

Year	What will it look like?	Guidance
<p>EYFS</p>	<p>Jumping along number lines in steps of...</p>  <p>Using a 100 square to look at patterns of multiples</p>  <p>Grouping—counting in equal sized groups.</p>  <p>Doubling— using problem solving.</p> 	<p>Guidance</p> <p><i>Guidance in italics taken from the non-statutory guidance in the 'National Curriculum in England' document 2014.</i></p>
<p>Stage 1</p>	<p>Pupils solve one-step problems involving multiplication by calculating the answer using concrete objects, pictorial representations and arrays with the support of the teacher.</p> <p>E.g. $4 \times 3 =$</p>      <p>e.g. There were 5 knights who had 3 weapons each. How many weapons did they have altogether? 10 Lords live in a Castle. How many Lords would there be if there was 4 Castles?</p>	<p><i>They make connections between arrays, number patterns and counting in 2s, 5s and 10s.</i></p>

Year	What will it look like?	Guidance
<p>Stage 2</p>	<p>Pupils calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (\times), division (\div) and equals ($=$) signs.</p> <p>$2 \times 5 = 10$ $12 = 4 \times 3$</p> <p>Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods and multiplication and division facts, including problems in contexts, e.g.</p> <p>3 friends have 5 pencils each. How many pencils do they have altogether?</p>  <p>$5 \times 3 =$ '5 multiplied by 3' or '5 times 3' or '5, three times'</p> <p>5×3</p> 	<p><i>Guidance in italics taken from the non-statutory guidance in the 'National Curriculum in England' document 2014.</i></p> <p><i>Pupils use a variety of language to describe multiplication and division. Pupils are introduced to the multiplication tables.</i></p> <p><i>They practise to become fluent in the 2, 5 and 10 multiplication tables and connect them to each other. They connect the 10 multiplication table to place value and the 5 multiplication table to the divisions on the clock face. They begin to use other multiplication tables and recall multiplication facts, including using related division facts to perform written and mental calculations.</i></p> <p><i>Pupils work with a range of materials and contexts in which multiplication and division relate to grouping and sharing discrete and continuous quantities, to arrays and to repeated addition. They begin to relate these to fractions and measures (for example, $40 \div 2 = 20$, 20 is half of 40). They use commutativity and inverse relations to develop multiplicative reasoning (for example, $4 \times 5 = 20$ and $20 \div 5 = 4$)</i></p>
<p>Stage 3</p>	<p>Build on their understanding of repeated addition and arrays to multiply two digits by one digit using tables they know, e.g. 13×3</p>  <p>Informal recording of partitioned numbers, $15 \times 5 = 10 \times 5$ and 5×5 or $10 \times 5 + 5 \times 5$</p>	<p><i>Pupils continue to practise their mental recall of multiplication tables when they are calculating mathematical statements in order to improve fluency. Through doubling, they connect to 2, 4 and 8 multiplication tables.</i></p> <p><i>Pupils develop efficient mental methods, for example, using commutativity and associativity (for example $4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240$) and multiplication and division facts (for example, using $3 \times 2 = 6$, $6 \div 3 = 2$ and $2 = 6 \div 3$) to derive related facts (for example, $30 \times 2 = 60$, $60 \div 3 = 20$ and $20 = 60 \div 3$).</i></p>

