Word Problems II: Addition & Subtraction (Set 3)

Solve the following word problems. Remember to show your work.

1. Jim and Tim want to buy some marbles. Jim has \$6 and Tim has \$8. They want to combine their money so they can buy the large pack. How much money do they have all together? If the large pack costs \$12, how much money do they have left over?

2. Jason reads 2 books to his children at night before bed. How many books does he read to his children in 2 weeks?

3. Mary's sister baked 45 cookies for her party and her brother baked 35 cookies. How many cookies did Mary's brother and sister bake for her party?

4. Lynn wants to buy a toy for \$25. Her grandmother gives her \$5 every week. How many weeks will she need to save her money in order to buy the book?
