

NA'VI - ENGLISH DICTIONARY v. 13.51

Compiled by Mark Miller
www.LearnNavi.org

Last updated: July 12th, 2017

This is the authorized and definitive dictionary for Na'vi, the language created by Dr. Paul Frommer for James Cameron's film, **Avatar**. The words within come directly from, or are derived from, Dr. Frommer.

Some notes: The traditional Na'vi transcription in use by Dr. Frommer has been maintained throughout: the IPA transcription is given as well. Compound non-inflected words and loan words from English have been noted. Some lenited words have been included if in the official corpus. Some inflected words are included here, if their inclusion is deemed particularly useful. Note that adpositions are free if before their modifier, but are bound as a suffix if situated after it.

Bold indicates Na'vi word. *Italics* indicate English definition. Plain text indicates grammatical categorization: parentheses such as «x» represents an infix, where *t*«pre-first»«1»*ar*«2»*on* are the positions: Included are periods in the IPA to mark syllable divisions, and mid-dots to show infix positions (for beginners), as in [*t·a.r·on*]. Irregular infixes are marked with (ii). Transitivity is marked if known: words marked v. are either unattested or ambitransitive. Most, if not all transitive verbs can be used intransitively in the absence of a direct object. Known modal verbs and verbs known to use modal syntax are marked with vim or vtrm, depending upon transitivity according to the previous note. Knowledge of lenition and other sound changes will be assumed. Monosyllabic words are not noted for having a single primary stress in the IPA; if an enclitic is added, the root will be assumed to have primary stress. Note also that variants, where specified, are subject only to personal preference, and not syntactic or morphological rules. There are several useful appendices that hold further information.

Sources

We have sourced every word as best as we could. This sourcing is placed in a subscript after the IPA transcription and reveals the source of each word. For historical interest, this dictionary was originally based on an initial list of around 500 words provided by Dr. Frommer in early March, 2010. As the language has continued to develop, additional vocabulary has been added as it appears in communications from Dr. Frommer via his blog and emails. Dr. Frommer has solicited the LearnNavi.org community to help come up with new vocabulary via the **Lexical Expansion Project**. This project continues and many suggested words now appear in the canon lexicon presented in this dictionary. Other sources are words modified by unproductive affixes that are included here if Dr. Frommer has used them and words that have a modified semantic meaning due to a productive affix. Order of canonicity, from most to least:

- PF = Dr. Paul Frommer
- M = The Movie
- JC = James Cameron
- G = the Avatar Games
- ASG = The Survival Guide
- PND = Pandorapedia.com

The Activists Survival Guide, a key early source of words, contained many words which are illegal - these are in the appendix. However, the plant names and songs approved by Dr. Frommer are included in the dictionary proper. James Cameron himself made up many words, which Dr. Frommer then legalized. Dr. Frommer also legalized a few pronunciation errors made during filming: these, like *oìsss*, are now canon. Finally, Dr. Frommer has approved words created by other sources for the Avatar franchise, like the Toruk show by Cirque du Soleil and the Pandora attraction at Disney World. Other words suggested by the LEP and language community have been approved as well. These additional sources are indicated as follows: JC for James Cameron, CP for CCH Pounder, LA for Laz Alonso, Prr for Prrton, RL for Richard Littauer, SW for Sigourney Weaver, ZS for Zoë Saldana, CM for Carla Meyer, CdS for Cirque du Soleil, D is for Disney (from Pandora - The World of Avatar) and G for the Avatar Game. LN is for LearnNavi, specified when the original sourcing has been lost or is ambiguous.

