Alfred A. Knopf

In his landmark international bestsellers *Guns, Germs and Steel* and *Collapse*, Jared Diamond transformed our understanding of what makes civilizations rise and fall. Now in the third book in this monumental trilogy, he reveals how successful nations recover from crisis. Diamond shows us how seven countries have survived defining upheavals in the recent past - from the forced opening up of Japan and the Soviet invasion of Finland to the Pinochet regime in Chile - through selective change, a process of painful self-appraisal and adaptation more commonly associated with personal trauma. Looking ahead to the future, he investigates whether the United States and the world, are squandering their natural advantages and are on a devastating path towards...

This book is a series of stories about medicine and the changing human body. Just as physicians must honor the privileged access they have to our bodies, they must honor the trust with which we share our stories. Unreliable bodies and shifting symptoms are all in a day's work for a GP. In his years of practicing, Gavin Francis has seen it all: the promising law student trapped under the spell of anorexia; the bodybuilder whose use of illegal steroids threatens his fertility; the teenager agonizing over the perplexing physical dramas of puberty; and the surprisingly upbeat woman growing a horn in the center of her forehead. In *Shapeshifters* he draws on his patients' bodily transformations, both welcome and unwelcome, bringing together case histories and accounts from the history of...

Marriage is near universal in India. For women, like it or not, marriage and motherhood become their career 'choices'. Families, society, peer groups, young girls, themselves, are so conditioned as to make the inevitability of marriage, the desirable norm. But is this beginning to change? The Census of 2011 reported that there were 25 million never-married women in India, an increase of approximately 35 per cent from the turn of this century. Add to this the number of women seeking divorce, also rising dramatically, and the institution of marriage begins to look a little less unshakeable. The 13 happily unmarried women in this anthology have arrived at their singledom from a variety of perspectives and experiences, but have one critical factor in common none of them needs the social sanction of...

Call No : 320.51 CAL-K

Dubbed 'the oracle' by no less an authority than James Madison, Montesquieu stands as a theoretical founder of the liberal political tradition. But equally central to his project was his account of the relationship of law to each nation's particular customs and place, a teaching that militates against universal political solutions. This teaching has sometimes been thought to stand in tension with his liberal constitutionalism. In this book, Keegan Callanan argues that Montesquieu's political particularism and liberalism are complementary and mutually reinforcing parts of a coherent whole. In developing this argument, Callanan considers Montesquieu's regime pluralism, psychological conception of liberty, approach to political reform, and account of 'the customs of a free...

This volume deals with the manifold ways in which histories are debated and indeed historicity and historiography themselves are interrogated via the narrative modes of the truth Commissions. It traces the various medial responses which have emerged in the wake of the truth Commissions. The 1990s and the 2000s saw a spate of so-called truth Commissions across the global South. From the inaugural truth Commissions in post-juntas 1980s Latin America, to the truth and reconciliation Commission set up by the incoming post-apartheid government in South Africa and the twinned gacaca Courts and National unity and reconciliation Commission in Rwanda and that in indigenous Australia, various truth Commissions have sought to lay bare human rights...

India's eastward engagement: from antiquity to act East policy presents India's engagement with its extended Eastern neighbors from ancient times to the present. It argues that this engagement has been long rooted in India's geographical location, its civilizational evolution and historical transformations. The book critically examines all the important phases Nehru and post-Nehru periods, and look East and act East policies. It exposes the widely entertained myths about India's eastward engagement and also underlines the prospective directions in which the Act East policy may unfold in the years to come. The idea of writing this books came out of my senses of unease and discomfort from the repeated criticism heard during my decade long...

By assessing the costs and benefits of military spending, the authors provide a "second opinion" on the subject of military economics. While advocates of increased military spending often stress the positive effects of the Pentagon on the economy, there has been little systematic summary of the "opportunity costs" that society pays for a large military establishment. This book fills that gap. This work provides an analysis of North Korea's nuclear controversy from a variety of perspectives, including: nuclear reactor technology and technology transfer; economic sanctions and incentives; confidence-building measures; environmental challenges; and the views of Korea and the major powers. From an economist's view an MX missile is like a...

This Companion begins by studying the eighteenth-century literary, historical and cultural contexts of Defoe's novel, exploring the reasons for its immense popularity in Britain and in its colonies in America and in the wider European world. Chapters from leading scholars discuss the social, economic and political dimensions of Crusoe's island story before examining the 'after life' of Robinson Crusoe, from the book's multitudinous translations to its cultural migrations and transformations into other media such as film and television. The First World War left a legacy of chaos that is still with us a century later. Why did European leaders resort to war and why did they not end it sooner? Roger L. Ransom sheds new light on this enduring puzzle by employing insights from prospect theory and notions of risk and uncertainty. He reveals how the interplay of confidence, fear, and a propensity to gamble encouraged aggressive behavior by leaders who pursued risky military strategies in hopes of winning the war. The result was a series of military disasters and a war of attrition which gradually exhausted the belligerents without producing any hope of ending the war. Ultimately, he shows that the outcome of the war rested as much on the ability of the Allied powers to muster their superior economic resources...

The East India Company's founding charter authorized it to 'wage war' and it had always used violence to gain its ends. But the creation of this new government marked the moment that the East India Company ceased to be a conventional international trading corporation dealing in silks and spices and became something much more unusual: an aggressive colonial power in the guise of a multinational business. In less than four decades it had trained up a security force of around...
