

Mechanical Engineering

Graduated from Bucknell University in the class of 1973, Mr. Richard E. Andrews has put his degree in Mechanical Engineering to use as the Director of Sales and Marketing at Global Pump Marketing, Inc. While his undergraduate degree was important, graduate school was critical, as is experience of knowledge of a technical nature, experience as a people person, and organizational skills. Mr. Andrews daily schedule consists of a lot of traveling, training and working with the distributors. He enjoys that the field is never the same, but is often frustrated by the long hours. Mr. Andrews recommends his field of work to anyone who has a technical background and wants to apply it more to sales. However, when asked if his career choice would be the same if he had the opportunity to do it all again, Mr. Andrews says it wouldn't because, "mechanical engineering doesn't have enough growth," and he would like more growth.
