```

ALIGN YOUR TEXT

Add any of the following before the text in your markdown block to change the text alignment

```
<center>
<left>
<right>
```

ADD A HORIZONTAL LINE

A super simple code edition, you can add a horizontal line to your markdown block using the text: `<hr>`

CHANGE THE CURSOR

Display a different style cursor when someone hovers over the title/question by replacing the word help in the code `"....css('cursor','help');..."` with one of the options below:

```
crosshair
default
pointer
wait
zoom-in
```
