of nucleic acids. Relationship between these properties and the mechanisms of fundamental processes such as replication and repair, RNA-mediated catalysis, formation and regulation of higher order chromatin structure and recombination.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51A and CHEM 51B and CHEM 51C.

MOL BIO 204. Protein Structure and Function. 4 Units.

The structure and properties of proteins, enzymes, and their kinetic properties.

Prerequisite: BIO SCI 98 and BIO SCI 99 and CHEM 51C.

MOL BIO 205. Molecular Virology. 4 Units.

Primary research data on the major DNA and RNA viruses emphasizing strategies of regulation of gene expression. Utilization of viruses as molecular biological tools. Graduate-level knowledge of the biochemistry and molecular biology of macromolecules is required.

Prerequisite: MOL BIO 203 and MOL BIO 204.

Restriction: Graduate students only.

MOL BIO 211. High-Resolution Structures: NMR and X-ray. 4 Units.

Basic principles of magnetic resonance and x-ray crystallography toward the determination of high-resolution biomolecular structures.

Prerequisite: MATH 2B.

Restriction: Graduate students only.

Concurrent with BIO SCI M133.

MOL BIO 213. Literature in Nucleic Acid Structure and Function. 2 Units.

Exploration and critical analysis of recent primary scientific literature in structure, properties, and biological mechanisms involving nucleic acids.

Corequisite: MOL BIO 203.

Grading Option: Satisfactory/unsatisfactory only.

MOL BIO 214. Literature in Protein Structure and Function. 2 Units.

Exploration and critical analysis of recent primary scientific literature in structure and properties of proteins, enzymes, and their kinetic properties.

Corequisite: MOL BIO 204.

Grading Option: Satisfactory/unsatisfactory only.

MOL BIO 215. Integrative Immunology. 4 Units.

Lectures and student presentations of primary literature. The main goal is to achieve a basic understanding of the cellular and molecular basis of innate and adaptive immunity, and how immune function is coordinated at a systems level.

Same as M&MG 215.

MOL BIO 217A. Principles of Cancer Biology I. 4 Units.

Oncogenes and tumor suppressor genes are studied from molecular viewpoints. Also studies their role in cancer; viral carcinogenesis. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204.

Restriction: Graduate students only.

MOL BIO 217B. Principles of Cancer Biology II. 4 Units.

Topics include cancer cell growth and metastasis, chemical carcinogenesis, and cancer genetics and epidemiology. Designed for graduate students interested in cancer research. Format includes lectures and student-led discussions.

Prerequisite: MOL BIO 203 and MOL BIO 204.

Restriction: Graduate students only.

MOL BIO 218. Clinical Cancer. 3 Units.

Designed to acquaint students in basic life science with clinical cancer.

Restriction: Graduate students and Postdocs only.

MOL BIO 220. Structure & Synthesis of Biological Macromolecules Journal Club. 2 Units.

Advanced topics in macromolecular structure and synthesis as related to biological problems.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

MOL BIO 221. Advanced Topics in Immunology. 4 Units.

Literature-based, interactive discussions focused on review of seminal historic and recent immunology literature. Student responsibilities include reading, critical evaluation, and discussion of manuscripts.

Prerequisite: M&MG 215.

Restriction: Graduate students only.

MOL BIO 221L. Advanced Immunology Laboratory. 4 Units.

An advanced course in immunology for graduate students enrolled in the Biotechnology master's program. Emphasis is placed on learning modern techniques in immunology such as ELISAs, western blotting, immunofluorescent staining assays.

Restriction: Graduate students only.

Concurrent with BIO SCI M121L.

MOL BIO 223. Introduction to Computational Biology. 4 Units.

The use of theories and methods based on computer science, mathematics, and physics in molecular biology and biochemistry. Basics in biomolecular modeling. Analysis of sequence and structural data of biomolecules. Analysis of biomolecular functions.

Concurrent with BIO SCI M123.

MOL BIO 224. Virus Engineering Laboratory. 4 Units.

An advanced laboratory for graduate students enrolled in the Biotechnology master's program. Students learn to engineer recombinant eukaryotic viruses and express genes in mouse tissue.

Restriction: Graduate students only.

MOL BIO 227. Immunology Journal Club. 2 Units.

Advanced topics in immunology as related to an understanding of human disease.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 15 times.

Restriction: Graduate students only.

MOL BIO 227L. Virology and Immunology Laboratory. 5 Units.

Introductory laboratory course in virology and immunology designed for Biological Sciences graduate students. Curriculum includes plasmid preparation, plasmid characterization, microscopy, cell culture, transfection and infection of cells, cell counting, plaque assays, ELISA, Western blot, mixed lymphocyte reactions.

Restriction: Graduate students only.

MOL BIO 228. Genetic Engineering and Biotechnology. 4 Units.

An advanced course in genetic engineering and biotechnology for graduates enrolled in the Biotechnology Master's Program. Emphasis will be placed on learning advanced methods in assembling the gene for expression in bacteria, yeast and human cells.

Restriction: Graduate students only.

MOL BIO 229. Research-in-Progress Seminars. 1 Unit.

Two half-hour presentations by graduate students and postdoctorals to the department on their current research projects.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 15 times.

Restriction: Graduate students only.

MOL BIO 250. Advanced Topics in Biotechnology - Nucleic Acids. 2 Units.

Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 250L.

Restriction: Biotechnology graduate students only.

MOL BIO 250L. Biotechnology Laboratory - Nucleic Acids. 8 Units.

Nucleic acid techniques and recombinant DNA technology. Extraction and purification of nucleic acids, cloning and subcloning, PCR, site-directed mutagenesis, nucleic acid hybridization, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 250.

Restriction: Biotechnology graduate students only.

MOL BIO 251. Advanced Topics in Biotechnology - Protein Purification and Characterization. 2 Units.

Supplements laboratory curriculum with scientific background behind experimental methods. Format consists of lectures and the presentation and analysis of relevant papers from the scientific literature.

Corequisite: MOL BIO 251L.

Prerequisite: MOL BIO 250L and MOL BIO 250.

Restriction: Biotechnology graduate students only.

MOL BIO 251L. Biotechnology Laboratory - Protein Purification and Characterization. 8 Units.

Major techniques of handling proteins and antibodies. Protein engineering, expression and large-scale purification of recombinant proteins from bacteria, HPLC, antibody purification, western blotting, additional associated procedures. Students must demonstrate accurate documentation of data (laboratory notebook) detailing experience and results.

Corequisite: MOL BIO 251.

Prerequisite: MOL BIO 250L and MOL BIO 250.

Restriction: Biotechnology graduate students only.

MOL BIO 252L. Biotech Lab . 8 Units.

Overview of current methods in biotechnology, designed specifically for biotechnology graduate students. Organized into four distinct sections (nucleic acids, proteins, virology, and immunology). Students must demonstrate accurate documentation of data (laboratory notebooks) detailing experience and results.

Restriction: Biotechnology Management Master's program students only.

MOL BIO 253. Biotech Management . 5 Units.

Taught jointly by Biological Sciences and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MGMTMBA 293.

Restriction: Master's Program in Biotechnology Management students only.

MOL BIO 255. Structure-Function Relationships of Integral Membrane Proteins. 4 Units.

Integral membrane proteins such as voltage and ligand-gated ion channels, water channels, pumps, cotransporters, and receptors (e.g., GPCRs). The emphasis is on the relationship between atomic structure and the functional properties of these proteins.

Prerequisite: BIO SCI 98 and BIO SCI 99. BIO SCI 98 with a grade of B or better. BIO SCI 99 with a grade of B or better.

Concurrent with BIO SCI M160.

MOL BIO 280. Advanced Topics in Biochemistry and Molecular Biology. 3 Units.

Selected topics in specified areas of concentration, e.g., nucleic acids, protein biochemistry, genetic expression, biochemical genetics. Specific topics announced in advance.

Restriction: Graduate students only.

MOL BIO 291. Graduate School Fundamentals. 2 Units.

Lectures and discussions providing basic skills needed for success in Ph.D. graduate studies. Topics include formulating a hypothesis, experimental design, literature review, grant writing, oral communication, biostatistics, time management, and professional development.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: First-year students in the Cellular and Molecular Biosciences gateway Ph.D. program.

MOL BIO 292A. Scientific Communication. 2 Units.

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 292B. Scientific Communication. 2 Units.

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 292C. Scientific Communication. 2 Units.

Small group meetings for graduate students to practice scientific writing, debate, and presentation skills.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MOL BIO 293A. Cancer Biology Journal Club. 1 Unit.

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

MOL BIO 293B. Cancer Biology Journal Club. 1 Unit.

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

MOL BIO 293C. Cancer Biology Journal Club. 1 Unit.

Focuses on molecular mechanisms that underlie the development and progression of cancers. Covers a variety of cancer-related research areas, such as cell cycle control, apoptosis, DNA repair, metastasis, angiogenesis, and others.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Graduate students only.

MOL BIO 399. University Teaching. 4 Units.

Limited to Teaching Assistants.

Restriction: Graduate students only.

Department of Neurobiology and Behavior

2205 McGaugh Hall; (949) 824-8519

<http://neurobiology.uci.edu/>

Frank M. LaFerla, **Department Chair**

Raju Metherate, **Department Vice Chair**

Faculty

Matthew Blurton-Jones: Stem cells, Parkinson's disease, Alzheimer's disease, neurogenesis, differentiation, learning and memory, neurodegeneration, neurotrophins

Jorge Busciglio: Cellular and molecular mechanisms of neuronal degeneration in Down's syndrome and Alzheimer's disease

Lawrence F. Cahill: Brain mechanisms of emotion and memory

Thomas J. Carew: Cellular and molecular mechanisms of memory

Susana Cohen-Cory: Nervous system development; development of synaptic connectivity, neurotrophic factors, *in vivo* imaging

Carl Cotman: Brain aging, Alzheimer's, cell biology, biochemistry

Karina S. Cramer: Mechanisms of nervous system development; axonal target selection; development and plasticity of auditory brainstem pathways

Norbert Fortin: Fundamental neurobiological mechanisms underlying episodic memory

Ron D. Frostig: Functional organization of cortex

Sunil Gandhi: Plasticity in the neural circuits of the mammalian visual system

Kim Green: Alzheimer's disease, therapeutics, glucocorticoid, APP processing

Christine M. Gall: Regulation of neuronal gene expression

John F. Guzowski: Experience-dependent gene expression in the modification of neural circuits involved in long-term memory formation

Robert K. Josephson: Design of skeletal muscle

Claudia H. Kawas: Clinical neurology

Herbert P. Killackey: Developmental neuroanatomy

Frank LaFerla: Alzheimer's, neural apoptosis, transgenic animal modeling

Michael Leon: Brain development

John Marshall: Neuropharmacological approaches to behavioral analysis

James L. McGaugh: Neurobiology of learning and memory

Raju Metherate: Synaptic physiology and plasticity in sensory neuroprocesses

John C. Middlebrooks: Hearing research; neurophysiology; auditory prosthesis; computational neuroscience; auditory cortex

Ricardo Miledi: Molecular neurobiology and physiology of ion channels and receptors

Ian Parker: Intracellular calcium and cell signaling

Steven Small: Neurobiology of language, aphasia, functional neuroanatomy of hand motor function, long-term aspects of stroke recovery

Ivan Soltesz: Molecular and cellular neurobiology

George Sperling: Cognition, vision, and visual perception

Craig Stark: Memory, hippocampus, neuroimaging, amnesia, fMRI

Arnold Starr: Cognitive and sensory neuroprocesses

Oswald Steward: Mechanisms of synapse growth and plasticity

Georg Striedter: Neuroethology, behavioral neuroscience, evolutionary neurobiology

Katumi Sumikawa: Molecular neurobiology of synapses

Andrea J. Tenner: Molecular basis of the enrichment of human leukocyte function

Leslie M. Thompson: Molecular/biochemical analysis of skeletal dysplasias and Huntington's disease

Norman M. Weinberger: Neural bases of attention and learning

Marcelo Wood: Neurobiology and memory

Pauline Yahr: Behavioral neuroendocrinology

The Department of Neurobiology and Behavior Ph.D. program provides a broad foundation in neuroscience combined with a technical proficiency in a specific area of research. Faculty members in the Department address neuroscience at the molecular, cellular, systems, and behavioral levels. Research focuses on a range of topics including learning and memory, neurodegenerative disorders, addiction, sensory neurobiology, developmental neurobiology, and neural plasticity.

The Department of Neurobiology and Behavior also participates in the Interdepartmental Neuroscience Program, described in a previous section.

The Department of Neurobiology and Behavior offers the Ph.D. degree in Biological Sciences. Graduate students must complete a sequence of core courses (lectures and laboratories) during their first year, and maintain an overall GPA of 3.3 or better. They also must take a minimum of four advanced courses before graduation and participate in directed research each year and teaching during their first, second, third, and fourth years. Students will advance to candidacy for the Ph.D. at the end of their third year by means of a written critical review of the literature in the area in which they plan to do their dissertation, a research proposal, and an oral examination. Graduation depends on successful preparation and oral defense of a dissertation based on the student's research. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years.

Ideally, applicants for this program should have taken undergraduate courses in biology (one introductory year plus some advanced work), and/or psychology (experimental, physiological, and learning), chemistry

through biochemistry, introductory physics, calculus, and statistics. They also must submit GRE Aptitude test scores. Because graduate training emphasizes research, preference is given to applicants having laboratory research experience as undergraduates. Applicants with substantial outside commitments that would curtail laboratory research or prolong the time to degree are not accepted. The deadline for application is December 2.

Courses

NEURBIO 200A. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 200B. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200A.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 200C. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 200B.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 201A. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 201B. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201A.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 201C. Research in Neurobiology and Behavior. 2-12 Units.
Individual research with Neurobiology and Behavior faculty.

Prerequisite: NEURBIO 201B.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 202A. Foundations of Neuroscience. 2 Units.

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Grading Option: Satisfactory/unsatisfactory only.

NEURBIO 202B. Foundations of Neuroscience. 2 Units.

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Prerequisite: NEURBIO 202A.

Grading Option: Satisfactory/unsatisfactory only.

NEURBIO 202C. Foundations of Neuroscience. 2 Units.

Intended to expose students to critical reading and analysis of the primary neuroscience literature. Instructors from departments associated with the Interdepartmental Neuroscience Program participate and discuss topics of current interest.

Prerequisite: NEURBIO 202B.

Grading Option: Satisfactory/unsatisfactory only.

NEURBIO 206. Molecular Neuroscience. 5 Units.

Surveys molecular and cellular mechanisms involved in neuronal function, including control of gene expression, post-transcriptional and post-translational processing, RNA and protein targeting, cell death mechanisms, and molecular genetic basis of neurological disorders. Overview of the molecular aspects of developmental neurobiology.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 207. Cellular Neuroscience. 5 Units.

Neurophysiological and neurochemical mechanisms of electrical and chemical signaling in neurons. Topics include generation of resting- and action-potentials, voltage- and ligand-gated ion channels, second messenger systems, and synaptic transmission and integration.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 207L. Cellular Neuroscience Laboratory. 2 Units.

Intensive hands-on laboratory experience of contemporary techniques for studying ion channels and synaptic function. Experiments include microelectrode recording, patch clamp, quantal analysis of synaptic transmission, heterologous expression of genes for channels and receptors, brain slice, and fluorescence calcium imaging.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 208A. Systems Neuroscience. 5 Units.

Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Repeatability: May be taken for credit 2 times.

Same as ANATOMY 210A.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 208B. Systems Neuroscience. 5 Units.

Study of the mammalian nervous system at the systems level. Anatomy and physiology of sensory, motor, and integrative functions.

Prerequisite: NEURBIO 208A.

Repeatability: May be taken for credit 2 times.

Same as ANATOMY 210B.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 209. Behavioral Neuroscience. 5 Units.

Overview of fundamental conceptual and experimental issues in the neurobiology of learning and memory. The approach is a cross-level integration of research in molecular-genetic, cellular, circuit, systems, and behavioral analyses.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 232. Regenerative Neurobiology. 4 Units.

Surveys the latest research on regenerative neurobiology. Both basic stem cell discoveries and their potential clinical application to brain disorders will be examined.

NEURBIO 235. Balancing Research and Teaching. 1 Unit.

The goal of this course is to offer graduate students who have commitments outside of their research program (such as teaching) an opportunity to learn to balance these commitments.

NEURBIO 236. Cortex: Structure, Function, and Plasticity. 4 Units.

Structured to include lectures and presentation of papers about cortex with emphasis on sensory-motor cortex. Both historical and current perspectives on cortical structure-function relationship will be critically evaluated.

NEURBIO 237. Neurobiology of Brain Aging. 4 Units.

Outlines some of the significant changes that occur in the aging brain, with a special emphasis on risk factors and protective strategies that promote successful brain aging. Topics include changes in synaptic plasticity, neurotrophic factors, and molecular mechanisms in aging.

Prerequisite: NEURBIO 209.

NEURBIO 238. Neurobiology of Memory as a Multidisciplinary Science. 4 Units.

The study of memory is a highly multidisciplinary science ranging from molecular and cellular studies in reduced studies in reduced preparations to functional imaging studies in humans. The focus is to integrate across approaches and levels of analysis to better understand how the hippocampus, and its constituent elements, subserves memory. Emphasis on the challenges of this multidisciplinary field.

Restriction: Majors only

NEURBIO 239. Functional Imaging of the Nervous System. 4 Units.

Overview of technical and applied aspects of imaging techniques available for studying the nervous system. The areas emphasized are cellular and subcellular imaging of neural function, systems-level imaging of brain function, and imaging of the human brain.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 240. Advanced Analysis of Learning and Memory. 4 Units.

Advanced analysis of contemporary research concerning the nature and neurobiological bases of learning and memory. Special emphasis is given to time-dependent processes involved in memory storage.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 244. Cognitive Neuroscience of Human Memory. 4 Units.

In-depth treatment of current topics of interest in the cognitive neuroscience of human long-term memory. Topics include methods of investigation of human memory, functional architecture of memory, implicit vs. explicit distinction, and control processes in memory, among others.

Prerequisite: NEURBIO 209.

NEURBIO 248. Topics in Neurobiology and Behavior. 4 Units.

Studies in selected areas of Neurobiology and Behavior. Topics addressed vary each quarter.

Repeatability: May be taken for credit 3 times.

NEURBIO 249. Electronics for Biologists. 4 Units.

Basic principles of electricity; properties and use of discrete components and integrated circuits; circuit analysis and design. Intended for advanced students in the life sciences.

Same as PHYSIO 205.

NEURBIO 250. Basal Ganglia and Movement Disorders. 4 Units.

Principles underlying the organization and functions of the basal ganglia and amygdala are considered. The circuitry, neurotransmitters, and influences on cortex and brainstem motor regions are discussed. Clinical disorders of the basal ganglia, including parkinsonism and ballism, are included.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 254. Molecular Neurobiology. 4 Units.

The application of genetic and recombinant DNA technology to neurobiology. Topics include the study of neuronal proteins which play important roles in the formation of synapses and synaptic transmission.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 255. History of Neuroscience. 4 Units.

An overview of the conceptual and technical foundations of contemporary neuroscience from ancient times to the present. The subjects include synapses, neurons, brain organization, sensory, motor and regulatory systems, learning and memory, human brain function and dysfunction.

Repeatability: May be taken for credit 2 times.

Restriction: Neurobiology and Behavior graduate students only.

Concurrent with BIO SCI N119.

NEURBIO 257. Statistics for Neurobiologists. 4 Units.

Introduction to common methods for statistical analysis used in neurobiology. Topics covered include t-tests, ANOVAs, correlations and regressions, general linear model, power analysis, and non-parametric tests.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 260. Auditory Neuroscience. 4 Units.

Multidisciplinary overview of brain mechanisms of hearing. Emphasizes breadth of auditory function and research: single neurons to psychoacoustics, the cochlea to the cortex, and basic science to clinic.

NEURBIO 261. Advanced Topics in Neurodegeneration. 4 Units.

Neurodegenerative disorders represent one of the most devastating illnesses to afflict humans, and usually occur in an age-dependent fashion. Course reviews the basic mechanisms that underlie cognitive and motor dysfunction in the major disorders of the brain.

Prerequisite: NEUROBIO 206.

NEURBIO 265. Developmental Neurobiology—Wiring the Brain. 4 Units.

The development of the nervous system is discussed with particular emphasis on the processes that underlie the appearance of complex and highly ordered neural circuits. Topics include neuronal migration, axon guidance, and formation and maintenance of synaptic connections.

NEURBIO 290. Colloquium in Neurobiology and Behavior. 1.3 Unit.

Presentation of contemporary research problems in neurobiology and behavior and related areas by invited speakers.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 292. Scientific Communication. 4 Units.

Students learn how to effectively communicate scientific ideas and results. Activities include learning how to effectively write a scientific manuscript, how to perform a coherent slide presentation, and how to run-through a poster presentation.

Restriction: Neurobiology and Behavior graduate students only.

NEURBIO 399. University Teaching. 1-4 Units.

Limited to Teaching Assistants.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Overview

The Paul Merage School of Business offers the B.A. degree in Business Administration, the B.S. degree in Business Information Management (offered jointly with the Donald Bren School of Information and Computer Sciences), the M.B.A. (Master of Business Administration) degree, the M.P.Ac. degree in Accounting, the M.S. degree in Biotechnology Management (offered jointly with the School of Biological Sciences and The Henry Samueli School of Engineering), the M.S. degree in Engineering Management (offered jointly with The Henry Samueli School of Engineering), the Ph.D. degree in Management, and undergraduate minors in Management and Accounting. The Master's degree is professional in nature and is intended to provide future managers with a firm foundation in the basic disciplines and in management tools and techniques; the Ph.D. in Management is for those who wish to pursue a career in scholarly research. The undergraduate minor in Management is designed for those who wish to gain some insight into issues of modern management, as well as those who anticipate future graduate work in management. In establishing the undergraduate minor in Accounting, the faculty anticipated two types of students to be drawn to courses in accounting: (1) students preparing for careers in accounting or in other fields that require some knowledge of accounting, and (2) students planning to pursue a graduate degree in accounting who wish early guidance and undergraduate work appropriate to this career objective.

Degrees

Accountancy	M.P.Ac.
Biotechnology Management ¹	M.S.
Business Administration	B.A., M.B.A.
Business Information Management ²	B.S.

Engineering Management ³	M.S.
Management	Ph.D.

- ¹ Offered jointly with the Department of Molecular Biology and Biochemistry (MB&B) in the School of Biological Sciences and the Department of Biomedical Engineering in The Henry Samueli School of Engineering.
- ² Offered jointly with the Donald Bren School of Information and Computer Sciences.
- ³ Offered jointly with The Henry Samueli School of Engineering.

Honors

Graduation with Honors. Honors at graduation, e.g., *cum laude*, *magna cum laude*, *summa cum laude*, are awarded to approximately the top 12 percent of the graduating seniors. To be eligible for honors, a general criterion is that students must have completed at least 72 units in residence at the University of California. The student's cumulative record at the end of the final quarter is the basis for consideration for awarding Latin honors. Other important factors are considered (see Honors Recognition (p. 58)).

Faculty

Dennis J. Aigner, Ph.D. University of California, Berkeley, *Professor Emeritus of Management* (corporate environmental management, international economics, and trade and environment)

Alpesh Amin, M.D., M.B.A., M.A.C.P., S.F.H.M. Northwestern University, *Professor of Medicine, Management, Public Health, and Nursing Science; Executive Director, Hospitalist Program; and Thomas and Mary Cesario Endowed Chair in Medicine, Department of Medicine*

Christopher W. Bauman, Ph.D. University of Illinois at Chicago, *Assistant Professor of Management* (behavioral ethics, organizational justice, power and status, and negotiations)

Christine M. Beckman, Ph.D. Stanford University, *Director of the Don Beall Center for Innovation and Entrepreneurship and Associate Professor of Management* (organizational learning and change, entrepreneurship and social entrepreneurship, social networks and interorganizational networks, organizational growth and survival, and technology and communication)

David H. Blake, Ph.D. Rutgers-The State University of New Jersey, *Professor Emeritus of Management* (global business strategy, globalization, leadership strategies, corporate strategies and governance, and ethical business leadership)

Philip Bromiley, Ph.D. Carnegie-Mellon University, *Dean's Professor of Management* (behavioral research in strategic management, strategic decision-making, strategy processes, corporate risk-taking, risk assessment in commercial lending, accounting misrepresentation, R&D policy, trust in organizations, and corporate capital investment)

Maria Y. Chandler, M.D. University of California, Irvine, *Health Sciences Associate Clinical Professor, Pediatrics and Management*

Nai-Fu Chen, Ph.D. University of California, Berkeley; Ph.D. University of California, Los Angeles, *Professor of Management* (stability of currency and banking systems, macroeconomic impact on investing, GDP growth, inflation, interest rates, credit risk and the financial market, and hedge funds: asset allocations and portfolio management)

Vidyanand Choudhary, Ph.D. Purdue University, *Associate Professor of Management* (economics of information systems, versioning and product line design for information goods, pricing and quality strategy for information goods, competitive strategy, economics of software as a service and electronic marketplaces and information intermediaries)

Imran S. Currim, Ph.D. Stanford University, *UCI Chancellor's Professor of Management* (marketing research, customer choice, design and marketing of products and services, customer behavior online, and assessing the impact of competitive product and service features and marketing efforts on consumer choice and market share)

Sanjeev Dewan, Ph.D. University of Rochester, *Professor of Management* (business value of information technology investments, impact of Web 2.0 technologies, and electronic markets)

Joseph F. Di Mento, Ph.D., J.D. University of Michigan, *Professor of Law; Planning, Policy, and Design; Social Ecology; Criminology, Law and Society; and Management* (planning, land use and environmental law, use of social science in policy making, legal control of corporate behavior)

Lucile C. Faurel, Ph.D. New York University, *Assistant Professor of Management* (financial accounting and capital markets, financial reporting quality, voluntary disclosure, corporate investment strategies, mergers and acquisitions, and intangible assets)

Martha S. Feldman, Ph.D. Stanford University, *Professor of Planning, Policy, and Design, Nursing Science, Management, Sociology, and Political Science, and Roger W. and Janice M. Johnson Chair in Civic Governance and Public Management* (organization theory and behavior, stability and change in organizations, decision making, and information processing)

Paul J. Feldstein, Ph.D. University of Chicago, *Professor Emeritus of Management* (economics of health care, reasons for employees switching health care plans, and measuring health plan performance by examining breast cancer outcomes by stage at detection, treatment and survival)

Mary C. Gilly, Ph.D. University of Houston, *Professor of Management* (consumers and technology, services marketing, underserved markets, including Hispanics and the elderly, effects of advertising on employees, and compliance in service encounters)

Yan Gong, Ph.D. University of Wisconsin-Madison, *Assistant Professor of Management* (capabilities, routines, and unexpected events in entrepreneurial firms)

John Graham, Ph.D. University of California, Berkeley, *Professor Emeritus of Management* (global marketing, international business negotiations, innovation, business in Japan and negotiation styles in the United States, Japan, Canada, Mexico, Brazil, Taiwan and The Peoples' Republic of China, South Korea, France, Germany, the United Kingdom, and the Soviet Union)

Vijay C. Gurbaxani, Ph.D. University of Rochester, *Director of the Center for Digital Transformation, Professor of Management and Informatics, and Taco Bell Chair in Information Technology Management* (IT and innovation, strategic sourcing of IT-enabled services, value of IT investment, and economics of information systems)

David A. Hirshleifer, Ph.D. University of Chicago, *Professor of Management and Economics, and Merage Chair in Business Growth* (psychology, social interactions and markets, investments, corporate finance, and risk management)

Joanna L. Y. Ho, Ph.D. University of Texas at Austin, *Professor of Management* (corporate governance, performance evaluations and compensation systems, use of information technology to improve firm performance, Sarbanes-Oxley Act of 2002, international accounting and management practices, understanding how managers make investment decisions)

Chong Huang, Ph.D. University of Pennsylvania, *Assistant Professor of Management* (financial markets, corporate finance, and financial crises)

Matthew L. Huffman, Ph.D. University of California, Santa Barbara, *Associate Professor of Sociology and Management* (race and gender inequality, organizations, and research methods)

Philippe Jorion, Ph.D. University of Chicago, *Professor of Management and Economics* (financial risk management, global asset allocation, exchange rate models, fixed income markets, and hedge fund investments)

L. Robin Keller, Ph.D. University of California, Los Angeles, *Professor of Management* (creative problem structuring, cross-cultural decision making, fairness in decision making, decision analysis theory and applications, medical decision making, multiple attribute decision making, probability judgments, ambiguity of probabilities or outcomes, risk analysis for terrorism, environmental, health, and safety risks, time preferences and discounting, utility models, and models of risk)

Sreya Kolay, Ph.D. University of Rochester, *Assistant Professor of Management* (pricing and promotion strategies relating to design of optimal pricing contracts for firms in various markets, vertical market and distribution channels topics including analysis of mechanisms that help a manufacturer to achieve channel coordination, advertising and durable goods)

Kenneth L. Kraemer, Ph.D. University of Southern California, *Research Professor for the Center for Digital Transformation and Professor Emeritus of Management* (management of computing, globalization of knowledge work and innovation, offshoring of new product development, dynamics of computing in organizations, business value of IT and national policies for IT production and use)

Loraine Lau, Ph.D. University of California, Los Angeles, *Associate Professor of Management* (the influence of affect or emotions in consumer decision making and the role of culture and self in consumer persuasion and judgment)

Newton Margulies, Ph.D. University of California, Los Angeles, *Professor Emeritus of Management* (organizational behavior)

Joseph W. McGuire, Ph.D. Columbia University, *Professor Emeritus of Management* (business strategy, entrepreneurship, organizational economics)

Richard B. McKenzie, Ph.D. Virginia Polytechnic Institute and State University, *Professor Emeritus of Management and Economics* (monopoly in economic theory and law, various pricing strategies, rational and irrational behavior in economic theory, Microsoft antitrust case, public policies relating to digital goods, and orphanages and public policy relating to foster care)

Peter Navarro, Ph.D. Harvard University, *Professor of Management* (macroeconomic analysis of the business environment and financial markets for investors and corporate executives)

Alexander N. Nekrasov, Ph.D. University of Minnesota, *Assistant Professor of Management* (financial reporting, role of accounting in security valuation, market efficiency, and financial analysts' forecasts)

David Neumark, Ph.D. Harvard University, *Director of the Center for Economics and Public Policy and UCI Chancellor's Professor of Economics and Management* (labor economics and econometrics)

Gerardo A. Okhuysen, Ph.D. Stanford University, *Professor of Management* (management of task and environmental uncertainty, conflict in groups, definitions of group success, and the role of the context in group activities)

Judy Olson, Ph.D. University of Michigan, *Donald Bren Professor of Informatics; Planning, Policy, and Design; and Management* (computer-supported cooperative work and human computer interaction)

Jone L. Pearce, Ph.D. Yale University, *Director of the Center for Global Leadership and Dean's Professor of Management* (organizational behavior, workplace interpersonal processes, such as trust and status, and how these processes may be affected by political structures, economic conditions and organizational policies and practices)

Cornelia A. R. Pechmann, Ph.D. Vanderbilt University, *Professor of Management* (effectiveness of various anti-smoking and anti-drug advertising tactics, consumer behavior, advertising strategy and regulation, advertising to adolescents, deceptive advertising, product placements, role models in advertising, pharmaceutical advertising, and retailing, micro-marketing, and geographic information systems)

Morton P. Pincus, Ph.D. Washington University in St. Louis, *Dean's Professor of Management* (relation between accounting information and capital market variables, including the pricing of accruals in international capital markets, earnings management, Sarbanes-Oxley Act and earnings management, usefulness of book-tax differences in detecting earnings management, and accounting method choices)

Andrew J. Policano, Ph.D. Brown University, *Professor of Management and Economics, and Dean's Leadership Circle Endowed Chair* (financial institutions and markets, macroeconomics, monetary policy, and business school trends)

Lyman W. Porter, Ph.D. Yale University, *Professor Emeritus of Management* (management education and development, organizational psychology, and human resource management)

Judy B. Rosener, Ph.D. Claremont Graduate School, *Senior Lecturer with Security of Employment Emerita, Management* (men and women at work, cultural diversity, business and government, and managing nonprofits)

Claudia B. Schoonhoven, Ph.D. Stanford University, *Professor of Management* (evolutionary dynamics of technology-based firms, innovation, and entrepreneurship)

Christopher G. Schwarz, Ph.D. University of Massachusetts, Amherst, *Assistant Professor of Management* (hedge funds, mutual funds, investments, regulation and money management)

Carlton H. Scott, Ph.D. The University of New South Wales, *Professor of Management* (application of mathematical models in managerial decision making and development and analysis of optimization models arising from decision situations in business and industry)

Devin M. Shanthikumar, Ph.D. Stanford University, *Assistant Professor of Management* (financial accounting, behavioral finance, investor behavior, and financial intermediaries)

Terrence J. Shevlin, Ph.D. Stanford University, *Professor of Management and Merage Chair in Business Growth* (effect of taxes on business decisions and asset prices, capital markets-based accounting research, earnings management, employee stock options, research design, and statistical significance testing issues)

Shivendu Shivendu, Ph.D. University of Southern California, *Assistant Professor of Management* (economics of digitization of information, economics of privacy, online social networks and society, digital goods supply chain, and sourcing of IT services)

Kut C. So, Ph.D. Stanford University, *Professor of Management* (optimal allocation of resources in the design and management of production and services systems)

Zheng Sun, Ph.D. New York University, *Assistant Professor of Management* (empirical asset pricing, investments, market microstructure and banking)

Eli Talmor, Ph.D. University of North Carolina at Chapel Hill, *Professor Emeritus of Management* (corporate finance, executive compensation and managerial accounting)

Siew Hong Teoh, Ph.D. University of Chicago, *Dean's Professor of Management* (earnings management)

Denis Trapido, Ph.D. Stanford University, *Assistant Professor of Management* (effects of competition on the formation of social and economic ties, the origins and rewards of creativity, and the evolution of professional networks)

John G. Turner, Ph.D. Carnegie Mellon University, *Assistant Professor of Management* (media planning/advertising allocation, applied optimization, heuristics and revenue management)

Rajeev K. Tyagi, Ph.D. University of Pennsylvania, *Interim Dean of The Paul Merage School of Business, Professor of Management and Walter B. Gerken Chair in Enterprise and Society* (competitive marketing strategies, game theory, distribution channels, and new products)

Kerry D. Vandell, Ph.D. Massachusetts Institute of Technology, *Director of the Center for Real Estate and Dean's Professor of Management and of Planning, Policy, and Design* (real estate investment, urban/real estate/environmental economics, mortgage finance, housing economics and policy, and valuation theory)

Alladi Venkatesh, Ph.D. Syracuse University, *Professor of Management and Informatics* (impact of new media and information technologies on consumers/households, electronic commerce and the consumer sector, and the future of the networked home)

Libby L. Weber, Ph.D. University of Southern California, *Assistant Professor of Management* (inter-firm relationships, contracts, mergers and acquisitions, capability development, bounded rationality, and complementing economic-based theory with psychological theory with psychological theory to ask new questions)

Margarethe F. Wiersema, Ph.D. University of Michigan, *Dean's Professor of Management* (CEO succession and dismissal, CEO replacement, corporate strategy-product and international diversification, and corporate governance)

Mingdi Xin, Ph.D. New York University, *Assistant Professor of Management* (software and services pricing, software-as-a-service (SaaS) adoption, IT sourcing strategies, IT service contracts, IT workforce and compensation structure)

Shuya Yin, Ph.D. University of British Columbia, *Associate Professor of Management* (supply chain management, operations management, cooperative and non-cooperative game theory in supply chains, and interface of operations management and marketing)

Yu Zhang, Ph.D. Institut Européen d'Administration des Affaires (INSEAD), *Assistant Professor of Management* (interaction between strategy and capital markets, competitive strategy and corporate governance)

Lu Zheng, Ph.D Yale University, *Professor of Management* (investments, equity markets, mutual funds, hedge funds, investor behavior and expectations and institutional trading)

Merage School Undergraduate Programs

Bachelor of Arts in Business Administration

The undergraduate Business Administration program at The Paul Merage School of Business educates students to understand and apply the theories and concepts of effective business and management and prepares students for a wide variety of careers and life experiences. Business Administration majors can pursue careers in the for-profit and not-for-profit sectors or can proceed on to graduate school in several disciplines including business, economics, and law. The program provides a broad learning experience in a multidisciplinary and global context and focuses on the development of essential managerial skills, especially critical thinking, quantitative and qualitative analysis, and effective communication skills.

The Business Administration major at The Paul Merage School of Business offers a traditional business curriculum similar to those at other top business schools in the country. The major is broad, drawing on the social sciences more generally to study organizations, interpersonal communication skills, individual and group behavior, leadership, strategy, financial and accounting issues, ethics, information technology, marketing, and a variety of other topics in the context of a rapidly changing global environment.

The faculty strongly encourages majors to create an educational program composed of courses within and outside the Merage School that provide substance and focus to their careers and enable them to pursue their own personal interests. While preparing students for careers in management, the Merage School, through academic advising, will help students fashion an undergraduate program that they can tailor to their own unique career objectives. Examples of programs of study that allow Business Administration majors to blend management education with specific industry areas include (but are not limited to) bioscience business, government service, international commerce, arts management, entrepreneurship in computer gaming, and other combinations. Through appropriate choice of courses, students can prepare to pursue a law degree, a master's degree in a variety of areas including accounting, or a doctoral program in business or related disciplines.

Students are required to complete 10 business courses that provide a foundation in essential core business competencies, followed by a minimum of 10 business electives to include one emphasis. Students select a minimum of one of seven emphases in Accounting, Finance, Health Care Management, Information Systems, Marketing, Operations and Decision Technologies, or Organization and Management. This program of study enables students to develop areas of focus as they pursue the Business Administration major. Because much business is conducted on a global scale, students are required to either participate in the University's Education Abroad Program or to take one of a number of designated courses that stresses the international dimension of a business area. Students interested in learning more about the full array of requirements for professional licensing in Accounting are encouraged to visit <http://www.dca.ca.gov/cba> and <http://www.cpa-exam.org/>.

While academic course content is crucial to an undergraduate business major, auxiliary noncurricular programs also are important to students' academic experience. The Merage School incorporates a cocurricular element into the classroom experience. Drawing from Merage School and University resources, students are exposed to opportunities to enhance communication and presentations skills, attend formal speaker events, and engage in mentoring. The Merage faculty is committed to ensuring that undergraduate majors have ample opportunity to enhance their writing and presentation skills through class assignments and a business communication course.

Students are strongly encouraged to become involved with the Merage Undergraduate Student Association and with the many affiliated business clubs. These high-profile student groups promote interaction between students and the surrounding business community through their Corporate Speaker Series, social activities, and student/employer receptions. Students with an entrepreneurial interest are invited to participate in the annual Merage School Business Plan Competition offered by the Don Beall Center for Innovation and Entrepreneurship.

Work experience is an important way to learn about business and management. UCI's Internship Program, sponsored by the Career Center, can assist students in finding opportunities to work in either voluntary or paid positions in business, nonprofit, or industrial settings. Students who plan to enter business or apply to a graduate school of business or management in the future will find it necessary to supplement their academic work with a variety of practical experiences. A new Field Studies in Business course provides those with internships an opportunity to potentially participate in a seminar for academic credit.

Another opportunity is UCI's Undergraduate Administrative Intern Program, which offers selected students the opportunity to assume one-year positions under the guidance of University administrators. Students can choose from a range of offices in which they will be asked to undertake special projects specifically related to the management and administration of UCI and higher education in general. These internships are supplemented by a two-quarter management seminar and by field trips to administrative conferences such as meetings of The Regents of the University of California.

Admission to the Major in Business Administration

In the event that the number of students who elect Business Administration as a major exceeds the number of positions available, applicants may be subject to screening beyond minimum University of California admissions requirements.

Freshmen: Preference will be given to those who rank the highest using the selection criteria as stated in the Undergraduate Admissions (p. 37) section of the *Catalogue*.

Transfer students: Junior-level applicants with the highest grades overall (minimum cumulative GPA of 3.0) and who satisfactorily complete lower-division courses equivalent to UCI's calculus (MATH 2A-MATH 2B), economics (ECON 20A-ECON 20B), and statistics and accounting (MGMT 7, MGMT 30A, MGMT 30B) will be given preference for admission. MGMT 1 may be completed at UCI. Admission to the major will be competitive due to limited space availability.

Change of Major

Students who wish to declare the Business Administration major should contact The Paul Merage School of Business Undergraduate Programs Office, 226 MPAA Building, for information about change-of-major requirements, procedures, and policies. Information can also be found at <http://www.changeofmajor.uci.edu>. Review of applications and selection to the major is governed by the Undergraduate Programs Committee. Admission to the major is very competitive due to limited space availability. Completion of the prerequisite courses does not guarantee admission into the major.

Requirements for the B.A. Degree in Business Administration

All students must meet the University Requirements.

Major Requirements

A. Lower-Division:

MATH 2A	Single-Variable Calculus
MATH 2B	Single-Variable Calculus
ECON 20A	Basic Economics I
ECON 20B	Basic Economics II
MGMT 1	Introduction to Business and Management
MGMT 7	Statistics for Business Decision Making
MGMT 30A	Principles of Accounting I
MGMT 30B	Principles in Accounting II

B. Upper-Division Core:

MGMT 101	Management Science
MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 107	Introduction to Management Information Systems
MGMT 109	Introduction to Managerial Finance
MGMT 110	Strategic Management

C. Business Electives: Select 10 upper-division Merage School electives numbered 113–196, to include completion of one of the defined emphases below: ¹

Emphasis in Accounting:

MGMT 131A	Intermediate Accounting I
MGMT 131B	Intermediate Accounting II
MGMT 132A	Individual Taxation

Emphasis in Finance:

MGMT 141	Investments
----------	-------------

and select two of the following:

MGMT 144	Multinational Finance
MGMT 147	Case Studies in Corporate Finance
MGMT 149	Derivatives

Emphasis in Health Care Management:

Select three of the following:

MGMT 160	Introduction to Business and Government
MGMT 165	US Healthcare Systems
MGMT 166	Business in Medicine
MGMT 167	Business of Science

Emphasis in Information Systems:

Select three of the following:

MGMT 171	Social Media
MGMT 173	Business Intelligence for Analytical Decisions
MGMT 174	Database Management and Applications
MGMT 178	Management of Information Technology

Emphasis in Marketing:

Select three of the following:

MGMT 150	Consumer Behavior
MGMT 151	Marketing Research
MGMT 152	New Product Development
MGMT 153	Integrated Marketing Communication
MGMT 154	International Marketing
MGMT 155	Brand Management
MGMT 157	Marketing on the Internet
MGMT 158	Micromarketing
MGMT 159	Design Management

Emphasis in Operations and Decision Technologies:

MGMT 189	Operations Management
MGMT 180	Business Forecasting
MGMT 196	Decision Analysis

Emphasis in Organization and Management:

Select three of the following:

MGMT 122	Communication in Organizations
MGMT 125	Negotiations
MGMT 126	Foundations of Teams
MGMT 128	International Management
MGMT 129	Leadership

D. International Business Requirement: Fulfillment of the International Business requirement by:

1. Selecting one of the following (which may also be used for specified category C requirements above): ¹

MGMT 119	Global Strategies
MGMT 128	International Management
MGMT 144	Multinational Finance
MGMT 154	International Marketing

2. or, participating in select UC Education Abroad Program options, with prior approval of the Associate Dean.

1 By exception, students may petition the Associate Dean to accept an upper-division elective that has business content equivalent to a stated Merage elective.

NOTE: Students majoring in Business Administration may not minor in either Management or Accounting, or double major in Business Information Management. Students may pursue more than one Merage School emphasis via the Business Electives in the category C requirements above. Students are strongly advised to work closely with faculty, staff, and career advisors to tailor a course of study optimal for their educational and career plans. Pairing of particular emphases could be beneficial; examples include Accounting and Finance, Marketing and Information Systems, Operations and Decision Technologies and Information Systems, or Health Care Management and Organization and Management. Students are permitted to pursue additional courses within an area of emphasis to exceed the required three.

Bachelor of Science in Business Information Management

As the business environment becomes increasingly global and information-centric, the need has increased for graduates who understand and can use technology that gathers and provides information, who are able to distill and recognize patterns in that information, and who can apply those analyses to achieve business objectives.

The undergraduate Business Information Management major administered by the Donald Bren School of Information and Computer Sciences is a collaborative, interdisciplinary degree program between the Bren School and The Paul Merage School of Business. The program seeks to educate students to understand and then apply the theories and concepts of a broad, integrated curriculum covering computing, informatics, business fundamentals, and analytical decision-making. The major prepares students for a wide variety of careers and life experiences. Business Information Management majors can pursue careers in the for-profit and not-for-profit sectors or can proceed to graduate school in several disciplines, including information systems, computing, economics, business, and law.

The curriculum is presented across three general academic areas: Computing (computer science, informatics, and software); Business Foundations (accounting, finance, marketing, strategy, and operations); and Analytical Methods (mathematics, statistics, economics, management science, and decision analysis). The fundamentals of information and computer science, including the rudiments of software design and construction with an emphasis on data management, provide the foundation for understanding, describing, and evaluating the technology through which most business information is gathered and presented. The business fundamentals, covering all the functional areas in the Merage School, provide a background and context in which information and its analysis will be applied.

For complete information about the major, see the Interdisciplinary Studies (p. 635) section of the *Catalogue*.

Undergraduate Minor in Accounting

The Paul Merage School of Business faculty offers an undergraduate minor in Accounting consisting of seven upper-division courses. In addition, two lower-division introductory accounting courses, one lower-division microeconomics course, and one lower-division single variable calculus course are prerequisites to the minor program.

In establishing the undergraduate minor in Accounting, the faculty anticipated two types of students to be drawn to courses in accounting: (1) students preparing for careers in accounting or in other fields that require some knowledge of accounting, and (2) students planning to pursue a graduate degree in accounting who wish early guidance and undergraduate work appropriate to this career objective.

Students are eligible to apply for the minor in Accounting if they have upper-division standing and have completed MGMT 30A and MGMT 30B with a grade no lower than B (3.0) and all other prerequisite courses with a grade no lower than C (2.0). Completion of the prerequisite courses does not guarantee admission to the minor in Accounting. Admission is on a competitive basis and students must submit an application, transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, 226 MPAA Building; <http://merage.uci.edu/undergrad>.

Prerequisite Courses

The following are prerequisites for enrolling in the upper-division undergraduate minor courses:

ECON 20A	Basic Economics I
MATH 2A	Single-Variable Calculus
MGMT 30A	Principles of Accounting I
MGMT 30B	Principles in Accounting II

Transfer students should check with their college counselor for established equivalencies for these prerequisite courses. Students not taking MGMT 30A and MGMT 30B at UCI during regular session or summer session must complete MGMT 131A with a minimum grade of B.

NOTE: Individual courses that students may select within the minor may require additional prerequisites.

Requirements for the Undergraduate Minor in Accounting

Completion of seven courses:

A. Three core accounting courses:

MGMT 131A	Intermediate Accounting I
MGMT 131B	Intermediate Accounting II
MGMT 132A	Individual Taxation

B. Select two accounting elective courses from the following:

MGMT 132B	Special Topics in Taxation
MGMT 133	Corporate & Partnership Taxation
MGMT 136	Accounting Information Systems & Spreadsheets
MGMT 137	Advanced Accounting
MGMT 138	Auditing
MGMT 194	Financial Statement Analysis
MGMT 195	Strategic Cost Management and Management Control

C. Select two additional courses from the following:

an upper-division accounting elective course list above	
MGMT 1	Introduction to Business and Management
MGMT 101	Management Science

MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 107	Introduction to Management Information Systems
MGMT 109	Introduction to Managerial Finance
MGMT 113–129, 141–184	
MGMT 189	Operations Management
MGMT 192	Business Law
MGMT 193	The Ethical Environmental of Business
MGMT 196	Decision Analysis
MGMT 197	Probability Models in Management
MGMT 190	Special Topics in Management (provided topics have not been covered in other accounting courses)

With Merage School faculty approval, a student may substitute a maximum of one minor course.

NOTE: Students may not receive both the minor in Accounting and the minor in Management.

Undergraduate Minor in Management

The Paul Merage School of Business faculty offers an undergraduate minor in Management which consists of seven courses. In addition, prerequisites include one lower-division microeconomics course, and one course or one sequence selected from the statistics courses outlined below. MGMT 1 serves as a prerequisite, and also counts as one of the seven courses required for the minor.

In establishing the undergraduate minor, the faculty anticipated three types of students to be drawn to courses in administration: (1) students who wish to learn about the management of organizations as a way of preparing for a career in business, (2) students preparing for careers in other fields that require some knowledge of management, and (3) students who expect to go on to graduate work in management who wish early guidance and undergraduate work appropriate to this career objective.

Students are eligible to apply for the minor in Management if they have completed all prerequisite courses (including MGMT 1) with a grade no lower than C (2.0) and have upper-division standing. Completion of the prerequisite courses does not guarantee admission to the minor in Management. Admission is on a competitive basis and students must submit an application, transcripts, and a statement of purpose. Applications are accepted on a quarterly basis. Interested students are encouraged to obtain further information from the Undergraduate Programs Office, 226 MPAA Building; <http://merage.uci.edu/undergrad>.

Prerequisite Courses

The following are prerequisites for enrolling in the upper-division undergraduate minor courses:

MGMT 1	Introduction to Business and Management
ECON 20A	Basic Economics I

and one course or one sequence selected from:

ANTHRO 10A- 10B- 10C	Probability and Statistics and Probability and Statistics and Probability and Statistics
ENGRCEE 11	Methods II: Probability and Statistics
ECON 15A- 15B	Probability and Statistics in Economics I and Probability and Statistics in Economics II
MGMT 7	Statistics for Business Decision Making
STATS 7	Basic Statistics
STATS 8	Introduction to Biological Statistics
STATS 67	Introduction to Probability and Statistics for Computer Science
MATH 131A- 131B- 131C	Introduction to Probability and Statistics and Introduction to Probability and Statistics and Introduction to Probability and Statistics
SOCECOL 13	Statistical Analysis in Social Ecology
PSYCH 10A- 10B- 10C	Probability and Statistics in Psychology I and Probability and Statistics in Psychology II and Probability and Statistics in Psychology III
SOC SCI 9A- 9B- 9C	General Statistics and Probability I and General Statistics and Probability II and General Statistics and Probability III
SOC SCI 10A- 10B- 10C	Probability and Statistics in Social Sciences I and Probability & Statistics in Social Sciences II and Probability & Statistics in Social Sciences III
SOCIOL 10A- 10B- 10C	Probability and Statistics and Probability and Statistics and Probability and Statistics

Transfer students should check with their college counselor for established equivalencies for these prerequisite courses.

NOTE: Individual courses that students may select within the minor may require additional prerequisites, including MATH 2A.

Requirements for the Undergraduate Minor in Management

Completion of seven courses:

A. One lower-division core course:

MGMT 1	Introduction to Business and Management
--------	---

B. Select four core courses from the following:

MGMT 30A	Principles of Accounting I
MGMT 101	Management Science

MGMT 102	Managing Organizational Behavior
MGMT 105	Introduction to Marketing
MGMT 107	Introduction to Management Information Systems
MGMT 109	Introduction to Managerial Finance
C. Select two of the following:	
a course from the core course list above	
MGMT 113–129, 141–184	
MGMT 189	Operations Management
MGMT 192	Business Law
MGMT 193	The Ethical Environmental of Business
MGMT 196	Decision Analysis
MGMT 197	Probability Models in Management
MGMT 190	Special Topics in Management (provided specific topics have not been covered in other courses)

With Merage School faculty approval, a student may substitute a maximum of one course. Students participating in the UC Education Abroad Program may substitute a maximum of two courses, with Merage School faculty approval.

NOTE: Students may not receive both the minor in Management and the minor in Accounting.

Courses

MGMT 1. Introduction to Business and Management. 4 Units.

Rigorous overview of major business functions and management topics. Addresses the global and fast-changing environment in which modern business enterprises operate as well as the challenges posed by concerns about sustainable growth, ethics, and social responsibility. Course may be offered online.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 5. Management of Contemporary Organisations. 4 Units.

Equips students with working knowledge of several major subject areas within the context of business and society studies. Topics include: role of management in organizations, corporate social responsibility and responsiveness, ethics and values in business, government regulation, and international business.

MGMT 7. Statistics for Business Decision Making. 4 Units.

Basics of data analysis and the fundamental notion of statistical inference emphasizing applications to administrative and management decision problems. Classical estimation and hypotheses testing, regression, correlation, analysis of variance, nonparametric methods and statistical probability. Course may be offered online.

Overlaps with MATH 7, STATS 7, BIO SCI 7, STATS 8, ECON 15A, ECON 15B.

Restriction: Business Administration majors have first consideration for enrollment. MGMT 7 may not be taken for credit if taken after ECON 15A-B. MGMT 7 may not be used to substitute for ECON 15A-B.

(Va)

MGMT 10. Business Management in the World Today. 4 Units.

Accounting scandals, e-commerce, and globalization are only a few examples that show the profound impact of business practices on individuals and on society at large. Provides students with a broad overview of business functions and management practices.

MGMT 30A. Principles of Accounting I. 4 Units.

First course in a series of two introductory-level courses in accounting theory and practice. Emphasis on financial accounting concepts including the corporate financial statements, their content and interpretation, and the impact of financial transactions upon them. Course may be offered online.

Overlaps with ECON 25.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 30B. Principles in Accounting II. 4 Units.

Second course in a series of two introductory-level courses in accounting theory and practice. Continuation of financial accounting concepts and introduction of managerial accounting concepts. Managerial accounting topics include product costing and decision making. Course may be offered online.

Prerequisite: MGMT 30A.

Overlaps with ECON 26A.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 101. Management Science. 4 Units.

Concepts and methods of management science, which applies mathematical modeling and analysis to management problems. Topics include linear and integer programming, project scheduling, inventory management, queuing analysis, decision analysis, and simulation.

Prerequisite: MGMT 7.

Restriction: Business Administration majors have first consideration for enrollment. Upper-division students only.

MGMT 102. Managing Organizational Behavior. 4 Units.

Basic theory and concepts which provide the manager with tools for understanding behavior of people in organizations. Areas such as individual, group, and organizational determinants.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 105. Introduction to Marketing. 4 Units.

Basic marketing concepts; discussion of the role marketing plays in modern society. Topics: Industrial and consumer marketing, promotion, distribution, and pricing theory.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 107. Introduction to Management Information Systems. 4 Units.

Exposure to major features and issues relating to deployment, use, and impact of information technology (IT) within public and private organizations. Topics include selection and feasibility assessment of IT, application of IT to business, and design and implementation of IT.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 109. Introduction to Managerial Finance. 4 Units.

Basics of financial administration. Capital budgeting, cost of capital, cash budgeting, working capital management, and long-term sources of funds. Provides a basic understanding of issues and techniques involved in financial decision making.

Prerequisite: MATH 2B and MGMT 30A.

Overlaps with ECON 134A.

Restriction: Upper-division students only. Business Administration majors have first consideration for enrollment.

MGMT 110. Strategic Management. 4 Units.

Addresses management of the entire business. Role of the general manager in organizations, industry analysis, core competencies, growth through vertical integration, innovation, acquisition and diversification, globalization, strategy implementation, and the ethical and moral responsibility of a manager.

Prerequisite: MGMT 102 and MGMT 105 and MGMT 109.

Overlaps with ECON 147B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 113. New Ventures: A Course in Entrepreneurship. 4 Units.

Introduction to the survival and growth of new ventures. Methods include analysis of live cases, guest speakers, discussion, and field projects with contemporary new ventures to learn about new venture management and surviving the liabilities of newness.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 119. Global Strategies. 4 Units.

Examines the phenomena of technology and globalization and the impact on global business strategy. Macro approach considers implications for development of flexible yet focused business strategy and creative and agile execution of policies. Class discussions are stimulated by case analyses.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 122. Communication in Organizations. 4 Units.

Addressing communication at three levels - interpersonal, group/meeting, and organizational. Dealing with conflict, interpersonal problems, being effective in meetings, and getting your message heard. Experiential course.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 123. Critical Thinking and Creativity in Organizational Problem Solving. 4 Units.

Learn about your own thinking process; develop the ability to think both logically and creatively and to understand how emotions affect your thinking. Class sessions involve discussion and experiential exercises. Business problems and issues are used for discussion and exercises.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 124. Human Resources Management. 4 Units.

Theory and practice of managing human resources. Students will identify and analyze HR dilemmas, apply labor law, and design systems and processes to develop the human resources needed to help organizations achieve their goals.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 125. Negotiations. 4 Units.

Negotiating well is a skill. The objective is to assist students in developing an understanding of different theoretical perspectives. Exploration of feelings and beliefs about negotiation, negotiation skills, and putting theory into action by practicing new negotiation skills.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 126. Foundations of Teams. 4 Units.

Social and psychological processes that detract from effective teamwork. Simulations provide tools to understand how to be a better team member. Provides the foundation for students to become outstanding team leaders and to manage difficult team situations when necessary.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 128. International Management. 4 Units.

Impact of different cultures and political/economic systems on assumptions, expectations, and organizational practices relevant to conducting business in different national settings. Understanding of the challenges of cross-national management and resources utilized to work and conduct business outside the United States.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 129. Leadership. 4 Units.

Challenges facing today's leaders. Case analyses, free-form discussion, and written assignments designed to develop critical thinking skills. Experiential exercises encourage students to develop their ability to risk innovation, foster collaboration, manage conflict, and value diversity.

Prerequisite: MGMT 102.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 131A. Intermediate Accounting I. 4 Units.

First course in a series of two intermediate-level courses in financial accounting theory and practice. Concepts include valuation and reporting of current and long-term assets, current liabilities and contingencies, and revenue recognition issues.

Prerequisite: MGMT 30A and MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 131B. Intermediate Accounting II. 4 Units.

Second in a two-course series. Topics include the recognition and valuation of long-term liabilities, accounting for stockholders' equity, and the Statement of Cash Flows.

Prerequisite: MGMT 131A.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 132A. Individual Taxation. 4 Units.

Fundamentals of federal income taxation pertaining to individuals. Topics include income, deductions, credits, property transactions, and the impact of taxes on business and investment decisions.

Prerequisite: MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 132B. Special Topics in Taxation. 4 Units.

Taxation topics of particular interest to undergraduate students. Course content may vary each term depending on the interests of the instructors and the students.

Prerequisite: MGMT 132A.

Repeatability: Unlimited as topics vary.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 133. Corporate & Partnership Taxation. 4 Units.

A study in the federal income taxation of partnerships and corporations, including subchapter S corporations. Emphasis on the tax issues associated with formation, operation, and termination of these entities.

Prerequisite: MGMT 132A.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 136. Accounting Information Systems & Spreadsheets. 4 Units.

Fundamentals of accounting information systems including internal controls and transaction processing cycles. Development of efficient spreadsheets as applied to financial and managerial accounting concepts.

Prerequisite: MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 137. Advanced Accounting. 4 Units.

Accounting theory and practice with emphasis on business combinations, consolidated financial statements, foreign exchange transactions, and governmental and nonprofit organizations.

Prerequisite: MGMT 131B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 138. Auditing. 4 Units.

An introduction to auditing practice with emphasis on the verification of financial statements and related information. Topics include professional ethics, assessment of audit risk, study and evaluation of internal control, gathering and evaluating audit evidence, and audit reporting.

Prerequisite: MGMT 131B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 141. Investments. 4 Units.

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMT 109.

Overlaps with ECON 132A.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 144. Multinational Finance. 4 Units.

Focuses on financial issues facing multinational corporations, the most important of which is the management of foreign exchange risk. Introduction to investments and financing decisions in international capital markets.

Prerequisite: MGMT 109 and ECON 20A and ECON 20B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 147. Case Studies in Corporate Finance. 4 Units.

A case study course using the principles of financial value creation for optimum performance. Introduction to venture capital, IPOs, real options, mergers and acquisition, stock buybacks, dividends, and recapitalizations.

Prerequisite: MGMT 109.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 149. Derivatives. 4 Units.

Introduction to options, futures, and other derivatives. First covers forward, futures, and swaps, and then examines the pricing of options. Applications of these instruments are emphasized.

Prerequisite: MGMT 109.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 150. Consumer Behavior. 4 Units.

Application of the behavioral sciences to understanding buyer behavior. Topics include perception, memory, affect, learning, persuasion, motivation, behavioral decision theory, social and culture influences, and managerial implications.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 151. Marketing Research. 4 Units.

Research to aid managerial decisions for products and services; problem formulation, research design, data collection, sampling, statistical analyses, managerial recommendations, and implementation in several real-world settings.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 152. New Product Development. 4 Units.

Identifying markets, developing product ideas, measuring consumer preferences, positioning and designing products, and forecasting their sales. Hands-on experience with software to conduct various analyses useful in new product development, such as cluster analysis, factor analysis, and conjoint analysis.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 153. Integrated Marketing Communication. 4 Units.

Management of the communication aspect of marketing strategy. Emphasis on emotional experiences, persuasive appeals, sales promotion, public relations, and direct marketing. Topics include setting communications objectives and budgets, media selection, creative strategy, and sales promotion techniques.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 154. International Marketing. 4 Units.

Students are exposed to the challenges and opportunities facing marketers in the international marketplace. Special attention is given to the management of cultural differences in product development, distribution systems, pricing, and promotion.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 155. Brand Management. 4 Units.

Introduction to issues in planning, implementing, and evaluating brand strategies, relevant theories, models, and tools for the making of brand decisions; application of these principles.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 157. Marketing on the Internet. 4 Units.

Recent developments in interactive technologies indicate that "Marketing on the Internet" is becoming a serious business activity, with exponential growth. How to do marketing on the Internet and to identify the key issues pertaining to the marketing process.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 158. Micromarketing. 4 Units.

Develop marketing plans for specific retail locations and neighborhoods based on past purchases and demographics. Retail site selection, product category management, promotion management, shelf space allocation, targeted advertising. Hands-on experience with Retail Sales Analysis and Geographic Information Systems software.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 159. Design Management. 4 Units.

Design of products and services, particularly in consumer- and technology-oriented industries where design is viewed as a strategic resource. User-oriented design, design as a strategic tool, the role of design aesthetics, and the management of design.

Prerequisite: MGMT 105.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 160. Introduction to Business and Government. 4 Units.

Introduces undergraduate students to the study of public administration. Designed for those expecting to take further courses in the field or considering a public service career.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 165. US Healthcare Systems. 4 Units.

Providers, suppliers, payers, and consumers, and the unique market dynamics among these players. Structure, organization, and financing of health care. The health care industry's relationship to the overall economy will be explored.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 166. Business in Medicine. 4 Units.

In order to improve the quality and efficiency of healthcare delivery one must understand the design and management of healthcare operations. Opportunities for innovation and changes needed to design a simple, accessible, fair, and effective healthcare system.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 167. Business of Science. 4 Units.

Business acumen and strategic planning are determining success. Billions spent on advertising, and the lack of effectiveness of drugs are generally ignored. Considering this is a matter of life and death for many, should there be a "Business" of Science?.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 168. Economics of Strategy. 4 Units.

Applies key concepts of game theory to the analysis of the strategic behavior of profit-maximizing firms. Simultaneous move games, sequential games, credibility and commitment, repeated games, pure and mixed strategies, signaling, and screening. Lecture and problem sets. Group projects.

Prerequisite: ECON 20A and ECON 20B.

Overlaps with ECON 147B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 169. Applied Econometrics for Business. 4 Units.

Bridge between an introductory statistics course and a course in econometrics. Oriented toward the ways in which economists use data to motivate and test economic theories. How to locate economics data, analyze, and appropriately interpret these data.

Prerequisite: ECON 20A and ECON 20B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 170. Technologies for Business. 4 Units.

Introductory course that include hands-on exposure to powerful, high-level tools for using computers in business situations more effectively. Next-generation graphical user interfaces, Internet applications, client/server technology, information security, and wireless.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 171. Social Media. 4 Units.

Covers theoretical aspects and business applications of social media tools including blogs, wikis, social networking platforms, immersive environments, and other social computing technologies. Also covers business value of social-media-enabled processes.

Restriction: Business Administration and Business Information Management majors have first consideration for enrollment.

MGMT 173. Business Intelligence for Analytical Decisions. 4 Units.

BI from both managerial and technical perspectives. Strategic role of BI. Software tools coupled with case studies are used to show how leading companies are using BI technologies to turn complex data into business decisions.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 174. Database Management and Applications. 4 Units.

Query, manipulate, and understand data and learn about leading edge applications for databases. Database fundamentals including entity relationship design, creating database tables, normalization, and data querying. Contemporary applications of database using case studies. Applications include data warehousing, data mining.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 175. Information Technology (IT) and Strategy. 4 Units.

Strategic and competitive uses of IT and the Internet. Globalization and firm competition; alignment of IT with business strategy; business value of IT; business transformations with IT; implications of offshoring and outsourcing; strategy and IT in the Internet era.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 178. Management of Information Technology. 4 Units.

Strategic use and impact of information technology (IT) in organizations. Covers what IT is, and how it works, business value of IT, and IT strategies that organizations can employ to create value.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 179. Business Data Communications and Security. 4 Units.

Analysis, technology integration, and technology choices involved with deploying, managing, and securing effective data communications systems, local area networks, Internet, intranet, and wide area networks. Fundamental concepts, as well as enabling technologies that can provide a strategic advantage to firms.

Prerequisite: MGMT 107.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 180. Business Forecasting. 4 Units.

Forecasts are critical inputs into the wide range of business decision making. Users include accountants, financial experts, human resource managers, production managers, and marketing people. Methodologies used to support business decision making. Computer-oriented approach.

Prerequisite: MGMT 101.

Overlaps with ECON 125.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 182. Supply Chain Management. 4 Units.

Flows of materials and information among all of the firms that contribute to a product or service. Forecasting, demand management, logistical networks, inventory management, supplier contracting, sourcing, information technology, flexibility, globalization, and performance management.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 184. Optimization in Management. 4 Units.

Firms attempt to maximize profit or minimize cost. Linear, integer, and nonlinear programming models in functional areas of business such as finance, marketing, and operations. Solutions via computer and interpretation of output in a managerially significant way.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 189. Operations Management. 4 Units.

Managing the productive resources, from which raw materials as inputs are being transformed into useful outputs of final products and services. Explanation of issues pertaining to both manufacturing and services-oriented system.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 190. Special Topics in Management. 1-4 Units.

Special topics courses are offered from time to time, but not on a regular basis.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 191W. Business Communication. 4 Units.

Provides students with a solid foundation in business communication. Emphasis is placed on improving students' written and oral communication skills to help them succeed in (1) upper division Business Administration courses, (2) graduate school, and (3) work and career activities.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Business Administration majors have first consideration for enrollment.

(Ib)**MGMT 192. Business Law. 4 Units.**

A study of the legal environment of business. Topics include contracts, agency, partnerships, corporations, and other basic principles of law as they relate to business transactions.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 193. The Ethical Environmental of Business. 4 Units.

The political, social, and ethical environmental of business. Topics include the historical development of American business, competitiveness problems, corporate social responsibility, corporate governance, and government regulation of business.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 194. Financial Statement Analysis. 4 Units.

Study of financial statements and their related footnotes; tools and procedures common to financial statement analysis; relationships among business transactions, environmental forces (political, economic, social), and reported financial statement information; how financial statement information can help solve certain business problems.

Prerequisite: MGMT 30A and MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 195. Strategic Cost Management and Management Control. 4 Units.

Study of cost management to strengthen an organization's strategic position; preparation and use of relevant information for management decision making; management control systems design and performance evaluation.

Prerequisite: MGMT 30A and MGMT 30B.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 196. Decision Analysis. 4 Units.

Making good decisions fast is important in world where information is ubiquitous and technologies change at incredible paces. Conceptual framework and information technology tools to approach these situations with clarity and confidence and improve both professional and personal decision-making skills.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 197. Probability Models in Management. 4 Units.

Probability models that characterize random phenomena in real-world applications. Applications of these probability models to business disciplines including operations management and finance. Discrete-time Markov chains, Poisson processes, birth and death processes, queuing models, and random walk.

Prerequisite: MGMT 101.

Restriction: Business Administration majors have first consideration for enrollment.

MGMT 198A. Administrative Internship. 4 Units.

Selected undergraduates serve as managers within administrative units on campus with three-quarter course which complements the intern experience. Topics include: management ethics, study of non and for profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

MGMT 198B. Administrative Internship. 4 Units.

Selected undergraduates serve as managers within administrative units on campus with three-quarter course which complements the intern experience. Topics include: management ethics, study of non and for profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

MGMT 198C. Administrative Internship. 4 Units.

Selected undergraduates serve as managers within administrative units on campus with three-quarter course which complements the intern experience. Topics include: management ethics, study of non and for profit institutions, career management, and the changing nature of the workforce.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

MGMT 199. Independent Study. 1-4 Units.

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

MGMT 200. Management of Innovative Organizations. 7 Units.

Using concepts from organization studies and strategy, students examine different frameworks for analyzing and designing innovative organizations, the foundations of strategy and competitive analysis, alliances and networks as a source of innovation, and key issues in managing innovation effectiveness.

Grading Option: Satisfactory/unsatisfactory only.

Same as MGMT EP 200, MGMT FE 200.

Restriction: Master of Business Administration students only.

MGMT 201A. Statistics for Management. 5 Units.

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics: classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Same as MGMT EP 201A, MGMT FE 201A.

MGMT 201B. Management Science. 5 Units.

Introduction to management science tools for aiding managerial decision making with emphasis on model applicability, formulation, and interpretation. Use of computer laboratory's management science software packages. Topics: mathematical programming, stochastic processes, queueing systems, simulation.

Same as MGMT EP 201B, MGMT FE 201B.

MGMT 202. Organizational Analysis for Management. 5 Units.

Develops a better understanding of the causes and consequences of individual and group behavior, and the frameworks by which to analyze and understand complex organizations; and enhances the skills required to manage and lead an organization.

Same as MGMT EP 202, MGMT FE 202.

Restriction: Master of Business Administration students only.

MGMT 203A. Financial Accounting for Management. 4 Units.

Examines issues related to measuring and communicating an entity's economic activities and financial position and introduces financial statement analysis. The aim of financial accounting is to provide financial information that is useful in making economic decisions.

Same as MGMT FE 203A, MGMT EP 203A.

Restriction: Master of Business Administration students only.

MGMT 203B. Managerial Accounting for Management. 5 Units.

Involves developing and using financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions.

Same as MGMT 203B, MGMT FE 203B.

MGMT 204A. Microeconomics for Management. 5 Units.

Provides basic tools for analyzing economic decisions of consumers and firms, the determinants and consequences of market structure and market failure. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, and introductory game theory.

Same as MGMT EP 204A, MGMT FE 204A.

Restriction: Executive M.B.A. students only.

MGMT 204B. Macroeconomics for Management. 5 Units.

Focuses on the use of macroeconomic analysis to manage the business cycle for competitive advantage. Such "business cycle-sensitive" management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures.

Prerequisite: MGMT EP 204A.

Same as MGMT EP 204B, MGMT FE 204B.

Restriction: Master of Business Administration students only.

MGMT 205. Marketing Management. 4 Units.

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Same as MGMT FE 205, MGMT EP 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT 206. Business and Government. 4 Units.

Introduces students to the many non-market issues that affect today's managers, such as: environmental protection, health and safety, intellectual property protection, antitrust, and lobbying. An interdisciplinary approach using economics, political science, public policy and law.

Same as MGMT FE 206, MGMT EP 206.

Restriction: Master of Business Administration students only.

MGMT 208. Operations Management. 4 Units.

Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics: product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management.

Same as MGMT FE 208.

MGMT 210. Business Strategy. 4 Units.

Examines the functions and responsibilities of senior management and the decisions that determine the direction of the organization and shape its future. Introduces students to concepts, frameworks, and analytical techniques firms use to analyze strategic issues.

Prerequisite: MGMT 202 and MGMT 205 and MGMT 209A.

Same as MGMT FE 210, MGMT EP 210.

Restriction: Master of Business Administration students only.

MGMT 299. Individual Directed Study. 1-8 Units.

Individual study under the direction of a selected faculty member.

Same as MGMT FE 299, MGMT EP 299.

- Executive M.B.A.
- Health Care Executive M.B.A.
- Master of Professional Accountancy

Educational Objectives

The Paul Merage School of Business offers a generalist M.B.A. degree and a learning experience that prepares graduates for a lifetime of professional and personal growth with increasingly important enterprise-wide responsibilities. The rigorous curriculum, combined with extensive professional and interpersonal training and opportunities made available through the School's M.B.A. Career Center, allows students to gain theoretical perspectives that are in turn tested and affirmed with practical application. The result is an environment that fosters the development of professional and personal skills vital to contemporary executives or managers. Students are encouraged to develop their ability to lead change by mastering communication skills, to work productively and actively within a team-oriented environment, to gain a solid grasp of quantitative skills, and to appreciate and effectively employ those solutions that involve the integration and implementation of information and technology to offer creatively viable business options.

