Ask Me Anything: New SAS® Prompting Architecture

Diane Hatcher, SAS Institute Inc.
Scott Leslie, SAS Institute Inc.

ABSTRACT

One of the strengths of the SAS® platform is that applications can leverage a single common infrastructure to provide consistent presentation and results. This extends to the new prompting architecture that is delivered with SAS® 9.2. We have completely redesigned our prompting architecture to provide a single set of components and capabilities to all SAS®9 clients. This paper will highlight the enhancements in the prompting architecture, including dynamic and cascading prompts, and how prompts definitions can be shared across applications.

No paper was submitted for publication.