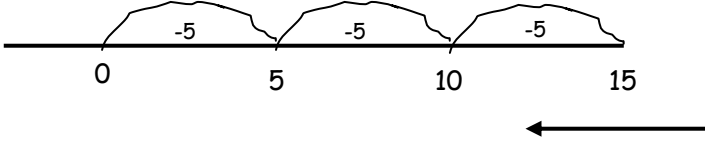

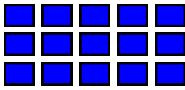

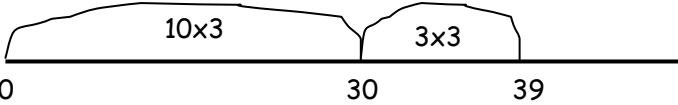

Year	What will it look like?	Guidance																			
<p>Stage 3 cont...</p>	<p>Link arrays to introduce grid multiplication to multiply TU by U, e.g. 13×6</p> <div style="text-align: center;"> <table style="margin: auto;"> <tr> <td></td> <td style="text-align: center;">10</td> <td style="text-align: center;">3</td> <td></td> </tr> <tr> <td style="text-align: center;">6</td> <td colspan="2">  </td> <td style="text-align: center;">$60 + 18 = 78$</td> </tr> <tr> <td></td> <td colspan="2">$13 \times 6 = 78$</td> <td></td> </tr> </table> </div> <p>Use grid method to multiply TU by U, progressing to formal written methods when appropriate. (see stage 4).</p> <table style="margin: auto;"> <tr> <td style="border: 1px solid black; padding: 2px;">x</td> <td style="border: 1px solid black; padding: 2px;">20</td> <td style="border: 1px solid black; padding: 2px;">3</td> <td rowspan="2" style="padding: 0 10px;">$= 92$</td> </tr> <tr> <td style="border: 1px solid black; padding: 2px;">4</td> <td style="border: 1px solid black; padding: 2px;">80</td> <td style="border: 1px solid black; padding: 2px;">12</td> </tr> </table> <p>Scaling</p>  <p>Relate multiplication to scaling. My string is 12cm long. Cut a piece of string 3 times longer.</p>		10	3		6			$60 + 18 = 78$		$13 \times 6 = 78$			x	20	3	$= 92$	4	80	12	<p><i>Pupils develop reliable written methods for multiplication and division, starting with calculations of two-digit numbers by ne-digit numbers and progressing to the formal written methods of short multiplication and division.</i></p> <p><i>Pupils solve simple problems in contexts, deciding which of the four operations to use and why. These include measuring and scaling contexts, (for example, four times as high, eight times as long etc.) and correspondence problems in which 'm' objects are connected to 'n' objects, (for examples, 3 hats and 4 coats, how many outfits?)</i></p>

They begin to relate these to fractions and measures (for example, $40 \div 2 = 20$, 20 is half of 40). They use commutativity and inverse relations to develop multiplicative reasoning (for example, $4 \times 5 = 20$ and $20 \div 5 = 4$).</i></p>
<p>Stage 3</p>	<p>Pupils write and calculate mathematical statements for division using the multiplication tables that they know, using mental and progressing to formal written methods.</p> <p>Use knowledge of multiplication facts and repeated addition to answer division questions.</p> <p>E.g. How many 3s are there in 39?</p>  <p>Extending to use all tables that pupils know to explore the idea of the remainder.</p>	<p><i>Pupils continue to practise their mental recall of multiplication tables when they are calculating mathematical statements in order to improve fluency. Through doubling, they connect to 2, 4 and 8 multiplication tables.</i></p> <p><i>Pupils develop efficient mental methods, for example, using commutativity and associativity (for example $4 \times 12 \times 5 = 4 \times 5 \times 12 = 20 \times 12 = 240$) and multiplication and division facts (for example, using $3 \times 2 = 6$, $6 \div 3 = 2$ and $2 = 6 \div 3$) to derive related facts (for example, $30 \times 2 = 60$, $60 \div 3 = 20$ and $20 = 60 \div 3$).</i></p>