The School has developed a thematic approach to business education: sustainable growth through strategic innovation. The goal is to graduate leaders with the exceptional ability to grow their organizations through strategic innovation supported by analytic decision making, information technology, and collaborative execution. Although a solid grounding in basic business disciplines provides the foundation for effective management, graduates are encouraged to aim higher. They learn about change as it takes place within the context of a knowledge-based, technology-driven society where information and its effective use are vital to establishing a competitive edge. Students, whether they are interested in finance, marketing, general management, strategic planning, accounting, operations, health care, human resources, international business, or other areas, will be thoroughly imbued and comfortable with the nature and importance of strategic innovation and how crucial it is toward sustaining growth in today's competitive global economy. Further, they will understand the impacts of technology and the technological processes that enable the gathering, analysis, dissemination, and use of information to change the way business is done. The thematic approach of the School provides a skill-set, core understanding, and depth of knowledge that will enable its graduates to be effective managers who are not only proficient in business procedures but have the leadership qualities and conceptual framework to affect change by transforming conventional business practices or perhaps even inventing new business processes and management techniques.

Additionally, The Paul Merage School of Business has achieved a national reputation for excellence in graduate management education in the health care industry through the Health Care Executive M.B.A. (HCEMBA) program. Industry managers and health care professionals learn about managerial challenges and issues in the health care industry where hundreds of health care providers, medical device and instrumentation companies, and biosciences firms are headquartered. Joint M.D./M.B.A. and J.D./M.B.A. programs are also available.

General Admission Requirements

Evaluation of the applicant's file for admission to the Master's and Ph.D. degree programs will consist of an integrated assessment of all materials (test scores, transcripts of previous academic work, work experience, essays, and letters of recommendation). The University

Merage School Graduate Programs

- Ph.D.
- Full-Time M.B.A.

admission standard of a 3.0 or better undergraduate grade point average (on a 4.0 scale) is required. The minimum TOEFL (Test of English as a Foreign Language) score acceptable for study at the School for all M.B.A. programs is 550 on the paper-based test; 250 or better on the computer-based test; or 80 or better on the Internet-based test. (The Ph.D. program minimum acceptable score is 600 on the paper-based test; 250 or better on the computer-based test; or 100 or better on the Internet-based test.) International M.B.A. applicants may also take the Pearson Test of English (PTE), where the minimum score required for admission is 53; or the International English Language Testing System (IELTS), where the minimum score required is 7. Substantive work experience is considered for applicants to M.B.A. programs.

Requests for application material should be addressed to either the Full-Time M.B.A. (SB 220), Fully Employed M.B.A. (SB 202), Executive M.B.A. (SB 230), Health Care Executive M.B.A. (SB 230), or Ph.D. Program (SB 418) at

The Paul Merage School of Business
University of California, Irvine
Irvine, CA 92697-3125

Doctor of Philosophy in Management

The Paul Merage School of Business admits students for the Ph.D. in the fall quarter only. The deadline for application is January 4. The Ph.D. program requires a commitment to full-time study. In addition to the other requirements, Ph.D. applicants are encouraged to submit a previously prepared paper (research report, research essay, case study) which may be indicative generally of the applicant's interests and capabilities.

The School offers the Ph.D. in Management to students with backgrounds in a variety of disciplines. While a master's degree is preferred, students may be admitted to the doctoral program directly from the baccalaureate degree. There are many appropriate undergraduate majors, including (but not limited to) psychology, political science, business or public administration, mathematics, computer sciences, economics, sociology, and so forth. Students with academic strengths in disciplines not usually considered as precursors for management (e.g., natural sciences, humanities, and the arts) are encouraged to apply. The Ph.D. program is designed to prepare students for academic careers in a number of the fields of management, e.g., organization and management, strategy,

operations and decision technologies, management information systems, finance, accounting, and marketing. Requirements of the Ph.D. program include a broad knowledge of core management disciplines. In addition, the Ph.D. student must qualify as a skilled researcher and must complete a dissertation demonstrating these skills.

The Ph.D. program is divided into two phases: qualification and dissertation. In the qualification phase the student prepares for dissertation research in an area of specialization. This phase is completed when an oral qualifying examination is passed and the candidacy committee recommends advancement to candidacy for the Ph.D. The normative time for advancement to candidacy is three years. The dissertation phase involves a significant original research project which demonstrates the Ph.D. student's creativity and ability to launch and sustain a career of research. The normative time for completion of the Ph.D. is four years, and the maximum time permitted is six years.

Requests for information should be addressed to the University of California, Irvine, The Paul Merage School of Business, Doctoral Program Admissions Office, 418 School of Business, Irvine, CA 92697-3125; phd@merage.uci.edu; <http://merage.uci.edu/PhD>.

Master's Degree Programs

The Paul Merage School of Business offers a variety of programs leading to the M.B.A. (Master of Business Administration) degree. These include a two-year, Full-Time M.B.A. program, and three part-time M.B.A. programs including: a 21-month Executive M.B.A. program, a 21-month Health Care Executive M.B.A. program, and a three-year Fully Employed M.B.A. program. Additionally, a four-year concurrent J.D./M.B.A. program is offered in conjunction with the School of Law, and a five-year M.D./M.B.A. program is offered in conjunction with the School of Medicine.

The M.P.Ac. (Master of Professional Accountancy) program is offered by the Merage School. Click here for a full description of the program.

The M.S. in Engineering Management is offered jointly with The Henry Samueli School of Engineering (p. 314).

The M.S. in Biotechnology Management is offered jointly with the Department of Molecular Biology and Biochemistry (MB&B) in the School of Biological Sciences (p. 196) and the Department of Biomedical Engineering in The Henry Samueli School of Engineering.

M.B.A. Program

The Paul Merage School of Business admits students to the two-year, Full-Time M.B.A. program in the fall quarter. Students from a variety of undergraduate disciplines, including liberal arts, social sciences, physical or biological sciences, computer science, and engineering, are encouraged to apply. The final deadline for completion of all phases of the application procedure is generally around April 1. However, since admissions are received on a rolling basis, applicants are encouraged to check with the M.B.A. Admissions Office regarding application submission. In addition to the general University rules governing admission to graduate study, the School normally requires the completion of the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE). There are no specific prerequisite requirements for the Full-Time M.B.A. program. However, the Admissions Committee does look for evidence of quantitative proficiency in all applicants.

The evaluation of an applicant's file for admission consists of an integrated assessment of all materials submitted including test scores, transcripts of previous academic work, work experience, essays, and letters of

recommendation. The M.B.A. program at The Paul Merage School of Business is distinctive for its focus on providing students the capabilities and skills to succeed in the technology-rich Innovation Economy. Students develop a sophisticated understanding of the new requirements for success in the School's curriculum that emphasizes the critical drivers of the Innovation Economy: Strategic Innovation, Information Technology, Analytical Decision Making, and Collaborative Execution.

This understanding is advanced through experiential learning course work in which teams of students work on challenging assignments for leading companies. Another distinctive feature of the program is the "Edge" capstone course on the future of business where students explore specific industries and companies and discover what actions must be taken today to reap the benefit from long-term trends in technologies, geopolitics, demographics, and macroeconomics.

The Full-Time M.B.A. program requires a minimum of 92 units with a minimum grade point average of 3.0 in the Core and overall. The curriculum consists of courses divided into two groups designed to achieve specific educational objectives. The courses are divided as follows: 13 required Common Core Courses (50 units) and 42 units of elective courses which students select to emphasize career goals and educational interests. A thesis is not required.

Required Course Work. Common Core Courses are Management of Innovative Organizations, Statistics for Management, Management Science, Operations Management, Organizational Analysis, Financial and Managerial Accounting, Microeconomics, Macroeconomics or Business and Government, Information Technology for Management, Marketing Management, Managerial Finance, Business Strategy.

International Requirement. Students must fulfill the requirement in one of the following ways: completion of a Paul Merage School of Business international elective in a functional area; participation in a Paul Merage School of Business international exchange program; or completion of an upper-division or graduate international course offered by another UC school, with the approval of The Paul Merage School of Business Associate Dean.

Electives. In addition to the core courses, 42 more units of elective courses are required. The major emphasis in the elective courses is to develop additional depth in a discipline or interdisciplinary area or specialized competence in the use of a particular set of technical tools and methods. Students select their electives in light of their educational and career goals and interests.

J.D./M.B.A. Degree Program

Highly qualified students interested in combining the study of law with professional qualifications in business are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students approved for this concurrent degree program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with an M.B.A. degree from The Paul Merage School of Business. The objective of the program is to promote interdisciplinary study of law while also enabling students to obtain both a J.D. and a business degree in less time than would be required to acquire both degrees separately. The normative time for completion of the J.D./M.B.A. program is four years.

UC Irvine's PLGS program is well suited to students interested in professional or academic careers focused on the interdisciplinary or multidisciplinary study of law and legal institutions, policy analysis, and/or applied research in law-related fields (for example, taxation, corporate

reporting and governance, regulation and compliance, discrimination, securities, property, real estate, and intellectual property).

Applicants must submit separate applications for admission to the School of Law and to the Merage School. Once admitted for study into both components of the program, concurrent degree students will work with the PLGS director and the director of the Full-Time M.B.A. program to develop a program of study that will permit efficient pursuit of both degrees. Concurrent degree students' law enrollments will include a required 1-unit "Graduate Legal Studies" colloquium and a 3-unit "Interdisciplinary Perspectives on Law" course. Concurrent degree students will be eligible to apply for financial support through the Merage School while pursuing their M.B.A., and through the School of Law while pursuing law studies.

Program Structure. Students in the program complete a four-year combined curriculum leading to a J.D. degree from the UCI School of Law and an M.B.A. degree from the The Paul Merage School of Business. The total number of units required to graduate from each program separately are satisfied by completing the J.D./M.B.A. program. There are several curriculum scheduling options available to complete this program.

Program Overview. The School of Law requires students to complete 86 law semester units of study for the J.D., 68 of which must be classroom units of law instruction. The remaining 18 law units can be completed outside the School of Law, at the student's discretion, and with approval of the School's Dean of Students. Ten of these 18 law units of non-law instruction can be obtained in courses undertaken in the concurrent degree department. The remaining eight law units are typically spent in non-classroom clinical practice.

The Full-Time M.B.A. program operates on a quarter system and requires a minimum of 92 M.B.A. units. The curriculum consists of courses divided into two groups designed to achieve specific educational objectives. The courses are divided as follows: 13 required Common Core Courses (50 M.B.A. units) and 42 M.B.A. units of elective courses which students select to emphasize career goals and educational interests. A maximum number of 120 hours of classroom instruction, or 16 M.B.A. units (normally four 4-unit quarter courses) may be utilized toward the M.B.A. degree, total, from sources outside of UCI's Merage School. This includes any "non-Merage course approvals" taken in other UCI units, intercampus exchange courses, etc.

The M.B.A. component of the J.D./M.B.A. requires that the 16 M.B.A. units of electives permitted from outside the Merage School may be (but are not restricted to be) taken from among appropriate School of Law electives, but may not be counted simultaneously toward satisfying concurrent degree requirements in the School of Law.

Detailed information about J.D./M.B.A curriculum paths is available online at <http://merage.uci.edu>.

M.D./M.B.A. Degree Program

The M.D./M.B.A. program requires five or six years for completion. It is aimed at individuals who are exceptional in ability and motivation and who seek a career as physicians with major responsibility for administration and management in health care organizations and institutions. Students in this program pursue a combined curriculum for an M.D. degree from the School of Medicine and an M.B.A. degree from The Paul Merage School of Business.

Students must be currently enrolled in the M.D. program and in good academic standing in order to apply to the combined M.D./M.B.A. program. During their second or third year of medical school, interested

students submit an application to The Paul Merage School of Business Admissions Committee, after review by the School of Medicine. Final acceptance to the program is granted by The Paul Merage School of Business, and M.B.A. course work begins following completion of the student's third year of medical school. Students should be aware that enrollment in the M.D. program does not guarantee acceptance into the M.B.A. program.

The MCAT, along with the completion of three years of medical school training in good standing and passage of USMLE Step I, currently serve as a waiver for the GMAT entrance examination usually required for application to the M.B.A. program. The total number of units required to graduate for each program separately are satisfied in the M.D./M.B.A. program. Contact the M.D./M.B.A. Advisor at (949) 824-5388 for more information.

M.S. in Engineering Management Degree Program

The Master of Science in Engineering Management is a graduate degree offered jointly by The Paul Merage School of Business and The Henry Samueli School of Engineering that will prepare engineers for leadership roles in technology, science, government, and engineering-based companies and organizations. The curriculum includes courses in engineering from The Henry Samueli School of Engineering and courses in business administration from The Paul Merage School of Business. Students will learn to think innovatively as business and engineering project managers to solve complex engineering product development challenges through consulting projects, business plans and exposure to current issues within the engineering sector. Students will develop quantitative and qualitative skills along with business communication skills.

In this competitive program, students will learn about business from the engineering perspective and engineering from the business perspective. Students will be taught to think about their work through the lens of innovation and to develop a crucial view to enhance their careers.

For more information about the program, see The Henry Samueli School of Engineering (p. 314) section of the *Catalogue*.

M.S. in Biotechnology Management Degree Program

The M.S. in Biotechnology Management is a joint graduate degree that will prepare scientists for leadership roles in biotechnology, science, and engineering-based companies through a curriculum comprised of courses from the Department of Molecular Biology and Biochemistry (MB&B) in the School of Biological Sciences, the Department of Biomedical Engineering in The Henry Samueli School of Engineering, and The Paul Merage School of Business. Students will receive advanced training in biotechnology through course work, a teaching laboratory, and two quarters of independent research in a faculty laboratory of their choosing. They will also learn to think as a business manager by solving product development challenges through consulting projects, creating business plans, and by exposure to current issues within the biotechnology sector. Students will develop quantitative and qualitative skills along with business communication skills. Students will learn about business from the biotechnology perspective and biotechnology from the business perspective, and will be taught to think about their work through the lens of innovation, a crucial view for their careers.

For more information about the program, see the School of Biological Sciences (p. 196) section of the *Catalogue*.

Special Opportunities

The Paul Merage School of Business offers course work in health care management within the M.B.A. program. The courses provide training not only in health care and related issues, but also expose students to professionals in the areas of management, finance, marketing, and strategic planning.

In today's interconnected global business world, it has become increasingly important for management students to learn to operate in an international environment. M.B.A. students in the full-time program can gain first-hand knowledge of the culture and management practices of other industrialized countries by participating in an academic exchange with universities located abroad. This experience, combined with course work in international management, prepares students for the demands and complexities of the growing global economic environment. Currently, The Paul Merage School of Business has exchange relationships with Bocconi University, Milan, Italy; Budapest University of Economic Sciences (BUES), Budapest, Hungary; Chinese University of Hong Kong (CUHK), Hong Kong; HEC School of Management, France; ESSEC Graduate School of Management, France; Fudan University, Shanghai, China; Hong Kong University of Science & Technology, Hong Kong; Maastricht University, Netherlands; National University of Singapore (NUS), Singapore; Pontificia Universidad Catolica de Chile (PUC), Santiago, Chile; Vienna University of Economics and Business Administration, Vienna, Austria; and Yonsei University, Seoul, Korea.

Centers of Excellence

Founded in 2007, **The Don Beall Center for Innovation & Entrepreneurship** provides thought leadership in the fields of entrepreneurship education and innovation research to both the students and faculty of The Paul Merage School of Business and the greater worldwide academic community. Through the Center and its activities, a campuswide community of involvement for students and researchers passionate about innovation and entrepreneurship has been organized around a nexus of active volunteers, board members, and alumni who provide world-class programs, resources, and relationships to the University in the area of entrepreneurship and new venture creation.

The **Center for Global Leadership** is an important resource for UC Irvine and The Paul Merage School of Business students. The Center offers various courses, co-curricular programs, and events to explore ideas and develop partnerships with other students, faculty members, corporate professionals, and nonprofit entities. The Center's co-curricular programs facilitate the leadership development of M.B.A. students through two flagship programs, the Executive Mentoring Program and the Social Responsibility Initiative. Both programs connect students with key professionals in the industry to learn through reflection, through practice, and through relationship building. The Distinguished Speakers Series (DSS), the largest event hosted by the Center, involves approximately 250 corporate professionals, community leaders, faculty members, staff, and students and provides an important way to exchange ideas, connect to corporate professionals, and network.

The **Center for Real Estate** at The Paul Merage School of Business is an integral and indispensable component of the program in Real Estate and Urban Development at UC Irvine. In addition to offering eight real estate elective courses, it provides students with a network of connections to the business community, including members of its Advisory Board, industry leaders, and an alumni. The Center offers fellowships, extracurricular activities, and resources that enhance the M.B.A. learning experience.

The **Center for Health Care Management and Policy** at The Paul Merage School of Business advances knowledge through research and education while providing forums for dialogue on crucial challenges and concerns facing the nation's health care system today. This interdisciplinary research institute brings together health care scholars, policy experts, and industry professionals to share vital information and a range of perspectives on such fundamental issues as quality of care, cost, and access. A wide range of programs contribute to the debate on national health care policy and help leaders in government, business, and nonprofit organizations make better-informed decisions. The Center's activities build on the Merage School's health care-oriented educational programs, including its nationally acclaimed Health Care Executive M.B.A. program and its M.D./M.B.A. joint degree program.

The **Center for Digital Transformation** is focused on generating and disseminating knowledge that helps businesses, governments, and society adapt to and leverage the possibilities enabled by emerging digital technologies. Research themes include digital economics, new business models and processes, digital services marketplace, and big data and analytics. CDT serves as an interdisciplinary research institute drawing on economists, behavioral scientists, sociologists, and computer scientists. The Center deploys an open innovation model, partnering with companies, nonprofits, experts, and the community at large to identify and address critical research questions.

The **Center for Investment and Wealth Management** is dedicated to the mission of educating Merage School M.B.A. students in the area of investment and wealth management. The Center seeks to enhance students' educational experience and help them to advance their professional expertise and growth at the same time. The education that the Center provides is a collaborative effort between UC Irvine's expert faculty and seasoned professionals dedicated to sharing their experience and knowledge. The concept is to create cutting-edge curriculum with the flexibility to teach students topics in real time. This year, a number of the Center's board members have participated as distinguished lecturers. They are prominently known in the wealth management community and speak to students about their career path, the industry, and ways to achieve success. They are from a wide array of backgrounds including financial institutions, investment companies, law firms, accounting firms, and wealth management companies in Orange County and beyond.

The **John S. and Marilyn Long U.S.-China Institute for Business and Law** at UC Irvine is a premier research entity established to facilitate and further develop legal and commercial relationships between the United States and China. The Long Institute is a collaborative effort between The Merage School of Business and the School of Law at UC Irvine, and will involve chaired professors with extensive expertise in the areas of both business and law as it relates to the U.S and China. The Institute serves to promote a bilateral understanding and engagement between the two economic superpowers and will feature events and research involving both scholars and practitioners from various industries engaging in U.S.-China trade. Students and faculty can also be involved by participating in exchange programs with major Chinese universities.

M.B.A. Career Center

The M.B.A. Career Center, located within the School, was established to serve the unique placement needs of M.B.A. students and alumni. It has two main functions: (1) attracting a variety of organizations to interview and hire graduates and (2) counseling students in career opportunities and the techniques necessary to conduct effective job searches, not only for their first jobs but throughout their careers. The relatively small size of

the M.B.A. program allows considerable interaction between the Career Center and students.

Executive M.B.A. Program

The Executive M.B.A. (EMBA) program presents a challenging 21-month course of study specifically designed for executives, senior managers, professionals, entrepreneurs, and technical experts throughout Southern California. Participants have significant work experience (with a minimum of eight years), demonstrated leadership abilities, and a proven track record of success. Commencing each fall, students meet for seven consecutive quarters on alternate weekends (Friday and Saturday) at The Paul Merage School of Business. Class size allows students the opportunity to actively participate in class discussions and interact closely with their peers.

The program offers an applications-oriented curriculum with an international focus designed to give the working professional contemporary management tools for successfully doing business in a domestic and global environment. The EMBA program is a 92-unit program and offers a maximum amount of core and elective course material presented in an accelerated timetable and is delivered to students using a lock-step curricular model.

In addition to the two, week-long residentials, students participate in an in-depth academic, week-long international seminar abroad. This provides a unique opportunity to experience global business firsthand from a corporate, academic, and cultural standpoint.

Further information may be obtained by contacting the University of California, Irvine, Executive M.B.A. Programs, SB 230, Irvine, CA 92697-3125; (949) 824-0561; <http://merage.uci.edu/ExecutiveMBA>.

Health Care Executive M.B.A. Program

The Health Care Executive M.B.A. (HCEMBA) program is a comprehensive academic experience for individuals working in the health care industry. This unique program is designed for professionals who want to expand their business expertise and gain the fundamentals of management as well as develop a better understanding of the economic, political, and social dynamics which shape the global health care industry. Students come from the intersecting industries of pharmaceuticals, medical devices, managed care, insurance, health care services, and health care policy. Participants have significant relevant work experience, demonstrated leadership abilities, and a proven track record of success. This 21-month program begins each fall. Classes meet one weekend a month, starting Thursday evening and continuing until noon on Sunday. Classes meet for seven consecutive quarters at The Paul Merage School of Business.

The curriculum is a carefully structured program that assures each student exposure to the full range of disciplines which are essential components of a management education. The core and elective courses are specifically customized for application to a health care professional's daily challenges.

In addition to two, week-long residentials, students participate in an in-depth academic, week-long seminar where they meet health care industry leaders to better understand legislative and regulatory processes that affect health care.

Further information may be obtained by contacting the University of California, Irvine, Executive M.B.A. Programs, SB 230,

Irvine, CA 92697-3125; (949) 824-0561; <http://merage.uci.edu/HealthcareExecutiveMBA>.

Fully Employed M.B.A. Program

The Fully Employed M.B.A. (FEMBA) program gives emerging managers an opportunity to earn an M.B.A. degree with minimal disruption to their professional lives. Students attend classes on weeknights and/or Saturdays during the program. The FEMBA Program admits new students for enrollment in spring or fall. Students beginning the program in spring attend classes nine consecutive quarters and complete the program in 27 months. Students beginning the program in fall attend classes nine non-consecutive quarters (summers off) and complete the program in 33 months.

The program consists of both core courses and electives, allowing students to establish a solid foundation of traditional business skills and then customize their education based on personal interests and goals. The curriculum provides constant interaction between information presented in the classroom and what is being used on the job, reinforcing and enhancing the student's learning experience.

In addition to classroom work, students attend three residential sessions including one abroad focusing on global markets. In this concentrated setting, students and faculty have an opportunity to explore in depth a variety of business challenges and how those challenges can best be met using contemporary management tools.

Further information may be obtained by contacting the University of California, Irvine, Fully Employed M.B.A. Program Office, 202 School of Business, Irvine, CA 92697-3125; (949) 824-4565; <http://merage.uci.edu/fullyemployedmba>.

Master of Professional Accountancy (M.P.Ac.)

The Master of Professional Accountancy (M.P.Ac.) program provides an intensive, focused level of training that will prepare graduates for entering positions within an accounting firm, private company, or public/nonprofit organization. Combined with undergraduate preparation in accounting, the M.P.Ac. program will enable student to meet the State of California Board of Accountancy educational standards for licensure as a certified public accountant in California. The program is a one-year, self-supporting terminal master's degree and includes the opportunity for a one-quarter internship.

Students who complete this program will possess the necessary knowledge to solve fundamental and strategic issues in accounting. They will learn to apply both critical thinking and established accounting processes to issues crucial to the audit and accountability of an organization. The course work will have a pedagogical underpinning of ethical behavior and professional conduct. The underlying philosophy in the program's framework is intended to develop a foundational understanding of key accounting principles and concepts while also offering a breadth of broader issues and topics relevant to the discipline.

Admissions

Applicants may apply directly to The Paul Merage School of Business. Applicants to the fall class must meet all prerequisite requirements at the time of matriculation into the program. Specifically, an applicant must have satisfactorily completed the following prerequisite courses (or their equivalent) in accounting (although students lacking up to two upper-division undergraduate accounting courses will be permitted to petition

to enroll in those courses as an additional part of the M.P.Ac. program): introductory financial and managerial accounting (two courses) and at least six of the following upper-division U.S. accounting-based courses: intermediate and international accounting (three courses), advanced accounting, individual taxation, corporate and partnership taxation, accounting information systems, and auditing. At the discretion of the Admissions Committee, "provisional admission status" will be offered to highly qualified candidates who have met most, but not all the prerequisite requirements and will satisfy the requirements prior to matriculation.

Other highly qualified applicants who do not meet the entrance requirement to begin the program in the fall quarter will be offered an opportunity to enroll in an intensive summer pre-session at The Paul Merage School of Business. The pre-session will be required of those who possess an excellent undergraduate record of achievement, strong letters of recommendation, and a clear focus relative to a career in accounting; and, who need specific prerequisite course work in accounting and business. The summer pre-session will include four courses. Students must successfully complete all of the pre-session course work to meet the course prerequisites of the M.P.Ac. program in order to enter the program in the fall quarter. Pre-session course work will be done over the two designated Summer Sessions. Students will enroll in a curriculum of two courses in Summer Session I and two courses in Summer Session II.

In session I, students will enroll in the following:

MPAC 200A	Intermediate Accounting Intensive I
MPAC 200B	Foundations of Taxation Intensive

In Session II, students will enroll in the following:

MPAC 200C	Intermediate Accounting Intensive II and Special Topics
MPAC 200D	Auditing Intensive

Admission to graduate standing in The Paul Merage School of Business is accorded to those possessing an undergraduate degree with an acceptable level of scholarship from an institution of recognized standing. Applicants for admission will be evaluated on their academic record and potential for leadership as demonstrated in submitted application materials. These materials will include university transcripts, Graduate Management Admission Test (GMAT) or Graduate Record Examination (GRE) test scores, two letters of recommendation, a Statement of Purpose, and an essay. A personal interview, by invitation only, will be part of the admission process. Those students educated from a country where English is not the primary language, will be required to possess a minimum score on the Test of English for Foreign Language (TOEFL) of 600 for the paper-based test and 80 for the Internet-based test. Further, international applicants may also take the Pearson Test of English (PTE). The minimum required score for admission is 53. Scores are valid for two years.

Requirements

The program requires students to complete no less than 11 courses and a minimum of 44 units. Of the minimum of 11 courses needed to complete the program, students must satisfactorily complete 9 required courses. The required courses are as follows:

MPAC 230	Accounting Proseminar: Career and Professional Development (Students must enroll in both Proseminar courses.)
----------	---

MPAC 231A	Financial Statement Analysis and Valuation I
MPAC 231B	Financial Statement Analysis and Valuation II
MPAC 232	Taxes and Business Strategy
MPAC 235	Advanced Managerial Accounting
MPAC 237	International Accounting
MPAC 238	Advanced Auditing and Forensics
MPAC 239	Ethics in Accounting and Business
MPAC 291	Professional Research and Communication

Students will be expected to enroll and successfully complete at least a 4-unit elective course in both the winter and spring quarters. Students can select from a number of elective offerings available through the School's fully employed M.B.A. program and those within the Real Estate program. Students who need to meet the upper-division undergraduate requirements may also enroll in two courses from the undergraduate accounting programs as an additional part of the M.P.Ac. program. Further, students will be encouraged to pursue a formal paid internship experience in the winter quarter and enroll in MPAC 290 Internship in Accounting, a 4-unit course, in the winter quarter as well.

Executive MBA Courses

MGMT EP 200. Management of Innovative Organizations. 7 Units.

Using concepts from organization studies and strategy, students examine different frameworks for analyzing and designing innovative organizations, the foundations of strategy and competitive analysis, alliances and networks as a source of innovation, and key issues in managing innovation effectiveness.

Grading Option: Satisfactory/unsatisfactory only.

Same as MGMT 200, MGMT FE 200.

Restriction: Master of Business Administration students only.

MGMT EP 201. Operations Research/Operations Management. 0 Units.

Focuses on the application of the quantitative model-building approach to problem solving by integrating modern computer technology with quantitative techniques. Application of methodology to problems of management production and service operations.

MGMT EP 201A. Statistics for Management. 5 Units.

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics: classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Same as MGMT 201A, MGMT FE 201A.

MGMT EP 201B. Management Science. 5 Units.

Introduction to management science tools for aiding managerial decision making with emphasis on model applicability, formulation, and interpretation. Use of computer laboratory's management science software packages. Topics: mathematical programming, stochastic processes, queueing systems, simulation.

Same as MGMT 201B, MGMT FE 201B.

MGMT EP 202. Organizational Analysis for Management. 5 Units.

Develops a better understanding of the causes and consequences of individual and group behavior, and the frameworks by which to analyze and understand complex organizations; and enhances the skills required to manage and lead an organization.

Same as MGMT 202, MGMT FE 202.

Restriction: Master of Business Administration students only.

MGMT EP 203A. Financial Accounting for Management. 4 Units.

Examines issues related to measuring and communicating an entity's economic activities and financial position and introduces financial statement analysis. The aim of financial accounting is to provide financial information that is useful in making economic decisions.

Same as MGMT 203A, MGMT FE 203A.

Restriction: Master of Business Administration students only.

MGMT EP 203B. Managerial Accounting for Management. 5 Units.

Involves developing and using financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions.

Same as MGMT 203B, MGMT FE 203B.

MGMT EP 204A. Microeconomics for Management. 5 Units.

Provides basic tools for analyzing economic decisions of consumers and firms, the determinants and consequences of market structure and market failure. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, and introductory game theory.

Same as MGMT 204A, MGMT FE 204A.

Restriction: Executive M.B.A. students only.

MGMT EP 204B. Macroeconomics for Management. 5 Units.

Focuses on the use of macroeconomic analysis to manage the business cycle for competitive advantage. Such "business cycle-sensitive" management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures.

Prerequisite: MGMT EP 204A.

Same as MGMT 204B, MGMT FE 204B.

Restriction: Master of Business Administration students only.

MGMT EP 205. Marketing Management. 4 Units.

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Same as MGMT 205, MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT EP 206. Business and Government. 4 Units.

Introduces students to the many non-market issues that affect today's managers, such as: environmental protection, health and safety, intellectual property protection, antitrust, and lobbying. An interdisciplinary approach using economics, political science, public policy and law.

Same as MGMT 206, MGMT FE 206.

Restriction: Master of Business Administration students only.

MGMT EP 207. Information Technology for Management. 5 Units.

Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines role of technology in organizations, how technology can be used to execute an organization's business strategy, and to enable new, innovative business strategies.

Restriction: Master of Business Administration students only.

MGMT EP 208. Operations Management. 5 Units.

Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics include: product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management.

Restriction: Master of Business Administration students only.

MGMT EP 209A. Managerial Finance. 5 Units.

Introduces students to financial theory and concepts. The main topics covered are time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice.

Prerequisite: MGMT EP 201A and MGMT EP 203A and MGMT EP 204A.

Restriction: Master of Business Administration students only.

MGMT EP 210. Business Strategy. 4 Units.

Examines the functions and responsibilities of senior management and the decisions that determine the direction of the organization and shape its future. Introduces students to concepts, frameworks, and analytical techniques firms use to analyze strategic issues.

Prerequisite: MGMT 202 and MGMT 205 and MGMT 209A.

Same as MGMT 210, MGMT FE 210.

Restriction: Master of Business Administration students only.

MGMT EP 213. New Venture Management: A Course in Entrepreneurship. 5 Units.

Focuses on survival and growth of new ventures. Involves a mix of live cases, guest speakers, discussion, and field projects with contemporary entrepreneurs to learn about successful new venture management and surviving the liabilities of newness.

Prerequisite: MGMT EP 202 and MGMT 205 and MGMT 210.

Restriction: Master of Business Administration students only.

MGMT EP 215. Global Competitive Strategy. 5 Units.

Examines the challenges and opportunities for international business focusing on how and why companies go global, global industry structure and competition, international market development and market entry, and the management of international business risks. Extensive use of cases and discussions.

Prerequisite: MGMT EP 202 and MGMT 205 and MGMT 210.

Restriction: Master of Business Administration students only.

MGMT EP 218. Business Dynamics. 5 Units.

Addresses how managers can successfully face the continuous challenges to their survival in a time-efficient, strategically sound manner. Builds on the cores strategy course by tackling an extended range of strategic responses to dynamic and competitive environment.

Prerequisite: MGMT EP 200 and MGMT EP 202 and MGMT EP 210.

Restriction: Master of Business Administration students only.

MGMT EP 225. Negotiations. 5 Units.

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts.

Prerequisite: MGMT EP 200 and MGMT EP 202.

Restriction: Master of Business Administration students only.

MGMT EP 229. Leadership Strategies. 5 Units.

Provides insights/perspectives about the study and development of leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader?.

Prerequisite: MGMT EP 200 and MGMT EP 202.

Restriction: Master of Business Administration students only.

MGMT EP 234. Financial Statement Analysis. 5 Units.

Develops an initial set of skills essential to using financial statements for business analysis. Topics include financial information "quality", earnings management, revenue recognition, forecasting financial information, and equity valuation.

Prerequisite: MGMT EP 203A.

Restriction: Master of Business Administration students only.

MGMT EP 248. Corporate Valuation. 5 Units.

Studies cases that expand concepts covered in the introductory corporate finance course and focuses on estimating the value of firms and projects in diverse settings.

Prerequisite: MGMT EP 209A and MGMT EP 209B.

Restriction: Master of Business Administration students only.

MGMT EP 259. Strategic Brand Management. 5 Units.

Brand management will increase student understanding of important issues in planning, implementing, and evaluating brand strategies; provides relevant theories, models, and tools for making brand decisions; enable students to apply these principles in a computer simulation of brand management.

Prerequisite: MGMT EP 205.

Restriction: Master of Business Administration students only.

MGMT EP 283. Decision Analysis. 5 Units.

Models of preferences and uncertainty; exercises in creative problem-solving. The assessment and use of preference models (von Neumann-Morgenstern expected utility and measurable value functions) for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making.

Restriction: Master of Business Administration students only.

MGMT EP 290. CORP GOVERNANCE. 2-5 Units.

Special Instance.

Repeatability: Unlimited as topics vary.

MGMT EP 294. Special Topic ITM Seminars . 5 Units.

Each quarter a number of special topic ITM seminars are offered in the 294 series. Examples of possible topics include Business Intelligence, Technologies for Ecommerce.

Repeatability: May be repeated for credit unlimited times.

Restriction: Master of Business Administration students only.

MGMT EP 295. Global Business. 8 Units.

Emphasizes and reinforces international perspectives contained in the MBA curriculum by providing a week-long intensive seminar abroad in the second year. Scholars and business people from the host country instruct EMBA students in designed class sessions and company visits.

MGMT EP 296. Executive Leadership. 6 Units.

Focuses on the conceptual, practical, and personal dimensions of executive leadership. Past and current leadership theories are addressed. Individual personal assessment and diagnosis.

Same as MGMT FE 296.

MGMT EP 299. Individual Directed Study. 1-8 Units.

Individual study under the direction of a selected faculty member.

Same as MGMT 299, MGMT FE 299.

Fully Employed MBA Courses**MGMT FE 233A. Graduate School Opportunities and Preparation. 1 Unit.**

Explores the opportunities associated with graduate school by considering a wide range of disciplines and career paths. Reviews professional and academic paths in graduate school and the ways to prepare for a chosen path.

MGMT FE 233B. International Law. 4 Units.

Examination of the origin, changing structure, application of international law, and the role of legal norms in regulating the behavior of states and maintaining international order.

Prerequisite: POL SCI 71A.

Same as POL SCI 172A.

(VIII)**MGMT FE 233C. Ancient Civilization of Mexico and the Southwest. 4 Units.**

The prehistory and cultural evolution of the civilization which originated in Mexico, including the Olmecs, Aztecs, Toltecs, Maya, and Zapotec, as well as the Pueblos of the Southwestern U.S. Topics include the origins of food production and of the state.

Same as ANTHRO 141A.

MGMT FE 200. Management of Innovative Organizations. 7 Units.

Using concepts from organization studies and strategy, students examine different frameworks for analyzing and designing innovative organizations, the foundations of strategy and competitive analysis, alliances and networks as a source of innovation, and key issues in managing innovation effectiveness.

Grading Option: Satisfactory/unsatisfactory only.

Same as MGMT 200, MGMT EP 200.

Restriction: Master of Business Administration students only.

MGMT FE 201A. Statistics for Management. 5 Units.

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics: classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Same as MGMT 201A, MGMT EP 201A.

MGMT FE 201B. Management Science. 5 Units.

Introduction to management science tools for aiding managerial decision making with emphasis on model applicability, formulation, and interpretation. Use of computer laboratory's management science software packages. Topics: mathematical programming, stochastic processes, queueing systems, simulation.

Same as MGMT 201B, MGMT EP 201B.

MGMT FE 202. Organizational Analysis for Management. 5 Units.

Develops a better understanding of the causes and consequences of individual and group behavior, and the frameworks by which to analyze and understand complex organizations; and enhances the skills required to manage and lead an organization.

Same as MGMT 202, MGMT EP 202.

Restriction: Master of Business Administration students only.

MGMT FE 203A. Financial Accounting for Management. 4 Units.

Examines issues related to measuring and communicating an entity's economic activities and financial position and introduces financial statement analysis. The aim of financial accounting is to provide financial information that is useful in making economic decisions.

Same as MGMT 203A, MGMT EP 203A.

Restriction: Master of Business Administration students only.

MGMT FE 203B. Managerial Accounting for Management. 5 Units.

Involves developing and using financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions.

Same as MGMT 203B, MGMT EP 203B.

MGMT FE 204A. Microeconomics for Management. 5 Units.

Provides basic tools for analyzing economic decisions of consumers and firms, the determinants and consequences of market structure and market failure. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, and introductory game theory.

Same as MGMT 204A, MGMT EP 204A.

Restriction: Executive M.B.A. students only.

MGMT FE 204B. Macroeconomics for Management. 5 Units.

Focuses on the use of macroeconomic analysis to manage the business cycle for competitive advantage. Such "business cycle-sensitive" management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures.

Prerequisite: MGMT EP 204A.

Same as MGMT 204B, MGMT EP 204B.

Restriction: Master of Business Administration students only.

MGMT FE 205. Marketing Management. 4 Units.

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Same as MGMT 205, MGMT EP 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 205A. Marketing Management. 4 Units.

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Same as MGMT 205, MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 206. Business and Government. 4 Units.

Introduces students to the many non-market issues that affect today's managers, such as: environmental protection, health and safety, intellectual property protection, antitrust, and lobbying. An interdisciplinary approach using economics, political science, public policy and law.

Same as MGMT 206, MGMT EP 206.

Restriction: Master of Business Administration students only.

MGMT FE 207. Information Technology for Management. 4 Units.

Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines role of technology in organizations, how technology can be used to execute an organization's business strategy, and to enable new, innovative business strategies.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 208. Operations Management. 4 Units.

Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations.

Topics: product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management.

Same as MGMT 208.

MGMT FE 209A. Managerial Finance. 4 Units.

Introduces students to financial theory and concepts. The main topics covered are time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice.

Prerequisite: MGMT FE 201A and MGMT FE 203A and MGMT FE 204A.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 209B. Investments. 4 Units.

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMT FE 201A and MGMT FE 203A and MGMT FE 204A and MGMT FE 209A.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 210. Business Strategy. 4 Units.

Examines the functions and responsibilities of senior management and the decisions that determine the direction of the organization and shape its future. Introduces students to concepts, frameworks, and analytical techniques firms use to analyze strategic issues.

Prerequisite: MGMT 202 and MGMT 205 and MGMT 209A.

Same as MGMT 210, MGMT EP 210.

Restriction: Master of Business Administration students only.

MGMT FE 213. New Venture Management: A Course in Entrepreneurship. 4 Units.

Focuses on survival and growth of new ventures. Involves a mix of live cases, guest speakers, discussion, and field projects with contemporary entrepreneurs to learn about successful new venture management and surviving the liabilities of newness.

Prerequisite: MGMT 202 and MGMT 205 and MGMT 210.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 214. Entrepreneurship: Planning the New Venture. 4 Units.

Project course in which student teams develop a business plan to launch a new venture. The final business plan is presented to a panel of private investors, venture capitalists, entrepreneurs, experienced executives, and faculty.

Prerequisite: MGMT FE 202 and MGMT FE 205 and MGMT FE 210.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 215. Global Competitive Strategy. 4 Units.

Examines the challenges and opportunities for international business focusing on how and why companies go global, global industry structure and competition, international market development and market entry, and the management of international business risks. Extensive use of cases and discussions.

Prerequisite: MGMT FE 202 and MGMT FE 205 and MGMT FE 210.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 218. Business Dynamics. 4 Units.

Addresses how managers can successfully face the continuous challenges to their survival in a time-efficient, strategically sound manner. Builds on the cores strategy course by tackling an extended range of strategic responses to dynamic and competitive environment.

Prerequisite: MGMT FE 200 and MGMT FE 202 and MGMT FE 210.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 220. Organizational Change. 4 Units.

Focuses in the implementation of change. Focus is on identifying the features of successful change in organizations of varying sizes and configurations, with an emphasis on the reasons why individuals resist or embrace change.

Prerequisite: MGMT FE 200 and MGMT FE 202.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 225. Negotiations. 4 Units.

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts.

Prerequisite: MGMT FE 200 and MGMT FE 202.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 228. International Management. 4 Units.

Introduction to the effects of different national cultures and political/economic systems on the assumptions, expectations, organizational practices, and organizational forms relevant to cross-national organizational work.

Prerequisite: MGMT 200 and MGMT 202.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 229. Leadership Strategies. 4 Units.

Provides insights/perspectives about the study and development of leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader?.

Prerequisite: MGMT FE 200 and MGMT FE 202.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 231A. FSA-Earnings Quality and Asset Analysis. 4 Units.

Develops skills essential to using financial statements for business analysis by examining financial information quality, profitability and risk analysis, earnings management, revenue recognition, asset recognition and valuation, and how financial reporting is related to the business environment and managerial incentives.

Prerequisite: MGMT FE 203A.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 231B. FSA-Liability and Equity Analysis. 4 Units.

Focuses on the financial statement analysis of liabilities and stockholders' equity. Covers topics such as forecasting financial statements, earnings-based valuation models, accounting analysis of mergers and acquisitions, leases, bankruptcy prediction, and derivatives.

Prerequisite: MGMT FE 231A.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 234. Financial Statement Analysis. 4 Units.

Develops an initial set of skills essential to using financial statements for business analysis. Topics include financial information "quality," earnings management, revenue recognition, forecasting financial information, and equity valuation.

Prerequisite: MGMT FE 203A.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 233D. International Accounting. 4 Units.

An online course. A comprehensive study of differences between US GAAP and International Financial Reporting Standards (IFRS). Course may be offered online.

Prerequisite: Intermediate accounting or equivalent.

Restriction: MPAC students only.

MGMT FE 242. Portfolio Management. 4 Units.

Advanced portfolio decision making. Topics include index models, portfolio performance measures, bond portfolio management and interest immunization, stock market anomalies, and market efficiency.

Prerequisite: MGMT FE 201A and MGMT FE 203A and MGMT FE 204A and MGMT FE 209A and MGMT FE 209B.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 243. Bonds and Fixed Income. 4 Units.

During the past decade, there has been a tremendous amount of innovation in the design and use of debt securities. Focuses on techniques and methodologies for valuing different types of debt as well as their uses.

Prerequisite: MGMT FE 201A and MGMT FE 203A and MGMT FE 204A and MGMT FE 209A and MGMT FE 209B.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 248. Corporate Valuation. 4 Units.

Studies cases the expand concepts covered in the introductory corporate finance course and focuses on estimating the value of firms and projects in diverse settings.

Prerequisite: MGMT FE 209A and MGMT FE 209B.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 249. Derivatives. 4 Units.

Studies options, futures, and other derivatives. The first part covers forward, futures, and swaps. The second part examines the pricing of options. Applications of these instruments are emphasized.

Prerequisite: MGMT FE 201A and MGMT FE 203A and MGMT FE 204A and MGMT FE 209A and MGMT FE 209B.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 250. Consumer Behavior. 4 Units.

Examines consumer decision-making process with emphasis on application of concepts and research findings from behavioral sciences for solution of marketing problems. Includes models of consumer decision-making, information processing theories, and sociological influences on consumer decision-making.

Prerequisite: MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 251A. Marketing Research. 4 Units.

Covers conducting marketing research to generate consumer insights that will drive sales, market share, and profitability, and/or realize other quantitative objectives. Discusses problem formulation, data collection, statistical analyses, formulating managerial recommendations, implementation, and how research is used by companies.

Prerequisite: MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 252A. Advertising and Communications Management. 4 Units.

Covers integrated marketing communications which includes advertising, sales promotions, public relations, and direct mail. Topics include elements of a communications plan, marketing research including copy testing and tracking, creating brand value, media strategies, and measuring return on investments.

Prerequisite: MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 252D. New Product Development. 4 Units.

Designed to introduce the new product development process and techniques to identify markets, develop new product ideas, measure consumer preferences, position and design new products as well as test them prior to launch. Analytical thinking and techniques are emphasized.

Prerequisite: MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 253. Advanced Micromarketing. 4 Units.

Develop marketing plans for retailers and neighborhoods based on past purchases and demographics. Covers retail site selection, category management, promotion management, shelf space allocation, pricing, promotions, targeted advertising, consumer segmentation, media selection, list management, and GIS software.

Prerequisite: MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 256. Design Management and Innovation. 4 Units.

Presents a design-driven approach, from design as organizational vision to strategic innovation to managing the design process. The students are exposed to design fundamentals and work in teams that involve creativity workshops and real world projects.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 257. Marketing on the Internet. 4 Units.

Examines the impact of the Internet on traditional methods of doing marketing, and explores its existing and future uses. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency and competitiveness.

Prerequisite: MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 258. Marketing Strategies for High Technology. 4 Units.

Framework and tools for managing technology-intensive businesses. Product and pricing policies; Network externalities; Compatibility concerns; Systems competitions; Technological and market uncertainty; Technology licensing strategies; Contracting in high-tech markets; Product line design; Product bundling strategies; Usage-based pricing; Pricing of networks; Auctions.

Prerequisite: MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 259. Strategic Brand Management. 4 Units.

Address important branding decisions faced by organizations. A computer simulation allow students hands-on experience in making decisions about their brand and seeing the results of those decisions.

Prerequisite: MGMT FE 205.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 272. Critical IT Decisions for Business Executives. 4 Units.

Develops frameworks to help business executives make critical IT decisions. Examples include how much to invest in IT, determining management practices to maximize return on IT investment, sourcing strategies for IT and business process outsourcing, strategies for digital environments.

Prerequisite: MGMT FE 207.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 273. Business Intelligence for Analytical Decisions. 4 Units.

Introduces methods to mine data repositories for business intelligence to facilitate analytical decision-making. Topics include clustering for market segmentation, association rules to discover relationships between different purchase decisions, Naive-Bayes classification techniques for decision making using decision-trees.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 274. Database Management & Strategic. 4 Units.

Examines contemporary business applications of databases including CRM, knowledge management, data-warehousing, data-mining and business intelligence. Also covers the database design process with a focus on enabling business decision making including capturing the linkages among data, and retrieving data.

Prerequisite: MGMT FE 207.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 279. Digital Strategies and Markets. 4 Units.

Examines how online social media are impacting organizations and markets. Topics include collective intelligence, online social influence, social networks, and social media monetization. The target audience consists of students interested in IT consulting, competitive strategy, marketing, and entrepreneurship.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 280. Forecasting. 4 Units.

Basic theory and techniques used to forecast future activities in technological, economic, social, and political arenas. Impact of forecasting on managerial decision making.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 281. Analytical Decision-making Models for Management. 4 Units.

An introduction to Excel spreadsheet-based models for decision making. Topics include linear and non-linear optimization and simulation models. Excel Solver will be used as the optimization tool and Crystal Ball will be used as the simulation tool.

Restriction: Graduate students only.

MGMT FE 283. Decision Analysis. 4 Units.

Models of preferences and uncertainty; exercises in creative problem-solving. The assessment and use of preference models (von Neumann-Morgenstern expected utility and measurable value functions) for private, public, and not-for-profit decision making. The assessment and use of subjective probabilities in decision.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 285. Supply Chain Management. 4 Units.

Focuses on the management and improvement of global supply chains. Course materials center on several key issues including effective management of material flows, the role of information and technology, and managing supply chain incentive conflicts. Recent innovations in global supply.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 287. Project Management. 4 Units.

Examines the fundamental components of project management and its role in the modern corporation. Emphasis is on how to initiate, implement, control, and terminate a project. Use of computer package for project management.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 290. Special Topics. 2-4 Units.

Generic Parent file for Special Topics.

Repeatability: Unlimited as topics vary.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 292. Business Law. 4 Units.

Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 295. Global Business. 8 Units.

Emphasizes and reinforces international perspectives contained in the EMBA curriculum by providing a week-long intensive seminar abroad in the second year. Scholars and business people from the host country instruct FEMBA students in specially designed class sessions and company visits.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 296. Executive Leadership. 6 Units.

Focuses on the conceptual, practical, and personal dimensions of executive leadership. Past and current leadership theories are addressed. Individual personal assessment and diagnosis.

Same as MGMT EP 296.

MGMT FE 298. Experiential Learning. 4 Units.

Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the MBA program. Seminars augment internship experiences with analyses of relevant administrative issues.

Restriction: Fully Employed M.B.A. Program students only.

MGMT FE 299. Individual Directed Study. 1-8 Units.

Individual study under the direction of a selected faculty member.

Same as MGMT 299, MGMT EP 299.

Health Care MBA Courses

MGMT HC 200. Management of Innovative Organizations. 7 Units.

Using concepts from organization studies and strategy, students examine different frameworks for analyzing and designing innovative organizations, the foundations of strategy and competitive analysis, alliances and networks as a source of innovation, and key issues in managing innovation effectiveness.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 201A. Statistics for Management. 5 Units.

Methods of statistical inference, emphasizing applications to administrative and management health care decision problems. Topics: Classical estimation and hypothesis testing, regressions, correlation analysis of variance, decision analysis, and forecasting.

MGMT HC 201B. Management Science. 5 Units.

Introduction to management science tools for aiding health care managerial decision making, with emphasis on model applicability, formulation, and interpretation. Use of computer laboratory's management science software packages. Topics: mathematical programming, stochastic processes, queueing systems, simulation.

MGMT HC 202. Organizational Analysis for Management. 5 Units.

Develops a better understanding of the causes and consequences of individual and group behavior, and the frameworks by which to analyze and understand complex organizations; and enhances the skills required to manage and lead an organization.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 203A. Financial Accounting for Management. 5 Units.

Examines issues related to measuring and communicating an entity's economic activities and financial position and introduces financial statement analysis. The aim of financial accounting is to provide financial information that is useful in making economic decisions.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 203B. Managerial Accounting for Management. 5 Units.

Involves developing and using financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions.

Prerequisite: MGMT HC 203A.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 204A. Microeconomics for Management. 5 Units.

Provides basic tools for analyzing economic decisions of consumers and firms, the determinants and consequences of market structure and market failure. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, and introductory game theory.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 204B. Macroeconomics for Management. 5 Units.

Focuses on the use of macroeconomic analysis to manage the business cycle for competitive advantage. Such "business cycle-sensitive" management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures.

Prerequisite: MGMT HC 204A.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 205. Marketing Management. 5 Units.

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 206. Business and Government. 2 Units.

Focuses on the relationship between business and government, and the ways in which members of the business community help shape local, state, and federal public policy. Topics include: issues management, lobbying, impact of technology, impact of the media, and privatization.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 207. Information Technology for Management. 5 Units.

Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines role of technology in organizations, how technology can be used to execute an organization's business strategy, and to enable new, innovative business strategies.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 209A. Managerial Finance. 5 Units.

Introduces students to financial theory and concepts. The main topics covered are time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice.

Prerequisite: MGMT HC 201A and MGMT HC 203A and MGMT HC 204A.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 209B. Investments. 3 Units.

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMT HC 201A and MGMT HC 203A and MGMT HC 204A and MGMT HC 209A.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 210. Business Strategy. 5 Units.

Examines the functions and responsibilities of senior management and the decisions that determine the direction of the organization and shape its future. Introduces students to concepts, frameworks, and analytical techniques firms use to analyze strategic issues.

Prerequisite: MGMT HC 202 and MGMT 205 and MGMT 209A.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 213. New Venture Management: A Course in Entrepreneurship. 2-5 Units.

Focuses on survival and growth of new ventures. Involves a mix of live cases, guest speakers, discussion, and field projects with contemporary entrepreneurs to learn about successful new venture management and surviving the liabilities of newness.

Prerequisite: MGMT HC 202 and MGMT 205 and MGMT 210.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 214. Entrepreneurship: Planning the New Venture. 2-5 Units.

Project course in which student teams develop a business plan to launch a new venture. The final business plan is presented to a panel of private investors, venture capitalists, entrepreneurs, experienced executives, and faculty.

Prerequisite: MGMT HC 202 and MGMT HC 205 and MGMT HC 210.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 215. Global Competitive Strategy. 5 Units.

Examines the challenges and opportunities for international business focusing on how and why companies go global, global industry structure and competition, international market development and market entry, and the management of international business risks. Extensive use of case and discussions.

Prerequisite: MGMT HC 202 and MGMT 205 and MGMT 210.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 225. Negotiations. 2-5 Units.

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts.

Prerequisite: MGMT HC 200 and MGMT HC 202.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 234. Financial Statement Analysis. 2-5 Units.

Develops an initial set of skills essential to using financial statements for business analysis. Topics include financial information "quality", earnings management, revenue recognition, forecasting financial information, and equity valuation.

Prerequisite: MGMT HC 203A.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 248. Corporate Valuation. 2-5 Units.

Studies cases the expand concepts covered in the introductory corporate finance course and focuses on estimating the value of firms and projects in diverse settings.

Prerequisite: MGMT HC 209B.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 283. Decision Analysis. 2-5 Units.

Models of preferences and uncertainty; exercises in creative problem solving. Assessment and use of preference models (von Neumann-Morgenstern expected utility and measurable value functions) for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 287. Project Management. 2-5 Units.

Examines the fundamental components of project management and its role in the modern corporation. Emphasis is on how to initiate, implement, control, and terminate a project. Use of computer package for project management.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 290. HC STRATEGY. 2-5 Units.

Special Instance - ST.

Repeatability: May be repeated for credit unlimited times.

MGMT HC 292. Business Law. 2-5 Units.

Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages.

Repeatability: May be repeated for credit unlimited times.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 295. Federal Policy in Health Care. 8 Units.

National/international one-week residential course exploring political analysis as related to management of health care organizations. Topics include political environment of management, concepts, and processes central to political analysis, bureaucratic politics, politics, and the manager.

Restriction: Health Care Executive M.B.A. students only.

MGMT HC 296. Executive Leadership. 7 Units.

Focuses on the conceptual, practical, and personal dimensions of executive leadership in health care. Past and current leadership theories are addressed. Individual personal assessment and diagnosis.

MGMT HC 299. Individual Study. 1-8 Units.

Individual study under the direction of a selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Management MBA Courses

MGMTMBA 200. Management of Innovative Organizations. 4 Units.

Using concepts from organization studies and strategy, students examine different frameworks for analyzing and designing innovative organizations, the foundations of strategy and competitive analysis, alliances and networks as a source of innovation, and key issues in managing innovation effectiveness.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Master of Business Administration students only.

MGMTMBA 201A. Statistics for Management. 4 Units.

Methods of statistical inference, emphasizing applications to administrative and management decision problems. Topics: classical estimation and hypothesis testing, regression, correlation, analysis of variance, decision analysis, and forecasting.

Prerequisite: Courses in basic statistics with probability.

MGMTMBA 201B. Management Science. 2 Units.

An introduction to computer-based models for decision making. Topics include optimization (linear programming, integer programming, network flow models) and computer simulation. Uses spreadsheets extensively, including Excel built-in and add-in packages.

MGMTMBA 202. Organizational Analysis for Management. 4 Units.

Develops a better understanding of the causes and consequences of individual and group behavior, and the frameworks by which to analyze and understand complex organizations; and enhances the skills required to manage and lead an organization.

Restriction: Master of Business Administration students only.

MGMTMBA 203A. Financial Accounting for Management. 4 Units.

Nature and purpose of accounting, principal accounting instruments, and valuation problems.

Restriction: Master of Business Administration students only.

MGMTMBA 203B. Managerial Accounting for Management. 5 Units.

Involves developing and using financial and non-financial information to help organizations make planning, budgeting, control, operating, and performance evaluation decisions.

Same as MGMT 203B, MGMT FE 203B.

MGMTMBA 204A. Microeconomics for Management. 4 Units.

Provides basic tools for analyzing economic decisions of consumers and firms, the determinants and consequences of market structure and market failure. Topics include demand and supply analysis, production and cost theory, perfect competition, monopoly, and introductory game theory.

Restriction: Master of Business Administration students only.

MGMTMBA 204B. Macroeconomics for Management. 4 Units.

Focuses on the use of macroeconomic analysis to manage the business cycle for competitive advantage. Such "business cycle-sensitive" management is explored within the context of marketing, operations management, HRM, merger and acquisition activity, and capital financing and expenditures.

Prerequisite: MGMTMBA 204A.

Restriction: Master of Business Administration students only.

MGMTMBA 205. Marketing Management. 4 Units.

Introduction to the field of marketing. Objectives include developing familiarity with fundamental concepts, theories, and techniques in marketing and acquainting students with the type of decisions made by marketing managers including customer targeting, product, pricing, distribution, promotion, and research.

Restriction: Master of Business Administration students only.

MGMTMBA 206. Business and Government. 4 Units.

Introduces students to the many non-market issues that affect today's managers, such as: environment protection, health and safety, intellectual property protection, antitrust, and lobbying. Takes an interdisciplinary approach using economics, political science, public policy and law.

Restriction: Master of Business Administration students only.

MGMTMBA 207. Information Technology for Management. 4 Units.

Focuses on the technological and managerial issues surrounding the development and use of IT in organizations. Examines role of technology in organizations, how technology can be used to execute an organization's business strategy and to enable new, innovative business strategies.

Restriction: Master of Business Administration students only.

MGMTMBA 208. Operations Management. 4 Units.

Introduction to strategic and tactical issues in production and operations management. A blend of quantitative and qualitative considerations. Topics: product planning, process design, capacity management, production planning, inventory control, distribution management, just-in-time manufacturing, quality management.

MGMTMBA 209A. Managerial Finance. 4 Units.

Introduces students to financial theory and concepts. The main topics covered are time value of money, valuation of stocks and bonds, capital budgeting, portfolio theory, capital structure choice.

Prerequisite: MGMTMBA 201A and MGMTMBA 203A and MGMTMBA 204A.

Restriction: Master of Business Administration students only.

MGMTMBA 209B. Investments. 4 Units.

Foundations of investment management. Theory and empirical evidence related to portfolio theory, market efficiency, asset pricing models, factor models, and option pricing theory. Students are expected to combine market research results and electronic information sources to create optimal investment strategies.

Prerequisite: MGMTMBA 209A.

Restriction: Master of Business Administration students only.

MGMTMBA 210. Business Strategy. 4 Units.

Examines the functions and responsibilities of senior management and the decisions that determine the direction of the organization and shape its future. Introduces students to concepts, frameworks, and analytical techniques firms use to analyze strategic issues.

Prerequisite: MGMTMBA 202 and MGMTMBA 205 and MGMTMBA 209A.

Restriction: Master of Business Administration students only.

MGMTMBA 211. MBA Proseminar. 0 Units.

Provides students in the Merge School Full-time MBA Program with information and practical skills for success in the MBA program, and for business career planning.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

MGMTMBA 213. New Venture Management: A Course in Entrepreneurship. 4 Units.

Focuses on survival and growth of new ventures. Involves a mix of live cases, guest speakers, discussion, and field projects with contemporary entrepreneurs to learn about successful new venture management and surviving the liabilities of newness.

Prerequisite: MGMTMBA 202 and MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 215. Global Competitive Strategy. 4 Units.

Examines the challenges and opportunities for international business focusing on how and why companies go global, global industry structure and competition, international market development and market entry, and the management of international business risks. Extensive use of cases and discussions.

Prerequisite: MGMTMBA 202 and MGMTMBA 205 and MGMTMBA 210.

Restriction: Master of Business Administration students only.

MGMTMBA 218. Business Dynamics. 4 Units.

Addresses how managers can successfully face the continuous challenges to their survival in a time-efficient, strategically sound manner. Builds on the core strategy course by tackling an extended range of strategic responses to dynamic and competitive environments.

Prerequisite: MGMTMBA 200 and MGMTMBA 202 and MGMTMBA 210.

Restriction: Master of Business Administration students only.

MGMTMBA 220. Organizational Change. 4 Units.

Focuses in the implementation of change. Focus is on identifying the features of successful change in organizations of varying sizes and configurations, with an emphasis on the reasons why individuals resist or embrace change.

Prerequisite: MGMTMBA 200 and MGMTMBA 202.

Restriction: Master of Business Administration students only.

MGMTMBA 225. Negotiations. 4 Units.

Using a combination of theory and practice via negotiation simulations, students expand their repertoire of negotiating skills and develop their ability to analyze different negotiation situations and contexts.

Prerequisite: MGMTMBA 200 and MGMTMBA 202.

Restriction: Master of Business Administration students only.

MGMTMBA 228. International Management. 4 Units.

Introduction to the effects of different national cultures and political/economic systems on the assumptions, expectations, organizational practices, and organizational forms relevant to cross-national organizational work.

Prerequisite: MGMTMBA 200 and MGMTMBA 202.

Restriction: Master of Business Administration students only.

MGMTMBA 229. Leadership Strategies. 4 Units.

Provides insight/perspectives about the study and development of leadership. Helps students answer three questions: Where am I currently as a leader? What tools can I use to improve my leadership? What is my plan for the future as a leader?.

Prerequisite: MGMTMBA 200 and MGMTMBA 202.

Restriction: Master of Business Administration students only.

MGMTMBA 231A. FSA-Earnings Quality and Asset Analysis. 4 Units.

Develops skills essential to using financial statements for business analysis by examining financial information quality, profitability and risk analysis, earnings management, revenue recognition, asset recognition and valuation, and how financial reporting is related to the business environment and managerial incentives.

Prerequisite: MGMTMBA 203A.

Restriction: Master of Business Administration students only.

MGMTMBA 231B. FSA-Liability and Equity Analysis. 4 Units.

Focuses on the financial statement analysis of liabilities and stockholders' equity. Covers topics such as forecasting financial statements, earnings-based valuation models, accounting analysis of mergers and acquisitions, leases, bankruptcy prediction, and derivatives.

Prerequisite: MGMTMBA 203A.

Restriction: Master of Business Administration students only.

MGMTMBA 234. Financial Statement Analysis. 4 Units.

Develops an initial set of skills essential to using financial statements for business analysis. Topics include financial information "quality," earnings management, revenue recognition, forecasting financial information, and equity valuation.

Prerequisite: MGMTMBA 203A.

Restriction: Master of Business Administration students only.

MGMTMBA 236. Accounting Control and Corporate Governance. 4 Units.

Equips MBA students with skills to deal with the challenges and opportunities organizations face in dealing with the separation of ownership and control.

Prerequisite: MGMTMBA 203A and MGMTMBA 203B.

Restriction: Master of Business Administration students only.

MGMTMBA 242. Portfolio Management. 4 Units.

Advanced portfolio decision-making. Topics include index models, portfolio performance measures, bond portfolio management and interest immunization, stock market anomalies and market efficiency.

Prerequisite: MGMTMBA 201A and MGMTMBA 201B and MGMTMBA 204A and MGMTMBA 209A and MGMTMBA 209B.

MGMTMBA 243. Bonds and Fixed Income. 4 Units.

During the past decade, there has been a tremendous amount of innovation in the design and use of debt securities. Focuses on techniques and methodologies for valuing different types of debt as well as their uses.

Prerequisite: MGMTMBA 201A and MGMTMBA 203A and MGMTMBA 204A and MGMTMBA 209A and MGMTMBA 209B.

Restriction: Master of Business Administration students only.

MGMTMBA 244. Multinational Finance. 4 Units.

Focuses on financial issues facing multinational corporations, the most important of which is the management of foreign exchange risk. Other topics covered are investments and financing decisions in international capital markets.

Prerequisite: MGMTMBA 201A and MGMTMBA 201B and MGMTMBA 204A and MGMTMBA 204B and MGMTMBA 209A and MGMTMBA 209B.

MGMTMBA 246A. Introduction to Real Estate Process. 4 Units.

Introductory survey course providing a working knowledge of the real estate market. Topics include real estate economics, valuation, feasibility, investment, tax considerations, financing, development, and corporate real estate asset management. Lectures and cases, with supplemental presentations by real estate professionals.

MGMTMBA 246B. International Real Estate. 4 Units.

Survey of international real estate investment opportunities. Topics include size and breadth; opportunities and challenges (tax treatment, currency/political/market risks, transaction costs, lack of local knowledge); ownership vehicles (REITs, joint ventures, equity funds, etc.). Global cast of guest lecturers supplements lectures.

Restriction: Master of Business Administration students only.

MGMTMBA 246C. Real Estate Capital Markets. 4 Units.

Understanding the four sectors of real estate capital markets: public debt, private debt, public equity, private equity; fundamental drivers of real estate investment; key players; investment types; underwriting strategies; debt vs. equity source characteristics and implications for returns.

MGMTMBA 246D. The Real Estate Development Process. 4 Units.

Nature and composition of development community and development process. Emphasis on role of conflicting interests, values and goals, and market uncertainty. Special attention paid to deal structuring and risk management. Lectures, guest lecturers, team projects evaluating actual development project.

MGMTMBA 246E. Mortgage-Backed Securities and Structured Finance. 4 Units.

Theory and operation of the residential and commercial mortgage-backed securities markets. Historical introduction, pricing and technical analysis, the securitization process and roles of individual players, investment characteristics, structured finance and derivatives, recent policy issues. Guest lecturers from industry supplement lectures.

MGMTMBA 246F. Seminar in Management of the Real Estate Enterprise. 4 Units.

Capstone seminar. Looks beyond "The Deal" to management of the real estate enterprise itself. Explores aspects of decision-making focused upon strategic objectives: goal setting, legal/tax structures, public vs. closely-held entities, corporate ethics, capital structure, managing growth, diversification, technology. Guest professionals.

MGMTMBA 246G. Applied Real Estate Security Analysis and Portfolio Management. 4 Units.

Provides an understanding of the public real estate investment trust (REIT) market and its place in modern investment strategies, presents methods for analyzing and valuing companies, and introduces basic concepts for constructing and managing a real estate investment portfolio.

MGMTMBA 248. Corporate Valuation. 4 Units.

Studies cases that expand concepts covered in the introductory corporate finance course and focuses on estimating the value of firms and projects in diverse settings.

Prerequisite: MGMTMBA 209B.

Restriction: Master of Business Administration students only.

MGMTMBA 249. Derivatives. 4 Units.

Studies options, futures, and other derivatives. The first part covers forward, futures, and swaps. The second part examines the pricing of options. Applications of these instruments are emphasized.

Prerequisite: MGMTMBA 201A and MGMTMBA 203A and MGMTMBA 204A and MGMTMBA 209A and MGMTMBA 209B.

Restriction: Master of Business Administration students only.

MGMTMBA 250. Consumer Behavior. 4 Units.

Examines consumer decision-making process with emphasis on application of concepts and research findings from behavioral sciences for solution of marketing problems. Includes models of consumer decision-making, information processing theories, and sociological influences on consumer decision-making.

Prerequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 251A. Marketing Research. 4 Units.

Covers conducting marketing research to generate consumer insights that will drive sales, market share, and profitability and/or realize other quantitative objectives. Discusses problem formulation, data collection, statistical analyses, formulating managerial recommendations, implementation, and how research is used by companies.

Prerequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 252A. Advertising and Communications Management. 4 Units.

Covers integrated marketing communications which includes advertising, sale promotions, public relations, and direct mail. Topics include elements of a communications plan, marketing research including copy testing and tracking, creating brand value, media strategies, and measuring return on investment.

Prerequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 252D. New Product Development. 4 Units.

Designed to introduce the new product development process and techniques to identify markets, develop new product ideas, measure consumer preferences, position and design new products as well as test them prior to launch. Analytical thinking and techniques are emphasized.

Prerequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 256. Design Management and Innovation. 4 Units.

Presents a design-driven approach, from design as organizational vision to strategic innovation to managing the design process. Students are exposed to design fundamentals and work in teams that involve creativity workshops and real-world projects.

Restriction: Master of Business Administration students only.

MGMTMBA 257. Marketing on the Internet. 4 Units.

Examines impact of the Internet on traditional methods of doing marketing, and explores its existing and future uses. Discusses how to capitalize on and increase the Internet's utility as a tool that can increase marketing effectiveness, efficiency, and competitiveness.

Prerequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 258. Marketing Strategies for High Technology. 4 Units.

Framework and tools for managing technology-intensive businesses. Product and pricing policies; network externalities; compatibility concerns; systems competition; technological and market uncertainty; technology licensing strategies; contracting in high-tech markets; product line design; product bundling strategies; usage-based pricing; pricing of networks.

Prerequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 259. Strategic Brand Management. 4 Units.

Addresses important branding decisions faced by organizations. A computer simulation allows students hands-on experience in making decisions about their brand and seeing the results of those decisions.

Prerequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 261A. Physicians, Executives, and Healthcare Law. 4 Units.

Elective course offered alternating years, for the UCI MBA students. Designed to bring to the classroom major healthcare law issues.

Prerequisite: MGMTMBA 201A.

MGMTMBA 261B. Physicians, Executives, and Health Leadership. 4 Units.

Elective course offered alternating years, for the UCI MBA students. Designed to bring to the classroom major healthcare leadership and management issues from both the executive and physician perspective.

Prerequisite: MGMTMBA 201A.

Restriction: Master of Business Administration students only.

MGMTMBA 262. Managing Nonprofits. 4 Units.

Focuses on the similarities and differences between for-profit and nonprofit organizations, with emphasis on the management of nonprofits. Topics include: marketing, fundraising, staffing, management/director relationships, use of volunteers, and emerging career opportunities.

Restriction: Master of Business Administration students only.

MGMTMBA 264. US Health Policy. 4 Units.

Provides an overview of US health policy with a particular emphasis on current policy developments and debates. Students will be introduced to the basic tools of policy analysis and will apply them to health policy issues.

Restriction: Master of Business Administration students only.

MGMTMBA 272. Critical IT Decisions for Business Executives. 4 Units.

Develops frameworks to help business executives make critical IT decisions. Examples include how much to invest in IT, determining management practices to maximize return on IT investment, sourcing strategies for IT and business process outsourcing, strategies for digital environments.

Prerequisite: MGMTMBA 207.

Restriction: Master of Business Administration students only.

MGMTMBA 273. Business Intelligence for Analytical. 4 Units.

Introduces methods to mine data repositories for business intelligence to facilitate analytical decision-making. Topics include clustering for market segmentation, association rules to discover relationships between different purchase decisions, Naive-Bayes classification techniques for decision making using decision-trees.

Restriction: Master of Business Administration students only.

MGMTMBA 274. Database Management and Strategic Applications. 4 Units.

Examines contemporary business applications of databases including CRM, knowledge management, data-warehousing, data-mining, and business intelligence. Also covers the database design process with a focus on enabling business decision making including capturing the linkages among data, and retrieving data.

Prerequisite: MGMTMBA 207.

Restriction: Master of Business Administration students only.

MGMTMBA 279. Digital Strategies and Markets. 4 Units.

Examines how online social media are impacting organizations and markets. Topics include collective intelligence, online social influence, social networks, and social media monetization. The target audience consists of students interested in IT consulting, competitive strategy, marketing, and entrepreneurship.

Restriction: Master of Business Administration students only.

MGMTMBA 280. Forecasting. 4 Units.

Basic theory and techniques used to forecast future activities in technological, economic, social, and political arenas. Impact of forecasting on managerial decision making.

MGMTMBA 282. Revenue Management . 4 Units.

Students learn to apply advanced analytics to earn incremental revenue through the efficient use of resources and science-based pricing methods. Statistics and optimization (using Excel and Excel Solver). Industry-specific implementation issues.

Restriction: Master of Business Administration students only.

MGMTMBA 283. Decision Analysis. 4 Units.

Models of preferences and uncertainty; exercises in creative problem solving. Assessment and use of preference models (von Neumann-Morgenstern expected utility and measurable value functions) for private, public, and not-for-profit decision making. Assessment and use of subjective probabilities in decision making.

