Introduction

It is important to acknowledge all sources of information and ideas that you have used in your essay, research paper, dissertation or thesis in a way that identifies the original source. This is known as referencing. Referencing enables you to avoid plagiarism, allows the reader to consult the original source of your information, and acknowledges the author from which the information was taken.

There are many styles of referencing. This guide shows you one way – The American Psychological Association (APA). APA is a common reference style used in psychology and nursing. This style is an author-date method of referencing.

Basic Rules for layout of your document

The first chapter of the Publication manual of the American Psychological Association (APA manual) covers the general format for manuscripts/documents.

For University of Auckland theses and dissertations you should consult the Guide to Theses and Dissertations <http://www.auckland.ac.nz/Docs/sa/postgraduate/download/thesisguide.pdf> for details on general layout.

Otherwise the basic sections, if applicable, of your document are as follows (in the following order and starting on a separate page):

- Title Page
- Abstract
- Text
- References
- Appendices

NB: Please check with your department as they may have other requirements or guidelines.

Basic Rules for formatting citations in your text

The following are some general guidelines for referencing works in the text of your document.

The author/s surname and year of publication are used within the text of a document (commonly referred to as in-text citations) when you are quoting, paraphrasing or summarizing someone else's ideas. At the end of the document full details of the in-text citations are given in a reference list. For more information on in-text citations consult the APA manual (pages 207-214).

Standard Citation: One author

For example:

According to Froggatt (2003) a growing body of research is emerging on palliative care....

OR

A growing body of research is emerging on palliative care (Froggatt, 2003).

NB: If you refer to the same citation a second time within the same paragraph you may omit the year of publication as long as it cannot be confused with other studies cited in that paragraph.

Standard Citation: Two authors

For example:

Jowett and Shanley (1993) observed during interviews that patients responded.....

OR

It was observed during the interview that patients responded well to drug therapy (Jowett & Shanley, 1993).

Standard Citation: Three to five authors

The first time the citation is referred to give all the authors surnames:

For example:

Herth, Korner, and McGee (2004) documented their experiences as patients.....

OR

Their experiences as patients was well documented (Herth, Korner, & McGee, 2004)

NB: In the second example '&' is placed before the last author.

Subsequently, only the surname of the first listed author is used followed by et al. and the year of publication.

For example:

Herth et al. (2004) stated that.....

Standard Citation: Six or more authors

When a citation has six or more authors, cite only the first author followed by et al. and the year of publication, for the first and subsequent citations.

For example:

Benzein et al. (2001) conducted narrative interviews....

OR

Narrative interviews were conducted over two weeks (Benzein et al., 2001).

Standard Citation: No author

When a work has no author, cite in the text the first few words of the title and the year. For an article or chapter title use double quotation marks around the title. For a book, periodical/journal, brochure, or report, *italicize* the title.

For example:

In the chapter "Thoughts on integrated care" (1999) it discusses...

OR

... it was discussed ("Thoughts on integrated care", 1999).

In the book *Social learning theory* (1980) evidence is...

OR

... the evidence was presented (*Social learning theory*, 1980).

NB: When a work's author is designated as "Anonymous" cite in the text the word Anonymous followed by a comma and the date. In the reference list, an anonymous work is alphabetized by the word Anonymous.

Groups as authors

Group authors (e.g. corporations, associations and government agencies) are normally spelled out every time they appear as an in-text citation. However the names of some group authors are spelled out the first time they are cited and abbreviated thereafter. The general rule in deciding to abbreviate is that you should provide enough information in the in-text citation for the reader to easily locate the entry in the reference list.

For example:

The Accident Compensation Corporation [ACC] (2003) would not cover injuries

OR

There was no compensation for these kinds of injures (Accident Compensation Corporation [ACC], 2003).

Subsequently

ACC (2003) does not consider injuries of this nature.....

Citation of a work discussed in a secondary source

Give the secondary source in the reference list; in-text, name the original work, and give a citation for the secondary source. For example if Bendz, Sjodin, & Aurell's work is cited in Olson, Meek, & Lynch and you did not read the work cited, list the Olson, Meek, & Lynch reference in the Reference list.

