

## Maven Cheat Sheet

by Michele Sacchetti (mikesac) via cheatography.com/34000/cs/10636/

Cleanup commands			
mvn clean De	elete target folder in the project including submodule's ones		
Compile commands			
mvn clean compile Con	clean compile Compile all code without running any test		
mvn clean test Con	clean test Compile source code and test code and executes Unit Test		
mvn clean package Con	npile source code and test code, executes unit test, if all tests pass, it package compiled code in output archive		
mvn clean verify Con	npile source/test code, executes unit test, package compiled code and then executes Integration tests		
Deploy commands			
mvn clean install Executes	s full compile steps and, if all test are succesful, deploy the resulting artifact into local maven repository		
mvn clean deploy Executes full compile steps and, if all test are successful, deploy the resulting artifact into local maven repository and deploy to remote maven repository if configured			
Resolution commands			
mvn dependency:tree	Resolves and displays the dependency tree for this project including subomdules		
mvn help:effective-pom	nvn help:effective-pom  Resolves and display the full pom hierarcy and displays it as a single pom		
Additional options			
Additional options			
-U	Re-evaluate SNAPSHOTS depenencies. If a newer snapshot is found on the repository it wull be re-downloded. Uneffective for stables versions		
-Dmaven.test.skip=true	Skip test execution phase		
-skipTests	Alias for -Dmaven.test.skip=true		
-P\${PROFILENAME}	Run the maven build with \${PROFILENAME} profile		
-0	Offline mode, run the build as if no network connection is available		
-pl \${MODULE1},\${MODULE	Run the build just on the given list of submodule. It can be a comma separated list of submodules directory or groupsId:artifactId values		
	groupsid.artifactio values		

-s \${SETTINGS\_XML\_FILE}

## **Maven Cheat Sheet**

## by Michele Sacchetti (mikesac) via cheatography.com/34000/cs/10636/

Maven Lifecycle				
Clean Lifecycle	Default Lifecycle		Site Lifecycle	
pre-clean	validate	test-compile	pre-site	
clean	initialize	process-test-classes	site	
post-clean	generate-sources	test	post-site	
	process-sources	prepare-package	site-deploy	
	generate-resources	package		
	process-resources	pre-integration-test		
	compile	integration-test		
	process-classes	post-integration-test		
	generate-test-sources	verify		
	process-test-sources	install		
	generate-test-resources	deploy		
	process-test-resources			
Remember that to trigger a lifecycle phase you must traverse all previous phases within the same lifecycle.