Restriction: Master of Business Administration students only.

MGMTMBA 285. Supply Chain Management. 4 Units.

Focuses on the effective coordination of materials, the role of information and technology, and channel conflicts in global supply chains. Recent innovations in global supply chain management are also discussed, including the impact of electronic commerce.

Restriction: Master of Business Administration students only.

MGMTMBA 290. FLD STUDIES IN MGMT. 2-4 Units.

Each quarter a number of special topic seminars are offered in the 290 series. Examples of possible topics include Communication in Organizations, Power and Authority in Organizations, International Management, Health Care Administration, Real Estate Development.

Repeatability: May be repeated for credit unlimited times.

MGMTMBA 292. Business Law. 4 Units.

Detailed study from a business viewpoint of contract theories, assignments, delegation of duties, third-party beneficiary contracts, defenses to consensual contracts, types of conditions, methods of excusing conditions, remedies, and types of damages.

MGMTMBA 293. Biotech Management . 5 Units.

Taught jointly by Biological Sciences and Merage School faculty, the course addresses fundamental aspects within, and associated with, the biotechnology industry. Curriculum is focused largely on management issues, including finance, product development, pharmaceuticals, project management, regulatory affairs, and ethics.

Same as MOL BIO 253.

Restriction: Master's Program in Biotechnology Management students only.

MGMTMBA 295B. Micromarketing Lab. 2 Units.

Develop marketing plans for retail locations and neighborhoods based on past purchases and demographics. Topics include retail site selection, targeted advertising, promotion management, and category management. Gain experience with Geographic Information System (GIS) software and retail sales (POS) analysis.

Corequisite: MGMTMBA 205.

Restriction: Master of Business Administration students only.

MGMTMBA 295D. Operations Management Lab. 2 Units.

Introduces students to some basic skills of modeling and analyzing business processes using commercial process modeling software. Through class projects, provides students with hands-on experience in building simulation models for improving operational performance of business processes.

Corequisite: MGMTMBA 208.

Restriction: Master of Business Administration students only.

MGMTMBA 298. Experiential Learning. 4 Units.

Provides students the opportunity to put into practice concepts, skills, and tools acquired in other parts of the M.B.A. program. Seminars augment internship experiences with analyses of relevant administrative issues.

Restriction: Second-year MBA students only.

MGMTMBA 299. Individual Study . 1-12 Units.

Individual study under the direction of the selected faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Management PhD Courses

MGMTPHD 291. Ph.D. Special Topics Seminar. 2-12 Units.

Each quarter a number of special topic seminars are offered in the 291 series for Ph.D. students. Examples include topics such as methods seminar, experimental design, qualitative research, structural equation modeling.

Repeatability: Unlimited as topics vary.

MGMTPHD 297A. Doctoral Proseminar. 2-4 Units.

Analysis of the central theories and theoretical controversies in the field of management. Examination of the formal education for managerial careers and exploration of issues relating to professional careers in research and scholarship in the field of management.

Grading Option: Satisfactory/unsatisfactory only.

MGMTPHD 297B. University Teaching. 0 Units.

Designed to prepare students for teaching career; incorporates seminars addressing topics of classroom dynamics, syllabus preparation, teaching techniques; establishes mentor relationship with faculty member in student's teaching area, provides classroom experience and includes option of videotape analysis of teaching style.

MGMTPHD 297F. Doctoral Research Methods for the Management and Business Social Sciences. 4 Units.

An introduction to the fundamentals of social science research: theory development, research design, methods, data management, and writing for scholarly publications; for doctoral students intending scholarly research careers. Involves hands-on practice in formulating hypotheses, designing research, and conducting journal reviews.

MGMTPHD 297G. Qualitative Research. 4 Units.

Focuses on qualitative research techniques for management. A hands-on course that includes in-depth/long interviews, visual research methods, participant/non-participant observation, verbal protocols, constructing field notes, multi-media approaches for data gathering and analyses.

Restriction: Graduate students only.

MGMTPHD 297H. Experimental Design. 4 Units.

Advanced course provides experience in planning and implementing an experiment or quasi-experiment, including choice of topic, study design, data analysis, and manuscript preparation. Data analysis topics include ANOVA, ANCOVA, repeated measures, logistic regression, chi-square, and tests of mediation.

Restriction: Graduate students only.

MGMTPHD 297I. Applied Multivariate Statistics. 2-4 Units.

Provides an overview of the most common techniques for multivariate analysis: principal component analysis, factor analysis, cluster analysis, MANOVA, regression with continuous variables, and regression with discrete variables.

Restriction: Graduate students only.

MGMTPHD 297J. Applied Econometrics and Research Methods. 2-4 Units.

Helps students to be more knowledgeable consumers and producers of empirical research. Reviews econometric techniques and research designs used by applied microeconomists. Attention to practical issues that arise when analyzing data.

Restriction: Graduate students only.

MGMTPHD 297K. Advanced Qualitative Methods: Analyzing Qualitative Data. 4 Units.

Introduces students to the theory and practice of analyzing qualitative data. Students must have already learned about data collection and research design for qualitative research and they must have qualitative data they can analyze in the course.

Same as POL SCI 273A, SOCIOL 223, PP&D 213.

Restriction: Graduate students only.

MGMTPHD 297R. Theories of Power and Empowerment. 4 Units.

Studies different ways of thinking about power and its uses. Explores theories of power that inform various notions of empowerment, including resistance, participatory democracy, and workplace empowerment.

Same as POL SCI 223A, SOCIOL 271, PP&D 279.

Restriction: Graduate students only.

MGMTPHD 297S. Information Economics and Business Applications. 4 Units.

Designed to provide doctoral students in the Merage School with an overview of the basics of information economics, so the students can readily access the literature in their areas based on this key reference discipline.

Restriction: Graduate students only.

MGMTPHD 297T. Decision Theory. 2-4 Units.

Decision theories and preference models: How models are elicited or theories are experimentally tested, relevance to different management research areas, alternative theories, applications in management practice, and interpretations for the general public.

Restriction: Graduate students only.

MGMTPHD 297U. Foundational Theories of Organizations. 4 Units.

Covers major economic and sociological perspectives guiding the study of organizations (i.e., transaction cost economics, agency theory, institutional theories, organizational ecology, network and diffusion theories, behavioral theories, resource dependence), and examines how different theoretical perspectives are tested.

Restriction: Graduate students only.

MGMTPHD 299. Individual Directed Study. 1-12 Units.

Individual study under the direction of a selected faculty member.

Repeatability: May be taken for credit for 12 units.

Restriction: Graduate students only.

Master of Professional Accountancy Courses**MPAC 200A. Intermediate Accounting Intensive I. 4 Units.**

Designed to provide students with technical U.S. accounting theory and principles background necessary for graduate work in accounting. Current international accounting convergence issues and standards will be discussed on emerging topics.

Repeatability: May be taken for credit 2 times.

Restriction: MPAC students only.

MPAC 200B. Foundations of Taxation Intensive. 4 Units.

Provides students with the basic concepts of federal income taxation applicable to all taxpayers. Specifically, principles of taxation for individuals, corporations, and partnerships are discussed.

Repeatability: May be taken for credit 2 times.

Restriction: MPAC students only.

MPAC 200C. Intermediate Accounting Intensive II and Special Topics. 4 Units.

Designed to provide students with the technical U.S. accounting theory and principles background necessary for graduate work in accounting. Current international accounting convergence issues and standards will be discussed on emerging topics.

Repeatability: May be taken for credit 2 times.

Restriction: MPAC students only.

MPAC 200D. Auditing Intensive. 4 Units.

Designed to provide students with an understanding of the fundamental principles, processes, and ethical considerations involved in the performance of a financial statement audit under U.S. auditing standards.

Repeatability: May be taken for credit 2 times.

Restriction: MPAC students only.

MPAC 230. Accounting Proseminar: Career and Professional Development. 2 Units.

Provides students with information and practical skills for success in the program and for professional accounting and business career planning, and with discussions of current issues confronting the accounting profession.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 2 times.

Restriction: Master of Professional Accountancy students only.

MPAC 231A. Financial Statement Analysis and Valuation I. 4 Units.

Develops skills to analyze corporate financial reports. Topics include profitability, risk analysis, cash flow analysis, revenue and asset recognition, and valuation. The skills are useful for students to evaluate financial reporting quality, detect earnings management, and predict firms' financial performance.

Prerequisite: Intermediate accounting.

Restriction: Master of Professional Accountancy students only.

MPAC 231B. Financial Statement Analysis and Valuation II. 4 Units.

Develops skills to analyze corporate financial reports with a focus on liabilities, stockholders' equity, and valuation. Some topics include forecasting financial statements, cash flows- and earnings-based equity, and valuation models, accounting analysis of mergers and acquisitions, lease pensions, and derivatives.

Restriction: Master of Professional Accountancy students only.

MPAC 232. Taxes and Business Strategy. 4 Units.

Develops a student's ability to identify, understand, and evaluate tax-planning opportunities. The focus is on tax planning concepts and the effects of taxes on business decisions rather than on detailed tax rules, compliance, or legal research.

Prerequisite: MGMT 203A and MGMT 203B or equivalent.

Restriction: MPAC students only.

MPAC 234. Accounting Policy and Research. 2 Units.

Considers issues in contemporary accounting standard setting and regulation by examining academic accounting research of the various issues. Enables students to develop their knowledge and better appreciate current debates in accounting.

Restriction: Master of Professional Accountancy students only.

MPAC 235. Advanced Managerial Accounting. 4 Units.

Design of cost information and systems used to plan and control organizational activities; procedures used to account for unit, process, and program costs; cybernetic evaluation of costing procedures; cost estimation, analysis, and accounting via computers.

Prerequisite: MGMTMBA 203A and MGMTMBA 203B.

Restriction: Master of Professional Accountancy students only.

MPAC 237. International Accounting. 4 Units.

An online course. A comprehensive study of differences between US GAAP and International Financial Reporting Standards (IFRS). Course may be offered online.

Prerequisite: Intermediate accounting.

Restriction: Master of Professional Accountancy students only.

MPAC 238. Advanced Auditing and Forensics. 4 Units.

Designed to provide advanced coverage of topics and emerging issues in auditing, assurance services, and fraud detection. Provides a deeper understanding of the fundamental concepts of auditing, assurance services, and developing hot-topics within the auditing profession.

Prerequisite: Intermediate accounting and basic auditing.

Restriction: Master of Professional Accountancy students only.

MPAC 239. Ethics in Accounting and Business. 4 Units.

Designed to introduce students to the intellectual principles of ethical decision making by emphasizing the theories of ethics and their application in the business, and specifically, accounting professions. MPAC capstone course with a final comprehensive exam for the program.

Restriction: Master of Professional Accountancy students only.

MPAC 290. Special Topic Seminars. 2-4 Units.

Studies in selected area of Accounting. Topics addressed vary each quarter.

Repeatability: Unlimited as topics vary.

Restriction: Master of Professional Accountancy students only.

MPAC 291. Professional Research and Communication. 4 Units.

Combines research of the professional accounting literature on a range of technical topics with a written communication and oral presentations of the findings.

Restriction: Master of Professional Accountancy students only.

School of Education

Deborah Lowe Vandell, **Dean**

3200 Education Building
General Information: (949) 824-5118; gseinfo@uci.edu
Fax: (949) 824-9103
<http://www.education.uci.edu>

Overview

The School of Education is a unique interdisciplinary academic unit committed to promoting educational success in and out of school for ethnically and economically diverse learners from preschool through college (P–20) through collective research, teaching, and service activities. The multidisciplinary faculty includes scholars in psychology, sociology, economics, linguistics, language and literacy, policy, race and ethnicity, and the achievement gap. Their research addresses core issues in contemporary education: (1) equity of opportunity for ethnically, linguistically, and economically diverse learners; (2) teaching and learning in science and math; (3) early childhood education and development; (4) out-of-school learning; and (5) effective interfaces between technology and education.

The School integrates the themes of Learning, Cognition, and Development; Educational Policy and Social Context; and Language, Literacy, and Technology across its programs, including the minor in Educational Studies, the Teacher Credential, the Master's in Teaching, and the Ph.D. in Education. Scholarly work arises from the common belief that education environments, both in and out of school, are the sites of change in the quality of life and the availability of productive life choices for learners of all ages.

Undergraduate Minor in Educational Studies

The minor in Educational Studies is designed to (1) foster exploration of a broad range of issues in the field of education, (2) provide a strong foundation for aspiring teachers in grades pre-K–20, and (3) offer some early-start course-work options for the UCI teaching credential program.

Students explore topics and gain practical field experience to build a knowledge base and skills applicable to careers in teaching; to graduate study in education or related fields; and to assume roles as citizens, parents, and volunteers.

The School's academic counseling staff can assist students to select a coordinated set of courses based on their stated objectives. Aspiring K–12 teachers also have options for an "early start" to teaching by completing selected minor courses that will also satisfy requirements for the UCI multiple subjects or single subject teaching credential programs. Students interested in serving community out-of-school programs can select new courses on topics relevant to after-school education. Students who are interested in future graduate study can select undergraduate courses that will lay a foundation for the study of core subject areas in the School of Education's Ph.D. program.

Requirements

The minor requires completion of a minimum of seven courses (three core courses and four electives) totaling 28 units. At least five courses must be upper-division. Students must also complete a minimum of 40 hours of

verifiable field experience or research in an educational setting. No more than two non-Education courses (up to 8 units) from the student's major area of study may be used to satisfy the minor requirements. A maximum of 8 units may be used to satisfy minor requirements with any repeatable course.

Core Courses

Select three core courses (12 units) of the following:

EDUC 50	Origins, Purposes, and Central Issues in K-12 Education
EDUC 107	Child Development in Education
EDUC 108	Adolescent Development and Education
EDUC 160	Foundations of Out-of-School Learning
EDUC 173	Cognition and Learning in Educational Settings
EDUC 175	Foundations of Education
EDUC 176	Psychology of Learning, Abilities, and Intelligence

Elective Courses

Select four elective courses (16 units) of the following:

A. Education courses numbered 1–199. A course selected to satisfy the minor core requirement cannot also be used to satisfy the elective requirement.	
B. Up to 4 units allowed for an approved course offered by another department. The course must appear on the list below, or the student may petition approval of a course that is not on the list. Petition forms are available on the School's Web site. The following are approved elective courses offered by other departments:	
ASIANAM 139	Asian Americans and Education
HUMAN 195	Humanities Out There (H.O.T) Practicum
PHY SCI 5/BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105/BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching
PHY SCI 106/BIO SCI 102	California Teach 3: High School Science and Mathematics Teaching
PSYCH 144A	HABLA: Language Intervention for Disadvantaged Children
PSYCH 144B	HABLA: Language Intervention for Disadvantaged Children
PSYCH 144C	HABLA: Language Intervention for Disadvantaged Children
PSYCH 145P	Attention and Learning Deficits in Children I
PSYCH 145Q	Attention and Learning Deficits in Children II
PSYCH 145R	Attention and Learning Deficits in Children III
SOC SCI 196	Global Connect
UNI STU 175	Methods and Application in Small Group Instruction
UNI STU 192	Group Project for Discussion Leaders

Practicum

The student must complete a minimum of 40 hours of verifiable field experience or research in an educational setting. This requirement may be satisfied in any combination of the following to reach a total of 40 hours:

A. Complete field experience hours that satisfy requirements for UCI courses. The number of fieldwork hours in a course must be verified by the course syllabus or by a fieldwork verification form signed by the instructor.

B. Complete education-related research in conjunction with Education 198.

C. Get approval by petition for fieldwork hours completed during a student's tenure at UCI that are independent of any courses (e.g., tutoring experience, instructional experience in a summer program or after-school program for children). When fieldwork approval by petition is needed, students submit a fieldwork verification form to the School of Education Student Affairs Office. Forms are available on the School's Web site.

The School of Education Student Affairs Office can provide up-to-date information about courses that include fieldwork. Before enrolling in a course with the intent of satisfying the minor practicum requirement, students are advised to check with the instructor or the course syllabus to verify the exact number of hours. The following is a list of Education courses that usually include 10 hours or more of fieldwork:

EDUC 100	Educational Strategies for Tutoring and Teacher Aiding
EDUC 104D	Preparation for Teaching Fine Arts in K-12 Schools
EDUC 131	Educational Technology
EDUC 132	Reading and Writing Enrichment for After-School Programs
EDUC 137	Art in the Elementary School
EDUC 138	Children's Literature in the Elementary Classroom
EDUC 141A/PSYCH 141J	Jumpstart I: Early Language, Literacy, and Social Development
EDUC 141B/PSYCH 141K	Jumpstart I: Early Language, Literacy, and Social Development
EDUC 141C/PSYCH 141L	Jumpstart I: Early Language, Literacy, and Social Development
EDUC 153B	Urban Youth and the Development of Literacy through the Arts II
EDUC 160	Foundations of Out-of-School Learning
EDUC 161	Discovering Science in Out-of-School Hours
EDUC 178	Poetry in the K-12 Classroom
EDUC 181B	Principles and Practices of Coaching Sports II: Field Practicum
EDUC 191	Advanced Fieldwork in After-School Education
EDUC 193	Directed Studies in Early Childhood Education
EDUC 198	Directed Research in Education

Residence Requirement. At least four upper-division courses must be successfully completed at UCI.

Statement of Intent. A Statement of Intent is required of all students wishing to enroll in this minor; forms are available from the School's Web site: <http://www.education.uci.edu>.

GPA Requirement. For certification in the minor, a student must obtain a minimum overall grade point average of at least C (2.0) in all courses required for the minor program. No more than two courses (8 units) applied to the minor may be taken Pass/Not Pass.

Other Courses. Students should consult a School of Education Student Affairs counselor about UCI 300-level Education courses that are open to undergraduates or courses from other colleges or universities that can satisfy minor in Educational Studies requirements.

Minor Courses That Also Provide an Early Start Toward a Teaching Credential. The following courses satisfy core or elective requirements for the minor in Educational Studies, and concurrently satisfy some requirements for the UCI Multiple Subjects or Single Subject Teacher Credential programs when the student earns a grade of B or better (may not be taken Pass/Not Pass). Aspiring K–12 teachers should consult a counselor in the School of Education Student Affairs Office about selecting courses that are best suited to particular teaching credentials and to discuss eligibility for the UCI Teacher Credential program. The following courses provide an early start:

EDUC 104D	Preparation for Teaching Fine Arts in K-12 Schools ¹
EDUC 107	Child Development in Education (combined with EDUC 124 Multicultural Education in K-12 Schools) ¹
EDUC 108	Adolescent Development and Education ²
EDUC 124	Multicultural Education in K-12 Schools ²
EDUC 128	Exceptional Learners
EDUC 131	Educational Technology ³
EDUC 137	Art in the Elementary School ¹
EDUC 152F	Teaching Mathematics with Technology ³
EDUC 173	Cognition and Learning in Educational Settings
EDUC 176	Psychology of Learning, Abilities, and Intelligence
EDUC 190	Principles and Practices of K–6 After School Sports and Fitness ¹
POL SCI 21A	Introduction to American Government

¹ Satisfies a requirement in the UCI Multiple Subjects Credential program only.

² Satisfies a requirement in the UCI Single Subject Credential program only.

³ Students satisfy an educational technologies requirement in the UCI Single Subject Credential program by completing either EDUC 131 or EDUC 152F.

Teaching and Service Credential Programs

The School of Education is authorized by the Commission on Teacher Credentialing to offer teacher and school administrator professional preparation programs for California teaching and service credentials. The School offers programs for multiple and single subject credentials. Also, in partnership with the School of Biological Sciences and the School of Physical Sciences, the School of Education offers the Cal Teach Science and Mathematics Program, an undergraduate Student Teacher Credential program for aspiring science or mathematics teachers. Additionally, in cooperation with University Extension, the School offers Administrative Services Credential programs and a Reading Certificate program.

Multiple Subject Teaching Credential

A Multiple Subject Teaching Credential authorizes teaching in multiple-subject environments commonly found in California elementary schools where one teacher is responsible for teaching most or all subjects to one group of students during the school day.

A Preliminary Multiple Subject Teaching Credential is granted by the State upon completion of a baccalaureate degree and the State-approved UCI teacher education program that includes student teaching and a teaching performance assessment.

Admission to the Program

Submit an application through the Graduate Division.

Evidence of Academic Achievement—Official Transcripts from all post-secondary institutions. Completion of a baccalaureate degree from an accredited institution and a minimum grade point average of 3.0 will support admission to the credential programs.

NOTE: An applicant with a GPA of less than 3.0 must pass CSET and basic skills exams as a condition of admission.

Undergraduates who enroll in courses that fulfill credential requirements are not guaranteed admission to the program; admission through the regular graduate admissions process is required.

Written Recommendations. Three letters of recommendation, including at least one from an academic source, from individuals who are familiar with the applicant's: (1) ability to pursue graduate study, (2) capacity to work with children, and/or (3) demonstrated fitness for the professional environment of teaching.

Prior to the Start of the Program

- Pass CSET exam subtests 101, 102, and 103;
- Verify basic skills by passing the CBEST, or CSET subtest 142 along with CSET 101, 102, 103;
- Submit a current Certificate of Clearance from the State of California;
- Submit a current TB test with negative results.

Course and Fieldwork

Fall	Winter	Spring
EDUC 173	EDUC 304 or 306	EDUC 304 or 306
EDUC 301	EDUC 322B	EDUC 308
EDUC 320	EDUC 324	EDUC 323
EDUC 322A		EDUC 325

EDUC 326
EDUC 329
EDUC 345

EDUC 333
EDUC 348

Student teaching for Multiple Subject candidates (grades K–6) is defined as a full day, four days per week during the first quarter of student teaching and a full day, five days per week during the second quarter of student teaching. Clinical assignments will include two levels within the K–6 range in elementary schools.

Readiness for student teaching shall be determined by, but not be limited to, the candidate's academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student teaching will be considered good cause for removal and/or a leave of absence from the program.

BCLAD (Spanish or Mandarin) Emphasis

Students who are bilingual in Spanish or Mandarin (as confirmed through oral assessment by a School of Education designee) may be eligible for a bilingual student teaching placement to help them prepare to apply for a Bilingual, Crosscultural, Language, and Academic Development (BCLAD) credential with an emphasis in Spanish or Mandarin.

Applying for a California Credential

In addition to fulfilling all of the above requirements, an applicant must:

- Show evidence a college-level course, or pass an approved examination on the U.S. Constitution;
- Obtain a CPR certificate in Adult, Child, and Infant resuscitation training;
- Pass the Reading Instruction Competency Assessment (RICA).

Supplementary and Additional Teaching Authorizations. After acquiring a basic credential, it is possible to add further teaching authorizations. Consult an academic counselor in the School of Education for details.

Single Subject Teaching Credential

A Single Subject Credential authorizes teaching in single-subject environments commonly found in California middle or intermediate and high schools where a teacher teaches one subject to different groups of students. UCI offers a program leading to Single Subject Teaching credentials in art, English, mathematics, music, sciences, social science, and the world languages of Spanish, French, and Mandarin. Depending on the size of the applicant pool, some subjects may not be offered every year.

A Preliminary Single Subject Teaching Credential is granted by the Commission on Teacher Credentialing (CTC) upon completion of a baccalaureate degree and the State-approved UCI teacher education program that includes student teaching or intern teaching and a teaching performance assessment.

Requirements for the Post-Baccalaureate Single Subject Credential Program

Admission to the Program

Submit an application through the Graduate Division.

Evidence of Academic Achievement—Official Transcripts from all post-secondary institutions. Completion of a baccalaureate degree from an accredited institution and a minimum grade point average of 3.0 will

support admission to the credential programs. Undergraduates who enroll in courses leading to a credential are not guaranteed admission to the program; admission through the regular graduate admissions process is required.

NOTE: Applicants in the following categories must verify subject matter competence and basic skills (see below) as a condition of admission.

1. If GPA is less than 3.0.
2. If you have not completed a major, a minor, or a significant number of college-level courses in the single subject discipline for which you are applying (e.g., mathematics, English, science).
3. If you are applying for the Spring Start Intern Teacher Program.

Written Recommendations. Three letters of recommendation, including at least one from an academic source, from individuals who are familiar with the applicant's (1) ability to pursue graduate study, (2) capacity to work with children, and/or (3) demonstrated fitness for the professional environment of teaching.

Prior to the Start of the Program:

- Pass the California Basic Educational Skills Test;
- Pass the required California Subject Matter Tests or complete an approved subject-matter preparation program in the content area;
- Hold a current Certificate of Clearance or Substitute Teaching Permit from the State of California;
- Hold a current TB test with negative results.

Course and Fieldwork

Fall	Winter	Spring
EDUC 173	EDUC 305	EDUC 307
EDUC 302	EDUC 307	EDUC 310
EDUC 336-341 (Methods)	EDUC 342 or 342A	EDUC 334
EDUC 346	EDUC 349	EDUC 342B
EDUC 347		EDUC 348
EDUC 350		EDUC 352

A grade of B or better is required in all courses and in student teaching for successful completion of the program. Student teaching for Single Subject candidates (grades 7–12) in the post-baccalaureate program is defined as a full-day, five days per week for one public school semester in an appropriate classroom setting in a middle or high school.

Readiness for student teaching shall be determined by, but not be limited to, the candidate's academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student teaching will be considered good cause for removal and/or a leave of absence from the program.

Applying for a California Credential

In addition to fulfilling all of the above requirements, an applicant must:

- Show evidence of a college-level course, or pass an approved examination on the U.S. Constitution;
- Obtain a CPR certificate in Adult, Child, and Infant resuscitation training.

Supplementary and Additional Teaching Authorizations. After acquiring a basic credential, it is possible to add further teaching authorizations. Consult an academic counselor in the School of Education for details.

Requirements for the Undergraduate Cal Teach Science and Mathematics Single Subject Credential Program

The following academic units offer undergraduates an option to earn a bachelor's degree in mathematics or a science discipline while concurrently satisfying requirements for a Single Subject Teaching Credential: Departments of Chemistry, Earth System Sciences, Mathematics, Physics and Astronomy, and the School of Biological Sciences. Interested students should consult degree program options described in this *Catalogue* or talk with a counselor in the School of Physical Sciences Student Affairs Office or the School of Biological Sciences Student Affairs Office. With careful, early planning, it is possible for students to complete their bachelor's degree and teacher certification in four years.

Prior to Entry in the Cal Teach Single Subject Credential Program:

- Declare a major and, if applicable, a concentration in secondary education in one of the departments offering a Cal Teach Science and Mathematics credentialing option;
- Complete a Cal Teach Program enrollment form, indicating intent to complete requirements for the Single Subject Teaching Credential for mathematics or one of the science disciplines. This must be done by the end of an undergraduate's second year at the latest, and prior to enrolling in EDUC 55, which would typically be completed in fall of the third year. Enrollment forms are available in the School of Physical Sciences Student Affairs Office (134 Rowland Hall), the School of Biological Sciences Student Affairs Office (third floor, Biological Sciences III), and the Cal Teach Science and Mathematics Resource and Advising Center (137 Bison Modular).

Prior to the Start of Student Teaching:

- Pass the California Basic Education Skills Test (CBEST);
- Pass the California Subject Exam for Teachers (CSET) or complete a subject-matter preparation program (available for Mathematics only);
- Hold a current Certificate of Clearance from the State of California;
- Hold a current TB test with negative results.

Course and Fieldwork

Candidates who enroll in the undergraduate Cal Teach Single Subject Teacher Credential program at UCI are generally required to take the following courses.

PHY SCI 5/BIO SCI 14	California Teach 1: Introduction to Science and Mathematics Teaching
PHY SCI 105/BIO SCI 101	California Teach 2: Middle School Science and Mathematics Teaching ¹
CHEM/PHYSICS 193/BIO SCI 108	Research Methods
MATH 8	Explorations in Functions and Modeling (for Mathematics candidates only)
LPS 60	The Making of Modern Science
or MATH 184 & 184L	History of Mathematics and History of Mathematics Lesson Lab
EDUC 55	Knowing and Learning in Mathematics and Science ¹

EDUC 109	Reading and Writing in Secondary Mathematics and Science Classrooms ¹
EDUC 143AW	Classroom Interactions I
EDUC 143BW	Classroom Interactions II
EDUC 148	Complex Pedagogical Design ¹
EDUC 158	Student Teaching Mathematics and Science in Middle/High School ¹

¹ For the undergraduate Cal Teach Single Subject Credential Program, a grade of C or better is required in the following courses: PHY SCI 105/BIO SCI 101; EDUC 55, EDUC 109, EDUC 143AW, EDUC 143BW, EDUC 148, and EDUC 158.

Student teaching for Single Subject candidates in the undergraduate Cal Teach program is defined as a minimum of four hours per day, five days per week for at least one full public school semester in an appropriate classroom setting in middle or high school.

Readiness for student teaching shall be determined by, but not be limited to, the candidate's academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student teaching will be considered good cause for removal and/or a leave of absence from the program.

Applying for a California Credential

In addition to fulfilling all of the above requirements, an applicant must:

- Show evidence of a college-level course, or pass an approved examination on the U.S. Constitution;
- Obtain a CPR certificate in Adult, Child, and Infant resuscitation training;
- Official UCI transcript must show that bachelor's degree has been awarded.

If competence has been demonstrated by the conclusion of the student teaching program, and all other CTC and Departmental requirements are met, the undergraduate candidate is eligible for a preliminary credential through UCI.

Supplementary and Additional Teaching Authorizations. After acquiring a basic credential, it is possible to add further teaching authorizations. Consult an academic counselor in the School of Education for details.

Spring Start Intern Teacher Program

The Intern Teacher Credential Program has served the Orange County region for over 40 years, particularly in the areas of English, Science, and Mathematics. Currently, because there are enough teachers available for job openings without using intern teachers, UCI has placed this program on hiatus. Please consider the School of Education's other excellent programs.

Admission to the Program

NOTE: Admission to the program is not available at this time. Contact the School for information.

Evidence of Academic Achievement—Official Transcripts from all post-secondary institutions. Completion of a baccalaureate degree from an accredited institution and a minimum grade point average of 3.0 will support admission to the credential programs. Undergraduates who enroll

in courses leading to a credential are not guaranteed admission to the program; admission through the regular graduate admissions process is required.

Written Recommendations. Three letters of recommendation, including at least one from an academic source, from individuals who are familiar with the applicant's (1) ability to pursue graduate study, (2) capacity to work with children, and/or (3) demonstrated fitness for the professional environment of teaching.

Documentation for Field Component of the Intern Program:

- Pass the California Basic Educational Skills Test;
- Pass the required California Subject Matter Tests or complete an approved subject-matter preparation program in the content area;
- Hold a current Certificate of Clearance or Substitute Teaching Permit from the State of California.

Course and Fieldwork

Spring	Summer	Fall	Winter/Spring
EDUC 315	EDUC 173	EDUC 307 (student teaching, if no internship occurs) or 317	
EDUC 319	EDUC 347A, B (124)	EDUC 310	
EDUC 334	EDUC 342 or 342A	EDUC 342	
EDUC 338, 340, or 341	EDUC 349	EDUC 346	
EDUC 348	EDUC 350 (108)		
EDUC 352			EDUC 317 (if internship occurs)

A grade of B or better is required in all courses and in intern or student teaching for successful completion of the program. Readiness for student or intern teaching shall be determined by, but not be limited to, the candidate's academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student or intern teaching will be considered good cause for removal and/or a leave of absence from the program.

Applying for a California Internship or Preliminary Credential

If an internship is offered, the School of Education will apply for an intern credential to authorize supervised teaching in the public school. Whether the candidate uses an internship or student teaching to complete the program, upon successful completion of all requirements, the candidate is eligible to apply for a preliminary credential through UCI.

Supplementary and Additional Teaching Authorizations. After acquiring a basic credential, it is possible to add further teaching authorizations. For further information, see an academic counselor or the intern program coordinator in the School of Education. Information sessions are held every other week on alternating Mondays and Tuesdays.

Preparation to Apply to the Post-Baccalaureate Credential Programs

In addition to collecting documentation of all requirements listed in the earlier sections of this *Catalogue*, there are several ways to prepare for the application process and strengthen an applicant's potential for success in the credential program.

Take courses in the Minor in Educational Studies. These courses introduce issues central to education and provide opportunities for field experiences.

Start on required exams a year in advance. CBEST results do not expire; CSET results are honored for five years; GRE results are honored for five years. CSET exams can be scheduled one subtest at a time to reduce test stress and provide more time for in-depth study. If an applicant spreads the subtests over two or three test dates, it may take a year to pass all required subtests.

Apply for a Certificate of Clearance well in advance. This process can encounter unanticipated delays, so apply early. The certificate is honored for five years, although some school districts will require new fingerprints for employment.

Obtain a substitute teaching credential and work as a substitute teacher. By working in the schools, an applicant will make the transition more easily.

Build a resumé. Work in a school as an aide or tutor, or in an after-school program.

Admission to the Credential Programs

The M.A.T. and credential programs offer preferred admission status to applicant files completed between January and March and then continue admitting students until the programs are filled. Later applicants may miss out on scholarship opportunities.

There are several ways to obtain support with the admissions process:

Online guide to the application process, including the link for the online application: <http://www.education.uci.edu/admissions/sscp.php>.

Information Sessions: Informal meetings for general and specific information about programs and admissions documentation are held every other week on alternating Mondays and Tuesdays (or more frequently during peak recruitment periods).

Personal Counseling with the Counselor of the Day.

Administrative Services Credential

The School of Education sponsors a program through University Extension leading to the Administrative Services Credential. The Preliminary Administrative Services Credential is obtained by completing the approved program of 36 quarter units and a comprehensive examination. This credential also requires a valid basic credential, three years of full-time teaching or services experience, and passage of the CBEST.

The Professional Clear Administrative Services Credential (Tier 2) begins when an administrative position is obtained. The UCI Professional Clear Administrative Services program requires the successful completion of two years of full-time school administrative experience, the Preliminary Administrative Services Credential, and six (6) quarter units (Induction and Final Evaluation, Education 398A-B) which provide structured mentoring,

self-assessment, and formative/summative evaluation of the candidate. Those interested in these credentials should make an appointment with the director of the program in University Extension.

Faculty

Robert J. Beck, Ph.D. University of Chicago, *Senate Emeritus, Education*

Henry J. Becker, Ph.D. The Johns Hopkins University, *Professor Emeritus of Education*

Rebecca Black, Ph.D. University of Wisconsin, *Associate Professor of Education* (language and literacy, popular culture, online learning)

Liane Brouillette, Ph.D. University of Colorado, Boulder, *Associate Professor of Education* (educational leadership, qualitative research, arts in education)

Penelope Collins, Ph.D. Ontario Institute for Studies in Education, University of Toronto, *Associate Professor of Education* (cognition and learning, linguistic diversity, reading, phonological processing, learning disabilities)

Gilberto Q. Conchas, Ph.D. University of Michigan, *Associate Professor of Education and Sociology* (diversity and equity in education, race and urban education, immigration, school reform)

AnneMarie M. Conley, Ph.D. University of Michigan, Ann Arbor, *Assistant Professor of Education* (motivation, adolescent development, person-centered approaches to studying change)

Thurston Domina, Ph.D. City University of New York, *Associate Professor of Education and Sociology* (educational policy, higher education inequality)

Greg Duncan, Ph.D. University of Michigan, *UCI Distinguished Professor of Education, Economics, and Psychology and Social Behavior* (economics of education, program evaluation, child development)

Jacquelynne S. Eccles, Ph.D. University of California, Los Angeles, *UCI Distinguished Professor of Education* (gender and ethnicity, early childhood and adolescence, social cognition)

George Farkas, Ph.D. Cornell University, *Professor of Education and Sociology* (achievement gap, educational inequality, early childhood, after-school programs)

Alan R. Hoffer, Ph.D. University of Michigan, *Professor Emeritus of Education*

Joshua Lawrence, Ed.D. Boston University, *Assistant Professor of Education* (adolescent reading, vocabulary development, longitudinal analysis, second language acquisition)

Joseph Mahoney, Ph.D. University of North Carolina, Chapel Hill, *Professor of Education and of Psychology and Social Behavior* (child/adolescent social development, out-of-school time, social/educational intervention and policy)

Jeannette Mancilla Martinez, Ed.D. Harvard University, *Assistant Professor of Education* (vocabulary development, reading comprehension, language minority learners)

Jack McCullough, Ph.D. United States International University, *Lecturer with Security of Employment Emeritus*

Anne McDaniel, Ph.D. Ohio State University, *Assistant Professor of Education and Sociology* (higher education, comparative/international education, gender, social inequalities)

Carol Booth Olson, Ph.D. University of California, Los Angeles, *Associate Professor of Education* (UCI Writing Project, academic writing, language arts, adolescent literacy)

Rita W. Peterson, Ph.D. University of California, Berkeley, *Senior Lecturer with Security of Employment Emerita*

Stephanie Reich, Ph.D. Vanderbilt University, *Associate Professor of Education and of Psychology and Social Behavior* (social emotional development, parent-child interactions, peer networks)

Judith Haymore Sandholtz, Ph.D. Stanford University, *Professor of Education* (teacher professional development, teacher education, school-university partnerships)

Rossella Santagata, Ph.D. University of California, Los Angeles, *Associate Professor of Education* (mathematics education, video and multimedia in teacher learning, culture and learning)

Tesha Sengupta-Irving, Ph.D. Stanford University, *Assistant Professor of Education* (mathematics education, gender and culture, structuring equity in opportunities to learn teacher learning)

Timothy M. Tift, M.A. Pepperdine University, *Lecturer with Security of Employment Emeritus*

Deborah Lowe Vandell, Ph.D. Boston University, *Dean of the School of Education and Professor of Education and of Psychology and Social Behavior* (developmental processes and educational outcomes, longitudinal research methods, after-school programs, early childhood education, teacher-child relationships)

Elizabeth van Es, Ph.D. Northwestern University, *Associate Professor of Education* (teacher cognition, professional development, teacher learning communities)

Mark Warschauer, Ph.D. University of Hawaii, *Professor of Education and Informatics* (language and literacy, technology in education, diversity and equity)

Maria Estela Zarate, Ph.D. University of California, Los Angeles, *Assistant Professor of Education* (college access, gender equity, diversity and equity)

Affiliated Faculty

Jonathan Alexander, Ph.D. Louisiana State University, *Campus Writing Coordinator and Professor of English and Education* (writing studies, new media, and sexuality studies)

Elizabeth Cauffman, Ph.D. Temple University, *UCI Chancellor's Fellow and Professor of Psychology and Social Behavior and of Education* (adolescent development, mental health, juvenile justice)

Chuansheng Chen, Ph.D. University of Michigan, *Professor of Psychology and Social Behavior and of Education* (cross-cultural psychology, socialization of achievement, adolescent development)

Cynthia Feliciano, Ph.D. University of California, Los Angeles, *Associate Professor of Chicano/Latino Studies, Sociology, and Education* (race/ethnicity, education, immigration)

David John Frank, Ph.D. Stanford University, *Department Chair and Professor of Sociology, and Professor of Education* (environmental sociology, sexuality and homosexuality, education)

Wendy A. Goldberg, Ph.D. University of Michigan, *Professor of Psychology and Social Behavior and of Education* (developmental psychology, children and their families, transition to parenthood, social policy)

Gillian R. Hayes, Ph.D. Georgia Institute of Technology, *Assistant Professor of Informatics and Education* (interactive and collaborative technology, human-computer interaction, computer-supported work, educational technology)

Bradley Hughes, Ph.D. University of California, Irvine, *Director, Biological Sciences and Educational Media Design Program, and Lecturer with Security of Employment, Ecology and Evolutionary Biology and Education* (science education)

Mizuko "Mimi" Ito, Ph.D. Stanford University, *Professor in Residence of Anthropology, Informatics, and Education, and John D. and Catherine T. MacArthur Foundation Chair in Digital Media and Learning* (technology usage, specifically focusing on children and youth's changing relationships to media and communications)

Susan C. Jarratt, Ph.D. University of Texas at Austin, *Department Chair and Professor of Comparative Literature, and Professor of Education* (histories and theories of rhetoric, composition pedagogy and teacher preparation, feminist theory and pedagogy)

Glenn Levine, Ph.D. University of Texas, Austin, *Professor of German and Education* (applied linguistics, theoretical linguistics, foreign language pedagogy, German-Jewish literature, Yiddish language and literature)

Julia Reinhard Lupton, Ph.D. Yale University, *Professor of English, Comparative Literature, and Education* (Renaissance literature, literature and psychology)

Virginia Mann, Ph.D. Massachusetts Institute of Technology, *Professor of Cognitive Sciences and Education* (speech perception and its development, the development of reading ability, developmental dyslexia)

Rubén G. Rumbaut, Ph.D. Brandeis University, *Professor of Sociology and Education* (international migration, the "1.5" generation, comparative race and ethnical relations, structural inequality, identity, health and mental health)

Robin Scarcella, Ph.D. University of Southern California, *Director of the Academic English/English as a Second Language Program and Professor of Academic English and English as a Second Language, and of Education* (linguistics, language development emphasis)

James Diego Vigil, Ph.D. University of California, Los Angeles, *Professor of Criminology, Law and Society and of Education* (urban research, urban poverty, culture change, socialization and education)

Program Directors and Coordinators

Nancy Christensen, Ed.D. University of California, Irvine, *Director of Communications and Coordinator of the UCI Ph.D. in Education Program*

Sue Marshall, Ph.D. University of California, Los Angeles, *Director of Undergraduate Programs in Education*

Virginia Panish, Ph.D. University of California, Riverside, *Coordinator of the Single Subject Credential Program*

Susan Toma-Berge, Ed.D. University of San Diego and San Diego State University, *Coordinator of the Multiple Subject Credential Program*

Lecturers

Bruce Baron, M.S. Pepperdine University, *Lecturer* (social science education)

Kevin Dempsey, M.S. California State University, Fullerton, *Lecturer* (science education)

Jacqueline D'Warte, Ph.D. University of California, Los Angeles, *Lecturer* (language literacy)

Jody Guarino, Ed.D. Azusa Pacific University, *Lecturer* (teacher education, mathematics, child development and equity, assessment)

Susan Guilfoyle, M.S. University of Southern California, *Lecturer* (reading, language and literacy)

Marie-Charlotte Henderson, M.A. University of California, Irvine, *Lecturer* (foreign language instruction in secondary school)

Valerie Henry, Ed.D. University of California, Irvine, *Lecturer* (mathematics education)

Karajeane Hyde, M.A. Vanguard University, *Lecturer* (mathematics education)

Jeffrey Johnston, M.S. University of Illinois; M.A. University of Southern California, *Lecturer* (ethics in education, elementary physical education and health education)

Therese Shanahan, Ed.D. University of Southern California, *Lecturer* (science and math for Cal Teach)

Jeanne Stone, M.A. California State University, Long Beach, *Lecturer* (language arts and mathematics education)

Courses

EDUC 50. Origins, Purposes, and Central Issues in K-12 Education. 4 Units.

An introduction to the role of education in U.S. society and to central issues in K–12 education. Education is studied from four different perspectives: social, historical, philosophical, and political.

EDUC 55. Knowing and Learning in Mathematics and Science. 5 Units.

Multidisciplinary study of knowing and learning in secondary school mathematics and science. Topics include standards for knowing, scientific epistemologies, mental representations, problem solving, expert-novice studies, assessment, and domain-specific thinking, learning, and teaching. Applied analysis of learning through clinical interviews.

Prerequisite: PHY SCI 5 or BIO SCI 14.

(III)

EDUC 100. Educational Strategies for Tutoring and Teacher Aiding. 4 Units.

Placement in a public elementary or secondary school to gain experience as a tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Same as ENGR 197A.

EDUC 104D. Preparation for Teaching Fine Arts in K-12 Schools. 4 Units.

Arts education, theory, curriculum and methods for university students specializing in studio art, digital arts, dance, music, and/or drama. Includes lesson planning and teaching strategies based on California and national frameworks and content standards, and fieldwork in K–12 settings.

EDUC 104E. Multimedia and the Arts in the Multicultural Classroom. 4 Units.

Multiculturalism and under-represented U.S. minorities and the visual and performing arts: perspectives in artistic perception, creative expression, historical and cultural context, aesthetic valuing, and media literacy in the interpretation and production of multimedia arts products and applications for K-12 classrooms.

EDUC 106. Introduction to Early Childhood Education. 4 Units.

Designed to provide an introductory survey of the nature, needs, and education of young children. Explores questions such as "What should we teach young children?" and "How should we teach?"

EDUC 107. Child Development in Education. 4 Units.

Explores the pathways of normally developing children's growth and change over time. In particular, focuses on how cognitive and social development impact and are driven by educational contexts.

EDUC 108. Adolescent Development and Education. 4 Units.

Explores the physical, cognitive, emotional, and social development of adolescents, with an emphasis on the practical implications of developmental theory and research findings for teachers and other professionals who work with adolescents in middle or high school contexts.

EDUC 109. Reading and Writing in Secondary Mathematics and Science Classrooms. 4 Units.

Emphasis is placed on understanding the literacy processes (listening, speaking, viewing, thinking, reading, and writing) as they relate to middle and high school mathematics and science. Students integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Corequisite: EDUC 158.

EDUC 121. Child Care Research and Policy. 4 Units.

Examines historical changes in child care over the past 50 years, research on how child care experiences relate to child development while children are in child care and after they enter primary school, and the government policies regarding child care.

Restriction: Juniors, and Seniors only.

EDUC 122A. Foundations of Elementary School Mathematics I. 4 Units.

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

EDUC 122B. Foundations of Elementary School Mathematics II. 4 Units.

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122A.

EDUC 122C. Foundations of Elementary School Mathematics III. 4 Units.

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122B.

EDUC 124. Multicultural Education in K-12 Schools. 4 Units.

Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S.-born minority student populations in an increasingly diverse and changing society.

Same as CHC/LAT 183.

(VII)**EDUC 125. Children, Schools, and Cinema. 4 Units.**

Through popular films, analyzes aspects of school dynamics and interaction of schools with students, teachers, and public. Melding educational studies and film studies provides deeper understanding of methods used to transmit information and attitudes about schools to the lay public.

EDUC 126. Ethics and Education. 4 Units.

Ethics in education and how ethicists frame moral problems. Presents major ethical themes that affect education. Analysis of models for dealing with ethical goals and developing morality for K–12 students. Models for solving ethical dilemmas within an educational context.

Prerequisite: EDUC 50.

EDUC 128. Exceptional Learners. 4 Units.

An introductory survey of the nature, needs, and education of K–12 children with exceptionalities. Covers the categories and characteristics of exceptionalities, relevant state and federal legislation, and the role of general education teachers in special education.

EDUC 130. Children's Learning and Media. 4 Units.

Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

EDUC 131. Educational Technology. 4 Units.

Presents an overview of the types and uses of educational technology to support and enhance the K–12 learning experience. Familiarizes students with lesson planning, instructional design, learning theory, and integrating technology into the curriculum.

EDUC 132. Reading and Writing Enrichment for After-School Programs. 4 Units.

Examines literacy development and the implementation of research-based practices to enrich learners' reading and writing skills in after-school programs. A minimum of 20 hours of after-school program fieldwork is required in order to design and implement literacy enrichment activities.

EDUC 134. Teaching English Internationally. 4 Units.

Covers methods of teaching English as a foreign language, basic language knowledge for English teachers, the social context of English language teaching around the world, and essential information about securing international employment as an English teacher.

EDUC 136. Teaching and Learning Secondary Science. 4 Units.

Explores the field of teaching science, as students are guided through blending theories and classroom methodologies, such as constructivism, experimental inquiry, and interdisciplinary science, while developing skills in presentation, conducting hands-on activities, and offering exciting demonstrations that build curiosity.

EDUC 137. Art in the Elementary School. 4 Units.

Theory and practice in art education for the elementary school classroom. Includes content and pedagogy for future teachers and others interested in the relationship between child development and the production of visual art.

EDUC 138. Children's Literature in the Elementary Classroom. 4 Units.

Explores the wealth of children's literature that can be integrated into the elementary classroom. Surveys traditional literature, fiction, nonfiction, and poetry that make curriculum accessible to all students. Focuses on literary elements for both reading and creating text.

EDUC 141A. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141J.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141B. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141K.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141C. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lecture, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141L.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141D. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141M.

EDUC 141E. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141N.

EDUC 141F. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141O.

EDUC 141G. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141P.

EDUC 141H. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141Q.

EDUC 141I. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141R.

EDUC 143AW. Classroom Interactions I. 4 Units.

Focuses on research-based instructional strategies for enhancing the learning of secondary mathematics and science. Students learn about adolescent and second-language development to assist them in developing analyzing, teaching, and critiquing lessons for secondary classrooms.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

EDUC 143BW. Classroom Interactions II. 4 Units.

Focuses on equity and multicultural education research, special education, and research-based instructional and assessment strategies to assist students in designing, teaching, and assessing lessons that meet the needs of all secondary mathematics and science students.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW. Satisfactory completion of the Lower-Division Writing requirement.

(Ib, VII)

EDUC 145. Theories and Pedagogies of Race in Education. 4 Units.

Introduces theoretical frameworks to examine the role of race in American education. Emphasis is placed on introducing students to different race and ethnicity paradigms.

EDUC 148. Complex Pedagogical Design. 6 Units.

In this Cal Teach capstone course, students design lesson plans and complex instructional units, using approaches such as mathematics and science integration, problem-based instruction, project-based learning, technology, representations, scientific and mathematical analysis/modeling, authentic assessment, contextualization, and designing equitable learning environments.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 143BW.

EDUC 149. Family, School, and Community in Early Childhood. 4 Units.

Focuses on the many socializing aspects of young children's social worlds. Through the use of ecological perspectives, explores the role of families, schools, and communities on children's social development, especially in early childhood.

EDUC 150. Changing the High School Experience. 4 Units.

Analysis of problems in high school education (e.g., student disengagement and underachievement of disadvantaged) and proposals for changing curriculum, instruction, and school organization. Students suggest own reforms and analyze effective/ineffective school practices.

Prerequisite: Recommended: 1 unit of EDUC 199.

EDUC 151. Language and Literacy. 4 Units.

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as PSY BEH 192V.

Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

EDUC 152F. Teaching Mathematics with Technology. 4 Units.

Students learn to use current technologies to facilitate student learning of K-12 mathematics, and gain experience in using technology to design and teach mathematics lessons.

EDUC 153A. Urban Youth and the Development of Literacy through the Arts I. 4 Units.

Brings together research and practice on innovative instructional strategies for developing urban-student literacy through visual, communicative, and performing arts. UCI students are involved in an intervention at a local school.

EDUC 153B. Urban Youth and the Development of Literacy through the Arts II. 4 Units.

Building on knowledge gained in Education 153A, focuses on practices for developing urban-student literacy. Students are required to complete 40 hours of fieldwork, participating in an actual intervention at a local school.

Prerequisite: EDUC 153A.

EDUC 155. Special Topics in Educational Issues and Asian Americans. 4 Units.

Critical analysis of a variety of historical and contemporary educational issues facing Asian Americans. May be repeated for credit as topics vary.

Repeatability: Unlimited as topics vary.

EDUC 157. Research Methods in Education. 4 Units.

Covers a variety of research methods, both qualitative and quantitative, in educational contexts. Students have the opportunity to plan, execute, and write up a small research project.

EDUC 158. Student Teaching Mathematics and Science in Middle/High School. 6 Units.

Student teaching includes orientation, seminars, preparation, and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar. Five days/week and a minimum four hours/day over two quarters.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148.

EDUC 160. Foundations of Out-of-School Learning. 4 Units.

Provides an overview of child and adolescent learning through participation in out-of-school activities and settings. Recognizes the importance of matching out-of-school experiences with the interests, needs, and development level of students. Observation-based fieldwork included.

Repeatability: May be taken for credit 2 times.

Restriction: May be taken a second time if student is a candidate for Certificate in After-School Education, and the first time was prior to Fall 2008.

EDUC 160L. After-school Programs Fieldwork. 1-2 Units.

Supervised fieldwork at an after-school program. Fieldwork is under the direction of an Education faculty member and an after-school program supervisor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 4 units.

EDUC 161. Discovering Science in Out-of-School Hours. 4 Units.

Examines the design principles and teaching techniques that science museums and other out-of-school science programs use to motivate children and youth to learn science through discovery. Includes field experience at a science learning center or after-school program.

EDUC 170A. Issues & Controversies in Secondary History-Social Studies. 4 Units.

Examines passionate debates about what adolescents should learn in history and social studies classes. Competing priorities between history and current social issues; "heritage" education or critical history; social studies vs. social science; wars over curriculum standards; teaching about moral issues.

EDUC 170B. Teaching & Learning Secondary History-Social Studies. 4 Units.

How adolescents understand history and social issues. Pioneering research on their reasoning about history, politics, and related areas. Examination of typical practices in history and social studies teaching. Improving students' learning through historiographic investigation and information technology resources.

EDUC 172A. Issues and Controversies in Secondary Mathematics. 4 Units.

Examines different perspectives on what mathematical competencies should be emphasized in secondary schools, and how they should be taught. Particular attention to problem solving, algebra and geometry, and issues of equity. Introduction to research on mathematical cognition and teacher beliefs.

EDUC 172B. Teaching and Learning Secondary Mathematics. 4 Units.

How children and adolescents learn to understand mathematics. Research on mathematical cognition, particularly on mathematical problem solving and the learning of algebra, geometry, and calculus. Examination of several innovative instructional programs derived from research on mathematics learning.

EDUC 173. Cognition and Learning in Educational Settings. 4 Units.

Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as PSY BEH 192T.

Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

EDUC 175. Foundations of Education. 4 Units.

Foundational questions of education are viewed from newly emerging developmental perspectives which treat cognition as embodied action and learning as cultural recapitulation. Historical, sociological, psychological, and philosophical implications of views toward aspects of teaching, learning, curriculum, and pedagogy are considered.

EDUC 176. Psychology of Learning, Abilities, and Intelligence. 4 Units.

Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYCH 7A or PSY BEH 9.

Same as PSY BEH 192U.

Restriction: Psychology and Social Behavior, Social Ecology, and Education majors have first consideration for enrollment.

EDUC 177. Exploring Geography and Social Issues in K-12 Education. 4 Units.

Examines how natural environment has shaped human culture and how human cultures shape natural environment. Uses geography as lens to develop student understanding of social issues, their causes, and consequences.

EDUC 178. Poetry in the K-12 Classroom. 2-4 Units.

Students experience school-day fieldwork in UCI-instructed poetry workshops in bilingual K–12 classrooms. Supporting lectures provide content, pedagogical framework, and practice for fieldwork lessons. Course work includes commenting on student work, composing and presenting field notes, lesson plans, and case studies.

Repeatability: May be taken for credit 3 times.

EDUC 179W. Advanced Composition for Teachers. 4-4 Units.

Principles of formal composition and problems of teaching. Selecting handbooks and ancillary reading, marking papers, making assignments, and conducting workshops and tutorials.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as WRITING 179W.

Restriction: Upper-division students only.

(Ib)

EDUC 180. Interdisciplinary Topics in Education. 4 Units.

Analysis of issues in education from interdisciplinary perspectives. Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

EDUC 181A. Principles and Practices of Coaching Sports I. 4 Units.

Focuses on foundational theories and instructional practices in coaching sports from fourth grade to the collegiate level. Prepares students for the coach's mandatory state certification examination for high school sports in California.

EDUC 181B. Principles and Practices of Coaching Sports II: Field Practicum. 4 Units.

Building on knowledge gained in Education 181A, focuses on practical experiences of coaching sports. UCI students chose their preferred sport and perform coaching or assistant coaching duties, via a 40-hour volunteer placement in a public school.

Prerequisite: EDUC 181A.

EDUC 182. Latina/Latino Access and Persistence in Higher Education. 4 Units.

Introduction to how social, political, and economic forces impact on Latina/Latino racial/ethnic minorities with regard to their access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research.

Same as CHC/LAT 182.

EDUC 183. College Advising for High School Students. 4 Units.

Provides a brief introduction to college-access issues and in-depth understanding in the field of college advising. Students learn how to help high school students develop higher education plans and guide them through the college application process.

Same as CHC/LAT 184.

EDUC 185. Social Development in Education. 4 Units.

Examination of contextual, psychosocial, and biological factors contributing to the social development of children and adolescents. Theoretical perspectives, empirical findings, and methodological issues are emphasized. Implications of the scientific evidence for practical and policy decision-making surrounding development are discussed.

EDUC 190. Principles and Practices of K–6 After School Sports and Fitness. 4 Units.

Focuses on foundational theories and instructional practices in after-school sports and fitness for K–6 students. Includes a 20-hour field experience in an after-school setting.

EDUC 191. Advanced Fieldwork in After-School Education. 4 Units.

Capstone fieldwork experience for students seeking to earn the Department of Education-sponsored Certificate in After-School Education. Students are required to complete 50 or more hours of fieldwork and related assignments at an instructor-approved after-school program.

Prerequisite: EDUC 160.

EDUC 193. Directed Studies in Early Childhood Education. 2-4 Units.

Advanced study of early childhood education under the direction of a faculty member, coupled with a community-based practicum.

Repeatability: May be repeated for credit unlimited times.

EDUC 198. Directed Research in Education. 2-8 Units.

Individually or in small groups, students are exposed to or participate in work related to a faculty member's research. Students also attend a weekly seminar and complete a research paper or comparable project. Prerequisite: sophomore, junior, or senior standing.

Repeatability: May be taken for credit for 12 units.

Restriction: Sophomore only or Juniors only or Seniors only.

EDUC 199. Individual Study. 1-4 Units.

Intensified advanced study in areas in which a student has considerable background, under the direction of a faculty member who will guide and evaluate the study.

EDUC 201. Teachers' Lives and Policy Environment of Teaching. 4 Units.

Examines research and public perceptions about school-based educational processes, the influence of institutional structures and educational policy on the lives of teachers, and the challenges of school reform at the local and classroom level.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 202. Outcomes of Schooling/Student Assessment. 4 Units.

Focuses on establishment of learning goals and assessment tools that are valid for all students, inform educational decisions, and promote educational success. Provides critical examination of different forms of assessment used in K–12 schools, including developmental assessments and appropriate interventions.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 203. Advanced Concepts in Learning and Cognition. 4 Units.

Theories of cognition and their application to thinking and learning in school settings. Topics include memory, information processing, knowledge representation, problem solving, meta-cognition, and intelligence.

Prerequisite: EDUC 173.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 205. Critical Assessment of Teaching Practice and Learning. 4 Units.

Student articulates a problem in instructional practice and uses research on cognition, assessment, and other tools to understand the problem. Capstone course emphasizes practices of teacher inquiry, reflection, and professional collaboration. Student's written analyses are evaluated as program's Comprehensive Examination.

Restriction: Master of Arts in Teaching Program students only.

EDUC 206. Design of Learning Environments for Teachers in Secondary School Subjects. 4 Units.

Research on comprehension, conceptual understanding, reasoning, critical thinking, and problem solving with applications to pedagogy in secondary school subjects. Required for M.A.T. single subject students, unless substitution of Education 207 is authorized.

EDUC 207. Cognition and Pedagogy in Quantitative Literacy. 4 Units.

Reviews research on cognition in elementary mathematics, including numeracy, fractions, probability, proportionality, measurement, geometry, algebra. Emphasizes instructional approaches consistent with this research knowledge. Required for M.A.T. multiple subjects students, unless substitution of Education 206 is authorized by the Department.

EDUC 209. Vocabulary Learning and Academic Language. 4 Units.

Examines linguistic, developmental, psychometric, and neurological perspectives on word learning and semantics, paying particular attention to the relation between language development and reading, and features of academic language in content-specific texts.

Restriction: Graduate students only.

EDUC 210. Language, Literacy, and Discourse. 4 Units.

Introduces students to the interdisciplinary study of language, literacy, and discourse across historical and educational contexts. Addresses theories of how people learn, interact, and make meaning through a variety of semiotic resources, including oral communication, print, and digital media.

Restriction: Graduate students only.

EDUC 211. Writing Theory and Practice. 4 Units.

Offers an overview of histories, theories, and research in the field of composition studies from 1950 to the present. Addresses the influences of theory and research on teaching practice at K–12 and college levels.

Restriction: Graduate students only.

EDUC 212. Literacy and Technology. 4 Units.

Examines theoretical, historical, and contemporary relationships of technology and literacy. Topics include online communication, multimodality, video games, the use of technology for literacy instruction in schools, and research approaches for investigating literacy development with technology.

Restriction: Graduate students only.

EDUC 216. Language Learning with Digital Media. 4 Units.

Examines the use of new technologies in second and foreign language teaching. Considers historical and theoretical perspectives, current research, and future directions. Topics include online interaction, computer-assisted testing, corpora and concordancing, second language reading and writing, and affect and identity.

Restriction: Graduate students only.

EDUC 218. Special Topics in Language, Literacy, and Technology. 4 Units.

Advanced seminar designed to engage students in highly interactive examination of current issues in language, literacy, and technology. Topics and content will vary by quarter, depending upon research interests of the faculty and students.

Repeatability: May be taken for credit 10 times as topics vary.

Restriction: Graduate students only.

EDUC 220. Developing Adolescent Literacy. 4 Units.

Examines how adolescents leverage vocabulary knowledge, word-reading skills, background understanding, and knowledge of content-specific text features to master an increasing range of texts both independently and for subject-area learning.

Restriction: Graduate students only.

EDUC 222. Research Epistemologies and Methodologies. 4 Units.

Introduction to epistemological underpinnings of educational research and to a range of research methodologies in education. Includes examination of quantitative and qualitative studies through reading and analyzing contemporary research. Critique of selected research studies pertinent to educational practice and policy.

Restriction: Ed.D. Program students only.

EDUC 224. Social Development and Education. 4 Units.

Surveys the theory and empirical evidence concerning human social development from infancy to adolescence. Topics include studying how children conceptualize the social world, interact with caretakers, develop social relationships with peers, and how they impact student success.

Restriction: Graduate students only.

EDUC 225. Learning, Development, and Culture. 4 Units.

Explores issues of learning and development through a cultural lens. The interplay between culture and learning and culture and development is analyzed through the discussion of relevant readings from both psychological and anthropological research traditions.

Restriction: Graduate students only.

EDUC 229. Theories of Human Development. 4 Units.

Examines developmental theory as a guide for research and practice in education. The evolution of classical development theories and the emergence of new theoretical models are considered. Theoretical perspectives include ecological systems, life course, psychobiology, attachment, and social-cognitive theories.

Restriction: Graduate students only.

EDUC 235. Psychology of Reading Acquisition. 4 Units.

Surveys theory and empirical evidence concerning acquisition, cognitive processes, and consequences of skilled reading. Explores psychological models of skilled reading, how children acquire reading and writing skills in their home and second languages, cognitive consequences of acquiring literacy skills.

Restriction: Graduate students only.

EDUC 236. Applied Linguistics and Literacy. 4 Units.

Examines research in applied linguistics as related to teaching literacy in K–12 instruction. Provides overview of language knowledge required to understand development and instruction of literacy. Topics include English structures and analysis and instructional approaches that promote literacy development.

Restriction: Graduate students only.

EDUC 237. Teacher Thinking and Learning. 4 Units.

Recent research on teacher cognition, including what knowledge teachers bring to their work and how it is used in practice. Examines the nature and development of teachers' knowledge and the relationship between knowledge and practice.

Restriction: Graduate students only.

EDUC 238. Special Topics in Learning, Cognition, and Development. 4 Units.

An advanced seminar designed to engage students in highly interactive examination of current issues in learning, cognition, and development. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Restriction: Graduate students only.

EDUC 240. Instructional Design and Education Technology. 4 Units.

Design of high-quality instructional units consistent with current theory and research in cognitive psychology and constructivist-compatible instructional practice and infused with appropriate uses of computer and video technologies. Students design a complete instructional unit using these principles.

Restriction: Master of Arts in Teaching Program students only.

EDUC 251. Educational Policy and Politics. 4 Units.

An in-depth study of topics relevant to educational reform and policy-making. Topics include: the policy-making process, the role of values and interest groups, policy analysis, equality of educational opportunity, systemic reform, implementation, and politics at the school site.

Restriction: Graduate students only.

EDUC 252. Social Organization of Schools and Classrooms. 4 Units.

Examines research about the organizational practices of schools and teachers and how they affect student outcomes. Topics include class size, tracking, organizational practices influencing school climate, and teachers' approaches to instruction.

Restriction: Graduate students only.

EDUC 254. College Access and Persistence. 4 Units.

Introduction to how social, political, and economic forces impact college access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research and the link between K–12 schooling and postsecondary stratification.

Restriction: Graduate students only.

EDUC 255. Immigration and the New Second Generation. 4 Units.

Focuses on Asian, Latino, and Black children of immigrants. Investigates how today's second generation adapts, incorporates into the U.S. social structure, transforms the social and economic landscape. Explores assimilation, immigrant families/communities, language, racial/ethnic identities, gender, education, changing U.S. racial structure.

Restriction: Graduate students only.

EDUC 256. Critical Case Studies in Education. 4 Units.

Examines single and multiple case studies as a method for investigating educational theory, practice, and policy. Explores types of questions that can be answered with case study research and designs, data analysis techniques, format, and style of writing case studies.

Restriction: Graduate students only.

EDUC 257. Social Capital and Student Achievement. 4 Units.

Examines strategies that have proven successful in encouraging both high student achievement and a supportive school culture. Extended case studies are used to probe how interpersonal interactions at the school site can work to stimulate or discourage academic commitment.

Restriction: Graduate students only.

EDUC 258. Special Topics in Educational Policy and Social Context. 4 Units.

An advanced seminar designed to engage students in highly interactive examination of current issues in educational policy and social context. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

EDUC 261. Social and Cultural Foundations of Education. 4 Units.

Provides a critical understanding of the social and cultural foundations of education through reproduction theory. Explores the unique ways in which culture and power intersect within schools and schooling systems to reproduce and resist educational inequality.

Restriction: Graduate students only.

EDUC 264. Economic Foundations of Education and Social Policy. 4 Units.

Beginning/intermediate microeconomics course provides students with an introduction to how economists think about household decision-making, markets, benefit-cost analysis, social policy issues in general and education policy in particular.

Restriction: Graduate students only.

EDUC 265. Applied Regression Analysis for Education and Social Research. 4 Units.

Provides students with a working knowledge of multiple regression and the statistical analysis of longitudinal data. Topics include a review of the OLS regression model, event-history methods, and various other techniques for analyzing longitudinal data.

Prerequisite: EDUC 288B.

Restriction: Graduate students only.

EDUC 266. Design of Learning Environments. 4 Units.

Theory and practice of designing innovative learning environments. New models of classroom interaction and technology use for new cognitive and social roles. Design cognition, and social learning theories and research methods for the design and enactment of learning environments.

Restriction: Graduate students only.

EDUC 267. Classroom Research Methods. 4 Units.

Uses students' research problems as the basis for exploring methods—teacher and student observation, interview, case studies, think alouds. Intended for doctoral students with a specific research question and very good grounding in the literature related to their question.

Restriction: Graduate students only.

EDUC 268. Out-of-School Learning and Youth Development. 4 Units.

Examines theory, research, and policy concerning out-of-school time and youth development. Several out-of-school contexts are considered (e.g., unsupervised care, informal leisure activities, and organized activities). A range of developmental outcomes are considered (e.g., achievement, social-emotional competence, and physical health).

Restriction: Graduate students only.

EDUC 274. Studies of Professional and Staff Development. 2-4 Units.

Research and theory of effective strategies for professional and staff development. Topics include: adult learning as related to professional growth of teachers, staff development as vehicle for systemic reform, reforms to enhance teacher professionalization and empowerment.

Restriction: Doctoral students only.

EDUC 278B. Studies of Diversity and Inequality in Education. 4 Units.

Study of relationships between individual diversity, social inequality, and education. How differences in socioeconomic status, race, culture, and gender translate in the educational process and affect educational outcomes. Addresses issues such as educational access, social mobility, and social reproduction.

Restriction: Graduate students only.

EDUC 280. Research Methods. 2-8 Units.

Provides practitioners at advanced degree level with insight and leadership skills for working with increasingly diverse school populations. Content varies with interest of students and instructors. May focus on populations or broader content area such as education reform in California.

Repeatability: May be taken for credit 3 times.

Restriction: Doctoral Degree candidates only.

EDUC 281. Evaluation of Educational Programs. 4 Units.

Alternative approaches to formative and summative evaluation of educational programs. Standards for effective evaluations. Epistemological, political, and practical issues in designing and conducting evaluations. Students critique specific studies relevant to educational administration and policy-making and design an evaluation.

Restriction: Doctoral students only.

EDUC 282. Graduate Seminar in the History of the Philosophy of Education. 4 Units.

Draws upon results in the historical development of the philosophy of education from Plato, Quintillian, Augustine, Locke, Rousseau, to more contemporary thinkers such as Dewey, Freire, Egan, and Rorty.

Repeatability: May be repeated for credit unlimited times.

EDUC 283A. Qualitative Research Methods in Education I. 4 Units.
Introduces students to qualitative research methodologies and methods and explores strengths and challenges of this research tradition. Topics include logistical and ethical issues, reliability, validity and generalizability, and the role of reflexivity. Students will also engage in fieldwork.

Prerequisite: EDUC 222.

Restriction: Graduate students only.

EDUC 283B. Qualitative Research Methods in Education II. 4 Units.
Provides methods for conducting and analyzing qualitative research in educational settings. Topics include data collection, coding, representing qualitative data, and using software for qualitative data analysis.

Prerequisite: EDUC 283A.

Restriction: Graduate students only.

EDUC 285. Theories of Learning Cognition. 4 Units.
Overview of theories applicable to learning in schools and extracurricular contexts. Cognitive, psychometric, behavioral, and neuroscience perspectives are applied to such topics as memory, knowledge structures, problem solving, motivation, self-referent beliefs, expertise, assessment, and cognitive abilities, including intelligence.

Restriction: Graduate students only.

EDUC 286. Discourse Analysis. 4 Units.
Examines the methodological tradition of discourse analysis as it has been applied by researchers in language and literary education for both in and out-of-school settings.

Restriction: Graduate students only.

EDUC 287. Quantitative Data Analysis in Education Research and Evaluation. 4 Units.

Covers statistical aspects of survey-based evaluations and quantitative research in education. Includes sampling, coding open-ended information, data management, scale construction, statistical analysis, and presentation of findings. Students analyze data sets—a district-based evaluation and a national survey—using SPSS.

Prerequisite: EDUC 281.

EDUC 288A. Educational, Social, and Behavioral Statistics. 4 Units.
Designed for graduate students with previous course work in statistics, including experience with statistical software such as SPSS. The emphasis is on regression analysis and the general linear model. Students learn to analyze real data using Stata software.

Prerequisite: Prior coursework in statistics, and experience with statistical software such as SPSS.

Restriction: Graduate students only.

EDUC 288B. Structural Equation Modeling for Educ, Soc & Behavioral Analysis. 4 Units.

Rigorous introduction to structural equation modeling for students with strong prior course work in statistics. Topics include path diagrams, SEM with observed variables, factor analysis, SEM with latent variables. Maximum likelihood estimating, goodness-of-fit measures, nested models, related topics.

Prerequisite: EDUC 288A.

Restriction: Graduate students only.

EDUC 289. Use of Video in Educational Research. 4 Units.

Provides students with conceptual and methodological tools for using video in educational research. Students work with their own video data or with publicly accessible databases.

Restriction: Graduate students only.

EDUC 291. Hierarchical Linear Models for Education Research. 4 Units.

Descriptive and inferential analysis methods for education projects with nested data. Focuses on linear models that account for nesting of children in classrooms or schools or of repeated measures over time on the same individuals.

EDUC 294. Dissertation Planning and Design. 4 Units.

Prepares the doctoral student to write an outstanding dissertation proposal. In workshop format, students complete a draft dissertation proposal that includes the Introduction, Conceptual Framework, Methodology, and References. Students also develop a timeline for conducting their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Doctoral degree candidates only.

EDUC 295. Pre-Dissertation Research. 2-4 Units.

Independent study course taken under the direction of a faculty member who guides the student's research. May include guidance on data collection, methodology, human subjects protocol, conference presentation, scholarly publication, program benchmark activities.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

EDUC 296A. Professional Writing in Educational Research I. 2 Units.

First of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

EDUC 296B. Professional Writing in Educational Research II. 2 Units.

Second of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

EDUC 298. Independent Study. 2-8 Units.

Independent research on topics related to education.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

EDUC 299. Dissertation Research. 1-12 Units.

Specifically designed for students researching and writing their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Doctoral students only.

EDUC 302. Directed Secondary Field Experiences. 2 Units.

Field work experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the State-mandated Teaching Performance Assessment.

Restriction: Teacher Credential Program student only.

EDUC 303. Learning to Learn from Teaching in Elementary Schools. 3 Units.

