## Metalogix and Synergy Announce the Transfer of Synergy's SharePoint Solutions and Team to Metalogix Holdings

Metalogix Will Integrate Synergy's SharePoint Products, Including the Market Leading SharePoint Replication Solution, Into Our Portfolio of SharePoint Content Lifecycle Management Solutions. Bolstering Metalogix Leadership in SharePoint Mobility.

Synergy will continue to operate independently with products and solutions for Open Text Content Server® including Replicator for Livelink and Content Server.

**Washington, DC – March 7, 2012** – Metalogix Software, the trusted provider of content lifecycle management solutions for Microsoft® SharePoint®, Exchange® and Cloud platforms, today announced the purchase of Synergy's SharePoint solutions to the Metalogix SharePoint portfolio. Synergy features the market leading SharePoint replication solution, Replicator for SharePoint, which is a web-based solution used to synchronize and manage business intelligence in real-time across multiple SharePoint environments.

“By adding the leading SharePoint Replication solution to our Migration and Storage product lines, we are able to extend our range, reach and leadership in the SharePoint content mobility market segment. This investment in world class SharePoint technology and talent achieves another milestone in our strategy to provide our customers a better way to enhance the use and performance of their Microsoft SharePoint platform investment.” said Steven Murphy, CEO, Metalogix. “We further see this as an excellent opportunity to enhance our portfolio of Content Life Cycle management solutions and give our customers more choice in how they manage, move, store, archive and protect their SharePoint Content.”

By utilizing SharePoint replication, organizations with multiple SharePoint servers have uninterrupted access to content that enhances employee productivity and efficiency and improves company performance globally. Replicator for SharePoint provides for two-way data synchronization by replicating content and settings back and forth between server farms, even if they are not identical.

“We believe that Metalogix will bring Synergy's breakthrough SharePoint technology to more customers,” said David Seaman, COO, Synergy. “Replicator for SharePoint has become the leader in the SharePoint replication market and its ability to allow end users from around the

## SYNERGY

world to work seamlessly on the same content will boost productivity for any organization.” Replicator for SharePoint is easy to install, transparent to end users and maintained through the SharePoint central administrator. The solution optimizes SharePoint performance for growing SharePoint environments by preventing version control conflicts. Replicator for SharePoint allows administrators to create a highly available environment that is well-prepared for disaster recovery scenarios. Synergy SharePoint solutions include Synergy Connect for SharePoint, which provides the ability to visualize, monitor and manage the replicator-enabled SharePoint wide area farm environment.

Synergy will remain a preferred migration services partner for Metalogix and will continue to operate independently selling solutions for Open Text Content Server® including Replicator for Livelink and Content Server.
