

Departmental New Employee Safety Orientation

Employee Name: _____

Job Title: _____ SSN: _____

Topics 1-4 are contained in the departmental Emergency Operations Plan. Reviewing this plan during the orientation will more than meet the requirements of these first few topics.

1. Reporting Emergencies

Tell and show the new employee(s) the police, medical, and fire emergency reporting number(s) for their work area.

FHL Campus

Police - Medical - Fire

911

The emergency number should be posted on all telephones.

2. Emergency Evacuation

Walk new employees through the appropriate emergency evacuation route for their work area. Also point out the secondary emergency evacuation route to be used if the primary route is blocked. Show them where to assemble after evacuation. Discuss special evacuation needs and plans with disabled employees.

A concise summary of the FHL Emergency Evacuation plan is posted in all housing, and is included in the FHL Health & Safety Plan posted on all Lab Safety Bulletin Boards, and appears on our web site at

http://depts.washington.edu/fhl/emergency_abbrev.html

The full 57-page plan can be obtained from the FHL Front Desk.

3. Local Fire Alarm Signaling System

Automatic Fire Alarm Systems are installed in the Fernald Building, Computer Building, Lab 10, Commons, and Dormitories. A piercing horn is sounded when the alarm is pulled in all of these buildings except Lab 10.

During regular business hours

Show new employees where fire alarm pull stations are and instruct them in their use. Let them know that activating the pull station sounds an alarm in the building to alert other occupants to evacuate.

- Tell your new employees that they must leave the building immediately upon hearing the alarm, closing doors behind them.
- When employees discover a fire they should first, pull the nearest fire alarm pull station and then exit the alarmed area. If possible, employees should follow up with a 911 phone call from a safe location to provide more details.
- The activation of a fire alarm pull station also sends a signal the local San Juan Fire Department and to the Simplex Grinnell company in Seattle.
- After hours, be sure to alert the FHL Caretakers (360-298-0220).

4. Portable Fire Extinguishers

Show the employee(s) where portable fire extinguishers are located. Tell them to use a portable fire extinguisher only if:

- they have been trained to use them,
- the fire alarm has been sounded first,
- the fire is small (waste basket size), and
- they have a clear evacuation route.

5. Department Reporting Procedures

Tell your new employee(s) to immediately report accidents, incidents, near misses, motor vehicle accidents and any unsafe conditions or acts to their supervisor or to the FHL Administrator.

a. Reporting Accidents and Incidents

Explain that after they immediately report on-the-job accidents, they have to fill out a University accident incident report form (UoW 1428) available from the FHL Administrator. All accidents or near accidents (incidents) must be reported on this form even if no personal injury was sustained.

Reporting all accidents and incidents helps the University and the

employing departments initiate effective safety programs and accident prevention measures.

b. Reporting Motor Vehicle Accidents

All automobile accidents in University-owned vehicles must also be reported to the FHL Administrator immediately, whether or not there appears to be personal injury or property damage.

c. Reporting Unsafe Conditions and Acts

Along with immediately reporting unsafe conditions and acts to their supervisors or the person noted above, employees may report safety problems to Environmental Health and Safety.

Explain that employees should take responsibility for correcting unsafe conditions when feasible, e.g., wiping up small, nontoxic spills and removing tripping hazards.

6. Workers' Compensation and Industrial Insurance

Tell employees that work-related injuries or illnesses resulting in medical expenses or time loss are covered by Washington State's Workers' Compensation. To establish a Workers' Compensation claim, employees must fill out a State Department of Labor and Industries (L&I) Report of Industrial Injury or Occupational Disease at their medical provider's office when they receive medical care for a work-related injury or illness. Explain, also, that prompt reporting of accidents to you, the supervisor, will make the claims process easier and may allow you to find them modified work during their recovery.

7. First Aid

Tell new employees where first aid kits are located. If your department is required to have first aid certified employees on staff, (UW OPS D 10.5) tell new employees who they are and how to contact them. Explain what actions employees should take if they or others are injured. If safety showers or eye wash stations are located in your department, show new employees where they are and instruct them in their use. **Locations of First Aid Kits and Safety showers are shown on room maps posted on Lab Safety Bulleting Boards.**

8. Hazard Communication (Chemical Safety) (Worker Right-to-Know, HazCom)

a. General (all employees)

- Tell new employees where hazardous materials are used or stored in their work area.
- Explain the labeling system for these materials.
- Show employees where material safety data sheets (MSDSs) are located or explain how they can obtain an MSDS. **In most cases an MSDS will be on file in the FHL Stockroom.** Staff can also access the UW MSDS database by visiting:
- <http://www.ehs.washington.edu/epomychem/index.shtml>
- If new employees will be working with hazardous materials, tell them they will receive training in the safe handling of these materials or conduct the training at this time, if appropriate.

Hazard Communication training is conducted by supervisors or a designated departmental trainer.