Preparation for elementary school teaching that provides analytic tools for observing and reflecting on instruction, examining how student thinking is demonstrated, understanding components of and relationships between the teaching and learning process and planning effective instruction including innovative teaching practices.

Restriction: Teacher Credential Program students only.

EDUC 304. Student Teaching in the Elementary Schools. 4-12 Units.

Student teaching seminars prepare candidates for assumption of classroom instructional responsibilities in accordance with State credentialing requirements. Four full days a week of student teaching in public school elementary classrooms in winter quarter and five full days in spring quarter.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 305. Learning to Learn from Teaching in Secondary Schools. 4 Units.

Analytic tools for (1) observing and reflecting on observed instruction; (2) examining student thinking and the relationship between teaching and learning; (3) understanding particular components of the teaching/learning process; and (4) planning effective instruction including innovative teaching practices.

Restriction: Teacher Credential Program students only.

EDUC 306. Supervised Teaching in Bilingual Education, Elementary. 4-12 Units.

Student teaching experiences in bilingual public school classrooms to include orientation, regular seminars, and preparation for bilingual classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teacher Credential Program students only.

EDUC 307. Student Teaching in Intermediate/Secondary School. 2-16 Units.

Student teaching includes orientation, seminars, and preparation for and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with public school calendar. Five full days a week in both winter and spring quarters.

Repeatability: May be taken for credit for 20 units.

Restriction: Teacher Credential Program students only.

EDUC 308. Performance Assessment for California Teachers, Multiple Subjects. 1 Unit.

Preparation and technical support for multiple subjects teacher candidates to complete State-required Teaching Performance Assessment for the California preliminary credential. Includes assistance in planning, teaching/ videotaping, assessment and reflection, and document production.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 309. Supervised Teaching in Bilingual Education, Secondary. 4-12 Units.

Student teaching experiences in bilingual public school classrooms to include orientation, regular seminars, and preparation for bilingual classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teacher Credential Program students only.

EDUC 310. Performance Assessment for California Teachers. 1 Unit.

Preparation and technical support for teacher candidates to complete the required Teaching Performance Assessment for California credential licensure. Structured support for planning, videotaping, and document production occurs in meetings scheduled to coincide with the timeline for the project.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 315. Learning to Learn from Teaching Practice. 4 Units.

Secondary curriculum and methodology, including instructional planning, teaching strategies, classroom management, evaluation, cultural and linguistic considerations and interpersonal skills. Application of these to fieldwork experience in preparation for teaching responsibilities assumed in secondary schools.

Restriction: Teacher Credential Program students only.

EDUC 317. Intern Teaching in the Secondary School: Single Subject Instruction. 4-16 Units.

A paid intern practicum (usually one year) cosponsored by an employing school district and the UCI Department of Education.

Repeatability: May be taken for credit for 36 units.

Restriction: Teacher Credential Program students only.

EDUC 319. Direct Field Experiences. 4 Units.

Observation, participation, and teaching in diverse public school classrooms. Application of theory and pedagogy in field work classrooms.

Restriction: Teacher Credential Program students only.

EDUC 321. Curriculum and Methods for Elementary School Social Studies. 3 Units.

Description, scope, sequence, and methods of teaching social studies and inquiry in grades K-8. Includes utilization of California State Framework for Teaching History/Social Science and addresses current aspects and trends in multicultural education.

Restriction: Teacher Credential Program Students only.

EDUC 322A. Curriculum and Methods for Elementary School Mathematics I. 4 Units.

Scope, sequence, and methods of teaching mathematics at all levels of elementary school. Presented through lectures, discussions, demonstrations, and exploration of a variety of materials. Covers how to plan lessons, motivate students, diagnose difficulties, and evaluate learning in mathematics.

Restriction: Teacher Credential Program students only.

EDUC 322B. Curriculum and Methods for Elementary School Mathematics II. 4 Units.

Part two of a course addressing pedagogical methods for elementary mathematics. Lectures, discussions, and exploration of instructional strategies and materials will support preservice teacher development in the critical areas of planning, instruction, and assessment for conceptual understanding in mathematics.

Restriction: Teacher Credential Program students only.

EDUC 323. Curriculum and Methods for Elementary School Science. 4 Units.

Prospective elementary teachers learn how to teach science in grades K-8. Covers States science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as ECO EVO 323.

EDUC 324. Curriculum and Methods for Elementary School Language Arts Integrated with Social Studies. 4 Units.

An integrated approach to language arts and social studies instruction at the K-6 level based on California State English/Language Arts and Social Studies Frameworks and Standards. Focus on teaching content through literature and writing and providing access for all learners.

Restriction: Teacher Credential Program students only.

EDUC 325. Teaching the Visual and Performing Arts in Elementary School. 2 Units.

Introduction to the issues and practices, including student diversity, academic literacy, and interdisciplinary content, involved in integrating the California visual and performing arts curriculum framework and academic content standards with developmentally appropriate teaching strategies for the elementary classroom.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 326. Curriculum and Methods for Elementary School Reading. 4 Units.

Teaching an integrated reading/language arts program in the elementary classroom. Implementing theories, principles, and methods which are research and reality-based. Creating a child-centered, language-rich program to meet needs of children in multicultural/multilingual settings.

Restriction: Teacher Credential Program students only.

EDUC 329. Theories and Methods of English Language Development Applied to Elementary Students. 4 Units.

Theories and methods of English language development and instruction of English language learners, with focus on elementary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades K-6 English language learners.

Restriction: Teacher Credential Program students only.

EDUC 331. Instructional Technology: Resources for the Multiple Subject Classroom. 3 Units.

Issues and techniques in uses of computer-based and media technologies in the multiple subject classroom: social implications and professional responsibilities; productivity tools to enhance student thinking skills; and strategies for instruction and management.

Restriction: Teacher Credential Program majors only.

EDUC 333. Health Principles and Practices for the Elementary Teacher. 1 Unit.

Methods for creating healthy environments for student learning in elementary schools. Introduction of California content standards and frameworks with appropriate pedagogy. Personal, family, school, community factors, and legal responsibilities of teachers. Academic, physical, emotional, and social well-being.

Grading Option: Satisfactory/unsatisfactory only.

EDUC 334. Literacy and Technology in the Secondary Classroom. 2 Units.

A view of literacy expanded beyond typological print, students learn: (1) strategies for incorporating, (2) tools for evaluating and selecting, and (3) learning theories for understanding how information and communication technologies and online resources contribute to general and disciplinary literacy.

Prerequisite: Limited to students accepted into the Teacher Credential Program

Restriction: Teacher Credential Program students only.

EDUC 336. Methods of Teaching Languages other than English in Secondary Schools. 4 Units.

Prepares future teachers of foreign language or primary/home language. Emphasizes hands-on, practical strategies for communication-based instruction and authentic assessment, in reading, writing, listening, speaking, and culture.

Restriction: Teacher Credential Program students only.

EDUC 337. Methods of Teaching Social Science in the Secondary School. 4 Units.

Theories, strategies, and methodologies related to the teaching of history and social science in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the History-Social Science Framework for California.

Restriction: Teacher Credential Program students only.

EDUC 338. Methods of Teaching English in the Secondary School. 2-4 Units.

Introduction to teaching reading, writing, and speaking skills in secondary school. Emphasis upon integrative approach to teaching literature, composition, and grammar consistent with the California State Framework. Practice in the design of lesson plans that are both integrated and cumulative.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 339. Methods of Teaching Visual & Performing Arts in Secondary Schools. 4 Units.

Theory, curriculum, and strategies for teaching visual and performing arts in the secondary school. Emphasis on the planning, delivery, and assessment of lessons consistent with California State Framework and content standards.

Restriction: Teacher Credential program or M.A.T. program students only.

EDUC 340. Methods of Teaching Mathematics in Secondary School. 2-4 Units.

Theories, strategies, and methodologies related to the teaching of mathematics in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the Mathematics Framework for California and the recommendations of professional organizations.

Repeatability: May be taken for credit for 4 units.

Restriction: Teacher Credential Program students only.

EDUC 341. Teaching Science in Secondary School. 4 Units.

Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as ECO EVO 341.

Restriction: Teacher Credential Program students only.

EDUC 342. Applied Instructional Strategies in Secondary Schools. 4 Units.

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342A, EDUC 342B.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 342A. Applied Instructional Strategies in Secondary. 2 Units.

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 342B. Applied Instructional Strategies in Secondary. 2 Units.

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 344. Applied Instructional Strategies in Secondary School Sciences. 4 Units.

Application of pedagogy and research to practice science teaching experiences in the secondary schools. A continuation of the Education 340 series with an emphasis on the needs of students with culturally diverse backgrounds.

Repeatability: May be taken for credit 2 times.

Same as ECO EVO 344.

Restriction: Teacher Credential Program students only.

EDUC 345. Child Development and Educational Equity. 4 Units.

Explores theories of child development applied to teaching and learning in elementary schools. Attention is given to role of cultural norms in defining goals for child development and for educational practices and in creating equal learning opportunities for all children.

Restriction: Teacher Credential Program students only.

EDUC 346. Reading and Writing in Middle School and High School Classrooms. 4 Units.

Emphasis is placed upon understanding the literacy processes (listening, speaking, viewing, reading, and writing) as they relate to all Single Subject areas. Teachers are guided to integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Restriction: Teacher Credential Program students only.

EDUC 347A. Culture, Diversity, and Educational Equity. 2 Units.

Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Teacher Credential Program students only.

EDUC 347B. Culture, Diversity, and Educational Equity. 2 Units.

Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Teacher Credential Program students only.

EDUC 348. Theory and Methods of Instruction of Special Populations in General Classroom. 2 Units.

Knowledge, skills, and strategies to teach special populations in the general education classroom. Categories of disability and exceptionality. Legislation pertaining to the education of special populations. Role of general education teacher in special education process. Differentiated instruction and inclusive environments.

Restriction: Teacher Credential Program students only.

EDUC 349. Theories and Methods of English Language Development Applied to Secondary Students. 4 Units.

Theories and methods of English language development and instruction of English language learners, with focus on secondary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades 7–12 English language learners.

Restriction: Teacher Credential Program students and M.A.T. students only.

EDUC 350. Adolescent Development in Education. 4 Units.

Secondary teachers must understand adolescent physical, cognitive, emotional, and social development, particularly how educators can promote healthy adjustment in their students. Focuses on why and how changes occur in each of these areas as children grow older.

Restriction: Teacher Credential Program students only.

EDUC 351. Instructional Technology: Resources for the Single Subject Classroom. 3 Units.

Issues and techniques in uses of computer based and media technologies in the single subject classroom: social implications and professional responsibilities; productivity tools to enhance student thinking skills; and strategies for instruction and management.

Restriction: Teacher Credential Program majors only.

EDUC 352. Creating a Supportive and Healthy Environment for Student Learning in the Secondary Classr. 2 Units.

Creation of healthy environments for student learning in secondary classrooms. Personal, family, school, community, environmental factors. Academic, physical, emotional, social well-being of students. Legal responsibilities of teachers related to student health, safety. Communication with family and use of community resources.

Restriction: Teaching Credential Program students only.

EDUC 398. Special Topics. 3 Units.

Meets induction and program planning requirements for students enrolled in Professional Administrative Services Credential. Also serves as final course in program, wherein the candidate, the University instructor, and a representative of the involved school district assess and evaluate candidate competency.

Repeatability: May be taken for credit 2 times.

Restriction: Professional Administrative Services Credential students only.

EDUC 399. University Teaching. 1-4 Units.

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Graduate Degree Programs in Education

Master of Science in Chemistry or Mathematics with a Teaching Credential

In cooperation with the Departments of Chemistry and Mathematics, the School of Education offers coordinated programs for the California Single Subject Teaching Credential and a Master of Science degree in Chemistry or Mathematics. Additional information is available from the School of Education Student Affairs Office and the Graduate Affairs Office in the Departments of Chemistry and Mathematics.

Master of Arts in Social Science with a Teaching Credential

In cooperation with the School of Social Sciences, students enrolled in a graduate program offered by the School may choose to pursue a teaching credential while working toward their degree. After completion of the requirements for an M.A. degree, students may petition to enroll in credential program courses with the School of Education. Credential program requirements, such as the Certificate of Clearance, TB clearance, and the passage of CBEST and CSET, may need to be met prior to the approval of the petition. A detailed description of the program may be obtained from the School of Education Student Affairs Office and the Social Sciences Graduate Office.

Master of Arts in Teaching in Elementary and Secondary Education

The School of Education offers a 15-month Master of Arts degree program in Elementary and Secondary Education. The M.A.T. program is comprised of the one-year UCI teacher credential program with six additional courses, usually taken in the summers before and after the credential program, but also available two summers following the credential program. This program provides a rich theoretical and practical framework with a focus on *Learning to Learn from Teaching*, or continuously studying the impact of one's teaching on student learning.

Admission to the Program

Selection is based on the graduate admission requirements of the UCI Graduate Division, which include the strength of the undergraduate

academic record, GRE scores, statement of purpose, and letters of recommendation.

Submit an application through the Graduate Division.

Evidence of Academic Achievement—Official Transcripts from all post-secondary institutions. Completion of a baccalaureate degree from an accredited institution and a minimum grade point average of 3.0 will support admission to the credential programs. Undergraduates who enroll in courses leading to a credential are not guaranteed admission to the program; admission through the regular graduate admissions process is required.

NOTE: Applicants in the following categories must verify subject matter competence and basic skills (see below) as a condition of admission.

1. If GPA is less than 3.0.
2. If you have not completed a major, a minor, or a significant number of college-level courses in the single subject discipline for which you are applying (e.g., mathematics, English, science).
3. If you are applying for the Spring Start Intern Teacher Program.

Written Recommendations. Three letters of recommendation, including at least one from an academic source, from individuals who are familiar with the applicant's (1) ability to pursue graduate study, (2) capacity to work with children, and/or (3) demonstrated fitness for the professional environment of teaching.

Prior to the Start of the Program

- Pass the California Basic Educational Skills Test;
- Pass the required California Subject Matter Tests or complete an approved subject-matter preparation program in the content area;
- Hold a current Certificate of Clearance or Substitute Teaching Permit from the State of California;
- Hold a current TB test with negative results.

Program of Study

Summer One – Multiple and Single Subject

EDUC 201	Teachers' Lives and Policy Environment of Teaching
EDUC 202	Outcomes of Schooling/Student Assessment
EDUC 240	Instructional Design and Education Technology

Summer Two – Multiple Subject Credential Program

EDUC 203	Advanced Concepts in Learning and Cognition
EDUC 205	Critical Assessment of Teaching Practice and Learning
EDUC 207	Cognition and Pedagogy in Quantitative Literacy

Summer Two – Single Subject Credential Program

EDUC 203	Advanced Concepts in Learning and Cognition
EDUC 205	Critical Assessment of Teaching Practice and Learning

EDUC 206

Design of Learning Environments for Teachers in Secondary School Subjects

A comprehensive examination is completed by M.A.T. candidates during the second summer. The examination is an action research project embedded in EDUC 205.

A grade of B or better is required in all courses and in student teaching for successful completion of the program.

Student teaching for Multiple Subject candidates (grades K–6) is defined as a full-day, four days per week during the first quarter of student teaching and a full-day, five days per week during the second quarter of student teaching. Assignments will include two levels within the K–6 range in elementary schools.

Student teaching for Single Subject candidates (grades 7–12) in the post-baccalaureate program is defined as a full-day, five days per week for one public school semester in an appropriate classroom setting in a middle or high school.

Readiness for student teaching shall be determined by, but not be limited to, academic work, professional conduct, and potential for success in teaching. Failure to be advanced to student teaching will be considered good cause for removal and/or a leave of absence from the program.

Applying for a California Credential

In addition to fulfilling all of the above requirements:

- Show evidence a college-level course, or pass an approved examination on the U.S. Constitution;
- Obtain a CPR certificate in Adult, Child, and Infant resuscitation training.

Supplementary and Additional Teaching Authorizations. After acquiring a basic credential, it is possible to add further teaching authorizations. Consult an academic counselor in the School of Education for details.

Doctor of Philosophy in Education

The School of Education offers a Ph.D. degree in Education. The program seeks applicants from varied backgrounds and experiences who have the potential to become outstanding scholars and researchers in the field of education. The program currently offers three specializations: (1) Learning, Cognition, and Development; (2) Educational Policy and Social Context; and (3) Language, Literacy, and Technology. Students enrolling in the program choose among the specializations based on their research interests. Course work for the program ordinarily takes two to three years to complete and involves a number of core courses, methodology courses, elective courses, and a directed research sequence. Students should advance to candidacy in their third year. The normative time for completion of the Ph.D. is five years, and the maximum time permitted is seven years. Program length may be shorter for students who enter the program with a prior master's degree in an area closely related to their doctoral research.

Students are admitted to the program once per year to begin each fall quarter. Applicants must have completed a bachelor's degree with a grade point average of at least 3.0 and have prior course work or background related to the specialization for which they express interest. Applicants are required to submit a UCI application, transcripts, a statement of purpose, a personal statement, CV or resume, a writing sample, three letters of reference, and general GRE scores completed within the past

five years. Students whose primary language is not English and who did not graduate from a U.S. college or university are also required to submit scores from either the TOEFL examination or the Academic Modules of the International English Language Testing System (IELTS).

Financial support will be offered on a competitive basis in the form of teaching or research assistantships. Students who are not citizens of countries where English is the primary or dominant language who wish to apply for a teaching assistantship will be required to fulfill an English proficiency requirement.

Further information regarding the Ph.D. program, courses, and application requirements is available on the School of Education's Web site at <http://www.gse.uci.edu>.

Master of Arts in Education

The School of Education offers an M.A. degree in Education as an option exclusively for students who are admitted to the Ph.D. in Education program. Separate applications for the M.A. in Education will not be accepted. Further information regarding the requirements for the M.A. in Education for students enrolled in the Ph.D. program is available at <http://www.gse.uci.edu>.

The Department of Education offers an M.A. degree in Education as an option exclusively for students who are admitted to the Ph.D. in Education program. Separate applications for the M.A. in Education will not be accepted. Further information regarding the requirements for the M.A. in Education for students enrolled in the Ph.D. program is available at <http://www.gse.uci.edu>.

Graduate Courses in Education

Click on the "Courses" tab at the top of this page and scroll down to the EDUC 200–300 course listings.

Courses

EDUC 50. Origins, Purposes, and Central Issues in K-12 Education. 4 Units.

An introduction to the role of education in U.S. society and to central issues in K–12 education. Education is studied from four different perspectives: social, historical, philosophical, and political.

EDUC 55. Knowing and Learning in Mathematics and Science. 5 Units.

Multidisciplinary study of knowing and learning in secondary school mathematics and science. Topics include standards for knowing, scientific epistemologies, mental representations, problem solving, expert-novice studies, assessment, and domain-specific thinking, learning, and teaching. Applied analysis of learning through clinical interviews.

Prerequisite: PHY SCI 5 or BIO SCI 14.

(III)

EDUC 100. Educational Strategies for Tutoring and Teacher Aiding . 4 Units.

Placement in a public elementary or secondary school to gain experience as a tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Same as ENGR 197A.

EDUC 104D. Preparation for Teaching Fine Arts in K-12 Schools. 4 Units.

Arts education, theory, curriculum and methods for university students specializing in studio art, digital arts, dance, music, and/or drama. Includes lesson planning and teaching strategies based on California and national frameworks and content standards, and fieldwork in K–12 settings.

EDUC 104E. Multimedia and the Arts in the Multicultural Classroom. 4 Units.

Multiculturalism and under-represented U.S. minorities and the visual and performing arts: perspectives in artistic perception, creative expression, historical and cultural context, aesthetic valuing, and media literacy in the interpretation and production of multimedia arts products and applications for K-12 classrooms.

EDUC 106. Introduction to Early Childhood Education. 4 Units.

Designed to provide an introductory survey of the nature, needs, and education of young children. Explores questions such as "What should we teach young children?" and "How should we teach?"

EDUC 107. Child Development in Education. 4 Units.

Explores the pathways of normally developing children's growth and change over time. In particular, focuses on how cognitive and social development impact and are driven by educational contexts.

EDUC 108. Adolescent Development and Education. 4 Units.

Explores the physical, cognitive, emotional, and social development of adolescents, with an emphasis on the practical implications of developmental theory and research findings for teachers and other professionals who work with adolescents in middle or high school contexts.

EDUC 109. Reading and Writing in Secondary Mathematics and Science Classrooms. 4 Units.

Emphasis is placed on understanding the literacy processes (listening, speaking, viewing, thinking, reading, and writing) as they relate to middle and high school mathematics and science. Students integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Corequisite: EDUC 158.

EDUC 121. Child Care Research and Policy. 4 Units.

Examines historical changes in child care over the past 50 years, research on how child care experiences relate to child development while children are in child care and after they enter primary school, and the government policies regarding child care.

Restriction: Juniors, and Seniors only.

EDUC 122A. Foundations of Elementary School Mathematics I. 4 Units.

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

EDUC 122B. Foundations of Elementary School Mathematics II. 4 Units.

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122A.

EDUC 122C. Foundations of Elementary School Mathematics III. 4 Units.

Provides understanding of fundamental mathematics necessary to teach for conceptual understanding and higher-level reasoning and problem solving. Conceptual understanding of place value, fractions, proportionality, geometry, algebra, functions, probability, statistics, and measurement. Instructional applications of these concepts in grades K-8 teaching.

Prerequisite: EDUC 122B.

EDUC 124. Multicultural Education in K-12 Schools. 4 Units.

Provides a theoretical and empirical overview of educational issues affecting low-income immigrant and U.S.-born minority student populations in an increasingly diverse and changing society.

Same as CHC/LAT 183.

(VII)**EDUC 125. Children, Schools, and Cinema. 4 Units.**

Through popular films, analyzes aspects of school dynamics and interaction of schools with students, teachers, and public. Melding educational studies and film studies provides deeper understanding of methods used to transmit information and attitudes about schools to the lay public.

EDUC 126. Ethics and Education. 4 Units.

Ethics in education and how ethicists frame moral problems. Presents major ethical themes that affect education. Analysis of models for dealing with ethical goals and developing morality for K–12 students. Models for solving ethical dilemmas within an educational context.

Prerequisite: EDUC 50.

EDUC 128. Exceptional Learners. 4 Units.

An introductory survey of the nature, needs, and education of K–12 children with exceptionalities. Covers the categories and characteristics of exceptionalities, relevant state and federal legislation, and the role of general education teachers in special education.

EDUC 130. Children's Learning and Media. 4 Units.

Examines how popular media may impact how young people learn, develop, and communicate by looking at research related to the impacts of a wide range of popular media including television, video games, digital environments, mobile devices, and other multimedia.

EDUC 131. Educational Technology. 4 Units.

Presents an overview of the types and uses of educational technology to support and enhance the K–12 learning experience. Familiarizes students with lesson planning, instructional design, learning theory, and integrating technology into the curriculum.

EDUC 132. Reading and Writing Enrichment for After-School Programs. 4 Units.

Examines literacy development and the implementation of research-based practices to enrich learners' reading and writing skills in after-school programs. A minimum of 20 hours of after-school program fieldwork is required in order to design and implement literacy enrichment activities.

EDUC 134. Teaching English Internationally. 4 Units.

Covers methods of teaching English as a foreign language, basic language knowledge for English teachers, the social context of English language teaching around the world, and essential information about securing international employment as an English teacher.

EDUC 136. Teaching and Learning Secondary Science. 4 Units.

Explores the field of teaching science, as students are guided through blending theories and classroom methodologies, such as constructivism, experimental inquiry, and interdisciplinary science, while developing skills in presentation, conducting hands-on activities, and offering exciting demonstrations that build curiosity.

EDUC 137. Art in the Elementary School. 4 Units.

Theory and practice in art education for the elementary school classroom. Includes content and pedagogy for future teachers and others interested in the relationship between child development and the production of visual art.

EDUC 138. Children's Literature in the Elementary Classroom. 4 Units.

Explores the wealth of children's literature that can be integrated into the elementary classroom. Surveys traditional literature, fiction, nonfiction, and poetry that make curriculum accessible to all students. Focuses on literary elements for both reading and creating text.

EDUC 141A. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141J.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141B. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141K.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141C. Jumpstart I: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lecture, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Same as PSYCH 141L.

Restriction: Psychology majors and School of Education students have first consideration for enrollment.

EDUC 141D. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141M.

EDUC 141E. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141N.

EDUC 141F. Jumpstart II: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141J and PSYCH 141K and PSYCH 141L) or (EDUC 141A and EDUC 141B and EDUC 141C).

Same as PSYCH 141O.

EDUC 141G. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141P.

EDUC 141H. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141Q.

EDUC 141I. Jumpstart III: Early Language, Literacy, and Social Development. 4 Units.

An experiential course integrated with lecture material in the field of child development and education. Students are expected to attend lectures, complete assignments, and commit eight hours per week as mentors of disadvantaged preschool children.

Prerequisite: (PSYCH 141M and PSYCH 141N and PSYCH 141O) or (EDUC 141D and EDUC 141E and EDUC 141F).

Same as PSYCH 141R.

EDUC 143AW. Classroom Interactions I. 4 Units.

Focuses on research-based instructional strategies for enhancing the learning of secondary mathematics and science. Students learn about adolescent and second-language development to assist them in developing analyzing, teaching, and critiquing lessons for secondary classrooms.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

EDUC 143BW. Classroom Interactions II. 4 Units.

Focuses on equity and multicultural education research, special education, and research-based instructional and assessment strategies to assist students in designing, teaching, and assessing lessons that meet the needs of all secondary mathematics and science students.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW. Satisfactory completion of the Lower-Division Writing requirement.

(Ib, VII)

EDUC 145. Theories and Pedagogies of Race in Education. 4 Units.

Introduces theoretical frameworks to examine the role of race in American education. Emphasis is placed on introducing students to different race and ethnicity paradigms.

EDUC 148. Complex Pedagogical Design. 6 Units.

In this Cal Teach capstone course, students design lesson plans and complex instructional units, using approaches such as mathematics and science integration, problem-based instruction, project-based learning, technology, representations, scientific and mathematical analysis/modeling, authentic assessment, contextualization, and designing equitable learning environments.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 143BW.

EDUC 149. Family, School, and Community in Early Childhood. 4 Units.

Focuses on the many socializing aspects of young children's social worlds. Through the use of ecological perspectives, explores the role of families, schools, and communities on children's social development, especially in early childhood.

EDUC 150. Changing the High School Experience. 4 Units.

Analysis of problems in high school education (e.g., student disengagement and underachievement of disadvantaged) and proposals for changing curriculum, instruction, and school organization. Students suggest own reforms and analyze effective/ineffective school practices.

Prerequisite: Recommended: 1 unit of EDUC 199.

EDUC 151. Language and Literacy. 4 Units.

Addresses the linguistic principles and processes that underlie oral and written language proficiency. Emphasis is on how to use phonology, morphology, orthography, semantics, syntax, and pragmatics to support literacy and oral language development for K-12 students.

Same as PSY BEH 192V.

Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

EDUC 152F. Teaching Mathematics with Technology. 4 Units.

Students learn to use current technologies to facilitate student learning of K-12 mathematics, and gain experience in using technology to design and teach mathematics lessons.

EDUC 153A. Urban Youth and the Development of Literacy through the Arts I. 4 Units.

Brings together research and practice on innovative instructional strategies for developing urban-student literacy through visual, communicative, and performing arts. UCI students are involved in an intervention at a local school.

EDUC 153B. Urban Youth and the Development of Literacy through the Arts II. 4 Units.

Building on knowledge gained in Education 153A, focuses on practices for developing urban-student literacy. Students are required to complete 40 hours of fieldwork, participating in an actual intervention at a local school.

Prerequisite: EDUC 153A.

EDUC 155. Special Topics in Educational Issues and Asian Americans. 4 Units.

Critical analysis of a variety of historical and contemporary educational issues facing Asian Americans. May be repeated for credit as topics vary.

Repeatability: Unlimited as topics vary.

EDUC 157. Research Methods in Education. 4 Units.

Covers a variety of research methods, both qualitative and quantitative, in educational contexts. Students have the opportunity to plan, execute, and write up a small research project.

EDUC 158. Student Teaching Mathematics and Science in Middle/High School. 6 Units.

Student teaching includes orientation, seminars, preparation, and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar. Five days/week and a minimum four hours/day over two quarters.

Prerequisite: (PHY SCI 105 or BIO SCI 101) and EDUC 55 and EDUC 143AW and EDUC 143BW and EDUC 148.

EDUC 160. Foundations of Out-of-School Learning. 4 Units.

Provides an overview of child and adolescent learning through participation in out-of-school activities and settings. Recognizes the importance of matching out-of-school experiences with the interests, needs, and development level of students. Observation-based fieldwork included.

Repeatability: May be taken for credit 2 times.

Restriction: May be taken a second time if student is a candidate for Certificate in After-School Education, and the first time was prior to Fall 2008.

EDUC 160L. After-school Programs Fieldwork. 1-2 Units.

Supervised fieldwork at an after-school program. Fieldwork is under the direction of an Education faculty member and an after-school program supervisor.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 4 units.

EDUC 161. Discovering Science in Out-of-School Hours. 4 Units.

Examines the design principles and teaching techniques that science museums and other out-of-school science programs use to motivate children and youth to learn science through discovery. Includes field experience at a science learning center or after-school program.

EDUC 170A. Issues & Controversies in Secondary History-Social Studies. 4 Units.

Examines passionate debates about what adolescents should learn in history and social studies classes. Competing priorities between history and current social issues; "heritage" education or critical history; social studies vs. social science; wars over curriculum standards; teaching about moral issues.

EDUC 170B. Teaching & Learning Secondary History-Social Studies. 4 Units.

How adolescents understand history and social issues. Pioneering research on their reasoning about history, politics, and related areas. Examination of typical practices in history and social studies teaching. Improving students' learning through historiographic investigation and information technology resources.

EDUC 172A. Issues and Controversies in Secondary Mathematics. 4 Units.

Examines different perspectives on what mathematical competencies should be emphasized in secondary schools, and how they should be taught. Particular attention to problem solving, algebra and geometry, and issues of equity. Introduction to research on mathematical cognition and teacher beliefs.

EDUC 172B. Teaching and Learning Secondary Mathematics. 4 Units.

How children and adolescents learn to understand mathematics. Research on mathematical cognition, particularly on mathematical problem solving and the learning of algebra, geometry, and calculus. Examination of several innovative instructional programs derived from research on mathematics learning.

EDUC 173. Cognition and Learning in Educational Settings. 4 Units.

Foundational concepts in cognition and development as applied to student learning. Primary topics include historical behaviorism, basic cognitive structure and processes, complex cognition, cognitive development, and motivation.

Same as PSY BEH 192T.

Restriction: Psychology and Social Behavior, Social Ecology, Education, and Psychology majors have first consideration for enrollment.

EDUC 175. Foundations of Education. 4 Units.

Foundational questions of education are viewed from newly emerging developmental perspectives which treat cognition as embodied action and learning as cultural recapitulation. Historical, sociological, psychological, and philosophical implications of views toward aspects of teaching, learning, curriculum, and pedagogy are considered.

EDUC 176. Psychology of Learning, Abilities, and Intelligence. 4 Units.

Overview of classic positions on the mind, human abilities, and intelligence, especially as related to academic achievement. Contrasting views: psychometric versus information processing; experimental versus correlational research.

Prerequisite: PSYCH 7A or PSY BEH 9.

Same as PSY BEH 192U.

Restriction: Psychology and Social Behavior, Social Ecology, and Education majors have first consideration for enrollment.

EDUC 177. Exploring Geography and Social Issues in K-12 Education. 4 Units.

Examines how natural environment has shaped human culture and how human cultures shape natural environment. Uses geography as lens to develop student understanding of social issues, their causes, and consequences.

EDUC 178. Poetry in the K-12 Classroom. 2-4 Units.

Students experience school-day fieldwork in UCI-instructed poetry workshops in bilingual K–12 classrooms. Supporting lectures provide content, pedagogical framework, and practice for fieldwork lessons. Course work includes commenting on student work, composing and presenting field notes, lesson plans, and case studies.

Repeatability: May be taken for credit 3 times.

EDUC 179W. Advanced Composition for Teachers. 4-4 Units.

Principles of formal composition and problems of teaching. Selecting handbooks and ancillary reading, marking papers, making assignments, and conducting workshops and tutorials.

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Same as WRITING 179W.

Restriction: Upper-division students only.

(Ib)

EDUC 180. Interdisciplinary Topics in Education. 4 Units.

Analysis of issues in education from interdisciplinary perspectives. Topics covered vary with interests of instructor.

Repeatability: Unlimited as topics vary.

EDUC 181A. Principles and Practices of Coaching Sports I. 4 Units.

Focuses on foundational theories and instructional practices in coaching sports from fourth grade to the collegiate level. Prepares students for the coach's mandatory state certification examination for high school sports in California.

EDUC 181B. Principles and Practices of Coaching Sports II: Field Practicum. 4 Units.

Building on knowledge gained in Education 181A, focuses on practical experiences of coaching sports. UCI students chose their preferred sport and perform coaching or assistant coaching duties, via a 40-hour volunteer placement in a public school.

Prerequisite: EDUC 181A.

EDUC 182. Latina/Latino Access and Persistence in Higher Education. 4 Units.

Introduction to how social, political, and economic forces impact on Latina/Latino racial/ethnic minorities with regard to their access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research.

Same as CHC/LAT 182.

EDUC 183. College Advising for High School Students. 4 Units.

Provides a brief introduction to college-access issues and in-depth understanding in the field of college advising. Students learn how to help high school students develop higher education plans and guide them through the college application process.

Same as CHC/LAT 184.

EDUC 185. Social Development in Education. 4 Units.

Examination of contextual, psychosocial, and biological factors contributing to the social development of children and adolescents. Theoretical perspectives, empirical findings, and methodological issues are emphasized. Implications of the scientific evidence for practical and policy decision-making surrounding development are discussed.

EDUC 190. Principles and Practices of K–6 After School Sports and Fitness. 4 Units.

Focuses on foundational theories and instructional practices in after-school sports and fitness for K–6 students. Includes a 20-hour field experience in an after-school setting.

EDUC 191. Advanced Fieldwork in After-School Education. 4 Units.

Capstone fieldwork experience for students seeking to earn the Department of Education-sponsored Certificate in After-School Education. Students are required to complete 50 or more hours of fieldwork and related assignments at an instructor-approved after-school program.

Prerequisite: EDUC 160.

EDUC 193. Directed Studies in Early Childhood Education. 2-4 Units.

Advanced study of early childhood education under the direction of a faculty member, coupled with a community-based practicum.

Repeatability: May be repeated for credit unlimited times.

EDUC 198. Directed Research in Education. 2-8 Units.

Individually or in small groups, students are exposed to or participate in work related to a faculty member's research. Students also attend a weekly seminar and complete a research paper or comparable project. Prerequisite: sophomore, junior, or senior standing.

Repeatability: May be taken for credit for 12 units.

Restriction: Sophomore only or Juniors only or Seniors only.

EDUC 199. Individual Study. 1-4 Units.

Intensified advanced study in areas in which a student has considerable background, under the direction of a faculty member who will guide and evaluate the study.

EDUC 201. Teachers' Lives and Policy Environment of Teaching. 4 Units.

Examines research and public perceptions about school-based educational processes, the influence of institutional structures and educational policy on the lives of teachers, and the challenges of school reform at the local and classroom level.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 202. Outcomes of Schooling/Student Assessment. 4 Units.

Focuses on establishment of learning goals and assessment tools that are valid for all students, inform educational decisions, and promote educational success. Provides critical examination of different forms of assessment used in K–12 schools, including developmental assessments and appropriate interventions.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 203. Advanced Concepts in Learning and Cognition. 4 Units.

Theories of cognition and their application to thinking and learning in school settings. Topics include memory, information processing, knowledge representation, problem solving, meta-cognition, and intelligence.

Prerequisite: EDUC 173.

Restriction: Master of Arts in Teaching Program majors only.

EDUC 205. Critical Assessment of Teaching Practice and Learning. 4 Units.

Student articulates a problem in instructional practice and uses research on cognition, assessment, and other tools to understand the problem. Capstone course emphasizes practices of teacher inquiry, reflection, and professional collaboration. Student's written analyses are evaluated as program's Comprehensive Examination.

Restriction: Master of Arts in Teaching Program students only.

EDUC 206. Design of Learning Environments for Teachers in Secondary School Subjects. 4 Units.

Research on comprehension, conceptual understanding, reasoning, critical thinking, and problem solving with applications to pedagogy in secondary school subjects. Required for M.A.T. single subject students, unless substitution of Education 207 is authorized.

EDUC 207. Cognition and Pedagogy in Quantitative Literacy. 4 Units.

Reviews research on cognition in elementary mathematics, including numeracy, fractions, probability, proportionality, measurement, geometry, algebra. Emphasizes instructional approaches consistent with this research knowledge. Required for M.A.T. multiple subjects students, unless substitution of Education 206 is authorized by the Department.

EDUC 209. Vocabulary Learning and Academic Language. 4 Units.

Examines linguistic, developmental, psychometric, and neurological perspectives on word learning and semantics, paying particular attention to the relation between language development and reading, and features of academic language in content-specific texts.

Restriction: Graduate students only.

EDUC 210. Language, Literacy, and Discourse. 4 Units.

Introduces students to the interdisciplinary study of language, literacy, and discourse across historical and educational contexts. Addresses theories of how people learn, interact, and make meaning through a variety of semiotic resources, including oral communication, print, and digital media.

Restriction: Graduate students only.

EDUC 211. Writing Theory and Practice. 4 Units.

Offers an overview of histories, theories, and research in the field of composition studies from 1950 to the present. Addresses the influences of theory and research on teaching practice at K–12 and college levels.

Restriction: Graduate students only.

EDUC 212. Literacy and Technology. 4 Units.

Examines theoretical, historical, and contemporary relationships of technology and literacy. Topics include online communication, multimodality, video games, the use of technology for literacy instruction in schools, and research approaches for investigating literacy development with technology.

Restriction: Graduate students only.

EDUC 216. Language Learning with Digital Media. 4 Units.

Examines the use of new technologies in second and foreign language teaching. Considers historical and theoretical perspectives, current research, and future directions. Topics include online interaction, computer-assisted testing, corpora and concordancing, second language reading and writing, and affect and identity.

Restriction: Graduate students only.

EDUC 218. Special Topics in Language, Literacy, and Technology. 4 Units.

Advanced seminar designed to engage students in highly interactive examination of current issues in language, literacy, and technology. Topics and content will vary by quarter, depending upon research interests of the faculty and students.

Repeatability: May be taken for credit 10 times as topics vary.

Restriction: Graduate students only.

EDUC 220. Developing Adolescent Literacy. 4 Units.

Examines how adolescents leverage vocabulary knowledge, word-reading skills, background understanding, and knowledge of content-specific text features to master an increasing range of texts both independently and for subject-area learning.

Restriction: Graduate students only.

EDUC 222. Research Epistemologies and Methodologies. 4 Units.

Introduction to epistemological underpinnings of educational research and to a range of research methodologies in education. Includes examination of quantitative and qualitative studies through reading and analyzing contemporary research. Critique of selected research studies pertinent to educational practice and policy.

Restriction: Ed.D. Program students only.

EDUC 224. Social Development and Education. 4 Units.

Surveys the theory and empirical evidence concerning human social development from infancy to adolescence. Topics include studying how children conceptualize the social world, interact with caretakers, develop social relationships with peers, and how they impact student success.

Restriction: Graduate students only.

EDUC 225. Learning, Development, and Culture. 4 Units.

Explores issues of learning and development through a cultural lens. The interplay between culture and learning and culture and development is analyzed through the discussion of relevant readings from both psychological and anthropological research traditions.

Restriction: Graduate students only.

EDUC 229. Theories of Human Development. 4 Units.

Examines developmental theory as a guide for research and practice in education. The evolution of classical development theories and the emergence of new theoretical models are considered. Theoretical perspectives include ecological systems, life course, psychobiology, attachment, and social-cognitive theories.

Restriction: Graduate students only.

EDUC 235. Psychology of Reading Acquisition. 4 Units.

Surveys theory and empirical evidence concerning acquisition, cognitive processes, and consequences of skilled reading. Explores psychological models of skilled reading, how children acquire reading and writing skills in their home and second languages, cognitive consequences of acquiring literacy skills.

Restriction: Graduate students only.

EDUC 236. Applied Linguistics and Literacy. 4 Units.

Examines research in applied linguistics as related to teaching literacy in K–12 instruction. Provides overview of language knowledge required to understand development and instruction of literacy. Topics include English structures and analysis and instructional approaches that promote literacy development.

Restriction: Graduate students only.

EDUC 237. Teacher Thinking and Learning. 4 Units.

Recent research on teacher cognition, including what knowledge teachers bring to their work and how it is used in practice. Examines the nature and development of teachers' knowledge and the relationship between knowledge and practice.

Restriction: Graduate students only.

EDUC 238. Special Topics in Learning, Cognition, and Development. 4 Units.

An advanced seminar designed to engage students in highly interactive examination of current issues in learning, cognition, and development. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Restriction: Graduate students only.

EDUC 240. Instructional Design and Education Technology. 4 Units.

Design of high-quality instructional units consistent with current theory and research in cognitive psychology and constructivist-compatible instructional practice and infused with appropriate uses of computer and video technologies. Students design a complete instructional unit using these principles.

Restriction: Master of Arts in Teaching Program students only.

EDUC 251. Educational Policy and Politics. 4 Units.

An in-depth study of topics relevant to educational reform and policy-making. Topics include: the policy-making process, the role of values and interest groups, policy analysis, equality of educational opportunity, systemic reform, implementation, and politics at the school site.

Restriction: Graduate students only.

EDUC 252. Social Organization of Schools and Classrooms. 4 Units.

Examines research about the organizational practices of schools and teachers and how they affect student outcomes. Topics include class size, tracking, organizational practices influencing school climate, and teachers' approaches to instruction.

Restriction: Graduate students only.

EDUC 254. College Access and Persistence. 4 Units.

Introduction to how social, political, and economic forces impact college access and persistence in the U.S. higher education system. Investigates historical perspectives and theoretical underpinnings of college access and retention research and the link between K–12 schooling and postsecondary stratification.

Restriction: Graduate students only.

EDUC 255. Immigration and the New Second Generation. 4 Units.

Focuses on Asian, Latino, and Black children of immigrants. Investigates how today's second generation adapts, incorporates into the U.S. social structure, transforms the social and economic landscape. Explores assimilation, immigrant families/communities, language, racial/ethnic identities, gender, education, changing U.S. racial structure.

Restriction: Graduate students only.

EDUC 256. Critical Case Studies in Education. 4 Units.

Examines single and multiple case studies as a method for investigating educational theory, practice, and policy. Explores types of questions that can be answered with case study research and designs, data analysis techniques, format, and style of writing case studies.

Restriction: Graduate students only.

EDUC 257. Social Capital and Student Achievement. 4 Units.

Examines strategies that have proven successful in encouraging both high student achievement and a supportive school culture. Extended case studies are used to probe how interpersonal interactions at the school site can work to stimulate or discourage academic commitment.

Restriction: Graduate students only.

EDUC 258. Special Topics in Educational Policy and Social Context. 4 Units.

An advanced seminar designed to engage students in highly interactive examination of current issues in educational policy and social context. Topics and content will vary by quarter, depending upon the research interests of the faculty and students.

Repeatability: May be taken for credit 10 times.

Restriction: Graduate students only.

EDUC 261. Social and Cultural Foundations of Education. 4 Units.

Provides a critical understanding of the social and cultural foundations of education through reproduction theory. Explores the unique ways in which culture and power intersect within schools and schooling systems to reproduce and resist educational inequality.

Restriction: Graduate students only.

EDUC 264. Economic Foundations of Education and Social Policy. 4 Units.

Beginning/intermediate microeconomics course provides students with an introduction to how economists think about household decision-making, markets, benefit-cost analysis, social policy issues in general and education policy in particular.

Restriction: Graduate students only.

EDUC 265. Applied Regression Analysis for Education and Social Research. 4 Units.

Provides students with a working knowledge of multiple regression and the statistical analysis of longitudinal data. Topics include a review of the OLS regression model, event-history methods, and various other techniques for analyzing longitudinal data.

Prerequisite: EDUC 288B.

Restriction: Graduate students only.

EDUC 266. Design of Learning Environments. 4 Units.

Theory and practice of designing innovative learning environments. New models of classroom interaction and technology use for new cognitive and social roles. Design cognition, and social learning theories and research methods for the design and enactment of learning environments.

Restriction: Graduate students only.

EDUC 267. Classroom Research Methods. 4 Units.

Uses students' research problems as the basis for exploring methods—teacher and student observation, interview, case studies, think alouds. Intended for doctoral students with a specific research question and very good grounding in the literature related to their question.

Restriction: Graduate students only.

EDUC 268. Out-of-School Learning and Youth Development. 4 Units.

Examines theory, research, and policy concerning out-of-school time and youth development. Several out-of-school contexts are considered (e.g., unsupervised care, informal leisure activities, and organized activities). A range of developmental outcomes are considered (e.g., achievement, social-emotional competence, and physical health).

Restriction: Graduate students only.

EDUC 274. Studies of Professional and Staff Development. 2-4 Units.

Research and theory of effective strategies for professional and staff development. Topics include: adult learning as related to professional growth of teachers, staff development as vehicle for systemic reform, reforms to enhance teacher professionalization and empowerment.

Restriction: Doctoral students only.

EDUC 278B. Studies of Diversity and Inequality in Education. 4 Units.

Study of relationships between individual diversity, social inequality, and education. How differences in socioeconomic status, race, culture, and gender translate in the educational process and affect educational outcomes. Addresses issues such as educational access, social mobility, and social reproduction.

Restriction: Graduate students only.

EDUC 280. Research Methods. 2-8 Units.

Provides practitioners at advanced degree level with insight and leadership skills for working with increasingly diverse school populations. Content varies with interest of students and instructors. May focus on populations or broader content area such as education reform in California.

Repeatability: May be taken for credit 3 times.

Restriction: Doctoral Degree candidates only.

EDUC 281. Evaluation of Educational Programs. 4 Units.

Alternative approaches to formative and summative evaluation of educational programs. Standards for effective evaluations. Epistemological, political, and practical issues in designing and conducting evaluations. Students critique specific studies relevant to educational administration and policy-making and design an evaluation.

Restriction: Doctoral students only.

EDUC 282. Graduate Seminar in the History of the Philosophy of Education. 4 Units.

Draws upon results in the historical development of the philosophy of education from Plato, Quintillian, Augustine, Locke, Rousseau, to more contemporary thinkers such as Dewey, Freire, Egan, and Rorty.

Repeatability: May be repeated for credit unlimited times.

EDUC 283A. Qualitative Research Methods in Education I. 4 Units.

Introduces students to qualitative research methodologies and methods and explores strengths and challenges of this research tradition. Topics include logistical and ethical issues, reliability, validity and generalizability, and the role of reflexivity. Students will also engage in fieldwork.

Prerequisite: EDUC 222.

Restriction: Graduate students only.

EDUC 283B. Qualitative Research Methods in Education II. 4 Units.

Provides methods for conducting and analyzing qualitative research in educational settings. Topics include data collection, coding, representing qualitative data, and using software for qualitative data analysis.

Prerequisite: EDUC 283A.

Restriction: Graduate students only.

EDUC 285. Theories of Learning Cognition. 4 Units.

Overview of theories applicable to learning in schools and extracurricular contexts. Cognitive, psychometric, behavioral, and neuroscience perspectives are applied to such topics as memory, knowledge structures, problem solving, motivation, self-referent beliefs, expertise, assessment, and cognitive abilities, including intelligence.

Restriction: Graduate students only.

EDUC 286. Discourse Analysis. 4 Units.

Examines the methodological tradition of discourse analysis as it has been applied by researchers in language and literary education for both in and out-of-school settings.

Restriction: Graduate students only.

EDUC 287. Quantitative Data Analysis in Education Research and Evaluation. 4 Units.

Covers statistical aspects of survey-based evaluations and quantitative research in education. Includes sampling, coding open-ended information, data management, scale construction, statistical analysis, and presentation of findings. Students analyze data sets—a district-based evaluation and a national survey—using SPSS.

Prerequisite: EDUC 281.

EDUC 288A. Educational, Social, and Behavioral Statistics. 4 Units.

Designed for graduate students with previous course work in statistics, including experience with statistical software such as SPSS. The emphasis is on regression analysis and the general linear model. Students learn to analyze real data using Stata software.

Prerequisite: Prior coursework in statistics, and experience with statistical software such as SPSS.

Restriction: Graduate students only.

EDUC 288B. Structural Equation Modeling for Educ, Soc & Behavioral Analysis. 4 Units.

Rigorous introduction to structural equation modeling for students with strong prior course work in statistics. Topics include path diagrams, SEM with observed variables, factor analysis, SEM with latent variables. Maximum likelihood estimating, goodness-of-fit measures, nested models, related topics.

Prerequisite: EDUC 288A.

Restriction: Graduate students only.

EDUC 289. Use of Video in Educational Research. 4 Units.

Provides students with conceptual and methodological tools for using video in educational research. Students work with their own video data or with publicly accessible databases.

Restriction: Graduate students only.

EDUC 291. Hierarchical Linear Models for Education Research. 4 Units.

Descriptive and inferential analysis methods for education projects with nested data. Focuses on linear models that account for nesting of children in classrooms or schools or of repeated measures over time on the same individuals.

EDUC 294. Dissertation Planning and Design. 4 Units.

Prepares the doctoral student to write an outstanding dissertation proposal. In workshop format, students complete a draft dissertation proposal that includes the Introduction, Conceptual Framework, Methodology, and References. Students also develop a timeline for conducting their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Restriction: Doctoral degree candidates only.

EDUC 295. Pre-Dissertation Research. 2-4 Units.

Independent study course taken under the direction of a faculty member who guides the student's research. May include guidance on data collection, methodology, human subjects protocol, conference presentation, scholarly publication, program benchmark activities.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

EDUC 296A. Professional Writing in Educational Research I. 2 Units.

First of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

EDUC 296B. Professional Writing in Educational Research II. 2 Units.

Second of a two-course series designed to extend students' knowledge of conducting and publishing educational research. Topics include the logic of research and how to effectively communicate research findings, with particular emphasis on proficient scientific writing.

EDUC 298. Independent Study. 2-8 Units.

Independent research on topics related to education.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

EDUC 299. Dissertation Research. 1-12 Units.

Specifically designed for students researching and writing their dissertations.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Doctoral students only.

EDUC 302. Directed Secondary Field Experiences. 2 Units.

Field work experiences and seminars to provide introduction to the California Teaching Performance Expectations, including guidelines for professional expectations, observation and participation in classrooms, instructional planning, classroom management, and formative experiences and preparation for the State-mandated Teaching Performance Assessment.

Restriction: Teacher Credential Program student only.

EDUC 303. Learning to Learn from Teaching in Elementary Schools. 3 Units.

Preparation for elementary school teaching that provides analytic tools for observing and reflecting on instruction, examining how student thinking is demonstrated, understanding components of and relationships between the teaching and learning process and planning effective instruction including innovative teaching practices.

Restriction: Teacher Credential Program students only.

EDUC 304. Student Teaching in the Elementary Schools. 4-12 Units.

Student teaching seminars prepare candidates for assumption of classroom instructional responsibilities in accordance with State credentialing requirements. Four full days a week of student teaching in public school elementary classrooms in winter quarter and five full days in spring quarter.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 305. Learning to Learn from Teaching in Secondary Schools. 4 Units.

Analytic tools for (1) observing and reflecting on observed instruction; (2) examining student thinking and the relationship between teaching and learning; (3) understanding particular components of the teaching/learning process; and (4) planning effective instruction including innovative teaching practices.

Restriction: Teacher Credential Program students only.

EDUC 306. Supervised Teaching in Bilingual Education, Elementary. 4-12 Units.

Student teaching experiences in bilingual public school classrooms to include orientation, regular seminars, and preparation for bilingual classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teacher Credential Program students only.

EDUC 307. Student Teaching in Intermediate/Secondary School. 2-16 Units.

Student teaching includes orientation, seminars, and preparation for and assumption of secondary school classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with public school calendar. Five full days a week in both winter and spring quarters.

Repeatability: May be taken for credit for 20 units.

Restriction: Teacher Credential Program students only.

EDUC 308. Performance Assessment for California Teachers, Multiple Subjects. 1 Unit.

Preparation and technical support for multiple subjects teacher candidates to complete State-required Teaching Performance Assessment for the California preliminary credential. Includes assistance in planning, teaching/ videotaping, assessment and reflection, and document production.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 309. Supervised Teaching in Bilingual Education, Secondary. 4-12 Units.

Student teaching experiences in bilingual public school classrooms to include orientation, regular seminars, and preparation for bilingual classroom instructional responsibilities in accordance with State credentialing requirements and in conjunction with the public school calendar.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teacher Credential Program students only.

EDUC 310. Performance Assessment for California Teachers. 1 Unit.

Preparation and technical support for teacher candidates to complete the required Teaching Performance Assessment for California credential licensure. Structured support for planning, videotaping, and document production occurs in meetings scheduled to coincide with the timeline for the project.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 315. Learning to Learn from Teaching Practice. 4 Units.

Secondary curriculum and methodology, including instructional planning, teaching strategies, classroom management, evaluation, cultural and linguistic considerations and interpersonal skills. Application of these to fieldwork experience in preparation for teaching responsibilities assumed in secondary schools.

Restriction: Teacher Credential Program students only.

EDUC 317. Intern Teaching in the Secondary School: Single Subject Instruction. 4-16 Units.

A paid intern practicum (usually one year) cosponsored by an employing school district and the UCI Department of Education.

Repeatability: May be taken for credit for 36 units.

Restriction: Teacher Credential Program students only.

EDUC 319. Direct Field Experiences. 4 Units.

Observation, participation, and teaching in diverse public school classrooms. Application of theory and pedagogy in field work classrooms.

Restriction: Teacher Credential Program students only.

EDUC 321. Curriculum and Methods for Elementary School Social Studies. 3 Units.

Description, scope, sequence, and methods of teaching social studies and inquiry in grades K-8. Includes utilization of California State Framework for Teaching History/Social Science and addresses current aspects and trends in multicultural education.

Restriction: Teacher Credential Program Students only.

EDUC 322A. Curriculum and Methods for Elementary School Mathematics I. 4 Units.

Scope, sequence, and methods of teaching mathematics at all levels of elementary school. Presented through lectures, discussions, demonstrations, and exploration of a variety of materials. Covers how to plan lessons, motivate students, diagnose difficulties, and evaluate learning in mathematics.

Restriction: Teacher Credential Program students only.

EDUC 322B. Curriculum and Methods for Elementary School Mathematics II. 4 Units.

Part two of a course addressing pedagogical methods for elementary mathematics. Lectures, discussions, and exploration of instructional strategies and materials will support preservice teacher development in the critical areas of planning, instruction, and assessment for conceptual understanding in mathematics.

Restriction: Teacher Credential Program students only.

EDUC 323. Curriculum and Methods for Elementary School Science. 4 Units.

Prospective elementary teachers learn how to teach science in grades K-8. Covers States science requirements, a variety of teaching methods, criteria for selecting science curriculum materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as ECO EVO 323.

EDUC 324. Curriculum and Methods for Elementary School Language Arts Integrated with Social Studies. 4 Units.

An integrated approach to language arts and social studies instruction at the K-6 level based on California State English/Language Arts and Social Studies Frameworks and Standards. Focus on teaching content through literature and writing and providing access for all learners.

Restriction: Teacher Credential Program students only.

EDUC 325. Teaching the Visual and Performing Arts in Elementary School. 2 Units.

Introduction to the issues and practices, including student diversity, academic literacy, and interdisciplinary content, involved in integrating the California visual and performing arts curriculum framework and academic content standards with developmentally appropriate teaching strategies for the elementary classroom.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 326. Curriculum and Methods for Elementary School Reading. 4 Units.

Teaching an integrated reading/language arts program in the elementary classroom. Implementing theories, principles, and methods which are research and reality-based. Creating a child-centered, language-rich program to meet needs of children in multicultural/multilingual settings.

Restriction: Teacher Credential Program students only.

EDUC 329. Theories and Methods of English Language Development Applied to Elementary Students. 4 Units.

Theories and methods of English language development and instruction of English language learners, with focus on elementary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades K-6 English language learners.

Restriction: Teacher Credential Program students only.

EDUC 331. Instructional Technology: Resources for the Multiple Subject Classroom. 3 Units.

Issues and techniques in uses of computer-based and media technologies in the multiple subject classroom: social implications and professional responsibilities; productivity tools to enhance student thinking skills; and strategies for instruction and management.

Restriction: Teacher Credential Program majors only.

EDUC 333. Health Principles and Practices for the Elementary Teacher. 1 Unit.

Methods for creating healthy environments for student learning in elementary schools. Introduction of California content standards and frameworks with appropriate pedagogy. Personal, family, school, community factors, and legal responsibilities of teachers. Academic, physical, emotional, and social well-being.

Grading Option: Satisfactory/unsatisfactory only.

EDUC 334. Literacy and Technology in the Secondary Classroom. 2 Units.

A view of literacy expanded beyond typological print, students learn: (1) strategies for incorporating, (2) tools for evaluating and selecting, and (3) learning theories for understanding how information and communication technologies and online resources contribute to general and disciplinary literacy.

Prerequisite: Limited to students accepted into the Teacher Credential Program

Restriction: Teacher Credential Program students only.

EDUC 336. Methods of Teaching Languages other than English in Secondary Schools. 4 Units.

Prepares future teachers of foreign language or primary/home language. Emphasizes hands-on, practical strategies for communication-based instruction and authentic assessment, in reading, writing, listening, speaking, and culture.

Restriction: Teacher Credential Program students only.

EDUC 337. Methods of Teaching Social Science in the Secondary School. 4 Units.

Theories, strategies, and methodologies related to the teaching of history and social science in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the History-Social Science Framework for California.

Restriction: Teacher Credential Program students only.

EDUC 338. Methods of Teaching English in the Secondary School. 2-4 Units.

Introduction to teaching reading, writing, and speaking skills in secondary school. Emphasis upon integrative approach to teaching literature, composition, and grammar consistent with the California State Framework. Practice in the design of lesson plans that are both integrated and cumulative.

Repeatability: May be taken for credit 2 times.

Restriction: Teacher Credential Program students only.

EDUC 339. Methods of Teaching Visual & Performing Arts in Secondary Schools. 4 Units.

Theory, curriculum, and strategies for teaching visual and performing arts in the secondary school. Emphasis on the planning, delivery, and assessment of lessons consistent with California State Framework and content standards.

Restriction: Teacher Credential program or M.A.T. program students only.

EDUC 340. Methods of Teaching Mathematics in Secondary School. 2-4 Units.

Theories, strategies, and methodologies related to the teaching of mathematics in the secondary school. Emphasis on the planning, delivery, and assessment of lessons reflecting an understanding of the Mathematics Framework for California and the recommendations of professional organizations.

Repeatability: May be taken for credit for 4 units.

Restriction: Teacher Credential Program students only.

EDUC 341. Teaching Science in Secondary School. 4 Units.

Prospective secondary science teachers learn how to teach science in grades 7-12. Covers State science requirements, a variety of teaching methods, criteria for selecting science curricular materials, and how to plan science lessons, units, experiments, projects, and demonstrations.

Same as ECO EVO 341.

Restriction: Teacher Credential Program students only.

EDUC 342. Applied Instructional Strategies in Secondary Schools. 4 Units.

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342A, EDUC 342B.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 342A. Applied Instructional Strategies in Secondary. 2 Units.

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 342B. Applied Instructional Strategies in Secondary. 2 Units.

Application of pedagogy and research to practice teaching experiences in the secondary schools. A continuation of the methodology course series with an emphasis on the needs of students with culturally diverse backgrounds. Conducted in a five-week format.

Repeatability: May be taken for credit 2 times.

Overlaps with EDUC 342.

Restriction: Teacher Credential Program students only. EDUC 342 and EDUC 342A-B may not both be taken for credit.

EDUC 344. Applied Instructional Strategies in Secondary School Sciences. 4 Units.

Application of pedagogy and research to practice science teaching experiences in the secondary schools. A continuation of the Education 340 series with an emphasis on the needs of students with culturally diverse backgrounds.

Repeatability: May be taken for credit 2 times.

Same as ECO EVO 344.

Restriction: Teacher Credential Program students only.

EDUC 345. Child Development and Educational Equity. 4 Units.

Explores theories of child development applied to teaching and learning in elementary schools. Attention is given to role of cultural norms in defining goals for child development and for educational practices and in creating equal learning opportunities for all children.

Restriction: Teacher Credential Program students only.

EDUC 346. Reading and Writing in Middle School and High School Classrooms. 4 Units.

Emphasis is placed upon understanding the literacy processes (listening, speaking, viewing, reading, and writing) as they relate to all Single Subject areas. Teachers are guided to integrate literacy-related strategies with curriculum-based goals supported in the California State Frameworks.

Restriction: Teacher Credential Program students only.

EDUC 347A. Culture, Diversity, and Educational Equity. 2 Units.

Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Teacher Credential Program students only.

EDUC 347B. Culture, Diversity, and Educational Equity. 2 Units.

Survey of the history of and social theories about the origins and consequences of U.S. racial, gender, and social inequality and the effects of poverty and racism on the educational opportunities and outcomes of minority groups in the United States.

Restriction: Teacher Credential Program students only.

EDUC 348. Theory and Methods of Instruction of Special Populations in General Classroom. 2 Units.

Knowledge, skills, and strategies to teach special populations in the general education classroom. Categories of disability and exceptionality. Legislation pertaining to the education of special populations. Role of general education teacher in special education process. Differentiated instruction and inclusive environments.

Restriction: Teacher Credential Program students only.

EDUC 349. Theories and Methods of English Language Development Applied to Secondary Students. 4 Units.

Theories and methods of English language development and instruction of English language learners, with focus on secondary students. Includes language acquisition theory, language and content, assessment strategies, and preparation of curricula and instruction for grades 7–12 English language learners.

Restriction: Teacher Credential Program students and M.A.T. students only.

EDUC 350. Adolescent Development in Education. 4 Units.

Secondary teachers must understand adolescent physical, cognitive, emotional, and social development, particularly how educators can promote healthy adjustment in their students. Focuses on why and how changes occur in each of these areas as children grow older.

Restriction: Teacher Credential Program students only.

EDUC 351. Instructional Technology: Resources for the Single Subject Classroom. 3 Units.

Issues and techniques in uses of computer based and media technologies in the single subject classroom: social implications and professional responsibilities; productivity tools to enhance student thinking skills; and strategies for instruction and management.

Restriction: Teacher Credential Program majors only.

EDUC 352. Creating a Supportive and Healthy Environment for Student Learning in the Secondary Classr. 2 Units.

Creation of healthy environments for student learning in secondary classrooms. Personal, family, school, community, environmental factors. Academic, physical, emotional, social well-being of students. Legal responsibilities of teachers related to student health, safety. Communication with family and use of community resources.

Restriction: Teaching Credential Program students only.

EDUC 398. Special Topics. 3 Units.

Meets induction and program planning requirements for students enrolled in Professional Administrative Services Credential. Also serves as final course in program, wherein the candidate, the University instructor, and a representative of the involved school district assess and evaluate candidate competency.

Repeatability: May be taken for credit 2 times.

Restriction: Professional Administrative Services Credential students only.

EDUC 399. University Teaching. 1-4 Units.

Limited to teaching assistants.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

The Henry Samueli School of Engineering

Gregory Washington, **Dean**

5200 Engineering Hall Undergraduate Counseling: (949) 824-4334

Graduate Counseling: (949) 824-4334

<http://www.eng.uci.edu/>

Overview

The academic mission of The Henry Samueli School of Engineering has been developed to be consistent with the missions and goals set for it by the State of California, the University of California, and the University of California, Irvine (UCI) campus. Specifically, the academic mission of the School is to educate students, at all levels, to be the best engineers and leaders in the nation and world by engaging them in a stimulating community dedicated to the discovery of knowledge, creation of new technologies, and service to society.

The individual engineering and related programs have published program objectives that are consistent with the missions and goals of the University of California and UCI, The Henry Samueli School of Engineering, and the Engineering Accreditation Commission (EAC) of ABET.

The School offers undergraduate majors in Aerospace Engineering (AE), Biomedical Engineering (BME), Biomedical Engineering: Premedical (BMEP), Chemical Engineering (ChE), Civil Engineering (CE), Computer Engineering (CpE), Computer Science and Engineering (CSE, a jointly administered program with the Donald Bren School of Information and Computer Sciences), Electrical Engineering (EE), Engineering (a general program, GE), Environmental Engineering (EnE), Materials Science Engineering (MSE), and Mechanical Engineering (ME). The undergraduate majors in Aerospace, Biomedical, Chemical, Civil, Computer, Computer Science and Engineering, Electrical, Environmental, Materials Science, and Mechanical Engineering are accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>; Computer Science and Engineering (CSE) is also accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>. The undergraduate major in Biomedical Engineering: Premedical (BMEP) is not designed to be accredited, therefore is not accredited by ABET.

Aerospace Engineering considers the flight characteristics, performance, and design of aircraft and spacecraft. An upper-division series of courses in aerodynamics, propulsion, structures, and control follows a common core with Mechanical Engineering. The skills acquired in those courses are integrated in the capstone aerospace design course. The intent of the program is to produce highly proficient engineers who can tackle the aerospace engineering challenges of the future.

Biomedical Engineering applies engineering principles to solve complex medical problems and focuses at improving the quality of health care by advancing technology and reducing costs. Examples include advanced biomedical imaging systems, the design of microscale diagnostic systems, drug delivery systems, and tissue engineering. Specializations are available that focus student's technical expertise on biophotonics or biomems.

Biomedical Engineering: Premedical shares introductory engineering courses with Biomedical Engineering, but replaces senior engineering laboratories and design courses with biology and organic chemistry

courses required by medical schools for admission. The intent of the program is to produce students with a basic engineering background who are qualified to enter medical school.

Chemical Engineering applies the knowledge of chemistry, mathematics, physics, biology, and humanities to solve societal problems in areas such as energy, health, the environment, food, textiles, shelter, semiconductors, and homeland security. Employment opportunities exist in various industries such as chemical, petroleum, polymer, pharmaceutical, food, textile, fuel, consumer products, and semiconductor, as well as in local, state, and federal governments.

Civil Engineering addresses the challenges of large-scale engineering projects of importance to society as a whole, such as water distribution, transportation, and building design. Specializations are provided in General Civil Engineering, Environmental Hydrology and Water Resources, Structural Engineering, and Transportation Systems Engineering. Alternatively, students can select a concentration in Computer Applications, Engineering Management, Infrastructure Planning, or Mathematical Methods.

Computer Engineering addresses the design and analysis of digital computers, including both software and hardware. Computer design includes topics such as computer architecture, VLSI circuits, data base, software engineering, design automation, system software, and data structures and algorithms. Courses include programming in high-level languages such as Python, Java, C, C++; use of software packages for analysis and design; design of system software such as operating systems and hardware/software interfaces; application of computers in solving engineering problems, and laboratories in both hardware and software experiences.

Computer Science and Engineering is designed to provide students with the fundamentals of computer science, both hardware and software, and the application of engineering concepts, techniques, and methods to both computer systems engineering and software system design. The program gives students access to multidisciplinary problems in engineering with a focus on total systems engineering. Students learn the computer science principles that are critical to development of software, hardware, and networking of computer systems. From that background, engineering concepts and methods are added to give students exposure to circuit design, network design, and digital signal processing. Elements of engineering practice include systems view, manufacturing and economic issues, and multidisciplinary engineering applications. The program is administered jointly by the Department of Electrical Engineering and Computer Science in The Henry Samueli School of Engineering and by the Department of Computer Science in the Donald Bren School of Information and Computer Sciences.

Electrical Engineering is one of the major contributors to the modernization of our society. Many of the most basic and pervasive products and services are either based on or related to the scientific and engineering principles taught at the Department of Electrical Engineering and Computer Science. Students specialize in Electronic Circuit Design; Semiconductors and Optoelectronics; RF, Antennas and Microwaves; Digital Signal Processing; or Communications.

The major in **Engineering** is a special program of study for upper-division students who wish to combine the study of engineering principles with other areas such as the physical and biological sciences, social and behavioral science, humanities, and arts. Students may construct their own specialization. Click on the "Undergraduate Study" tab above for information about this major.

Environmental Engineering concerns the development of strategies to control and minimize pollutant emissions, to treat waste, and to remediate polluted natural systems. Emphasis areas include air quality and combustion, water quality, and water resources engineering.

Materials Science Engineering is concerned with the generation and application of knowledge relating the composition, structure, and synthesis of materials to their properties and applications. During the past two decades, Materials Science Engineering has become an indispensable component of modern engineering education, partly because of the crucial role materials play in national defense, the quality of life, and the economic security and competitiveness of the nation; and partly because the selection of materials has increasingly become an integral part of almost every modern engineering design. Emphasis in the Materials Science Engineering curriculum is placed on the synthesis, characterization, and properties of advanced functional materials; analysis, selection, and design related to the use of materials; the application of computers to materials problems; and the presence of an interdisciplinary theme that allows a qualified student to combine any engineering major with the Materials Science Engineering major.

Mechanical Engineering considers the design, control, and motive power of fluid, thermal, and mechanical systems ranging from microelectronics to spacecraft to the human body. Specializations allow students to focus their technical electives in the areas of Aerospace Engineering, Energy Systems and Environmental Engineering, Flow Physics and Propulsion Systems, and Design of Mechanical Systems.

The School offers M.S. and Ph.D. degrees in Biomedical Engineering; Chemical and Biochemical Engineering; Civil Engineering; Electrical and Computer Engineering, with concentrations in Computer Engineering and Electrical Engineering; Engineering, with concentrations in Environmental Engineering, and Materials and Manufacturing Technology; Materials Science and Engineering; and Mechanical and Aerospace Engineering. Specialized research opportunities are available within each of these programs. Bioreaction and bioreactor engineering, recombinant cell technology, and bioseparation processes are research areas in Biochemical Engineering. In Civil Engineering, research opportunities are provided in structural/earthquake engineering, reliability engineering, transportation systems engineering, environmental engineering, and water resources. Research opportunities in Electrical and Computer Engineering are available in the areas of parallel and distributed computer systems, VLSI design, computer architecture, image and signal processing, communications, control systems, and optical and solid-state devices. Research in combustion and propulsion sciences, laser diagnostics, supersonic flow, direct numerical simulation, computer-aided design, robotics, control theory, parameter identification, material processing, electron microscopy, and ceramic engineering are all available in Mechanical and Aerospace Engineering. The School also offers the M.S. degree in Engineering Management, a joint degree program with the Paul Merage School of Business; and the M.S. degree in Biotechnology Management, a joint degree program with the School of Biological Sciences and The Paul Merage School of Business.

Additional publications describing undergraduate and graduate academic study and research opportunities are available through The Henry Samueli School of Engineering, and the Departments of Biomedical Engineering, Chemical Engineering and Materials Science, Civil and Environmental Engineering, Electrical Engineering and Computer Science, and Mechanical and Aerospace Engineering.

Degrees

Aerospace Engineering	B.S.
Biomedical Engineering	B.S., M.S., Ph.D.
Biomedical Engineering: Premedical	B.S.
Biotechnology Management ¹	M.S.
Chemical and Biochemical Engineering	M.S., Ph.D.
Chemical Engineering	B.S.
Civil Engineering	B.S., M.S., Ph.D.
Computer Science and Engineering ²	B.S.
Computer Engineering	B.S.
Electrical and Computer Engineering	M.S., Ph.D.
Electrical Engineering	B.S.
Engineering	B.S., M.S., Ph.D.
Engineering Management ³	M.S.
Environmental Engineering	B.S.
Materials Science and Engineering	M.S., Ph.D.
Materials Science Engineering	B.S.
Mechanical and Aerospace Engineering	M.S., Ph.D.
Mechanical Engineering	B.S.
Networked Systems ²	M.S., Ph.D.

¹ Offered jointly with the School of Biological Sciences and The Paul Merage School of Business. See the School of Biological Sciences section of the *Catalogue* for information.

² Offered jointly with the Donald Bren School of Information and Computer Sciences. See the Interdisciplinary Studies section of the *Catalogue* for information.

³ Offered jointly with The Paul Merage School of Business.

Undergraduate Study

Student Affairs Office

305 Rockwell Engineering Center; (949) 824-4334

John LaRue, **Associate Dean**

- Admissions
- School Requirements
- General Undergraduate Major in Engineering

Planning a Program of Study

Advising

Academic advising is available from academic counselors and peer advisors in the School's Student Affairs Office, 305 Rockwell Engineering Center, and from faculty advisors. *Students must realize, however, that ultimately they alone are responsible for the planning of their own program and for satisfactory completion of the graduation requirements.* Students are encouraged to consult with the academic counselors in the Engineering Student Affairs Office whenever they desire to change their program of study. All Engineering majors are required to meet with their faculty advisor at least once each year.

