Google Translate

Instructions for Using Google Translate to translate text from one language to another.

Go to translate.google.com

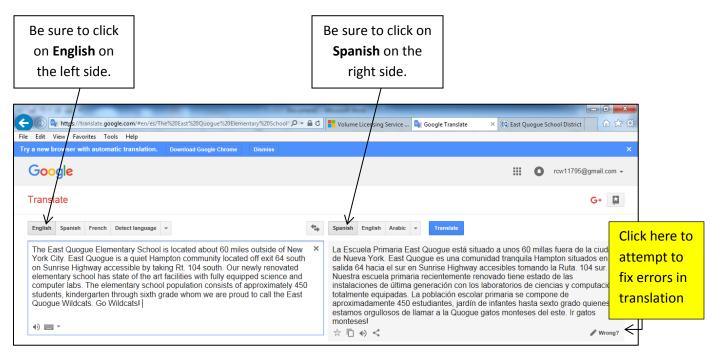

Open a document and highlight the text that you would like to translate.

If you are using Microsoft Word, you can quickly highlight all of the text as follows:

Press the Control key (Ctrl) and while holding down this key, tap the letters A and then C

(The letter A highlights all text and C copies what is highlighted-in this case all text.)

Then go back to <u>translate.google.com</u> and paste the text into the open window

Note: If you are translating other languages, you can use the drop down menu to select another languages

			(41
	+ <u>+</u>	Spanish Englis	h Arabic	Translate
Hebrew	Latin	Portuguese	Telugu	Quogue está gue es una co Sunrise Highw recientement neración con población eso tudiantes, jaro mar a la Quog
Hindi	Latvian	Punjabi	Thai