- Inform new employees that hazardous materials emergencies, such as spills or releases too big for them to clean up, are to be reported to:
FHL Maintenance Office
Report large spills or releases to San Juan Emergency Services by calling 911
- Explain the hazardous materials waste disposal procedures that apply in your area.

□ **b. Specific Worksites**

Office Staff

For staff whose only chemical exposures are in an office environment,

- Provide a copy of the brochure "UW Hazard Communication for Office and Computer Products."
- Discuss hazard information and protection measures for products they will work with.
- Explain an MSDS and tell employees where they are located or how to obtain them.

Laboratory Staff

Laboratory staff may be sent to the EH&S course "Chemical Safety in the Laboratory" for an introduction to chemical safety regulations and

procedures. The laboratory supervisor or principal investigator must provide additional training, specific to the chemicals in the laboratory. See the UW Laboratory Safety Manual (5/00 rev.), Section 7 Safety Training.

Non-Laboratory Hazardous Chemicals

Employees who work with chemicals in non laboratory environments must receive detailed hazard communication training from their supervisor or designated departmental HazCom trainer. (Employees who fall into this category include maintenance, custodial/housekeeping, food service and printing and copy/duplicating employees.)

9. Worksite Warning Signs and Labels

Explain to all new employees the meaning of warning signs, tags, and labels used in their work area.

10. Personal Protective Equipment (PPE)

Check the personal protective equipment needed for this job.

Gloves	Hard Hats
Safety Glasses, Goggles, Face Shields	Hearing Protectors
Personal Protective Clothing	Fall Protection
Orange Safety Vest	Safety Shoes
Respirator	

Explain precisely the use, care, cleaning, and storage of any personal protective equipment the new employee will be required to use on the job. Stress the need for strict adherence to department, division, unit, and/or lab policy on the use of PPE.

11. Employee Safety and Health Training

Use the following list to indicate the safety and health training classes the new employee will be required to take for their job. Recommended classes could also be marked but priority must be given to arranging the required health and

safety training classes.

- ***Please register new employees in EH&S courses as soon as you are aware of their start date since many required courses fill early.***

Environmental Health and Safety courses are general and must often be supplemented with specific training by the department or supervisor.

Employee Safety and Health Training Check List				
Mark training/courses the employee needs to take. Retain documents verifying that the training requirements have been met.				
Course	Provided by		Course	Provided by
ALL NEW DEPARTMENT EMPLOYEES				
General Orientation	T&D		Departmental/Supervisor New Employee Orientation	Department
Campus New Employee Orientation	T&D		Hazard Communication (Worker Right to Know)	Department
New Employee Benefits Orientation	Benefits Office			
AS REQUIRED BY JOB				
Asbestos Awareness	EH&S		Laboratory Fire Safety	EH&S
Bloodborne Pathogen Exposure Control	EH&S		MyChem	EH&S
Chemical Safety in the Laboratory	EH&S		Lead Awareness	EH&S
Chemical Spills Clean-up	EH&S		Lifting Training - Back Protection Program	EH&S
Chemical Waste Disposal	EH&S		Lockout Safety - (Energy Control)	EH&S
Confined Space Entry	EH&S		Motorized/Powered Personnel Lifts	Mfg/Supplier
Compressed Gas Safety	EH&S		Office Ergonomics	EH&S
CPR	EH&S		Powder Activated Tools	Mfg/Supplier
Fire Extinguisher Training	EH&S		Radiation Safety Training	EH&S
First Aid / CPR	EH&S		Respiratory Protection and Mask Fitting	EH&S
Forklift Operator Safety Certification	EH&S		Scaffolds	Mfg/Supplier
Hearing (Protection) Conservation	EH&S		Shipping and Transporting Hazardous Materials	EH&S
			Traffic Control and Flagging	Outside agent
OTHER DEPARTMENTAL REQUIRED / RECOMMENDED COURSES				

□ 12. Safety and Health Committee(s) and/or Safety Meetings

Tell new employees about the Organizational and University-wide Health and Safety Committees and about the departmental health and safety committee and safety meetings, if applicable. Tell them who their safety committee representatives are and how to contact them.

□ 13. Safety Bulletin Board

Point out the departmental safety bulletin board and tell them what items can be found on the board.

The bulletin board must display the following posters:-

- *UW HazCom Poster*
- *State Labor and Industries Posters*
 - "Job Safety and Health Protection"*
 - "Notice to Employees"*
 - "Your Rights as a Worker"*
- *Other safety notices, newsletters, safety and health committee minutes, etc. should be posted here also.*

□ 14. Departmental/Worksite Safety Practices and Rules

Conduct an on-the-job review of the practices necessary to perform the initial job assignments in a safe manner. Employees should understand that supervisors will provide job safety instruction and inspection on a continuing basis. Review safety rules for your department (e.g., non-smoking areas, working alone, safe use of chemicals, biohazards, radioactive materials, etc).

□ 15. Tour Department/Facility Reviewing Worksite Hazards

Encourage your employees to ask questions and to develop a sense of safety consciousness.