Some engineering students will need *more than four years* to obtain their B.S. degree, particularly if part-time employment or extracurricular

activities make heavy demands on their time. Normally, such students can stay on track, and are encouraged to do so, by enrolling in summer sessions at UCI or at other institutions when a petition has been approved in advance.

High-achieving students may declare a second major. Early consultation with the School is advisable.

Required courses may be replaced by other courses of equivalent content if the student substantiates the merits of the courses in the program of study and obtains prior approval from faculty in the School.

Students should be aware that most Engineering courses require the completion of prerequisites. The sample programs shown in each departmental description constitute preferred sequences which take into account all prerequisites.

School policy does not permit the deletion of Engineering courses after the second week or addition of Engineering courses after the third week of the quarter without the Associate Dean's approval.

Undergraduate students who have high academic standing, who have completed the necessary prerequisites, and who have obtained permission from the School may qualify to take certain graduate-level courses.

Students are required to complete UCI's lower-division writing requirement (see the Requirements for a Bachelor's Degree section) during the first two years. Thereafter, proficiency in writing and computing (using a higher-level language such as Python, C, C++, Java, or MATLAB) is expected in all Engineering courses.

Students can take the following courses on a Pass/Not Pass basis: (a) courses not used to fulfill the major requirements, and (b) general education courses. Students must take courses to fulfill the UC Entry Level Writing requirement for a grade.

Admissions

The sequential nature of the Engineering program and the fact that many courses are offered only once a year make it beneficial for students to begin their studies in the fall quarter. Applicants wishing to be admitted for the fall quarter, 2014, must have submitted their completed application forms during the priority filing period (November 1–30, 2013).

High school students wishing to enter the UCI Engineering program must have completed four years of mathematics through pre-calculus or math analysis and are advised to have completed one year each of physics and chemistry. That preparation, along with honors courses and advanced placement courses, is fundamental to success in the Engineering program and is vital to receiving first consideration for admittance to an Engineering major during periods of restricted enrollments. Students applying for admission for fall quarter should complete their examination requirements during May or June of their junior year or during their senior year, but no later than the December test date. (Typically, this means that students will take the SAT Reasoning Test or the ACT Assessment With Writing test in October or November, are strongly encouraged to take the Math Level 2 SAT Subject Exam in November or December.) Applicants must apply for admission to a specific Engineering major or Engineering Undeclared.

If enrollment limitations make it necessary, unaccommodated Engineering applicants may be offered alternative majors at UCI.

Transfer students may be admitted to The Henry Samueli School of Engineering either from another major at UCI or from another college or university. A student seeking admission to The Henry Samueli School of Engineering from colleges and schools other than UCI must satisfy University requirements for admission with advanced standing and should complete appropriate prerequisites for their major of choice. It is to the student's advantage to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UCI general education and lower-division requirements prior to transfer. Since requirements vary from major to major, those contemplating admission with advanced standing to the School should consult each Department's *Catalogue* section and the UCI Office of Admissions and Relations with Schools, (949) 824-6703, for the specific requirements of each program. All transfer students should arrange for early consultation with The Henry Samueli School of Engineering Student Affairs Office at (949) 824-4334.

Change of Major. Students who wish to change their major to one offered by the School should contact the Engineering Student Affairs Office for information about change-of-major requirements, procedures, and policies. Information is also available at <http://www.changeofmajor.uci.edu>.

Proficiency Examinations

A student may take a course by examination with the approval of the faculty member in charge of the course and the Dean of the School. Normally, ability will be demonstrated by a written or oral examination; if a portion of the capability involves laboratory exercises, the student may be required to perform experiments as well. The proficiency examination is not available for any course a student has completed at UCI.

Concentration: Engineering and Computer Science in the Global Context

The globalization of the marketplace for information technology services and products makes it likely that The Henry Samueli School of Engineering graduates will work in multicultural settings or be employed by companies with extensive international operations, or customer bases. The goal of the concentration is to help students develop and integrate knowledge of the history, language, and culture of a country or geographic region outside the United States, through course work both at UCI and an international host campus, followed by a technology-related internship in the host country.

All of The Henry Samueli School of Engineering majors in good standing may propose an academic plan that demonstrates the ability to complete the concentration (a minimum of eight courses) and other requirements for graduation in a reasonable time frame. It is expected that a student's proposal will reflect a high degree of planning that includes the guidance of academic counselors and those at the UCI Study Abroad Center regarding course selection, as well as considerations related to internship opportunities, housing, and financial aid. Each student's proposed program of study must be approved by the Associate Dean for Student Affairs in The Henry Samueli School of Engineering. The Associate Dean will be available to assist qualified students with the development of a satisfactory academic plan, as needed.

The concentration consists of the following components:

1. A minimum of eight courses at UCI or at the international campus with an emphasis on the culture, language (if applicable and necessary), history, literature of the country that corresponds to the international portion of the program, international law, international labor policy, global issues, global institutions, global conflict and negotiation, and global economics;

2. A one- or two-semester sequence of technical courses related to the major and, possibly, culture, history, and literature courses taken at an international university;
3. A two-month or longer technical internship experience in the same country as the international educational experience.

More information about the requirements for the concentration is available in The Henry Samueli School of Engineering Student Affairs Office.

The concentration in Engineering and Computer Science in the Global Context is open to students in Aerospace Engineering, Biomedical Engineering, Biomedical Engineering: Premedical, Chemical Engineering, Civil Engineering, Computer Engineering, Engineering (General), Electrical Engineering, Environmental Engineering, Materials Science Engineering, and Mechanical Engineering.

Requirements for the Bachelor's Degree

All students in The Henry Samueli School of Engineering must fulfill the following requirements.

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements:

The following are minimum subject-matter requirements for graduation:

Mathematics and Basic Science Courses: Students must complete a minimum of 48 units of college-level mathematics and basic sciences.

Engineering Topics Courses: Students must complete a minimum of 72 units of engineering topics. *Engineering topics* are defined as courses with applied content relevant to the field of engineering.

Design Units: All undergraduate Engineering courses indicate both a total and a design unit value. Design unit values are listed at the end of the course description. Each student is responsible for the inclusion of courses whose design units total that required by the program of study.

The Academic Plan and Advising Requirements to remain affiliated with The Henry Samueli School of Engineering: All students enrolled in The Henry Samueli School of Engineering are required to meet annually with their designated faculty advisor and to have an academic plan on file with the Student Affairs Office which has been approved by their academic counselor. Students who do not have a plan on file, or deviate from this plan without approval from an academic counselor will be subject to probation. Students on probation for two consecutive quarters who do not have a plan on file, or deviate from this plan without approval from an academic counselor will be subject to disqualification. Students who fail to meet with a faculty advisor each year will be subject to disqualification.

Duplication of Subject Material: Students who take courses which involve considerable duplication of subject material may not receive full graduation credit for all units thus completed.

Residence Requirement: In addition to the University residence requirement, at least 36 upper-division engineering units specified by each major must be completed successfully at the University of California.

Variations: Variations from the general School degree requirements may be made subject to the approval of the faculty of the School. Students wishing to obtain variances should submit petitions to the School's Student Affairs Office.

Engineering Gateway Freshman-Year Curriculum

Students who know that they want to major in engineering but who are unsure of the specific major should apply for the Engineering Gateway Curriculum and follow the Sample Engineering Gateway Curriculum. Students following the Engineering Gateway Curriculum are required to meet with an academic advisor every quarter and are strongly encouraged to declare a major as soon as possible and then follow the appropriate sample program of study for that major.

Sample Engineering Gateway Curriculum - Freshman ¹

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
CHEM 1A	CHEM 1B	CHEM 1C
ENGR 1	PHYSICS 7C	CHEM 1LC
Select one of the following:	PHYSICS 7LC	PHYSICS 7D
ENGRMAE 10	General Education	PHYSICS 7LD
EECS 12		General Education
EECS 10		
CSE 41 ²		

- ¹ Students who choose to major in Biomedical Engineering or Biomedical Engineering: Premedical should enroll in BME 1 in the fall quarter of the sophomore year. Students who choose to major in Computer Engineering should enroll in EECS 20 by the spring or summer quarter preceding their sophomore year.
- ² Students who are considering the Computer Science and Engineering major should enroll in CSE 41.

Students who choose certain majors during the first year may replace Chemistry courses with required major courses.

Students should choose a major by the end of the spring quarter of their freshman year or earlier. Some modification in the program of study might be appropriate if the student chooses a major before the end of the freshman year. In any case, when the major is chosen, the student must meet immediately with an academic counselor to plan the program of study.

Undergraduate Programs

Specific information about courses fulfilling School and major requirements can be found in the department sections. Note that some majors require more units than the School requirements.

Minors of Interest to Engineers

Minor in Earth and Atmospheric Sciences

The minor in Earth and Atmospheric Sciences focuses on the application of physical, chemical, and biological principles to understanding the complex interactions of the atmosphere, ocean, and land through climate and biogeochemical cycles. See the Department of Earth System Science (p. 746) in the School of Physical Sciences section of this *Catalogue* for more information.

Minor in Global Sustainability

The interdisciplinary minor in Global Sustainability trains students to understand the changes that need to be made in order for the human population to live in a sustainable relationship with the resources available on this planet. See the Interdisciplinary Studies (p. 632) section of this *Catalogue* for more information.

Career Advising

The UCI Career Center provides services to students and alumni including career counseling, information about job opportunities, a career library, and workshops on resume preparation, job search, and interview techniques. See the Career Center section for additional information. In addition, special career planning events are held throughout the year including an annual Career Fair. Individual career counseling is available, and students have access to the Career Library which contains information on graduate and professional schools in engineering, as well as general career information.

Honors

Graduation with Honors. Undergraduate honors at graduation in The Henry Samueli School of Engineering are computed by using 50 percent of the overall UCI GPA and 50 percent of the upper-division Engineering GPA. (Engineering E190 is not used in the calculation of the upper-division GPA.) A general criterion is that students must have completed at least 72 units in residence at a University of California campus. Approximately 1 percent of the graduating class shall be awarded *summa cum laude*, 3 percent *magna cum laude*, and 8 percent *cum laude*, with no more than 12 percent being awarded honors. Other important factors are considered (see Honors Recognition (p. 58)).

Dean's Honor List. The quarterly Dean's Honor List is composed of students who have received a 3.5 GPA while carrying a minimum of 12 graded units.

Gregory Bogaczyk Memorial Scholarship. This scholarship was established in memory of Gregory Bogaczyk, a former UCI Mechanical Engineering student, and is contributed by the Bogaczyk family and friends. An award is given each year to a junior or senior Mechanical Engineering student.

Haggai Memorial Endowed Scholarship. This memorial fund was established in honor of Ted Haggai, an electrical engineer. This scholarship is awarded to an outstanding senior electrical engineering student and member of Tau Beta Pi. Primary consideration will be given to members of Tau Beta Pi who have contributed outstanding service to both UCI and The Henry Samueli School of Engineering.

Christine Jones Memorial Scholarship. This scholarship was established in memory of Christine Jones, an Electrical Engineering graduate, Class of 1989. The primary focus of this scholarship is to

provide financial support to a female undergraduate student in The Henry Samueli School of Engineering.

Deborah and Peter Pardo Memorial Scholarship. This scholarship is awarded each year to a graduating senior in Mechanical Engineering or in Aerospace Engineering. The scholarship is based on outstanding service to The Henry Samueli School of Engineering and the community.

Henry Samueli Endowed Scholarship. This premier scholarship, established by Henry Samueli, is awarded to outstanding freshmen and transfer students in The Henry Samueli School of Engineering. Recipients are chosen by the School based on their academic excellence. The award is renewable up to four years for freshmen and up to two years for transfer students.

Additional awards in other categories are made throughout the academic year.

Center for Opportunities and Diversity in Engineering

305 Rockwell Engineering Center; (949) 824-4334
Robin Jeffers, **Director**

The Center for Opportunities and Diversity in Engineering (CODE) houses a comprehensive recruitment, retention, and placement program in The Henry Samueli School of Engineering which attempts to provide academic support and professional development to students from backgrounds which have traditionally had limited access to the engineering profession. Services provided include advisement, tutoring, study rooms, notification of research opportunities, fellowships, guest speakers, and employment opportunities. At the core of its activity is the focus on community building, and students are encouraged to bond around their common interests and goals.

Special Programs and Courses

Campuswide Honors Program

The Campuswide Honors Program is available to selected high-achieving students from all academic majors from their freshman through senior years. For more information contact the Campuswide Honors Program, 1200 Student Services II; (949) 824-5461; honors@uci.edu; <http://www.honors.uci.edu/>.

Engineering 199

Every undergraduate student in The Henry Samueli School of Engineering has the opportunity to pursue independent research under the direct supervision of a professor in the School. Interested students should consult with a faculty member to discuss the proposed research project. If the project is agreed upon, the student must fill out a 199 Proposal Form and submit it to the Engineering Student Affairs Office.

Undergraduate Research Opportunities Program

The Undergraduate Research Opportunities Program (UROP) encourages and facilitates research and creative activities by undergraduates. Research opportunities are available not only from every discipline, interdisciplinary program, and school, but also from many outside agencies, including national laboratories, industrial partners, and other universities. UROP offers assistance to students and faculty through all phases of the research activity: proposal writing, developing research plans, resource support, conducting the research and analyzing data, and

presenting results of the research at the annual spring UCI Undergraduate Research Symposium. Calls for proposals are issued in the fall and spring quarters. Projects supported by UROP may be done at any time during the academic year and/or summer, and the research performed must meet established academic standards and emphasize interaction between the student and the faculty supervisor. In addition, all students participating in faculty-guided research activities are welcome to submit their research papers for faculty review and possible publication in the annual *UCI Undergraduate Research Journal*. For more information, contact the UROP Office, 1100 Student Services II; (949) 824-4189; urop@uci.edu; <http://www.urop.uci.edu/>.

Accelerated M.S. or Ph.D. Status Program in The Henry Samueli School of Engineering

Exceptionally promising UCI undergraduate Engineering students may, during their junior or senior year, petition for streamlined admissions into a graduate program within The Henry Samueli School of Engineering. Accelerated M.S. Status would allow a student to petition for exemption from UCI's Graduate Record Examination (GRE) requirement for graduate school admission. (The exemption applies only to current UCI students applying for admission to one of the M.S. programs in The Henry Samueli School of Engineering; other graduate schools may still require the GRE.) A current UCI undergraduate student whose ultimate goal is a Ph.D. may apply for Accelerated Status, however, a GRE score must be submitted.

Accelerated Status applicants would in all other ways be evaluated in the same manner as other applicants to the School's graduate programs. Occasionally, a candidate for Accelerated Status may be required by the faculty to submit GRE scores in support of the graduate application.

Students who successfully petition for Accelerated Status, upon matriculation to the graduate degree program, may petition to credit toward the M.S. degree up to 18 units (with a grade of B or better) of graduate-level course work completed in excess of requirements for the UCI bachelor's degree.

Please see <http://www.eng.uci.edu/grad/services/accelerated> for more detailed information about this program and its eligibility requirements.

UC Education Abroad Program

Upper-division and graduate Engineering students may participate in a number of programs which offer unique opportunities for education and training abroad. The University's Education Abroad Program (UCEAP) offers engineering course work for UCI academic credit at a number of universities. Some of the UCEAP-affiliated engineering schools require proficiency in the host country's language, while others are English speaking. Study abroad may postpone the student's graduation for one or two quarters, depending primarily on the student's language preparation (which can begin in the freshman year), but the added experience can add to the student's maturity and professional competence. UCEAP students pay regular UCI fees and tuition and keep any scholarships they may have. See <http://www.studyabroad.uci.edu> for additional information.

Student Participation and Organizations

Faculty and committee meetings (except those involving personnel considerations) are open meetings; in addition to designated student representatives, all students are encouraged and expected to participate in the development of School policy. Student evaluation of the quality of instruction for each course is requested each quarter.

Engineering students may join any of a number of student organizations. Most of these organizations are professionally oriented and in many instances are local chapters of national engineering societies. A primary function of these groups is to provide regular technical and social meetings for students with common interests. Most of the groups also participate in the annual Engineering Week activities and in other School functions.

Associated General Contractors (AGC). A student chapter of the national organization, AGC at UCI is an academic engineering club for students interested in the construction field.

American Indian Science & Engineering Society (AISES). The mission of AISES is to increase the representation of American Indians in engineering, science, and technology. Chapters emphasize education as a tool that will facilitate personal and professional growth opportunities through mentor programs, leadership training, scholarships, conferences, and summer job opportunities.

American Institute of Aeronautics and Astronautics (AIAA). The AIAA is a technical society of 40,000 professional and student members devoted to science and engineering in the field of aerospace. The local chapter's primary activities include seminars, tours of industries, and mentoring for students by professional members.

American Institute of Chemical Engineers (AIChE). AIChE, a student chapter of the national organization, provides Chemical Engineering majors with the opportunity to interact with faculty and professionals in the field.

American Society for Civil Engineers (ASCE). One of the larger engineering clubs, ASCE at UCI is a student chapter of the national organization. The ASCE focuses its efforts on interactions with professional engineers, sponsorship of Engineering Week activities, and participation in the annual ASCE Southwest Conference.

American Society for Materials (ASM). The student chapter of ASM at UCI provides the opportunity for Materials Science Engineering (MSE) students to meet engineers and scientists from local industry, attend seminars organized by the Orange Coast Chapter of ASM International, and organize discussion sessions that focus on progress and advances in the MSE field and that promote interactions between MSE students and materials faculty.

American Society of Mechanical Engineers (ASME). The student chapter of ASME at UCI provides the opportunity for Mechanical Engineering majors to meet with professors, organize social events, and participate in events and competitions supported by the ASME national organization.

Biomedical Engineering Society. The student chapter of BMES at UCI is an academic club for students in the field of Biomedical Engineering.

Chi Epsilon. This organization is a national engineering honor society which is dedicated to the purpose of promoting and maintaining the status of civil engineering as an ideal profession. Chi Epsilon was organized to recognize the characteristics of the individual that are fundamental to the successful pursuit of an engineering career.

Electric Vehicle Association/UCI (EVA/UCI). EVA/UCI gives students an opportunity for hands-on work on electric car conversions coupled with design experience.

Engineering Student Council (ESC). The ESC is the umbrella organization that provides a voice for all Engineering student chapters. A

significant activity of the Council is organizing UCI's annual Engineering Week celebration.

Engineers Without Borders (EWB). This humanitarian organization combines travel with the idea that engineers can play an instrumental role in addressing the world's assorted challenges. Through the implementation of equitable, economical, and sustainable engineering projects, EWB-UCI works to improve quality of life within developing communities abroad.

Eta Kappa Nu. A student chapter of the National Electrical Engineering Honor Society, Eta Kappa Nu's purpose is to promote creative interaction between electrical engineers and give them the opportunity to express themselves uniquely and innovatively to project the profession in the best possible manner.

Filipinos Unifying Student-Engineers in an Organized Network (FUSION). Fusion is the merging of diverse, distinct, or separate elements into a unified whole. The mission of FUSION is to promote the academic and professional development of student engineers by providing an organized network of support.

Institute of Electrical and Electronic Engineers (IEEE). A student chapter of a multinational organization, IEEE at UCI encompasses academic, professional, and social activities.

Institute of Transportation Engineers (ITE). ITE is a student chapter of a national group of transportation engineering professionals. Offering opportunities to meet both professionals and other students, ITE focuses its activities on an annual project with practical applications.

Mexican-American Engineers and Scientists (MAES). Open to all students, MAES is a student and professional organization with the purpose of aiding students in their academic, professional, and social endeavors.

National Society of Black Engineers (NSBE). The NSBE, with almost 6,000 members, is one of the largest student-managed organizations in the country. The Society is dedicated to the realization of a better tomorrow through the development of intensive programs to increase the recruitment, retention, and successful graduation of underrepresented students in engineering and other technical majors.

Omega Chi Epsilon. The student chapter of the National Chemical Engineering Honor Society aims to recognize and promote high scholarship, original investigation, and professional service in chemical engineering.

Phi Sigma Rho. This national sorority is open to women who are in engineering and engineering technology majors. Its purpose is to provide social opportunities, promote academic excellence, and provide encouragement and friendship.

Pi Tau Sigma. The mechanical engineering honor society, Pi Tau Sigma, is committed to recognizing those of high achievement. The goal of the organization is to promote excellence in academic, professional, and social activities.

Sigma Gamma Tau. The aerospace engineering honor society, Sigma Gamma Tau, is committed to recognizing those of high achievement. The goal of the organization is to promote excellence in academic, professional, and social activities.

Society of Hispanic Professional Engineers (SHPE). SHPE is both a student and professional organization. The UCI SHPE chapter

works to recruit, retain, and graduate Latino engineers by providing a comprehensive program which includes high school visitations, coordinated study sessions, and industry speakers and tours. At the professional level there are opportunities for career positions and scholarships for members who are enrolled in undergraduate and graduate engineering and computer science programs.

Society of Automotive Engineers (SAE). Members of the SAE chapter at UCI participate in technical expositions, mini-Baja buggy races, student competitions, and social activities.

Society of Women Engineers (SWE). SWE is a national service organization dedicated to the advancement of women in engineering. UCI's student chapter encourages academic and social support, and membership is open to both men and women in technical majors interested in promoting camaraderie and in helping to make engineering study a positive experience.

Structural Engineers Association of Southern California (SEAOSC). The UCI student chapter of SEAOSC introduces students to the field of structural engineering through tours, speakers, and SEAOSC dinners with professional members of the organization.

Sustainable Energy Technology Club (SETC). With the common theme of energy, club members explore how science and technology can be used as a driving force behind making changes in society with respect to a cleaner environment and less wasteful lifestyles.

Tau Beta Pi. The national Engineering honor society, Tau Beta Pi acknowledges academic excellence in the wide variety of engineering disciplines. Tau Beta Pi at UCI sponsors community service activities, social events, and technical and nontechnical seminars.

Triangle. The national social fraternity is open to engineers, architects, and scientists

Schoolwide Program

Faculty in the Departments of Biomedical Engineering, Chemical Engineering and Materials Science, Civil and Environmental Engineering, Electrical Engineering and Computer Science, and Mechanical and Aerospace Engineering also teach courses in the major in Engineering program.

Descriptions and requirements for the undergraduate majors in Aerospace Engineering (AE), Biomedical Engineering (BME), Biomedical Engineering: Premedical (BMEP), Chemical Engineering (ChE), Civil Engineering (CE), Computer Engineering (CpE), Computer Science and Engineering (CSE), Electrical Engineering (EE), Engineering (a general program, GE), Environmental Engineering (EnE), Materials Science Engineering (MSE), and Mechanical Engineering (ME) may be found in subsequent sections.

General Undergraduate Major in Engineering

305 Rockwell Engineering Center; (949) 824-4334

The Henry Samueli School of Engineering offers a general undergraduate major in Engineering to upper-division students who wish to pursue broad multidisciplinary programs of study or who wish to focus on a special area not offered in the four departments. Examples of other areas that may be of interest are biochemical engineering, electromechanical engineering, project management, or hydrology. The program of study in any area,

aside from the established specializations, is determined in consultation with a faculty advisor.

Admissions

The general major in Engineering is only open to junior-standing students who have completed the required lower-division courses with a high level of achievement. Freshmen are not eligible to apply for this major. The sequential nature of the Engineering program and the fact that many courses are offered only once a year make it beneficial for students to begin their studies in the fall quarter.

Transfer students. The general Engineering major is a specialized program for students who are seeking careers in areas other than traditional engineering disciplines and is open to upper-division students only. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one course in computational methods (e.g., C, C++), and one year of general chemistry (with laboratory).

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Engineering

Credit for at least 180 units, and no more than 196 units. All courses must be approved by a faculty advisor and the Associate Dean of Student Affairs prior to enrollment in the program.

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements.

Major Requirements

Mathematics and Basic Science Courses: MATH 2A-MATH 2B-MATH 2D, MATH 3A, and MATH 3D. PHYSICS 7C, PHYSICS 7LC. With the approval of a faculty advisor and the Associate Dean, students select all additional Mathematics and Basic Science courses.

Engineering Topics Courses: EECS 10. With the approval of a faculty advisor and the Associate Dean, students select all additional Engineering Topics courses.

Design unit values are indicated at the end of each course description. The faculty advisors and the Student Affairs Office can provide necessary guidance for satisfying the design requirements.

Program of Study

Students should keep in mind that the program for the major in Engineering is based upon a rigid set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Therefore, the course sequence should not be changed except for the most compelling reasons. Students must have their programs approved by an academic counselor in Engineering. A sample program of study is available in the Student Affairs Office.

Graduate Study

Graduate Student Affairs Office
305 Rockwell Engineering Center; (949) 824-4334
John LaRue, **Associate Dean**

Admissions

For information on requirements for admission to graduate study at UCI, contact the appropriate Engineering department, concentration director, or the Graduate Student Affairs Office in The Henry Samueli School of Engineering. Additional information is available in the *Catalogue's* Graduate Division (p. 106) section. Admission to graduate standing in The Henry Samueli School of Engineering is generally accorded to those possessing a B.S. degree in engineering or an allied field obtained with an acceptable level of scholarship from an institution of recognized standing. Those seeking admission without the prerequisite scholarship record may, in some cases, undertake remedial work; if completed at the stipulated academic level, they will be considered for admission. Those admitted from an allied field may be required to take supplementary upper-division courses in basic engineering subjects. The Graduate Record Examination (GRE) General Test is required of all applicants.

Financial Support

Teaching assistantships and fellowships are available to qualified applicants. (Applicants should contact the Department or concentration director to which they are applying for information.) Research assistantships are available through individual faculty members. Although not required, it is beneficial for applicants to contact the faculty member directly to establish the potential for research support. Early applications have a stronger chance for financial support.

Part-Time Study

Those students who are employed may pursue the M.S. degree on a part-time basis, carrying fewer units per quarter. Since University residency requirements necessitate the successful completion of a minimum number of units in graduate or upper-division work in each of at least three regular University quarters, part-time students should seek the advice of a counselor in The Henry Samueli School of Engineering Graduate Student Affairs Office and the approval of the Graduate Advisor in their program. M.S. programs must be completed in four calendar years from the date of admission. Students taking courses in University Extension prior to enrollment in a graduate program should consult the following section on Transfer of Courses.

Transfer and Substitution of Courses

Upon petition, a limited number of *upper-division undergraduate or graduate-level courses* taken through University Extension, at another UC campus, or in another accredited university may be credited toward the M.S. degree after admission. The applicability of transfer or substitution courses must be approved by the student's department, the School's Associate Dean, and the Graduate Dean of the University, in accordance with Academic Senate regulations. Also in accordance with UC Academic Senate policy, transfer credit for the M.S. degree cannot be used to reduce the minimum requirement in strictly graduate (200 series) courses.

Graduate Specialization in Teaching

The graduate specialization in Teaching will allow Engineering Ph.D. students to receive practical training in pedagogy designed to enhance their knowledge and skill set for future teaching careers. Students will gain knowledge and background in college-level teaching and learning from a variety of sources, and experience in instructional practices.

Students completing the specialization in Teaching must fulfill all of their Ph.D. requirements in addition to the specialization requirements. Upon fulfillment of the requirements, students will be provided with a certificate of completion. Upon receipt of the certificate of completion, the students can then append "Specialization in Teaching" to their curricula vitae. For details see <http://www.eng.uci.edu/grad/services/specialization>.

The graduate specialization in Teaching is available only for certain degree programs and concentrations:

- Ph.D. degree in Biomedical Engineering
- Ph.D. degree in Electrical and Computer Engineering
- Ph.D. degree in Engineering with a concentration in Materials and Manufacturing Technology

Chin C. Lee, **Director and Graduate Advisor**

Faculty

Mark Bachman: Integrated microsystems, microfabrication technology, biomedical microdevices, sensor systems, human sensing, human-machine interface

Ozdal Boyraz: Silicon photonics, nonlinear optics in silicon, cascaded cavity silicon Raman lasers

Peter J. Burke: Nano-electronics, bio-nanotechnology

Zhongping Chen: Optical sensor and imaging, MEMS and biophotonic system, and biomedical devices

James C. Earthman: Fatigue behavior and cyclic damage, automated materials testing and diagnostics, high-temperature fracture, biomaterials, green materials

Franco De Flaviis: Microwave materials and devices, MEMS devices and fabrication processes

John C. LaRue: Fluid mechanics, micro-electrical-mechanical systems (MEMS), turbulence, heat transfer, instrumentation

Abraham Lee: Micro and nanofluidic chips, droplet-based reactors for bioassays and materials synthesis, cell and biomolecular based sensors, nanoparticles and vesicles for drug delivery and targeted therapeutics

Chin C. Lee: Bonding technology, electronic packaging, acoustics, microwaves, semiconductor devices, thermal management

Henry P. Lee: Optoelectronic materials, growth, and devices

Guann-Pyng Li: High-speed semiconductor technology, optoelectronic devices, integrated circuit fabrication and testing

Marc J. Madou: Fundamental aspects of micro/nano-electro-mechanical systems (MEMS/NEMS), biosensors, nanofluidics, biomimetics

J. Michael McCarthy: Machine design and kinematic synthesis of spatial mechanisms and robots

Martha L. McCartney: Grain boundary engineering of ceramics, superplastic ceramics, solid oxide fuel cell materials, ceramics for nuclear waste storage

Farghalli A. Mohamed: Mechanical properties, creep, superplasticity, correlations between property and microstructure

Ayman S. Mosallam: Advanced composites and hybrid systems, seismic repair and rehabilitation of structures, blast mitigation and diagnostic/prognostic techniques for infrastructure security

Daniel R. Mumm: Enabling materials for energy systems and propulsion (solid oxide fuel cells, thermal barrier coatings), interface mechanics, materials behavior at high temperature, lightweight/multi-functional structures, nanostructured materials, electron microscopy and microanalysis

Regina Ragan: Self-assembly of hybrid organic/inorganic nanostructures for nanoelectronic and sensing applications; correlating electron transport and optical properties with atomic and molecular structure

Timothy Rupert: Mechanical behavior, nanomaterials, structure-property relationships, microstructural stability, grain boundaries and interfaces, materials characterization

Andrew A. Shapiro-Scharlotta (*Adjunct*): Electronic properties of materials; electronic packaging materials, processes, and characterization

Andrei M. Shkel: Design and advanced control of micro-electro-mechanical systems (MEMS); precision micro-sensors and actuators for tele-communication and information technologies; MEMS-based health monitoring systems, disposable diagnostics devices, prosthetic implants

Frank G. Shi: Materials, packaging/manufacturing technologies for optoelectronic devices (LEDs, solar cells, sensors, etc.); polymer nanocomposites; die attach adhesives and electrical/thermal conductive pastes; silicone and epoxy encapsulants; luminescent and phosphor materials; optical glass

Lizhi Sun: Micro- and nano-mechanics, composites and nanocomposites, smart materials and structures, multiscale modeling, elastography

Chen S. Tsai: Integrated and fiber optics, devices, and materials, integrated acoustooptics and magnetooptics, integrated microwave magnetics, Ultrasonic Atomization for Nanoparticles Synthesis, silicon photonics

Lorenzo Valdevit: Multifunctional sandwich structures, thermal protection systems, morphing structures, active materials, MEMS, electronic packaging, cell mechanics

Albert Yee: Nanofabrication of soft materials, physics of polymer thin films, nanomechanical properties of polymers, ultra-low-k dielectrics, fracture and toughening of polymer nanocomposites

Materials and Manufacturing Technology (MMT) is concerned with the generation and application of knowledge relating the composition, structure, and processing of materials to their properties and applications, as well as the manufacturing technologies needed for production. During the past two decades, MMT has become an important component of modern engineering education, partly because of the increased level of sophistication required of engineering materials in a rapidly changing technological society, and partly because the selection of materials has increasingly become an integral part of almost every modern engineering design. In fact, further improvements in design are now viewed more and more as primarily materials and manufacturing issues. Both the development of new materials and the understanding of present-day materials demand a thorough knowledge of basic engineering and scientific principles including, for example, crystal structure, mechanics, mechanical behavior, electronic, optical and magnetic properties, thermodynamics, phase equilibria, heat transfer, diffusion, and the physics and chemistry of solids and chemical reactions.

The field of MMT ranks high on the list of top careers for scientists and engineers. The services of these engineers and scientists are required in a variety of engineering operations dealing, for example, with design of semiconductors and optoelectronic devices, development of new technologies based on composites and high-temperature materials, biomedical products, performance (quality, reliability, safety, energy efficiency) in automobile and aircraft components, improvement in nondestructive testing techniques, corrosion behavior in refineries, radiation damage in nuclear power plants, fabrication of steels, and construction of highways and bridges.

Subjects of interest in Materials and Manufacturing Technology cover a wide spectrum, ranging from metals, optical and electronic materials to superconductive materials, ceramics, advanced composites, and biomaterials. In addition, the emerging new research and technological areas in materials are in many cases interdisciplinary. Accordingly, the principal objective of the graduate curriculum is to integrate a student's area of emphasis—whether it be chemical processing and production, electronic and photonic materials and devices, electronic manufacturing and packaging, or materials engineering—into the whole of materials and manufacturing technology. Such integration will increase familiarity with other disciplines and provide students with the breadth they need to face the challenges of current and future technology.

Students with a bachelor's degree may pursue either the M.S. or Ph.D. degree in Engineering with a concentration in Materials and Manufacturing Technology (MMT). If students choose to enter the Ph.D. program directly, it is a requirement that they earn an M.S. degree along the way toward the completion of their Ph.D. degree.

Recommended Background

Given the nature of Materials and Manufacturing Technology as an interdisciplinary program, students having a background and suitable training in either Materials, Engineering (Biomedical, Civil, Chemical, Electrical, and Mechanical), or the Physical Sciences (Physics, Chemistry, Geology) are encouraged to participate. Recommended background courses include an introduction to materials, thermodynamics, mechanical properties, and electrical/optical/magnetic properties. A student with an insufficient background may be required to take remedial undergraduate courses following matriculation as a graduate student.

Core Requirement

Because of the interdepartmental nature of the concentration, it is important to establish a common foundation in Materials and Manufacturing Technology (MMT) for students from various backgrounds. This foundation is sufficiently covered in MMT courses that are listed below and that deal with the following topics: ENGRMSE 200 Crystalline Solids: Structure, Imperfections and Properties; ENGRMAE 252 Fundamentals of Microfabrication or ENGR 265 Advanced Manufacturing; ENGRMAE 259 Mechanical Behavior of Solids - Atomistic Theories; EECS 274 Biomedical Microdevices (MEMOS). Core courses must be completed with a grade of B (3.0) or better.

Electives

Electives are grouped into four areas of emphasis.

Chemical Processing and Production:

CHEM 213	Chemical Kinetics
CBEMS 210	Reaction Engineering
CBEMS 220	Transport Phenomena
CBEMS 230	Applied Engineering Mathematics I
CBEMS 240	Advanced Engineering Thermodynamics

Electronic and Photonic Materials and Devices:

BME 210	Cell and Tissue Engineering
EECS 174	Semiconductor Devices
EECS 188	Optical Electronics
EECS 277A	Advanced Semiconductor Devices I
EECS 277B	Advanced Semiconductor Devices II
EECS 277C	Nanotechnology
EECS 285A	Optical Communications
EECS 285B	Lasers and Photonics
EECS 280A	Advanced Engineering Electromagnetics I
EECS 280B	Advanced Engineering Electromagnetics II

Electronic Manufacturing and Packaging:

EECS 273	Electronics Packaging
EECS 279/ENGRMAE 249	Micro-Sensors and Actuators
EECS 285A	Optical Communications
EECS 285B	Lasers and Photonics
ENGRMAE 253	Advanced BIOMEMS Manufacturing Techniques

Materials Engineering:

CHEM 225	Polymer Chemistry: Synthesis and Characterization of Polymers
----------	---

PHYSICS 238A- 238B- 238C	Condensed Matter Physics and Condensed Matter Physics and Condensed Matter Physics
ENGRMSE 205	Materials Physics
ENGRMSE 251	Dislocation Theory
ENGRMSE 252	Theory of Diffusion
ENGRMSE 254	Polymer Science and Engineering
ENGRMSE 255A	Design with Ceramic Materials
ENGRMSE 256A	Mechanical Behavior of Engineering Materials
ENGRMSE 256B	Fracture of Engineering Materials
ENGRMSE 268	Principles of Coatings, Thin Films and Multi-layers

It should be noted that specific course requirements within the area of emphasis are decided based on consultation with the Director of the MMT concentration.

Master of Science Degree

Two options are available for M.S. degree students: a thesis option and a comprehensive examination option. Both options require the completion of at least 12 courses of study.

Plan I. Thesis Option

For the thesis option, students are required to complete an original research project and write an M.S. thesis. A committee of three full-time faculty members is appointed to guide the development of the thesis. Students must also obtain approval for a complete program of study from the program director. At least seven courses (3-unit or 4-unit) must be taken from courses numbered 200–289, among which at least four courses (3-unit or 4-unit) are from MMT core courses and at least three courses (3-unit or 4-unit) are in the area of emphasis approved by the faculty advisor and the graduate advisor. Four units of CBEMS 296, EECS 296, ENGR 296, ENGRMAE 296, BME 296, or ENGRCEE 296 count as the equivalence of one course. Up to three courses equivalent of CBEMS 296, EECS 296, ENGR 296, ENGRMAE 296, BME 296, or ENGRCEE 296 and up to two courses (3-unit or 4-unit) of upper-division undergraduate elective courses taken as a graduate student at UCI can be applied toward the 12-course requirement.

Plan II. Comprehensive Examination Option

For the comprehensive examination option, students are required to complete minimally 12 courses (3-unit or 4-unit) of study. At least eight courses (3-unit or 4-unit) must be taken from courses numbered 200–289, among which at least four courses (3-unit or 4-unit) are from MMT core courses and at least four courses (3-unit or 4-unit) are in the area of emphasis approved by the faculty advisor and the graduate advisor. Four units of CBEMS 299, EECS 299, ENGRMAE 299, BME 299, or ENGRCEE 299 count as the equivalence of one course. One course equivalent of CBEMS 299, EECS 299, ENGRMAE 299, BME 299, or ENGRCEE 299, and up to two courses (3-unit or 4-unit) of upper-division undergraduate elective courses taken as a graduate student at UCI can be applied toward the 12-course requirement.

In the last quarter, an oral comprehensive examination on the contents of study will be given by a committee of three faculty members including the advisor and two members appointed by the program director. Part-time study for the M.S. degree is available and encouraged for engineers working in local industries. Registration for part-time study must be

approved in advance by the MMT program director, the School's Associate Dean, and the Graduate Dean.

NOTE: Students who entered prior to fall of 2012 should follow the course requirements outlined within the *Catalogue* of the year they entered.

The change in number of units per course is not intended to change the course requirements for the degree nor to have any impact in the number of courses students are taking. As such, students will need to continue to meet the same high standards and plan of study requirements as previously required. Students will work with their advisor to create a plan of study encompassing the equivalent topical requirements, as well as the equivalent number of courses to the previous 36-unit requirement.

In addition to fulfilling the course requirements outlined above, it is a University requirement for the Master of Science degree that students fulfill a minimum of 36 units of study.

Concurrent Study in the Program in Law and Graduate Studies (PLGS)

Students have the option to pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Master's or Ph.D. degree in Engineering with a concentration in Materials and Manufacturing Technology. For students pursuing the M.S. thesis option, 8 units of research can be substituted for law electives, and comprehensive exam students can petition two course (non-course or area of emphasis courses) to be substituted by law electives.

Doctor of Philosophy Degree

The Ph.D. degree in Engineering with a concentration in Materials and Manufacturing Technology requires a commitment on the part of the student to dedicated study and collaboration with the faculty. Ph.D. students are selected on the basis of outstanding demonstrated potential and scholarship. Applicants must hold the appropriate prerequisite degrees from recognized institutions of high standing. Students entering with a master's degree may be required to take additional course work, to be decided in consultation with the graduate advisor and the program director. Students without a master's degree may be admitted into the Ph.D. program. However, these students will be required to complete the degree requirements above for the master's degree prior to working on doctoral studies. After substantial academic preparation, Ph.D. candidates work under the supervision of faculty advisors. The process involves immersion in a research atmosphere and culminates in the production of original research results presented in a dissertation.

Milestones to be passed in the Ph.D. program include the following: acceptance into a research group by the faculty advisor during the student's first year of study, successful completion of the Ph.D. preliminary examination during years one or two, development of a research proposal, passing the qualifying examination during year three (second year for those who entered with a master's degree), and the successful completion and defense of the dissertation during the fourth or fifth year. There is no foreign language requirement.

The degree is granted upon the recommendation of the doctoral committee and the Dean of Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

M.S. in Engineering Management

305 Rockwell Engineering Center; (949) 824-4334
<http://www.eng.uci.edu/grad/programs/em>

John LaRue, **Associate Dean for Student Affairs, The Henry Samueli School of Engineering**

Alladi Venkatesh, **Associate Dean of Master's Programs, The Paul Merage School of Business**

Engineering Management Steering Committee

Imran S. Currim: Marketing research, customer choice, design and marketing of products and services, customer behavior online, and assessing the impact of competitive product and service features and marketing efforts on consumer choice and market share

Payam Heydari: Design and analysis of analog, RF, and mixed-signal integrated circuits; analysis of signal integrity and high-frequency effects of on-chip interconnects in high-speed VLSI circuits

John C. LaRue: Fluid mechanics, micro-electrical-mechanical systems (MEMS), turbulence, heat transfer, instrumentation

Marc J. Madou: Fundamental aspects of micro/nano-electromechanical systems (MEMS/NEMS), biosensors, nanofluidics, biomimetics

Jean-Daniel M. Saphores: Transportation economics, planning and policy, environmental and natural resource economics and policy, quantitative methods

Alladi Venkatesh: Community-based technologies: home informatics and networking; youth and new media; consumers and electronic environments, and cross-cultural research

The Master of Science in Engineering Management is a graduate degree jointly offered by The Paul Merage School of Business and The Henry Samueli School of Engineering that will prepare engineers for leadership roles in technology, science, government, and engineering-based companies and organizations. The curriculum includes courses in engineering from The Henry Samueli School of Engineering and courses in business administration from The Paul Merage School of Business. Students will emerge as innovators by taking on the role of business and engineering project managers tasked with solving complex engineering product development challenges through consulting projects, business plans, and exposure to current issues within the engineering sector. Through this process, quantitative and qualitative skills along with business communication skills will be developed.

This competitive major teaches business from the engineering perspective and engineering from the business perspective, and students will learn to think about their work through the lens of innovation and to develop a crucial view to enhance their careers.

Admissions

Applicants apply directly to The Samueli School for the M.S. in Engineering Management. Applicants must meet any applicable prerequisite requirements for the specific engineering specialization they wish to pursue. Admission to graduate standing in The Samueli School of Engineering is generally accorded to those possessing at least a B.S. degree in engineering or an allied field obtained with an acceptable level of scholarship from an institution of recognized standing. Those seeking admission without the prerequisite scholarship record may, in some cases, undertake remedial work; if completed at the stipulated academic level, they will be considered for admission. Those admitted from an allied field may be required to take supplementary upper-division courses in basic engineering subjects.

The Samueli and Merage Schools will evaluate applicants on their prior academic record and their potential for management and leadership as demonstrated in submitted application materials including work experience and in an interview. These materials will include university transcripts, GRE test scores, resume, letters of recommendation, and a Statement of Purpose. Competitive applicants will be interviewed by the Merage School.

Master of Science Degree: Plan II: Comprehensive Exam Option

The M.S. degree requires the completion of designated course work which corresponds to a minimum of 17 courses beyond the bachelor's degree. As part of the program, students must complete a two-week orientation and an intensive course in early to mid-September preceding the fall quarter which presents fundamental concepts of management to initiate students into the concrete challenges that managers in high-performing organizations typically confront.

Core Requirements

Due to the interdisciplinary nature of this degree, it is important to establish a common foundation in Engineering Management for students from various backgrounds. This foundation is sufficiently covered in Engineering Management courses that are listed below and that deal with the following topics:

MGMTMBA 200	Management of Innovative Organizations
MGMTMBA 211	MBA Proseminar
MGMTMBA 298	Experiential Learning (or equivalent)
ENGR 280	Entrepreneurship for Scientists and Engineers
Plus, a departmental seminar based on specialization area, for example:	
BME 298	Seminars in Biomedical Engineering
CBEMS 298	Seminars in Engineering
ENGRCEE 295	Seminars in Engineering
EECS 294	Electrical Engineering and Computer Science Colloquium
ENGRMAE 298	Seminars in Mechanical and Aerospace Engineering

Electives

Business. In addition to the core courses listed above, at least five additional courses from The Merage School of Business are required. (Students will be recommended certain classes based on career tracks they plan to pursue.)

- Three Merage School M.B.A. core courses;
- Two additional courses from a selected group of either core or elective courses.

M.B.A. Courses

Core:

MGMTMBA 201A	Statistics for Management
MGMTMBA 201B	Management Science
MGMTMBA 202	Organizational Analysis for Management
MGMTMBA 203A	Financial Accounting for Management

MGMTMBA 203B	Managerial Accounting for Management
MGMTMBA 204A	Microeconomics for Management
MGMTMBA 204B	Macroeconomics for Management
MGMTMBA 205	Marketing Management
MGMTMBA 206	Business and Government
MGMTMBA 207	Information Technology for Management
MGMTMBA 208	Operations Management
MGMTMBA 209A	Managerial Finance
MGMTMBA 210	Business Strategy

Electives:

Refer to the Business School section of the Catalogue for a list of current M.B.A. electives.

Engineering. In addition to the core courses listed above, at least five courses from The Samueli School of Engineering are required. (Students will be recommended certain classes based on career tracks they plan to pursue.)

- Three courses from a chosen primary specialization in Engineering: Biomedical Engineering, Chemical and Biochemical Engineering, Civil Engineering, Electrical and Computer Engineering, Materials Science and Engineering, or Mechanical and Aerospace Engineering;
- Two additional elective courses chosen from the primary specialization, from another specialization, or from other courses offered in the M.S. in Engineering Management program that are identified as elective courses.

Approved Specialization Courses**Biomedical Engineering:**

BME 210	Cell and Tissue Engineering
BME 213	Systems Cell and Developmental Biology
BME 220	Quantitative Physiology: Sensory Motor Systems
BME 221	Quantitative Physiology: Organ Transport Systems
BME 230A	Applied Engineering Mathematics I
BME 230B	Applied Engineering Mathematics II
BME 233	Dynamic Systems in Biology and Medicine
BME 236	Engineering Optics for Medical Applications
BME 247	Microfluids and Lab-On-A-Chip
BME 248	Microimplants
BME 249	Biomedical Microdevices I

Chemical and Biochemical Engineering:

CBEMS 195	Special Topics in Chemical Engineering and Materials Science
CBEMS 218	Bioengineering with Recombinant Microorganisms
CBEMS 221	Drug Delivery
CBEMS 232	Bioseparation Processes
CBEMS 249	Special Topics in Chemical Engineering and Materials Science

Civil Engineering:

ENGRCEE 220A	Travel Demand Analysis I
ENGRCEE 221A	Transportation Systems Analysis I
ENGRCEE 225B	Transportation Planning Models II
ENGRCEE 249	Earthquake Engineering
ENGRCEE 250	Finite Element Method in Structural Engineering
ENGRCEE 262	Environmental Chemistry II
ENGRCEE 263	Advanced Biological Treatment Processes
ENGRCEE 265	Physical-Chemical Treatment Processes
ENGRCEE 272	Groundwater Hydrology
ENGRCEE 273	Watershed Modeling
ENGRCEE 276	Hydrology
ENGRCEE 281	Structural Reliability

Electrical and Computer Engineering:

EECS 202A	Principles of Imaging
EECS 210	Modeling and Rendering for Image Synthesis
EECS 211	Advanced System Software
EECS 213	Computer Architecture
EECS 215	Design and Analysis of Algorithms
EECS 217	VLSI System Design
EECS 222	Embedded System Modeling
EECS 225	Embedded Systems Design
EECS 241A	Digital Communications I
EECS 248A	Computer and Communication Networks
EECS 261A	Linear Optimization Methods
EECS 267A	Industrial and Power Electronics
EECS 273	Electronics Packaging
EECS 274	Biomedical Microdevices (MEMOS)
EECS 277C	Nanotechnology
EECS 278	Micro-System Design
EECS 279	Micro-Sensors and Actuators

Materials Science and Engineering:

CBEMS 221	Drug Delivery
CBEMS 249	Special Topics in Chemical Engineering and Materials Science
EECS 273	Electronics Packaging
EECS 277C	Nanotechnology
ENGRMAE 252	Fundamentals of Microfabrication
ENGRMSE 254	Polymer Science and Engineering
ENGRMSE 255A	Design with Ceramic Materials
ENGRMSE 261	High Temperature Deformation of Engineering Materials
ENGRMSE 268	Principles of Coatings, Thin Films and Multi-layers

Mechanical and Aerospace Engineering:

ENGRMAE 207	Methods of Computer Modeling in Engineering and the Sciences
ENGRMAE 218	Sustainable Energy Systems
ENGRMAE 247	Micro-System Design

ENGRMAE 249	Micro-Sensors and Actuators
ENGRMAE 250	Biorobotics
ENGRMAE 252	Fundamentals of Microfabrication
ENGRMAE 253	Advanced BIOMEMS Manufacturing Techniques
ENGRMAE 274	Optimal Control

M.S. in Biotechnology Management

The M.S. in Biotechnology Management is a joint graduate degree that will prepare scientists for leadership roles in biotechnology, science, and engineering-based companies through a curriculum comprised of courses from the Department of Molecular Biology and Biochemistry (MB&B) in the School of Biological Sciences, the Department of Biomedical Engineering in The Henry Samueli School of Engineering, and The Paul Merage School of Business. Students will receive advanced training in biotechnology through course work, a teaching laboratory, and two quarters of independent research in a faculty laboratory of their choosing. They will also learn to think as a business manager by solving product development challenges through consulting projects, creating business plans, and by exposure to current issues within the biotechnology sector. Students will develop quantitative and qualitative skills along with business communication skills. Students will learn about business from the biotechnology perspective and biotechnology from the business perspective, and will be taught to think about their work through the lens of innovation, a crucial view for their careers.

Complete program information is available in the School of Biological Sciences (p. 196) section of the *Catalogue*.

Faculty

Amir AghaKouchak, Ph.D. University of Stuttgart, *Assistant Professor of Civil and Environmental Engineering*

Mohammad A. Al Faruque, Ph.D. University of Karlsruhe, *Assistant Professor of Electrical Engineering and Computer Science*

Nicolaos G. Alexopoulos, Ph.D. University of Michigan, Ann Arbor, *Professor Emeritus of Electrical Engineering and Computer Science*

Animashree Anandkumar, Ph.D. Cornell University, *Assistant Professor of Electrical Engineering and Computer Science*

Alfredo H.-S. Ang, Ph.D. University of Illinois, Urbana, *Professor Emeritus of Civil and Environmental Engineering*, Registered Structural Engineer

Paul D. Arthur, Ph.D. California Institute of Technology, *Professor Emeritus of Mechanical and Aerospace Engineering*, Registered Professional Engineer

Casper W. Barnes, Jr., Ph.D. Stanford University, *Professor Emeritus of Electrical Engineering and Computer Science*

Michael W. Berns, Ph.D. Cornell University, *Professor of Surgery, Biomedical Engineering, and Developmental and Cell Biology, and Arnold and Mabel Beckman Chair in Laser Biomedicine*

Neil J. Bershad, Ph.D. Rensselaer Polytechnic Institute, *Professor Emeritus of Electrical Engineering and Computer Science*

James E. Bobrow, Ph.D. University of California, Los Angeles, *Professor of Mechanical and Aerospace Engineering*

Elliot Botvinick, Ph.D. University of California, San Diego, *Assistant Professor of Biomedical Engineering and Assistant Professor in Residence of Surgery (Beckman Laser Institute)*

Ozdal Boyraz, Ph.D. University of Michigan, *Associate Professor of Electrical Engineering and Computer Science*

James P. Brody, Ph.D. Princeton University, *Associate Professor of Biomedical Engineering and of Chemical Engineering and Materials Science*

Jacob Brouwer, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Mechanical and Aerospace Engineering and of Civil and Environmental Engineering*

Peter J. Burke, Ph.D. Yale University, *Professor of Electrical Engineering and Computer Science, Biomedical Engineering, and Chemical Engineering and Materials Science*

Filippo Capolino, Ph.D. University of Florence, *Associate Professor of Electrical Engineering and Computer Science*

Zhongping Chen, Ph.D. Cornell University, *Professor of Biomedical Engineering, Electrical Engineering and Computer Science, and Chemical Engineering and Materials Science*

Bernard Choi, Ph.D. University of Texas at Austin, *Associate Professor of Biomedical Engineering and Associate Professor in Residence of Surgery (Beckman Laser Institute)*

Pai H. Chou, Ph.D. University of Washington, *Professor of Electrical Engineering and Computer Science*

William J. Cooper, Ph.D. University of Miami, *Director of the Urban Water Research Center (UWRC) and Professor of Civil and Environmental Engineering and of Chemical Engineering and Materials Science*

Jose B. Cruz, Jr., Ph.D. University of Illinois, Urbana-Champaign, *Professor Emeritus of Electrical Engineering and Computer Science*, Registered Professional Engineer

Nancy A. Da Silva, Ph.D. California Institute of Technology, *Professor of Chemical Engineering and Materials Science and of Biomedical Engineering*

Donald A. Dabdub, Ph.D. California Institute of Technology, *Professor of Mechanical and Aerospace Engineering and of Civil and Environmental Engineering*

Kristen Davis, Ph.D. Stanford University, *Assistant Professor of Civil and Environmental Engineering*

Rui J. P. de Figueiredo, Ph.D. Harvard University, *Professor Emeritus of Electrical Engineering and Computer Science*

Franco De Flaviis, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science*

Brian Demsky, Ph.D. Massachusetts Institute of Technology, *Associate Professor of Electrical Engineering and Computer Science and of Computer Science*

Russell L. Detwiler, Ph.D. University of Colorado, *Assistant Professor of Civil and Environmental Engineering*

Rainer Doemer, Ph.D. University of Dortmund, *Associate Professor of Electrical Engineering and Computer Science and of Computer Science*

Derek Dunn-Rankin, Ph.D. University of California, Berkeley, *Department Chair of Mechanical and Aerospace Engineering and Professor of Mechanical and Aerospace Engineering and of Civil and Environmental Engineering*

James C. Earthman, Ph.D. Stanford University, *Professor of Chemical Engineering and Materials Science and of Biomedical Engineering*

Said E. Elghobashi, Ph.D., D.Sc. Imperial College, University of London, *Professor of Mechanical and Aerospace Engineering*

Ahmed Eltawil, Ph.D. University of California, Los Angeles, *Associate Professor of Electrical Engineering and Computer Science*

Leonard A. Ferrari, Ph.D. University of California, Irvine, *Professor Emeritus of Electrical Engineering and Computer Science*

Daniel D. Gajski, Ph.D. University of Pennsylvania, *Professor Emeritus of Electrical Engineering and Computer Science*

Manuel Gamero-Castaño, Ph.D. Yale University, *Associate Professor of Mechanical and Aerospace Engineering*

Jean-Luc Gaudiot, Ph.D. University of California, Los Angeles, *Professor of Electrical Engineering and Computer Science*

Steven C. George, M.D. University of Missouri, Ph.D. University of Washington, *Edwards Lifesciences Chair and Director of the Edwards Lifesciences Center for Advanced Cardiovascular Technology, and Professor of Biomedical Engineering and of Chemical Engineering and Materials Science*

Alon A. Gorodetsky, Ph.D. California Institute of Technology, *Assistant Professor of Chemical Engineering and Materials Science*

Stanley B. Grant, Ph.D. California Institute of Technology, *Professor of Civil and Environmental Engineering and of Chemical Engineering and Materials Science*

Enrico Gratton, Ph.D. University of Rome, *Director of the Laboratory for Fluorescence Dynamics and Professor of Biomedical Engineering, Surgery (Beckman Laser Institute), and Physics*

Michael M. Green, Ph.D. University of California, Los Angeles, *Department Chair and Professor of Electrical Engineering and Computer Science*

Anna Grosberg, Ph.D. California Institute of Technology, *Assistant Professor of Biomedical Engineering and of Chemical Engineering and Materials Science*

Gary L. Guymon, Ph.D. University of California, Davis, *Professor Emeritus of Civil and Environmental Engineering, Registered Professional Engineer*

Jered Haun, Ph.D. University of Pennsylvania, *Assistant Professor of Biomedical Engineering*

Glenn E. Healey, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science*

Payam Heydari, Ph.D. University of Southern California, *Professor of Electrical Engineering and Computer Science*

Allon Hochbaum, Ph.D. University of California, Berkeley, *Assistant Professor of Chemical Engineering and Materials Science*

Juan Hong, Ph.D. Purdue University, *Professor Emeritus of Chemical Engineering and Materials Science*

Kuo-Lin Hsu, Ph.D. University of Arizona, *Associate Professor in Residence of Civil and Environmental Engineering*

Elliot E. Hui, Ph.D. University of California Berkeley, *Assistant Professor of Biomedical Engineering*

Faryar Jabbari, Ph.D. University of California, Los Angeles, *Associate Dean for Academic Affairs of The Henry Samueli School of Engineering and Professor of Mechanical and Aerospace Engineering*

Syed A. Jafar, Ph.D. Stanford University, *Associate Professor of Electrical Engineering and Computer Science*

Hamid Jafarkhani, Ph.D. University of Maryland, College Park, *UCI Chancellor's Professor of Electrical Engineering and Computer Science and Conexant-Broadcom Chair in the Center for Pervasive Communications*

R. (Jay) Jayakrishnan, Ph.D. University of Texas at Austin, *Professor of Civil and Environmental Engineering*

C. Sunny Jiang, Ph.D. University of South Florida, *Professor of Civil and Environmental Engineering, Ecology and Evolutionary Biology, and Social Ecology*

Wenlong Jin, Ph.D. University of California, Davis, *Assistant Professor of Civil and Environmental Engineering*

Tibor Juhasz, Ph.D. JATE University of Szeged, *Professor of Ophthalmology and Biomedical Engineering*

Arash Kheradvar, M.D., Ph.D. California Institute of Technology, *Assistant Professor of Biomedical Engineering and of Mechanical and Aerospace Engineering*

Michelle Khine, Ph.D. University of California, Berkeley, and University of California, San Francisco, *Associate Professor of Biomedical Engineering, Chemical Engineering and Materials Science, and Mechanical and Aerospace Engineering*

Stuart Kleinfelder, Ph.D. Stanford University, *Associate Professor of Electrical Engineering and Computer Science*

Frithjof Kruggel, M.D., Ph.D. Ludwig-Maximilian University, Munich, *Professor of Biomedical Engineering*

Fadi Kurdahi, Ph.D. University of Southern California, *Professor of Electrical Engineering and Computer Science and of Computer Science*

Tomas Lang, Ph.D. Stanford University, *Professor Emeritus of Electrical Engineering and Computer Science*

John C. LaRue, Ph.D. University of California, San Diego, *Associate Dean for Student Affairs of The Henry Samueli School of Engineering and Professor of Mechanical and Aerospace Engineering*

Abraham Lee, Ph.D. University of California, Berkeley, *Department Chair and William J. Link Chair in Biomedical Engineering, and Professor of Biomedical Engineering and of Mechanical and Aerospace Engineering*

Chin C. Lee, Ph.D. Carnegie-Mellon University, *Professor of Electrical Engineering and Computer Science*

Henry P. Lee, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science*

Anne Lemnitzer, Ph.D. University of California, Los Angeles, *Assistant Professor of Civil and Environmental Engineering*

Guann-Pyng Li, Ph.D. University of California, Los Angeles, *Director of the UCI Division of the California Institute for Telecommunications and Information Technology (Calit2), Director of the Integrated Nanosystems Research Facility, and Professor of Electrical Engineering and Computer Science, Biomedical Engineering, and Chemical Engineering and Materials Science*

Henry C. Lim, Ph.D. Northwestern University, *Professor Emeritus of Chemical Engineering and Materials Science*

Kwei-Jay Lin, Ph.D. University of Maryland, *Professor of Electrical Engineering and Computer Science*

Chang C. Liu, Ph.D. Scripps Research Institute, *Assistant Professor of Biomedical Engineering*

Feng Liu, Ph.D. Princeton University, *Professor of Mechanical and Aerospace Engineering*

Wendy F. Liu, Ph.D. Johns Hopkins University, *Assistant Professor of Biomedical Engineering and of Chemical Engineering and Materials Science*

Marc J. Madou, Ph.D. University of Ghent, *UCI Chancellor's Professor of Mechanical and Aerospace Engineering, Biomedical Engineering, and Chemical Engineering and Materials Science*

Athina Markopoulou, Ph.D. Stanford University, *Associate Professor of Electrical Engineering and Computer Science*

J. Michael McCarthy, Ph.D. Stanford University, *Henry Samueli Endowed Chair and Director of the Center for Engineering Science in Design (CESD) and Professor of Mechanical and Aerospace Engineering*

Michael G. McNally, Ph.D. University of California, Irvine, *Professor of Civil and Environmental Engineering and of Planning, Policy, and Design*

Kenneth D. Mease, Ph.D. University of Southern California, *Professor of Mechanical and Aerospace Engineering*

Martha L. Mecartney, Ph.D. Stanford University, *Endowed Chair and Director of the Center for Diversity in Engineering Education and Professor of Chemical Engineering and Materials Science*

Farghalli A. Mohamed, Ph.D. University of California, Berkeley, *Professor Emeritus of Chemical Engineering and Materials Science*

Ali Mohraz, Ph.D. University of Michigan, Ann Arbor, *Assistant Professor of Chemical Engineering and Materials Science*

Ayman Mosallam, Ph.D. The Catholic University of America, *Professor of Civil and Environmental Engineering and of Chemical Engineering and Materials Science, Registered Professional Structural Engineer*

Daniel R. Mumm, Ph.D. Northwestern University, *Associate Professor of Chemical Engineering and Materials Science*

Zoran Nenadic, D.Sc. Washington University, *Associate Professor of Biomedical Engineering and of Electrical Engineering and Computer Science*

Hung D. Nguyen, Ph.D. North Carolina State University, *Assistant Professor of Chemical Engineering and Materials Science and of Biomedical Engineering*

Mikael Nilsson, Ph. D. Chalmers University of Technology, *Assistant Professor of Chemical Engineering and Materials Science*

Betty H. Olson, Ph.D. University of California, Berkeley, *Professor of Civil and Environmental Engineering and of Environmental Health, Science, and Policy*

Dimitri Papamoschou, Ph.D. California Institute of Technology, *Professor of Mechanical and Aerospace Engineering*

Gerard C. Pardoën, Ph.D. Stanford University, *Professor Emeritus of Civil and Environmental Engineering, Registered Professional Engineer*

Regina Ragan, Ph.D. California Institute of Technology, *Associate Professor of Chemical Engineering and Materials Science*

Roger H. Rangel, Ph.D. University of California, Berkeley, *Professor of Mechanical and Aerospace Engineering*

Elizabeth L. Read, Ph.D. University of California, Berkeley, *Assistant Professor of Chemical Engineering and Materials Science*

Wilfred W. Recker, Ph.D. Carnegie-Mellon University, *Professor of Civil and Environmental Engineering*

David J. Reinkensmeyer, Ph.D. University of California, Berkeley, *Professor of Mechanical and Aerospace Engineering, Biomedical Engineering, and Anatomy and Neurobiology*

Stephen G. Ritchie, Ph.D. Cornell University, *Director of the Institute of Transportation Studies and Professor of Civil and Environmental Engineering*

Diego Rosso, Ph.D. University of California, Los Angeles, *Associate Professor of Civil and Environmental Engineering and of Chemical Engineering and Materials Science*

Timothy Rupert, Ph.D. Massachusetts Institute of Technology, *Assistant Professor of Mechanical and Aerospace Engineering and of Chemical Engineering and Materials Science*

G. Scott Samuels, Ph.D. University of California, Berkeley, *Henry Samueli Endowed Chair, Director of the National Fuel Cell Research Center, Director of the Advanced Power and Energy Program, and Professor Emeritus of Mechanical and Aerospace Engineering and of Civil and Environmental Engineering*, Registered Professional Engineer

Brett F. Sanders, Ph.D. University of Michigan, Ann Arbor, *Department Chair and Professor of Civil and Environmental Engineering*

Jean-Daniel M. Saphores, Ph.D. Cornell University, *Director of the Graduate Program in Transportation Science and Associate Professor of Civil and Environmental Engineering, Economics, and Planning, Policy, and Design*

Jan Scherfig, Ph.D. University of California, Berkeley, *Associate Director of the Urban Water Research Center and Professor Emeritus of Civil and Environmental Engineering*, Registered Professional Engineer

William E. Schmitendorf, Ph.D. Purdue University, *Professor Emeritus of Mechanical and Aerospace Engineering*

Robin Shepherd, Ph.D. University of Canterbury; D.Sc. University of Leeds, *Professor Emeritus of Civil and Environmental Engineering*, Registered Professional Engineer

Phillip C.-Y. Sheu, Ph.D. University of California, Berkeley, *Professor of Electrical Engineering and Computer Science and of Biomedical Engineering*

Frank G. Shi, Ph.D. California Institute of Technology, *Professor of Chemical Engineering and Materials Science and of Electrical Engineering and Computer Science*

Masanobu Shinozuka, Ph.D. Columbia University, *UCI Distinguished Professor Emeritus of Civil and Environmental Engineering*, Registered Professional Engineer

Andrei M. Shkel, Ph.D. University of Wisconsin, Madison, *Professor of Mechanical and Aerospace Engineering, Electrical Engineering and Computer Science, and Biomedical Engineering*

Athanasios Sideris, Ph.D. University of Southern California, *Professor of Mechanical and Aerospace Engineering*

William A. Sirignano, Ph.D. Princeton University, *Henry Samueli Endowed Chair in Engineering and Professor of Mechanical and Aerospace Engineering*

Jack Sklansky, D.Sc. Columbia University, *Professor Emeritus of Electrical Engineering and Computer Science*, Registered Professional Engineer

Keyue M. Smedley, Ph.D. California Institute of Technology, *Professor of Electrical Engineering and Computer Science*

Soroosh Sorooshian, Ph.D. University of California, Los Angeles, *Director of the Center for Hydrometeorology and Remote Sensing (CHRS), and UCI Distinguished Professor of Civil and Environmental Engineering and of Earth System Science*

Allen R. Stubberud, Ph.D. University of California, Los Angeles, *Professor Emeritus of Electrical Engineering and Computer Science*, Registered Professional Engineer

Lizhi Sun, Ph.D. University of California, Los Angeles, *Professor of Civil and Environmental Engineering and of Chemical Engineering and Materials Science*

A. Lee Swindlehurst, Ph.D. Stanford University, *Professor of Electrical Engineering and Computer Science*

Harry H. Tan, Ph.D. University of California, Los Angeles, *Professor Emeritus of Electrical Engineering and Computer Science*

William C. Tang, Ph.D. University of California, Berkeley, *Associate Dean for Research for The Henry Samueli School of Engineering and Professor of Biomedical Engineering and of Electrical Engineering and Computer Science*

Bruce Tromberg, Ph.D. University of Tennessee, *Director of the Beckman Laser Institute and Professor of Surgery, Biomedical Engineering, and Physiology and Biophysics*

Chen S. Tsai, Ph.D. Stanford University, *UCI Chancellor's Professor of Electrical Engineering and Computer Science*

Wei Kang (Kevin) Tsai, Ph.D. Massachusetts Institute of Technology, *Professor Emeritus of Electrical Engineering and Computer Science*

Lorenzo Valdevit, Ph.D. Princeton University, *Associate Professor of Mechanical and Aerospace Engineering and of Chemical Engineering and Materials Science*

Vasan Venugopalan, Sc.D. Massachusetts Institute of Technology, *Professor of Chemical Engineering and Materials Science, Biomedical Engineering, and Surgery (Beckman Laser Institute)*

Benjamin F. Villac, Ph.D. University of Michigan, *Assistant Professor of Mechanical and Aerospace Engineering*

Roberto Villaverde, Ph.D. University of Illinois, Urbana, *Professor Emeritus of Civil and Environmental Engineering*, Registered Professional Engineer

Jasper A. Vrugt, Ph.D. University of Amsterdam, *Assistant Professor of Civil and Environmental Engineering and of Biomedical Engineering*

Szu-Wen Wang, Ph.D. Stanford University, *Associate Professor of Chemical Engineering and Materials Science and of Biomedical Engineering*

Yun Wang, Ph.D. Pennsylvania State University, *Associate Professor of Mechanical and Aerospace Engineering*

Gregory Washington, Ph.D. North Carolina State University, *Dean of The Henry Samueli School of Engineering and Professor of Mechanical and Aerospace Engineering*

H. Kumar Wickramasinghe, Ph.D. University of London, *Henry Samueli Endowed Chair in Electrical Engineering and Professor of Electrical Engineering and Computer Science, Biomedical Engineering, and Chemical Engineering and Materials Science*

Jann N. Yang, D.Sc. Columbia University, *Professor Emeritus of Civil and Environmental Engineering*, Registered Professional Engineer

Albert Yee, Ph.D. University of California, Berkeley, *Department Chair and Professor of Chemical Engineering and Materials Science, and Professor of Biomedical Engineering and Chemistry*

Farzin Zareian, Ph.D. Stanford University, *Associate Professor of Civil and Environmental Engineering*

Adjunct Professors

Hooman Darabi, Ph.D. University of California, Los Angeles, *Assistant Adjunct Professor of Electrical Engineering and Computer Science*

Xiaogang Gao, Ph.D. University of Arizona, *Adjunct Professor of Civil and Environmental Engineering*

Robert H. Liebeck, Ph.D. University of Illinois, Urbana, *Adjunct Professor of Mechanical and Aerospace Engineering*

Vincent McDonell, Ph.D. University of California, Irvine, *Adjunct Professor of Mechanical and Aerospace Engineering*

Lawrence J. Muzio, Ph.D. University of California, Berkeley, *Adjunct Professor of Mechanical and Aerospace Engineering*

Henry Samueli, Ph.D. University of California, Los Angeles, *UCI Distinguished Adjunct Professor of Electrical Engineering and Computer Science*

William Randall Seeker, Ph.D. Kansas State University, *Adjunct Professor of Mechanical and Aerospace Engineering*

Andrew A. Shapiro-Scharlotta, Ph.D. University of California, Irvine, *Associate Adjunct Professor of Electrical Engineering and Computer Science*

Ali Yousefiani, Ph.D. University of California, Irvine, *Assistant Adjunct Professor of Chemical Engineering and Materials Science*

Homayoun Yousefi'zadeh, Ph.D. University of Southern California, *Associate Adjunct Professor of Electrical Engineering and Computer Science*

Courses

ENGR 1. Freshman Seminar In Engineering. 1 Unit.

An introduction to the engineering profession. Weekly seminars by both faculty and representatives from industry present an overview of each engineering discipline. Students learn about current trends and issues in engineering, and career and academic options.

(Design units: 0)

Grading Option: Pass/no pass only.

Restriction: Freshmen only.

ENGR 7A. Introduction to Engineering I. 2 Units.

Introduction to engineering disciplines and the design process. Course may be offered online.

(Design units: 1)

Grading Option: In progress only.

ENGR 7B. Introduction to Engineering II. 2 Units.

Introduction to engineering disciplines and the design process. Course may be offered online.

(Design units: 2)

Prerequisite: ENGR 7A.

ENGR 10. Computational Methods in Engineering. 4 Units.

Procedures and procedure followers, algorithms and flow charts, computer languages, subprograms. Computer macro- and microelements, number systems. Methods of differentiation, integration, curve fitting, list processing. Error analysis. Must qualify in BASIC and FORTRAN at end of course through computer use.

(Design units: 0)

Prerequisite: Prerequisite or corequisite: MATH 2A.

Overlaps with ENGRMAE 10, EECS 10, EECS 12.

ENGR 15. Problem Solving in Engineering. 4 Units.

Introduction to scientific computing to solve engineering problems. Problem identification, algorithmic design, and solution using appropriate computational tools. Design and application documentation.

(Design units: 1)

Corequisite: MATH 3D.

Prerequisite: (EECS 10 or EECS 12 or ENGRMAE 10 or CSE 41 or I&C SCI 31) and MATH 3A.

Overlaps with ENGRCEE 20.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

ENGR 30. Statics. 4 Units.

Addition and resolution of forces distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables.

(Design units: 0)

Corequisite: MATH 2D.

Prerequisite: MATH 2D and PHYSICS 7C.

Same as ENGRCEE 30, ENGRMAE 30.

Restriction: School of Engineering majors have first consideration for enrollment.

