Contents

PREFACE	x
1 PRELIMINARY CONCEPTS	1
1.1 Introduction	1
1.2 Historical Sketch	2
1.3 The Nonlinear Programming Problem	3
1.4 Mathematical Fundamentals	6
1.5 Conclusion	15
Problems	17
Computer Programs	17
2 ONE-DIMENSIONAL UNCONSTRAINED MINIMIZATION	21
2.1 Introduction	21
2.2 Single-Variable Minimization	21
2.3 Unimodality and Bracketing the Minimum	28
2.4 Fibonacci Method	30
2.5 Golden Section Method	36
2.6 Polynomial-Based Methods	39
2.7 Zero of a Function	43
2.8 Conclusion	46
Problems	47
Computer Programs	51

3 UNCONSTRAINED MINIMIZATION**56**

- 3.1 Introduction 56
- 3.2 Necessary and Sufficient Conditions for Optimality 57
- 3.3 Convexity 61
- 3.4 Basic Concepts: Starting Design, Direction Vector, and Step Size 63
- 3.5 The Steepest Descent Method 64
- 3.6 The Conjugate Gradient Method 70
- 3.7 Newton's Method 74
- 3.8 Quasi-Newton Methods 78
- 3.9 Trust Region Methods 81
- Problems 83
- Computer Programs 86

4 LINEAR PROGRAMMING**92**

- 4.1 Introduction 92
- 4.2 Linear Programming Problem 92
- 4.3 LP Problems Involving LE (\leq) Constraints 94
- 4.4 The Simplex Method 96
- 4.5 Treatment of GE and EQ Constraints 100
 - 4.5.1 *The Two-Phase Approach, 101*
 - 4.5.2 *The Big M Method, 104*
- 4.6 Revised Simplex Method 105
- 4.7 Duality in Linear Programming 108
- 4.8 The Dual Simplex Method 110
- 4.9 Sensitivity Analysis 113
- 4.10 Interior Approach of Dikin 116
- 4.11 Problem Modeling 119
- 4.12 Quadratic Programming and the Linear Complementary Problem (LCP) 125
- 4.13 Conclusion 128

Problems	128
Computer Programs	128

5 CONSTRAINED MINIMIZATION

141

5.1	Introduction and Problem Formulation	141
5.2	Graphical Solution of Two-Variable Problems	144
5.3	Necessary Conditions for Optimality	146
5.4	Sufficient Conditions for Optimality	157
5.5	Convex Problems	159
5.6	Sensitivity of Optimum Solution to Problem Parameters	161
5.7	Rosen's Gradient Projection Method for Linear Constraints	163
5.8	Zoutendijk's Method of Feasible Directions (Nonlinear Constraints)	168
5.9	The Generalized Reduced Gradient Method (Nonlinear Constraints)	176
5.10	Sequential Quadratic Programming	183
5.11	Summary of the Capabilities of Methods for Nonlinear Constrained Problems	189
5.12	Solved Examples	189
	Problems	195
	Computer Programs	203

6 PENALTY FUNCTION AND DUALITY BASED METHODS

222

6.1	Introduction	222
6.2	Exterior Penalty Functions	222
6.3	Interior Penalty Functions	227
6.4	Duality	229
6.5	The Augmented Lagrangian Method	235
6.6	Duality and Geometric Programming	242
	Problems	248
	Computer Programs	251

7 DIRECT SEARCH METHODS FOR NONLINEAR OPTIMIZATION**259**

- 7.1 Introduction 259
- 7.2 Cyclic Coordinate Search 259
- 7.3 Hooke and Jeeves Pattern Search Method 262
- 7.4 Rosenbrock's Method 263
- 7.5 Powell's Method of Conjugate Directions 265
- 7.6 Nelder and Mead Simplex Method 266
- 7.7 Simulated Annealing (SA) 272
- 7.8 Genetic Algorithm (GA) 276
- 7.9 Box's Complex Method for Constrained Problems 279
- 7.10 Conclusion 283
 - Problems 284
 - Computer Programs 286

8 INTEGER AND DISCRETE PROGRAMMING**296**

- 8.1 Introduction 296
- 8.2 Zero-One Programming 298
- 8.3 Branch and Bound Algorithm for Mixed Integers 303
- 8.4 Gomory Cut Method 306
- 8.5 Farkas' Method for Discrete Nonlinear Monotone Structural Problems 310
- 8.6 Genetic Algorithm for Discrete Programming 313
- 8.7 Conclusion 313
 - Problems 313
 - Computer Programs 316

9 DYNAMIC PROGRAMMING**327**

- 9.1 Introduction 327
- 9.2 General Definition of the Dynamic Programming Problem 329
- 9.3 Problem Modeling and Computer Implementation 332

- 9.4 Discussion and Conclusions 336
- Problems 336
- Computer Programs 337

**10 OPTIMIZATION APPLICATIONS FOR TRANSPORTATION,
ASSIGNMENT, AND NETWORK PROBLEMS 340**

- 10.1 Introduction 340
- 10.2 Transportation Problem 340
- 10.3 Assignment Problems 347
- 10.4 Network Problems 351
- 10.5 Conclusion 356
- Problems 356
- Computer Programs 359

11 PARETO OPTIMALITY 373

- 11.1 Introduction 373
- 11.2 Concept of Pareto Optimality 374
- 11.3 Generation of the Entire Pareto Curve 377
- 11.4 A Single Best Compromise Pareto Solution 379
- Problems 382

12 FINITE-ELEMENT-BASED OPTIMIZATION 385

- 12.1 Introduction 385
- 12.2 Parameter Optimization Using Gradient
Methods—Derivative Calculations 386
- 12.3 Shape Optimization 395
- 12.4 Topology Optimization of Continuum Structures 402
- 12.5 Optimization with Vibration Response 408
- 12.6 Concluding Remarks 412
- Problems 415
- Computer Programs 419