For example:

In-text citation

Bendz, Sjodin, and Aurell's study (1990, as cited in Olson, Meek, & Lynch, 2004) showed...

OR

...showed in the study (Bendz, Sjodin, & Aurell, 1990, as cited in Olson, Meek, & Lynch, 2004).

In the Reference List

Olson, D. M., Meek, L. G., & Lynch, J. R. (2004). Accurate patient history contributes to differentiating diabetes insipidus: A case study. *Journal of Neuroscience Nursing, 36*(4), 228-230.

Direct Quote

For example:

The author stated, "The effect disappeared within minutes" (Lopez, 1993, p. 311), but she did not say which effect.

OR

Lopez (1993) found that "the effect disappeared within minutes" (p. 311).

NB: Quotations that are 40 words or longer should be placed in a free standing block of type written lines and omit quotation marks. For more information see the APA manual.

Several works by the same first author and with the same publication date:

Within the text the publication date is followed by the suffixes a, b, c, etc. after the year; repeat the year. The suffixes reflect the order in which the references are arranged in the reference list i.e. alphabetically by the title (excluding 'A' and 'The') that follows the date.

For example:

Cook (2001a) found that the control of The roles were reversed (Cook, 2001b).

Several works within the same parentheses:

List two or more works by different authors who are cited within the same parentheses in alphabetical order by the first author's surname. Separate the citations with semicolons

For example:

Several trials found inconsistencies in the results (Brown, 2006; Cook, 2007; Wilson, 2000).

Personal Communication

Personal communication may be letters, memos, some electronic communications, personal interviews, telephone conversations and the like. Cite personal communications in the text only, they are not included in the reference list. In the body of your text you need the following:

Initials and Surname of communicator, and provide an exact a date as possible.

For example in-text reference would look like this:

P. D. Gluckman (personal communication, May 23, 2004)

OR

(J. Kilpatrick, personal communication, November 7, 2004)

Your Reference List:

Formatting your reference list is covered in Chapter 4 of the APA manual. What follows are some general guidelines for formatting your reference list.

Your reference list should appear at the end of your paper and should begin on a separate page from the text of the essay under the heading **References** (centered, at the top of the page and not underlined). The references should be double-spaced just like the rest of your essay, and entries should have a hanging indent of 5 spaces (i.e. starting on the 5th space). NB: The School of Nursing accepts 1.5 or double spacing. In this guide I have used 1.5 spacing to save paper!!

References cited in the text must appear in the reference list; likewise, each entry in the reference list must be cited in the text.

NB: A *Reference list* cites works that specifically support a particular article whereas a *Bibliography* cites works for background or for further reading and may include descriptive notes.

Abbreviations:

Acceptable abbreviations in the reference list for parts of books and other publications are:

| | | | |
|---------------------|--|------------|-------------------------|
| chap. | chapter | p. | Page |
| ed. | edition | pp. | Pages |
| rev. ed. | revised edition | para. | paragraph |
| 2 nd ed. | second edition | Pt. | Part |
| Ed. | Editor | Suppl. | Supplement |
| Eds. | Editors | Tech. Rep. | Technical Report |
| et al. | and others (from Latin <i>et alii</i> , <i>et aliae</i>) | Trans. | Translator(s) |
| n.d. | no date | Vol. | Volume (as in Vol. 4) |
| No. | Number | vols. | Volumes (as in 4 vols.) |

Publisher's Locations:

Give the location (city and state for U.S. publishers, city, state or province if applicable, and country for publishers outside of the United States) of the publishers of books, reports, brochures, and other separate, non-periodical publications. If two or more publisher locations are given, give the location listed first in the book or, if specified, the location of the publishers home office. If the publisher is a university, and the name of the state (or province) is included in the name of the university, do not repeat the name in the publisher location. The following locations can be listed without a state abbreviation or country because they are major cities that are well known for publishing.

NB: Do not use abbreviations for the name of the Country e.g. use New Zealand not NZ.

| Baltimore | Philadelphia | Milan | Tokyo |
| Boston | San Francisco | Moscow | Vienna |
| Chicago | Amsterdam | Paris | |