ENGR 54. Principles of Materials Science and Engineering. 4 Units.

Superconductors to biodegradable polymers. Structure and properties of materials, including metal, ceramics, polymers, semiconductors, composites, traditional materials. Atomic structure, bonding, defects, phase equilibria, mechanical properties, electrical, optical and magnetic properties. Introduction to materials processing and synthesis. Materials fee.

(Design units: 0)

Prerequisite: CHEM 1A and PHYSICS 7C.

Restriction: School of Engineering majors have first consideration for enrollment.

ENGR 69. Energy Facilities Inspection. 0 Units.

Inspection of power-generating stations of various types, oil and gas processing facilities, and end-use facilities.

Repeatability: May be repeated for credit unlimited times.

ENGR 80. Dynamics. 4 Units.

Introduction to the kinetics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYSICS 7C.

Same as ENGRCEE 80, ENGRMAE 80.

Restriction: School of Engineering majors have first consideration for enrollment.

ENGR 92. Engineering and Computer Educational Laboratory. 0 Units.

Comprehensive academic support designed primarily for underrepresented or underprepared students in Engineering, ICS, or selected areas of the physical sciences. Typical program activities: tutoring, study skills, career planning, self-esteem enhancement, library research techniques.

(Design units: 0)

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit for 12 units.

ENGR 93. Public and Professional Service in Engineering. 0 Units.

Student participation in public and professional service activities related to engineering.

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

ENGR 98. Group Study . 1-4 Units.

Group study of selected topics in engineering.

(Design units: 1-4)

Repeatability: Unlimited as topics vary.

ENGR 150. Mechanics of Structures. 4 Units.

Stresses and strains. Torsion. Bending. Beam deflection. Shear force and moment distributions in beams. Yielding and buckling of columns. Combined loading. Transformation of stresses and strain. Yielding criteria. Finite elements analysis of frames. Dynamic of two-bar truss.

(Design units: 2)

Prerequisite: (ENGRCEE 30 or ENGR 30 or ENGRMAE 30) and MATH 3A.

Same as ENGRMAE 150.

Overlaps with ENGRCEE 150.

Restriction: Aerospace Engineering, Chemical Engineering, Materials Science Engineering, and Mechanical Engineering majors have first consideration for enrollment.

ENGR 165. Advanced Manufacturing. 4 Units.

Principles in manufacturing processes. All machining requires energy: mechanical (cutting and shaping), heat energy (laser cutting), photochemical (photolithography), chemical energy (electro chemical machining and chemical vapor deposition). These methods and their fundamentals are examined.

(Design units: 2)

Restriction: School of Engineering majors only. Seniors only.

Concurrent with ENGR 265.

ENGR 180. Entrepreneurship for Scientists and Engineers. 4 Units.

Real-world introduction to the theory and practice of entrepreneurship. Explore organizational, strategic, and financial challenges; start-up strategies; business idea evaluation; and business plan writing. Presentations by prestigious entrepreneurs and industry leaders.

(Design units: 0)

Restriction: Upper-division students only. School of Engineering majors have first consideration for enrollment.

Concurrent with ENGR 280.

ENGR 189. Senior Project - Topics Vary. 1-4 Units.

Multidisciplinary group senior project of theoretical or applied nature involving design.

(Design units: 1-4)

Repeatability: May be taken for credit for 12 units as topics vary.

Restriction: Seniors only.

ENGR 190W. Communications in the Professional World. 4 Units.

Workshop in technical and scientific writing. Oral presentation with video monitoring. Communication with various publics. Real-world professionalism.

(Design units: 0)

Prerequisite: Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Aerospace Engineering, Biomedical Engineering, Chemical Engineering, Civil Engineering, Computer Engineering, Electrical Engineering, Environmental Engineering, Materials Science Engineering and Mechanical Engineering majors have first consideration for enrollment.

(Ib)

ENGR 195. Special Topics in Engineering. 1-4 Units.

Studies in selected areas of Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

ENGR 196. Engineering Thesis. 4 Units.

Preparation of final presentation and paper describing individual research in Engineering completed in one or more quarters of individual study (i.e., ENGR 199).

Prerequisite: Completion of at least 4 units of Individual Research in Engineering.

ENGR 196W. Engineering Thesis. 4 Units.

Preparation of final presentation and paper describing individual research in Engineering completed in one or more quarters of individual study (i.e., ENGR 199).

Prerequisite: Completion of at least 4 units of Individual Research in Engineering. Satisfactory completion of the Lower-Division Writing requirement.

(Ib)

ENGR H196. Honors Thesis. 4 Units.

Preparation of final presentation and paper describing individual research in Engineering. For participants in the Campuswide Honors Program.

(Design units: 1-4)

Prerequisite: ENGR H199.

Restriction: Campuswide Honors Program students only.

ENGR H196W. Honors Thesis. 4 Units.

Preparation of final presentation and paper describing individual research in Engineering. For participants in the Campuswide Honors Program.

(Design units: 1-4)

Prerequisite: ENGR H199. Satisfactory completion of the Lower-Division Writing requirement.

Restriction: Campuswide Honors Program students only.

(Ib)

ENGR 197A. Educational Strategies for Tutoring and Teacher Aiding. 4 Units.

Placement in a public elementary or secondary school to gain experience as a tutor or teacher aide. Emphasis on cognitive learning and the development of instructional strategies and resources which can be used in effective cross-age and cross-cultural experiences.

Grading Option: Pass/no pass only.

Repeatability: May be taken for credit 3 times.

Same as EDUC 100.

ENGR 199. Individual Study. 1-4 Units.

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

Restriction: School of Engineering majors only.

ENGR 199P. Individual Study. 1-4 Units.

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

ENGR H199. Individual Study for Honors Students. 1-5 Units.

Supervised research in Engineering for participants in the Campuswide Honors Program. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-5)

Repeatability: May be repeated for credit unlimited times.

Restriction: Campuswide Honors Program students only.

ENGR 260A. Technology for Life. 4 Units.

Engineering techniques including physics, chemistry, biology, and micro/nano technology for enabling life sciences research in the areas of genomics/proteomics, cells, tissues/organs, and biomolecules.

Prerequisite: PHYSICS 106 or CHEM 128L or BIO SCI M118L.

ENGR 260B. Technology of Life. 4 Units.

Engineering perspectives of evolution in life sciences including the physics, chemistry, and mechanics of various life systems such as DNA, RNA, biomolecules, cells, organs.

Prerequisite: PHYSICS 146A or CHEM 128 or BIO SCI D114 or BME 50A or BME 50B.

ENGR 265. Advanced Manufacturing. 4 Units.

Principles in manufacturing processes. All machining requires energy: mechanical (cutting and shaping), heat energy (laser cutting), photochemical (photolithography), chemical energy (electro chemical machining and chemical vapor deposition). These methods and their fundamentals are examined.

Restriction: School of Engineering graduate students only.

Concurrent with ENGR 165.

ENGR 280. Entrepreneurship for Scientists and Engineers. 4 Units.

Real-world introduction to the theory and practice of entrepreneurship. Explore organizational, strategic, and financial challenges; start-up strategies; business idea evaluation; and business plan writing. Presentations by prestigious entrepreneurs and industry leaders.

(Design units: 0)

Restriction: Graduate students only. School of Engineering majors have first consideration for enrollment.

Concurrent with ENGR 180.

ENGR 295. Special Topics in Engineering. 1-4 Units.

Studies in selected areas of Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ENGR 296. Master of Science Thesis Research. 1-16 Units.

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

ENGR 297. Doctor of Philosophy Dissertation Research. 1-16 Units.

Individual research or or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

ENGR 299. Individual Research. 1-16 Units.

Individual research or investigation under the direction of an individual faculty.

Repeatability: May be repeated for credit unlimited times.

ENGR 399. University Teaching. 4 Units.

University teaching with Engineering faculty.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Teaching assistants only.

Department of Biomedical Engineering

3120 Natural Sciences II; (949) 824-9196

<http://www.eng.uci.edu/dept/bme>

Abraham Lee, **Department Chair**

Biomedical engineering combines engineering expertise with medical needs for the enhancement of health care. It is a branch of engineering in which knowledge and skills are developed and applied to define and solve problems in biology and medicine. Students choose the biomedical engineering field to be of service to people, for the excitement of working with living systems, and to apply advanced technology to the complex problems of medical care. Biomedical engineers may be called upon to design instruments and devices, to bring together knowledge from many sources to develop new procedures, or to carry out research to acquire knowledge needed to solve new problems.

During the last 20 years, we have witnessed unprecedented advances in engineering, medical care, and the life sciences. The combination of exploding knowledge and technology in biology, medicine, the physical sciences, and engineering, coupled with the changes in the way health care will be delivered in the next century, provide a fertile ground for biomedical engineering. Biomedical engineering, at the confluence of these fields, has played a vital role in this progress. Traditionally, engineers have been concerned with inanimate materials, devices, and systems, while life scientists have investigated biological structure and function. Biomedical engineers integrate these disciplines in a unique way, combining the methodologies of the physical sciences and engineering with the study of biological and medical problems. The collaboration between engineers, physicians, biologists, and physical scientists is an integral part of this endeavor and has produced many important discoveries in the areas of artificial organs, artificial implants, and diagnostic equipment.

The Department offers a B.S. degree in Biomedical Engineering (BME), a four-year engineering curriculum accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. This program prepares students for a wide variety of careers in Biomedical Engineering in industry, hospitals, and research laboratories or for further education in graduate school.

The Department also offers a B.S. degree in Biomedical Engineering: Premedical (BMEP), a four-year engineering curriculum taken with required premedical courses. It is one of many majors that can serve as preparation for further training in medical, veterinary, or allied health professions. It is also suitable for students interested in pursuing graduate work in Biomedical Engineering and other biomedical areas such as physiology, neurosciences, and bioinformatics. The curriculum has less engineering content but more biological sciences and chemistry course work than the Biomedical Engineering major. The undergraduate major in Biomedical Engineering: Premedical is not designed to be accredited, therefore is not accredited by ABET.

Areas of graduate study and research include biophotonics, biomedical nanoscale systems, biomedical computational technologies, and tissue engineering.

- Biomedical Engineering
- Biomedical Engineering: Premedical

Undergraduate Major in Biomedical Engineering

Program Educational Objectives: Graduates of the Biomedical Engineering program will (1) promote continuous improvement in the field of biomedical engineering; (2) communicate effectively the relevant biomedical engineering problem to be solved across the engineering, life science, and medical disciplines; (3) apply critical reasoning as well as quantitative and design skills to identify and solve problems in biomedical engineering; (4) lead and manage biomedical engineering projects in industry, government, or academia that involve multidisciplinary team members. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

Biomedical Engineering students learn engineering and principles of biology, physiology, chemistry, and physics. They may go on to design devices to diagnose and treat disease, engineer tissues to repair wounds, develop cutting-edge genetic treatments, or create computer programs to understand how the human body works.

The curriculum emphasizes education in the fundamentals of engineering sciences that form the common basis of all engineering sub-specialties. Education with this focus is intended to provide students with a solid engineering foundation for a career in which engineering practice may change rapidly. In addition, elements of bioengineering design are incorporated at every level in the curriculum. This is accomplished by integration of laboratory experimentation, computer applications, and exposure to real bioengineering problems throughout the program. Students also work as teams in senior design project courses to solve multidisciplinary problems suggested by industrial and clinical experience.

NOTE: Students may complete only one of the following programs: the major in Biomedical Engineering, the major in Biomedical Engineering: Premedical, or the minor in Biomedical Engineering.

Admissions

High School Students: See School admissions (p. 308) information.

Transfer Students. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one year of chemistry (with laboratory), and one additional approved course for the major.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Biomedical Engineering

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements (p. 308).

Major Requirements

Mathematics and Basic Science Courses:

Students must complete a minimum of 48 units of mathematics and basic sciences including:

Core Courses:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 2E	Multivariable Calculus
STATS 8	Introduction to Biological Statistics
CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
CHEM 1LC	General Chemistry Laboratory
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
BIO SCI 194S	Safety and Ethics for Research

Engineering Topics Courses:

Students must complete a minimum of 28 units of engineering design including:

Core Courses:

BME 1	Introduction to Biomedical Engineering
BME 50A- 50B	Cell and Molecular Engineering and Cell and Molecular Engineering
BME 60A- 60B- 60C	Engineering Analysis/Design: Data Acquisition and Engineering Analysis/ Design:Data Analysis and Engineering Analysis/Design: Computer-Aided Design
BME 110A- 110B- 110C	Biomechanics I and Biomechanics II and Biomechanics III
BME 111	Design of Biomaterials
BME 120	Quantitative Physiology: Sensory Motor Systems
BME 121	Quantitative Physiology: Organ Transport Systems
BME 130	Biomedical Signals and Systems
BME 140	Design of Biomedical Electronics
BME 150	Biotransport Phenomena
BME 160	Tissue Engineering
BME 170	Biomedical Engineering Laboratory

BME 180A- 180B- 180C	Biomedical Engineering Design and Biomedical Engineering Design and Biomedical Engineering Design
----------------------	---

Engineering Electives:

Students select, with the approval of a faculty advisor a minimum of 12 units of engineering topics needed to satisfy school and major requirements.

(The nominal Biomedical Engineering program will require 186 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

Engineering Professional Topics Course:

ENGR 190W	Communications in the Professional World
-----------	--

Optional Specialization in Biophotonics**Requires:**

BME 135	Photomedicine
BME 136	Engineering Optics for Medical Applications
BME 137	Introduction to Biomedical Imaging
or EECS 180A	Engineering Electromagnetics I

These courses will also satisfy the Engineering Electives requirement.

Optional Specialization in Micro and Nano Biomedical Engineering**Requires:**

BME 149	Biomedical Microdevices I
Select two of the following:	
BME 147	Microfluidics and Lab-on-a-Chip
BME 148	Microimplants
EECS 179	Microelectromechanical Systems (MEMS)
or ENGRMAE 153	Advanced BIOMEMS Manufacturing Techniques

These courses will also satisfy the Engineering Electives requirement.

Planning a Program of Study

The sample program of study chart shown is typical for the major in Biomedical Engineering. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their faculty advisor. Biomedical Engineering majors must consult at least once every year with the academic counselors in the Student Affairs Office and with their faculty advisors.

Undergraduate Major in Biomedical Engineering: Premedical

Program Educational Objectives: Graduates of the Biomedical Engineering: Premedical program will: (1) demonstrate a broad knowledge in the field of biomedical engineering; (2) demonstrate critical reasoning as well as quantitative skills to identify, formulate, analyze and solve biomedical problems; (3) qualify to pursue entry into a medical college, or medical research in biomedical engineering, or other professional health programs. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.) The major program objective is to prepare students for medical school. The curriculum is designed to meet the requirements for admission to medical schools, but is also suitable for those planning to enter graduate school in biomedical engineering, physiology, biology, neurosciences, or related fields. It has less engineering content and more biological sciences than the accompanying Biomedical Engineering major. It is one of many majors that can serve as preparation for further training in medical, veterinary, or allied health professions.

The Biomedical Engineering: Premedical curriculum provides future physicians with a quantitative background in biomechanics, physiology, and biotransport. Such a background is increasingly important because of the heavy utilization of biomedical technology in modern medical practice. The curriculum includes courses in the sciences that satisfy the requirements of most medical schools.

Admissions

High School Students: See School admissions (p. 308) information.

Transfer Students. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one year of chemistry (with laboratory), and one additional approved course for the major.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that

it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Biomedical Engineering: Premedical

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements (p. 308).

Major Requirements

Mathematics and Basic Science Courses:

Students must complete a minimum of 48 units of mathematics and basic sciences including:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
CHEM 51A- 51B- 51C	Organic Chemistry and Organic Chemistry and Organic Chemistry
CHEM 51LB- 51LC	Organic Chemistry Laboratory and Organic Chemistry Laboratory
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory

Students select, with the approval of a faculty advisor, any additional basic science course needed to satisfy school and major requirements.

Engineering Topics Courses:

Students must complete the following engineering topics including:

BIO SCI 97	Genetics
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology
BIO SCI D103 or BIO SCI D104	Cell Biology Developmental Biology
BIO SCI 100	Scientific Writing
BIO SCI D111L	Developmental and Cell Biology Laboratory
BIO SCI E112L- M114L- M116L	Physiology Laboratory and Biochemistry Laboratory and Molecular Biology Laboratory (select two of these three courses)
BIO SCI 194S	Safety and Ethics for Research
BME 1	Introduction to Biomedical Engineering

BME 60A- 60B- 60C	Engineering Analysis/Design: Data Acquisition and Engineering Analysis/ Design:Data Analysis and Engineering Analysis/Design: Computer-Aided Design

Minor in Biomedical Engineering

The minor in Biomedical Engineering requires a total of nine courses—two advanced mathematics courses, five core Biomedical Engineering courses, and two Biomedical Engineering electives. Some of these courses may include prerequisites that may or may not be part of a student's course requirements for their major. Private biomedical industry has indicated a keen interest in engineers that have a more traditional engineering degree (i.e., electrical engineering), but also possess some in-depth knowledge of biomedical systems. Hence, the minor in Biomedical Engineering is designed to provide a student with the introductory skills necessary to perform as an engineer in the biomedical arena.

Admissions. Students interested in the minor in Biomedical Engineering must have a UCI cumulative GPA of 2.5 or higher.

NOTE: Students may not receive both a minor in Biomedical Engineering and a specialization in Biochemical Engineering within the Chemical Engineering major.

Requirements for the Minor in Biomedical Engineering

Mathematics Courses:

MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations

Engineering Topics Courses:

BME 1	Introduction to Biomedical Engineering
BME 50A- 50B	Cell and Molecular Engineering and Cell and Molecular Engineering
BME 120	Quantitative Physiology: Sensory Motor Systems
BME 121 Quantitative Physiology: Organ Transport Systems	

Technical Electives:

Students select, with the approval of a faculty advisor, two technical elective courses:

BME 110A	Biomechanics I
BME 110B	Biomechanics II
BME 130	Biomedical Signals and Systems
BME 135/BIO SCI D130	Photomedicine
BME 136	Engineering Optics for Medical Applications
BME 140	Design of Biomedical Electronics
BME 160	Tissue Engineering
BME 199	Individual Study
CBEMS 124	Transport Phenomena in Living Systems

CBEMS 154	Polymer Science and Engineering
EECS 179	Microelectromechanical Systems (MEMS)
EECS 188	Optical Electronics

Graduate Study in Biomedical Engineering

The Biomedical Engineering faculty have special interest and expertise in four thrust areas: Biophotonics, Biomedical Nanoscale Systems, Biomedical Computational Technologies, and Tissue Engineering. Biophotonics faculty are interested in photomedicine, laser microscopy, optical coherence tomography, medical imaging, and phototherapy. Biomedical Nanoscale Systems faculty are interested in molecular engineering, polymer chemistry, molecular motors, design and fabrication of microelectromechanical systems (MEMS), integrated microsystems to study intercellular signaling, and single molecule studies of protein dynamics. Biomedical Computation faculty are interested in computational biology, biomedical signal and image processing, bioinformatics, computational methods in protein engineering, and data mining.

The Department offers the M.S. and Ph.D. degrees in Biomedical Engineering.

Required Background

Because of its interdisciplinary nature, biomedical engineering attracts students with a variety of backgrounds. Thus, the requirements for admission are tailored to students who have a bachelor's degree in an engineering, physical science, or biological science discipline, with a grade point average of 3.20 or higher in their upper-division course work. The minimum course work requirements for admission are six quarters of calculus through linear algebra and ordinary differential equations, three quarters of calculus-based physics, three quarters of chemistry, and two quarters of biology. Students without a physics, chemistry, or engineering undergraduate degree may be required to take additional relevant undergraduate engineering courses during their first year in the program; any such requirements will be specifically determined by the BME Graduate Committee on a case-by-case basis and will be made known to the applicant at the time of acceptance to the program.

The recommended minimum combined verbal and quantitative portion of the GRE is 310, or a minimum combined MCAT score in Verbal Reasoning, Physical Sciences, and Biological Sciences problems of 30. A minimum score of 94 on the Test of English as a Foreign Language (TOEFL iBT) is recommended of all international students whose native language is not English. In addition, all applicants must submit three letters of recommendation.

Exceptionally promising UCI undergraduates may apply for admission through The Henry Samueli School of Engineering's accelerated M.S. and M.S./Ph.D. program, however, these students must satisfy the course work and letters of recommendation requirements described above.

Core Requirement

Both the M.S. and Ph.D. degrees require the students to complete 42 course units. These units include six core courses, the BME 298 seminar series, two elective courses, and four units of independent research. The core courses cover the basics of cells, tissues, and physiology at the microscopic and macroscopic scale, engineering mathematics, and clinical theory. The core courses are BME 210, BME 220, BME 221, BME 230A, BME 230B, BME 240, and three quarters of BME 298. Core requirements

can be waived for students entering the Ph.D. program with an M.S. degree in Biomedical Engineering.

Elective Requirement

The two elective courses required to fulfill the course requirements for the M.S. and Ph.D. degree are offered within The Henry Samueli School of Engineering and the Schools of Biological Sciences, Physical Sciences, and Medicine. The electives must provide breadth in biomedical engineering, but also provide specific skills necessary to the specific research the student may undertake as part of the degree requirements. The selection of these courses should be based upon approval of the student's faculty advisor. Upper-division undergraduate courses and courses outside of the HSSoE may be selected upon approval of the BME Graduate Advisor. Elective requirements can be waived for students entering the Ph.D. program with an M.S. degree in Biomedical Engineering.

Areas of Emphasis

Although a student is not required to formally choose a specific research focus area, four research thrust areas have been identified for the program: biophotonics, Biomedical Nanoscale Systems, biomedical computational technologies, and Tissue Engineering. These areas capitalize on existing strengths within The Henry Samueli School of Engineering and UCI as a whole, interact in a synergistic fashion, and will train biomedical engineers who are in demand in both private industry and academia.

Biophotonics. This research area includes the use of light to probe individual cells and tissues and whole organs for diagnostic and therapeutic purposes. The research areas include both fundamental investigation on the basic mechanisms of light interaction with biological systems and the clinical application of light to treat and diagnose disease. Current and future foci of the faculty are (1) microscope-based optical techniques to manipulate and study cells and organelles; (2) development of optically based technologies for the non-invasive diagnosis of cells and tissues using techniques that include fiber-optic-based sensors, delivery systems, and imaging systems; and (3) development of optically based devices for minimally invasive surgery.

Nanoscale Systems. This class of research areas encompasses the understanding, use, or design of systems that are at the micron or submicron level. Current strengths within The Henry Samueli School of Engineering and the UCI faculty as a whole include biomaterials, micro-electromechanical systems (MEMS), and the design of new biomedical molecules. The focus of biomedical engineering research in this area is the integration of nanoscale systems with the needs of clinical medicine. Projected areas of growth include (1) micro-electromechanical systems (MEMS) for biomedical devices and biofluid assay; (2) programmable DNA/ molecular microchip for sequencing and diagnostics; and (3) biomaterials and self-assembled nanostructures for biosensors and drug delivery.

Biomedical Computational Technologies. Biomedical computational technologies include both advanced computational techniques, as well as advanced biomedical database systems and knowledge-base systems. Computational technologies that will be developed in this research area include (1) methods for biomedical analysis and diagnosis such as physical modeling of light-tissue interactions, atomic-level interactions, image processing, pattern recognition, and machine-learning algorithms; (2) language instruction and platform standardization; and (3) machine-patient interfaces. Areas of research related to biomedical database

systems include the development of new technologies which can capture the rich semantics of biomedical information for intelligent reasoning.

Tissue Engineering. The term *tissue engineering* was officially coined at a National Science Foundation workshop in 1988 to mean "the application of principles and methods of engineering and life sciences toward fundamental understanding of structure-function relationships in normal and pathological mammalian tissues and the development of biological substitutes to restore, maintain, or improve tissue function." Tissue engineering draws on experts from chemical engineering, materials science, surgery, genetics, and related disciplines from engineering and the life sciences. Much of the current research in the field involves growing cells in three-dimensional structures instead of in laboratory dishes. For the most part, cells grown in a flat dish tend to behave as individual cells. But grow a cell culture in a three-dimensional structure, and the cells begin to behave as they would in a tissue or organ. Tissue engineers are testing different methods of growing tissue and organ cells in three-dimensional scaffolds that dissolve once the cells reach a certain mass. The hope is that these cell cultures will mature into fully functional tissues and organs.

Master of Science Degree

Students must successfully complete a minimum of 42 units of course work, as listed under "Core Requirement" and "Elective Requirement" above. A maximum of eight M.S. research units (i.e., BME 296) may be applied toward the 42-unit requirement.

In addition, the M.S. degree requires conducting a focused research project. Students must select a thesis advisor and complete an original research investigation including a written thesis, and obtain approval of the thesis by a thesis committee. During their research project, students are expected to enroll in at least 12 units of independent research per quarter.

The degree will be granted upon the recommendation of the Chair of the Department of Biomedical Engineering and The Henry Samueli School of Engineering Associate Dean for Student Affairs. The maximum time permitted is three years.

NOTE: Students who entered prior to fall of 2012 should follow the course requirements outlined within the *Catalogue* of the year they entered. The changes in number of units per course is not intended to change the course requirements for the degree nor to have any impact in the number of courses students are taking.

Doctor of Philosophy Degree

The Ph.D. degree requires the achievement of an original and significant body of research that advances the discipline. Students with a B.S. degree may enter the Ph.D. program directly, provided they meet the background requirements described above. The Graduate Committee will handle applicants on a case-by-case basis, and any specific additional courses required by the student will be made explicit at the time of admission.

Each student will match with a faculty advisor, and an individual program of study is designed by the student and their faculty advisor. Two depth courses are required beyond that of the M.S. degree in preparation for the qualifying examination. Six milestones are required: (1) successful completion of 42 units of course work beyond the bachelor's degree, as listed under "Core Requirement" and "Elective Requirement" above; (2) successful completion of a preliminary examination; (3) establishing an area of specialization by taking two depth courses and three quarters of BME 298 during the second year; (4) formal advancement to candidacy by successfully passing the qualifying examination; (5) students in their third or fourth year must present results of their current research in the

BME seminar series; and (6) completion of a significant body of original research and the submission of an acceptable written dissertation and its successful oral defense. During their research project, students are expected to enroll in at least 12 units of independent research per quarter. Students entering the Ph.D. program with an M.S. degree in Biomedical Engineering cannot receive another M.S. degree in Biomedical Engineering from UCI. Therefore, the requirements for milestone (1) can be waived, and the award of the Ph.D. degree is based on achieving milestones (2)–(6).

The preliminary examination will normally be taken at the end of the first year (May). A student must take it within two years of matriculating in the program, and must either have passed all of the core courses or have an M.S. degree in Biomedical Engineering prior to taking the examination. The Preliminary Examination Committee prepares the examination and sets the minimum competency level for continuing on in the Ph.D. program. Students who fail may retake the examination the following year. Students who fail the second attempt will not be allowed to continue in the program. However, they may be eligible to receive a Master's degree upon completion of an original research investigation including a written thesis (refer to Master of Science Degree requirements). In the event a Ph.D. student decides not to continue in the program, the thesis-only option for the M.S. degree will still be enforced. After passing the preliminary examination at the Ph.D. competency level, students will match with a BME faculty advisor and design an individual program of study with their advisor.

Advancement to candidacy must be completed by the end of the summer of the second year following the passing of the preliminary examination. (Special exceptions can be made, but a formal request with justification must be supplied in writing to the BME Graduate Advisor.) The qualifying examination follows campus and The Henry Samueli School of Engineering guidelines and consists of an oral and written presentation of original work completed thus far, and a coherent plan for completing a body of original research. The qualifying examination is presented to the student's graduate advisory committee, which is selected by the student and faculty advisor and must have a minimum of five faculty (including the faculty advisor). Of these five faculty, three must be BME faculty. In addition, one faculty member must have his/her primary appointment outside the Department of Biomedical Engineering. The fifth member must have his/her primary appointment outside of The Henry Samueli School of Engineering.

The Ph.D. is awarded upon submission of an acceptable written dissertation and its successful oral defense. The degree is granted upon the recommendation of the graduate advisory committee and the Dean of Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

Requirements listed here pertain to students enrolled in academic year 2012–13 or later. Students enrolled before this date may refer to a previous version of this *Catalogue*.

Program in Law and Graduate Studies (J.D./M.S.-BME; J.D./Ph.D.-BME)

Highly qualified students interested in combining the study of law with graduate qualifications in the BME program are invited to undertake concurrent degree study under the auspices of UC Irvine's Program in Law and Graduate Studies (PLGS). Students in this program pursue a coordinated curriculum leading to a J.D. degree from the School of Law in conjunction with a Master's or Ph.D. degree in the BME program.

Additional information is available from the PLGS Program Director's Office, (949) 824-4158, or by e-mail to plgs@law.uci.edu. A full description of the program, with links to all relevant application information, can be found at <http://www.law.uci.edu/plgs> and in the Law School section of the *Catalogue*.

Graduate Program in Mathematical and Computation Biology

The graduate program in Mathematical and Computational Biology (MCB) is a one-year "gateway" program designed to function in concert with selected department programs, including the Ph.D. in Biomedical Engineering. Detailed information is available online at <http://mcsb.bio.uci.edu/> and in the School of Biological Sciences section of the *Catalogue*.

Graduate Specialization in Teaching

The graduate specialization in Teaching will allow Engineering Ph.D. students to receive practical training in pedagogy designed to enhance their knowledge and skill set for future teaching careers. Students will gain knowledge and background in college-level teaching and learning from a variety of sources, and experience in instructional practices. Students completing the specialization in Teaching must fulfill all of their Ph.D. requirements in addition to the specialization requirements. Upon fulfillment of the requirements, students will be provided with a certificate of completion. Upon receipt of the certificate of completion, the students can then append "Specialization in Teaching" to their curricula vitae. For details see <http://www.eng.uci.edu/grad/services/specialization>.

The graduate specialization in Teaching is available only for certain degree programs and concentrations:

- Ph.D. degree in Biomedical Engineering
- Ph.D. degree in Electrical and Computer Engineering
- Ph.D. degree in Engineering with a concentration in Materials and Manufacturing Technology

Faculty

Michael W. Berns: Photomedicine, laser microscopy, biomedical devices

Elliot Botvinick: Laser microbeams, cellular mechanotransduction, mechanobiology

James P. Brody: Bioinformatics, micro-nanoscale systems

Zhongping Chen: Biomedical optics, optical coherence tomography, bioMEMS, and biomedical devices

Bernard Choi: Biomedical optics, *in vivo* optical imaging, microvasculature, light-based therapeutics

Steven C. George: Physiological and multi-scale integrative modeling, gas exchange, computational methods, tissue engineering

Enrico Gratton: Design of new fluorescence instruments, protein dynamics, single molecule, fluorescence microscopy, photon migration in tissues

Anna Grosberg: Computational modeling of biological systems, biomechanics, cardiac tissue engineering

Jered Haun: Nanotechnology, molecular engineering, computational simulations, targeted drug delivery, clinical cancer detection

Elliot E. Hui: Microscale tissue engineering, bioMEMS, cell-cell interactions, global health diagnostics

Tibor Juhasz: Laser-tissue interactions; high-precision microsurgery with lasers; laser applications in Ophthalmology; corneal biomechanics

Arash Kheradvar: Cardiac mechanics, cardiovascular devices, cardiac imaging

Michelle Khine: Development of novel nano- and micro-fabrication technologies and systems for single cell analysis, stem cell research, and in-vitro diagnostics

Frithjof Kruggel: Biomedical signal and image processing, anatomical and functional neuroimaging in humans, structure-function relationship in the human brain

Abraham Lee: Lab-on-a-Chip health monitoring instruments, drug delivery micro/nanoparticles, integrated cell sorting microdevices, lipid vesicles as carriers for cells and biomolecules, high throughput droplet bioassays, and microfluidic tactile sensors

Chang C. Liu: Genetic engineering, directed evolution, synthetic biology, chemical biology

Wendy Liu: Biomaterials, microdevices in cardiovascular engineering, cell-cell and cell-micro-environment interactions, cell functions and controls

Zoran Nenadic: Adaptive biomedical signal processing, control algorithms for biomedical devices, brain-machine interfaces, modeling and analysis of biological neural networks

William C. Tang: Microelectromechanical systems (MEMS) nanoscale engineering for biomedical applications, microsystems integration, microimplants, microbiomechanics, microfluidics

Bruce Tromberg: Photon migration, diffuse optical imaging, non-linear optical microscopy, photodynamic therapy

Affiliated Faculty

Mark Bachman: Micro-electro-mechanical systems (MEMS) BIOMEMS, and optoelectronics nonstandard chip processing, physics of small systems

Pierre Baldi: Bioinformatics/computational biology and probabilistic modeling/artificial intelligence and machine learning

Lubomir Bic: Distributed computing, parallel processing in biological systems

Bruce Blumberg: Biorobotics, functional genomics

Peter Burke: Biomedical nanotechnology

Dan M. Cooper: Impact of exercise on exhaled biological gases; novel methods of assessing physical activity in infants and children using biomems; impact of oxygen gradients on neutrophil trafficking

Robert Corn: Surface chemistry, surface spectroscopy, surface biochemistry and biosensing

Carl Cotman: Computational methods in brain aging, Alzheimer's disease

Nancy A. Da Silva: Molecular biotechnology, metabolic engineering, environmental biotechnology

Hamid Djalilian: Development of devices for hearing loss, dizziness, and ear infections; development of new modalities in the treatment of tinnitus

James Earthman: Biomaterials, dental, and orthopaedic implants

Aaron P. Esser-Kahn: Polymer chemistry, microvascular materials, immune programming

Gregory Evans: Tissue engineering, adult stem cells, embryonic stem cells, nerve regeneration

Lisa Flanagan-Monuki: Stem cells, neural, embryonic, neuron

Ron Frostig: Optical methods for brain imaging, functional organization of the cortex

John P. Fruehauf: In-vitro cancer models using 3-D tissue systems to predict drug response

Steven Gross: In-vivo function of molecular motors, optical tweezers

Zhibin Guan: Chemistry of biomaterials

Gultekin Gulsen: Diffuse optical tomography, fluorescence tomography, MRI, multi-modality imaging

Ranjan Gupta: In-vivo models for chronic nerve injury; in-vitro models for nerve injury

Christopher C. W. Hughes: Tissue engineering, growth and patterning of blood vessels

James V. Jester: Mechanics of wound healing and the inter-relationship of mechanical force, cell-matrix interaction, and gene expression; cellular basis of corneal transparency and the role of water-soluble proteins in isolated cell light scattering; three-dimensional and temporal imaging of cells in intact living tissue

Joyce Keyak: Bone mechanics, finite element modeling, quantitative computed tomography, osteoporosis, tumors, radiation therapy

Baruch D. Kuppermann: Diabetic retinopathy, age-related macular degeneration, the ocular complications of AIDS, drug delivery to the posterior segment of the eye, ocular imaging, retinal cell toxicology

Young Jik Kwon: Gene therapy, drug delivery, cancer-targeted therapeutics, stem cell bioreactors, biomaterials, cell and tissue engineering, mathematical modeling

Jonathan Lakey: Islet transplantation for patients with diabetes, improving methods of islet isolation, characterization and developing novel methods of islet transplantation; biopolymer and encapsulation technologies

Arthur D. Lander: Systems biology of morphogenesis; spatially dynamic models of development, signaling and growth; developmental control

Richard Lathrop: Computational methods in protein engineering

Thay Lee: Orthopaedic biomechanics, investigating the shoulder, knee, and spine focusing on sports, trauma, and total joint replacement

Guann-Pyng Li: Microelectromechanical systems for biomedical applications

Shin Lin: Electronic and optical measurements of physiological and bioenergetic changes associated with mind-body practices and therapies

John S. Lowengrub: Mathematical material science, mathematical fluid dynamics, mathematical biology, computational mathematics, cancer modeling, nanomaterials, quantum dots, complex fluids

Ray Luo: Computational structural biology, mathematical biology, molecular mechanisms of p53 cancer mutants

Marc J. Madou: Fundamental aspects of micro/nano-electro-mechanical systems (MEMS/NEMS), biosensors, nanofluidics, biomimetics

John Middlebrooks: Hearing research, neurophysiology, psychophysics, auditory prosthesis, computational neuroscience, auditory cortex

Sabee Molloy: Medical x-ray imaging physics, application of digital radiography to cardiac imaging, coronary artery flow measurement, digital image processing

J. Stuart Nelson: Phototherapy, dermatology, cell biology, biomedical device development

Hung Duc Nguyen: Thermodynamic computer simulations, nanoscale self-assembly, virus assembly, protein folding/aggregation

Qing Nie: Cell and developmental biology, systems biology and computational biology, and computational mathematics

David Reinkensmeyer: Skeletal muscle control, biorobotics, rehabilitation

Phillip C.-Y. Sheu: Semantic computing, complex biomedical systems

Andrei Shkel: Silicon integrated micro-electro-mechanical sensors and actuators

Ramesh Srinivasan: Perception, development and cortical dynamics

Roger F. Steinert: Lasers for refractive and cataract surgery; artificial lenses and artificial corneas

Vasan Venugopalan: Application of laser radiation for medical diagnostics, therapeutics, and biotechnology; laser-induced thermal, mechanical, and radiative transport processes

Szu-Wen Wang: Biomolecular engineering, nanostructured biomaterials, drug delivery

H. Kumar Wickramasinghe: Nano-bio measurements and technology, ultrafast DNA sequencing, single cell assays, nanoscale delivery and measurements within living cells

Brian Wong: Biomedical optics, tissue engineering, and development of surgical instrumentation

Xiangmin Xu: G-protein signaling; systems biology

Albert Yee: Nanofabrication of soft materials, physics of polymer thin films, nanomechanical properties of polymers, ultra-low-k dielectrics, fracture and toughening of polymer nanocomposites

Fan-Gang Zeng: Cochlear implants and auditory neuroscience

Weian Zhao: Stem cell therapy, cancer diagnostics

Affiliated faculty are from the Schools of Biological Sciences, Physical Sciences, and Medicine; the Donald Bren School of Information and Computer Sciences; and The Henry Samueli School of Engineering.

Courses

BME 1. Introduction to Biomedical Engineering. 3 Units.

Introduction to the central topics of biomedical engineering. Offers a perspective on bioengineering as a discipline in a seminar format. Principles of problem definition, team design, engineering inventiveness, information access, communication, ethics, and social responsibility are emphasized.

(Design units: 1)

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BME 50A. Cell and Molecular Engineering. 4 Units.

Physiological function from a cellular, molecular, and biophysical perspective. Applications to bioengineering design.

(Design units: 2)

Corequisite: BME 1.

Restriction: Biomedical Engineering, Chemical Engineering, and Materials Science Engineering majors have first consideration for enrollment.

BME 50B. Cell and Molecular Engineering. 4 Units.

Physiological function from a cellular, molecular, and biophysical perspective. Applications to bioengineering design.

(Design units: 2)

Prerequisite: BME 50A.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BME 60A. Engineering Analysis/Design: Data Acquisition. 4 Units.

Fundamentals of LabVIEW programming, basics of computer-based experimentation, establishing interface between computer and data acquisition instrumentation, signal conditioning basics.

(Design units: 2)

Corequisite: BME 1.

Prerequisite: Physics 7D.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BME 60B. Engineering Analysis/Design: Data Analysis. 4 Units.

Overview of MATLAB; numeric, cell, and structures arrays; file management; plotting and model building; solving linear algebraic equations; differential equations; symbolic process.

(Design units: 1)

Corequisite: MATH 3D.

Prerequisite: BME 60A and MATH 3A.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BME 60C. Engineering Analysis/Design: Computer-Aided Design. 4 Units.

Introduction to SolidWorks and Computer-Aided Design software; design; analysis; rapid prototyping; visualization and presentation; planning and manufacturing.

(Design units: 2)

Prerequisite: BME 60B.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BME 110A. Biomechanics I. 4 Units.

Introduction to statics. Rigid bodies, analysis of structures, forces in beams, moments of inertia.

(Design units: 1)

Prerequisite: PHYSICS 7D and PHYSICS 7LD and PHYSICS 7E and BME 50B and BME 60C and MATH 3A and MATH 3D. BME 110A-BME 110B-BME 110C must be taken in the same academic year.

Restriction: Biomedical Engineering, Biomedical Engineering: Premedical, and Materials Science Engineering majors have first consideration for enrollment.

BME 110B. Biomechanics II. 4 Units.

Introduction to dynamics. Kinematics of Particles, Newton's Second Law, System's of Particles, Kinematics of Rigid Bodies, Motion in three dimensions.

(Design units: 1)

Prerequisite: BME 110A. BME 110A-BME 110B-BME 110C must be taken in the same academic year.

Restriction: Biomedical Engineering, Biomedical Engineering: Premedical, and Materials Science Engineering majors have first consideration for enrollment.

BME 110C. Biomechanics III. 4 Units.

Applications of statics and dynamics to biomedical systems. Cellular biomechanics, hemodynamics, circulatory system, respiratory system, muscles and movement, skeletal biomechanics. Applications to bioengineering design.

(Design units: 1)

Prerequisite: BME 110B. BME 110A-BME 110B-BME 110C must be taken in the same academic year.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

BME 111. Design of Biomaterials. 4 Units.

Natural and synthetic polymeric materials. Metal and ceramics implant materials. Materials and surface characterization and design. Wound repair, blood clotting, foreign body response, transplanation biology, biocompatibility of material. Artificial organs and medical devices. Government regulations.

(Design units: 3)

Prerequisite: BME 60C. Prerequisite or corequisite: BME 50B.

Restriction: Prerequisite required and Majors only Biomedical Engineering, Biomedical Engineering: Premedical, and Materials Science Engineering majors have first consideration for enrollment.

BME 120. Quantitative Physiology: Sensory Motor Systems. 4 Units.

A quantitative and systems approach to understanding physiological systems. Systems covered include the nervous and musculoskeletal systems.

(Design units: 2)

Prerequisite: BME 50B and BME 60C and MATH 3A and MATH 3D.

Restriction: Biomedical Engineering, Biomedical Engineering: Premedical, and Materials Science Engineering majors have first consideration for enrollment.

Concurrent with BME 220.

BME 121. Quantitative Physiology: Organ Transport Systems. 4 Units.

A quantitative and systems approach to understanding physiological systems. Systems covered include the cardiopulmonary, circulatory, and renal systems.

(Design units: 1)

Prerequisite: BME 50B and BME 60C and MATH 3A and MATH 3D.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

Concurrent with BME 221.

BME 130. Biomedical Signals and Systems. 4 Units.

Analysis of analog and digital biomedical signals; Fourier Series expansions; difference and differential equations; convolutions. System models: discrete-time and continuous-time linear time-invariant systems; Laplace and Fourier transforms. Analysis of signals and systems using computer programs.

(Design units: 1)

Prerequisite: BME 60C and MATH 3A and MATH 3D. Recommended: STATS 8.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BME 135. Photomedicine. 4 Units.

Studies the use of optical and engineering-based systems (laser-based) for diagnosis, treating diseases, manipulation of cells and cell function. Physical, optical, and electro-optical principles are explored regarding molecular, cellular, organ, and organism applications.

(Design units: 0)

Prerequisite: PHYSICS 3C or PHYSICS 7D.

Same as BIO SCI D130.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

BME 136. Engineering Optics for Medical Applications. 4 Units.

Fundamentals of optical system design, integration, and analysis used in biomedical optics. Design components: light sources, lenses, mirrors, dispersion elements, optical fibers, detectors. Systems integration microscopy, radiometry, interferometry. Optical system analysis: resolution, modulation transfer function, deconvolution, interference, tissue optics, noise.

(Design units: 3)

Prerequisite: BME 130 and BME 135.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

Concurrent with BME 236.

BME 137. Introduction to Biomedical Imaging. 4 Units.

Introduction to imaging modalities widely used in medicine and biology, including X-ray, computed tomography (CT), nuclear medicine (PET and SPET), ultrasonic imaging, magnetic resonance imaging (MRI), optical tomography, imaging contrast, imaging processing, and complementary nature of the imaging modalities.

(Design units: 1)

Prerequisite: BME 130 or EECS 50 or EECS 150.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

BME 138. Spectroscopy and Imaging of Biological Systems. 4 Units.

Principles of spectroscopy; absorption; molecular orbitals; multiphoton transitions; Jablonski diagram; fluorescence anisotropy; fluorescence decay; quenching; FRET; excited state reactions; solvent relaxations; instruments; microscopy: wide field, LSM, TPE; fluorescent probes, fluctuations spectroscopy; optical resolution and super-resolution; CARS and SHG microscopy.

(Design units: 1)

Prerequisite: MATH 3A and MATH 3D. Recommended: STATS 8.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors only.

Concurrent with BME 238.

BME 140. Design of Biomedical Electronics. 4 Units.

Analog and digital circuits in bioinstrumentation. AC and DC circuit analysis, design and construction of filter and amplifiers using operational amplifier, digitization of signal and data acquisition, bioelectrical signal, design and construction of ECG instrument, bioelectrical signal measurement and analysis.

(Design units: 3)

Prerequisite: BME 60C and BME 130.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

BME 147. Microfluidics and Lab-on-a-Chip. 4 Units.

Introduction to principles of microfluidics; LOC (Lab-on-a-Chip) device design, fabrication, operation principles for microscale flow transport, biomolecular manipulation/separation/detection, sample preparation; integrated microfluidic technologies for micro total analysis systems (microTAS) and bioassays. Applications introduced: clinical medicine, health monitoring, biotechnology, biodetection.

(Design units: 1)

Prerequisite: BME 111 and EECS 179.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

Concurrent with BME 247.

BME 148. Microimplants. 4 Units.

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

(Design units: 1)

Prerequisite: BME 111 and EECS 179.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

Concurrent with BME 248.

BME 149. Biomedical Microdevices I. 4 Units.

In-depth review of microfabricated devices designed for biological and medical applications. Studies of the design, implementation, manufacturing, and marketing of commercial and research bio-MEMS devices.

(Design units: 0)

Concurrent with BME 249.

BME 150. Biotransport Phenomena. 4 Units.

Fundamentals of heat and mass transfer, similarities in the respective rate equations. Emphasis on practical application of fundamental principles.

(Design units: 1)

Prerequisite: BME 50B and BME 60C and MATH 3A and MATH 3D.

Overlaps with CBEMS 125C.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BME 160. Tissue Engineering. 4 Units.

Quantitative analysis of cell and tissue functions. Emerging developments in stem cell technology, biodegradable scaffolds, growth factors, and others important in developing clinical products. Applications to bioengineering design.

(Design units: 2)

Prerequisite: BME 50A and BME 50B and BME 111 and BME 121 and BME 150.

Restriction: Biomedical Engineering and Biomedical Engineering: Premedical majors have first consideration for enrollment.

BME 170. Biomedical Engineering Laboratory. 4 Units.

Measurement and analysis of biological systems using engineering tools and techniques. Laboratory experiments involve living systems with the emphasis on measuring physiological parameters. Labs: Introduction to Electroencephalography, Fiberoptic thermometry, Neurorehabilitation Engineering, Spectroscopy principles of the common pulse oximeter. Materials fee.

(Design units: 1)

Prerequisite: BME 111 and BME 120 and BME 121 and BME 130 and BME 140.

Restriction: Biomedical Engineering majors have first consideration for enrollment.

BME 180A. Biomedical Engineering Design. 3 Units.

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; clinical experience at the UCI Medical Center and Beckman Laser Institute; industrial design experience in group projects with local biomedical companies; ethics, economic analysis, and FDA product approval.

(Design units: 3)

Prerequisite: BME 110C and BME 111 and BME 120 and BME 121 and BME 140. BME 180A-B-C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Biomedical Engineering majors only.

BME 180B. Biomedical Engineering Design. 3 Units.

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; clinical experience at the UCI Medical Center and Beckman Laser Institute; industrial design experience in group projects with local biomedical companies; ethics, economic analysis, and FDA product approval.

(Design units: 3)

Prerequisite: BME 180A. BME 180A-B-C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Biomedical Engineering majors only.

BME 180C. Biomedical Engineering Design. 3 Units.

Design strategies, techniques, tools, and protocols commonly encountered in biomedical engineering; clinical experience at the UCI Medical Center and Beckman Laser Institute; industrial design experience in group projects with local biomedical companies; ethics, economic analysis, marketing, and FDA product approval.

(Design units: 3)

Prerequisite: BME 180B. BME 180A-B-C must be taken in the same academic year.

Restriction: Seniors only. Biomedical Engineering majors only.

BME 195. Special Topics in Biomedical Engineering. 1-4 Units.

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

BME 197. Seminars in Biomedical Engineering. 2 Units.

Presentation of advanced topics and reports of current research efforts in Biomedical Engineering.

(Design units: 1-2)

Restriction: Seniors only. Biomedical Engineering majors have first consideration for enrollment.

Concurrent with BME 298.

BME 199. Individual Study. 1-4 Units.

Independent research conducted in the lab of a biomedical engineering core faculty member. A formal written report of the research conducted is required at the conclusion of the quarter.

(Design units: 1-4)

Prerequisite: BIO SCI 194S.

Repeatability: May be taken for credit for 8 units.

BME 199P. Individual Study. 1-4 Units.

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

BME 210. Cell and Tissue Engineering. 4 Units.

A biochemical, biophysical, and molecular view of cell biology. Topics include the biochemistry and biophysical properties of cells, the extracellular matrix, biological signal transduction, and principles of engineering new tissues.

Restriction: Graduate students only.

BME 213. Systems Cell and Developmental Biology. 4 Units.

Introduces concepts needed to understand cell and developmental biology at the systems level, i.e., how the parts (molecules) work together to create a complex output. Emphasis on using mathematical/computational modeling to expand/modify insights provided by intuition.

Same as DEV BIO 232.

Restriction: Graduate students only.

BME 220. Quantitative Physiology: Sensory Motor Systems. 4 Units.

A quantitative and systems approach to understanding physiological systems. Systems covered include the nervous and musculoskeletal systems.

Restriction: Graduate students only.

Concurrent with BME 120.

BME 221. Quantitative Physiology: Organ Transport Systems. 4 Units.

A quantitative and systems approach to understanding physiological systems. Systems covered include the cardiopulmonary, circulatory, and renal systems.

Restriction: Graduate only.

Concurrent with BME 121.

BME 230A. Applied Engineering Mathematics I. 4 Units.

Analytical techniques applied to engineering problems in transport phenomena, process dynamics and control, and thermodynamics.

BME 230B. Applied Engineering Mathematics II. 4 Units.

Advanced engineering mathematics for biomedical engineering. Focuses on biomedical system identification. Includes fundamental techniques of model building and testing such as formulation, solution of governing equations (emphasis on basic numerical techniques), sensitivity theory, identifiability theory, and uncertainty analysis.

Restriction: Graduate students only.

BME 233. Dynamic Systems in Biology and Medicine. 4 Units.

Introduces elements of system theory and application of these principles to analyze biomedical, chemical, social, and engineering systems. Students use analytical and computational tools to model and analyze various dynamic systems such as population dynamics, Lotka-Volterra equation, and others.

Restriction: Graduate students only.

BME 234. Neuroimaging Data Analysis. 4 Units.

Recent techniques for the analysis of anatomical and functional neuroimaging data.

Restriction: Graduate students only.

BME 236. Engineering Optics for Medical Applications. 4 Units.

Fundamentals of optical system design, integration, and analysis used in biomedical optics. Design components: light sources, lenses, mirrors, dispersion elements, optical fibers, detectors. Systems integration microscopy, radiometry, interferometry. Optical system analysis: resolution, modulation transfer function, deconvolution, interference, tissue optics, noise.

Prerequisite: BME 130 and BME 135.

Restriction: Graduate students only.

Concurrent with BME 136.

BME 238. Spectroscopy and Imaging of Biological Systems. 4 Units.

Principles of spectroscopy; absorption; molecular orbitals; multiphoton transitions; Jablonski diagram; fluorescence anisotropy; fluorescence decay; quenching; FRET; excited state reactions; solvent relaxations; instruments; microscopy: wide field, LSM, TPE; fluorescent probes, fluctuations spectroscopy; optical resolution and super-resolution; CARS and SHG microscopy.

Prerequisite: MATH 3A and MATH 3D. Recommended: STATS 8.

Restriction: Graduate students only.

Concurrent with BME 138.

BME 240. Introduction to Clinical Medicine for Biomedical Engineering. 4 Units.

An introduction to clinical medicine for graduate students in biomedical engineering. Divided between lectures focused on applications of advanced technology to clinical problems and a series of four rotations through the operating room, ICU, interventional radiology/imaging, and endoscopy.

BME 247. Microfluids and Lab-On-A-Chip. 4 Units.

Introduction to principles of microfluidics; LOC (Lab-on-a-Chip) device design, fabrication, operation principles for microscale flow transport, biomolecular manipulation/separation/detection, sample preparation; integrated microfluidic technologies for micro total analysis systems (microTAS) and bioassays. Applications introduced: clinical medicine, health monitoring, biotechnology, biodetection.

Restriction: Graduate students only.

Concurrent with BME 147.

BME 248. Microimplants. 4 Units.

Essential concepts of biomedical implants at the micro scale. Design, fabrication, and applications of several microimplantable devices including cochlear, retinal, neural, and muscular implants.

Prerequisite: BME 111 and EECS 179.

Concurrent with BME 148.

BME 249. Biomedical Microdevices I. 4 Units.

Indepth review of microfabricated devices designed for biological and medical applications. Studies of the design, implementation, manufacturing, and marketing of commercial and research bio-MEMS devices.

Restriction: Graduate students only.

Concurrent with BME 149.

BME 295. Special Topics in Biomedical Engineering. 1-4 Units.

Studies in selected areas of Biomedical Engineering. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

BME 296. Master of Science Thesis Research. 1-16 Units.

Individual research or investigation conducted in the pursuit of preparing and completing the thesis required for the M.S. in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

BME 297. Doctor of Philosophy Dissertation Research. 1-16 Units.

Individual research or investigation conducted in the pursuit of preparing and completing the dissertation required for the Ph.D. in Engineering.

Repeatability: May be repeated for credit unlimited times.

BME 298. Seminars in Biomedical Engineering. 2 Units.

Presentation of advanced topics and reports of current research efforts in biomedical engineering. Designed for graduate students in the Biomedical Engineering program.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Concurrent with BME 197.

BME 299. Individual Research. 1-16 Units.

Individual research or investigation under the direction of an individual faculty.

Repeatability: May be repeated for credit unlimited times.

Department of Chemical Engineering and Materials Science

916F Engineering Tower; (949) 824-3887

<http://www.eng.uci.edu/dept/chems>

Albert Yee, **Department Chair**

The Department of Chemical Engineering and Materials Science offers the B.S. degree in Chemical Engineering, the B.S. degree in Materials Science Engineering, the M.S. and Ph.D. degrees in Chemical and Biochemical Engineering, and the M.S. and Ph.D. degrees in Materials Science and Engineering.

- Chemical Engineering
- Materials Science Engineering

Undergraduate Major in Chemical Engineering

Program Educational Objectives: Graduates of the Chemical Engineering program will (1) demonstrate a broad knowledge in the field of chemical engineering; (2) demonstrate critical reasoning and the requisite quantitative skills in seeking solutions to chemical engineering problems; (3) demonstrate skills for effective communication and teamwork; (4)

effectively lead chemical engineering projects in industry, government, or academia; (5) exhibit a commitment to lifelong learning.

(Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

Chemical Engineering uses knowledge of chemistry, mathematics, physics, biology, and humanities to solve societal problems in areas such as energy, health, the environment, food, clothing, shelter, and materials and serves a variety of processing industries whose vast array of products include chemicals, petroleum products, plastics, pharmaceuticals, foods, textiles, fuels, consumer products, and electronic and cryogenic materials. Chemical engineers also serve society in improving the environment by reducing and eliminating pollution.

The undergraduate curriculum in Chemical Engineering builds on basic courses in chemical engineering, other branches of engineering, and electives which provide a strong background in humanities and human behavior. Elective programs developed by the student with a faculty advisor may include such areas as applied chemistry, biochemical engineering, chemical reaction engineering, chemical processing, environmental engineering, materials science, process control systems engineering, and biomedical engineering.

Admissions

High School Students: See School Admissions (p. 308) information.

Transfer Students. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one year of general chemistry (with laboratory), and one additional approved course for the major.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Chemical Engineering

All students are required to meet the University Requirements (p. 60).

All students are required to meet the School Requirements (p. 308).

Major Requirements

Mathematics and Basic Science Courses:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 2E	Multivariable Calculus

CHEM 1A- 1B- 1C- 1LC- 1LD	General Chemistry and General Chemistry and General Chemistry and General Chemistry Laboratory and General Chemistry Laboratory
CHEM 51A- 51B- 51C- 51LB- 51LC	Organic Chemistry and Organic Chemistry and Organic Chemistry and Organic Chemistry Laboratory and Organic Chemistry Laboratory
or	
CHEM H52A- H52B- H52C- H52LA- H52LB	Honors Organic Chemistry and Honors Organic Chemistry and Honors Organic Chemistry and Honors Organic Chemistry Laboratory and Honors Organic Chemistry Laboratory
CHEM 131A- 131B	Quantum Principles and Molecular Structure and Elementary Statistical Mechanics
PHYSICS 7C- 7LC	Classical Physics and Classical Physics Laboratory
PHYSICS 7D- 7LD	Classical Physics and Classical Physics Laboratory
Engineering Topics Courses:	
Students must complete a minimum of 18 units of engineering design.	
ENGRMAE 10	Introduction to Engineering Computations
or EECS 10	Computational Methods in Electrical and Computer
ENGR 54	Principles of Materials Science and Engineering
CBEMS 45A- 45B- 45C	Chemical Processing and Materials Balances and Chemical Processing and Energy Balances and Chemical Engineering Thermodynamics
CBEMS 110	Reaction Kinetics and Reactor Design
CBEMS 125A- 125B- 125C	Momentum Transfer and Heat Transfer and Mass Transfer
CBEMS 130	Separation Processes
CBEMS 135	Chemical Process Control
CBEMS 140A- 140B	Chemical Engineering Laboratory I and Chemical Engineering Laboratory II
CBEMS 149A- 149B	Chemical Engineering Design I and Chemical Engineering Design II

Students select, with the approval of a faculty advisor, any additional engineering topics courses needed to satisfy school and department requirements.

Technical Elective Courses:

Students select, with the approval of a faculty advisor, a minimum of 22 units of technical electives. Students may select an area of specialization and complete the associated requirements, as shown below.

(The nominal Chemical Engineering program will require 192 units of courses to satisfy all university and major requirements. Students typically need at least 17 units of engineering topics from technical electives to meet school requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

Engineering Professional Topics Course:

ENGR 190W	Communications in the Professional World
-----------	---

Specialization in Biomolecular Engineering:

Requires:

CBEMS 112	Introduction to Biochemical Engineering
or CBEMS 134	Introduction to Bioreactor Engineering

and a minimum of 8 units from the following:

CBEMS 124	Transport Phenomena in Living Systems
CBEMS 132	Bioseparation Processes
CBEMS 199	Individual Study (up to 4 units; or CBEMS H199, up to 4 units)
BME 50A	Cell and Molecular Engineering
BME 50B	Cell and Molecular Engineering
BME 121 Quantitative Physiology: Organ Transport Systems	
BME 160	Tissue Engineering
BIO SCI 98	Biochemistry
BIO SCI 99	Molecular Biology

Specialization in Energy and the Environment:

Requires a minimum of 11 units including at least one course from the following:

CBEMS 133	Nuclear and Radiochemistry
CBEMS 141	Nano-Scale Materials and Applications
CBEMS 143	Chemistry and Technology for the Nuclear Fuel Cycle
CBEMS 199	Individual Study (up to 4 units; or CBEMS H199, up to 4 units)

and select the remaining units from the following:

ENGRCEE 162	Introduction to Environmental Chemistry
ENGRCEE 163	Biological Treatment Process Design
ENGRCEE 171	Water Resources Engineering
ENGRCEE 172	Groundwater Hydrology
ENGRMAE 110	Combustion and Fuel Cell Systems
ENGRMAE 115	Applied Engineering Thermodynamics
ENGRMAE 164	Air Pollution and Control

Specialization in Materials Science:

Requires a minimum of 12 units from:

ENGR 150	Mechanics of Structures ¹
CBEMS 154	Polymer Science and Engineering
CBEMS 155	Mechanical Behavior and Design Principles
CBEMS 157	Composite Materials Design

CBEMS 158	Ceramic Materials
CBEMS 163	Computer Techniques in Experimental Materials Research
CBEMS 174	Semiconductor Device Packaging
CBEMS 175	Design Failure Investigation
CBEMS 191	Materials Outreach
CBEMS 199	Individual Study (up to 4 units; or CBEMS H199, up to 4 units)
ENGRMAE 155	Composite Materials and Structures

¹ Requires ENGR 30, not included in total.

Planning a Program of Study

The sample program of study chart shown is typical for the major in Chemical Engineering. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their faculty advisor. Chemical Engineering majors must consult at least once every year with the academic counselors in the Student Affairs Office and with their faculty advisors.

Undergraduate Major in Materials Science Engineering

Program Educational Objectives: Graduates of the Materials Science Engineering program will (1) establish a productive Materials Science and Engineering career in industry, government or academia; (2) apply critical reasoning and the requisite analytical/ quantitative skills in seeking

solutions to materials science and engineering problems; (3) promote innovation in materials development and design through effective leadership, skilled communications, and multidisciplinary teamwork; (4) exhibit a commitment to engineering ethics, environmental stewardship, continued learning, and professional development.

(Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

Since the beginning of history, materials have played a crucial role in the growth, prosperity, security, and quality of human life. In fact, materials have been so intimately related to the emergence of human culture and civilization that anthropologists and historians have identified early cultures by the name of the significant materials dominating those cultures. These include the stone, bronze, and iron ages of the past. At the present time, the scope of materials science and engineering has become very diverse; it is no longer confined to topics related to metals and alloys but includes those relevant to ceramics, composites, polymers, biomaterials, nanostructures, intelligent materials, and electronic devices. In addition, present activities in materials science and engineering cover not only areas whose utility can be identified today, but also areas whose utility may be unforeseen. The services of materials scientists and engineers are required in a variety of engineering operations dealing, for example, with emerging energy systems, design of semiconductors and optoelectronic and nano devices, development of new technologies based on composites and high-temperature super-conductivity, biomedical products, performance (e.g., quality, reliability, safety, energy efficiency) in automobile and aircraft components, improvement in nondestructive testing techniques, corrosion behavior in refineries, radiation damage in nuclear power plants, and fabrication of advanced materials.

The undergraduate major in Material Science Engineering (MSE) provides students with a thorough knowledge of basic engineering and scientific principles. The undergraduate curriculum in MSE includes (a) a core of Chemistry, Physics, and Mathematics; (b) basic Engineering courses; (c) Materials and Engineering core; and (d) technical courses in Materials Science, Engineering, and Sciences.

Because of the interdisciplinary nature of MSE and its intimate relations with other Engineering disciplines (Aerospace, Biomedical, Chemical, Civil, Computer, Electrical, Environmental, and Mechanical Engineering), qualified students will be able to satisfy in a straightforward manner the degree requirements of their Engineering major and the MSE major.

Admissions

High School Students: See School Admissions (p. 308) information.

Transfer Students: Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one year of general chemistry (with laboratory), and one additional approved course for the major.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Materials Science Engineering

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements (p. 308).

Major Requirements

Mathematics and Basic Science Courses:

Core Courses:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 2E	Multivariable Calculus
CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
CHEM 1LE	Accelerated General Chemistry Lab
PHYSICS 7C- 7LC	Classical Physics and Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory

Basic Engineering or Science Elective Courses:

Select one of the following:

BIO SCI 93	From DNA to Organisms
CHEM 51A	Organic Chemistry
PHYSICS 51A	Modern Physics
STATS 7	Basic Statistics
BME 50A	Cell and Molecular Engineering
ENGRCEE 20	Introduction to Computational Engineering Problem Solving
EECS 70B	Network Analysis II
ENGRMAE 52	Computer-Aided Design
ENGRMAE 80	Dynamics
or ENGRCEE 80	Dynamics

Engineering Topics Courses:

Students must complete a minimum of 22 units of engineering design.

Core Courses:

ENGRMAE 10	Introduction to Engineering Computations
ENGRMAE 30	Statics
or ENGR 30	Statics
or ENGRCEE 30	Statics
CBEMS 45B- 45C	Chemical Processing and Energy Balances and Chemical Engineering Thermodynamics
or ENGRMAE 91	Introduction to Thermodynamics
CBEMS 50L	Principles of Materials Science and Engineering
CBEMS 125A	Momentum Transfer
or ENGRMAE 130A	Introduction to Fluid Mechanics
CBEMS 125B	Heat Transfer

or ENGRMAE 120	Heat and Mass Transfer
CBEMS 155	Mechanical Behavior and Design Principles
CBEMS 155L	Mechanical Behavior Laboratory
CBEMS 160	Advanced Laboratory in Chemistry and Synthesis of Materials
CBEMS 164	X-ray Diffraction, Electron Microscopy, and Microanalysis
CBEMS 165	Diffusion and Phase Transformations
CBEMS 169	Electronic and Optical Properties in Materials
CBEMS 175	Design Failure Investigation
CBEMS 189A- 189B- 189C	Senior Design Project and Senior Design Project and Senior Design Project
CBEMS 190	Materials Selection and Design
ENGR 54	Principles of Materials Science and Engineering
ENGR 150	Mechanics of Structures
ENGRMAE 150L	Mechanics of Structures Laboratory
EECS 70A	Network Analysis I

Engineering Electives:

Students must complete a minimum of 19 units from:

BME 50A	Cell and Molecular Engineering
BME 110A- 110B	Biomechanics I and Biomechanics II
BME 111	Design of Biomaterials
BME 120	Quantitative Physiology: Sensory Motor Systems
CBEMS 110	Reaction Kinetics and Reactor Design
CBEMS 130	Separation Processes
CBEMS 154	Polymer Science and Engineering
CBEMS 157	Composite Materials Design
CBEMS 158	Ceramic Materials
CBEMS 163	Computer Techniques in Experimental Materials Research
CBEMS 174	Semiconductor Device Packaging
CBEMS 191	Materials Outreach
CBEMS 199	Individual Study
EECS 70B	Network Analysis II
EECS 170LA	Electronics I Laboratory
EECS 170B	Electronics II
EECS 174	Semiconductor Devices
EECS 176	Fundamentals of Solid-State Electronics and Materials
EECS 180A	Engineering Electromagnetics I
ENGR 165	Advanced Manufacturing
ENGRMAE 106	Mechanical Systems Laboratory
ENGRMAE 145	Theory of Machines and Mechanisms
ENGRMAE 147	Vibrations
ENGRMAE 151	Mechanical Engineering Design

ENGRMAE 152	Introduction to Computer-Aided Engineering
ENGRMAE 155	Composite Materials and Structures
ENGRMAE 157	Lightweight Structures
ENGRMAE 170	Introduction to Control Systems

Students select, with the approval of a faculty advisor, any additional engineering topics courses needed to satisfy school and department requirements.

Engineering Professional Topics Course:

ENGR 190W	Communications in the Professional World
-----------	--

(The nominal Materials Science Engineering program will require 187 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary. Dual engineering majors are reminded that they are required to satisfy all requirements of both majors individually. Students should not assume that courses for one, such as senior design, will satisfy the requirements of the other, without prior approval.)

Students majoring in MSE may elect, with approval of their faculty advisor, to use available engineering electives to complete one of the following specializations.

Specialization in Biomaterials:

Requires a minimum of 14 units from:

CBEMS 154	Polymer Science and Engineering
CBEMS 199	Individual Study
BME 50A	Cell and Molecular Engineering
BME 110A- 110B	Biomechanics I and Biomechanics II
BME 111	Design of Biomaterials
BME 120	Quantitative Physiology: Sensory Motor Systems

Specialization in Electronics Processing and Materials:

Requires a minimum of 14 units from:

CBEMS 174	Semiconductor Device Packaging
CBEMS 199	Individual Study (up to 3 units; or CBEMS H199, up to 3 units)
EECS 70B	Network Analysis II
EECS 170LA	Electronics I Laboratory
EECS 174	Semiconductor Devices
ENGR 165 Advanced Manufacturing	

Specialization in Materials and Mechanical Design:

Requires a minimum of 14 units from:

CBEMS 199	Individual Study (up to 3 units; or CBEMS H199, up to 3 units)
ENGRMAE 106	Mechanical Systems Laboratory
ENGRMAE 145	Theory of Machines and Mechanisms
ENGRMAE 147	Vibrations
ENGRMAE 151	Mechanical Engineering Design
ENGRMAE 152	Introduction to Computer-Aided Engineering
ENGRMAE 155	Composite Materials and Structures

ENGRMAE 157	Lightweight Structures
ENGRMAE 170	Introduction to Control Systems

Planning a Program of Study

A sample program of study chart for the major in Materials Science Engineering is available in the Undergraduate Student Affairs Office. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their faculty advisor. Materials Science Engineering majors must consult at least once every year with the academic counselors in the Undergraduate Student Affairs Office and with their faculty advisors.

Sample Program of Study — Materials Science Engineering

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D
CHEM 1A	CHEM 1B	PHYSICS 7D
ENGRMAE 10	CHEM 1LE	PHYSICS 7LD
General Education	PHYSICS 7C	CHEM 1C
	PHYSICS 7LC	General Education
Sophomore		
Fall	Winter	Spring
MATH 3A	MATH 3D	MATH 2E

Minor in Materials Science Engineering

The interdisciplinary field of materials science and engineering has become critical to many emerging areas of advanced technology and their applications. As a result, there are needs and opportunities for engineers and scientists with education and training in materials science and engineering. The goal of the minor in Materials Science Engineering (MSE) is to provide students at UCI with such education and training that will enable them, upon graduation, to not only participate in projects or programs of an interdisciplinary nature but also address challenging societal needs and complex technological advances.

Admission. Admission in the MSE minor requires a minimum 2.5 overall UCI GPA. Students are required to complete all prerequisites for required

courses and selected electives. In particular, students need to complete the following courses before applying:

CHEM 1A	General Chemistry
CHEM 1LE	Accelerated General Chemistry Lab
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 2E	Multivariable Calculus
MATH 3D	Elementary Differential Equations
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D	Classical Physics
PHYSICS 7LD	Classical Physics Laboratory

Requirements

The minor in Materials Science Engineering requires a total of seven courses—five required courses and two electives:

Required courses:

ENGR 54	Principles of Materials Science and Engineering
CBEMS 155	Mechanical Behavior and Design Principles

Select three of the following:

CBEMS 165	Diffusion and Phase Transformations ¹
CBEMS 169	Electronic and Optical Properties in Materials
CBEMS 175	Design Failure Investigation
CBEMS 199	Individual Study (contingent upon the availability of research positions in the Materials Science Engineering faculty's research groups)

Electives:

Select two of the following:

ENGR 150	Mechanics of Structures
CBEMS 154	Polymer Science and Engineering
CBEMS 157	Composite Materials Design
CBEMS 158	Ceramic Materials
CBEMS 163	Computer Techniques in Experimental Materials Research
CBEMS 174	Semiconductor Device Packaging
CBEMS 191	Materials Outreach
EECS 170A- 170B	Electronics I and Electronics II
BME 110A- 110B	Biomechanics I and Biomechanics II
BME 111	Design of Biomaterials
BME 120	Quantitative Physiology: Sensory Motor Systems
ENGR 165 Advanced Manufacturing	
ENGRMAE 151	Mechanical Engineering Design
ENGRMAE 155	Composite Materials and Structures
ENGRMAE 157	Lightweight Structures
CHEM 130A	Chemical Thermodynamics

CHEM 225	Polymer Chemistry: Synthesis and Characterization of Polymers
MATH 112A	Introduction to Partial Differential Equations and Applications
or ENGRMAE 140	Introduction to Engineering Analysis
PHYSICS 112A	Electromagnetic Theory
PHYSICS 133	Introduction to Condensed Matter Physics
PHYSICS 135	Introduction to Plasma Physics

- ¹ For students who plan to pursue a graduate degree in MSE, it is highly recommended that they take CBEMS 165 in addition to two of the following courses: CBEMS 169, CBEMS 175, or CBEMS 199.

- Chemical and Biochemical Engineering
- Materials Science and Engineering

Graduate Study in Chemical and Biochemical Engineering

Chemical engineering uses the knowledge of chemistry, mathematics, physics, biology, and social sciences to solve societal problems such as energy, health, environment, food, clothing, shelter, and transportation. It serves a variety of processing industries whose vast array of products include chemicals, petroleum products, plastics, pharmaceuticals, foods, semiconductors, textiles, fuels, consumer products, and electronic and cryogenic materials. It also serves society to improve the environment by reducing and eliminating pollution. Chemical engineering is an engineering discipline that has its strongest ties with the molecular sciences. This is an important asset since sciences such as chemistry, molecular biology, biomedicine, and solid-state physics are providing the seeds for future technologies. Chemical engineering has a bright future as the discipline which will bridge science with engineering in multidisciplinary environments.