Regarding the IPA, there are some other possible interpretations. Open syllables always use a tense [u] pronunciation, but closed syllables can be either tense [u] or lax [ʊ]. There is no rule for which to use in closed syllables. So *tsun*, for example, can be either [tʰsun] or [tʰʊn], but *lu* is always [lu], never [lʊ]. Also, an alternate method of transcribing the diphthongs [ɛj], [aj], [ɛw], and [aw], not used here (for Frommer prefers the former), is [ɛ̠j̠], [a̠j̠], [ɛ̠w̠], and [a̠w̠]. Concerning syllables, where not made clear by Dr. Frommer, the divisions have been split in accordance with the Maximal Onset Principle. Also note that stress and ejective markers can be difficult to differentiate. One example is the word *atxkxe* which is described as [atʰ.kʰɛ]. Please note the subtle difference between the characters ' for ejective, and ʰ for stress.

This dictionary is a work in progress and is likely to have errors. **Rutxe**, if you note any, let me know here or by email to mark@learnnavi.org, and I will correct them. As for version

number, I'll change the first digit when there is a big change, .0x0 for a significant, but not large change and the .00x number for tiny edits. Refer to the Changelog for enlightenment.

I would like to take this opportunity to recognize those who have been instrumental in the creation and maintenance of this dictionary. First of course, is Dr. Paul Frommer and his monumental effort in creating and expanding this amazing language. Eternal thanks to Richard Littauer for originally creating this document. Thanks also to Tuiq who created the automation tools for the maintenance of this dictionary and its variants. Finally, thanks to everyone in the Learn Na'vi Community who are helping Na'vi to bloom!

A The Number System

The following are charts of Na'vi numbers, which are adjectives that modify nouns in their singular form, like 'awa tute. Note that it is not a decimal, but an octal system. Underlining indicates where the stress ought to fall. The numbers 8 and 9 are included for terrestrial number reference, such as in phone numbers. They do not signify the value of 8 or 9.

Note that when using numbers in conversational Na'vi, Dr. Frommer has introduced a grammatical rule, called "the Koren Holpxayä", or "the Number Principle", which states that *in referring to the same entity, express number only once per clause*. For example, the sentence "You two are teachers." in Na'vi would be "Menga lu karyu." and the sentence "They are teachers." would be "Fo lu karyu."

F Useful Phrases

These are some useful phrases. Often the word order can be changed, although the morphemes are probably invariable. We've included these not only to show instances where a phrase encapsulates a single semantic meaning, but also to illustrate set common constructions. For this reason we have also included some single words again here. Most of these are taken from Dr. Frommer's blog at Naviteri.org. They've been included in no specific conversational order, but rather alphabetically.

G The Alphabet

Kemaweyan, Plumps, Prrton, and Tirea Aean came up with a uniquely Na’vi way of listing and pronouncing the 33 phonemes (distinct sounds) in the language—20 consonants, 7 vowels, 2 “pseudo-vowels” (ll, rr), and 4 diphthongs (aw, ay, ew, ey). Here is that list.

Other Inflections

This is a list of Na'vi morphemes that can attach to the word that changes some aspect of the meaning. Not all Na'vi inflections are productive. (**pro.**) indicates complete productivity, where they can be applied to any of the subset of words that Dr. Frommer has indicated they can modify, and would be canonical, even if unattested. They cannot be used on parts of speech that aren't specified. All of the verbal infixes and case markers above are entirely productive.

Other Inflectional Morphology

These derivational morphemes are different than the inflectional morphemes (in technical speak) above. In other words, the markers here don't just change the meaning - they change the part of speech. Some of these, only Dr. Frommer can use in order to make a canonical word, like **tî–**. Others are productive for certain subsets, like **–yu**, which can go on any verb.

I Non-Frommerian Words

These are words that are not from Dr. Frommer: We have included them as they are in the extant corpus, but they are not to be regarded as Na'vi words. They are, for the most part, spurious inventions for the Activist's Survival Guide, Pandorapedia, or the Avatar Game. The words in this section were not run by Dr. Frommer before being published, and the general consensus is that they should be ignored. They are included here for those who would otherwise not know what their definitions or derivations are. These words are not canonical, and their use is highly discouraged. Many of them flout Na'vi inflectional rules or phonotactic constraints. Some include illegal sounds, as illustrated below.
