Rust is a new systems programming language that combines the performance and low-level control of C and C++ with memory safety and thread safety. Rust's modern, flexible types ensure your program is free of null pointer dereferences, double frees, dangling pointers, and similar bugs, all at compile time, without runtime overhead. In multi-threaded code, Rust catches data races at compile time, making concurrency much easier to use. Written by two experienced systems programmers, this book explains how Rust manages to bridge the gap between performance and safety, and how you can take advantage of it. It includes, How Rust represents values in memory. Complete explanations of ownership, moves, borrows, and...

Mind liberation is a process of unwinding through unlearning. A free mind is inclusive and absorbs more when in a liberated state. On the other hand, a tense mind has limited space for anything new. It clings to dogmas and detests change. Unless you learn to let go, you'll experience shrinkage of mind space in short, frustration. This is where the importance of spirituality comes in. Spirituality blends philosophy and psychology. Cutting across religious boundaries, you'll find that there's common ground in spiritual literature to inspire and lift your spirits when the chips are down. In this book, the author has included case studies drawn from real-life work situations to help you through experience simulation. Come and discover the...

Written by Asian scholars, **Mindful Communication for Sustainable Development: Perspectives from Asia** analyzes Asian philosophical ideas and communication theories that promote respect for cultural diversity, protection of environment, and 'sufficiency economic' models. It discusses how ancient Asian teachings, particularly from the Buddhist, Hindu, and Confucius schools of thought, can enrich modern-day communication needs and help to achieve the Sustainable Development Goals espoused by the United Nations. As a mindful communication revolution spreads across the world, especially in the West, this book draws attention to the danger of practicing mindfulness without its spiritual and...

When Mother Teresa, the Indian nun of Albanian origin, who founded the Missionaries of Charity in Calcutta on 7 October 1950, was canonized by Pope Francis in September 2016, he formally acknowledged what millions around the world had always held she was a saint who walked the earth ministering to the poor, the unwanted and the terminally ill. Raghu Rai, who photographed her for nearly five decades, from the early 1970s onwards, has taken some of the most iconic pictures of Saint Teresa that exist. He was present at the canonization ceremony in St. Peter's Square at the Vatican and the pictures he took there complete his pictorial biography. Divided into three sections, the book covers Mother Teresa's...

Niccolò Machiavelli is the most prominent and notorious theorist of violence in the history of European political thought - prominent, because he is the first to candidly discuss the role of violence in politics; and notorious, because he treats violence as virtue rather than as vice. In this original interpretation, Yves Winter reconstructs Machiavelli's theory of violence and shows how it challenges moral and metaphysical ideas. Winter attributes two central theses to Machiavelli: first, violence is not a generic technology of government but a strategy that tends to correlate with inequality and class conflict; and second, violence is best understood not in terms of conventional notions of law enforcement, coercion, or the proverbial...

In 2012, Jerry Pinto published his debut novel, *Em and the Big Hoom*, which drew upon his experience of living with a mother who was bipolar. It touched thousands of readers, among them many who had similar experiences of living with someone with a mental illness or infirmity. Some of these readers shared their stories with him, and agreed to share them with the world. *A Book of Light* collects these harrowing yet moving, even empowering, stories about the terror and majesty of love; the bleakness and unexpected grace of life; the fragility and immense strength of the human mind. There are no moral lessons in this book, or easy stories in which everything comes out right in the end. There will be questions you will want to...

How can people who speak different languages, worship different gods and subscribe to different conceptions of the good live together with a degree of civility, dignity and mutual respect? It is not easy to find an answer to this troubled question, given recent political developments in many parts of the world. Today, the world is marked by extreme intolerance towards racial, sexual, religious and ethnic minorities and refugees. It is stamped with the disturbing consequences of religious strife. In these troubled times, Rethinking Pluralism, Secularism and Tolerance: Anxieties of Coexistence takes on the difficult task of finding an answer to the question by analyzing and reinterpreting the concepts of secularism, pluralism and tolerance in...

India's foreign policy has witnessed a dramatic transformation since the end of the Cold War. Though academic study of Indian foreign policy has also shown a degree of maturity, theoretical developments have been underwhelming. Scholars have introduced new concepts and examined Indian foreign policy through new prisms, but a cohesive research agenda has not yet been charted. This volume intends to fill that void. It brings together new cutting-edge research in the field of Indian foreign policy - both at the theoretical and empirical level - so as to shape the discourse on foreign policy of one of the most important players in global politics. This volume explores key concepts like 'constructivism' and...

The promise of harnessing market forces to combat climate change has been unsettled by low carbon prices, financial losses, and ongoing controversies in global carbon markets. And yet governments around the world remain committed to market-based solutions to bring down greenhouse gas emissions. This book discusses what went wrong with the marketisation of climate change and what this means for the future of action on climate change. The book explores the co-production of capitalism and climate change by developing new understandings of relationships between the appropriation, commodification and capitalisation of nature. Classical Methods in Structure Elucidation of Natural Products

Acc. No : 41139

The structures of many natural products are given in standard textbooks on organic chemistry as 'established facts'. Yet for those natural products whose structures were determined between 1860 and 1960 by classical chemical methods, the lines of evidence are frequently buried under any number of investigations that led to dead ends and to revised structure assignments. Since very little is known about the structure clarification of these products at present, this volume serves to shed light once again on the achievements of previous generations of chemists, who worked with minimal experimental tools. The selection of the 25 representative examples is subjective and arbitrary, dictated by the author's pleasure in...

Drawing together the insights of postcolonial scholarship and cultural studies, Popular Postcolonialisms questions the place of 'the popular' in the postcolonial paradigm. Multidisciplinary in focus, this collection explores the extent to which popular forms are infused with colonial logics, and whether they can be employed by those advocating for change. It considers a range of fiction, film, and non-hegemonic cultural forms, engaging with topics such as environmental change, language activism, and cultural imperialism alongside analysis of figures like Tarzan and Frankenstein. Building on the work of cultural theorists, it asks whether the popular is actually where elite conceptions of the world may best be challenged. It also addresses middlebrow...