Biochemical Engineering is concerned with the processing of biological materials and processes that use biological agents such as living cells, enzymes, or antibodies. Biochemical Engineering, with integrated knowledge of the principles of biology and chemical engineering, plays a major engineering role in the rapidly developing area of biotechnology. Career opportunities in Biochemical Engineering are available in a variety of industries such as biotechnology, chemical, environmental, food, petrochemical, and pharmaceutical industries.

The principal objectives of the graduate curriculum in Chemical and Biochemical Engineering are to develop and expand students' abilities to solve new and more challenging engineering problems and to promote their skills in independent thinking and learning in preparation for careers in manufacturing, research, or teaching. These objectives are reached through a program of course work and research designed by each student with the assistance, advice, and approval of a primary faculty advisor and a faculty advisory committee. Programs of study leading to the M.S. and Ph.D. degrees in Chemical and Biochemical Engineering are offered.

Recommended Background

It is strongly recommended that students have background and training in core Chemical Engineering topics (transport phenomena, thermodynamics, and reaction kinetics) as well as a strong background in mathematics, chemistry, and physics. A student who enters the program without undergraduate preparation in chemical engineering is required to

take three to five additional prerequisite courses (MATH 3A and MATH 3D, and CBEMS 45B-CBEMS 45C, CBEMS 110, CBEMS 112, and CBEMS 125A).

Required Courses

Students are required to take the following courses for the M.S. degree and as a basis for the Ph.D. preliminary examination.

CBEMS 210	Reaction Engineering
CBEMS 220	Transport Phenomena
CBEMS 230	Applied Engineering Mathematics I
CBEMS 240	Advanced Engineering Thermodynamics

Electives

Graduate advisors should be consulted on the selection of elective courses. All graduate courses offered in CBEMS are potential electives. Graduate-level courses offered in other Engineering departments and relevant graduate courses from other schools may also be taken as electives.

Additional Information

Students are required to consult the graduate student handbook for more specific details regarding the course, exam, and unit requirements.

Master of Science Degree

Two plans are available for the M.S. degree: a thesis option and a comprehensive examination option. Opportunities are available for part-time study toward the M.S. degree.

Plan I: Thesis Option

For the M.S. thesis option, students are required to complete a research study of great depth and originality and obtain approval for a complete program of study. A minimum of 36 units is required for the M.S. degree. The following are required: four required core courses, three quarters of CBEMS 298 (Department Seminar), three additional Chemical Engineering-related graduate elective courses numbered 200–289 approved by the graduate advisor, and two additional non-Chemical Engineering-related graduate elective courses numbered 200–289 approved by the graduate advisor. Up to two of these elective courses can be substituted by up to eight units of CBEMS 296 (M.S. Thesis Research), and one of the elective courses may be substituted by an upper-division undergraduate elective course approved by the CBE graduate advisor.

Full-time graduate students must enroll in the departmental seminar each quarter unless exempt by petition.

Plan II: Comprehensive Examination Option

For the comprehensive examination option, students are required to complete 36 units of study and a comprehensive examination. The following are required: four required core courses, three quarters of CBEMS 298 (Department Seminar), three additional Chemical Engineering-related graduate elective courses numbered 200–289 approved by the graduate advisor, and two additional non-Chemical Engineering-related graduate elective courses numbered 200–289 approved by the graduate advisor. Up to two of the elective courses may be substituted by upper-division undergraduate elective courses if these courses are approved by the CBE graduate advisor.

Full-time graduate students must enroll in the departmental seminar each quarter unless exempt by petition.

NOTE: Students who entered prior to fall 2012 should follow the course requirements outlined within the *Catalogue* of the year they entered. The change in number of units per course is not intended to change the course requirements for the degree nor to have any impact in the number of courses students are taking. As such, students will need to continue to meet the same high standards and plan of study requirements as previously required. Students will work with their advisor to create a plan of study encompassing the equivalent topical requirements, as well as the equivalent number of courses to the previous 36-unit requirement.

In addition to fulfilling the course requirements outlined above, it is a University requirement for the Master of Science degree that students fulfill a minimum of 36 units of study.

Doctor of Philosophy Degree

The Ph.D. degree in Chemical and Biochemical Engineering requires a commitment on the part of the student to dedicated study and collaboration with the faculty. Ph.D. students are selected on the basis of outstanding demonstrated potential and scholarship. Applicants must hold the appropriate prerequisite degrees from recognized institutions of high standing. After substantial preparation, Ph.D. candidates work under the supervision of faculty advisors. The process involves extended immersion in a research atmosphere and culminates in the production of original research results presented in a dissertation.

Milestones to be passed in the Ph.D. program in order to remain in good standing include the following: acceptance into a research group by the faculty advisor at the end of the student's first year of study; successful completion of the Ph.D. preliminary examination by the end of the second year; preparation for pursuing research and the development of a research proposal culminating in passing the Qualifying Examination by the end of the third year of the Ph.D. program. The Qualifying Examination includes faculty evaluation of a written research dossier and an oral presentation. Students must advance to candidacy in their third year (second year for students who entered with a master's degree).

The core course requirements for the Ph.D. degree are the same as for the M.S. degree. Students must enroll in the departmental seminar each quarter unless exempt by petition. Ph.D. students must take two additional elective courses beyond the M.S. degree requirements. These courses are to be taken after the first year of graduate work, should be relevant to the Ph.D. dissertation topic, and must be selected in consultation with the research advisor and approved by the CBE graduate advisor. The preliminary examination is based on the four core courses and the ability of the student to comprehend and present a research paper. M.S. students who have completed a CBE M.S. degree elsewhere must have a written approval by the graduate advisor to waive required CBE core courses, if they have taken the equivalent courses elsewhere.

Final examination involves the oral presentation and defense of an acceptable dissertation in a seminar attended by students and faculty. The Ph.D. degree is granted upon the recommendation of the Doctoral Committee and the Dean of the Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

Relationship of M.S. and Ph.D. Programs

Students applying with the objective of a Ph.D. are admitted to the M.S./Ph.D. program only if they are likely to successfully complete a Ph.D. program. These students do not formally reapply to the Ph.D. program

after completing the M.S. degree. Students who apply to the M.S.-only program must formally apply for the Ph.D. program if they desire to continue on for the Ph.D. Financial support is usually reserved for those students who plan to complete the Ph.D. The normative time to complete M.S. and Ph.D. degrees is two and five years, respectively.

Graduate Study in Materials Science and Engineering

Materials Science and Engineering focuses on the development of new materials and new applications for materials in engineering. Current research programs include nanomaterials, nanostructures, nanoelectronics, nanodevices, nanocharacterization, device/system packaging materials, materials for fuel cells and related alternative energy systems, biocompatible materials, soft materials such as biological materials and polymeric materials, electronic and photonic materials, hybrid materials, interfacial engineering of materials, and multifunctional materials. Faculty with relevant research are affiliated with the Integrated Nanofabrication Research Facility (INRF), the National Fuel Cell Research Center (NFCRC), the California Institute for Telecommunications and Information Technology (Calit2), the Advanced Power and Energy Program (APEP), and the Laboratory for Electron and X-ray Instrumentation (LEXI), among others.

The MSE graduate degree program is hosted by the Department of Chemical Engineering and Materials Science (ChEMS). Faculty who may serve as advisors are listed as affiliated with the ChEMS Department and include faculty with strong materials science and engineering research programs from other departments. The formal degree that is awarded upon successful completion of the program is either the M.S. or Ph.D. in Materials Science and Engineering.

Recommended Background

Given the nature of Materials Science and Engineering as a cross-disciplinary program, students having a background, and suitable training, in Materials, Engineering (Mechanical, Electrical, Civil, Chemical, Aerospace), and the Physical Sciences (Physics, Chemistry, Geology) are encouraged to participate. A student with an insufficient background may be required to take remedial undergraduate courses. Recommended background courses include an introduction to materials, thermodynamics, mechanical behavior, and electrical/optical/magnetic behavior.

Specific Fields of Emphasis

The Materials faculty at UCI have special interest and expertise in all areas of modern materials and technologies, including biomaterials, energy materials, advanced ceramics, polymers and nanocomposite materials, structural and nanostructured metallic materials, micro/nano-device materials, device/system packaging materials, and multifunctional materials.

Required Courses

Students are required to take one course from each area for the M.S. degree and as a basis for the Ph.D. preliminary examination.

Crystal Structure and Defects:

ENGRMSE 200	Crystalline Solids: Structure, Imperfections and Properties
-------------	---

Electrical and Optical Behavior:

ENGRMSE 205	Materials Physics
-------------	-------------------

Mechanical Behavior:

ENGRMSE 256A	Mechanical Behavior of Engineering Materials
--------------	--

Thermodynamics and Kinetics:

Select one of the following:

ENGRMSE 252	Theory of Diffusion
ENGRMSE 265	Phase Transformations

Electives

Faculty advisors should be consulted on the selection of elective courses. All graduate courses offered in CBEMS are potential electives. Graduate-level courses offered in other Engineering departments and relevant graduate courses from other schools may also be taken as electives.

Master of Science Degree

The M.S. degree reflects achievement of an advanced level of competence for professional practice of materials science and engineering. Two options are available: a thesis option and a comprehensive examination option.

Plan I: Thesis Option

For the M.S. thesis option, students are required to complete a research study of great depth and originality and obtain approval for a complete program of study. A committee of three full-time faculty members is appointed to guide development of the thesis. A minimum of 36 units is required for the M.S. degree.

For the thesis option, the following are required: four required core courses; three quarters of CBEMS 298 (Department Seminar), five additional graduate elective courses numbered 200–289 approved by the graduate advisor. Up to two of these elective courses can be substituted by up to eight units of CBEMS 296 (M.S. Thesis Research), and one of these elective courses may be substituted by an upper-division undergraduate elective course approved by the MSE graduate advisor.

Full-time graduate students must enroll in the departmental seminar each quarter unless exempt by petition.

Plan II: Comprehensive Examination Option

For the comprehensive examination option, students are required to complete 36 units of study and a comprehensive examination.

The following are required: four required core courses; three quarters of CBEMS 298 (Department Seminar), and a minimum of five additional graduate elective courses numbered 200–289 approved by the graduate advisor. Up to two of these elective courses may be substituted by upper-division undergraduate elective courses if these courses are approved by the MSE graduate advisor.

Full-time graduate students must enroll in the departmental seminar each quarter unless exempt by petition.

NOTE: Students who entered prior to fall of 2012 should follow the course requirements outlined within the *Catalogue* of the year they entered. The change in number of units per course is not intended to change the course requirements for the degree nor to have any impact in the number of courses students are taking. As such, students will need to continue to meet the same high standards and plan of study requirements as previously required. Students will work with their advisor to create a plan of study encompassing the equivalent topical requirements, as well as the equivalent number of courses to the previous 36-unit requirement.

In addition to fulfilling the course requirements outlined above, it is a University requirement for the Master of Science degree that students fulfill a minimum of 36 units of study.

Doctor of Philosophy Degree

The Ph.D. degree in Materials Science and Engineering requires a commitment on the part of the student to dedicated study and collaboration with the faculty. Ph.D. students are selected on the basis of outstanding demonstrated potential and scholarship. Applicants must hold the appropriate prerequisite degrees from recognized institutions of high standing. After substantial preparation, Ph.D. candidates work under the supervision of faculty advisors. The process involves extended immersion in a research atmosphere and culminates in the production of original research results presented in a dissertation. Milestones to be passed in the Ph.D. program in order to remain in good standing include the following: acceptance into a research group by the faculty advisor at the end of the student's first year of study; successful completion of the Ph.D. preliminary examination by the end of the second year; preparation for pursuing research and the development of a research proposal culminating in passing the Qualifying Examination by the end of the third year of the Ph.D. program. The Qualifying Examination includes faculty evaluation of a written research dossier and an oral presentation. Students must advance to candidacy in their third year (second year for students who entered with a master's degree).

The core course requirements for the Ph.D. are the same as for the M.S. Students must enroll in the departmental seminar each quarter unless exempt by petition. Ph.D. students must take two additional elective courses beyond the M.S. degree requirements. These courses are to be taken after the first year of graduate work, should be relevant to the Ph.D. dissertation topic, and must be selected in consultation with the research advisor and approved by the MSE graduate advisor. The preliminary examination is based on the four core courses for the M.S. Students who have completed an MSE M.S. degree elsewhere must have a written approval by the graduate advisor to waive required MSE core courses, if they have taken the equivalent courses elsewhere.

Final examination involves the oral presentation and defense of an acceptable dissertation in a seminar attended by students and faculty. The Ph.D. degree is granted upon the recommendation of the Doctoral Committee and the Dean of the Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

Relationship of M.S. and Ph.D. programs. Students applying with the objective of a Ph.D. are admitted to the M.S./Ph.D. program only if they are likely to successfully complete a Ph.D. program. These students do not formally reapply to the Ph.D. program after completing the M.S. degree. Students who apply to the M.S.-only program must formally apply for the Ph.D. program if they desire to continue on for a Ph.D. Financial support is usually reserved for those students who plan to complete the Ph.D. The normative time to complete M.S. and Ph.D. degrees is two and five years, respectively.

Faculty

Nancy A. Da Silva: Molecular biotechnology, metabolic engineering, environmental biotechnology

James C. Earthman: Fatigue behavior and cyclic damage, automated materials testing and diagnostics, high-temperature fracture, biomaterials, green materials

Alon A. Gorodetsky: Biomolecular electronics, organic solar cells, nanotechnology, DNA, materials chemistry

Allon Hochbaum: Nanoscale materials and hybrid bio-inorganic devices for applications in clean energy

Martha L. Mecartney: Grain boundary engineering of ceramics, superplastic ceramics, solid oxide fuel cell materials, ceramics for nuclear waste storage

Farghalli A. Mohamed (*Emeritus*): Mechanical properties, creep, superplasticity, correlations between properties of materials and their microstructure, mechanical behavior at the nanoscale

Ali Mohraz: Guided and self assembly of colloids, soft matter physics, microstructured materials synthesis for energy and biomimetic application, colloids for environmental remediation

Daniel R. Mumm: Enabling materials for energy systems and propulsion (solid oxide fuel cells, thermal barrier coatings), interface mechanics, materials behavior at high temperature, lightweight/multi-functional structures, nanostructured materials, electron microscopy and microanalysis

Hung D. Nguyen: Thermodynamic computer simulations, nanoscale self-assembly, virus assembly, protein folding/aggregation

Mikael Nilsson: Advanced nuclear fuel cycles, actinide chemistry, liquid-liquid extraction, process development, radiolysis, detection and detectors for online process control

Regina Ragan: Self-assembly of hybrid organic/inorganic nanostructures for nanoelectronic and sensing applications; correlating electron transport and optical properties with atomic and molecular structure

Elizabeth L. Read: Dynamics of complex biochemical systems, regulation of immune responses

Frank G. Shi: Materials packaging/manufacturing technologies for optoelectronic devices (LEDs, solar cells, sensors, etc.); polymer nanocomposites; die attach adhesives and electrical/thermal conductive pastes; silicone and epoxy encapsulants; luminescent and phosphor materials; optical glass

Vasan Venugopalan: Application of laser radiation for medical diagnostics, therapeutics and biotechnology; laser-induced thermal, mechanical, and radiative transport processes

Szu-Wen Wang: Biomolecular engineering, interfacial engineering, nanostructured biomaterials, drug delivery

Albert Yee: Nanofabrication of soft materials, physics of polymer thin films, nanomechanical properties of polymers, ultra-low-k dielectrics, fracture and toughening of polymer nanocomposites

Affiliated Faculty

James P. Brody: Bioinformatics, micro-nanoscale systems

Peter J. Burke: Nano-electronics, bio-nanotechnology

Zhongping Chen: Biomedical optics, optical coherence tomography, bioMEMS, and biomedical devices

William J. Cooper: Environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling

Aaron P. Esser-Kahn: Polymer chemistry, microvascular materials, immune programming

Steven C. George: Physiological and multi-scale integrative modeling, gas exchange, computational methods, tissue engineering

Stanley B. Grant: Environmental engineering, inland and coastal water quality, coagulation and filtration of colloidal contaminants, environmental microbiology

Anna Grosberg: Computational modeling of biological systems, biomechanics, cardiac tissue engineering

Zhibin Guan: Materials, nanoscience, organic and polymer chemistry, and chemical biology

G. Wesley Hatfield: Molecular mechanisms of biological control systems

Michelle Khine: Development of novel nano- and micro-fabrication technologies and systems for single cell analysis, stem cell research, and in-vitro diagnostics

Young Jik Kwon: Gene therapy, drug delivery, cancer-targeted therapeutics, stem cell bioreactors, biomaterials, cell and tissue engineering, mathematical modeling

Matthew Law: Analytical, inorganic, materials, nanoscience, physical and polymer chemistry, and chemical physics

Guann-Pyng Li: High-speed semiconductor technology, optoelectronic devices, integrated circuit fabrication and testing

Wendy Liu: Biomaterials, microdevices in cardiovascular engineering, cell-cell and cell-micro-environment interactions, cell functions and controls

John S. Lowengrub: Mathematical materials science, mathematical fluid dynamics, mathematical biology, computational mathematics, cancer modeling, nanomaterials, quantum dots, complex fluids

Marc J. Madou: Fundamental aspects of micro/nano-electro-mechanical systems (MEMS/NEMS), biosensors, nanofluidics, biomimetics

Reginald Penner: Nanomaterials, chemical sensing, optoelectronics, energy conversion

Peter M. Rentzepis: Physical chemistry and picosecond spectroscopy

Diego Rosso: Environmental process engineering, mass transfer, wastewater treatment, carbon- and energy-footprint analysis

Timothy Rupert: Mechanical behavior, mechatronics, biomedical engineering, rehabilitation, biomechanics, neural control of movement

Suzanne B. Sandmeyer: Retroelements, metabolic molding, genomics

Kenneth J. Shea: Organic, polymer, and analytical chemistry

Lizhi Sun: Mechanics and materials, composites, micro- and nano-mechanics, elastography xdx

Lorenzo Valdevit: Multifunctional sandwich structures, thermal protection systems, morphing structures, active materials, MEMS, electronic packaging, cell mechanics

H. Kumar Wickramasinghe: Nanoscale measurements and characterization, scanning probe microscopy, storage technology, nano-bio measurement technology

Affiliated faculty are from The Henry Samueli School of Engineering, the School of Medicine, and the School of Physical Sciences.

Chemical and Biochemical Engineering and Materials Science Courses

CBEMS 45A. Chemical Processing and Materials Balances. 4 Units.

Introduction to chemical engineering and the industries where chemical engineers play vital roles. Problem-solving skills and techniques. Quantitative calculations and applications using mass and energy balances. Stoichiometric equations, multiple bypasses, and others in process industries.

(Design units: 0)

Prerequisite: MATH 2B and CHEM 1B and PHYSICS 7C.

Restriction: Chemical Engineering majors have first consideration for enrollment.

CBEMS 45B. Chemical Processing and Energy Balances. 3 Units.

Principles of thermodynamics: definitions, basic concepts, and laws; property relationships; construction of thermodynamic charts and tables; energy balances; phase and chemical equilibria; combined mass and energy balances.

(Design units: 0)

Prerequisite: (CBEMS 45A or PHYSICS 7E) and MATH 3A.

Overlaps with ENGRMAE 91.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 45C. Chemical Engineering Thermodynamics. 4 Units.

Elements of chemical engineering thermodynamics, including equilibrium and stability; equations of state; generalized correlations of properties of materials; properties of ideal and non-ideal mixtures; thermodynamics of real solutions; ideal and non-ideal phase equilibria; chemical equilibria for ideal and non-ideal solutions.

(Design units: 1)

Prerequisite: (EECS 10 or ENGRMAE 10) and MATH 2D and CBEMS 45B. CBEMS 45B with a grade of C- or better.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 50L. Principles of Materials Science and Engineering. 2 Units.

Introduction to the experimental techniques to characterize the properties of engineering materials. Emphasis on understanding the influence of microstructure on elastic, plastic, and fracture behavior. Topics include microstructure characterization, heat treatment, grain size effect, precipitation hardening, and impact loading.

(Design units: 0)

Corequisite: ENGR 54.

Restriction: Materials Science Engineering majors have first consideration for enrollment.

CBEMS 108. Biopharmaceutics & Nanomedicine. 4 Units.

Introduces theories and tools of new drug formulations. Particularly new novel therapeutics based on biological materials, pathological characteristics utilized to achieve the maximum efficacy and specificity, and drug delivery systems based on emerging nanotechnology are extensively discussed.

Prerequisite: PHRMSCI 170B

Same as PHRMSCI 174.

Restriction: Prerequisite required

CBEMS 110. Reaction Kinetics and Reactor Design. 4 Units.

Introduction to quantitative analysis of chemical reactions and chemical reactor design. Reactor operations including batch, continuous stirred tank, and tubular reactor. Homogeneous and heterogeneous reactions.

(Design units: 2)

Prerequisite: CHEM 1C and MATH 3D and CBEMS 45B and CBEMS 45C. CBEMS 45C with a grade of C- or better.

Restriction: Chemical Engineering, Mechanical Engineering, and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 112. Introduction to Biochemical Engineering. 3 Units.

Application of engineering principles to biochemical processes. Topics include microbial pathways, energetics and control systems, enzyme and microbial kinetics and the design and analysis of biological reactors.

(Design units: 1)

Prerequisite: CBEMS 110 and CHEM 1C and MATH 3D.

Restriction: Chemical Engineering majors have first consideration for enrollment.

CBEMS 116. Field Practicum in Environmental Engineering. 4 Units.

Application of concepts from engineering and microbiology to the characterization and analysis of microbial pollution in coastal waters. Topics include public health microbiology, microbial diversity and ecology, and molecular diagnostics of waterborne pathogens. Laboratory exercises and a field-scale experiment.

(Design units: 2)

Corequisite: CBEMS 110 or ENGRCEE 162.

Restriction: Chemical Engineering majors have first consideration for enrollment.

Concurrent with CBEMS 216.

CBEMS 119. Biomaterials: Structural Biology and Assembly. 4 Units.

Application of fundamental concepts in structural biology (proteins, DNA/ RNA, carbohydrates, lipids), biomolecular thermodynamics, and molecular interactions to the design of novel biomaterials via self-assembly.

(Design units: 0)

Prerequisite: CBEMS 45C and CBEMS 110.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

Concurrent with CBEMS 219.

CBEMS 124. Transport Phenomena in Living Systems. 3 Units.

An introduction to transport phenomena in cellular and whole organ systems. Application of transport theory including advection and diffusion to the movement of molecules in biological systems, including the cardiovascular system (heart and microcirculation), and the lung.

(Design units: 0)

Prerequisite: CBEMS 125A.

Restriction: Biomedical Engineering and Chemical Engineering majors have first consideration for enrollment.

CBEMS 125A. Momentum Transfer. 4 Units.

Fluid statics, surface tension, Newton's Law of viscosity, non-Newtonian and complex flows, momentum equations, laminar and turbulent flow, velocity profiles, flow in pipes and around objects, piping systems design, pumps and mixing and other applications to chemical and related industries.

Prerequisite: CBEMS 45A and CBEMS 45B and CBEMS 45C and MATH 3D.

Overlaps with ENGRMAE 130A, ENGRCEE 170.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 125B. Heat Transfer. 3 Units.

Principles of conduction, radiation, and convection of heat; phenomenological rate laws, differential and macroscopic energy balances; heat transfer rates, steady state and unsteady state conduction, convection; applications to chemical and related industries.

(Design units: 1)

Prerequisite: CBEMS 125A with a grade of C- or better.

Overlaps with CBEMS 120B, ENGRMAE 120.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 125C. Mass Transfer. 3 Units.

Molecular and continuum approaches to diffusion and convection in multi-component mixtures; steady state, quasi-steady state and transient mass transfer; effect of reactions on mass transfer; convective mass transfer; simultaneous mass, heat and momentum transfer; applications to chemical and related industries.

(Design units: 1)

Prerequisite: CBEMS 125B.

Overlaps with BME 150.

Restriction: Chemical Engineering majors have first consideration for enrollment.

CBEMS 128. Introduction to Numerical Methods in Engineering. 3 Units.

An introduction to the fundamentals of numerical analysis and the computer algorithms in MATLAB for the solution of engineering problems, with emphasis on problems arising in chemical engineering thermodynamics, transport phenomena, and reaction engineering.

(Design units: 0)

Prerequisite: CBEMS 45C and CBEMS 125A.

CBEMS 130. Separation Processes. 4 Units.

Application of equilibria and mass and energy balances for design of separation processes. Use of equilibrium laws for design of distillation, absorption, stripping, and extraction equipment. Design of multicomponent separators.

(Design units: 3)

Prerequisite: CBEMS 45B and CBEMS 45C.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 132. Bioseparation Processes. 3 Units.

Recovery and purification of biologically produced proteins and chemicals. Basic principles and engineering design of various separation processes including chromatography, electrophoresis, extraction, crystallization, and membrane separation.

(Design units: 1)

Prerequisite: CBEMS 45A and CBEMS 45B and CBEMS 45C and CBEMS 125A.

Restriction: Chemical Engineering majors have first consideration for enrollment.

CBEMS 133. Nuclear and Radiochemistry. 4 Units.

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

(Design units: 0)

Prerequisite: CHEM 170.

Concurrent with CBEMS 233.

CBEMS 134. Introduction to Bioreactor Engineering. 3 Units.

Unique features of bioreactors. Analyses and design of bioreactors of batch, fed-batch, and continuous flow types. Microbial reactors with and without cell recycles. Bioreactor operations for industrial-important biological products and for biological treatment of wastewater.

(Design units: 1.5)

Prerequisite: CBEMS 110.

Restriction: Chemical Engineering majors have first consideration for enrollment.

CBEMS 135. Chemical Process Control. 4 Units.

Dynamic responses and control of chemical process equipment, dynamic modeling of chemical processes, linear system analysis, analyses and design of feedback loops and advanced control systems.

(Design units: 1)

Prerequisite: CBEMS 110 and CBEMS 125B and CBEMS 125C.

Restriction: Chemical Engineering majors have first consideration for enrollment.

CBEMS 140A. Chemical Engineering Laboratory I. 4 Units.

Experimental study of thermodynamics, fluid mechanics, and heat and mass transfer. Operation and evaluation of process equipment, data analysis.

(Design units: 1)

Prerequisite: CBEMS 110 and CBEMS 125C. CBEMS 110 with a grade of C- or better. CBEMS 125C with a grade of C- or better.

Restriction: Chemical Engineering majors have first consideration for enrollment.

CBEMS 140B. Chemical Engineering Laboratory II. 4 Units.

Continuation of the CBEMS 140A covering mass transfer operations such as distillation, absorption, extraction, etc. Rate and equilibria studies in simple chemical systems with and without reaction. Study of chemical process.

(Design units: 3)

Prerequisite: CBEMS 130 and CBEMS 135 and CBEMS 140A.

Restriction: Chemical Engineering majors have first consideration for enrollment.

CBEMS 141. Nano-Scale Materials and Applications. 4 Units.

Overview of the chemistry, physics, and applications of nanometer-scale materials. Explore the effects of composition, bonding, and confinement on physical properties of nanomaterials, their chemical syntheses, and their device physics in electronic, optoelectronic, and energy technologies.

(Design units: 1)

Prerequisite: CHEM 1A and MATH 2B and PHYSICS 7D.

Concurrent with CBEMS 241.

CBEMS 143. Chemistry and Technology for the Nuclear Fuel Cycle. 4 Units.

Introduces basic concepts of nuclear chemistry and focuses on chemical engineering aspects of the nuclear power industry. A broad survey of the nuclear fuel cycle (uranium processing, reactor concepts, spent fuel treatment and repositories) will be given.

(Design units: 0)

Concurrent with CBEMS 243.

CBEMS 149A. Chemical Engineering Design I. 3 Units.

Introduction to process design; flow sheets for chemical processes; synthesis of multicomponent separation sequences and reaction paths; synthesis of heat exchange networks; computer-aided design and simulation of processes and components.

(Design units: 2)

Prerequisite: CBEMS 110 and CBEMS 125C and CBEMS 130.

Overlaps with CBEMS 145.

Restriction: Chemical Engineering majors only.

CBEMS 149B. Chemical Engineering Design II. 3 Units.

Application of chemical engineering basics to practical design problems; process economics; process safety; environmental impacts; a major team design project with progress reports, oral presentation, and technical report with engineering drawings and economics.

(Design units: 3)

Prerequisite: CBEMS 149A.

Restriction: Chemical Engineering majors only.

CBEMS 154. Polymer Science and Engineering. 4 Units.

An introduction to physical aspects of polymers, including configuration and conformation of polymer chains and characterization techniques; crystallinity viscoelasticity, rheology and processing.

(Design units: 1)

Prerequisite: CHEM 1A and CHEM 1B and CHEM 1C and ENGR 54.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 155. Mechanical Behavior and Design Principles. 4 Units.

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, yielding, necking, creep, and fracture of materials. Introduction to experimental techniques to characterize the properties of materials. Design parameters.

(Design units: 2)

Prerequisite: ENGR 54.

Same as ENGRMAE 156.

Restriction: Chemical Engineering, Materials Science Engineering, and Mechanical Engineering majors have first consideration for enrollment.

CBEMS 155L. Mechanical Behavior Laboratory. 1 Unit.

Introduction to experimental techniques to characterize mechanical properties of materials. Emphasis on correlations between property and microstructure. Experiments include: plastic stability in tension, effect of grain size on flow stress at low and high temperatures, superplasticity, nanostructured materials. Materials fee.

Corequisite: CBEMS 155.

Prerequisite: ENGR 54.

Restriction: Materials Science Engineering majors have first consideration for enrollment.

CBEMS 157. Composite Materials Design. 3 Units.

Introduction to fiber-reinforced composites for mechanical applications. Properties of reinforcing fibers. Manufacture of fibers and composites. Micromechanics of fiber composites. Strength criteria and failure modes. Macromechanics in design of laminated composite structures.

(Design units: 3)

Prerequisite: ENGR 54 and ENGR 150.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 158. Ceramic Materials. 3 Units.

A technical elective for students interested in the materials area. Topics covered include structure and properties of ceramics, and design with ceramics.

(Design units: 1)

Prerequisite: ENGR 54.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 160. Advanced Laboratory in Chemistry and Synthesis of Materials. 4 Units.

Synthesis and characterization of organic and inorganic materials including polymers and oxides. Techniques include electron and scanning probe microscopy, gel permeation chromatography, X-ray diffraction, porosimetry, and thermal analysis.

(Design units: 0)

Prerequisite: (CHEM 130A and CHEM 130B) or (CHEM 131A and CHEM 131B) or ENGR 54 or PHRMSCI 171.

Same as CHEM 156.

Restriction: Chemistry majors and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 163. Computer Techniques in Experimental Materials Research. 4 Units.

Principles and practical guidelines of automated materials testing. Computer fundamentals, programming languages, data acquisition and control hardware, interfacing techniques, programming strategies, data analysis, data storage, safeguard procedures.

(Design units: 1)

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

Concurrent with MSE 263.

CBEMS 164. X-ray Diffraction, Electron Microscopy, and Microanalysis. 4 Units.

Material characterization using X-ray diffraction and scanning electron microscopy (SEM). Topics include X-ray diffraction and analysis; SEM imaging and microanalysis.

(Design units: 1)

Prerequisite: CBEMS 50L and ENGR 54.

Restriction: Materials Science Engineering and Mechanical Engineering majors have first consideration for enrollment.

CBEMS 165. Diffusion and Phase Transformations. 3 Units.

Thermodynamics and kinetics of phase transformations, phase diagrams, diffusional and diffusionless transformations.

(Design units: 0)

Prerequisite: ENGR 54 and (ENGRMAE 91 or CBEMS 45C). ENGRMAE 91 with a grade of C- or better. CBEMS 45C with a grade of C- or better.

Restriction: Materials Science Engineering majors have first consideration for enrollment.

CBEMS 169. Electronic and Optical Properties in Materials. 4 Units.

Covers the electronic, optical, and dielectric properties of crystalline and amorphous materials to provide a foundation of the underlying physical principles governing the properties of existing and emerging electronic and photonic materials.

(Design units: 1)

Prerequisite: PHYSICS 7D and PHYSICS 7E and MATH 3A and MATH 3D.

Restriction: Materials Science Engineering majors have first consideration for enrollment.

CBEMS 174. Semiconductor Device Packaging. 3 Units.

Introduction to the semiconductor device packaging and assembly process. Electrical, thermal, optical, and mechanical aspects of package design and reliability. Special topics on optoelectronics packaging will be covered.

(Design units: 1)

Prerequisite: CBEMS 45B.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 175. Design Failure Investigation. 4 Units.

Survey of mechanisms by which devices fail, including overload, fatigue, corrosion, and wear. Use of fractography and other evidence to interpret failure modes and specify design/manufacturing changes. Students redesign failed parts or structures based on actual parts and/or case histories.

(Design units: 2)

Prerequisite: ENGR 54.

Restriction: Prerequisite Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 189A. Senior Design Project. 1 Unit.

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects.

(Design units: 1)

Prerequisite: CBEMS 189A-CBEMS 189B-CBEMS 189C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Materials Science Engineering majors only.

CBEMS 189B. Senior Design Project. 2 Units.

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects.

(Design units: 2)

Prerequisite: CBEMS 189A. CBEMS 189A-CBEMS 189B-CBEMS 189C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Seniors only. Materials Science Engineering majors only.

CBEMS 189C. Senior Design Project. 2 Units.

Group supervised senior design projects that deal with materials selection in engineering design and that involve case studies in ethics, safety, design, failure modes, new products, and patents. Activities conclude with a presentation of the projects.

(Design units: 2)

Prerequisite: CBEMS 189B. CBEMS 189A-CBEMS 189B-CBEMS 189C must be taken in the same academic year.

Restriction: Seniors only. Materials Science Engineering majors only.

CBEMS 190. Materials Selection and Design. 4 Units.

Meaning and phases of design. Design considerations. Safety issues and engineering ethics. Codes and standards. Materials selection in design. Materials selection to meet specific requirements. Statistical considerations. Engineering economics. Seminars on materials selection and design by industry leaders and faculty.

(Design units: 3)

Restriction: Seniors only. Materials Science Engineering majors have first consideration for enrollment.

CBEMS 191. Materials Outreach. 3 Units.

Demonstrates major concepts in Materials Science and Engineering. Concepts of materials engineering covered include deformation in crystalline solids, effects of heat treatment on mechanical properties, thermal barrier materials, composites design, mechanical behavior of polymers, superconductivity in ceramics.

(Design units: 1)

Prerequisite: ENGR 54.

Repeatability: May be taken for credit 4 times.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 195. Special Topics in Chemical Engineering and Materials Science. 1-4 Units.

Studies in selected areas of Chemical Engineering and Materials Science. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

CBEMS 198. Group Study. 1-4 Units.

Group study of selected topics in engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

CBEMS 199. Individual Study. 1-4 Units.

For undergraduate engineering majors in supervised but independent readings, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

Restriction: Chemical Engineering and Materials Science Engineering majors have first consideration for enrollment.

CBEMS 199P. Individual Study. 1-4 Units.

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in The School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

CBEMS 210. Reaction Engineering. 4 Units.

Advanced topics in reaction engineering, reactor stability analysis, diffusional effect in heterogeneous catalysis, energy balance, optimization of reactor operation, dispersed in phase reactors.

Prerequisite: CBEMS 110.

Restriction: Graduate students only.

CBEMS 218. Bioengineering with Recombinant Microorganisms. 4 Units.

Engineering and biological principles important in recombinant cell technology. Host/vector selection; plasmid propagation; optimization of cloned gene expression; metabolic engineering; protein secretion; experimental techniques; modeling of recombinant cell systems.

Prerequisite: CBEMS 110 and CBEMS 112.

Restriction: Graduate students only.

CBEMS 219. Biomaterials: Structural Biology and Assembly. 4 Units.

Application of fundamental concepts in structural biology (proteins, DNA/ RNA, carbohydrates, lipids), biomolecular thermodynamics, and molecular interactions to the design of novel biomaterials via self-assembly.

Prerequisite: CBEMS 45C and CBEMS 110.

Concurrent with CBEMS 119.

CBEMS 220. Transport Phenomena. 4 Units.

Heat, mass, and momentum transfer theory from the viewpoint of the basic transport equations. Steady and unsteady state; laminar and turbulent flow; boundary layer theory, mechanics of turbulent transport with specific application to complex chemical engineering situations.

Prerequisite: CBEMS 125A and CBEMS 125B and CBEMS 125C.

Restriction: Graduate students only.

CBEMS 221. Drug Delivery. 4 Units.

Introduction to design of drug delivery systems. Includes physicochemical and pharmacokinetic considerations in drug formulations, types of therapeutics, routes of administration, biomaterials, and novel drug delivery systems.

Prerequisite: CHEM 1C and CBEMS 112 and (BME 50B or BIO SCI 93).

CBEMS 228. Colloid Science and Engineering. 4 Units.

An introduction to the basic foundations of colloid science, interfacial phenomena, suspensions and complex fluids, and engineering and assembly of colloidal materials.

Prerequisite: CBEMS 125A.

Restriction: Graduate students only.

CBEMS 230. Applied Engineering Mathematics I. 4 Units.

Analytical techniques applied to engineering problems in transport phenomena, process dynamics and control, and thermodynamics.

Prerequisite: CBEMS 110 and CBEMS 125A and CBEMS 125B and CBEMS 125C.

Restriction: Graduate students only.

CBEMS 232. Bioseparation Processes. 4 Units.

Recovery and purification of biologically produced proteins and chemicals. Basic principles and engineering design of various separation processes including chromatography, electrophoresis, extraction, crystallization, and membrane separation.

Prerequisite: CBEMS 112.

Restriction: Graduate students only.

CBEMS 233. Nuclear and Radiochemistry. 4 Units.

Advanced treatment of nuclear structure, nuclear reactions, and radioactive-decay processes. Introduction to nuclear activation analysis, isotope effects, radiation chemistry, hot-atom chemistry, nuclear age-dating methods, nuclear reactors, and nuclear power.

Prerequisite: CHEM 170.

Same as CHEM 233.

Concurrent with CBEMS 133.

CBEMS 240. Advanced Engineering Thermodynamics. 4 Units.

Introduction to modern thermodynamics and applications, with a focus on aspects relevant to chemical and materials engineering. Mathematical tools; equilibrium and stability; microscope rigorous equations of state; molecular-level thermodynamics of real mixtures; and phase and chemical equilibrium.

Prerequisite: CBEMS 45B and CBEMS 45C.

Restriction: Graduate students only.

CBEMS 241. Nano-Scale Materials and Applications. 4 Units.

Overview of the chemistry, physics, and applications of nanometer-scale materials. Explore the effects of composition, bonding, and confinement on physical properties of nanomaterials, their chemical syntheses, and their device physics in electronic, optoelectronic, and energy technologies.

Prerequisite: CHEM 1A and MATH 2B and PHYSICS 7D.

Restriction: Graduate students only.

Concurrent with CBEMS 141.

CBEMS 242A. Physical and Geometrical Optics. 4 Units.

Focuses on the practical aspects of optics and optical engineering, starting at the fundamentals. Topics include geometrical optics, ray tracing, polarization optics, interferometers, and diffractive optics.

Same as CHEM 242A.

Restriction: Graduate students only.

Concurrent with PHYSICS 134A.

CBEMS 242B. Applied Optics. 4 Units.

Focuses on the treatment of a wide variety of tools and techniques used in optics, particularly in research. Subjects include an introduction to lasers, optical detection, coherent optics, spectroscopic techniques, and selected topics corresponding to the interest of the students.

Prerequisite: CHEM 242A.

Same as CHEM 242B.

CBEMS 243. Chemistry and Technology for the Nuclear Fuel Cycle. 4 Units.

Introduces basic concepts of nuclear chemistry and focuses on chemical engineering aspects of the nuclear power industry. A broad survey of the nuclear fuel cycle (uranium processing, reactor concepts, spent fuel treatment and repositories) will be given.

Restriction: Graduate students only.

Concurrent with CBEMS 143.

CBEMS 249. Special Topics in Chemical Engineering and Materials Science. 1-4 Units.

Studies in selected areas of Chemical Engineering and Materials Science. Topics addressed vary each quarter.

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

CBEMS 280. Optoelectronics Packaging. 4 Units.

Basic and current issues in the packaging of integrated circuits (IC) and fiber-optic devices are discussed.

Restriction: Graduate students only.

CBEMS 295. Seminars in Engineering. 1-4 Units.

Seminars scheduled each year by individual faculty in major field of interest.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

CBEMS 296. Master of Science Thesis Research. 1-16 Units.

Individual research or investigation conducted in preparation for the thesis required for the M.S. degree.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

CBEMS 297. Doctor of Philosophy Dissertation Research. 1-16 Units.

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

CBEMS 298. Seminars in Engineering. 2 Units.

Presentation of advanced topics and reports of current research efforts in chemical engineering and materials science.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

CBEMS 299. Individual Research. 1-16 Units.

Individual research or investigation under the direction of an individual faculty member.

Grading Option: Satisfactory/unsatisfactory only.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Materials Science Engineering Courses

ENGRMSE 200. Crystalline Solids: Structure, Imperfections and Properties. 4 Units.

Principles and concepts underlying the study of advanced materials including alloys, composites, ceramics, semiconductors, polymers, ferroelectrics, and magnetics. Crystal structure and defects, surface and interface properties, thermodynamics and kinetics of phase transformations, and material processing, related to fundamental material properties.

Prerequisite: CHEM 1A and CHEM 1B and CHEM 1C and PHYSICS 7A and PHYSICS 7LA.

Restriction: Graduate students only.

ENGRMSE 205. Materials Physics. 4 Units.

Covers the electronic, optical, and dielectric properties of crystalline materials to provide a foundation of the underlying physical principles of governing the properties of existing and emerging electronic and photonic materials.

Restriction: Graduate students only.

ENGRMSE 251. Dislocation Theory. 4 Units.

Theory of elasticity and symmetry of crystals, plasticity and slip systems, stress field of dislocation, dislocation reaction, theories of yielding and strengthening, application of reaction-rate kinetics to thermally activated dislocation motion.

Prerequisite: ENGR 54.

Restriction: Graduate students only.

ENGRMSE 252. Theory of Diffusion. 4 Units.

Solid-state diffusion, analysis of diffusion in solids, thermodynamics of diffusion, application of diffusion theory to phase transformation and deformation problems.

Prerequisite: ENGR 54.

Restriction: Graduate students only.

ENGRMSE 254. Polymer Science and Engineering. 4 Units.

An introduction to organic and physical chemistry polymers, including synthetic methods, reaction mechanisms; configuration and conformation of polymer chains and characterization techniques; viscoelasticity and rheology. Special topics in biopolymers and polymer surfaces.

Prerequisite: CBEMS 154.

Restriction: Graduate students only.

ENGRMSE 255A. Design with Ceramic Materials. 4 Units.

Dependence of ceramic properties on bonding, crystal structure, defects, and microstructure. Ceramic manufacturing technology. Survey of physical properties. Strength, deformation, and fracture of ceramics. Mechanical design with brittle, environment-sensitive materials exhibiting time-dependent strengths.

Prerequisite: ENGR 54.

Restriction: Graduate students only.

ENGRMSE 256A. Mechanical Behavior of Engineering Materials. 4 Units.

Principles governing structure and mechanical behavior of materials, relationship relating microstructure and mechanical response with application to elasticity, plasticity, creep, and fatigue, study of rate-controlling mechanisms and failure modes, fracture of materials.

Prerequisite: ENGR 54.

Restriction: Graduate students only.

ENGRMSE 256B. Fracture of Engineering Materials. 4 Units.

Fracture mechanics and its application to engineering materials. Elastic properties of cracks, the stress intensity factor, the crack tip plastic zone, the J integral approach, fracture toughness testing, the crack tip opening displacement, fracture at high temperatures, fatigue crack growth.

Prerequisite: CBEMS 155 or ENGRMAE 156.

Restriction: Graduate students only.

ENGRMSE 259. Transmission Electron Microscopy. 4 Units.

The theory and operation of the transmission electron microscope (TEM), including the basic construction, electron optics, electron diffraction and reciprocal space, formation of image and electron diffraction information, microanalysis, and specimen preparation. Includes laboratory component.

Prerequisite: ENGRMSE 200.

Restriction: Graduate students only.

ENGRMSE 261. High Temperature Deformation of Engineering Materials. 4 Units.

Theoretical and practical aspects of creep and superplasticity in metallic and non-metallic systems are presented. Topics include: creep testing methods, diffusional creep, deformation mechanism maps, and superplasticity in non-metallics.

Prerequisite: ENGR 54 and (CBEMS 155 or ENGRMAE 156).

Restriction: Graduate students only.

ENGRMSE 262. Grain Boundaries & Interfaces in Nanocrystalline Materials. 4 Units.

Structure and character of grain boundaries and interfaces in solids including nanocrystalline materials. Role of grain boundaries in chemical segregation, fracture, deformation, creep, conductivity, diffusion and grain growth. Experimental techniques and computational methods used to characterize and model grain boundaries.

Prerequisite: ENGRMSE 200.

ENGRMSE 263. Computer Techniques in Experimental Materials Research. 4 Units.

Principles and practical guidelines of automated materials testing. Computer fundamentals, programming languages, data acquisition and control hardware, interfacing techniques, programming strategies, data analysis, data storage, safeguard procedures.

Restriction: Graduate students only.

Concurrent with CBEMS 163.

ENGRMSE 264. Scanning Electron Microscopy. 4 Units.

The theory and operation of the scanning electron microscope (SEM) and X-ray microanalysis. Topics covered include the basic design and electron optics, electron beam - specimen interactions, image formation and interpretation, X-ray spectrometry, and other related topics and techniques.

Prerequisite: ENGRMSE 200.

Restriction: Graduate students only.

ENGRMSE 265. Phase Transformations. 4 Units.

Advanced thermodynamics and kinetics of phase transformations and phase transitions.

Prerequisite: CBEMS 165 or CBEMS 240.

ENGRMSE 267. Environmentally Sustainable Manufacturing. 4 Units.

Multidisciplinary case study approach to environmentally sustainable manufacturing with a focus on electronic products. The course comprises of engineering, economic, public policy and industrial ecology aspects. Design, manufacture, policy and environmental impact will be reviewed as a function of the entire life-cycle of the materials from extraction through disposal or recycling.

Corequisite: concurrent with CBEMS 167.

Prerequisite: Graduate standing Engineering, Industrial Ecology or Public Policy.

Restriction: Grad students only

Concurrent with CBEMS 167.

ENGRMSE 268. Principles of Coatings, Thin Films and Multi-layers. 4 Units.

Principles and concepts underlying the engineering of coating systems, thin films and multilayers. Microstructure control, processing approaches, mechanical behavior and thermomechanical characteristics and characterization. Interfacial stability, cracking, delamination and thermal stress issues. Control of functional properties.

Prerequisite: ENGR 54.

ENGRMSE 273. Electroceramics & Solid State Electrochemical Systems. 4 Units.

Theory, underlying principles, experimental techniques, and applications of electroceramics and solid-state electrochemical systems. Links solid state physics, atomic structure, thermodynamics, defect chemistry, and transport processes to electrical properties of ceramics - spanning from insulators to fast-ion conductors and HT superconductors.

Prerequisite: ENGRMSE 200.

Department of Civil and Environmental Engineering

E4130 Engineering Gateway; (949) 824-5333

<http://www.eng.uci.edu/dept/cee>

Brett Sanders, **Department Chair**

Civil Engineering is described as the art of sustainably harnessing the natural environment to meet human needs. The success of this endeavor is evident all around us. The arid plain which greeted the early settlers

in Southern California has been transformed into a thriving regional community largely by the application of civil engineering.

The goal of the Civil Engineering curriculum is to prepare graduates for a career in practice, research, or teaching. At the undergraduate level a common core of fundamental subjects is provided, and students are required to specialize in their senior year. Specializations are offered in General Civil Engineering, Environmental Hydrology and Water Resource Engineering, Structural Engineering, and Transportation Systems Engineering. Concentrations are offered in Computer Applications, Engineering Management, Infrastructure Planning, and Mathematical Methods. Graduate opportunities are in three major thrust areas: structural analysis, design, and reliability; transportation systems engineering; and water resources and environmental engineering.

The career opportunities in civil engineering are varied. Graduates may look forward to long-term careers in major corporations, public bodies, the military, private consulting firms, or to being self-employed in private practice. History has shown a civil engineering education to be a good ground for many administrative and managerial positions.

Environmental Engineering involves designing environmental protection or remediation strategies for multiple resources—water, air, and soil, often with combinations of physical, chemical, and biological treatment methods in the context of a complex regulatory framework.

The goal of the Environmental Engineering curriculum is to prepare graduates with a strong basic science background, particularly in chemistry and biology, and to provide students with a broad exposure to several environmental engineering science disciplines. Courses relating to transport processes, water quality control, air quality control, and process design are included in the core.

Career opportunities in environmental engineering are diverse. Graduates generally find careers related to pollution control and the remediation of air, water, and soil environments.

- Civil Engineering
- Environmental Engineering

Undergraduate Major in Civil Engineering

Program Educational Objectives: Graduates of the Civil Engineering program will (1) establish a Civil Engineering career in industry, government, or academia and achieve professional licensure as appropriate; (2) demonstrate excellence and innovation in engineering problem solving and design in a global and societal context; (3) commit to lifelong learning and professional development to stay current in technology and contemporary issues; and (4) take on increasing levels of responsibility and leadership in technical and/or managerial roles. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The curriculum provides the opportunity to obtain a firm foundation in engineering science and to develop the techniques of analysis and design, which are basic for the successful practitioner. Emphasis is placed on developing problem-solving skills.

Admissions

High School Students: See School admissions (p. 308) information.

Transfer Students. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one year of chemistry (with laboratory), and one additional approved course for the major.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Civil Engineering

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements (p. 308).

Major Requirements

Mathematics and Basic Science Courses:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 2E	Multivariable Calculus
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D	Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
CHEM 1A- 1B	General Chemistry and General Chemistry

and select one of the following:

CHEM 1C- 1LC	General Chemistry and General Chemistry Laboratory
or	
CHEM 1LE	Accelerated General Chemistry Lab *

*and one Science Elective from the following:

CHEM 1C	General Chemistry
PHYSICS 7E	Classical Physics
EARTHSS 1	Introduction to Earth System Science
EARTHSS 3	Oceanography
EARTHSS 5	The Atmosphere
EARTHSS 7	Physical Geology
EARTHSS 11	Climate Change and Policy
EARTHSS 13	Global-Change Biology
EARTHSS 15	Introduction to Global Climate Change
EARTHSS 60A	Fundamental Processes in Earth and Environmental Studies
BIO SCI 55	Introduction to Ecology
BIO SCI 65	Biodiversity & Conservation
BIO SCI 93	From DNA to Organisms

Engineering Science Elective:

Select one of the following:

EECS 70A	Network Analysis I
ENGR 54	Principles of Materials Science and Engineering
ENGRMAE 80	Dynamics
ENGRMAE 91	Introduction to Thermodynamics
Additional mathematics and basic science course work may be required depending on the student's applied program.	

Engineering Topics Courses:

ENGRCEE 11	Methods II: Probability and Statistics
ENGRCEE 20	Introduction to Computational Engineering Problem Solving
ENGRCEE 21	Computational Problem Solving
ENGRCEE 30	Statics
ENGRCEE 81A	Civil Engineering Practicum I
ENGRCEE 81B	Civil Engineering Practicum II
ENGRCEE 110	Methods III: Modeling, Economics, and Management
ENGRCEE 111	Methods IV: Systems Analysis and Decision-Making
ENGRCEE 121	Transportation Systems I: Analysis and Design
ENGRCEE 130	Soil Mechanics
ENGRCEE 130L	Soil Mechanics Laboratory
ENGRCEE 150	Mechanics of Materials
ENGRCEE 150L	Mechanics of Materials Laboratory
ENGRCEE 151A	Structural Analysis
ENGRCEE 151C	Reinforced Concrete Design
ENGRCEE 160	Environmental Processes
ENGRCEE 170	Introduction to Fluid Mechanics
ENGRCEE 171	Water Resources Engineering
ENGRCEE 181A- 181B- 181C	Senior Design Practicum and Senior Design Practicum and Senior Design Practicum

Engineering Design Elective:

Select one of the following:

ENGRCEE 122	Transportation Systems II: Operations & Control
ENGRCEE 123	Transportation Systems III: Planning & Forecasting
ENGRCEE 155	Structural Steel Design (Students completing the specialization in Structural Engineering must take ENGRCEE 155.)
ENGRCEE 172	Groundwater Hydrology

Engineering Design elective cannot be counted toward the course requirement for a specialization and/or concentration.

Engineering Professional Topics Courses:

ECON 20A- 20B	Basic Economics I and Basic Economics II
ENGRCEE 60	Contemporary and Emerging Environmental Challenges
or SOCECOL E8	Introduction to Environmental Analysis and Design

ENGR 190W

Communications in the Professional World

Technical Electives:

Students must select one of the areas of specialization or concentration and complete the associated requirements, as shown below. Students select, with the approval of a faculty advisor, any additional engineering topics courses needed to satisfy school and departmental requirements.

(The nominal Civil Engineering program will require 187 units of courses depending on specialization or concentration to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

Specialization in General Civil Engineering:

Requires one course each from four of the following five options:

(1) Select one:

ENGRCEE 122	Transportation Systems II: Operations & Control
ENGRCEE 123	Transportation Systems III: Planning & Forecasting

(2) Select one:

ENGRCEE 152	Computer Methods in Structural Analysis and Design
ENGRCEE 153	Statically Indeterminate Structures
ENGRCEE 155	Structural Steel Design
ENGRCEE 156	Foundation Design

(3) Select one:

ENGRCEE 162	Introduction to Environmental Chemistry
ENGRCEE 163	Biological Treatment Process Design
ENGRCEE 165	Physical-Chemical Treatment Processes
ENGRCEE 167	Ecology of Coastal Waters

(4) Select one:

ENGRCEE 172	Groundwater Hydrology
ENGRCEE 173	Watershed Modeling
ENGRCEE 176	Hydrology
ENGRCEE 178	Fluid Mechanics of Open Channels

(5) Select one:

ENGRCEE 55	Land Measurements and Analysis
------------	--------------------------------

or courses from an approved list

Specialization in Environmental Hydrology and Water Resources:

Select four of the following:

ENGRCEE 162	Introduction to Environmental Chemistry
ENGRCEE 163	Biological Treatment Process Design
ENGRCEE 165	Physical-Chemical Treatment Processes
ENGRCEE 172	Groundwater Hydrology
ENGRCEE 173	Watershed Modeling
ENGRCEE 176	Hydrology
ENGRCEE 178	Fluid Mechanics of Open Channels

or courses from an approved list

Specialization in Structural Engineering:

ENGRCEE 155 Structural Steel Design (required for Engineering Design Elective)

ENGRCEE 153 Statically Indeterminate Structures

and select three of the following:

ENGRCEE 149	Introduction to Earthquake Engineering
ENGRCEE 151B	Structural Timber Design
ENGRCEE 152	Computer Methods in Structural Analysis and Design
ENGRCEE 156	Foundation Design
ENGRMAE 155	Composite Materials and Structures
ENGRMAE 157	Lightweight Structures

or courses from an approved list

Specialization in Transportation Systems Engineering:

ENGRCEE 122 Transportation Systems II: Operations & Control

ENGRCEE 123 Transportation Systems III: Planning & Forecasting

and select two of the following:

ENGRCEE 124	Transportation Systems IV: Freeway Operations and Control
ENGRCEE 125	Transportation and the Environment
EECS 70A	Network Analysis I
ENGRMAE 140	Introduction to Engineering Analysis
ENGRMAE 170	Introduction to Control Systems
ENGRMAE 171	Digital Control Systems

or courses from an approved list

Concentration in Computer Applications: ¹

Requires at least six courses selected from:

I&C SCI 6D	Discrete Mathematics for Computer Science
I&C SCI 31	Introduction to Programming
I&C SCI 32	Programming with Software Libraries
I&C SCI 33	Intermediate Programming
I&C SCI 46	Data Structure Implementation and Analysis
I&C SCI 52	Introduction to Software Engineering
EECS 40	Object-Oriented Systems and Programming

or selected I&C SCI, EECS, and other courses from an approved list

Concentration in Engineering Management: ^{1, 2}

MGMT 1 Introduction to Business and Management

and select five other courses from the following:

MGMT 102	Managing Organizational Behavior
MGMT 107	Introduction to Management Information Systems
MGMT 122	Communication in Organizations
MGMT 159	Design Management
MGMT 184	Optimization in Management
MGMT 196	Decision Analysis
MGMT 197	Probability Models in Management

and other courses from an approved list

Concentration in Infrastructure Planning: ¹

PP&D 4 Introduction to Urban Studies

PP&D 107 Urban and Regional Planning

and select at least four of the following:

ENGRCEE 123	Transportation Systems III: Planning & Forecasting
PP&D 108	Cities and Transportation
PP&D 109	Housing and Urban Development Policy
PP&D 110	Urban Economic Development Policy
PP&D 131	Environmental Sustainability I
PP&D 132	Environmental Sustainability II
PP&D 139	Water Resource Policy
PP&D 155	Urban Design Principles
PP&D 156	Urban Design and Graphics Studio

and other courses from an approved list

Concentration in Mathematical Methods: ¹

MATH 13 Introduction to Abstract Mathematics

MATH 140A Elementary Analysis

and select four of the following:

I&C SCI 6D	Discrete Mathematics for Computer Science
STATS 7	Basic Statistics
ENGRMAE 140	Introduction to Engineering Analysis
ENGRMAE 185	Numerical Analysis in Mechanical Engineering
MATH 105A- 105LA	Numerical Analysis and Numerical Analysis Laboratory
MATH 105B- 105LB	Numerical Analysis and Numerical Analysis Laboratory
MATH 107	Numerical Differential Equations
MATH 112A- 112B- 112C	Introduction to Partial Differential Equations and Applications and Introduction to Partial Differential Equations and Applications
MATH 118	The Theory of Differential Equations
MATH 130B- 130C	Probability and Stochastic Processes and Probability and Stochastic Processes
MATH 131A- 131B- 131C	Introduction to Probability and Statistics and Introduction to Probability and Statistics and Introduction to Probability and Statistics

and other courses from an approved list

- ¹ The Department does not control the scheduling of most courses associated with this concentration. Students considering this option should be aware that some of these courses may not be available on a regular basis.
- ² Prospective students must first be admitted to The Paul Merage School of Business undergraduate minor in Management, which requires completion of MGMT 1, ECON 20A, and ENGRCEE 11.

In addition, students must aggregate a minimum of 22 design units. Design unit values are indicated at the end of each course description. The faculty advisors and the Student Affairs Office can provide necessary guidance for satisfying the design requirements.

At most an aggregate total of 6 units of 199 or H199 courses may be used to satisfy degree requirements.

Students must obtain approval for their program of study and must see their faculty advisor at least once each year.

The sample program of study chart shown is typical for the accredited major in Civil Engineering. Students should keep in mind that this program is based upon a rigid set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Therefore, the course sequence should not be changed except for the most compelling reasons. (Students who select the Environmental Engineering specialization within the Civil Engineering major should follow the Civil Engineering sample program.) Students must have their programs approved by their faculty advisor. Civil Engineering majors must consult at least once every year with the academic counselors in the Student Affairs Office and with their faculty advisors.

Undergraduate Major in Environmental Engineering

Program Educational Objectives: Graduates of the Environmental Engineering program will (1) establish an Environmental Engineering career in industry, government, or academia and achieve professional licensure as appropriate; (2) demonstrate excellence and innovation in engineering problem solving and design in a global and societal context; (3) commit to lifelong learning and professional development to stay current in technology and contemporary issues; and (4) take on increasing levels of responsibility and leadership in technical and/or managerial roles. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The curriculum includes a core of mathematics, physics, chemistry, and biology, as well as engineering mechanics and methods courses. Students may select from a variety of environmental engineering courses to fulfill the remaining portion of the program and to focus their environmental engineering training in one or more of the following areas: water supply and resources, waste water management, or atmospheric systems and

air pollution control. Design experiences are integrated into environmental engineering courses, and seniors enroll in a capstone design course.

Admissions

High School Students: See School admissions (p. 308) information.

Transfer Students. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one year of general chemistry (with laboratory), and one additional approved course for the major.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Environmental Engineering

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements (p. 308).

Major Requirements

Mathematics and Basic Science Courses:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 2E	Multivariable Calculus
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D	Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
CHEM 1A- 1B- 1C	General Chemistry and General Chemistry and General Chemistry
CHEM 1LC- 1LD	General Chemistry Laboratory and General Chemistry Laboratory
CHEM 51A	Organic Chemistry

With approval of a faculty advisor, students select 4 units of Earth System Science and 4 units of Biological Sciences. Additional mathematics and basic science course work may be required depending on the student's applied program.

Engineering Topics Courses:

Students must complete a minimum of 19 units of engineering design.

Core Courses:

ENGRCEE 11	Methods II: Probability and Statistics
ENGRCEE 20	Introduction to Computational Engineering Problem Solving
ENGRCEE 21	Computational Problem Solving
ENGRCEE 30	Statics
ENGRCEE 80	Dynamics
or ENGRMAE 80	Dynamics

ENGRCEE 81A	Civil Engineering Practicum I
ENGRCEE 81B	Civil Engineering Practicum II
ENGRMAE 91	Introduction to Thermodynamics
ENGRCEE 110	Methods III: Modeling, Economics, and Management
ENGRCEE 130- 130L	Soil Mechanics and Soil Mechanics Laboratory
ENGRCEE 150- 150L	Mechanics of Materials and Mechanics of Materials Laboratory
ENGRCEE 170	Introduction to Fluid Mechanics
ENGRCEE 160	Environmental Processes
ENGRCEE 162	Introduction to Environmental Chemistry
ENGRCEE 181A- 181B- 181C	Senior Design Practicum and Senior Design Practicum and Senior Design Practicum

Engineering Elective Courses:

Students must take two courses each from two of the following three groups and one course from the remaining group.

Water Supply and Resources:

ENGRCEE 171	Water Resources Engineering
ENGRCEE 172	Groundwater Hydrology
ENGRCEE 173	Watershed Modeling
ENGRCEE 176	Hydrology
ENGRCEE 178	Fluid Mechanics of Open Channels
EARTHSS 132	Terrestrial Hydrology

Environmental Processes:

ENGRCEE 163	Biological Treatment Process Design
ENGRCEE 165	Physical-Chemical Treatment Processes
ENGRCEE 167	Ecology of Coastal Waters

Atmospheric Systems and Air Pollution Control:

ENGRMAE 110	Combustion and Fuel Cell Systems
ENGRMAE 115	Applied Engineering Thermodynamics
ENGRMAE 164	Air Pollution and Control
EARTHSS 112	Global Climate Change and Impacts

All additional engineering topics courses needed to satisfy school and major requirements must be approved by the faculty advisor. Environmental Engineering is an inherently interdisciplinary program. Students interested in pursuing a dual degree with Environmental Engineering may be able to substitute appropriate course work for required courses stated above. Please consult with an Engineering academic or faculty advisor.

Engineering Professional Topics Courses:

ECON 20A- 20B	Basic Economics I and Basic Economics II
ENGRCEE 60	Contemporary and Emerging Environmental Challenges
or SOCECOL E8	Introduction to Environmental Analysis and Design
ENGR 190W	Communications in the Professional World

(The nominal Environmental Engineering program requires 189 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

At most an aggregate total of 6 units of 199 or H199 courses may be used to satisfy degree requirements.

Program of Study

The sample program of study chart shown is typical for the major in Environmental Engineering. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their programs approved by their faculty advisor. Environmental Engineering majors must consult at least once every year with the academic counselors in the Student Affairs Office and with their faculty advisors.

- Civil Engineering
- Concentration in Environmental Engineering

Graduate Study in Civil Engineering

Civil Engineering addresses the technology of constructed environments and, as such, embraces a wide range of intellectual endeavors. The

Department of Civil and Environmental Engineering focuses its graduate study and research program on three areas: Structural Engineering, including engineering mechanics, advanced composites, structural dynamics, earthquake engineering, and reliability and risk assessment; Transportation Systems Engineering, including traffic operations and management, advanced information technology applications, travel behavior, and transportation systems analysis; Hydrology and Water Resources Engineering, including hydrology, water resources, and remote sensing.

The Department offers the M.S. and Ph.D. degrees in Civil Engineering.

At the point of application a student is required to identify a thrust area. Specifically, the three thrust areas that have been identified for the Civil Engineering Graduate program are: Structural Engineering, Transportation Systems Engineering, and Hydrology and Water Resources Engineering. Once admitted, an advisor will be assigned according to the thrust area a student has chosen. Financial support through research or teaching assistantships and a variety of fellowships and scholarships is available to qualified students.

Structural Engineering: The Structural Engineering area emphasizes the application of analytical, numerical, and experimental approaches to the investigation of constructed facilities and systems that support or resist various loads. The objective of the program is to prepare graduates for leadership positions in industry and academic institutions by providing an opportunity to learn state-of-the-art methodologies applied to significant structural engineering problems. Specific interests include sensors and structural health monitoring, composites for infrastructure applications, reliability and risk assessment of civil engineering systems, structural control, system identification and damage detection, performance-based earthquake engineering, soil-structure interaction, smart materials and structures, multi-scale mechanistic analysis, and sustainable green materials and infrastructural systems.

Transportation Systems Engineering: Among leading centers for transportation research, the Department of Civil and Environmental Engineering offers a graduate research area that is distinguished by its interdisciplinary approach to the study of current and emerging urban transportation issues and by its unique relationship with the UC Irvine Institute of Transportation Studies. The research area focuses on the planning, design, operation, and management of complex transportation systems. Emphasis is on the development of fundamental knowledge in engineering, systems analysis, modeling, and planning, combined with advanced computational techniques and information technologies, to address transportation problems affecting urban travel and goods movement.

Hydrology and Water Resources Engineering: This area focuses on the distribution and transport of water among and between land, atmosphere, and oceans, the supply of water for municipal, agricultural, and environmental uses, and water-related hazards such as flooding and drought. Mathematical and computational modeling is germane to research activity in this area as well as professional practice, so course work is designed to develop theory-based mathematical modeling skill, on the one hand, as well as computational modeling skill on the other. Course work emphasizes important fundamentals such as mass, energy and momentum conservation principles, applied to hydrologic systems, and also increasingly important remote sensing and information technologies. Interdisciplinary study is an important dimension to hydrology and water resources, particularly in the areas of water quality, ecology, infrastructure

systems, technology, and policy. Consequently, students are encouraged to take courses in these areas.

Master of Science Degree

The M.S. degree reflects achievement of an advanced level of competence for the professional practice of civil engineering. Two plans are available to those working toward the M.S. degree: a thesis option and a course work option. Opportunities are available for part-time study toward the M.S. degree. The Plan of Study for both options must be developed in consultation with a Faculty Advisor and approved by the Program Graduate Advisor.

Plan I: Thesis Option

The thesis option requires completion of 48 units of study (a maximum of ten of which can be taken for study in conjunction with the thesis research topic); the completion of an original research project; the writing of the thesis describing it; and review by a thesis committee. Of the 48 units, a minimum of 28 units must be in nonresearch, graduate-level approved engineering or related courses (numbered 200–289) with at least 16 of 28 units from the CEE Department. The remaining units may be earned as graduate-level course work, individual research, or upper-division undergraduate units (maximum ten units).

Plan II: Course Work Option

The course work option requires the completion of 48 units of study, at least 40 of which must be in nonresearch graduate-level approved engineering or related courses (numbered 200–289) with at least 28 of 40 units from the CEE Department. The remaining eight units may be earned as graduate-level course work, individual research, or upper-division undergraduate units.

NOTE: Students who entered prior to fall of 2012 should follow the course requirements outlined within the *Catalogue* of the year they entered. The change in number of units per course is not intended to change the course requirements for the degree nor to have any impact in the number of courses students are taking. As such, students will need to continue to meet the same high standards and plan of study requirements as previously required. Students will work with their advisor to create a plan of study encompassing the equivalent topical requirements, as well as the equivalent number of courses to the previous 36-unit requirement.

Concurrent Master's Degree Program with Planning, Policy, and Design

The Department of Civil and Environmental Engineering (CEE) and the Department of Planning, Policy, and Design (PPD) in the School of Social Ecology offer a concurrent degree program that allows students to earn both a master's in Civil Engineering (M.S.) and a master's in Urban and Regional Planning (M.U.R.P.) in two years (instead of more than three years if these degrees were pursued sequentially). The concurrent degree program requires 84 units of study and is organized around two tracks: (1) transportation systems, and (2) environmental hydrology and water resources. The program core comprises 15 graduate courses for the transportation systems track, and 13 graduate and two undergraduate courses for the environmental hydrology and water resources track.

Students choose between a thesis option and a comprehensive examination option. The thesis option requires completion of 84 units of study (a maximum of ten of which may be taken in conjunction with the thesis research); completion of an original research project and the writing of a thesis to describe it; completion of required core courses; and completion of enough units of approved electives to meet the total

requirement of 84 units. The comprehensive examination option also requires completion of 84 units of study as well as a professional report, which represents a substantial piece of planning practice, as the capstone event. These units of study include core courses and enough units of approved electives to meet the total requirement of 84 units, with no redundancy of core courses in either CEE or PPD. Electives may include as many as ten units of independent study or approved undergraduate courses.

Undergraduates seeking admission to the concurrent master's degree program should have a strong record of course work in disciplines related to civil engineering and urban planning, and they must meet the requirements for admission in both departments. See <http://www.eng.uci.edu/grad/programs/cee/admissions>, and <http://ppd.soceco.uci.edu/pages/admissions> for more information about these requirements.

Doctor of Philosophy Degree

The Ph.D. degree indicates attainment of an original and significant research contribution to the state-of-the-art in the candidate's field, and an ability to communicate advanced engineering concepts. The doctoral program is tailored to the individual needs and background of the student. The detailed program of study for each Ph.D. student is formulated in consultation with a faculty advisor who takes into consideration the objectives and preparation of the candidate. The program of study must be approved by the faculty advisor and the Graduate Advisor of the Department.

There are no specific course requirements. Within this flexible framework, the School maintains specific guidelines that outline the milestones of a typical doctoral program. All doctoral students should consult the Civil Engineering program's guidelines for details, but there are several milestones to be passed: admission to the Ph.D. program by the faculty; early assessment of the student's research potential (this includes a preliminary examination), research preparation, formal advancement to candidacy by passing the qualifying examination in the third year (second year for students who entered with a master's degree), completion of a significant research investigation, and the submission and oral defense of an acceptable dissertation. There is no foreign language requirement. Ph.D. students have to meet departmental research requirements as a research assistant or equivalent, with or without salary. The degree is granted upon the recommendation of the Doctoral Committee and the Dean of Graduate Studies. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

The Institute of Transportation Studies

The Institute of Transportation Studies at Irvine (ITS) is part of a multicampus research unit of the University of California. ITS Irvine consists of faculty, staff, and graduate and undergraduate students engaged at the forefront of knowledge in interdisciplinary transportation research and education. Currently, the Institute involves faculty and students from The Henry Samueli School of Engineering, the School of Social Sciences, the School of Social Ecology, The Paul Merage School of Business, and the Donald Bren School of Information and Computer Sciences. Collaborations with colleagues from outside the University are common. The mission of the Institute is to create and disseminate significant new knowledge to help solve society's pressing transportation problems, both in California and globally. It achieves this through cutting-edge activities in research, education, and professional outreach. A characteristic of ITS Irvine transportation research is a systems approach, focusing on the areas of planning, policy, economics (including pricing

and finance), operations (including traffic, transit, logistics and freight, and safety), energy and the environment, and information technologies. The Institute has close ties to the University's Transportation Science interdisciplinary graduate degree program. Students choosing to focus their studies in transportation will find strong interdisciplinary opportunities between the Department and ITS. See the Office of Research section of the *Catalogue* for additional information.

The Urban Water Research Center

The Urban Water Research Center focuses on five integrating water issues in urban areas: (1) supply, demand, and distribution; (2) water quality; (3) urban ecology; (4) water reuse; and (5) institutions and public policy. In each of these areas the Center enables the issues to be addressed in an integrated way from the points of view of biology, earth systems, economics, engineering public policy, and public health. The Center is the collaborative effort of the Department of Civil and Environmental Engineering, the Department of Earth System Science, and the School of Social Ecology.