Year	What will it look like?	Guidance
<p>Stage 3 cont...</p>	<p>Pupils explore the use of scaling as a model for division, e.g. My ribbon is 24cm long, can you cut a ribbon 3 times shorter?</p>  <p>Pupils are introduced to the formal written method of short division with whole number answers, using the image of the array and place value apparatus initially.</p>  <p>Pupils progress to use the formal written method of short division.</p> $\begin{array}{r} 14 \\ 7 \overline{) 98} \end{array}$	<p><i>Guidance in italics taken from the non-statutory guidance in the 'National Curriculum in England' document 2014.</i></p> <p><i>Pupils develop reliable written methods for multiplication and division, starting with calculations of two-digit numbers by one-digit numbers and progressing to the formal written methods of short multiplication and division.</i></p> <p><i>Pupils solve simple problems in contexts, deciding which of the four operations to use and why. These include measuring and scaling contexts, (for example, four times as high, eight times as long etc.) and correspondence problems in which 'm' objects are connected to 'n' objects, (for examples, 3 hats and 4 coats, how many outfits?)</i></p>
<p>Stage 4</p>	<p>Pupils continue to use the number line to support mental division.</p> <p>Extend to 3-digit divided by a 1-digit number, $257 \div 7$</p> <p>Estimate first, use a number line to count on, if appropriate.</p>  <p>Pupils continue to become fluent with the formal written method of short division with exact answers.</p> <p>E.g.</p> $\begin{array}{r} 23 \\ 6 \overline{) 138} \end{array}$	<p><i>Pupils continue to practise recalling and using multiplication tables and related division facts to aid fluency.</i></p> <p><i>Pupils practise mental methods and extend this to three-digit numbers to derive facts, (for example $600 \div 3 = 200$ can be derived from $2 \times 3 = 6$).</i></p> <p><i>Pupils practise to become fluent in the formal written method of short multiplication.</i></p> <p><i>Pupils write statements about the equality of expressions (for example, use the distributive law $39 \times 7 = 30 \times 7 + 9 \times 7$ and associative law $(2 \times 3) \times 4 = 2 \times (3 \times 4)$). They combine their knowledge of number facts and rules of arithmetic to solve mental and written calculations for example, $2 \times 6 \times 5 = 10 \times 6 = 60$.</i></p>

The Richard Heathcote Community Primary School—Division policy (4)

Year	What will it look like?	Guidance
<p>Stage 5</p>	<p>Pupils divide numbers up to 4 digits by a one-digit number using the formal written method of short division and interpret remainders appropriately for the context, e.g. 432 school children go on a camping trip. Each tent sleeps five. How many tents will they need to take?</p> <p>432÷5 becomes:</p> $\begin{array}{r} 86\text{ r}2 \\ 5 \overline{) 432} \\ \underline{40} \\ 32 \\ \underline{30} \\ 2 \end{array}$ <p>Answer: 86 remainder 2 Answer: they will need to take 87 tents.</p>	<p><i>Guidance in italics taken from the non-statutory guidance in the 'National Curriculum in England' document 2014.</i></p> <p><i>Pupils practise and extend their use of the formal written methods of short multiplication. They apply all of the multiplication tables and related division facts frequently, commit them to memory and use the confidently to make larger calculations.</i></p> <p><i>They use and understand the terms factor, multiple and prime, square and cube numbers.</i></p> <p><i>Pupils use multiplication and division as inverses to support the introduction of ratio in year 6, for example, by multiplying and dividing by powers of 10 in scale drawings or by multiplying and dividing by powers of a 1000 in converting between units such as kilometres and metres.</i></p>
<p>Stage 6</p>	<p>Pupils divide numbers up to 4 digits by a 2-digit whole number using the formal written method of long division and interpret remainders as whole number remainders, fractions, or by rounding, as appropriate for the context, e.g. Chocolates are packed in trays of 15. If I have 432 chocolates, how many full trays will I have and how many chocolates will be left over?</p> <p>432 ÷ 15 becomes</p> $\begin{array}{r} 28 \text{ r}12 \\ 15 \overline{) 432} \\ \underline{30} \\ 132 \\ \underline{120} \\ 12 \end{array}$ <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;"> <p>Answer: There will be 28 trays of chocolates and 12 chocolates left.</p> </div> <p>Pupils progress to expressing their remainders as a fraction. E.g. 432 litres of water are stored in 15 litre drums. How many full drums of water will there be and what fraction of the final drum will be filled?</p> <p>432 ÷ 15 becomes</p> $\begin{array}{r} 28 \\ 15 \overline{) 432} \\ \underline{30} \\ 132 \\ \underline{120} \\ 12 \end{array}$ <div style="border: 1px solid black; padding: 5px; width: fit-content; margin: 10px auto;"> <p>Answer: There will be 28 full drums and the fifth drum will be 4/5 full.</p> </div> <p>$\frac{12}{15} = \frac{4}{5}$ Answer = 28 $\frac{4}{5}$</p>	<p><i>Pupils practise addition, subtraction, multiplication and division for larger numbers, using the formal written methods of columnar addition and subtraction, short and long multiplication.</i></p> <p><i>They undertake mental calculations with increasingly large numbers and more complex calculations.</i></p> <p><i>Pupils continue to use all multiplication tables to calculate mathematical statements in order to maintain their fluency.</i></p>
