## Instructions

1. Print out 5 copies of either the right hand or the left hand onto colorful paper, depending on your child's dominant hand. Print out one copy of the multiplication chart and laminate for even more durability.
2. Assist your child in writing the equations on the hands for the set of numbers you're working on. Example: for the 7's set your child will write $1 \times 7=7,2 \times 7=14$ and so on.
3. Have your child cut down the center of each paper with scissors to divide the hands.
4. Using painter's tape to protect paint, fasten papr hands to walls, doors, up the stairs, etc.
5. Have your child practice High Five Multiplication whenever they are near the handprints. Watch the video for creative ideas, from easy ways to do skip counting with younger kids to challenging ways to help older kids learn to memorize mulitiplication facts.