Graduate Concentration in Environmental Engineering

E4130 Engineering Gateway; (949) 824-5333

C. Sunny Jiang, **Director and Graduate Advisor**

Faculty

William J. Cooper: Environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling

Donald Dabdub: Mathematical modeling of urban and global air pollution, dynamics of atmospheric aerosols, secondary organic aerosols, impact of energy generation on air quality, chemical reactions at gas-liquid interfaces

Nancy A. Da Silva: Bioremediation, genetic engineering

Russell L. Detwiler: Groundwater hydrology, contaminant fate and transport, subsurface process modeling, groundwater/surface-water interaction

Derek Dunn-Rankin: Combustion, optical particle sizing, particle aerodynamics, laser diagnostics and spectroscopy

James S. Famiglietti: Modeling and remote sensing of global hydrology; global change and water availability; sea level rise

Stanley B. Grant: Environmental engineering, inland and coastal water quality, coagulation and filtration of colloidal contaminants, environmental microbiology

C. Sunny Jiang: Water pollution microbiology, environmental biotechnology, aquatic microbial ecology

Michael Kleinman (*Adjunct*): Uptake and distribution of inhaled toxic materials in the respiratory tract; effects of air pollutants on cardio-pulmonary function

Mikael Nilsson: Advanced nuclear fuel cycles, actinide chemistry, liquid-liquid extraction, process development, radiolysis, detection and detectors for online process control

Betty H. Olson: Molecular applications for optimizing biological processes in wastewater treatment, environmental health, drinking water microbiology

Diego Rosso: Environmental process engineering, mass transfer, wastewater treatment, carbon- and energy-footprint analysis

G. Scott Samuelsen: Energy, fuel cells, hydrogen economy, propulsion, combustion and environmental conflict; turbulent transport in complex flows, spray physics, NO_x and soot formation, laser diagnostics and experimental methods; application of engineering science to practical propulsion and stationary systems; environmental ethics

Brett F. Sanders: Environmental and computational fluid dynamics, water resources engineering

Jean-Daniel M. Saphores: Transportation economics, planning and policy, environmental and natural resource economics and policy, quantitative methods

Soroosh Sorooshian: Hydrology, hydrometeorology and hydroclimate modeling, remote sensing, water sources management

Jasper A. Vrugt: Surface hydrology and soil physics

Students may pursue either the M.S. or Ph.D. degree in Engineering with a concentration in Environmental Engineering.

Environmental Engineering is an interdisciplinary program engaging faculty from departments in both engineering and the sciences, and managed by the Department of Civil and Environmental Engineering. Environmental Engineering addresses the development of strategies to control anthropogenic emissions of pollutants to the atmosphere, waterways, and terrestrial environment; the remediation of polluted natural systems; the design of technologies to treat waste, energy efficiency and environmentally responsible power generation; and the evaluation of contaminant fate in the environment.

Environmental Engineering requires a curriculum that provides students with an understanding of fundamentals in air- and water-quality sciences, contaminant fate and transport, global climate change, water resources, energy, and design concepts for pollutant emission control and treatment.

Required Background

The program core curriculum builds on environmental engineering fundamentals such as fluid mechanics, environmental chemistry, air quality, microbial processes, thermodynamics, and reactor theory and design. The interdisciplinary nature of the program allows students with a variety of science and engineering backgrounds to undertake studies in this field. Students admitted to the program lacking one or more fundamental courses can earn credit toward the M.S. degree by completing these courses at UC Irvine. Students entering the program are expected to have had exposure to engineering-level math that includes linear algebra, differential equations and statistics.

The degree to which each student meets the program's background requirement is determined by a faculty committee at the time of admission. Students with an insufficient background who are offered admission will be required to take a set of appropriate prerequisite undergraduate courses before entering the program or at the beginning of the program.

The table below is a general checklist for the required background and a list of undergraduate courses that may be used to fulfill the background requirements.

Required Background and Sample UCI Undergraduate Courses

Engineering Level Math:

Calculus, linear algebra, differential equations, probability and statistics

MATH 2D Multivariable Calculus

MATH 3D Elementary Differential Equations

Environmental Chemistry/Microbiology (two of the following):

Aquatic chemistry, atmosphere chemistry, organic chemistry, microbiology

EARTHSS 142 Atmospheric Chemistry

ENGRCEE 162 Introduction to Environmental Chemistry

CBEMS 112 Introduction to Biochemical Engineering

BIO SCI M122 General Microbiology

CHEM 51A Organic Chemistry

Fluid Mechanics/Momentum Transport:

Fluid statics and dynamics, thermodynamics

ENGRCEE 170 Introduction to Fluid Mechanics

ENGRMAE 130A Introduction to Fluid Mechanics

ENGRMAE 115 Applied Engineering Thermodynamics

CBEMS 45C Chemical Engineering Thermodynamics

Reactor Theory/Intro. Environmental Engineering:

Reaction kinetics, mass balance

CBEMS 110 Reaction Kinetics and Reactor Design

CBEMS 45A Chemical Processing and Materials Balances

CBEMS 125C Mass Transfer

ENGRCEE 160 Environmental Processes

Areas of Emphasis

There are four primary areas of emphasis within Environmental Engineering: Water Quality and Treatment, Hydrology and Water Resources, Air Quality, and Energy. To achieve the interdisciplinary objectives of the program, students entering the program without an M.S. degree are required to take at least one course from each of the four primary areas of Environmental Engineering, in addition to an Advanced Mathematics course, to fulfill the core requirements. Students can take additional elective courses in one of the four areas or from more than one area. Courses outside of the School of Engineering (i.e., Earth System Science, Public Health, Biological Sciences) can be used toward elective credits with the approval of the faculty advisor and the graduate director.

Core Requirement

Students entering the program without an M.S. degree must complete the following core requirements (22 units) before petitioning for an M.S. degree.

Advanced Mathematics area requirements: Select one of the three courses listed below

CBEMS 230 Applied Engineering Mathematics I

ENGRCEE 283 Mathematical Methods in Engineering Analysis

ENGRMAE 200A Engineering Analysis I

Water Quality and Treatment area requirements: Select one of the two courses listed below

ENGRCEE 263 Advanced Biological Treatment Processes

ENGRCEE 265 Physical-Chemical Treatment Processes

Hydrology and Water Resources area requirements: Select one of the three courses listed below

ENGRCEE 272 Groundwater Hydrology

ENGRCEE 276 Hydrology

ENGRCEE 277 Hydrologic Transport Fundamentals

Air Quality area requirements: Select one of the two courses listed below

ENGRMAE 215 Advanced Combustion Technology

ENGRMAE 261 Air Quality Modeling

Energy area requirements: Select one of the two courses listed below

ENGRCEE 264 Carbon Footprint Analysis for Water and Wastewater Systems

ENGRMAE 218 Sustainable Energy Systems

Environmental Seminar area requirements: Two quarters of

ENGRCEE 295 Seminars in Engineering

Elective Courses

Additional course requirements can be fulfilled using elective courses in any of the areas. Courses within each area are listed below.

Water Quality and Treatment:

CBEMS 218 Bioengineering with Recombinant Microorganisms

CBEMS 220 Transport Phenomena

ENGRCEE 260 Desalination

ENGRCEE 261 Applied Environmental Microbiology

ENGRCEE 263 Advanced Biological Treatment Processes

ENGRCEE 265 Physical-Chemical Treatment Processes

ENGRCEE 266 Drinking Water and Wastewater Biotechnology

ENGRCEE 267 Ecology of Coastal Waters

Hydrology and Water Resources:

ENGRCEE 271 Flow in Unsaturated Porous Media

ENGRCEE 272 Groundwater Hydrology

ENGRCEE 276 Hydrology

ENGRCEE 277 Hydrologic Transport Fundamentals

ENGRCEE 278 Fluid Mechanics of Open Channels

ENGRCEE 279 Hydrologic Computational Modeling

ENGRCEE 290 Merging Models and Data

Air Quality:

ENGRMAE 215 Advanced Combustion Technology

ENGRMAE 231 Fundamentals of Turbulence

ENGRMAE 233 Turbulent Free Shear Flows

ENGRMAE 261 Air Quality Modeling

EARTHSS 240 Atmospheric Chemistry and Physics

Energy:

ENGRMAE 214	Fuel Cell Fundamentals and Technology
ENGRMAE 218	Sustainable Energy Systems
ENGRMAE 260	Current Issues Related to Tropospheric and Stratospheric Processes
ENGRCEE 264	Carbon Footprint Analysis for Water and Wastewater Systems

Master of Science Degree

Two options are available for M.S. degree students: a thesis option and a comprehensive examination option. Both options require the completion of at least 48 units of study including two units of Seminar in Engineering.

Plan I. Thesis Option

A thesis option is available to students who prefer to conduct a focused research project. Students selecting this option must complete an original research investigation and a thesis, and obtain approval of the thesis by a thesis committee. Of the 48 required units, at least 28 units must be nonresearch, graduate-level courses including five core courses. A maximum of 16 M.S. research units and up to ten units of upper-division undergraduate elective courses may be applied to the degree with the prior approval of the Graduate Advisor.

Plan II. Comprehensive Examination Option

Alternatively, students may select a course work option in which they must successfully complete 48 units of study and pass a comprehensive examination. At least 36 units must be nonresearch, graduate-level courses including five core courses. A maximum of eight M.S. research units and up to ten units of upper-division undergraduate elective courses may be applied to the degree with the prior approval of the Graduate Advisor.

NOTE: Students who entered prior to fall of 2012 should follow the course requirements outlined within the *Catalogue* of the year they entered. The change in number of units per course is not intended to change the course requirements for the degree nor to have any impact in the number of courses students are taking. As such, students will need to continue to meet the same high standards and plan of study requirements as previously required. Students will work with their advisor to create a plan of study encompassing the equivalent topical requirements, as well as the equivalent number of courses to the previous 36-unit requirement.

Doctor of Philosophy Degree

The Ph.D. concentration in Environmental Engineering requires the achievement of original and significant research that advances the discipline. Doctoral students are selected on the basis of an outstanding record of scholarship and potential for research excellence.

Each student will match with a faculty advisor, and an individual program of study is designed by the student and their faculty advisor. Students entering with a master's degree are not required to fulfill the core requirements. However, in preparation for a successful preliminary examination, additional courses may be required in consultation with the graduate advisor and the program director. Students without a master's degree may be admitted into the Ph.D. program. However, these students will be required to complete the course work option requirements for the master's degree before registering for the preliminary exam. Within this flexible framework, the School maintains specific guidelines that

outline the milestones of a typical doctoral program. There are several milestones to be passed: admission to the Ph.D. program by the faculty, passage within the first two years of a preliminary examination, formal advancement to candidacy by passing a qualifying examination in the third year (or second year for students who entered with a master's degree), completion of a significant research investigation, and the submission and oral defense of an acceptable dissertation. During their research project, students are expected to enroll in at least 12 units of independent research per quarter.

The preliminary examination committee is comprised of three core examiners from different areas of Environmental Engineering. Students who fail the preliminary examination in the first year may retake the examination the following year. Students who fail the second attempt will not be allowed to continue in the program. Committees for Ph.D. qualifying examinations must have five members. Three members of this committee must be core faculty in the Environmental Engineering program. One member must be a UC faculty member from outside the Environmental Engineering program. The student's faculty advisor serves as the technical chair of the committee. The qualifying examination follows campus and The Henry Samueli School of Engineering guidelines and consists of an oral and written presentation of original work completed thus far, and a coherent plan for completing a body of original research. The student's dissertation topic must be approved by the student's doctoral committee. The degree is granted upon the recommendation of the doctoral committee and the Dean of Graduate Division. The normative time for completion of the Ph.D. is five years (four years for students who entered with a master's degree). The maximum time permitted is seven years.

Faculty

Amir AghaKouchak: Hydrology, hydroclimatology, data assimilation, remote sensing of critical global water resource issues

Alfredo H.-S. Ang (*Emeritus*): Structural and earthquake engineering, risk and reliability engineering

William J. Cooper: Environmental chemistry, advanced oxidation processes for water treatment, aquatic photochemistry of carbon cycling

Kristen Davis: Coastal oceanography, fluid mechanics, and turbulent flows

Russell L. Detwiler: Groundwater hydrology, contaminant fate and transport, subsurface process modeling, groundwater/surface-water interaction

Stanley B. Grant: Environmental engineering, inland and coastal water quality, coagulation and filtration of colloidal contaminants, environmental microbiology

Gary L. Guymon (*Emeritus*): Water resources, groundwater, modeling uncertainty

Kuo-Lin Hsu: Remote sensing of precipitation, hydrologic systems modeling, stochastic hydrology, water resources systems planning

R. (Jay) Jayakrishnan: Transportation systems analysis

C. Sunny Jiang: Water pollution microbiology, environmental biotechnology, aquatic microbial ecology

Wenlong Jin: Intelligent transportation systems, traffic flow theory, transportation network analysis

Anne Lemnitzer: Geotechnical and earthquake engineering, soil structure interaction, RC design, seismic monitoring

Michael G. McNally: Travel behavior, transportation systems analysis

Ayman S. Mosallam: Advanced composites and hybrid systems, seismic repair and rehabilitation of structures, blast mitigation and diagnostic/prognostic techniques for infrastructure security

Betty H. Olson: Molecular applications for optimizing biological processes in wastewater treatment, environmental health, drinking water microbiology

Gerard C. Pardo (Emeritus): Structural analysis, experimental structural dynamics

Wilfred W. Recker: Transportation systems modeling, traffic control, and urban systems analysis

Stephen G. Ritchie: Transportation engineering, advanced traffic management and control systems, development and application of emerging technologies in transportation

Diego Rosso: Environmental process engineering, mass transfer, wastewater treatment, carbon- and energy-footprint analysis

Brett F. Sanders: Environmental hydrodynamics, computational fluid dynamics, coastal water quality

Jean-Daniel M. Saphores: Transportation economics, planning and policy, environmental and natural resource economics and policy, quantitative methods

Jan Scherfig (Emeritus): Water reclamation, waste treatment processes, environmental engineering

Robin Shepherd (Emeritus): Structural dynamics, earthquake-resistant design

Masanobu Shinozuka (Emeritus): Continuum mechanics, structural dynamics, system reliability, risk assessment, remote sensing and GIS for disaster assessment

Soroosh Sorooshian: Hydrology, hydrometeorology and hydroclimate modeling, remote sensing, water sources management

Lizhi Sun: Micro- and nano-mechanics, composites and nanocomposites, smart materials and structures, multiscale modeling, elastography

Roberto Villaverde (Emeritus): Structural dynamics and earthquake engineering

Jasper A. Vrugt: Surface hydrology and soil physics

Jann N. Yang (Emeritus): System identification and damage detection, structural health monitoring, structural control, earthquake engineering, structural dynamics

Farzin Zareian: Structural engineering, performance-based earthquake engineering, structural reliability, structural control

Affiliated Faculty

Jacob Brouwer: High-temperature electrochemical dynamics, fuel cells, renewable and sustainable energy

Donald Dabdub: Mathematical modeling of urban and global air pollution, dynamics of atmospheric aerosols, secondary organic aerosols, impact of energy generation on air quality, chemical reactions at gas-liquid interfaces

Derek Dunn-Rankin: Combustion, optical particle sizing, particle aerodynamics, laser diagnostics and spectroscopy

James S. Famiglietti: Modeling and remote sensing of global hydrology; global change and water availability; sea level rise

Xiaogang Gao: Hydroclimatology, hydrology, fluid dynamics, engineering mathematics

Affiliated faculty are from the School of Physical Sciences and The Henry Samueli School of Engineering.

Courses

ENGRCEE 11. Methods II: Probability and Statistics. 4 Units.

Modeling and analysis of engineering problems under uncertainty. Engineering applications of probability and statistical concepts and methods.

(Design units: 0)

Prerequisite: (EECS 10 or EECS 12 or ENGRMAE 10 or CSE 41 or I&C SCI 31) and MATH 3A.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 20. Introduction to Computational Engineering Problem Solving. 4 Units.

Introduction to computer programming within a numerical computing environment (MATLAB or similar) including types of data representation, graphical display of data, and development of modular programs with application to engineering analysis and problem solving.

(Design units: 1)

Overlaps with ENGR 15.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 21. Computational Problem Solving. 4 Units.

Engineering analysis and problem solving using MATLAB (or similar), including matrix algebra, solving systems of linear and nonlinear equations, numerical integration of ordinary differential equations (ODEs) and coupled ODEs, and analysis of numerical errors.

(Design units: 1)

Corequisite: MATH 3D.

Prerequisite: ENGRCEE 20 and MATH 3A.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 30. Statics. 4 Units.

Addition and resolution of forces distributed forces, equivalent system of forces centroids, first moments, moments and products on inertia, equilibrium of rigid bodies, trusses, beams, cables.

(Design units: 0)

Corequisite: MATH 2D.

Prerequisite: MATH 2D and PHYSICS 7C.

Same as ENGR 30, ENGRMAE 30.

Restriction: School of Engineering majors have first consideration for enrollment.

ENGRCEE 55. Land Measurements and Analysis. 4 Units.

Introduction to surveying and land measurements. Use of the level and transit equipment, legal descriptions, subdivisions, topographic surveys, mapping vertical and horizontal curves. Analysis of surveying field data using manual methods, computer programs, and the COGO software system. Laboratory sessions.

(Design units: 0)

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 60. Contemporary and Emerging Environmental Challenges. 4 Units.

Introduces contemporary and emerging environmental challenges, illustrates links between human behavior, environmental policy and engineering practices, examines policy options in the context of current institutions, and introduces tools and frameworks to reach sound economic, social, and environmental solutions.

(Design units: 0)

(III)

ENGRCEE 80. Dynamics. 4 Units.

Introduction to the kinetics and dynamics of particles and rigid bodies. The Newton-Euler, Work/Energy, and Impulse/Momentum methods are explored for ascertaining the dynamics of particles and rigid bodies. An engineering design problem using these fundamental principles is also undertaken.

(Design units: 0.5)

Prerequisite: MATH 2D and PHYSICS 7C.

Same as ENGR 80, ENGRMAE 80.

Restriction: School of Engineering majors have first consideration for enrollment.

ENGRCEE 81A. Civil Engineering Practicum I. 3 Units.

Introduction to civil engineering through presentations on structural, environmental, water, and transportation systems. Introduction to graphics. Graphical visualization and communication using hand and computer sketching. Fundamentals of Computer Aided Design (CAD) using AutoCad. Laboratory sessions. Materials fee.

(Design units: 2)

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 81B. Civil Engineering Practicum II. 3 Units.

Principles of surveying; fundamentals of Geographic Information Systems (GIS); introduction to the state-of-the-art and future areas of the profession, including applications of advanced technology and computers; Introduction to visualization and communication of design concepts; laboratory sessions. Materials fee.

(Design units: 1)

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 110. Methods III: Modeling, Economics, and Management. 4 Units.

Analysis, modeling and management of civil engineering systems. Statistics and system performance studies, probabilistic models and simulation, basic economics and capital investments, project elements and organization, managerial concepts and network technique, project scheduling. Emphasis on real-world examples. Laboratory sessions.

(Design units: 1)

Prerequisite: ENGRCEE 11.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 111. Methods IV: Systems Analysis and Decision-Making. 4 Units.

Analysis and optimization for decision-making in civil and infrastructural systems. Topics include linear programming formulations and solution algorithms, network models, and logistical models. Emphasis is on project-level and managerial decision-making and selection from alternative designs.

(Design units: 1)

Prerequisite: MATH 3A and MATH 3D.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 121. Transportation Systems I: Analysis and Design. 4 Units.

Introduction to analysis and design of fundamental transportation system components, basic elements of geometric and pavement design, vehicle flow and elementary traffic, basic foundations of transportation planning and forecasting. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 81A.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 122. Transportation Systems II: Operations & Control. 4 Units.

Introduction to fundamentals of urban traffic engineering, including data collection, analysis, and design. Traffic engineering studies, traffic flow theory, traffic control devices, traffic signals, capacity and level of service analysis of freeways and urban streets. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 121.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 123. Transportation Systems III: Planning & Forecasting. 4 Units.

Theoretical foundations of transportation planning, design and analysis methods. Theory and application of aggregate and disaggregate models for land use development, trip generation, and destination, mode, and route choice. Transportation network analysis. Planning, design, and evaluation of system alternatives.

(Design units: 2)

Corequisite: ENGRCEE 110.

Prerequisite: ENGRCEE 121.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 124. Transportation Systems IV: Freeway Operations and Control. 4 Units.

Fundamentals of traffic on urban freeways, including data collection analysis, and design. Traffic engineering studies, traffic flow theory, freeway traffic control devices, capacity, and level of service analysis of freeways and highways. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 121.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 125. Transportation and the Environment. 4 Units.

Analysis of the impacts of motor vehicle transportation on the environment. Introduction to life cycle analysis applied to transportation. Basic economic tools for transportation externalities. Transportation planning, urban form, health, and the environment. Transportation sustainability.

(Design units: 0)

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 130. Soil Mechanics. 4 Units.

Mechanics of soils, composition and classification of soils, compaction, compressibility and consolidation, shear strength, seepage, bearing capacity, lateral earth pressure, retaining walls, piles.

(Design units: 0)

Prerequisite: ENGRCEE 150 and ENGRCEE 170.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 130L. Soil Mechanics Laboratory. 1 Unit.

Laboratory procedures of soil testing for engineering problems. Materials fee.

(Design units: 0)

Corequisite: ENGRCEE 130.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 149. Introduction to Earthquake Engineering. 4 Units.

Plate tectonics. Structural dynamics. Earthquake magnitude, intensity, and frequency. Seismic damage to structures. Earthquake load prediction including response spectra, normal mode, and direct integration techniques. The basis of building code earthquake load requirements for buildings.

(Design units: 2)

Prerequisite: ENGRCEE 11 and ENGRCEE 20 and ENGRCEE 80 and ENGRCEE 151A.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 150. Mechanics of Materials. 4 Units.

Stresses and strains, strain-stress diagrams, axial deformations, torsion, bending and shear stresses in beams, shear force and bending moment diagrams, combined stresses, principal stresses, Mohr's circle, deflection of beams, columns.

(Design units: 1)

Prerequisite: ENGRCEE 30.

Overlaps with ENGR 150, ENGRMAE 150.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 150L. Mechanics of Materials Laboratory. 1 Unit.

Experimental methods and fundamentals for mechanics of materials analysis. Materials fee.

(Design units: 0)

Corequisite: ENGRCEE 150.

Prerequisite: ENGRCEE 30.

Overlaps with ENGRMAE 150L.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 151A. Structural Analysis. 4 Units.

Fundamentals of structural analysis. Deformation of statically determinate structures. Influence lines. Structural systems. Load: dead, live, wind, and seismic.

(Design units: 0)

Prerequisite: ENGRCEE 150.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 151B. Structural Timber Design. 4 Units.

Design of timber structures. Beams, columns, beam-columns, roof, and connections.

(Design units: 3)

Prerequisite: ENGRCEE 151A.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 151C. Reinforced Concrete Design. 4 Units.

Ultimate strength design. Design of reinforced concrete beam sections. Design for shear and deflection. Design of columns. Design of isolated and combined footings. Laboratory sessions. Materials fee.

(Design units: 3)

Prerequisite: ENGRCEE 151A.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 152. Computer Methods in Structural Analysis and Design. 4 Units.

Matrix techniques for indeterminate framed structures. Computer implementation using the stiffness method. Software packages for design of reinforced concrete, steel, and/or timber structures.

(Design units: 2)

Prerequisite: ENGRCEE 151C.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 153. Statically Indeterminate Structures. 4 Units.

Fundamentals of statically indeterminate structures; strain energy and virtual work; energy theorems; method of virtual work, Castigliano theorem; method of consistent deformations; slope-deflection method; approximate methods; stiffness method for trusses.

(Design units: 0)

Prerequisite: ENGRCEE 151A.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 155. Structural Steel Design. 4 Units.

Design in steel of tension members, beams, columns, welded and bolted connections; eccentrically loaded and moment resistant joints; plate girders. Plastic design; load and resistance factor design. Composite construction; introduction to computer-aided design.

(Design units: 4)

Prerequisite: ENGRCEE 151A.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 156. Foundation Design. 4 Units.

Applications of soil mechanics principles to the analysis and design of shallow foundations, retaining walls, pile foundations, and braced cuts. Design criteria: bearing capacity, working loads and tolerable settlements, structural integrity of the foundation element. Damage from construction operations.

(Design units: 3)

Prerequisite: ENGRCEE 130 and ENGRCEE 151C.

Restriction: Civil Engineering majors have first consideration for enrollment.

ENGRCEE 160. Environmental Processes. 4 Units.

Introduction to environmental processes in air and water, mass balances, and transport phenomena. Fundamentals of water-quality engineering including water and wastewater treatment.

(Design units: 1)

Prerequisite: CHEM 1B and ENGRCEE 170.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 162. Introduction to Environmental Chemistry. 4 Units.

Basic concepts from general, physical, and analytical chemistry as they relate to environmental engineering. Particular emphasis on the fundamentals of equilibrium and kinetics as they apply to acid-base chemistry, gas solubility, and redox reactions. Laboratory sessions. Materials fee.

(Design units: 0)

Prerequisite: CHEM 1A and CHEM 1B and (CHEM 1LC or CHEM 1LE).

Restriction: Chemical Engineering, Civil Engineering, Environmental Engineering, and Mechanical Engineering majors have first consideration for enrollment.

ENGRCEE 163. Biological Treatment Process Design. 4 Units.

Design of biological treatment processes. Topics include attached and suspended growth, aeration, anaerobic systems, process control and economics. Design projects included. Materials fee.

(Design units: 4)

Prerequisite: ENGRCEE 160.

Restriction: Chemical Engineering, Civil Engineering, and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 165. Physical-Chemical Treatment Processes. 4 Units.

Theory and dynamics of physical and chemical separation processes in water and wastewater treatment. Topics include coagulation, sedimentation, filtration, gas-transfer, membrane separations and adsorption.

(Design units: 2)

Prerequisite: ENGRCEE 160.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

Concurrent with ENGRCEE 265.

ENGRCEE 167. Ecology of Coastal Waters. 4 Units.

Examines the ecological processes of the coastal environment. Investigates the causes of coastal ecosystem degradation and strategies to restore the ecosystem balance or prevent further coastal ecosystem health degradation.

(Design units: 0)

Prerequisite: CHEM 1A and CHEM 1B and (SOCECOL E8 or ENGRCEE 60).

Restriction: Environmental Engineering majors have first consideration for enrollment.

Concurrent with ENGRCEE 267.

ENGRCEE 170. Introduction to Fluid Mechanics. 4 Units.

Thermodynamic and mechanical fluid properties; fluid statics; control volume and differential approaches for mass, momentum, and energy; dimensional analysis and similarity.

(Design units: 1)

Corequisite: MATH 2E.

Prerequisite: PHYSICS 7C and ENGRCEE 20.

Overlaps with ENGRMAE 130A, CBEMS 125A, ENGRCEE 170.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 171. Water Resources Engineering. 4 Units.

Principles governing the analysis and design of water resource systems including pressurized pipelines, pipe networks, channels and ground water. Coverage of fluid mass, momentum and energy conservation, flow resistance and related laboratory measurements in different systems. Materials fee.

(Design units: 2)

Prerequisite: ENGRCEE 170.

Restriction: Chemical Engineering, Civil Engineering, and Environmental Engineering majors have first consideration for enrollment.

ENGRCEE 172. Groundwater Hydrology. 4 Units.

Topics include conservation of fluid mass, storage properties of porous media, matrix compressibility, boundary conditions, flow nets, well hydraulics, groundwater chemistry, and solute transport. Design projects and computer applications included.

(Design units: 2)

Prerequisite: ENGRCEE 170.

Restriction: Chemical Engineering, Civil Engineering, and Environmental Engineering majors have first consideration for enrollment.

Concurrent with ENGRCEE 272.

ENGRCEE 173. Watershed Modeling. 4 Units.

Basic principles of hydrologic modeling are practiced. Concepts of watershed delineation, land use change impact, design studies, and GIS tools are discussed. Focus on the USACE (HEC) software tools (HEC-HMS, and HEC-RAS) along with their associated GIS interfaces.

(Design units: 1)

Prerequisite: ENGRCEE 170 and ENGRCEE 176.

Restriction: Civil Engineering, Environmental Engineering, and Mechanical Engineering majors have first consideration for enrollment.

Concurrent with ENGRCEE 273.

ENGRCEE 176. Hydrology. 4 Units.

Elements of the hydrologic cycle including precipitation, infiltration, evapotranspiration, ground water, and runoff. Unit Hydrograph theory and routing methods. Introduction to precipitation/runoff relationship and watershed modeling. Statistical methods and flood frequency analysis.

(Design units: 2)

Prerequisite: ENGRCEE 170 or ENGRMAE 130A.

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

Concurrent with ENGRCEE 276.

ENGRCEE 178. Fluid Mechanics of Open Channels. 4 Units.

Fundamentals of fluid motion in open channels. Navier-Stokes equations and one-dimensional momentum and energy principles. Topics include rapidly varied flow, flow resistance and turbulence, gradually varied flow, unsteady flow, and computational methods for channel flow modeling.

(Design units: 1)

Prerequisite: (ENGRCEE 20 or ENGRMAE 10) and (ENGRCEE 170 or ENGRMAE 130A).

Restriction: Civil Engineering and Environmental Engineering majors have first consideration for enrollment.

Concurrent with ENGRCEE 278.

ENGRCEE 181A. Senior Design Practicum. 2 Units.

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 1)

Corequisite: ENGRCEE 121 or ENGRCEE 151C or ENGRCEE 162 or ENGRCEE 171.

Prerequisite: ENGRCEE 81A and ENGRCEE 81B and ENGRCEE 110 and ENGRCEE 130 and ENGRCEE 160. ENGRCEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Civil Engineering and Environmental Engineering majors only.

ENGRCEE 181B. Senior Design Practicum. 2 Units.

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 181A. ENGRCEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Grading Option: In progress only.

Restriction: Civil Engineering and Environmental Engineering majors only.

ENGRCEE 181C. Senior Design Practicum. 2 Units.

Team designs land development project including infrastructural, environmental, circulation aspects. Focus on traffic impact studies, design of roads, geometry, signals, geotechnical and hydrological analysis, design of structural elements, economic analysis. Oral/Written interim and final design reports. Laboratory sessions.

(Design units: 2)

Prerequisite: ENGRCEE 181B. ENGRCEE 181A and ENGRCEE 181B and ENGRCEE 181C must be taken in the same academic year.

Restriction: Civil Engineering and Environmental Engineering majors only.

ENGRCEE 195. Special Topics in Civil and Environmental Engineering. 1-4 Units.

Studies in selected areas of Civil and Environmental Engineering. Topics addressed vary each quarter.

(Design units: 1-4)

Prerequisite: Prerequisites vary.

Repeatability: Unlimited as topics vary.

ENGRCEE 198. Group Study. 1-4 Units.

Group study of selected topics in Civil and Environmental Engineering.

(Design units: 1-4)

Repeatability: May be repeated for credit unlimited times.

Restriction: Upper-division students only.

ENGRCEE 199. Individual Study. 1-4 Units.

For undergraduate Engineering majors in supervised but independent reading, research, or design. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Repeatability: May be taken for credit for 8 units.

ENGRCEE 199P. Individual Study. 1-4 Units.

Supervised independent reading, research, or design for undergraduate Engineering majors. Students taking individual study for design credit are to submit a written paper to the instructor and to the Undergraduate Student Affairs Office in the School of Engineering.

(Design units: 1-4)

Grading Option: Pass/no pass only.

Repeatability: May be repeated for credit unlimited times.

ENGRCEE 220A. Travel Demand Analysis I. 4 Units.

Fundamentals of transportation systems analysis. Theoretical aspects of travel demand. Travel behavior. Modeling of performance characteristics and costs of transportation modes. In-depth presentation of travel demand modeling techniques. Development of travel choice models including mode, route, and destination choice. Equilibrium.

Restriction: Graduate students only.

ENGRCEE 220B. Travel Demand Analysis II. 4 Units.

Methods of discrete choice analysis and their applications in the modeling of transportation systems. Emphasis on the development of a sound understanding of theoretical aspects of discrete choice modeling that are useful in many applications in travel demand analysis.

Prerequisite: ENGRCEE 220A.

Restriction: Graduate students only.

ENGRCEE 221A. Transportation Systems Analysis I. 4 Units.

Introduction to mathematical methods and models to address logistics and urban transportation problems. Techniques include stochastic models, queueing theory, linear programming, and introductory non-linear optimization.

Restriction: Graduate students only.

ENGRCEE 221B. Transportation Systems Analysis II. 4 Units.

Advanced mathematical methods and models to address logistics and urban transportation problems. Topics include network flows, advanced optimization techniques, network models, and heuristic algorithms.

Prerequisite: ENGRCEE 221A.

Restriction: Graduate students only.

ENGRCEE 224A. Transportation Data Analysis I. 4 Units.

Statistical analysis of transportation data sources. Analysis of categorical and ordinal data. Regression and advanced multivariate analysis methods such as discriminant analysis, canonical correlation, and factor analysis. Sampling techniques, sample error and bias, survey instrument design.

Restriction: Graduate students only.

ENGRCEE 225A. Transportation Planning Models I. 4 Units.

Analytical techniques for the study of interactions between transportation systems design and the spatial distribution of urban activities. Development of models of demographic and economic activity, land use, and facility location. Forecasting exogenous inputs to existing transportation models.

ENGRCEE 225B. Transportation Planning Models II. 4 Units.

Design and application of comprehensive transportation models. Network development, demand modeling, and equilibrium assignment. Model calibration, validation, prediction, and evaluation. Regional modeling, site impact analysis, and circulation studies. Design of transportation alternatives.

Restriction: Graduate students only.

ENGRCEE 226A. Traffic Flow Theory I. 4 Units.

Traffic measurement and fundamental speed-density-flow relationships. Kinematic models. Shock waves. Statistical-kinetic theory of traffic. Introductory car-following principles and stability. Gap acceptance. Platoon dispersion. Two-fluid model. Queueing process. Multi-regime and catastrophe models. Higher-order continuum models. Microscopic and macroscopic simulation.

Restriction: Graduate students only.

ENGRCEE 226B. Traffic Flow Theory II. 4 Units.

Advanced mathematical analysis of vehicular flow. Detailed treatise on car-following models. Fourier and Laplace analysis of stability problems. Perturbation analysis. Derivation of macroscopic traffic flow relationships from microscopic considerations. Advanced hydrodynamic theory.

Prerequisite: ENGRCEE 226A.

Restriction: Graduate students only.

ENGRCEE 228A. Urban Transportation Networks I. 4 Units.

Analytical approaches and algorithms to the formulation and solution of the equilibrium assignment problem for transportation networks. Emphasis on user equilibrium (UE) comparison with system optimal, mathematical programming formulation, supply functions, estimation. Estimating origin-destination matrices, network design problems.

Prerequisite: ENGRCEE 220A.

Restriction: Graduate students only.

ENGRCEE 228B. Urban Transportation Networks II. 3 Units.

Advanced analysis, optimization and modeling of Transportation networks. Topics include advanced static and dynamic traffic assignment algorithms, linear and nonlinear multi-commodity network flow optimization, network simplex, and network control problems.

Prerequisite: ENGRCEE 221A and ENGRCEE 228A

Restriction: Prerequisite required and Grad students only and Consent of instructor to enroll

ENGRCEE 229A. Traffic Systems Operations and Control I. 4 Units.

Introduction to operation, control and analysis of arterial and freeway traffic systems. Control concepts, traffic stream principles, detectors, local controllers, system masters, traffic signal and ramp metering timing principles, traffic measurement technologies, traffic delay principles.

Restriction: Graduate students only.

ENGRCEE 229B. Traffic Systems Operations and Control II. 4 Units.

Advanced topics related to operation, control, and analysis of arterial and freeway traffic systems. Control concepts, traffic stream principles, detectors, local controllers, system masters, traffic signal and ramp metering timing principles.

Prerequisite: ENGRCEE 229A.

Restriction: Graduate students only.

ENGRCEE 231. Foundation Engineering. 4 Units.

Essentials for design and analysis of structural members that transmit superstructure loads to the ground. Topics include subsurface investigations, excavation, dewatering, bracing, footing, mat foundations, piles and pile foundations, caissons and cofferdams, other special foundations.

Prerequisite: ENGRCEE 156.

Restriction: Graduate students only.

ENGRCEE 242. Advanced Strength of Materials. 4 Units.

Beams on elastic foundations. Combined axial and lateral loads. Curved beams. Unsymmetric bending. Shear center. Stresses and strains. Basic equations for theory of elasticity. Energy principles. Theory of torsion. Combined bending and torsion.

Prerequisite: ENGRCEE 150.

Restriction: Graduate students only.

ENGRCEE 243. Mechanics of Composite Materials. 4 Units.

Stress-strain relationship for orthotropic materials; invariant properties of an orthotropic lamina; biaxial strength theory for an orthotropic lamina; mechanics of materials approach to stiffness; elasticity approach to stiffness; classical lamination theory; strength of laminates; statistical theory of fatigue damage.

Restriction: Graduate students only.

ENGRCEE 245. Experimental Modal Analysis. 4 Units.

A thorough coverage of modal analysis techniques including digital signal processing concepts, structural dynamics theory, modal parameter estimation techniques, and application of modal measurement methods suitable for practical vibration analysis problems.

Prerequisite: ENGRCEE 247.

Restriction: Graduate students only.

ENGRCEE 247. Structural Dynamics. 4 Units.

Vibration of discrete and continuous mass elastic systems. Isolation and transmissibility. Dynamic recording instruments. Introduction to nonlinear theory of vibration. Response of structures to earthquake, traffic, and wind loads. Response spectra concepts. Normal mode analysis. Numerical integration techniques.

Prerequisite: ENGRCEE 80.

Restriction: Graduate students only.

ENGRCEE 249. Earthquake Engineering. 4 Units.

Earthquake magnitude, intensity, and frequency. Seismic damage to structures. Earthquake load prediction including response spectra, normal mode, and direct integration techniques. The basis of building code earthquake load requirements for buildings. Seismic response of special structures. Lifeline engineering.

Restriction: Graduate students only.

ENGRCEE 250. Finite Element Method in Structural Engineering. 4 Units.

Finite element concepts in structural engineering including variational formulations, shape functions, elements assembly, convergence and computer programming. Stiffness of truss, beam, and frame members, two- and three-dimensional solids, plate and shell elements. Static, vibration, stability, and inelastic analysis.

Restriction: Graduate students only.

ENGRCEE 254. Advanced Reinforced Concrete Behavior and Design. 4 Units.

Flexural strength of reinforced concrete elements. Flexural ductility of unconfined and confined members with axial loads. Shear and torsional behaviors. Strength of reinforced concrete ductile frames and shear walls. Reinforced concrete detailing.

Restriction: Graduate students only.

ENGRCEE 255. Advanced Behavior and Design of Steel Structures. 4 Units.

Advanced principles of structural steel design. Analysis and design of beam-column members, braced and unbraced frames for buildings, and plate girders. Review of seismic design provisions. Design of connections.

Prerequisite: ENGRCEE 153.

Restriction: Graduate students only.

ENGRCEE 258. Earthquake Resistant Structural Design. 4 Units.

Objectives of seismic design. Cyclic load-distortion characteristics of typical structural elements. Desirable structural form. Ductility and methods of achieving it. Use of energy dissipators. Project involving design of multistory, multibay rigid-jointed plane frame.

Restriction: Graduate students only.

ENGRCEE 259. Structural Stability. 4 Units.

Structural stability emphasizing the behavior of simple structural components that illustrate various modes of instability: Euler columns, beam columns, and instability of simple frames. Energy methods. Beam torsion and lateral instability. Elementary matrix methods compatible with finite element models.

Prerequisite: ENGRCEE 150 or ENGRMAE 150.

Restriction: Graduate students only.

ENGRCEE 260. Desalination. 4 Units.

Introduction of state of technology, costs and benefits, environmental issues, and implementation issues related to desalination. Emphasis on membrane processes and biofouling prevention.

Restriction: Graduate students only.

ENGRCEE 261. Applied Environmental Microbiology. 4 Units.

Microbes in the environment and their impact on human interactions. Microbiological application in solving environmental engineering problems.

Restriction: Graduate students only.

ENGRCEE 262. Environmental Chemistry II. 4 Units.

Advanced concepts from physical and organic chemistry as they relate to environmental engineering. Emphasis on equilibrium and kinetics as they apply to redox reactions, coordination, absorption, gas phase reactions, and ion exchange. Laboratory on GC, GC-MS, and ion chromatography.

Prerequisite: ENGRCEE 162.

Restriction: Graduate students only.

ENGRCEE 263. Advanced Biological Treatment Processes. 4 Units.

Analysis of biological processes in natural and engineered systems. Biological treatment processes, both aerobic and anaerobic, with emphasis on suspended growth systems including design consideration. Containment degradation or control covered. Includes laboratory on molecular tools used in wastewater treatment.

Prerequisite: ENGRCEE 160.

Restriction: Graduate students only.

ENGRCEE 264. Carbon Footprint Analysis for Water and Wastewater Systems. 4 Units.

Mass- and energy-flux balance analysis applied to water and wastewater treatment systems. Case studies include analysis and design of aeration, membrane separations, disinfection, water supply, and water reclamation processes.

Prerequisite: ENGRCEE 160.

ENGRCEE 265. Physical-Chemical Treatment Processes. 4 Units.

Theory and dynamics of physical and chemical separation processes in water and wastewater treatment. Topics include coagulation, sedimentation, filtration, gas transfer, membrane separations, and absorption.

Prerequisite: ENGRCEE 160.

Restriction: Graduate students only.

Concurrent with ENGRCEE 165.

ENGRCEE 266. Drinking Water and Wastewater Biotechnology. 4 Units.

Water and wastewater microbiology. Engineering principles, molecular aspects, and overview of microorganisms of importance to public health. Topics include aerobic and anaerobic wastewater treatment and disinfection of pathogens in water, wastewaters, and biosolids.

Prerequisite: CHEM 51A and ENGRCEE 160 and ENGRCEE 162.

Restriction: Graduate students only.

ENGRCEE 267. Ecology of Coastal Waters. 4 Units.

Examines the ecological processes of the coastal environment. Investigates the causes of coastal ecosystem degradation and strategies to restore the ecosystem balance or prevent further coastal ecosystem health degradation.

Prerequisite: CHEM 1A and CHEM 1B and (SOCECOI E8 or ENGRCEE 60).

Restriction: Graduate students only.

Concurrent with ENGRCEE 167.

ENGRCEE 271. Flow in Unsaturated Porous Media. 4 Units.

Fluid flow in the unsaturated zone (zone of aeration) of the subsurface. Soil-water physics, flow in regional groundwater systems, miscible displacement, mathematical modeling techniques.

Prerequisite: ENGRCEE 172.

Restriction: Graduate students only.

ENGRCEE 272. Groundwater Hydrology. 4 Units.

Topics include conservation of fluid mass, storage properties or porous media, matrix compressibility, boundary conditions, flow nets, well hydraulics, groundwater chemistry, and solute transport. Includes introduction to advanced topics in porous media. Design projects and computer applications included.

Prerequisite: ENGRCEE 170.

Restriction: Graduate students only.

Concurrent with ENGRCEE 172.

ENGRCEE 273. Watershed Modeling. 4 Units.

Basic principles of hydrologic modeling are practiced. Concepts of watershed delineation, land use change impact, design studies, and GIS tools are discussed. Focus on the USACE (HEC) software tools (HEC-HMS, and HEC-RAS) along with their associated GIS interfaces.

Prerequisite: ENGRCEE 170 and ENGRCEE 176.

Restriction: Graduate students only.

Concurrent with ENGRCEE 173.

ENGRCEE 274. Climate Data Analysis. 4 Units.

Trend analysis; statistical indices for diagnosing and detecting changes in extremes; nonstationary processes; extreme value analysis; multivariate extreme value methods; tail dependence estimation; uncertainties in observed and projected changes in climate extremes.

ENGRCEE 275. Topics in Coastal Engineering. 4 Units.

Linear wave theory. Wave properties: particle kinematics, energy propagation, shoaling, refraction, reflection, diffraction, and breaking. Wave statistics and spectra. Selected topics from: design of coastal structures; harbor engineering; littoral transport and shoreline morphology; and hydrodynamics of estuaries.

Prerequisite: ENGRCEE 11 and ENGRCEE 171.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ENGRCEE 276. Hydrology. 4 Units.

Elements of the hydrologic cycle including precipitation, infiltration, evapotranspiration, ground water, and runoff. Unit Hydrograph theory and routing methods. Introduction to precipitation/runoff relationship and watershed modeling. Statistical methods and flood frequency analysis. Discussion section covers advanced topics.

Prerequisite: ENGRCEE 170 or ENGRMAE 130A.

Restriction: Graduate students only.

Concurrent with ENGRCEE 176.

ENGRCEE 277. Hydrologic Transport Fundamentals. 4 Units.

Process description, mathematical and numerical modeling of transport processes in surface and ground water. Topics include advection, molecular diffusion, Taylor dispersion, mechanical dispersion in porous media, shear flow dispersion in channels, and turbulent jets and plumes.

Prerequisite: (ENGRCEE 20 or ENGRMAE 10) and ENGRMAE 278.

Restriction: Graduate students only.

ENGRCEE 278. Fluid Mechanics of Open Channels. 4 Units.

Fundamentals of fluid motion in open channels. Navier-Stokes equations and one-dimensional momentum and energy principles. Topics include rapidly varied flow, flow resistance and turbulence, gradually varied flow, unsteady flow, and computational methods for channel flow modeling.

Prerequisite: (ENGRCEE 20 or ENGRMAE 10) and (ENGRCEE 170 or ENGRMAE 130A).

Restriction: Graduate students only.

Concurrent with ENGRCEE 178.

ENGRCEE 279. Hydrologic Computational Modeling. 4 Units.

Computational modeling of multi-dimensional flow and scalar transport problems in surface and ground water. Topics include mathematical model formulation, numerical method selection, serial and parallel implementation, model verification and validation.

Prerequisite: ENGRCEE 272 and ENGRCEE 277 and ENGRCEE 278.

Restriction: Graduate students only.

ENGRCEE 281. Structural Reliability. 4 Units.

Applications of probability theory to reliability analysis of engineering structures. Theory of structural reliability. Estimation of static random loads. Reliability analysis of structural components and system. Monte Carlo simulation.

Prerequisite: ENGRCEE 11.

Restriction: Graduate students only.

ENGRCEE 283. Mathematical Methods in Engineering Analysis. 4 Units.

Matrices; vector calculus; eigenvalue problems; Fourier analysis; partial differential equations; special functions; numerical analysis; finite difference method.

ENGRCEE 284. Engineering Decision and Risk Analysis. 4 Units.

Develops applications of statistical decision theory in engineering. Presents the fundamental tools used in engineering decision making and analysis of risk under conditions of uncertainty. All concepts are presented and illustrated thoroughly with engineering problems.

Prerequisite: ENGRCEE 11.

Restriction: Graduate students only.

ENGRCEE 285. Reliability of Engineering Systems I. 4 Units.

Develops the basic concepts for the definition and assessment of safety and reliability of engineering systems. Includes probabilistic modeling of engineering problems, assessment of component reliability, systems reliability, and introduction to probability-based design.

Prerequisite: ENGRCEE 11.

Restriction: Graduate students only.

ENGRCEE 287. Random Vibrations. 4 Units.

Stationary stochastic processes. Spectral analysis. Stochastic response of linear, single and multi-degrees of freedom systems. Probabilistic approach to dynamic response of structures to random loadings.

Prerequisite: ENGRCEE 11 and (ENGRCEE 281 or ENGRCEE 284).

Restriction: Graduate students only.

ENGRCEE 289. Analysis of Hydrologic Systems. 4 Units.

Application of systems theory in hydrologic, land surface, biogeochemical modeling. Design, identification, and calibration of conceptual models. Principles of dynamic systems, modeling approaches, theory of linear systems, mathematical concepts of differential calculus, theoretical concepts of parameter estimation and optimization theory.

ENGRCEE 290. Merging Models and Data. 4 Units.

Introduction to optimization and data assimilation methods for model calibration and uncertainty quantification. Local, global and multi-method search. Bayesian analysis using Monte Carlo simulation with Random Walk Metropolis, and adaptive samplers. Filtering methods for recursive inference. Illustration using environmental models.

Restriction: Graduate students only.

ENGRCEE 291. Hydrologic Remote Sensing. 4 Units.

Introduction to principles of remote sensing and application in hydrology. Review of sensor systems, thermal and multispectral image processing, and image classification. Examples from remote sensing of hydrologic processes such as precipitation, soil moisture, and vegetation are covered.

Prerequisite: (ENGRCEE 20 or ENGRMAE 10) and ENGRCEE 276.

Restriction: Graduate students only.

ENGRCEE 295. Seminars in Engineering. 1-4 Units.

Seminars scheduled each year by individual faculty in major field of interest.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ENGRCEE 296. Master of Science Thesis Research. 1-16 Units.

Individual research or investigation conducted in preparation of the thesis required for the M.S. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

ENGRCEE 297. Doctor of Philosophy Dissertation Research. 1-16 Units.

Individual research or investigation conducted in preparation for the dissertation required for the Ph.D. degree in Engineering.

Repeatability: May be repeated for credit unlimited times.

ENGRCEE 298. Special Topics in Civil Engineering. 1-4 Units.

Presentation of advanced topics and special research areas in civil engineering.

Repeatability: Unlimited as topics vary.

Restriction: Graduate students only.

ENGRCEE 299. Individual Research. 1-16 Units.

Individual research or investigation under the direction of an individual faculty member.

Repeatability: May be repeated for credit unlimited times.

Restriction: Graduate students only.

Department of Electrical Engineering and Computer Science

2213 Engineering Hall; (949) 824-4821

<http://www.eng.uci.edu/dept/eecs>

Michael Green, **Department Chair**

Electrical Engineering and Computer Science is a broad field encompassing such diverse subject areas as computer systems, distributed computing, computer networks, control, electronics, photonics, digital systems, circuits (analog, digital, mixed-mode, and power electronics), communications, signal processing, electromagnetics, and physics of semiconductor devices. Knowledge of the mathematical and natural sciences is applied to the theory, design, and implementation of devices and systems for the benefit of society. The Department offers

two ABET-accredited undergraduate degrees: Electrical Engineering and Computer Engineering. In addition, the Department offers a joint undergraduate degree in Computer Science and Engineering, in conjunction with the Donald Bren School of Information and Computer Sciences; information is available in the Interdisciplinary Studies section of the *Catalogue*.

Some electrical engineers focus on the study of electronic devices and circuits that are the basic building blocks of complex electronic systems. Others study power electronics and the generation, transmission, and utilization of electrical energy. A large group of electrical engineers studies the application of these complex systems to other areas, including medicine, biology, geology, and ecology. Still another group studies complex electronic systems such as automatic controls, telecommunications, wireless communications, and signal processing.

Computer engineers are trained in various fields of computer science and engineering. They engage in the design and analysis of digital computers and networks, including software and hardware. Computer design includes topics such as computer architecture, VLSI circuits, computer graphics, design automation, system software, data structures and algorithms, distributed computing, and computer networks. Computer Engineering courses include programming in high-level languages such as Python, C++ and Java; use of software packages for analysis and design; design of system software such as operating systems; design of hardware/software interfaces and embedded systems; and application of computers in solving engineering problems. Laboratories in both hardware and software experiences are integrated within the Computer Engineering curriculum.

The undergraduate curricula in Electrical Engineering and Computer Engineering provide a solid foundation for future career growth, enabling graduates' careers to grow technically, administratively, or both. Many electrical and computer engineers will begin work in a large organizational environment as members of an engineering team, obtaining career satisfaction from solving meaningful problems that contribute to the success of the organization's overall goal. As their careers mature, technical growth most naturally results from the acquisition of an advanced degree and further development of the basic thought processes instilled in the undergraduate years. Administrative growth can result from the development of management skills on the job and/or through advanced degree programs in management.

Graduates of Electrical Engineering, Computer Engineering, and Computer Science and Engineering will find a variety of career opportunities in areas including wireless communication, voice and video coding, biomedical electronics, circuit design, optical devices and communication, semiconductor devices and fabrication, power systems, power electronics, computer hardware and software design, computer networks, design of computer-based control systems, application software, data storage and retrieval, computer graphics, pattern recognition, computer modeling, parallel computing, and operating systems.

Undergraduate Major in Computer Engineering

Program Educational Objectives: Graduates of the Computer Engineering program will (1) be engaged in professional practice at or beyond the entry level or enrolled in high-quality graduate programs

building on a solid foundation in engineering, mathematics, the sciences, humanities and social sciences, and experimental practice as well as modern engineering methods; (2) be innovative in the design, research and implementation of systems and products with strong problem solving, communication, teamwork, leadership, and entrepreneurial skills; (3) proactively function with creativity, integrity and relevance in the ever-changing global environment by applying their fundamental knowledge and experience to solve real-world problems with an understanding of societal, economic, environmental, and ethical issues. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The undergraduate Computer Engineering curriculum includes a core of mathematics, physics, and chemistry. Engineering courses in fundamental areas fill in much of the remaining curriculum.

Admissions

High School Students: See School admissions (p. 308) information.

Transfer Students. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one course in computational methods (e.g., C, C++), and two additional approved courses for the major.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Computer Engineering

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements (p. 308).

Major Requirements:

Mathematics and Basic Science Courses:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
I&C SCI 6D	Discrete Mathematics for Computer Science
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
EECS 145	Electrical Engineering Analysis

Engineering Topics Courses:

Students must complete a minimum of 26 units of engineering design.

Core Courses:

EECS 1	Introduction to Electrical Engineering and Computer Engineering
--------	---

EECS 12	Introduction to Programming
EECS 20	Computer Systems and Programming in C
EECS 22	Advanced C Programming
EECS 22L	Software Engineering Project in C Language
EECS 31	Introduction to Digital Systems
EECS 31L	Introduction to Digital Logic Laboratory
EECS 40	Object-Oriented Systems and Programming
EECS 50	Discrete-Time Signals and Systems
EECS 55	Engineering Probability
EECS 70A	Network Analysis I
EECS 70LA	Network Analysis I Laboratory
EECS 70B	Network Analysis II
EECS 70LB	Network Analysis II Laboratory
EECS 111	System Software
EECS 112	Organization of Digital Computers
EECS 112L	Organization of Digital Computers Laboratory
EECS 113	Processor Hardware/Software Interfaces
EECS 114	Engineering Data Structures and Algorithms
EECS 118	Introduction to Knowledge Management for Software and Engineering
EECS 119	VLSI
EECS 129A- 129B	Computer Engineering Senior Design Project and Computer Engineering Senior Design Project
EECS 148	Computer Networks
EECS 150	Continuous-Time Signals and Systems
EECS 170A	Electronics I
EECS 170LA	Electronics I Laboratory
EECS 170B	Electronics II
EECS 170LB	Electronics II Laboratory

With the approval of a faculty advisor, students select any additional engineering topics courses needed to satisfy school and department requirements.

Engineering Elective Courses:

Select, with approval of a faculty advisor, a minimum of three courses of engineering topics.

At least two courses must be chosen from:

EECS 116	Introduction to Data Management
EECS 117	Parallel Computer Systems
EECS 123	Introduction to Real-Time Distributed Programming
COMPSCI 142A	Compilers and Interpreters
Additionally, the following are approved as technical electives:	
EECS 101	Introduction to Machine Vision
EECS 141A	Communication Systems I

EECS 141B	Communication Systems II
EECS 152A	Digital Signal Processing
EECS 152B	Digital Signal Processing Design and Laboratory
EECS 170D	Integrated Electronic Circuit Design
EECS 199	Individual Study (up to 3 units; or EECS H199, up to 3 units)

Engineering Professional Topics Course:

ENGR 190W	Communications in the Professional World
-----------	--

At most an aggregate total of 6 units of EECS 199 or EECS H199 courses may be used to satisfy degree requirements; EECS 199 and EECS H199 courses are open to students with a 3.0 GPA or higher.

(The nominal Computer Engineering program will require 188 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

Planning a Program of Study

The sample program of study chart shown is typical for the major in Computer Engineering. Students should keep in mind that this program is based upon a sequence of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their program approved by their advisor. Computer Engineering majors must consult at least once every year with the academic counselors in the Student Affairs Office and with their faculty advisor.

Sample Program of Study — Computer Engineering

Freshman		
Fall	Winter	Spring
MATH 2A	MATH 2B	MATH 2D

Students must obtain approval for their program of study and must see their faculty advisor at least once each year.

Undergraduate Major in Computer Science and Engineering (CSE)

This program is administered jointly by the Department of Electrical Engineering and Computer Science (EECS) in The Henry Samueli School of Engineering and the Department of Computer Science in the Donald Bren School of Information and Computer Sciences. For information, see the Interdisciplinary Studies (p. 637) section of the *Catalogue*.

Requirements for the B.S. Degree in Computer Science and Engineering

All students must meet the University Requirements (p. 60).

Major Requirements: See the Interdisciplinary Studies (p. 637) section of the *Catalogue*.

Undergraduate Major in Electrical Engineering

Program Educational Objectives: Graduates of the Electrical Engineering program will (1) engage in professional practice in academia, industry, or government; (2) promote innovation in the design, research and implementation of products and services in the field of electrical engineering through strong communication, leadership and entrepreneurial skills; (3) engage in life-long learning in the field of electrical engineering. (Program educational objectives are those aspects of engineering that help shape the curriculum; achievement of these objectives is a shared responsibility between the student and UCI.)

The undergraduate Electrical Engineering curriculum is built around a basic core of humanities, mathematics, and natural and engineering science courses. It is arranged to provide the fundamentals of synthesis and design that will enable graduates to begin careers in industry or to go on to graduate study. UCI Electrical Engineering students take courses in network analysis, electronics, electronic system design, signal processing, control systems, electromagnetics, and computer engineering. They learn to design circuits and systems to meet specific needs and to use modern computers in problem analysis and solution.

Electrical Engineering majors have the opportunity to select a specialization in Electro-optics and Solid-State Devices; and Systems and Signal Processing. In addition to the courses offered by the Department, the major program includes selected courses from the Donald Bren School of Information and Computer Sciences.

Admissions

High School Students: See School admissions (p. 308) information.

Transfer Students. Preference will be given to junior-level applicants with the highest grades overall, and who have satisfactorily completed the following **required** courses: one year of approved calculus, one year of calculus-based physics with laboratories (mechanics, electricity and magnetism), one course in computational methods (e.g., C, C++), and two additional approved courses for the major.

Students are encouraged to complete as many of the lower-division degree requirements as possible prior to transfer. Students who enroll at UCI in need of completing lower-division course work may find that it will take longer than two years to complete their degrees. For further information, contact The Henry Samueli School of Engineering at (949) 824-4334.

Requirements for the B.S. Degree in Electrical Engineering

All students must meet the University Requirements (p. 60).

All students must meet the School Requirements (p. 308).

Major Requirements:

Mathematics and Basic Science Courses:

MATH 2A- 2B	Single-Variable Calculus and Single-Variable Calculus
MATH 2D	Multivariable Calculus
MATH 3A	Introduction to Linear Algebra
MATH 3D	Elementary Differential Equations
MATH 2E	Multivariable Calculus
CHEM 1A	General Chemistry
PHYSICS 7C	Classical Physics
PHYSICS 7LC	Classical Physics Laboratory
PHYSICS 7D- 7E	Classical Physics and Classical Physics
PHYSICS 7LD	Classical Physics Laboratory
PHYSICS 51A	Modern Physics
EECS 145	Electrical Engineering Analysis

Engineering Topics Courses:

Students must complete each of the following courses and accumulate a minimum of 28 units of engineering design:

EECS 1	Introduction to Electrical Engineering and Computer Engineering
EECS 10	Computational Methods in Electrical and Computer
EECS 31	Introduction to Digital Systems
EECS 31L	Introduction to Digital Logic Laboratory
EECS 50	Discrete-Time Signals and Systems
EECS 55	Engineering Probability
EECS 70A	Network Analysis I
EECS 70LA	Network Analysis I Laboratory
EECS 70B	Network Analysis II
EECS 70LB	Network Analysis II Laboratory
EECS 150	Continuous-Time Signals and Systems
EECS 160A	Introduction to Control Systems
EECS 160LA	Control Systems I Laboratory
EECS 170A	Electronics I
EECS 170LA	Electronics I Laboratory
EECS 170B	Electronics II
EECS 170LB	Electronics II Laboratory
EECS 170C	Electronics III
EECS 170LC	Electronics III Laboratory
EECS 180A	Engineering Electromagnetics I

EECS 189A- 189B	Electrical Engineering Senior Design Project I and Electrical Engineering Senior Design Project II
-----------------	--

Electrical Engineering Specialization:

Students must satisfy the requirements for one of the five specializations listed below.

Technical Elective Courses:

In addition to a specialization, and with approval of a faculty advisor, students must select a minimum of three other technical elective courses, comprising of at least 10 units. At least one of these courses must be from outside the student's specialization. All EECS courses not required for the major are approved as technical electives. Four (4) units of 199 course work count as one technical elective.

Engineering Professional Topics Course:

ENGR 190W	Communications in the Professional World
-----------	--

At most an aggregate total of 6 units of EECS 199 or EECS H199 courses may be used to satisfy degree requirements; EECS 199 and EECS H199 courses are open to students with a 3.0 GPA or higher.

(The nominal Electrical Engineering program will require 189 units of courses to satisfy all university and major requirements. Because each student comes to UCI with a different level of preparation, the actual number of units will vary.)

Specialization in Electronic Circuit Design:**Requires:**

EECS 170D	Integrated Electronic Circuit Design
EECS 170E	Analog and Communications IC Design

and select four of the following:

EECS 166A	Industrial and Power Electronics
EECS 166B	Advanced Topics in Industrial and Power Electronics
EECS 174	Semiconductor Devices
EECS 176	Fundamentals of Solid-State Electronics and Materials
EECS 179	Microelectromechanical Systems (MEMS)
EECS 182	Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design
EECS 188	Optical Electronics

Specialization in Semiconductors and Optoelectronics:**Requires:**

PHYSICS 52A	Fundamentals of Experimental Physics
EECS 174	Semiconductor Devices
EECS 188	Optical Electronics

and select three of the following:

ENGR 54	Principles of Materials Science and Engineering
EECS 170D	Integrated Electronic Circuit Design
EECS 176	Fundamentals of Solid-State Electronics and Materials

EECS 179	Microelectromechanical Systems (MEMS)
EECS 180B	Engineering Electromagnetics II
EECS 180C	Engineering Electromagnetics III

Specialization in RF, Antennas and Microwaves:**Requires:**

EECS 144	Antenna Design for Wireless Communication Links
EECS 180B	Engineering Electromagnetics II
EECS 182	Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design

and select three of the following:

PHYSICS 52A	Fundamentals of Experimental Physics
EECS 170D	Integrated Electronic Circuit Design
EECS 170E	Analog and Communications IC Design
EECS 180C	Engineering Electromagnetics III
EECS 188	Optical Electronics

Specialization in Digital Signal Processing:**Requires:**

EECS 152A	Digital Signal Processing
EECS 152B	Digital Signal Processing Design and Laboratory

and select four of the following:

EECS 20	Computer Systems and Programming in C
EECS 22	Advanced C Programming
EECS 101	Introduction to Machine Vision
EECS 112	Organization of Digital Computers
EECS 141A	Communication Systems I
EECS 141B	Communication Systems II
EECS 160B	Sampled-Data and Digital Control Systems

Specialization in Communications:**Requires:**

EECS 141A	Communication Systems I
EECS 141B	Communication Systems II

and select four of the following:

EECS 20	Computer Systems and Programming in C
EECS 22	Advanced C Programming
EECS 144	Antenna Design for Wireless Communication Links
EECS 148	Computer Networks
EECS 152A	Digital Signal Processing
EECS 152B	Digital Signal Processing Design and Laboratory
EECS 170E	Analog and Communications IC Design
EECS 188	Optical Electronics

Program of Study

Listed below are sample programs for each of the five specializations within Electrical Engineering. These sample programs are typical for the accredited major in Electrical Engineering. Students should keep in mind that this program is based upon a rigid set of prerequisites, beginning with adequate preparation in high school mathematics, physics, and chemistry. Therefore, the course sequence should not be changed except for the most compelling reasons. Students who are not adequately prepared, or who wish to make changes in the sequence for other reasons, must have their programs approved by their advisor. Electrical Engineering majors must consult with the academic counselors in the Student Affairs Office and with their faculty advisors at least once a year.

Graduate Study in Electrical and Computer Engineering

The Department offers M.S. and Ph.D. degrees in Electrical and Computer Engineering with a concentration in Electrical Engineering and in Computer Engineering. Because most graduate courses are not repeated every quarter, students should make every effort to begin their graduate program in the fall.

Detailed descriptions of the two concentrations are as follows.

Electrical Engineering Concentration (EE)

The Electrical Engineering faculty study the following areas: optical and solid-state devices, including quantum electronics and optics, integrated electro-optics and acoustics, design of semiconductor devices and materials, analog and mixed-signal IC design, microwave and microwave devices, and scanning acoustic microscopy; systems engineering and signal processing, including communication theory, machine vision, signal processing, power electronics, neural networks, communications networks, systems engineering, and control systems. Related communication networks topics are also addressed by the Networked Systems M.S. and Ph.D. degrees (listed in the Interdisciplinary Studies section of the *Catalogue*).

Computer Engineering Concentration (CPE)

The concentration in Computer Engineering provides students with a solid base in the design, development, and evaluation of computer systems. Thrust areas include computer architecture, software, and embedded systems, but the program is highly customizable to the specific interests of the student. The research activities of the faculty in this concentration include parallel and distributed computer systems, distributed software architectures and databases, ultra-reliable real-time computer systems, VLSI architectures, reconfigurable computing, computer design automation, low-power design, embedded systems, computer communication protocols, computer networks, security, programming languages for parallel/distributed processing, knowledge management, service-oriented architectures, and software engineering.

Master of Science Degree General Requirements

Two plans are offered for the M.S. degree: a thesis option and a comprehensive examination option. For either option, students are required to develop a complete program of study with advice from their faculty advisor. The graduate advisor must approve the study plan. Part-time study toward the M.S. degree is available. The program of study must be completed within four calendar years from first enrollment.

Plan I: Thesis Option

The thesis option requires completion of 12 courses of study; an original research investigation; the completion of an M.S. thesis; and approval of the thesis by a thesis committee. The thesis committee is composed of three full-time faculty members with the faculty advisor of the student

serving as the chair. Required undergraduate core courses and graduate seminar courses, such as EECS 292, EECS 293, EECS 294, and EECS 295, may not be counted toward the 12 courses. No more than one course of EECS 299 and one undergraduate elective course may be counted toward the 12 courses. Up to four of the required 12 courses may be from EECS 296 (M.S. Thesis Research) with the approval of the student's thesis advisor. Additional concentration-specific requirements are as follows; a list of core and concentration courses is given at the end of this section.

Electrical Engineering Concentration:

At least seven concentration courses in the Electrical Engineering concentration (EE) must be completed.

Computer Engineering Concentration:

Three core courses in the Computer Engineering concentration (CpE) must be completed with a grade of B (3.0) or better. At least four additional concentration or approved courses must also be completed.

Plan II: Comprehensive Examination Option

The comprehensive examination option requires the completion of 12 courses and a comprehensive examination. Only one EECS 299 course can be counted if the EECS 299 course is four or more units. Undergraduate core courses and graduate seminar courses, such as EECS 292, EECS 293, EECS 294, and EECS 295, may not be counted toward the 12 courses requirement. No more than two of undergraduate elective courses may be counted. In fulfillment of the comprehensive examination element of the M.S. degree program, students will complete two term paper-length reports on the current state-of-the-art of two separate technical fields corresponding to the concentration area. The term papers are completed as part of the end-of-course requirements for EECS 294 Electrical Engineering and Computer Science Colloquium, two courses of which are needed to fulfill degree requirements. Each term paper must be completed with a grade of B or better; and each Colloquium section used to meet M.S. degree requirements must be completed with a satisfactory grade. Both Colloquium sections must be completed at the student's first opportunity upon enrollment in the ECE graduate program. Additional concentration-specific requirements are as follows; a list of core and concentration courses is given at the end of this section.

Electrical Engineering Concentration:

Students enrolled in the Electrical Engineering (EE) concentration who choose the Comprehensive Examination option must select one of the following plans of study.

Circuits and Devices Plan of Study:

Select four of the following:

EECS 270A	Advanced Analog Integrated Circuit Design I
EECS 270B	Advanced Analog Integrated Circuit Design II
EECS 277A	Advanced Semiconductor Devices I
EECS 277B	Advanced Semiconductor Devices II
EECS 280A	Advanced Engineering Electromagnetics I
EECS 285A	Optical Communications

At least five additional courses from the list of EE concentration courses must be completed.

Systems Plan of Study:

Select four of the following: ¹

EECS 240	Random Processes
----------	------------------

EECS 241A	Digital Communications I
EECS 250	Digital Signal Processing I
EECS 251A	Detection, Estimation, and Demodulation Theory
EECS 260A	Linear Systems I
EECS 267A	Industrial and Power Electronics
At least five additional courses from the list of EE concentration courses must be completed.	

Computer Engineering Concentration:

Three core courses in the Computer Engineering concentration (CpE) must be completed with a grade of B (3.0) or better. At least five additional concentration or approved courses must also be completed.

- ¹ If all six courses are not offered in an academic year, students who graduate in that year can petition to replace the courses that are not offered by EECS 242 and/or EECS 244.

List of Concentration Courses

Electrical Engineering Concentration:

EECS 202A- 202B	Principles of Imaging and Techniques in Medical Imaging I: X-ray, Nuclear, and NMR Imaging
EECS 203A	Digital Image Processing
EECS 210	Modeling and Rendering for Image Synthesis
EECS 213	Computer Architecture
EECS 215	Design and Analysis of Algorithms
EECS 217	VLSI System Design
EECS 240	Random Processes
EECS 241A- 241B	Digital Communications I and Digital Communications II
EECS 242	Information Theory
EECS 243	Error Correcting Codes
EECS 244	Wireless Communications
EECS 245	Space-Time Coding
EECS 248A	Computer and Communication Networks
EECS 250	Digital Signal Processing I
EECS 251A- 251B	Detection, Estimation, and Demodulation Theory and Detection, Estimation, and Demodulation Theory
EECS 260A	Linear Systems I
EECS 261A	Linear Optimization Methods
EECS 267A- 267B	Industrial and Power Electronics and Topics in Industrial and Power Electronics
EECS 270A	Advanced Analog Integrated Circuit Design I
EECS 270B- 270C- 270D	Advanced Analog Integrated Circuit Design II and Design of Integrated Circuits for Broadband Applications and Radio-Frequency Integrated Circuit Design
EECS 272	Topics in Electronic System Design

EECS 274	Biomedical Microdevices (MEMOS)
EECS 275A- 275B	Very Large Scale Integration (VLSI) Project and Very Large Scale Integration (VLSI) Project Testing
EECS 277A- 277B- 277C	Advanced Semiconductor Devices I and Advanced Semiconductor Devices II and Nanotechnology
EECS 278	Micro-System Design
EECS 279	Micro-Sensors and Actuators
EECS 280A	Advanced Engineering Electromagnetics I
EECS 280B	Advanced Engineering Electromagnetics II
EECS 282	Monolithic Microwave Integrated Circuit (MMIC) Analysis and Design II
EECS 285A	Optical Communications
EECS 285B	Lasers and Photonics

Computer Engineering Concentration:

EECS 210	Modeling and Rendering for Image Synthesis
EECS 211	Advanced System Software ¹
EECS 213	Computer Architecture ¹
EECS 215	Design and Analysis of Algorithms ¹
EECS 217	VLSI System Design
EECS 218	Distributed Computer Systems
EECS 219	Distributed Software Architecture and Design
EECS 221	Topics in Computer Engineering
EECS 222	Embedded System Modeling
EECS 223	Real-Time Computer Systems
EECS 224	Fault-Tolerant Computing
EECS 225	Embedded Systems Design
EECS 226	Embedded System Software
EECS 230	Energy Efficiency
EECS 248A	Computer and Communication Networks
COMPSCI 233	Networking Laboratory
COMPSCI 234	Advanced Networks
COMPSCI 236	Wireless and Mobile Networking

¹ This course is also a core course.

NOTE: Students who entered prior to fall of 2012 should follow the course requirements outlined within the *Catalogue* of the year they entered. The change in number of units per course is not intended to change the course requirements for the degree nor to have any impact in the number of courses students are taking. As such, students will need to continue to meet the same high standards and plan of study requirements as previously required. Students will work with their advisor to create a plan of study encompassing the equivalent topical requirements, as well as the equivalent number of courses to the previous 36-unit requirement.

In addition to fulfilling the course requirements outlined above, it is a University requirement for the Master of Science degree that students fulfill a minimum of 36 units of study.

Doctor of Philosophy Degree General Requirements
